It will also be noticed that these four lodges were without names, such as are now borne by lodges, but that they were designated by the signs of the taverns in which they held their meetings. Half a century elapsed before the lodges in England began to assume distinctive names. The first lodge to do so was Friendship Lodge No. 3, which is so styled in Cole's *List of Lodges for 1767*.

No difficulty or confusion, however, arose from this custom of designating lodges by the signs of the taverns in which they held their meetings, for it seldom happened that more than one lodge ever met at any tavern. "The practice," says Gould, "of any one tavern being common as a place of meeting, to two or more lodges, seems to have been almost unknown in the last century."¹

Two of the four taverns in which these four original lodges were held, and two of the lodges themselves, namely, the "Apple Tree," where the design of separating the Speculative from the Operative element was inaugurated, and the "Goose and Gridiron," where that design was consummated by the organization of the new Grand Lodge, particularly claim our attention.

¹ "The Four Old Lodges," by Robert Freke Gould, p. 13.

But it will be more convenient while engaged on this subject to trace the fate and fortune of the whole four.

In this investigation I have been greatly aided by the laborious and accurate treatise of Bro. Robert Freke Gould, of London, on the Four Old Lodges. After his exhaustive analysis there is but little chance of unearthing any new discoveries, though I have been able to add from other sources a few interesting facts.

The lodge first named on Anderson's list met at the "Goose and Gridiron Ale-house," and it was there that, on the 24th of June, 1717, the Grand Lodge of England was established. Elmes says that "Sir Christopher Wren was Master of St. Paul's Lodge, which during the building of the Cathedral of St. Paul's, met at the 'Goose and Gridiron' in St. Paul's Church-yard, and is now the Lodge of Antiquity, acting by immemorial prescription; and he regularly presided at its meetings for upward of eighteen years."¹

Dr. Oliver says that Dr. Desaguliers, who may be properly reputed as the principal founder of modern Speculative Freemasonry, was initiated into the ceremonies of the Operative system, such as they were, in the lodge that met at the "Goose and Gridiron," and the date assigned for his admission is the year 1712.

Larwood and Hotten in their *History of Sign Boards*, copying from a paper of the *Tatler*, say that the Tavern was originally a Music house, with the sign of the "Mitre." When it ceased to be a Music house the succeeding landlord chose for his sign a goose stroking the bars of a gridiron with his foot in ridicule of the "Swan and Harp," which was a common sign for the early music houses.² I doubt the truth of this origin, and think it more likely that the "Swan and Harp" degenerated into the "Goose and Gridiron" by the same process of blundering, so common in the history of signs, which corrupted "God encompasseth us" into the "Goat and Compasses" or the "Belle Sauvage" into the "Bell and Savage."

In the list of lodges for 1725 to 1730 contained in the Minute Book of the Grand Lodge of England, Lodge No. 1 is still recorded as holding its meetings at the "Goose and Gridiron," whence, however, it not very long after removed, for in the next list, from 1730 to 1732, it is recorded as being held at the "King's Arms," in St Paul's Churchyard.

¹ Elmes's "Sir Christopher Wren und his Times," quoted in the *Keystone*.

² "History of Sign Boards," p. 445.

The "King's Arms" continued to be its place of meeting (except a short time in 1735, when it met at the "Paul's Head," Ludgate Street) until 1768, when it removed to the "Mitre." Eight years before, it assumed the name of the "West India and American Lodge." In 1770 it became the "Lodge of Antiquity." Of this lodge the distinguished Masonic writer, William Preston, was a member. In 1779 it temporarily seceded from the Grand Lodge, and formed a schismatic Grand Lodge. The history of this schism will be the subject of a future chapter.

At the union of the two Grand Lodges of "Moderns" and "Ancients," it lost its number "One" in drawing lots and became number "Two," which number it still retains, though it is always recognized as the "premier lodge of England," and therefore of the world.

The "Goose and Gridiron Tavern" continued to be the place of meeting of the Grand Lodge until 1721, when in consequence of the need of more room from the increase of lodges the annual feast was held at Stationers' Hall.¹ The Grand Lodge never returned to the "Goose and Gridiron." It afterward held its quarterly communications at various taverns, and the annual assembly and feast always at some one of the Halls of the different Livery Companies of London. This migratory system prevailed until the Freemasons were able to erect a Hall of their own.

The second lodge which engaged in 1717 in the organization of the Grand Lodge, met at the "Crown Ale-house" in Parker's Lane, near Drury Lane. According to Bro. Gould, it removed about 1723 to the "Queen's Head," Turnstile, Holborn; to the "Green Lettuce," Brownlow Street, in 1725;² thence to the "Rose and Rummer" in 1728, and to the "Rose and Buffer" in 1729. In 1730 it met at the "Bull and Gate," Holborn, and appearing for the last time in the list for 1736, was struck off the roll in 1740.

But it had ceased to exist before that year, for Anderson, in the list published by him in 1738, says: "The Crown in Parker's Lane, the other of the four old Lodges, is now extinct."³

The third lodge engaged in the Grand Lodge organization was that which met at the "Apple Tree Tavern" in 1717. It was there

¹ Anderson's "Constitutions," 2d edit., p. 112.

² Gould's "Four Old Lodges," p. 6.

³ Anderson's "Constitutions," 2d edit., p. 185.

that in February of that year the Freemasons who were preparing to sever the connection between the Operative and Theoretic Masons, took the preliminary steps toward effecting that design. From the "Apple Tree" it removed about 1723 to the "Queen's Head," Knave's Acre; thence in 1740 to the "George and Dragon," Portland Street, Oxford Market; thence in 1744 to the "Swan" in the same region. In the lists from 1768 to 1793 it is described as the Lodge of Fortitude. After various other migrations, it amalgamated, in 1818, with the Old Cumberland Lodge, and is now the Fortitude and Old Cumberland Lodge No. 12 on the roll of the United Grand Lodge of England.¹

Of this third or "Apple Tree" Lodge, Anthony Sayer, the first Grand Master of England, was a member, and most probably was in 1717 or had been previously the Master. In 1723 he is recorded as the Senior Warden of the Lodge, which is certainly an evidence of his Masonic zeal.

The last of the four old Lodges which constituted the Grand Lodge met in 1717 at the "Rummer and Grapes Tavern," Westminster. It moved thence to the "Horn Tavern," Westminster, in 1723. It seemed to be blessed with a spirit of permanency which did not appertain to the three other lodges, for it remained at the "Horn" for forty-three years, not migrating until 1767, when it went to the "Fleece," Tothill Street, Westminster. The year after it assumed the name of the Old Horn Lodge. In 1774 it united with and adopted the name of the Somerset House Lodge, and met at first at the "Adelphi" and afterward until 1815 at "Freemasons' Tavern." In 1828 it absorbed the Royal Inverness Lodge, and is now registered on the roll of the United Grand Lodge of England as the Royal Somerset House and Inverness Lodge No. 4.²

George Payne, who was twice Grand Master, in 1718 and in 1720, had been Master of the original Rummer and Grapes Lodge. He must have been so before his first election as Grand Master in 1718, and he is recorded in the first edition of Anderson as having been its Master again in 1723. At one time the lodge received an important benefit from this circumstance, as is shown by the following record taken by Entick from the Minutes of the Grand Lodge.

¹ Gould, "Four Old Lodges," p. 7.

² Ibid.

In 1747 the lodge, whose number had been changed to No. 2, was erased from the Books of Lodges for not obeying an order of the Quarterly Communication. But in 1753, the members having petitioned the Grand Lodge for restoration, Entick says in his edition of the *Constitutions* that "after a long debate, it was ordered that in respect to Brother Payne, late Grand Master, the Lodge No. 2 lately held at the 'Horn' in Palace Yard, Westminster, should be restored and have its former rank and place in the list of lodges."

Payne, who was a scholar, had done much for the advancement of Speculative Freemasonry, and the Grand Lodge by this act paid a fitting homage to his character and showed itself not unmindful of his services to the Fraternity.

Such are the facts, well authenticated by unquestioned historical authorities, which are connected with the establishment of the first Grand Lodge of Speculative Freemasons, not only in England, but in the world. Seeing that nothing analogous has been anywhere found in the records of Masonry, irrespective of its unauthenticated legends and traditions, it is proper, before proceeding to inquire into the condition of the Grand Lodge immediately subsequent to its organization at the "Goose and Gridiron Tavern," that the much discussed question, whether this organization was the invention of an entirely new system or only the revival of an old, and for a short time discontinued, one should be fairly considered.

To this important subject our attention will be directed in the following chapter.

CHAPTER XXX

WAS THE ORGANIZATION OF THE GRAND LODGE IN 1717 A REVIVAL?

It has been the practice of all Masonic writers from the earliest period of its literature to a very recent day, to designate the transaction which resulted in the organization of the Grand Lodge of England in the year 1717 as the "Revival of Freemasonry."

Anderson, writing in 1723, in the first edition of the *Constitutions*, says that "the freeborn British nation had revived the drooping Lodges of London," and in the year 1738, in the second edition of the same work, he asserts that the old Brothers who met at the "Apple Tree Tavern" "forthwith revived the Quarterly Communication of the Officers of Lodges, called the Grand Lodge."

This statement has been repeated by Preston, Calcott, Oliver, and all the older Masonic authors who have written upon the subject, until it has become an almost universal belief among the larger portion of the Fraternity that from some unknown or indefinite era until the second decade of the 18th century the Grand Lodge had been in a state of profound slumber, and that the Quarterly Communications, once so common, had long been discontinued, through the inertness and indifference of the Craft, while the lodges were drooping like sickly plants.

But in the year 1717, owing to the successful efforts of a few learned scholars, such as Desaguliers, Anderson, and Payne, the Grand Lodge had been awakened from its sleep of years, the Quarterly Communications had been renewed as of old, and the lodges had sprung into fresh and vigorous existence. Such was for a long time and indeed still is, to a diminished extent, the orthodox Masonic creed respecting the Revival of Freemasonry in the 18th century.

But this creed, popular as it is, has within a few years past been ruthlessly attacked by some of our more advanced thinkers, who are

skeptical where to doubt is wise, and who are not prepared to accept legends as facts, nor to confound tradition with history.

And now it is argued that before the year 1717 there never was a Grand Lodge in England, and, of course, there could have been no Quarterly Communications. Therefore, as there had not been a previous life, there could have been no revival, but that the Grand Lodge established in June, 1717, was a new invention, and the introduction of a system or plan of Freemasonry never before heard of or seen.

Which of these two hypotheses is the correct one, or whether there is not a *mezzo termine*—a middle point or just mean between the two—are questions well worthy of examination.

Let us first inquire what was the character of the four Lodges, and indeed of all the lodges in England which were in existence at the time of the so-called "Revival," or had existed at any previous time. What was the authority under which they acted, what was their character, and how was this character affected by the establishment of a new Grand Lodge?

As to the authority under which the four old lodges, as well as all others that existed in England, acted, it must be admitted that they derived that authority from no power outside of themselves. "The authority," says Bro. Hughan, "by which they worked prior to the advent of the Grand Lodge was their own. We know of no other prior to that period for England."¹

Preston admits that previous to the year 1717 "a sufficient number of Masons met together within a certain district, with the consent of the sheriff or chief magistrate of the place, were empowered to make Masons and practice the rites of Masonry without Warrant of Constitution."²

Bro. Hughan substantially repeats this statement in the following language:

"A body of Masons in any district or town appear usually to have congregated and formed lodges, and they had the 'Ancient Charges' or Rolls to guide them as to the rules and regulations for Masons generally. There were no Grand Masters or Grand Lodges before 1716-17, and so there were no authorities excepting such as the annual assemblies and the 'Old Charges' furnished in England."

¹ See *Voice of Masonry*, vol. xiii., p. 571.

² Preston's "Illustrations," p. 191, note.

He admits that "there were laws for the government of the lodges apparently, though unwritten, which were duly observed by the brotherhood."

This view is confirmed, impliedly, at least, by all the Old Constitutions in manuscript, from the most ancient to the most recent. In none of these (and the last of them has a date which is only three years prior to the so-called "Revival") do we find any reference whatever to a Grand Lodge or to a Grand Master. But they repeatedly speak of lodges in which Masons were to be "accepted," and the counsels of which were to be kept secret by the Fellows.

The only allusion made to the manner of organizing a lodge is contained in the Harleian MS., which prescribes that it must consist of not less than five Freemasons, one of whom must be a master or warden of the limit or division wherein the lodge is held.

From this regulation we are authorized, I think, to conclude, that in 1670, which is the date of the Harleian MS., nothing more was necessary in forming a lodge in which "to make Masons or practice the rites of Masonry," as Preston gives the phrase, than that a requisite number should be present, with a Master or Warden working in that locality.

Now the Master, as the word is here used, meant a Freemason of the highest rank, who was engaged in building with workmen under him, and a Warden was one who having passed out of his apprenticeship, had become a Fellow and was invested with an authority over the other Fellows, inferior only to that of the Master. The word and the office are recognized in the early English Charters as pertaining to the ancient guilds. Thus the Charters granted in 1354 by Edward III. gave the London Companies the privilege to elect annually for their government "a certain number of Wardens." In 1377 an oath was prescribed called the "Oath of the Wardens of the Crafts," which contained these words: "Ye shall swere that ye shall wele and treuly oversee the Craft of — whereof ye be chosen Wardeyns for the year." In the reign of Elizabeth the presiding officer began to be called the Master, and in the reign of James I., between 1603 and 1625, the guilds were generally governed by a Master and Wardens. The government of lodges by a Master and Wardens must have been introduced into the guilds of Masons in the 17th century, and this is rendered probable by the fact that in the Harleian MS. just quoted, and whose conjectural date is 1670, it

is provided "that for the future the sayd Society, Company and Fraternity of Free Masons shall be regulated and governed by One Master & Assembly & Wardens as the said Company shall think to choose, at every yearely General Assembly."

A similar officer in the *Hütten* or Lodges of the old German Freemasons was called the *Parlirer*.

We arrive, then, at the conclusion that in the 17th century, while there were permanent lodges in various places which were presided over by a Master and Wardens, any five Freemasons might open a temporary or "occasional" lodge for the admission of members of the Craft, provided one of these five was either the Master or a Warden of a permanent lodge in the neighborhood.

I know of no other way of reasonably interpreting the 26th article contained in the Harleian Constitutions.

But nowhere, in any of the Old Constitutions, before or after the Harleian, even as late as 1714, which is the date of the Papworth MS., do we find the slightest allusion to any exterior authority which was required to constitute either permanent or temporary lodges.

The statement of Preston is thus fully sustained by the concurrent testimony of the old manuscripts. Therefore, when Anderson in his first edition gives the form of constituting a new lodge and says that it is "according to the ancient usages of Masonry,"¹ he indulges in a rhetorical flourish that has no foundation in truth. There is no evidence of the slightest historical value that any such usage existed before the second decade of the 18th century.

But immediately after what is called the Revival the system of forming lodges which had been practiced was entirely changed. Preston says that among a variety of regulations which were proposed and agreed to at the meeting in 1717, was the following:

"That the privilege of assembling as Masons, which had been hitherto unlimited, should be vested in certain lodges or assemblies of Masons convened in certain places; and that every lodge to be hereafter convened, except the four old lodges at this time existing, should be legally authorized to act by a warrant from the Grand Master for the time being granted to certain individuals by petition, with the consent and approbation of the Grand Lodge in communi-

¹ Anderson's "Constitutions," 1st edition, p. 71.

cation; and that without such warrant no lodge should be hereafter deemed regular or constitutional."¹

We have this regulation on the evidence of Preston alone, for according to the unfortunate usage of our early Masonic writers, he cites no authority. It is not mentioned by Anderson, and the preserved minutes of the Grand Lodge of England extend no farther than the 25th of November, 1723.

Still, as Preston gives it within quotation marks, and as it bears internal evidence in its phraseology of having been a formal regulation adopted at or very near the period to which Preston assigns it, we may accept it as authentic and suppose that he had access to sources of information no longer extant. As the Grand Lodge was organized in 1717 in the rooms of the lodge of which Preston afterward became a member, it is very possible that that lodge may have had in its possession the full records of that meeting, which were in existence when Preston wrote, but have since been lost.²

At all events the "General Regulations," compiled by Grand Master Payne in 1720, and approved the next year by the Grand Lodge, contain a similar provision in the following words:

"If any set or number of Masons shall take upon themselves to form a lodge without the Grand Master's warrant, the regular lodges are not to countenance them, nor own them as fair Brethren and duly formed, nor approve of their acts and deeds; but must treat them as rebels, until they humble themselves, as the Grand Master shall, in his prudence, direct; and until he approve of them by his warrant."³

If we compare the usage by which lodges were brought into existence under the wholly Operative rules, and that adopted by the Speculative Freemasons after the organization of the Grand Lodge in 1717, we will very clearly see that there was here no revival of an old system which had fallen into decay and disuse, but the invention of one that was entirely new and never before heard of.

The next point to be examined in discussing the question whether

¹ Preston, "Illustrations," p. 191.

² Findel ("History," p. 140), says the regulation was adopted at a later period, in 1723. This he had no right to do. Preston is our only authority for the regulation, and his statement must be taken without qualification or wholly rejected. Findel was probably led into his error by seeing the General Regulation above quoted, which was very similar. This was published in 1723, but it had been adopted by the Grand Lodge in 1721.

³ "General Regulations," art. viii. Anderson, 1st edition, p. 60.

or not the transactions of 1717 constituted a Revival will be the character of the lodges before and after those transactions as compared with each other.

During the 17th century, to go no farther back, and up to the second decade of the 18th, all the lodges of Freemasons in England were Operative lodges, that is to say, the larger portion of their members were working Masons, engaged in building according to certain principles of architecture with which they alone were acquainted.

They had admitted among their members persons of rank or learning who were not Operative Masons or builders by profession, but all their laws and regulations were applicable to a society of mechanics or workmen.

There are no minutes in England, as there are in Scotland, of lodges prior to the beginning of the 18th century. They have all been lost, and the only one remaining is that of the Alnwick Lodge, the records of which begin in the year 1701.

But the "Old Charges" contained in the manuscript Constitutions which extend from 1390 to 1714, of which more than twenty have been preserved, supply us (especially the later ones of the 17th century) with the regulations by which the Craft was governed during the ante-revival period.

It is unnecessary to quote *in extenso* any one of these Old Constitutions. It is sufficient to say that they bear the strongest internal evidence that they were compiled for the use of purely Operative Masons.

They were wholly inapplicable to any merely moral or speculative association. Excepting those clauses which directed how the craftsmen were to conduct themselves both in the lodge and out of it, so that the reputation of the Brotherhood should not be injured, they were mainly engaged in prescribing how the Masons should labor in their art of building, so that the employer might be "truly served." The same regulations would be just as applicable, *mutatis mutandis*, to a Guild of Carpenters, of Smiths, or any other mechanical trade, as to one of Masons.

But while these lodges were wholly Operative in their character and design, there is abundant evidence, as I have heretofore shown, that they admitted into their companionship persons who were not Masons by profession. The article in the Harleian Constitutions,

to which reference has just been made, while stating that a lodge called to make a Mason must consist of five Free Masons, adds that one of them at least shall be "of the trade of Free Masonry." The other four, of course, might be non-operatives, that is to say, persons of rank, wealth, or learning who were sometimes called Theoretic and sometimes Gentlemen Masons.

But in the laws enacted for the government of the Craft, no exceptional provision was made in them, by which any difference was created in the privileges of the two classes.

The admission of these Theoretic Masons into the Fraternity did not, therefore, in the slightest degree affect the Operative character of the Craft, except in so far as that the friendly collision with men of education must have given to the less educated members a portion of refinement that could not fail to elevate them above the other Craft Guilds.

Yet so intimate was the connection between these Operative Freemasons and their successors, the Speculatives, that the code of laws prepared in 1721 by Anderson at the direction of the Grand Lodge, and published in 1723, under the title of *The Charges of a Free-Mason, for the use of the Lodges in London*, was a transcript with no important variations from these Old Constitutions, or as Anderson calls them, the "Old Gothic Constitutions."

As these "Charges" have now been accepted by the modern Fraternity of English-speaking Freemasons as the basis of what are called the Landmarks of the Order, to make them of any use it has been found absolutely necessary to give them a symbolic or figurative sense.

Thus, "to work," which in the Operative Constitution signifies "to build," is interpreted in the Speculative system as meaning "to confer degrees;" the clause which prescribes that "all the tools used in working shall be approved by the Grand Lodge" is interpreted as denoting that the ritual, ceremonies, and by-laws of every lodge must be subjected to the supervision of the Grand Lodge. Thus every regulation which clearly referred to a fraternity of builders has, in the course of the modifications which were necessary to render it applicable to a moral association, been made to adopt a figurative sense.

Yet the significant fact that while in the government of Speculative Freemasonry the spirit and meaning of these "Old Charges"

have been entirely altered, the words have been carefully retained is an important and irrefutable proof that the Speculative system is the direct successor of the Operative.

So when the Theoretic or Gentleman Masons had, in the close of the 17th and the beginning of the 18th century, acquired such a preponderance in numbers and in influence in the London lodges that they were able so to affect the character of those lodges as to divert them from the practice of an Operative art to the pursuit of a Speculative science, such change could not be called a Revival, if we respected the meaning of that word. Nothing of the kind had been known before; and when the members of the lodges ceased to pay any attention to the craft or mystery of practical stonemasonry, and resolved to treat it thenceforth in a purely symbolic sense, this act could be deemed nothing else but a new departure in the career of Freemasonry.

The ship was still there, but the object of the voyage had been changed.

Again: we find a third change in the character of the Masonic society when we compare the general government of the Craft as it appears before and after the year 1717.

This change is particularly striking in respect to the way in which the Craft were ruled in their Operative days, compared with the system which was adopted by the Speculative Freemasons.

It has already been said that prior to the year 1717, there never were Grand Masters or a Grand Lodge except such as were mythically constructed by the romantic genius of Dr. Anderson.

The only historical records that we have of the condition of Freemasonry in England and of the usages of the Craft during the three centuries which preceded the 18th, are to be found in the old manuscript Constitutions.

A thoroughly careful examination of these documents will show that neither in the *Legend of the Craft*, which constitutes the introductory portion of each Constitution, nor in the "Charges" which follow, is there the slightest allusion, either in direct language or by implication, to the office of Grand Master or to the body now called a Grand Lodge.

But it can not be denied that there was an annual convocation of the Craft, which was called sometimes the "Congregation," sometimes the "Assembly," and sometimes the "General Assem-

bly." We must accept this as an historical fact, or we must repudiate all the manuscript Constitutions from the 14th to the 18th century. In all of them there is an unmistakable allusion to this annual convocation of the Craft, and regulations are made concerning attendance on it.

Thus the Halliwell MS. says that "every Master who is a Mason must be present at the general congregation if he is duly informed where the assembly is to be holden; and to that assembly he must go unless he have a reasonable excuse."

The precise words of this most ancient of all the Old Masonic Constitutions, dating, as it does, not later than toward the close of the 14th century, are as follows:

That every mayster, that ys a mason,
Must ben at the generale congregacyon,
So that he hyt reasonably y-tolde
Where that the semble' schal be holde;
And to that semble' he must nede gon,
But he have a resonabul skwsacyon.

The Cooke MS., which is about a century later, has a similar provision. This manuscript is important, inasmuch as it describes the character of the Assembly and defines the purposes for which it was to be convoked.

It states that the Assembly, or, as it is there called, the Congregation, shall assemble once a year, or at least once in three years, for the examination of Master Masons, to see that they possessed sufficient skill and knowledge in their art.

An important admission in this manuscript is that the regulation for the government of this Assembly "is written and taught in our book of charges."

All the subsequent Constitutions make a similar statement in words that do not substantially vary.

The Harleian MS., whose date is about the last quarter of the 17th century, says that Euclid gave the admonition that the Masons were to assemble once a year to take counsel how the Craft could best work so as to serve their Lord and Master for his profit and their credit, and to correct such as had offended. And in another MS., much earlier than the Harleian, it is said that the Freemasons should attend the Assembly, and if any had trespassed against the Craft, he should there abide the award of the Masters and Fellows

This Assembly met that statutes or regulations might be enacted for the government of the Craft, and that controversies between the craftsmen might be determined

It was both a legislative and a judicial body, and in these respects resembled the Grand Lodge of the present day, but in no other way was there any similitude between the two.

Now, leaving out of the question the legendary parts which ascribe the origin of this annual assembly to Euclid or Athelstan or Prince Edwin, which, of course, are of no historical authority, it is impossible to believe that all these Constitutions should speak of the existence of such an Assembly at the time of writing, and lay down a regulation in the most positive terms, that every Mason should attend it, if the whole were a mere figment of the imagination.

We can account for the mythical character of a legend, but we cannot for the mythical character of a law which has been enacted at a specified time for the government of an association, which law continues to be repeated in all the copies of the statutes written or published for more than three centuries continuously.

In the establishment of a Grand Lodge with quarterly meetings and an annual one in which a Grand Master and other Grand Officers were elected for the following year, we find no analogy to anything that had existed previous to the year 1717. We cannot, therefore, in these points call the organization which took place in that year a "Revival." It was, rather, a radical change in the construction of the system.

Another change, and a very important one, too, which occurred a short time after the establishment of the Grand Lodge of England in 1717, was that which had reference to the ritual or forms of initiation. During the purely Operative period of Freemasonry it is now well known that there was but one esoteric system of admission to the brotherhood of the Craft. This we also know was common to the three classes of Masters, Fellows, and Apprentices. There was, in fact, if we may use the technical language of modern Freemasonry, but one degree practiced by the Operative Craft.

When the Theoretic members of the London lodges dissociated from the Operatives in the year 1717 and formed the Speculative system, they, of course, at first accepted the old method of admission. But in the course of two or three years they adopted another

system and fabricated what are now called the three degrees of ancient Craft Masonry, each one of which was exclusively appropriated as a form of initiation to one of the three classes and to that one only. What had formerly been a division of the Fraternity into three classes or ranks became now a division into three degrees.¹

This was a most important change, and as nothing of the kind was known to the Craft in the years prior to the establishment of the Grand Lodge, it certainly can not be considered a correct use of the word to call an entire change of a system and the adoption of a new one a revival of the old.

Bro. W. P. Buchan, in numerous articles published in the *London Freeman*, about 1870, attacked what has been called the Revival theory with much vigor but with exaggerated views. He contends that "our system of degrees, words, grips, signs, etc., was not in existence until about A. D. 1717, and he attributes the present system to the inventive genius of Anderson and Desaguliers. Hence he contends that modern Freemasonry was simply a reconstruction of an ancient society, viz., of some old Pagan philosophy. This he more fully explains in these words:

"Before the 18th century we had a renaissance of Pagan architecture; then to follow suit in the 18th century we had a renaissance in a new dress of Pagan mysticism; but for neither are we indebted to the Operative Masons, although the Operative Masons were made use of in both cases."²

There is in this statement a mixture of truth and error. It is undoubtedly true that the three degrees into which the system is now divided were unknown to the Freemasons of the 17th century, and that they were an invention of those scholars who organized the Grand Lodge of Speculative Freemasonry, mainly of Dr. Desaguliers, assisted perhaps by Anderson and Payne. But there were signs of recognition, methods of government, legends, and some form, though a simple one of initiation, which were in existence prior to the 18th century, which formed the kernel of the more elaborate system of the modern Freemasons.

Bro. Hughan calls attention to the fact, if there were need of

¹It is not necessary to enter at this time into an examination and defense of this hypothesis, as the history of the fabrication of the three degrees will be made the subject of a future chapter.

²*London Freeman*, September 29, 1871.

proofs, in addition to what has been found in the authentic accounts of the mediaeval Freemasons, that in the *Tatler*, published in 1709, is a passage in which the writer, speaking of a class of men called the "Pretty Fellows," says that "they have their signs and tokens like the Freemasons."¹

In fact, Bro. Buchan admits that the "elements or ground work" of the system existed before the year 1717.

This is in fact the only hypothesis that can be successfully maintained on the subject.

The Grand Lodge of Speculative Freemasons, which was organized at the "Goose and Gridiron Tavern" in London in the year 1717, was a new system, founded on the older one which had existed in England years before, and which had been derived from the Operative Freemasons of the Middle Ages.

It was not, as Hyneman² has called it, a Revolution, for that would indicate a violent disruption, and a sudden and entire change of principles.

It was not a Revival, as most of the earlier writers have entitled it, for we should thus infer that the new system was only a renewal without change of the old one.

But it was a gradual transition from an old into a new system—of Operative into Speculative Freemasonry—in which Transition the later system has been built upon the earlier, and the practical art of building has been spiritualized into a theoretic science of morality, illustrated by a symbolism drawn principally from architecture.

We thus recognize the regular descent of the modern Speculative Freemasons from their older Operative predecessors, and we answer the question which forms the heading of the present chapter.

But it has been said that in one sense at least we may with propriety apply the word "Revival" to the transactions of the early part of the 18th century. Operative Freemasonry, and what very little of the Speculative element that had been engrafted on it, had, we are told, begun to decline in England in the latter part of the 17th century.

¹ *Voice of Masonry*, April, 1873.

² In a work abounding in errors, entitled "Ancient York and London Grand Lodges," by Lern Hyneman, Philadelphia, 1872. Its fallacies as a contribution to Masonic history have been shown by the incisive but courteous criticism of Bro. Hughan.

If we may rely on the authority of Preston, the fraternity at the time of the revolution in 1688 was so much reduced in the south of England, that no more than seven regular lodges met in London and its suburbs, of which two only were worthy of notice.¹ Anderson mentions seven by their locality, and says that there were "some more that assembled stately."²

These were, of course, all purely Operative lodges. Thus one of them, Anderson tells us, was called upon to give architectural counsel as to the best design of rebuilding St. Thomas's Hospital,³ a clear evidence that its members were practical builders.

But this decline in the number of the lodges may possibly be attributed to local and temporary causes. It was certainly not accompanied, as might have been expected, with a corresponding decline in the popularity of the institution, for if we may believe the same authority, "at a general assembly and feast of the Masons in 1697, many noble and eminent brethren were present."⁴

But admitting that there was a decline, it was simply a decline of the Operative lodges. And the act of 1717 was not to revive them, but eventually to extinguish them and to establish Speculative lodges in their place; nor was it to revive Operative Freemasonry, but to establish for it another and an entirely different institution.

We arrive, therefore, again at the legitimate conclusion that the establishment of the Grand Lodge of England in June, 1717, was not a revival of the old system of Freemasonry, which soon after became extinct, but its change into a new system.

What remained of the Operative Freemasons who did go into the new association were merged in the Masons' Company, or acted thenceforward as individual craftsmen unconnected with a guild.

CHAPTER XXXI

THE EARLY YEARS OF SPECULATIVE FREEMASONRY IN ENGLAND

ON the feast of St. John the Baptist, the 24th of June, in the year 1717, the principal members of the four old Operative Lodges in London, who had previously met in February and agreed to constitute a Grand Lodge of Free and Accepted Masons, assembled at the "Goose and Gridiron Tavern" in St. Paul's Churchyard with some other old Masons, and there and then organized the new Grand Lodge.

This was accomplished by electing a Grand Master and two Grand Wardens, after which the Brethren proceeded to partake of a dinner, a custom which has ever since been continued under the name of the Grand Feast.

As the written minutes in the record book of the Grand Lodge do not begin before November, 1723, we are indebted for all that we know of the transactions on that eventful day to the meager account contained in the 2d edition of Dr. Anderson's *Constitutions*, with a few additional details which are given by Preston in his *Illustrations*.

Preston cites no authority for the facts which he has stated. But as the meeting of the Grand Lodge was held in the room of the lodge which afterward became the Lodge of Antiquity, and of which Preston was a prominent member, it is not improbable that some draft of those early proceedings may have been contained in the archives of that lodge, which have been since lost. To these Preston would naturally, from his connection with the lodge, have had access. If such were the case, it is very certain that he must have made use of them in compiling his history.

I am disposed, therefore, from these circumstances together with the consideration of the character of Preston, to accept his state-

ments as authentic, though they are unsupported by any contemporary authority now extant.¹

The first indication of a change, though not purposely intended, by which the Operative system was to become eventually a Speculative one, is seen in the election as presiding officers of three persons who were not Operative Masons.

Mr. Anthony Sayer, the first Grand Master, is described by Anderson in his record of the election by the legal title of "Gentleman," a title which, by the laws of honor, was bestowed upon one who can live without manual labor and can support himself without interfering in any mechanical employment. Such a person, say the heralds, "is called Mr., and may write himself Gentleman."²

"Anthony Sayer, Gentleman," as he is described in the record, was undoubtedly a mere Theoretic member of the Masonic association and not an Operative Mason.

Of the two Grand Wardens who were elected at the same time, one was Captain Joseph Elliot. Of his social position we have no further knowledge that what is conveyed by the title prefixed to his name, which would indicate that he was of the military profession, probably a retired or half-pay officer of the army.

The other Grand Warden was Mr. Jacob Lamball, who is designated as being a Carpenter.

Thus we see that the first three officers of the Grand Lodge were not Operative members of the Craft of Masonry.

The choice, however, of a Carpenter, a profession closely connected with that of the Masons, affords proof that it was not intended to confine the future Speculative society altogether to persons who were not mechanics.

At the succeeding election in 1718 George Payne, Esq., was elected Grand Master. He was an Antiquary and scholar of considerable ability, and was well calculated to represent the Speculative character of the new association.

The Wardens were Mr. John Cordwell and Mr. Thomas Morrice. The former is described as a Carpenter and the latter as a Stonecutter.

¹ Preston is, however, sometimes careless, a charge to which all the early Masonic writers are amenable. Thus, he says that Sayer appointed his Wardens. But these officers were, like the Grand Master, elected until 1721, when, for the first time, they were appointed by the Grand Master.

² "Laws of Honor," p. 286.

While the choice of these officers was an evident concession to the old Operative element, the election of Payne was a step forward in the progressive movement which a few years afterward led to the total emancipation of Speculative Freemasonry from all connection with practical building. Northouck attests that "to the active zeal of Grand Master Payne the Society are under a lasting obligation for introducing brethren of noble rank into the fraternity."¹

From the very beginning the Grand Lodge had confined its selection of Grand Masters to persons of good social position, of learning, or of rank, though for a few years it occasionally conferred the Grand Wardenship on Operative Masons or on craftsmen of other trades.

In the year 1719 Dr. John Theophilus Desaguliers was elected Grand Master, and Anthony Sayer and Thomas Morrice Grand Wardens. Desaguliers was a natural philosopher of much reputation and a Fellow of the Royal Society. Sayer had been the first Grand Master, and Morrice, who was a stonecutter or Operative Mason, had been a Warden the previous year.

In 1720 Payne was again elected Grand Master, and Thomas Hobby and Richard Ware were chosen as Grand Wardens. Hobby, like his predecessor, Morrice, was an Operative Mason or stonecutter, and Ware was a mathematician.

In 1721 the Duke of Montagu was elected Grand Master. He was the first nobleman who had served in that capacity, and from that day to the present the throne of the Grand Lodge of England, as it is technically styled, has without a single exception been occupied by persons of royal or noble rank.

In this year the office of Deputy Grand Master was created, and the power of choosing him as well as the Grand Wardens was taken from the Grand Lodge and invested in the Grand Master, a law which still continues in force.

Accordingly, the Duke of Montagu appointed John Beal, a physician, his Deputy, and Josiah Villeneau, who was an upholsterer, and again Thomas Morrice, his Wardens.

The Duke of Wharton, who was Grand Master in 1722, appointed Dr. Desaguliers his Deputy, and Joshua Timson and James

¹ Northouck's "Constitutions anno 1784," p. 207. Entick ("Constitutions," 1756, p. 190) had made a similar remark.

Anderson his Wardens. Timson was a blacksmith and Anderson a clergyman, well-known afterward as the Compiler of the first and second editions of the *Book of Constitutions*.

In 1723 the Earl of Dalkeith was Grand Master, Desaguliers again Deputy, and Francis Sorrel, Esq., and John Senex, a book-seller, Wardens.

From 1717 to 1722 the claims of the Operative Masons to hold a share of the offices had, as Gould¹ remarks, been fairly recognized. The appointment of Stonecutters, Carpenters, and other mechanics as Grand Wardens had been a concession by the Speculative members to the old Operative element.

But in 1723 the struggle between the two, which is noticed in the records of the society only by its results, terminated in the complete victory of the former, who from that time restricted the offices to persons of rank, of influence, or of learning. From the year 1723 no Operative Mason or workman of any trade was ever appointed as a Warden. In the language of Gould, "they could justly complain of their total supercession in the offices of the society."

This silent progress of events shows very clearly how the Freemasons who founded the Speculative Grand Lodge in 1717 on the principles and practices of Operative Freemasonry as they prevailed in the four Lodges of London, gradually worked themselves out of all connection with their Operative brethren and eventually made Freemasonry what it now is, a purely Speculative, philosophical, and moral institution.

Upon the coalition of the four Lodges into one supervising body, the next step in the progress to pure Speculative Freemasonry was to prevent the formation of other lodges which might be independent of the supervision of the Grand Lodge, and thus present an obstacle to the completion of the reformation.

This could only be accomplished by a voluntary relinquishment, on the part of the four Lodges, of their independency and an abandonment of their privileges.

The conference at the "Apple Tree Tavern" in February, 1717, and that at the "Goose and Gridiron" in June of the same year, were what, at the present day, would be called mass-meetings of the

¹ "Four Old Lodges," p. 33.

Craft. They resembled in that respect the General Assembly spoken of in the old manuscript Constitutions, and every Freemason was required to attend if it were held within a reasonable distance,¹ and if he had no satisfactory excuse for his absence.

Attendance at these conferences which resulted in the establishment of the Grand Lodge was open, not only to all the members of the four Lodges, but to other Masons who were not, to use a modern phrase, affiliated with any one of them.

"The Lodges," that is, the members of them, says Anderson, "with some old Brothers." Preston calls them more distinctively "some other old Brethren." Both of these phrases, of course, indicate that these "old Brethren" were not among the members of the four Lodges, but were Freemasons who had either, on account of their age, retired from active participation in the labors of the Craft, or who had been members of other lodges which were then extinct.

At the preliminary meeting in February, they voted, says Preston, "the oldest Master Mason then present into the Chair." Anderson, writing in 1738, adds "now the Master of a Lodge," by which I suppose he meant that the oldest Master Mason who presided in 1717 became in 1738 the Master of a Lodge. I know of no other way of interpreting the significance of the particle "now." They then "constituted themselves a Grand Lodge *pro tempore* in due form."

This "due form," I think, could have amounted to no more than a formal declaration of the intention to establish a Grand Lodge, which intention was carried out in the following June by the election of a Grand Master and Wardens.

The Freemasons of America are familiar with the methods pursued in the organization of a Grand Lodge in a territory where none had previously existed. Here a certain number of lodges, not less than three, assemble through their three principal officers and constitute a Convention, which proceeds to the election of a Grand Master and other officers, directs the lodges to surrender the Warrants under which they had been working to the Grand Lodges from which they had originally received them, and then issues new ones. The new Grand Lodge thus becomes "an accomplished fact."

¹ In most of the Constitutions that distance is defined to be not more than fifty miles.

But this was not the method adopted in the establishment of the Grand Lodge of England in the year 1717. Instead of the representation of the four Lodges being restricted to the Masters and Wardens of each, all the members, down to the youngest Entered Apprentice, together with Masons who were not affiliated with any lodge, met together.

The chair, according to Preston, in the preliminary meeting in February had been taken by the oldest Master Mason present. At this meeting the oldest Master Mason, who at the same time was Master of one of the four Lodges, presided. Then the Grand Lodge was duly organized by the election of its first three officers.

But now it became necessary to secure the sovereignty of the new Grand Lodge as the future supervising body of the Craft, and to prevent any additional lodges being established without its authority, so that the system might be perfected in the future according to the method which was originally designed by its founders.

Almost the first regulation which was adopted at the meeting in June, 1717, was to effect this object.

Hitherto, as we have already seen, the Operative Freemasons possessed a privilege derived from the Old Constitutions of the Guild (and which is formally enunciated in the Harleian MS.) of assembling in lodges for the purpose of "making Masons" under very simple provisions. There was no necessity for a Warrant or permission from a superior Masonic body to make such an assembly legal.

But now it was resolved that this privilege should be abolished. No number of Masons were hereafter to assemble as a lodge without the consent of the Grand Lodge, expressed by the granting of a Warrant of Constitution or Charter authorizing them to constitute or form themselves into a lodge. Without such Warrant, says Preston, no lodge should hereafter be deemed regular or constitutional.

From this regulation, however, the four Lodges which had cooperated in the formation of the Grand Lodge were excepted. They, so long as they existed, were to be the only lodges working without a Warrant and deriving their authority to do so from "immemorial usage."

The effect of this regulation was to throw an insurmountable obstacle in the way of any new lodge being formed which was not

Speculative in its character and in perfect accord with the new system, from whose founders or their successors it was to derive its existence.

Hence it was the most fatal blow that had as yet been struck against the continuance of the Guild of purely Operative Freemasonry. No purely Operative nor half Operative and half Speculative lodges, we may be sure, would thereafter be erected.

From this time all lodges were to consist of Speculative Freemasons only and were to form a part of the new non-Operative system, of which the first organized Grand Lodge was the head and exercised the sovereign power.

It is true that Preston tells us that long before this period a regulation had been adopted by which "the privileges of Masonry should no longer be restricted to Operative Masons," but allowed to men of various professions; and it is also well known that there hardly ever was a time in the history of Operative Freemasonry when Theoretic or non-Operative persons were not admitted into the guild.

But this was taking a step farther, and a very long step, too. Membership in the new society was no longer a privilege extended by courtesy to Theoretic Masons. It was to be a franchise of which they alone were to be possessors. Operative Masons, merely as such, were to be excluded. In other words, no Operative Mason was to be admitted into the Fraternity because he was an Operative. He was, on his admission, to lay aside his profession, and unite with the others in the furtherance of the purely Speculative design of the Institution.

So it has continued to the present day, and so it must continue as long as the system of Speculative Freemasonry shall last. Operative Freemasonry, "wounded in the house of its friends," has never recovered from the blow thus inflicted.

Operative Masonry, for building purposes, still lives and must always live to serve the needs of man.

But Operative Freemasonry, as a Guild, is irrecoverably dead.

It is impossible to say for how long a time the meetings of the Grand Lodge continued to be attended by all the members of the particular lodges, or, in other words, when these assemblies ceased, like those of the old Operative Freemasons, to be mass-meetings of the Craft.

But the rapidly growing popularity of the new Order must have

rendered such meetings very inconvenient from the increase of members.

Anderson says that in 1718 "several old Brothers that had neglected the Craft visited the lodges; some noblemen were also made Brothers and more new lodges were constituted."¹

Northouck, writing in reference to the same period, says that the Free and Accepted Masons "now began visibly to gather strength as a body,"² and we are told that at the annual feast in 1721 the number of lodges had so increased³ that the General Assembly required more room, and therefore the Grand Lodge was on that occasion removed to Stationers' Hall, nor did it ever afterward return to its old quarters at the "Goose and Gridiron Tavern."

This unwieldiness of numbers would alone be sufficient to suggest the convenience of changing the constitution of the Grand Lodge from a mass-meeting of the Fraternity into a representative body.

This was effected by the passage of a regulation dispensing with the attendance of the whole of the Craft at the annual meeting, and authorizing each lodge to be represented by its Master and two Wardens.

We have no positive knowledge of the exact date when this regulation was adopted. It first appears in the "General Regulations" which were compiled by Grand Master Payne in 1720, and approved by the Grand Lodge in 1721. The twelfth of these Regulations is in these words:

"The Grand Lodge consists of, and is formed by, the Masters and Wardens of all the regular, particular lodges upon record, with the Grand Master at their head, and his Deputy on his left hand, and the Grand Wardens in their proper places."

Preston says that the Grand Lodge having resolved that the four old Lodges should retain every privilege which they had collectively enjoyed by virtue of their immemorial rights, the members considered their attendance on the future Communications of the Grand Lodge unnecessary. They "therefore, like the other lodges, crusted implicitly to their Master and Wardens, resting satisfied

¹ Anderson, "Constitutions," 2d ed., p. 110.

² Northouck, "Constitutions," p. 207.

³ There were at that time twenty lodges, and the number of Freemasons who attended the annual meeting and feast was one hundred and fifty.

that no measure of importance would be adopted without their approbation."¹

But he adds that the officers of the four old Lodges "soon began to discover" that the new lodges might in time outnumber the old ones and encroach upon their privileges. They therefore formed a code of laws, the last clause of which provided that the Grand Lodge in making any new regulations should be bound by a careful observation of the old landmarks.

It is unfortunate that in treating this early period of Masonic history Preston should be so careless and confused in his chronology as to compel us to depend very much upon inference in settling the sequence of events.

It may, however, I think, be inferred from the remarks of Preston, and from what little we can collect from Anderson's brief notices, that the Grand Lodge continued to be a mass-meeting, attended by all the Craft, until the annual feast on the 24th of June, 1721. At that communication Anderson records that the Grand Lodge was composed of "Grand Master with his Wardens, the former Grand officers, and the Master and Wardens of the twelve lodges."² In all subsequent records he mentions the number of lodges which were represented by their officers, though the Grand Feast still continued to be attended by as many Masons as desired to partake of the dinner and, I suppose, were willing to pay their scot.³

It was, therefore, I think, not till 1721 that the Grand Lodge assumed that form which made it a representative body, consisting of the Masters and Wardens of the particular lodges, together with the officers of the Grand Lodge.

That form has ever since been retained in the organization of every Grand Lodge that has directly or indirectly emanated from the original body.

This was another significant token of the total disseverance that was steadily taking place between the Operative and the Speculative systems.

Hitherto we have been occupied with the consideration of the

¹ "Illustrations," p. 193.

² "Constitutions," 2d edition, p. 112.

³ The only qualification for attendance on the feast was that the guests must be Masons: therefore waiting brethren were appointed to attend the tables, "for that no strangers must be there." — "Constitutions," 2d ed., p. 112.

transactions recorded as having taken place at the annual meetings. We are now to inquire when these meetings began to be supplemented by Quarterly Communications.

Here an historical question presents itself, which, so far as I am aware, has not been distinctly met and treated by any of our Masonic scholars. They all seem to have taken it for granted on the naked authority of Anderson and Preston, that the Quarterly Communications were coeval with the organization of the Grand Lodge in the year 1717.

Is this an historical fact? I confess that on this subject a shadow of doubt has been cast that obscures my clearness of vision.

Anderson says, and Preston repeats the statement, that at the preliminary meeting in February, 1717, at the "Apple Tree Tavern," it was resolved "to revive the Quarterly Communications."

But these two authorities (and they are the only ones that we have on the subject) differ in some of the details. And these differences are important enough to throw a doubt on the truth of the statement.

Anderson says in one place that in February, 1717, they "forthwith revived the Quarterly Communications of the officers of lodges called the Grand Lodge."¹

Afterward he says that at the meeting in June, 1717, Grand Master Sayer "commanded the Masters and Wardens of lodges to meet the Grand officers every quarter in communication, at the place he should appoint in his summons sent by the Tyler."²

Preston says that in February "it was resolved to revive the Quarterly Communications of the Fraternity."³ Immediately after he adds that in June the Grand Master "commanded the Brethren of the four Lodges to meet him and his Wardens quarterly in communication."⁴

Thus, according to Preston, the Quarterly Communications were to apply to the whole body of the Fraternity; but Anderson restricted them to the Masters and Wardens of the lodges.

The two statements are irreconcilable. A mass-meeting of the whole Fraternity and a consultation of the Masters and Wardens of the lodges are very different things.

But both are in error in saying that the Quarterly Communica-

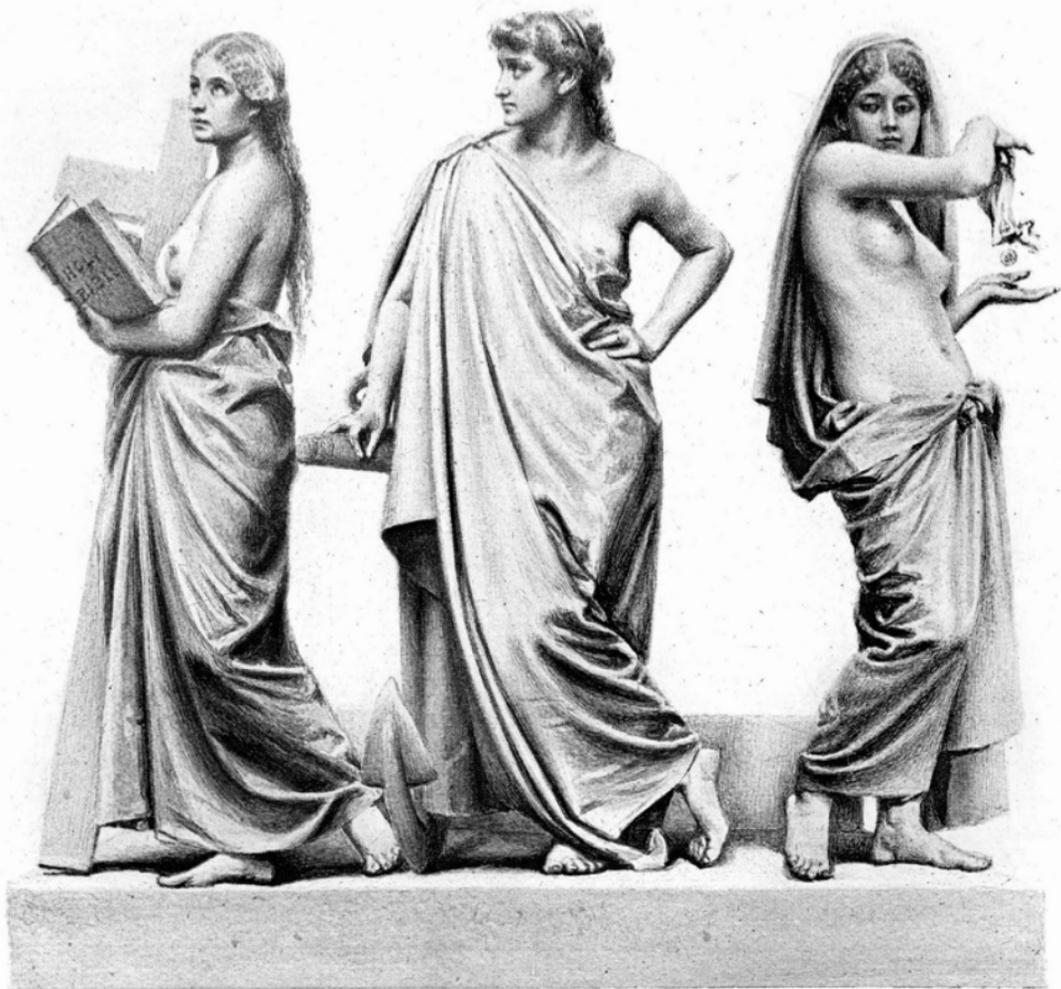

¹ Anderson, "Constitutions," 2d edition, p. 109.

³ Preston, "Illustrations," p. 191.

² *Ibid.*, p. 110.

⁴ *Ibid.*

FAITH, HOPE AND CHARITY

tions "were revived," for there is no notice of or allusion to Quarterly Communications in any of the old records which speak only of an annual General Assembly of the Craft, and sometimes perhaps occasional assemblies for special purposes.

There can be no doubt that such was the usage among the English mediaeval guilds, a usage which must have been applicable to the Freemasons as well as to other Crafts. "The distinction," says J. Toulmin Smith, "between the gatherings (congregations) and general meetings (assemblies) is seen at a glance in most of the ordinances. The guild brethren were bound to gather together, at unfixed times, for special purposes; but besides these gatherings upon special summons, general meetings of the guilds were held on fixed days in every year for the election of officers, holding their feasts, etc."¹

I do not see any analogy in these gatherings of local guilds to the Quarterly Communications of the Grand Lodge spoken of by Anderson. The analogy is rather to the monthly meetings of the particular lodges as contrasted with the annual meeting of the Grand Lodge.

But if, as Anderson and Preston say, the Quarterly Communications were "forthwith revived" in 1717, it is singular that there is no record of any one having been held until December, 1720. After that date we find the Quarterly Communications regularly recorded by Anderson as taking place at the times appointed in the Regulations which were compiled in 1720 by Grand Master Payne, namely, "about Michaelmas, Christmas, and Lady Day," that is, in September, December, and March.

The word "about" in the 12th Regulation permitted some latitude as to the precise day of meeting.

Accordingly, we find that Quarterly Communications were held in 1721 in March, September, and December; in 1722, in March, but the others appeared to have been neglected, perhaps in consequence of irregularities attendant on the illegal election of the Duke of Wharton; in 1723 there were Quarterly Communications in April and November, and the December meeting was postponed to the following January; in 1724 they occurred in February and November; in 1725 in May, November, and December, and so on, but with greater regularity, in all the subsequent proceedings of the Grand Lodge as recorded in the *Book of Constitutions* by Ander-

¹ "English Guilds," p. 128, note.

son, and by his successors Entick and Northouck in the subsequent editions.

Looking at the silence of the records in respect to Quarterly-Communications from 1717 to 1720; then to the regular appearance of such records after that year, and seeing that in the latter year the provision for them was first inserted in the General Regulations compiled at that time by Grand Master Payne, I trust that I shall not be deemed too skeptical or too hypercritical, if I confess my doubt of the accuracy of Anderson, who has, whether wilfully or carelessly, I will not say, attributed the establishment of these Quarterly Communications to Grand Master Sayer, when the honor, if there be any, properly belongs to Grand Master Payne.

The next subject that will attract our attention in this sketch of the early history of the Grand Lodge, is the method in which the laws which regulated the original Operative system were gradually modified and at length completely changed so as to be appropriate to the peculiar needs of a wholly Speculative Society.

When the four old Lodges united, in the year 1717, in organizing a Grand Lodge, it is very evident that the only laws which governed them must have been the "Charges" contained in the manuscript Constitutions or such private regulations adopted by the lodges, as were conformable to them.

There was no other Masonic jurisprudence known to the Operative Freemasons of England, at the beginning of the 18th century, than that which was embodied in these old Constitutions. These were familiar to the Operative Freemasons of that day, as they had been for centuries before to their predecessors.

Though never printed, copies of them in manuscript were common and were easily accessible. They were often copied, one from another—just as often, probably, as the wants of a new lodge might require.

Beginning at the end of the 14th century, which is the date of the poetical Constitutions, which were first published by Mr. Halliwell, copies continued to be made until the year 1714, which is the date of the last one now extant, executed before the organization of the Grand Lodge.¹

¹I take no notice here of the Krause MS., which pretends to contain the Constitutions enacted by Prince Edwin, in 926, because I have not the least doubt that it is a forgery of comparatively recent times.

Now in all these written Constitutions, extending through a period of more than three centuries, there is a very wonderful conformity of character.

The poetic form which exists in the Halliwell MS. was apparently never imitated, and all the subsequent manuscript Constitutions now extant are in prose. But as Bro. Woodford has justly observed, they all "seem in fact to be clearly derived from the Masonic Poem, though naturally altered in their prose form, and expanded and modified through transmission and oral tradition, as well as by the lapse of time and the change of circumstances."¹

While these old constitutions contained, with hardly any appreciable variation, the *Legend of the Craft*, which was conscientiously believed by the old Operative Free Masons as containing the true history of the rise and progress of the brotherhood, they embodied also that code of laws by which the fraternity was governed during the whole period of its existence.

Though these Constitutions commenced, so far as we have any knowledge of them from personal inspection, at the close of the 14th century, we are not to admit that there were no earlier copies. Indeed, I have formerly shown that the Halliwell Poem, whose conjectural date is 1390, is evidently a compilation from two other poems of an earlier date.

The Freemasons who were contemporary with the organization of the Grand Lodge held those old manuscript Constitutions, as their predecessors had done before them, in the greatest reverence. The fact that the laws which they prescribed, like those of the Medes and Persians, had invested them with the luster of antiquity, and as they had always remained written, and had never been printed, the Craft looked upon them as their peculiar property and gave to them much of an esoteric character.

This false estimate of the true nature of these documents led to an inexcusable and irreparable destruction of many of them.

Grand Master Payne had in 1718 desired the brethren to bring to the Grand Lodge "any old writings and records concerning Masons and Masonry in order to show the usages of ancient times."² These, it was suspected, were to be used in the preparation and publication of a contemplated Book of Masonic Constitutions, and the

¹ Preface to Hughan's "Old Charges of British Freemasons," p. 13.

² Anderson, "Constitutions," 2d edition, p. no.

Masons became alarmed at the threatened publicity of what they had always deemed to be secret.

Accordingly, in 1720, "at some private lodges," says Anderson, "several valuable manuscripts (for they had nothing yet in print) concerning their lodges, Regulations, Charges, Secrets, and Usages (particularly one writ by Mr. Nicholas Stone, the Warden of Inigo Jones) were too hastily burnt by some scrupulous brothers, that those papers might not fall into strange hands."¹

Northouck, commenting on this instance of vandalism, which he strangely styles an act of *felo de se*, says that it surely "could not proceed from zeal according to knowledge."

Of course, it was zeal without knowledge that led to this destruction, the effects of which are felt at this day by every scholar who attempts to write an authentic history of Freemasonry.

The object of Grand Master Payne in attempting to make a collection of these old writings was undoubtedly to enable him to frame a code of laws which should be founded on what Anderson calls the Gothic Constitutions. Several copies of these Constitutions were produced in the year 1718 and collated.

The result of this collation was the production which under the title of "The Charges of a Free-Mason" was appended to the first edition of the *Book of Constitutions*.

This is the first code of laws enacted by the Speculative Grand Lodge of England, and thus becomes important as an historical document.

As to the date and the authorship we have no other guide than that of inference.

There can, however, be little hesitation in ascribing the authorship to Payne and the time of the compilation to the period of his first Grand Mastership, which extended from June, 1718, to June, 1719.

In the title to these "Charges" it is said that they have been "extracted from the ancient records of lodges beyond sea and of those in England, Scotland, and Ireland, for the use of the lodges in London."

Now this admirably coincides with the passage in Anderson in which it is said that at the request of Grand Master Payne, in the

¹ Anderson, "Constitutions," 2d edition, p. 111.

year 1718, "several old copies of the Gothic Constitutions were produced and collated."

In fact, we thus identify the collation of the Gothic Constitutions in 1718 with the "Charges of a Free-Mason," published in the first edition of the *Book of Constitutions*.

Nor do I feel any hesitation in ascribing this collation of the old Constitutions and the compilation, out of it, of the "Charges" to Payne, whose genius lay in that way and who again exercised it, two years afterward, in the compilation of the "General Regulations," which took the place of the "Charges" as the law of the Speculative Grand Lodge.

The valuable services of George Payne in the incipient era of Speculative Freemasonry have not received from our historians the appreciation which is their just due. His reputation has been overshadowed by that of Desaguliers. Both labored much and successfully for the infant institution. But we should never forget that the work of Payne in the formation of its jurisprudence was as important as was that of Desaguliers in the fabrication of its ritual.¹

But to resume the history of the progress of Masonic law.

The adoption in 1718 of the "Charges of a Free-Mason," with the direction that they shall be read as the existing law of the fraternity "at the making of new brethren,"² is a very significant proof of what has before been suggested that at the time of the so-called "Revival" there was no positive intention to wholly dis sever the Speculative from the Operative system.

These "Charges" are, as they must necessarily have been, originating as they did in the Old Constitutions, a code of regulations adapted only to a fraternity of Operative Freemasons and wholly inapplicable to a society of Speculatives, such as the institution afterward became.

Thus Masters were not to receive Apprentices unless they had sufficient employment for them; the Master was to oversee the

¹ Dr. Oliver very inaccurately says in his "Revelations of a Square" that "at the annual assembly on St. John's day, 1721, Desaguliers produced thirty-eight regulations," but distinctly states that these regulations were "compiled first by Mr. George Payne, anno 1720, when he was Grand Master, and approved by the Grand Lodge on St. John Baptist's day, anno 1721." The venerable doctor had here forgotten the Ciceronian axiom—*suum cuique tribuere*.

² See the title of the "Charges" in the first edition of the "Book of Constitutions," p. 49.

lord's or employer's work, and was to be chosen from the most expert of the Fellow-Crafts; the Master was to undertake the lord's work for reasonable pay; no one was to receive more wages than he deserved; the Master and the Masons were to receive their wages meekly; were to honestly finish their work and not to put them to task which had been accustomed to journey; nor was one Mason to supplant another in his work.

The Operative feature is very plain in these regulations. They are, it is true, supplemented by other regulations as to conduct in the lodge, in the presence of strangers, and at home; and these are as applicable to a Speculative as they are to an Operative Mason.

But the whole spirit, and, for the most part, the very language of these "Charges," is found in the Old Constitutions of the Operative Masons.

They have, however, been always accepted as the foundation of the law of Speculative Masonry, though originally adopted at a time when the society had not yet completely thrown over its Operative character.

But to apply them to an exposition of the laws of Speculative Freemasonry, and to make them applicant to the government of the Order in its purely Speculative condition, modern Masonic jurists have found it necessary to give to the language of the "Charges" a figurative or symbolic signification, a process that I suspect was not contemplated by Payne or his contemporaries.

Thus, to work, is now interpreted as meaning to practice the ritual. The lodge is at work when it is conferring a degree. To receive wages is to be advanced from a lower to a higher degree. To supplant another in his work, is for one lodge to interfere with the candidates of another.

In this way statutes intended originally for the government of a body of workmen have by judicial ingenuity been rendered applicable to a society of moralists.

The adoption of these "Charges" was a concession to the Operative element of the new society. The Grand Lodge of 1717 was the successor or the outcome of an old and different association. It brought into its organization the relics of that old association, nor was it prepared in its inchoate condition to cast aside all the usages and habits of that ancient body.

Hence the first laws enacted by the Speculative Grand Lodge

were borrowed from and founded on the manuscript Constitutions of the Operative Freemasons.

But the inapplicability of such a system of government to the new organization was very soon discovered.

Two years afterward Payne, untiring in his efforts to perfect the institution, which had honored him twice with its highest office, compiled a new code which was perfectly applicable to a Speculative society.

This new code, under the title of the "General Regulations," was compiled by Payne in 1720, and having been approved by the Grand Lodge in 1721, was inserted in the first edition of the *Book of Constitutions*, published in 1723.

Anderson says that he "has compared them with and reduced them to the ancient records and immemorial usages of the Fraternity, and digested them into this new method with several proper explications for the use of the lodges in and about London and Westminster."¹

There certainly is some evidence of the handiwork of Anderson in some interpolations which must have been of a later date than that of the original compilation.² But as a body of law, it must be considered as the work of Payne.

This code has ever since remained as the groundwork or basis of the system of Masonic jurisprudence. Very few modifications have ever been made in its principles. Additional laws have been since enacted, not only by the mother Grand Lodge, but by those which have emanated from it, but the spirit of the original code has always been respected and preserved. In fact, it has been regarded almost in the light of a set of landmarks, whose sanctity could not legally be violated.

George Payne, the second and fourth Grand Master of the Grand Lodge of England, is therefore justly entitled to the distinguished reputation of being the lawgiver of modern Freemasonry.

If we compare the Charges adopted in 1718 with the Regulations approved in 1721, we will be struck with the great change that

¹ Title prefixed to the General Regulations, in 1st edition of "Book of Constitutions," p. 58.

² This subject will be more fully discussed, and some of these interpolations will be pointed out, when we come, in a future chapter, to the consideration of the fabrication of the degrees.

must have taken place in the constitution and character of a society that thus necessitated so important a modification in its principles of government.

The "Charges" were, as has already been shown, applicable to an association in which the Operative element preponderated. The Regulations are appropriate to one wholly Speculative in its design, and from which the Operative element has been thoroughly eliminated.

The adoption of the Regulations in 1721 was therefore an irrefutable proof that at that period the Grand Lodge and the lodges under its jurisdiction had entirely severed all connection with Operative Freemasonry.

We may, indeed, make this the epoch to which we are to assign the real birth of pure Speculative Freemasonry in England.

There were, however, many lodges outside of the London limit which still preserved the Operative character, and many years elapsed before the Speculative system was universally disseminated throughout the kingdom.

The minutes of a few of them have been preserved or recovered after having been lost, and they exhibit for the most part, as late as the middle of the 18th century, the characteristics which distinguished all English Masonic lodges before the establishment of the Grand Lodge. Their membership consisted of an admixture of Operative and Theoretic Masons. But the business of the lodge was directed to the necessities and inclinations of the former class.

A common feature in these minutes is the record of the indentures of Apprentices for seven years, to Master Masons who were members of the lodge.

Speculative Freemasonry, which took rapid growth in London after its severance from the Operative lodges, made slower progress in the provinces.

Of the rapidity of growth in the city and its suburbs we have very satisfactory evidence in the increase of lodges as shown in the official lists which were printed at occasional periods.

Thus, in 1717, as we have seen, there were but four Lodges engaged in the organization of the Grand Lodge.

These were the only Lodges then in London. At least no evidence has ever been produced that there were any others. These Were all original Operative lodges.

Anderson says that "more new lodges were constituted" in 1719.

If he had been accurate in the use of his language, the qualifying adverb "more" would indicate that "new lodges" had also been constituted the year before.

In June, 1721, twelve lodges were represented in the Grand Lodge by their Masters and Wardens, showing, if there were no absentees, that eight new lodges had been added to the Fraternity since 1717.

In September of the same year Anderson records the presence of the representatives of sixteen lodges. Either four new lodges had been added to the list between June and September, or what is more likely, some were absent in the meeting of the former month.

In March, 1722, the officers of twenty-four lodges are recorded as being present, and in April, 1723, the number had increased to thirty.

But the number of lodges stated by Anderson to have been represented at the Communications of the Grand Lodge does not appear to furnish any absolute criterion of the number of lodges in existence. Thus, while the records show that in April, 1723, thirty lodges were represented in the Grand Lodge, the names of the Masters and Wardens of only twenty lodges are signed to the approbation of the *Book of Constitutions*, which is appended to the first edition of that work published in the same year.

Bro. Gould calls this "the first List of Lodges ever printed,"¹ but I deem it unworthy of that title, if by a "List of Lodges" is meant a roll of all those actually in existence at the time. Now, if this were a correct list of the lodges which were on the roll of the Grand Lodge at the time, what has become of the ten necessary to make up the number of thirty which are reported to have been represented in April, 1723, besides some others which we may suppose to have been absent?

Anderson did not think it worth while to explain the incongruity, but from 1723 onward we have no further difficulty in tracing the numerical progress of the lodges and incidentally the increase in the number of members of the Fraternity.

Engraved lists of lodges began in 1723 to be published by authority of the Grand Lodge, and to the correctness of these we may safely trust, as showing the general progress of the Institution.

¹ The "Four Old Lodges," p. 2.

The first of these lists is "printed for and sold by Eman Bowen, Engraver, in Aldersgate St." It purports to be a list of lodges in 1723, and the number of them amounts to fifty-one. In 1725 Pine, who was in some way connected, it is supposed, with Bowen, issued a list for 1725, which contains, not the names, for the lodges at that time had no names, but the taverns or places of meeting of sixty-four lodges, fifty-six of which were in London or its vicinity.

On November 27, 1723, the Grand Lodge commenced in its minute-book an official list of the lodges, which seems, says Bro. Gould, "to have been continued until 1729." The lodges are entered, says the same authority, in ledger form, two lodges to a page, and beneath them appear the names of members.

This list contains seventy-seven lodges. Supposing, as Gould does, that the list extended to 1729, it shows an increase in twelve years of seventy-three lodges, without counting the lodges which had become extinct or been merged into other lodges.

In the next official list contained in the minute-book of the Grand Lodge, and which extends to 1732, the number of lodges enumerated is one hundred and two, or an increase in fifteen years of ninety-eight lodges, again leaving out the extinct ones.

These examples are sufficient to show the steady and rapid growth of the society during the period of its infancy.

There is, however, another historical point which demands consideration. At what time did the formal constitution of lodges begin?

It is at this day a settled law and practice, that before a lodge of Masons can take its position as one of the constituent members of a Grand Lodge, a certain form or ceremony must be undergone by which it acquires all its legal rights. This form or ceremony is called its Constitution, and the authority for this must emanate from the Grand Lodge, either directly, as in America, or indirectly, through the Grand Master, as in England, and is called the Warrant or Constitution.

The Constitutions of the Grand Lodge of England, which are in force at the present day, say: "In order to avoid irregularities, every new lodge should be solemnly constituted by the Grand Master with his Deputy and Wardens."¹

¹ "Constitutions of the Ancient Fraternity of Free and Accepted Masons," p. 124.

This regulation has been in force at least since January, 1723, the very words of the clause above quoted having been taken from the form of constitution practiced by the Duke of Wharton, who was Grand Master in that year, and which form is appended to the first edition of the *Book of Constitutions*.

Anderson says that in 1719 "more new lodges were constituted;"¹ and Preston states that at the meeting of the Grand Lodge in 1717 a regulation was agreed to that "every lodge, except the four old Lodges at this time existing, should be legally authorized to act by a warrant from the Grand Master for the time being, granted to certain individuals by petition, with the consent and approbation of the Grand Lodge in communication; and that without such warrant no lodge should be hereafter deemed regular or constitutional."²

Now I think that on the establishment of the new Grand Lodge, when the only lodge then existing in London had united in the enterprise of modifying their old and decaying system, and of renovating and strengthening it by a closer union, it may be fairly conceded that the members must, at a very early period, have come to the agreement that no new members should be admitted into the society unless consent had been previously obtained for their admission. This would naturally be the course pursued by any association for the purpose of self-preservation from the annoyance of uncongenial companions.

If any number of craftsmen availing themselves of the privilege of assembling as Masons in a lodge, which privilege had hitherto been unlimited and, as Preston says, was inherent in them as individuals, and which was guaranteed to them by the old Operative Constitutions, there is, I think, no doubt that such a lodge would not have been admitted into the new Fraternity in consequence of this spontaneous and automatic formation.

The new society would not recognize it as a part of its organization, at least until it had made an application and been accepted as a co-partner in the concern.

The primitive lodges which are said by Anderson to have been "constituted" between the years 1717 and 1723 may not have originated in this way. There is no record one way or the other.

¹ Anderson, "Constitutions," 2d edition, p. no.

² "Illustrations," p. 193.

But it is, I think, very certain that the present method of constituting lodges was not adopted until a regulation to that effect was enacted in 1721. This regulation is found among those which were compiled by Payne in 1720, and approved the following year by the Grand Lodge.

It is a part of the eighth regulation, and it prescribes that "if any Set or Number of Masons shall take upon themselves to form a lodge without the Grand Master's warrant, the regular lodges are not to countenance them nor own them as fair brethren and duly formed" until the Grand Master "approve of them by his warrant, which must be specified to the other lodges, as the custom is when a new lodge is to be registered in the list of lodges."

This regulation was followed in 1723 by a form or, "manner of constituting new lodges," which was practiced by the Duke of Wharton when Grand Master, and which was probably composed for him by Dr. Desaguliers, who was his Deputy.

It would seem, then, that new lodges were not constituted by warrant until the year 1721, the date of the Regulation, nor constituted in form until 1723, during the administration of the Duke of Wharton. Prior to that time, if we may infer from the phraseology of the Regulation, lodges when accepted as regular were said to be "formed," and were registered in the "List of Lodges."¹

This presumption derives plausibility from the authentic records of the period.

In the earlier "Lists of Lodges" authoritatively issued, there is no mention of the date of Constitution of the lodges. In all the later lists the date of Constitution is given. In none of them, however, is there a record of any lodge having been constituted prior to the year 1721. Thus, in Pine's list for 1740, engraved by order of the Grand Officers, and which contains the names and numbers of one hundred and eighty-one lodges, four are recorded as having been constituted in 1721, five in 1722, and fourteen in 1723. No lodge is recorded there as having been constituted between the years 1717 and 1721.

¹ In an article published in Mackey's *National Freemason* in 1873 (vol. ii., p. 288), Bro. Hughan has said "that it is a fact that no constituted lodge dates at an earlier period than the Revival of Masonry, 1717." I suspect my learned brother wrote these lines *currente calamo*, and without his usual caution. It will be seen from the text that there is no record of any constituted lodge dating prior to 1721.

It is, then, very clear that the system of constituting lodges was not adopted until the latter year; that it was another result of the legal labors of Payne in legislating for the new society, and another and an important step in the disseverance of Speculative from Operative Freemasonry.

We next approach the important and highly interesting subject of the early ritual of the new institution. But this will demand for its thorough consideration and full discussion the employment of a distinct chapter.

CHAPTER XXXII

THE EARLY RITUAL OF SPECULATIVE FREEMASONRY

HE ritual is an important part of the organization of Speculative Freemasonry. It is not a mere garment intended to cover the institution and conceal its body from unlawful inspection. It is the body itself and the very life of the institution. Eliminate from Freemasonry all vestiges of a ritual and you make it a mere lifeless mass.

Its characteristic as a benevolent or as a social association might continue, but all its pretensions as a speculative system of science and philosophy would be lost.

As a definition of this important and indispensable element in the Masonic system, it may be said that the ritual is properly the prescribed method of administering the forms of initiation into the society, comprising not only the ceremonies but also the explanatory lectures, the catechismal tests, and the methods of recognition.

Every secret society, that is to say, every society exclusive in its character, confining itself to a particular class of persons, and isolating itself by its occult organization from other associations and from mankind in general, must necessarily have some formal mode of admission, some meaning in that form which would need explanation, and some method by which its members could maintain their exclusiveness.

Every secret society must, then, from the necessity of its organization, be provided with some sort of a ritual, whether it be simple or complex.

The Operative Freemasonry of the Middle Ages is acknowledged to have been a secret and exclusive society or guild of architects and builders, who concealed the secret processes of their art from all who were not workers with them.

As a secret association, the old Operative Freemasons must have

possessed a ritual. And we have, to support this hypothesis, not only logical inference but unquestionable historical evidence.

German archaeologists have given us the examination or catechism which formed a part of the ritual of the German Steinmetzen or Stonecutters.

The Sloane MS. No. 3329 contains the catechism used by the Operative Freemasons of England in the 17th century. A copy of this manuscript has already been given in a preceding part¹ of the present work, and it is therefore unnecessary to reproduce it here.

As the Sloane MS. has been assigned to a period between 1640 and 1700, we may safely conclude that it contains the ritual then in use among the English Operative Freemasons. At a later period it may have suffered considerable changes, but we infer that the ritual exposed in that manuscript was the foundation of the one which was in use by the Operative lodges which united in the formation of the Grand Lodge in the year 1717.

If the new society did not hesitate to adopt, at first, the old laws of the Operative institution, it is not at all probable that it would have rejected the ritual then in use and frame a new one. Until the Grand Lodge was securely seated in power, and the Operative element entirely eliminated, it would have been easier to use the old Operative ritual. In time, as the Operative laws were replaced by others more fitting to the character of the new Order, so the simple, Operative ritual must have given way to the more ornate one adapted to the designs of Speculative Freemasonry.

But during the earlier years of the Grand Lodge, this old Operative ritual continued to be used by the lodges under its jurisdiction.

The precise ritual used at that time is perhaps irretrievably lost, so that we have no direct, authentic account of the forms of initiation, yet by a careful collation of the historical material now in possession of the Fraternity, we may unravel the web, to all appearance hopelessly entangled, and arrive at something like historic truth.

It was not until 1721 that by the approval of the "Charges" which had been compiled the year before by Grand Master Payne, the Grand Lodge took the first bold and decisive step toward the

¹ See Part II., chap. xii., p. 626.

total abolishment of the Operative element, and the building upon its ruins a purely Speculative institution.

The ritual used by the four old Lodges must have been very simple. It probably consisted of little more than a brief and unimpressive ceremony of admission, the communication of certain words and signs, and instruction in a catechism derived from that which is contained in the Sloane MS. But I do not doubt that this catechism, brief as it is, was greatly modified and abridged by the lapse of time, the defects of memory, and the impossibility of transmitting oral teachings for any considerable length of time.

It is probable that Dr. Desaguliers, the great ritualist of the day, may have begun to compose the new ritual about the same time that Payne, the great lawmaker of the day, began to compile his new laws.

What this ritual was we can only judge by inference, by comparison, and by careful analysis, just as Champollion deciphered the Egyptian hieroglyphics by a collation of the three inscriptions of the Rosetta Stone.

For this purpose we have a very competent supply of documents which we may employ in a similar comparison and analysis of the primitive ritual of the Speculative Freemasons.

Thus we have had the book called *The Grand Mystery*, which was published just a year after the appearance of the first edition of Anderson's *Book of Constitutions*.

Dr. Oliver, it is true, calls this production a "catchpenny."¹ It would be great folly to assert that it did not contain some shadowing forth of what was the ritual at the time of its publication. When, a few years afterward, Samuel Prichard published his book entitled *Masonry Dissected*, which is evidently based on *The Grand Mystery*, and in fact an enlargement of it, showing the improvements and developments which had taken place in the ritual, Dr.

¹ "Revelations of a Square," chap. ii., note 6. But in a posthumous work entitled "The Discrepancies of Freemasonry," published by Hogg & Co. in 1874 (page 79), he treats it with more respect, and says that it was the examination or lecture used by the Craft in the 17th century, the original of which, in the handwriting of Elias Ashmole, was given to Anderson when he made his collections for the history contained in the "Book of Constitutions." All this is very possibly correct, but as Oliver must have derived his information from some traditional source in his own possession solely, and as he has cited no authentic authority, we can hardly make use of it as an historical fact.

Anderson replied to it in the pamphlet entitled *A Defense of Masonry*.

In this work it will be remarked that Anderson does not directly deny the accuracy of Prichard's formulas; but only attempts to prove, which he does very successfully, that the ceremonies as they are described by Prichard were neither "absurd nor pernicious."

The truth is that Anderson's *Defense* is a very learned and interesting interpretation of the symbols and ceremonies which were described by Prichard, and might have been written, just in the same way, if Anderson had selected the ritual as it was then framed on which to found his commentaries.

Krause accepted both of these works, as he gave them a place in his great work on *The Three Oldest Documents of the Masonic Brotherhood*.

For myself, I am disposed to take these and similar productions with some grains of allowance, yet not altogether rejecting them as utterly worthless. From such works we may obtain many valuable suggestions, when they are properly and judiciously analyzed.

Krause thinks that *The Grand Mystery* was the production of one of the old Masons, who was an Operative builder and a man not without some learning.

This is probably a correct supposition. At all events, I am willing to take the work as a correct exposition, substantially, of the condition of the ritual at the time when it was published, which was seven years after what was called the "Revival" in London.

It will give us a very correct idea of the earliest ritual accepted by the Speculative Masons from their Operative brethren, and used until the genius of Desaguliers had invented something more worthy of the Speculative science.

Adopting it then as the very nearest approximation to the primitive ritual of the Speculative Freemasons, it will not be an unacceptable gift, nor useless in prosecuting the discussion of the subject to which this chapter is devoted.

It has not often been reprinted, and the original edition of 1724 is very scarce. I shall make use of the almost fac-simile imitation of that edition printed in 1867 by the Masonic Archaeological Society of Cincinnati, and under the supervision of Brother Enoch T. Carson, from whose valuable library the original exemplar was obtained.

The title of the pamphlet is as follows:

"The Grand Mystery of Free-Masons Discover'd. Wherein are the several Questions, put to them at their Meetings and Installations: As also the Oath, Health, Signs and Points to know each other by. As they were found in the Custody of a Free-Mason who Dyed suddenly. And now Publish'd for the Information of the Publick. London: Printed for T. Payne near Stationer's-Hall 1724. (Price Six Pence)."

THE CATECHISM.¹

1. Q. Peace be here.
A. I hope there is.
2. Q. What a-clock is it?
A. It is going to Six or going to Twelve.²
3. Q. Are you very busy?³
A. No.
4. Q. Will you give or take?
A. Both; or which you please.
5. Q. How go Squares?⁴
A. Straight.
6. Q. Are you Rich or Poor?
A. Neither.
7. Q. Change me that.⁵
A. I will.

¹The object of this reprint being only to give the reader some idea of what was the earliest form of the ritual that we possess, the Preface, the Free-Mason's Oath, A Free-Mason's Health and the signs to know a Free Mason have been omitted as being unnecessary to that end. The questions have been numbered here only for facility of reference in future remarks.

²This may be supposed to refer to the hours of labor of Operative Masons who commenced work at six in the morning and went to their noon-meal at twelve. This is the first indication that this was a catechism originally used by Operative Free Masons.

³Otherwise, "Have you any work?" Krause suggests that it was the question addressed to a traveling Fellow who came to the lodge. "Every Mason," say the Old Constitutions, "shall receive or cherish strange Fellows when they come over the Country and sett them on work."—Landsdowne MS.

⁴Halliwell, in his Dictionary, cites "How gang squares?" as meaning "How do you do?" He also says that "How go the squares?" means, how goes on the game, as chess or draughts, the board being full of squares. Krause adopts this latter interpretation of the phrase, but I prefer the former.

⁵Here it is probable that the grip was given and interchanged. The mutilation of this catechism which Krause suspects is here, I think, evident. The answer "I will" and

8. Q. In the name of, &C,¹ are you a Mason?
9. Q. What is a Mason?
A. A Man begot of a Man, born of a woman, Brother to a king.
10. Q. What is a Fellow?
A. A Companion of a Prince.
11. Q. How shall I know that you are a Free-Mason?
A. By Signs, Tokens, and Points of my Entry.
12. Q. Which is the Point of your Entry?
A. I hear² and conceal, under the penalty of having my Throat cut, or my Tongue pull'd out of my Head.
13. Q. Where was you made a Free-Mason?
A. In a just and perfect Lodge.
14. Q. How many make a Lodge?
A. God and the Square with five or seven right and perfect Masons, on the highest Mountains, or the lowest Valleys in the world.³
15. Q. Why do Odds make a Lodge?
A. Because all Odds are Men's Advantage.⁴
16. Q. What Lodge are you of?
A. The Lodge of St. John. ⁵

the expression "In the name of, &c.," are connected with the interchange of the grip. The answer to the question "Are you a Mason?" is omitted, and then the catechism goes on with the question "What is a Mason?"

¹The omission here can not be supplied. It was a part of the formula of giving the grip. Krause suggests that the words thus omitted by the editor of the catechism might be "In the name of the Pretender" or probably "In the name of the King and the Holy Roman Catholic Church." But the former explanation would give the catechism too modern an origin and the latter would carry it too far back. However, that would suit the hypothesis of Dr. Krause. I reject both, but can not supply a substitute unless it were "In the name of God and the Holy Saint John."

²The Sloane MS., in which the same answer occurs, says, "I heal and conceal," to heal being old English for to hide. It is very clear that the word hear is a typographical error.

³Krause thinks that in this answer an old and a new ritual are mixed. God and the Square he assigns to the former, the numbers five and seven to the latter. But the Harleian MS. requires five to make a legal lodge.

⁴We must not suppose that this was derived from the Kabbalists. The doctrine that God delights in odd numbers, "numero Deus impare gaudet" (Virgil, Ed. viii.), is as old as the oldest of the ancient mythologies. It is the foundation of all the numerical symbolism of Speculative Freemasonry. We here see that it was observed in the oldest ritual.

⁵This hieroglyphic appears to have been the early sign for a lodge, as the oblong square  is at the present day.

17. Q. How does it stand?
A. Perfect East and West, as all Temples do.
18. Q. Where is the Mason's Point?¹
A. At the East-Window, waiting at the Rising of the Sun,
to set his men at work.
19. Q. Where is the Warden's Point?
A. At the West-Window, waiting at the Setting of the Sun
to dismiss the Entered Apprentices.
20. Q. Who rules and governs the Lodge, and is Master of it?
A. Irah, }
✠ } or the Right Pillar.²
Iachin }
21. Q. How is it govern'd?
A. Of Square and Rule.
22. Q. Have you the Key of the Lodge?
A. Yes, I have.
23. Q. What is its virtue?
A. To open and shut, and shut and open.
24. Q. Where do you keep it?
A. In an Ivory Box, between my Tongue and my Teeth,
or within my Heart, where all my Secrets are kept.
25. Q. Have you the Chain to the Key?
A. Yes, I have.
26. Q. How long is it?
A. As long as from my Tongue to my Heart.³

¹ I find this question thus printed in all the copies to which I have had access. But I have not the slightest doubt that there has been a typographical error, which has been faithfully copied. I should read it "Where is the Master's point?" The next question confirms my conviction. The Master sets the Craft to work, the Warden dismisses them. This has been followed by the modern rituals.

² Various have been the conjectures as to the meaning of the word Irah. Schneider, looking to the theory that modern Freemasonry was instituted to secure the restoration of the House of Stuart, supposes the letters of the word to be the initials of the Latin sentence "Iacobus Redibit Ad Hereditatem" — James shall return to his inheritance. Krause thinks it the anagram of Hiram, and he rejects another supposition that it is the Hebrew Irah, reverence or holy fear, *i.e.*, the fear of God. It may mean Hiram, but there is no need of an anagram. The wonted corruption of proper names in the old Masonic manuscripts makes Irah a sufficiently near approximation to Hiram, who is called in the Old Constitutions, Aynon, Aman, Amon, Anon, or Ajuon. The German Steinmetzen called Tubal Cain Walcan.

³ Speaking of tests like this, Dr. Oliver very wisely says: "These questions may be considered trivial, but in reality they were of great importance and included some of the

27. Q. How many precious Jewels?
A. Three; a square Asher, a Diamond, and a Square.
28. Q. How many Lights?
A. Three; a Right East, South and West.¹
29. Q. What do they represent?
A. The Three Persons: Father, Son, and Holy Ghost.²
30. Q. How many Pillars?
A. Two; Iachin and Boaz.
31. Q. What do they represent?
A. A Strength and Stability of the Church in all Ages.³
32. Q. How many Angles in St. John's Lodge?
A. Four bordering on Squares. 
33. Q. How is the Meridian foundout?
A. When the Sun leaves the South and breaks in at the West-End of the Lodge.
34. Q. In what part of the Temple was the Lodge kept?
A. In Solomon's Porch,⁴ at the West-End of the Temple, where the two Pillars were set up.
35. Q. How many Steps belong to a right Mason?
A. Three.
36. Q. Give me the Solution.
A. I will . . . The Right Worshipful, Worshipful Master and Worshipful Fellows of the Right Worshipful Lodge from whence I came, greet you well. That Great God to us greeting, be at this our meet-

profoudest mysteries of the Craft. . . . A single Masonic question, how puerile soever it may appear, is frequently in the hands of an expert Master of the Art, the depository of most important secrets." On "The Masonic Tests of the Eighteenth Century" in his "Golden Remains," vol. iv., pp. 14, 15.

¹The Bauhütten or Operative lodges of the Germans probably had, says Krause, only three windows corresponding to the cardinal points, and the three principal officers of the lodge had their seats near them so as to obtain the best light for their labors.

²This is ample proof that the earliest Freemasonry of the new Grand Lodge was distinctly Christian. The change of character did not occur until the adoption of the "Old Charges" as printed in Anderson's first edition. But more of this in the text.

³There is an allusion to strength in the German Steinmetzen's catechism: "What is the Strength of our Craft?" Strength continued to be symbolized as a Masonic attribute in all subsequent rituals and so continues to the present day.

⁴An allusion to the Temple of Solomon is common in all the old Constitutions. But no hypothesis can be deduced from this of the Solomonic origin of Freemasonry. The subject is too important to be discussed in a note.

ing, and with the Right Worshipful Lodge from whence you came, and you are.¹

37. Q. Give me the Jerusalem Word.²

A. Giblin.

38. Q. Give me the Universal Word.

A. Boaz.

39. Q. Right Brother of ours, your Name?

A. N. or M.

Welcome Brother M. or N. to our Society.

40. Q. How many particular Points pertain to a Free-Mason?

A. Three; Fraternity, Fidelity, and Tacity.

41. Q. What do they represent?

A. Brotherly Love, Relief and Truth among all Right Masons; for all Masons were ordain'd at the Building of the Tower of Babel and at the Temple of Jerusalem.³

42. Q. How many proper Points?

A. Five: Foot to Foot, Knee to Knee, Hand to Hand, Heart to Heart, and Ear to Ear.⁴

43. Q. Whence is an Arch derived?

A. From Architecture.⁵

¹ It is most probable that this answer was given on the three steps which were made while the words were being said.

² The "Jerusalem Word" was probably the word traditionally confined to the Craft while they were working at the Temple, and the "Universal Word" was that used by them when they dispersed and traveled into foreign countries. The old "Legend of the Craft" has a tradition to that effect which was finally developed into the Temple Allegory of the modern rituals.

³ Of this answer Krause gives the following interpretation—"Perhaps the Tower of Babel signifies the revolution under and after Cromwell, and the Temple of Jerusalem the restoration of the Stuart family in London"—which maybe taken for what it is worth and no more, especially as the stories of the Tower and the Temple formed prominent points in the Craft legend which was formulated some two centuries at least before the time of Cromwell or of the restored Stuarts.

⁴ At first glance this answer would seem to be adverse to the theory that the Third was not known in the year 1717, unless it were to be supposed that the passage was an interpolation made subsequent to the year 1720. But the fact is that, as Krause remarks, these expressions were not originally a symbol of the Master's degree (Meisterzeichen), but simply a symbol of Fellowship, where heart and heart and hand and hand showed the loving-kindness of each brother. Afterward, under the title of "The Five Points of Fellowship," it was appropriated to the Third Degree and received the symbolic history which it still retains.

⁵ Here, say Schneider and Krause, is a trace of Royal Arch Masonry. Not so. Architecture was the profession of the Operative Freemasons and became naturally a point in the examination of a craftsman. Such as this catechism evidently was.

44. Q. How many Orders in Architecture?
A. Five: The Tuscan, Doric, Ionic, Corinthian, and Composite.
45. Q. What do they answer?
A. They answer to the Base, Perpendicular, Diameter, Circumference, and Square.
46. Q. What is the right Word, or right Point of a Mason?
A. Adieu.

End of the Catechism.

Such is this important document, but of whose real value different opinions have been expressed. Oliver, as we have seen, calls it a "catchpenny." This epithet would, however, refer to the motives of the printer who gave the public the work at sixpence a copy and not to the original writer against whom no such charge, nor no such mercenary views should be imputed. The Rev. Mr. Sidebotham, who reprinted it in the *Freemasons Monthly Magazine*, for August, 1855, from a copy found among the collection of Masonic curiosities deposited in the Bodleian Library, calls it "only one of the many absurd attempts of ignorant pretenders;" but his attempts to prove absurdities are themselves absurd.

The learned Mossdorf who, in 1808, found a copy of the second edition¹ in the Royal Library at Leipsic, which Dr. Krause reprinted in his *Three Oldest Documents of the Masonic Fraternity*, designates it as a delicately framed but very bitter satire against the old lodges in London, which had just established the Grand Lodge. But a perusal of the document will disclose nothing of a satirical character in the document itself, and only a single paragraph of the preface in which the design of the institution is underrated, and the depreciation illustrated by a rather coarse attempt at a witticism.

But the preface was the production of the editor or printer, and must not be confounded with the catechism, which is free from anything of the kind. The very title, which might be deemed ironical, was undoubtedly an assumed one given to the original document by the same editor or printer for the purpose of attracting purchasers.

¹ It was the 2d edition, 1725, with which Mossdorf was acquainted, and to this were annexed "Two Letters to a Friend," which are not contained in the 1st edition. These gave him the opinion of the satirical character of the work.

Bro. Steinbrenner, of New York, who has written one of our most valuable and interesting histories of Freemasonry,¹ thus describes it, and has given it what I think must have been its original title.

"The oldest fragment of a ritual or Masonic lecture in the English Language² which we have met with is the 'Examination upon Entrance into a Lodge,' as used at the time of the Revival."

Dr. Krause is the first writer who seems to have estimated this old catechism at anything like its true value. He calls it a remarkable document, and says that after a careful examination he has come to the conclusion that it was written by one of the old Operative Masons, who was not without some scholarship, but who esteemed Masonry as an art peculiarly appropriate to builders only, and into which a few non-Masons were sometimes admitted on account of their scientific attainments.

He thinks that this catechism presents the traces of a high antiquity, and so far as its essential constituent parts are concerned, it might have derived its origin from the oldest York ritual, probably as early as the 12th or 13th century.

I am not inclined to accept all of the Krausean theory on the subject of the origin or of the antiquity of this document. It is not necessary for the purpose of employing it in the investigation of the primitive ritual adopted by the Speculative Freemasons when they organized their Grand Lodge, to trace its existence beyond the first decade of the 18th century, though it might be reasonably extended much farther back.

The statement in the preface or introduction, that the original manuscript was printed, and had "been found in the custody of a Freemason who died suddenly," may be accepted as a truth. There is nothing improbable about it, and there is no reason to doubt the fact.

Connecting this with the date of the publication, which was just seven years after the establishment of the Grand Lodge, and only four years after what is supposed to be the date of the fabrication of

¹ "The Origin and Early History of Masonry," by G. W. Steinbrenner, Past Master. New York, 1864.

² When Steinbrenner wrote the above the Sloane MS. No. 3329 had not been discovered. And yet it is doubtful whether it and the original manuscript of "The Grand Mystery" are not contemporaneous.

the three degrees; and comparing it with the Sloane MS. 3329, where we shall find many instances of parallel or analogous passages; and seeing that the Sloane MS. was undeniably an Operative ritual, since its acknowledged date is somewhere between the middle and the close of the 17th century; considering all these points, I think that we may safely conclude that the original manuscript of the printed document called *The Grand Mystery* was the "Examination upon Entrance into a Lodge" of Operative Freemasons.

The following inferences may then be deduced in respect to the character of this document with the utmost plausibility:

1. That it was a part, and the most essential part, of the ritual used by the Operative Freemasons about the close of the 17th and the beginning of the 18th century, and if anything was wanting toward a complete ritual it was supplemented by the Sloane MS. No. 3329.

2. That it was the ritual familiar to the four Lodges which in 1717 united in the establishment of the Speculative Grand lodge of England.

3. That on the establishment of that Grand Lodge it was accepted as the ritual of the Speculative Freemasons and so used by them until they perfected the transition from wholly Operative to wholly Speculative Freemasonry by the fabrication of degrees and the development of a more philosophical ritual, composed, as it has always been conjectured, by Desaguliers and Anderson, but principally always by the former.

Having premised these views, we may now proceed to investigate, with some prospect of a satisfactory result, the character and condition of Speculative Freemasonry so far as respects a ritual during the earliest years of the Grand Lodge.

In the first place, it may be remarked that internal evidence goes to prove that this catechism is appropriate solely for Operative Freemasons. It was undoubtedly constructed at a time when Speculative Freemasonry, in the modern sense, was not in existence, and when the lodges which were to use it were composed of Operatives, the Theoretic members not being at all taken into consideration.

This is very clearly shown by various passages in the catechism. Thus, Question 2 alludes to the hours of labor; Question 3 is an inquiry whether the brother who is being examined is in want of work, because the old Operative Constitutions directed the Craft "to

receive or cherish strange Fellows when they came over the country and set them to work." Hence, in view of this hospitable duty, the visitor is asked if he is busy, that is to say, if he has work to occupy and support him.

Questions 18 and 19 make reference to the time and duty of setting the men to work, and of dismissing them from labor.

Questions 14 and 21 refer to the square and rule as implements of Operative Masonry employed in the lodge. Question 27 speaks of the ashlar, and 43 and 44 of the orders of architecture. All of these are subjects appropriate and familiar to Operative Masons, and indicate the character of the catechism.

The next point that calls for attention is that in this Operative ritual there is not the slightest reference to degrees. They are not mentioned nor alluded to as if any such system existed. The examination is that of a Freemason, but there is no indication whatever to show that he was a Master, Fellow, or an Apprentice. He could not probably have been the last, because, as a general rule, Apprentices were not allowed to travel. The German *Steinmetzen*, however, sometimes made an exception to this regulation, and the Master who had no work for his Apprentice would furnish him with a mark and send him forth in search of employment.

If a similar custom prevailed among the English Freemasons, of which there is no proof for or against, the wandering Apprentice would, on visiting a strange lodge, doubtless make use of this catechism. There is nothing in its text to prevent him from doing so, for, as has already been said, there is no mention in it of degrees.

There does not seem to be any doubt in the minds of the most distinguished Masonic scholars, with perhaps a very few exceptions, that in the Operative ritual there were no degrees, the words Apprentice, Fellow, and Master referring only to gradations of rank. It is also believed that the ceremonies of admission were exceedingly simple, and that all these ranks were permitted to be present at a reception.

According to this catechism a lodge consisted of five or seven Masons, but it does not say that they must be all Master Masons.

The Sloane MS. says that there should be in a lodge two Apprentices, two Fellow-Crafts, and two Master Masons.

The Statutes of the Scottish Masons explicitly require the presence of two Apprentices at the reception of a Master.

The Old Constitutions, while they have charges specially for Masters and Fellows, between whom they make no distinction, have other "charges in general" which, of course, must include Apprentices, and in these they are commanded to keep secret "the consoils of the lodge," from which it is to be inferred that Apprentices formed a constituent part of that body.

It has been usual to say that from 1717 to 1725 there were only Apprentices' lodges. The phraseology is not correct. They were lodges of Freemasons, and they so continued until the fabrication of a system of degrees. After that period the lodges might properly be called Apprentice lodges, because the first degree only could be conferred by them, though Fellow-Craft and Master Masons were among their members, these having until 1725 been made in the Grand Lodge exclusively.

The fact that this ritual, purposely designed for Operative Freemasons only, and used in the Operative lodges of London at the beginning of the 18th century, was adopted in 1717 when the four Lodges united in the organization of a Grand Lodge, is, I think, a convincing proof that there was no expressed intention at that time to abandon the Operative character of the institution, and to assume for it a purely Speculative condition.

I use the word "expressed" advisedly, because I do not contend that there was no such covert intention floating in the minds of some of the most cultivated Theoretic Freemasons who united with their Operative brethren in the organization.

But these Theoretic brethren were men of sense. They fully appreciated the expediency of the motto, *festina lente*. They were, it is true, anxious to hasten on the formation of an intellectual society, based historically on an association of architects, but ethically on an exalted system of moral philosophy; they perfectly appreciated, however, the impolicy of suddenly and rudely disrupting the ties which connected them with the old Operative Freemasons. Hence, they fairly shared with these the offices of the Grand Lodge until 1723, after which, as has been shown, no Operative held a prominent position in that body. The first laws which they adopted, and which were announced in the "Charges of a Free Mason," compiled by Payne and Anderson about 1719, had all the features of an Operative Code, and the ritual of the Operative Freemasons embodied in the document satirically called *The Grand Mystery*

was accepted and used by the members of the Speculative Grand Lodge until the fabrication of degrees made it necessary to formulate another and more philosophical ritual.

But it is not necessary to conclude that when the system of degrees was composed, most probably in 1720 and 1721, principally by Dr. Desaguliers, the old Operative ritual was immediately cast aside. In all probability it continued to be used in the lodges, where the Fellow-Crafts and Masters' degrees were unknown, until 1725, the conferring of them having been confined to the Grand Lodge until that year. There were even Operative lodges in England long after that date, and the old ritual would continue with them a favorite. This will account for the publication in 1724, with so profitable a sale as to encourage the printing of a second edition with appendices in 1725.

But the newer ritual became common in 1730 or a little before, and the able defense of it by Anderson in the 1738 edition of the *Book of Constitutions* shows that the old had at length been displaced, though some of its tests remained for a long time in use among the Craft, and are continued, in a modified form, even to the present day.

The early Operative ritual, like the Operative laws and usages, has made an impression on the Speculative society which has never been and never will be obliterated while Freemasonry lasts.

The next feature in this Operative ritual which attracts our attention is its well-defined Christian character. This is shown in Question 29, where the three Lights of the Lodge are said to represent "The Three Persons, Father, Son, and Holy Ghost."

Originating as it did, and for a long time working under ecclesiastical control, being closely connected with the Church, and engaged exclusively in the construction of religious edifices, it must naturally have become sectarian.

In the earliest times, when the Roman Catholic religion was the prevailing faith of Christendom, Operative Freemasonry was not only Christian but Roman Catholic in its tendencies. Hence, the oldest of the manuscript Constitutions contains an invocation to the Virgin Mary and to the Saints. In Germany the patrons of the Freemasons were the Four Crowned Martyrs.

But when in England the Protestant religion displaced the Roman Catholic, then the Operative Freemasons, following the sec-

tarian tendencies of their countrymen, abandoned the reference to the Virgin and to the Saints, whose worship had been repudiated by the reformed religion, and invoked only the three Persons of the Trinity. The Harleian MS. commences thus:

"The Almighty Father of Heaven with the Wisdom of the Glorious Sonne, through the goodness of the Holy Ghost, three persons in one Godhead, bee with our beginning & give us grace soe to governe our Lives that we may come to his blisse that never shall have end."

All the other manuscript Constitutions conform to this formula, and hence we find the same feature presented in this catechism, and that in the ritual used when the Grand Lodge was established the three Lights represented the three Persons of the Trinity.

Operative Freemasonry never was tolerant nor cosmopolitan. It was in the beginning ecclesiastical, always Christian, and always sectarian.

Of all the differences that define the line of demarcation between Operative and Speculative Freemasonry, this is the most prominent.

The Theoretic Freemasons, that is, those who were non-Masons, when they united with their Operative fellow-members in the organization of a Grand Lodge, did not reject this sectarian character any more than they did the ritual and the laws of the old association.

But the non-Masonic or non-Operative element of the new Society was composed of men of education and of liberal views. They were anxious that in their meetings a spirit of toleration should prevail and that no angry discussions should disturb the hours devoted to innocent recreation. Moreover, they knew that the attempt to revive the decaying popularity of Freemasonry and to extend its usefulness would not be successful unless the doors were thrown widely open to the admission of moral and intellectual men of all shades of political and religious thought. Hence, they strove to exclude discussions which should involve the bitterness of partisan politics or of sectarian religion.

Dr. Anderson describes the effect produced by this liberality of sentiment when he says, speaking of this early period of Masonic history:

"Ingenious men of all faculties and stations, being convinced that the cement of the lodge was love and friendship, earnestly re-

quested to be made Masons, affecting this amicable fraternity more than other societies then often disturbed by warm disputes."¹

Thus it was that the first change affected in the character of the institution by which the ultimate separation of Speculative from Operative Freemasons was foreshadowed, was the modification of the sectarian feature which had always existed in the latter.

Therefore, in 1721, the Grand Lodge, "finding fault" with the "Old Gothic Constitutions" or the laws of the Operative Freemasons, principally, as the result shows, on account of their sectarian character, instructed Dr. Anderson "to digest them in a new and better method."

This task was duly accomplished, and the "Charges of a Freemason," which were published in the first edition of the *Book of Constitutions*, announce for the first time that cosmopolitan feature in the religious sentiments of the Order which it has ever since retained.

"Though in ancient times," so runs the first of these "Charges," "Masons were charged in every Country to be of the religion of that country or nation, whatever it was; yet it is now thought more expedient only to oblige them to that religion in which all men agree, leaving their particular opinions to themselves."

In consequence of this declaration of tolerance, the ritual which was framed after the old Operative one, exemplified in *The Grand Mystery*, ceased to derive any of its symbolism from purely Christian dogmas, though it can not be denied that Christian sentiments have naturally had an influence upon Speculative Freemasonry.

But the institution, in all the countries into which it has since extended, has always, with a very few anomalous exceptions, been true to the declaration made in 1721 by its founders, and has erected its altars, around which men of every faith, if they have only a trusting belief in God as the Grand Architect of the universe, may kneel and worship.

But before this sentiment of perfect toleration could be fully developed, it was necessary that the tenets, the usages, and the influence of the Operative element should be wholly eliminated from the new society. The progress toward this disruption of the two systems, the old and the new, would have to be slow and gradual.

¹ "Book of Constitutions," 2d edition, p. 114.

Very justly has Bro. Gould remarked that "Speculative Masonry was, so to speak, only on its trial during the generation which succeeded the authors of the Revival. The institution of a society of Free and Accepted Masons on a cosmopolitan and unsectarian basis was one thing; its consolidation, however, opposed as its practical working showed it to be to the ancient customs and privileges of the Operatives, was another and a very different affair."¹

Therefore, as a matter of sheer policy, and also because it is probable that no intention of effecting such a change had, in the beginning, entered into the minds of the future founders of Speculative Freemasonry, it was deemed necessary to continue the use of the simple ritual which had so long been familiar to the Operatives, and it was accordingly so continued to be used until, in a few years, the opportune time had arrived for the fabrication of a more complex one, and one better adapted to the objects of a Speculative society.

As it appears, then, to be clearly evident that the Operative ritual was practiced by the Grand Lodge from 1717 until 1721 or 1722, and for a much longer period by many of the lodges under its jurisdiction, it is proper that we should endeavor, so far as the materials in our possession will permit, to describe the character of that ritual.

Masonic scholars who have carefully investigated this subject do not now express any doubt that the rite practiced by the mediæval Freemasons of every country, and which, under some modifications, was used by the Operative Freemasons when the Grand Lodge of England was established, was a very simple one, consisting of but one degree.

In fact, as the word degree literally denotes a step in progression, and would import the possible existence of a higher step to which it is related, it would seem to be more proper to say that the Operative rite was without degrees, and consisted of a form of admission with accompanying esoteric instructions, all of which were of the simplest nature.

Master, Fellow, and Apprentice were terms intended to designate the different ranks of the Craftsmen, which ranks were wholly unconnected with any gradations of ritualistic knowledge.

¹ "The Four Old Lodges," p. 33.

Masters were those who superintended the labors of the Craft, or were, perhaps, in many instances the employers of the workmen engaged on an edifice. Paley suggests that they were probably architects, and he says that they must have been trained in one and the same school, just as our clergy are trained in the universities, and were either sent about to different stations or were attached to some church or cathedral, or took up their permanent residence in certain localities.¹

This description is very suitable to the most flourishing period of Gothic architecture, when such Craftsmen as William of Sens or Erwin of Steinbach were the Masters who directed the construction of those noble works of architecture which were to win the admiration of succeeding ages.

But in the 17th and the beginning of the 18th century, when there was a decadence in the old science of Gothic architecture, every Fellow who was appointed by an employer or selected by his brethren to govern a lodge and to direct the works of the Craftsmen, became by that appointment or selection a Master Mason.

We know that this usage was for some time observed by the Speculative Freemasons, for in the form of constituting a new lodge as prescribed in 1723 by the Duke of Wharton, who was then Grand Master, it is said that the Master who is to be installed, "being yet among the Fellow-Craft," must be taken from among them, and be inducted into office by the Grand Master; by which act he became a Master Mason, and not by the reception of a degree; and the investiture of certain additional secrets.²

The Fellows were workmen who had served an apprenticeship of several years, and had at length acquired a knowledge of the trade. They constituted the great body of the Craft, as is evident from the constant reference to them in the Old Constitutions.

The Apprentices, as the etymology of the word imports, were learners. They were youths who were bound to serve their Masters for a term of five or seven years, on the condition that the Master shall instruct them in the trade, that at the expiration of their term of service they might be admitted into the rank or class of Fellows.

As there was but one ceremony of admission common to all

¹ "Manual of Gothic Architecture," p. 209.

² See the form in the 1st edition of Anderson, p. 71.

classes of the Craft, it follows that there could be no secrets of a ritual character which belonged exclusively to either of the three classes, and that whatever was known to Masters and Fellows must also have been communicated to Apprentices; and this is very evident from the well-known fact that the presence of members of each class was necessary to the legal communications of a lodge.

The Mason Word is the only secret spoken of in the minutes of the Scotch lodges, but the German and English rituals show that there were other words and methods of recognition besides an examination which constituted the esoteric instructions of Operative Masonry.

The most important of these points is, however, the fact that at the time of the organization of the Grand Lodge in 1717, and for a brief period afterward, there was but one degree, as it is called, which was known to the Operatives, and that for a brief period of three or four years this simple system was accepted and practiced by the founders of Speculative Freemasonry.

But the discussion of this fact involves a thorough investigation, and can not be treated at the close of a chapter.

The inquiry, so far as it has advanced, has, I think, satisfied us that the Operative ritual was that which was at first adopted by the founders of Speculative Freemasonry.

When, afterward, they discarded this ritual as too simple and as unsuitable to their designs, they were obliged, in the construction of their new system, to develop new degrees.

The task, therefore, to which our attention must now be directed, is first to demonstrate that the primitive ritual accepted in 1717 by the Speculatives consisted of but one degree, if for convenience I may be allowed to use a word not strictly and grammatically correct; and, secondly, to point out the mode in which and the period when a larger ritual, and a system of degrees, was invented.

And these must be the subjects of the two following chapters.

CHAPTER XXXIII

THE ONE DEGREE OF OPERATIVE FREEMASONS

IN the articles of union agreed to in 1813 by the two Grand Lodges of England, the "Moderns" and the "Ancients" as they were called, it was declared that "pure Ancient Masonry consists of three degrees and no more." If by Ancient Masonry it was intended to designate the system then existing, and no other and earlier one—if the character of antiquity was to be circumscribed within the one hundred preceding years, or thereabouts—then the declaration might be accepted as an historical truth. But if it was designed to refer by these words to the whole period of time, within which included the era of Operative, and of combined Operative and Speculative Freemasonry, as well as that later one when pure Speculative Masonry alone prevailed, then the assertion must be considered as apocryphal and as having no foundation in authentic history.

If our judgment on this subject were to be formed merely on the complete silence of the Old Records, we should be forced to the conclusion that until the close of the second decade of the 18th century, or about the year 1720, when the Speculative element was slowly disintegrating itself from the Operative, there was only one degree known as the word is understood in the present day.

We have evidence that the Operative Freemasons of Scotland in the 15th century adopted, to some extent, the secret ceremonies observed by the mediaeval builders of the continent.¹ We may therefore refer to the records of the Scotch lodges for a correct knowledge of what was the degree system practiced, not only in Scotland but on the continent, at that period.

¹ See Lyon, "History of the Lodge of Edinburgh," p. 234. This is evident from the charter granted to the Masons and Wrights of Edinburgh in 1475, copied by Lyon (p. 230) from the Burgh Records of Edinburgh, where reference is made for their government to the customs "in the towne of Bruges."

Now we have abundant evidence by deduction from the records of the old Scottish lodges that there was in the 15th, 16th, and 17th centuries only one degree known to the brotherhood.

There were, it is true, three classes or ranks of Masons, namely, Masters, men who made contracts and undertook the work of building for employers; Fellow-Crafts or Journeymen employed by these Masters; and Entered Apprentices, who were received that they might be taught the art of building. But this difference of rank involved no difference of esoteric instruction. There was but one ceremony and one set of secrets for all, and common to and known by everyone, from the youngest Apprentice to the oldest Master. This is plainly deducible from all the Old Records.

Thus, in the Schaw statutes, whose date is December 28, 1498, it is enacted as follows:

"Item that na maister or fellow of craft be ressavit nor admittit without the number of sex maisters and twa enterit prenteissis the wardene of that lodge being one of the said sex."

The same regulation, generally, in very nearly the same words, is to be found in subsequent records, constitutions, and minutes of the 16th and 17th centuries.

Now what deduction must be drawn from the oft-repeated language of this statute? Certainly only this, that if two Apprentices were required to be present at the reception of a Fellow-Craft or a Master, there could have been no secrets to be communicated to the candidates as Fellow-Crafts or Masters which were not already known to the Apprentices. In other words, that these three ranks were not separated and distinguished from each other by any ceremonies or instructions which would constitute degrees in the modern acceptation of the term. In fact, there could have been but one degree common to all.

Upon this subject Bro. Lyon says: "It is upon Schaw's regulation anent the reception of Fellows or Masters, that we found our opinion that in primitive times there were no secrets communicated by lodges to either Fellows of Craft or Masters that were not known to Apprentices, seeing that members of the latter grade were necessary to the legal constitution of communications for the admission of Masters or Fellows."¹

¹ "History of the Lodge of Edinburgh," p. 23.

We are confirmed in this conclusion by what is said in the same Old Records of the "Mason Word."

The Mason Word and what was connected with it appeared to constitute the only secret known to the Masons of the centuries preceding the 18th. It was, however, not simply a word, but had other mysteries connected with it, as is apparent from an expression in the minutes of the Lodge of Dunblane, where it is said that two Apprentices of the Lodge of Kilwinning being examined on their application for affiliation, were found to have "a competent knowledge of the secrets of the Mason Word."¹

These secrets consisted also probably of a sign and grip. Indeed, the records of Haughfort Lodge in 1707 state the fact that there was a grip, and it is known that as early as the 12th century the German Masons used all these modes of recognition.²

There was also a Legend or Allegory, nothing, however, like the modern legend of the Third degree, which connected the Craft traditionally with the Tower of Babel and the Temple of Solomon. This Legend was contained in what we now call the *Legend of the Craft* or the *Legend of the Guild*. This is contained, with only verbal variations, in all the old manuscript Constitutions. That this Legend was always deemed a part of the secrets of the brotherhood, is very evident from the destruction of many of those manuscripts by scrupulous Masons in 1720, from the fear, as Anderson expresses it, that they might fall into strange hands.

But whatever were the secrets connected with the "Mason Word," there is abundant evidence that they were communicated in full to the Apprentice on his initiation.

First, we have the evidence of the Schaw statutes that two Apprentices were required to be present at the reception of a Mason or a Fellow-Craft. Then the minutes of the Lodge of Edinburgh for 1601, 1606, and 1637, referred to by Bro. Lyon,³ show that Apprentices were present during the making of Fellow-Crafts. Again, we find the following conclusive testimony in the Laws and Statutes of the Lodge of Aberdeen, adopted December 27, 1760:

¹ "History of the Lodge of Edinburgh," p. 417.

² The English Masons in the beginning of the 18th century, and I suppose before that period, had two words, the "Jerusalem Word" and the "Universal Word." See the Examination in the last chapter. The German Masons also had two words, at least.

³ "History of the Lodge of Edinburgh," p. 74.

"Wee Master Masons and Entered Prentises, all of us underseryvers, doe here protest and vowe as hitherto we ehave done at our entrie when we received the benefit of the Mason Word," &c.¹

From all of which we are authorized to entertain the opinion, in the language of Bro. Lyon, who has thoroughly investigated the subject, so far at least as relates to Scotland, "that 'the Word' and other secrets peculiar to Masons were communicated to Apprentices on their admission to the lodge, and that the ceremony of passing was simply a testing of the candidate's fitness for employment as a journeyman."²

In the English lodges of the same period, that is, up to the beginning of the 18th century, we find no indications of the existence of more than one degree common to the whole Craft. The Apprentices, however, do not occupy in the old English Constitutions so conspicuous a place as they do in the Scotch. We can, for instance, find no regulation like that in the Schaw statutes which requires Apprentices to be present at the making of Fellow-Crafts.

But in the oldest of the English Constitutions which have been unearthed by the labors of Masonic archæologists—namely, the one known as the Halliwell MS., the date of which is supposed to be not later than the middle of the 15th century—we find indications of the fact that the Apprentices were in possession of all the secret knowledge possessed by the Masters and Fellows, and that they were allowed to be present at meetings of the lodge. Thus, the thirteenth article of that early Constitution says:

"—gef that the mayster a prentes have
Enterlyche thenne that he hym teche,
And meserable poyntes that he hym reche,
That he the crafte abelyche may conne,
Whersever he go undur the sonne."³

That is, if a Master have an Apprentice, he shall give him thorough instruction, and place him in the possession of such points as will enable him to recognize the members of the Craft wheresoever he may go. He was to be invested with the modes of recognition common to all, whereby a mutual intercourse might be held. It

¹ "History of the Lodge of Edinburgh," p. 423.

² *Ibid.*, p. 233.

³ Halliwell MS., lines 240-244.

was not that he was to know just enough to prove himself to be an Apprentice, but he was to have such knowledge as would enable him to recognize in a stranger a Fellow-Craft or a Master—in other words, he was to have all that they had, in the way of recognition.

But a more important admission, namely, that the Apprentice was permitted to be present at the meetings of a lodge of Masters and Fellows, and to participate in, or at least be a witness of, their private transactions, is found in the third point of this same Constitution, which is in the following words:

"The thrydee poynt must be severele,
 With the prentes knowe hyt wele,
 Hys mayster counsel he kepe and close,
 And hys fellowes by hys goode purpose;
 The prevystye of the chamber telle he no mon,
 Ny yn the logge whatsoever they done;
 Whatsoever thon heryst or eyste hem do
 Telle hyt no mon, whersever thou go;
 The counsel of halle and yeke of boure,
 Kepe hyt wel to gret honoure,
 Lest hyt wolde torne thyself to blame,
 And brynge the craft ynto gret schame."¹

That is, the Apprentice was directed to keep the counsel of his Master and Fellows, and to tell to no one the secrets of the chamber nor what he should see or hear done in the lodge.²

He was to keep the counsel of "hall and bower," a mediaeval phrase denoting all sorts of secrets, and all this he was to observe lest he should bring the Craft into shame.

Now I do not think we need anything more explicit to prove that Apprentices were admitted to share the secrets of the Fellows and be present at the meetings of the lodge, all of which is a conclusive evidence against the existence of separate degrees,

The same reference to Apprentices as being in possession of the secrets of the Craft, which they were not to communicate unlawfully, is found in subsequent Constitutions, as late as 1693. In the York Constitutions, first published by Bro. Hughan in his *History of Freemasonry in York*, under the title of "The Ap-

¹ Halliwell MS., lines 275-286.

² Similar to this is "The Apprentice Charge" contained in the Lodge of Hope MS., the date of which is 1680. It says that the Apprentice "shall keep counsell in all things spoken in lodge or chamber by fellowes or free masons."

prentice Charge," it is said that "he shall keepe councill in all things spoken in Lodg or Chamber by any Masons, Fellowes or Fremasons."

The Masonic student, while carefully perusing the Old Records of the English Masons and comparing them with those of the Scotch, will be struck with one important difference between them. In the Scotch Statutes, Constitutions, and Minutes, the Apprentices assume a prominent position, and are always spoken of as a component and necessary part of the brotherhood.

Thus, the Schaw statutes prescribe the fee for the admission of Fellow-Crafts, followed immediately by another prescribing the fee for the admission of Apprentices; twice in the minutes of the Lodge of Edinburgh (1706 and 1709) it is recorded that a notary who was appointed for the purpose of acting as "clerk to the brethren masons" was initiated as "ane entered Apprentice and Fellow-Craft,"¹ and lastly, Apprentices were required to be present at the admission of Fellow-Crafts and Masters.

I think, therefore, that the most eminent Masonic historians of the present day have been justified in the conclusion to which they have arrived after a careful examination of old documents, that until a short time after the organization of the Grand Lodge in the year 1717, there is no evidence of the existence of more than one degree; that all the secrets were communicated to the Apprentices, and that the ceremony of passing to a Fellow-Craft was simply a testing of the candidate's fitness for employment as a journeyman.²

Bro. Hughan says that "no record prior to the second decade of the last century ever mentions Masonic degrees, and all the MSS. preserved decidedly confirm us in the belief that in the mere Operative (although partly Speculative) career of Freemasonry the ceremony of reception was of a most unpretentious and simple character, mainly for the communication of certain lyrics and secrets, and for the conservation of ancient customs of the Craft."³

In another place the same distinguished writer says: "I have carefully perused all the known Masonic MSS. from the 14th century down to A.D. 1717 (of which I have either seen the originals or

¹ Lyon, "History of the Lodge of Edinburgh," p. 43.

² Such is the opinion of Bro. Lyon. See "History of the Lodge of Edinburgh," p. 233.

³ *Voice of Masonry*, vol. xii., June, 1874, p. 340.

have certified copies), and have not been able to find any reference to three degrees."¹

Bro. Findel says: "Originally it seems there was but one degree of initiation in the year 1717; the degrees or grades of Apprentice, Fellow, and Master were introduced about the year 1720."²

Bro. Lyon, also, who has thoroughly investigated the customs of the early Scottish lodges, in referring to the Schaw statute, which required two Apprentices to be present at the admission of Fellows, says that in 1693 "the lodge recognized 'passing,' *i.e.*, a promotion to the fellowship, simply as an 'honour and dignity.' " And he adds:

"If the communication by Mason Lodges of secret words or signs constituted a degree—a term of modern application to the esoteric observances of the Masonic body—then there was under the purely Operative *regime* only one known to Scotch lodges, *viz.*, that in which, under an oath, Apprentices obtained a knowledge of the Mason Word and all that was implied in the expression."³

Even Dr. Oliver, who, of all writers, is the least skeptical in respect to Masonic traditions, acknowledges that there is no evidence of the existence of degrees in Freemasonry anterior to the beginning of the 18th century.

The only living Masonic scholar of any eminence who, so far as I am aware, denies or doubts this fact is the Rev. Bro. W. A. Woodford, and he asserts his opinion rather negatively, as if he were unwilling to doubt, than positively as if he were ready to deny the fact, that the old Operative system consisted of but one degree.

As Bro. Woodford is one whose learning and experience entitle his opinion on any point of Masonic history to a deferential consideration, it will be proper to examine the weight of his arguments on this subject.

In the year 1874 Bro. Hughs proposed, in the *London Freemason*, to defend in future communications three historical statements against anyone who should oppugn them.

¹ Cited by Lyon in "History of the Lodge of Edinburgh," p. 211.

² "History of Freemasonry," p. 150, Lyon's Translation.

³ Lyon, "History of the Lodge of Edinburgh," p. 23.

One of these statements was made in the following words:

"The references to Masonic degrees (as we understand the term now) never occur in the ancient minutes; no rituals of degrees prior to 1720 are in existence, and whatever esoteric customs may have been communicated to Craftsmen before the last century, they do not appear to have necessitated the temporary absence of either class of members from the Lodge."¹

To this challenge Bro. Woodford responded in a subsequent number of the same paper.²

The gist of our learned Brother's argument in reply appears to be that though, as Hughan asserts, there may be no ritual evidence of the existence of the three degrees before 1720, yet "such a proposition need not be understood as asserting that they did not exist, but only that, so far, we have no ritual evidence of their distinct existence as now."

As a logical conclusion, it appears to me that such a disposition of the question is wholly untenable. It was an excellent maxim of the schools, which has been adopted in philosophy, in physical science, and in law, that "of things which do not appear and of things which do not exist, the reasoning is the same."³

We can only arrive at a correct judgment when we are guided by evidence; without it no judgment can be reasonably formed.

Dr. Hedge, in his excellent manual of logic, says: "The proof that the Romans once possessed Great Britain is made up of a variety of independent arguments: as immemorial tradition; the testimony of historians; the ruins of Roman buildings, camps, and walls; Roman coins, inscriptions, and the like. These are independent arguments; but they all conspire to establish the fact."⁴

Now, if we apply this method of reasoning to the question of the existence of Masonic degrees prior to the year 1720, we shall see clearly how completely the affirmative proposition is without support. We have no immemorial tradition, no historical testimony, no allusion in old documents, such as the manuscript Constitutions, the minutes of the Scottish or of the very few English lodges that are extant, nor in the English or German Freemasons, which tend

¹ *London Freemason*, June 27, 1874.

² *Ibid.*, July 27, 1874.

³ De non apparentibus et de non existentibus, eadem est ratio.

⁴ "Elements of Logic," by Levi Hedge, LL.D., Boston, 1827, p. 74.

to prove the existence of degrees in the old system of Operative Freemasonry. On the contrary, we have abundant evidence in these Constitutions and minutes that the secrets of the Craft were common to the three classes, and that Apprentices were required to be present at the admission of Masters.

The other argument of Bro. Woodford is, that, "notwithstanding the Scotch lodges had an open court for their members, that does not preclude the possibility of the existence of other secrets and separate degrees."

It is possible, but it does not thence follow that it is true. In this investigation we seek not possibilities but facts, and, as Bro. Woodford, usually so careful and so accurate in his historical and archaeological inquiries, has supplied no proof of the hypothesis which he has advanced, it must be accepted as a mere assumption, and may be fairly met with a contrary one.

But the remarks of Bro. Hughan himself, in reply to the argument of Bro. Woodford, are so conclusive and throw so much light upon this interesting subject that I can not refrain from enriching the pages of this work with the very words of this eminent authority in Masonic archaeology.¹

"Now what do the old lodge minutes say on this subject? We have had authorized excerpts from these valuable books published (with few exceptions). The whole of the volumes have been most diligently and carefully searched, the result made known, and every Masonic student furnished with the testimony of these important witnesses, all of which, from the 16th century to the first half of the second decade of the 18th century, unite in proving that there is no register of any assembly of Masons working ceremonies or communicating 'secrets' from which any portion of the Fraternity was excluded or denied participation; neither can there be found a single reference in these lodge minutes to justify one in assuming 'three degrees' to be even known to the brethren prior to A.D. 1716-1717.² Of course, there can be no doubt as to what may be termed grades in Ancient Masonry, Apprentices had to serve their 'regular time' before being accounted Fellow-Crafts, and then subsequently the office

¹ Contained in article in the *London Masonic Magazine* for August, 1874.

² The learned Brother makes here a rather too liberal admission. I have found no evidence of the existence of three degrees in the year 1717, and it will be hereafter seen that their fabrication is assigned to a later date.

or position of Master Mason was conferred upon a select few; but no word is ever said about 'degrees.' All the members were evidently eligible to attend at the introduction of Fellow-Crafts and Master Masons, as well as at the admission of Apprentices; and so far as the records throw light on the customs of our early brethren, the Apprentices were as welcome at the election and reception of Masters—as the latter were required to participate in the initiation of the former.

"We are quite willing to grant, for the sake of argument, that a word may have been whispered in the ear of the Master of the lodge (or of Master Masons) on their introduction or constitution in the lodge; but supposing that such were the case (and we think the position is at least probable), the 'three degrees' are as far from being proved as before, especially as we have never yet traced any intimation, ever so slight, of a special ceremony at the 'passing' of Fellow-Crafts, peculiar to that grade, and from which Apprentices were excluded.

"If we have overlooked such a minute, we shall be only too glad to acknowledge the fact; but at present we must reiterate our conviction, that whatever the ceremonies may have been at the introduction of Fellow-Crafts and Master Masons anterior to the last century, they were not such as to require the exclusion of Apprentices from the lodge meetings; and in the absence of any positive information on the subject, we are not justified in assuming the existence of 'three degrees of Masonry' at that period; or, in other words, we can only fairly advocate that two have existed of which we have evidence, and whatever else we may fancy was known, should only be advocated on the grounds of probability. If the proof of 'three degrees' before 1717 is to rest on the authority of the Sloane MS. 3329, we shall be glad to give our opinion on the subject.

"With all respect, then, for our worthy Brother, the Rev. A. F. A. Woodford, whose exertions and contributions to Masonic literature have been continuous and most valuable for many years, we feel bound to state we do not believe according to the evidences accumulated that the 'three degrees were distinct grades in the Operative Order; but that the term Apprentice, Fellow-Craft, and Master Mason simply denoted Masonic, relative, or official positions.' "

If, then, there was originally but one degree, the one into which

Freemasons of every class or rank were initiated, according to a very simple form, upon their admission to the Craft, it follows that the degree Fellow-Craft and Master Mason must be of comparatively recent origin. This is legitimately a logical conclusion that can not, I believe, be avoided.

And if so, then the next question that we have to meet and discuss is as to the time and the circumstances of the fabrication of these degrees.

CHAPTER XXXIV

INVENTION OF THE FELLOW-CRAFT'S DEGREE

T having been satisfactorily shown, first, that during the existence of pure Operative Freemasonry there was but one degree, or ritual, of admission, or system of secret working in a lodge, which was accessible in common to all the members of the Craft, Apprentices as well as Fellows and Masters; secondly, that in the year 1717, when the Speculative element began to assume a hitherto unknown prominence, though it did not at once attempt to dissever the connection with the Operative, the Grand Lodge then formed, accepted, and practiced for some time this system of a single degree; and thirdly, that in the year 1723 we have the authentic documentary evidence of the "General Regulations" published in that year, that two degrees had been superimposed on this original one, and that at that time Speculative Freemasonry consisted of three degrees; it follows as a natural inference, that in the interval of six years, between 1717 and 1723, the two supplemental degrees must have been invented or fabricated.

It must be here remarked, parenthetically, that the word degree, in reference to the system practiced by the Operative Freemasons, is used only in a conventional sense, and for the sake of convenience. To say, as is sometimes carelessly said, that the Operative Freemasons possessed only the Apprentice's degree, is to speak incorrectly. The system practiced by the Operatives may be called a degree, if you choose, but it was not peculiar to Apprentices only, but belonged in common to all the ranks or classes of the Fraternity.

When the Speculative branch wholly separated from the Operative, and three divisions of the Order, then properly called degrees, were invented, this ritual of the latter became the basis of them all. Portions of it were greatly modified and much developed, and became what is now known as the First degree, though it continued

for many years to receive increments by the invention of new symbols and new ceremonies, and by sometimes undergoing important changes. Other portions of it, but to a less extent, were incorporated into the two supplemental degrees, the Second and the Third.

Thus it was that by development of the old ritual, and by the invention of a new one, the ancient system, or, conventionally speaking, the original degree of the Operatives, became the Entered Apprentice's degree of the Speculatives, and two new degrees, one for the Fellow-Crafts and one for the Master Masons, were invented.

Then the important and most interesting question recurs, When and by whom were these two new degrees invented and introduced into the modern system of Speculative Freemasonry?

The answer to this question which, at this day, would probably be given by nearly all the Masonic scholars who have, without preconceived prejudices, devoted themselves to the investigation of the history of Freemasonry, as it is founded on and demonstrated by the evidence of authentic documents, combined with natural and logical inferences and not traditionary legends and naked assumptions, is that they were the invention of that recognized ritualist, Dr. John Theophilus Desaguliers, with the co-operation of Dr. James Anderson, and perhaps a few others, among whom it would not be fair to omit the name of George Payne. The time of this invention or fabrication would be placed after the formation of the Grand Lodge in 1717, and before the publication of the first edition of its *Book of Constitutions* in 1723.

To the time and manner of the fabrication of the Fellow-Craft's degree the writers who have adopted the theory here announced have not paid so much attention as they have to that of the Master Mason. Recognizing the fact that the two supplementary degrees were fabricated between the years 1717 and 1723, they have not sought to define the precise date, and seem to have been willing to believe them to have been of contemporaneous origin.

But after as careful an investigation as I was capable of making, I have been led to the conclusion that the fabrication of the degree of Fellow-Craft preceded that of Master Mason by three or four years, and that the system of Speculative Freemasonry had been augmented by the addition of a new degree to the original one in or about the year 1719.

There is documentary evidence of an authentic character which

proves the existence of a "Fellow-Craft's part" in the year 1720, while it is not until the year 1723 that we find any record alluding to the fact that there was a "Master's part."

Hence, in a chronological point of view, it may be said that the single degree or ritual in which, and in the secrets of which, all classes of workmen, from the Apprentice to the Master, equally participated, constituted, under various modifications, a part of Operative Freemasonry from the earliest times. The possession of those secrets, simple as they were, distinguished the Freemasons from the Rough Layers in England, from the Cowans in Scotland, and from the *Müerer*, or Wall Builders, in Germany.

This degree, in its English form, was the only one known or practiced in London in the year 1717, at the era which has incorrectly been called the "Revival." The degree of Fellow-Craft, in the modern signification of the word degree, was incorporated into the system, probably a very few years after the organization of the Grand Lodge, and was fully recognized as a degree in the year 1719, or perhaps early in 1720.

Finally, the Third or Master's degree was added, so as to make the full complement of degrees as they now exist, between the years 1720 and 1723—certainly not before the former nor after the latter period.

Of this theory we have, I think, documentary evidence of so authentic a character, that we must be irresistibly led to the conclusion that the theory is correct.

Bro. Lyon, in his *History of the Lodge of Edinburgh*, cites a record which has a distinct relevancy to the question of the time when the Second degree originated. It is contained in the minutes of the Lodge of Dunblane, under the date of December 27, 1720, which is about sixteen years prior to the establishment of the Grand Lodge of Scotland.

The minute records that a lawyer, and therefore a Theoretic Mason, who had formerly been entered, had, after a due examination, been "duely passed from the Squair to the Compass and from an Entered Prentiss to a Fellow of Craft." In commenting on this minute, Bro. Lyon says:

"It would appear from this that what under the modern ritual of the Fraternity is a symbol peculiar to the Second Degree, was, under the system which obtained in Scotland prior to the introduc-

tion of the Third Degree, the distinctive emblem of the Entered Apprentice step—and what is now a leading symbol in the degree of Master Mason, was then indicative of the Fellow-Craft, or highest grade of Lodge membership."¹

This authentic record surely corroborates the theory just advanced that the Fellow-Craft's degree was formulated in London after the year 1717 and before the close of the year 1720. Here, I think, we are warranted in pursuing the following method of deduction.

If the first notice of the degree of Fellow-Craft being conferred in Scotland, as a degree, occurs in the record of a lodge in the last days of the year 1720; and if, as we know from other sources, that Scotland derived the expanded system of degrees from the sister kingdom; then it is reasonable to suppose that the degree must have been given in Scotland at as early a period after its fabrication in England as was compatible with a due allowance of time for its transmission from the lodges of the latter kingdom to those of the former, and for the necessary preparation for its legal adoption.

The degree must, of course, have been practiced in London for some time before it would be transmitted to other places, and hence we may accept the hypothesis, as something more than a mere presumption, that the Second degree had been invented by Desaguliers and his collaborators on the ritual of the new Grand Lodge in the course of the year 1719, certainly not later than the beginning of the year 1720.

Between the 24th of June, 1717, when the Grand Lodge was established, and the end of the year 1718, the period of less than eighteen months which had elapsed was too brief to permit the overthrow of a long-existing system, endeared to the Craft by its comparative antiquity. Time and opportunity were required for the removal of opposition, the conciliation of prejudices, and the preparation of rituals, all of which would bring us to the year 1719 as the conjectural date of the fabrication of the Second degree.

It is highly probable that the degree was not thoroughly formulated and legally introduced into the ritual until after the 24th of June, 1719, when Desaguliers, who was then Grand Master, and the Proto-Grand Master, Sayer, who was then one of the Grand War-

¹No reference is here made to the subsequent disseverment of the Third degree which resulted in the composition of the Royal arch degree, as that subject will be hereafter fully discussed.

dens, had, from their official positions, sufficient influence to cause the acceptance of the new degree by the Grand Lodge.

We can gather very little, except inferentially, from the meager records of Anderson, and yet he shows us that there was certainly an impetus given to the Order in 1719, which might very well have been derived from the invention of a new and more attractive ritual.

Anderson says, referring to the year 1719, that "now several old brothers, that had neglected the Craft, visited the lodges; some noblemen were also made brothers, and more new lodges were constituted."

The record of the preceding year tells us that the Grand Master Payne had desired the brethren to bring to the Grand Lodge any old writings concerning Masonry "in order to shew the usages of ancient times."

Northouck, a later but not a discreditable authority, expanding the language of his predecessor, says that "the wish expressed at the Grand Lodge for collecting old manuscripts, appears to have been preparatory to the compiling and publishing a body of Masonical Constitutions."

I can see in this act the suggestion of the idea then beginning to be entertained by the Speculative leaders of the new society to give it a more elevated character by the adoption of new laws and a new form of ceremonies. To guide them in this novel attempt, they desired to obtain all accessible information as to old usages.

And now, some of the older Operative Craftsmen, becoming alarmed at what they believed was an effort to make public the secrets which had been so scrupulously preserved from the eyes of the profane by their predecessors, and who were unwilling to aid in the contemplated attempt to change the old ritual, an attempt which had been successful in the fabrication of a Second degree, and the modification of the First, resolved to throw obstructions in the way of any further innovations.

This will account for the fact recorded by Anderson that, between June, 1719, and June, 1720,¹ several valuable manuscripts concerning the ancient "regulations, charges, secrets, and usages"

¹Dr. Anderson, in his chronological records, counts the years from the installation of one Grand Master in June to that of the next in June of the following year.

were "burnt by some scrupulous brothers, that those papers might not fall into strange hands."

The records do not say so, in as many words, but we may safely infer from their tenor that the conflict had begun between the old Operative Freemasons who desired to see no change from the ancient ways, and the more liberal-minded Theoretic members, who were anxious to develop the system and to have a more intellectual ritual—a conflict which terminated in 1723 with the triumph of the Theoretics and the defeat of the Operatives, who retired from the field and left the institution of Speculative Freemasonry to assume the form which it has ever since retained, as "a science of morality veiled in allegory and illustrated by symbols," a definition which would be wholly inapplicable to the old Operative system.

In the minute of the Dunblane Lodge which has been cited through Bro. Lyon, it was said that the candidate in being advanced from an Entered Apprentice to a Fellow-Craft had "passed from the Square to the Compass."

It is curious and significant that this expression was adopted on the Continent at a very early period of the 18th century, when the *hautes grades* or high degrees began to be manufactured. With the inventors of these new degrees the Square was the symbol of Craft Masonry, while the Compass was the appropriate emblem of what they called their more elevated system of instruction. Hence, instead of the Square which is worn by the Master of an Ancient Craft Lodge, the Master of a Lodge of Perfection substitutes the Compasses as the appropriate badge of his office.

But in Ancient Craft Masonry, with whose history alone we are now dealing, the Compass is at this day a symbol peculiar to the Third degree, while it would seem from the above-cited minute that in the beginning of the 18th century it was appropriate to the Fellow-Crafts.

In commenting on this phrase in the record of the Lodge of Dunblane, Bro. Lyon makes the following remarks:

"To some it will appear to favor the theory which attributes the existence of the Third degree to a disjunction and a rearrangement of the parts of which the Second was originally composed."

I have no objection to accept this theory in part. I believe, and the hypothesis is a very tenable one, that when the Second degree was fabricated, the secrets, the ritual, and instructions which were

formerly comprised in the single degree which was then given to the whole Craft, indiscriminately, to Apprentices, to Fellows, and to Masters alike, were divided between the two degrees which were then formulated, with certain new additions; and that subsequently, when the Third degree was invented, there was a further disintegration, and a portion of that which had constituted the "part of a Fellow-Craft" was, with many new points, transferred to that of the Master.

I have thus, by what I believe to be a tenable hypothesis, sought to fix the time of the first expansion of the old ritual of the Operatives, which was for a short time made use of, in all its simplicity, by the Speculative Grand Lodge.

The next step in this expansion was the fabrication of the Third or Master Mason's degree. To the time when this important event took place and to the circumstances attending it we are now to direct our attention. This shall therefore be the subject to be treated in the following chapter.

CHAPTER XXXV

NON-EXISTENCE OF A MASTER MASON'S DEGREE AMONG THE OPERATIVE FREEMASONS

THE history of the origin of the Third or Master's degree—that is, so much of it as refers to the precise time of its invention—has, at this day, been involved in much doubt, and been the source of earnest controversy in consequence of the searching investigations of recent scholars, whose incisive criticism has shown many theories to be untenable which were once held to be plausible.

Until within a few years the opinion was universally entertained that the Third degree must have been in existence from the time of the invention of the Masonic system, and at whatever period that event was placed, the doctrine was held as indisputable that the First, the Second, and the Third degrees must have had a contemporaneous origin, no one preceding the other in point of time, but all springing at the same epoch into form and practice.

The theory that Freemasonry originated at the Temple of Solomon was for a very long time a universally accepted proposition, constituting, in fact, the orthodox creed of a Freemason, and conscientiously adopted, not merely by the common and unlearned masses of the Fraternity, but even by Masonic scholars of distinguished reputation.

Consequent upon this theory was another, that at the same time the Master's degree was invented and that the builders of the Temple were divided into the same three classes distinguished as degrees, which constitute the present system of Freemasonry.

This theory was derived from the esoteric narrative contained in the modern ritual of the Third degree. If this narrative is accepted as an authentic history of events which actually occurred at that time, then there need be no more difficulty in tracing the invention of the Third degree to the time of King Solomon than

there can be in placing the origin of Freemasonry at the same remote period.

But unfortunately for the repose of those who would be willing to solve a difficult problem by the Alexandrian method of cutting the Gordian knot, rather than by the slower process of analytical investigation, the theory of the Temple origin of the Master's degree has now been repudiated by nearly all Masonic scholars. A few may be accepted who, like Bro. Woodford, still express a doubtful recognition of the possibility that the legend may be true.¹

Thus Bro. Woodford, referring to the Temple legend, says: "As there is no *à priori* reason why an old Masonic tradition should not be true in the main, we see no reason to reject the world-wide story of King Solomon's protection of a Masonic association. Indeed, modern discovery seems to strengthen the reality of our Masonic legends, and we should always, as it appears to us, distinguish between what is possible and probable and what is actually provable or proved by indubitable evidence." In reply to this it must be remembered that of all the arguments in favor of an event, the possibility of its occurrence is the weakest that can be adduced. In dialectics there is an almost illimitable gulf between possibility and actuality. A hundred things may be possible or even probable, and yet not one of them may be actual. With the highest respect for the scholarship of our reverend Brother, I am compelled to dissent from the views he has here expressed. Nor am I prepared to accept the statement that "modern discovery seems to strengthen the reality of our Masonic legends." A contrary opinion now generally prevails, though it must be admitted that the modern interpretations of these legends have given them a value, as the expression of symbolic ideas, which does not pertain to them when accepted, as they formerly were, as truthful narratives.

The Temple legend, however, must be retained as a part of the ritual as long as the present system of Speculative Freemasonry exists, and the legendary and allegorical narrative must be repeated by the Master of the lodge on the occasion of every initiation into the mysteries of the Third degree, because, though it is no longer to be accepted as an historical statement, yet the events which it records are still recognized as a myth containing within itself, and

¹ Kenning's "Masonic Cyclopædia," art. Temple of Solomon, p. 612.

independent of all question of probability, a symbolical significance of the highest importance.

This mythical legend of the Temple, and of the Temple Builder, must ever remain an inseparable part of the Masonic ritual, and the narrative must be repeated on all appropriate occasions, because, without this legend, Speculative Masonry would lose its identity and would abandon the very object of its original institution. On this legend, whether true or false, whether a history or a myth, is the most vital portion of the symbolism of Freemasonry founded.

In the interpretation of a legendary symbol or an allegory it is a matter of no consequence to the value of the interpretation whether the legend be true or false; the interpretation alone is of importance. We need not, for instance, inquire whether the story of Hiram Abif is a narrative which is true in all its parts, or merely a historical myth in which truth and fiction are variously blended, or, in fact, only the pious invention of some legend-maker, to whose fertile imagination it has been indebted for all its details.

It is sufficient when we are occupied in an investigation of subjects connected with the science of symbolism, that the symbol which the legend is intended to develop should be one that teaches some dogma whose truth we can not doubt. The symbologist looks to the truth or fitness of the symbol, not to that of the legend on which it is founded. Thus it is that we should study the different myths and traditions which are embodied in the ritual of Freemasonry.

But when we abandon the rôle of the symbologist or ritualist, and assume that of the historian—when, for the time, we no longer interest ourselves in the lessons of Masonic symbolism, but apply our attention to the origin and the progress of the institution, then it really becomes of importance that we should inquire whether the narrative of certain supposed events which have hitherto been accepted as truthful, are really historical or merely mythical or legendary.

And, therefore, when the question is asked in an historical sense, at what time the Third degree was invented, and in the expectation that the reply will be based on authentic historical authority, we at once repudiate the whole story of its existence at the Temple of Solomon as a mere myth, having, it is true, its value as a symbol,

but being entitled to no consideration whatever as an historical narrative.

It is, however, most unfortunate for the study of Masonic history that so many writers on this subject, forgetting that all history must have its basis in truth, have sought rather to charm their readers by romantic episodes than to instruct them by a sober detail of facts. One instance of this kind may be cited as an example from the visionary speculations of Ragon, a French writer of great learning, but of still greater imagination.

In his *Orthodoxie Maçonnique* he has attributed the invention of all the degrees to Elias Ashmole, near the end of the 17th century. He says that the degree of Master Mason was formulated soon after the year 1648, but that the decapitation of King Charles I., and the part taken by Ashmole in favor of the House of Stuart, led to great modifications in the ritual of the degree, and that the same epoch saw the birth of the degrees of Secret Master, Perfect Master, Elect, and Irish Master, of all of which Charles the First was the hero, under the name of Hiram.¹

Assertions like this are hardly worth the paper and ink that would be consumed in refuting them. Unlike the so-called historical novel which has its basis in a distortion of history, they resemble rather the Arabian Tales or the Travels of Gulliver, which owe their existence solely to the imaginative genius of their authors.

Still there are some writers of more temperate judgment who, while they reject the Temple theory, still claim for the Third degree an antiquity of no certain date, but much anterior to the time of the organization of the Grand Lodge in the beginning of the 18th century.

Thus, Bro. Hyde Clark, in an article in the London *Freemasons' Magazine*, says that "the ritual of the Third degree is peculiar and suggestive of its containing matter from the old body of Masonry," whence he concludes that it is older than the time of the so-called Revival in 1717, and he advances a theory that the First degree was in that olden time conferred on minors, while the Second and Third were restricted to adults.²

This view of the origin of the degrees can only be received as a

¹ "Orthodoxie Maçonnique," par J. M. Ragon, Paris, 1853, p. 29.

² "Old Freemasonry before Grand Lodges," by Hyde Clark, in the London *Freemasons' Magazine*, No. 534.

bare assumption, for there is not a particle of authentic evidence to show that it has an historical foundation. No old document has been yet discovered which gives support to the hypothesis that there were ceremonies or esoteric instructions before the year 1719 which were conferred upon a peculiar class. All the testimony of the Old Records and manuscript Constitutions is to the effect that there was but one reception for the Craftsmen, to which all, from the youngest to the oldest Mason, were admitted.

It is true that one of the Old Records, known as the Sloane MS. 3329, mentions different modes of recognition, one of which was peculiar to Masters, and is called in the manuscript "their Master's gripe," and another is called "their gripe for fellow-crafts."

Of the many Masonic manuscripts which, within the last few years have been discovered and published, this is perhaps one of the most important and interesting. Findel first inserted a small portion of it in his *History of Freemasonry*, but the whole of it in an un-mutilated form was subsequently published by Bro. Woodford in 1872, and also by Hughan in the same year in the *Voice of Masonry*. It was discovered among the papers of Sir Hans Sloane which were deposited in the British Museum, and there is numbered 3329. Bro. Hughan supposes that the date of this manuscript is between 1640 and 1700; Messrs. Bond and Sims, of the British Museum, think that the date is "probably of the beginning of the 18th century." Findel thinks that it was originally in the possession of Dr. Plot, and that it was one of the sources whence he derived his views on-Freemasonry. He places its date at about the end of the 17th century. Bro. Woodford cites the authority of Mr. Wallbran for fixing its date in the early part of that century, in which opinion he coincides. The paper-mark of the manuscript in the British Museum appears to have been a copy of an older one, for Bro. Woodford states that though the paper-mark is of the early part of the 18th century, experts will not deny that the language is that of the 17th. He believes, and very reasonably, that it represents the ceremonial through which Ashmole passed in 1646.

As this is the only Old Record in which a single passage is to be found which, by the most liberal exegesis, can be construed even into an allusion to the existence of a Third degree with a separate ritual before the end of the second decade of the 18th century, it

may be well to quote such passages of the manuscript as appear to have any bearing on the question.

The methods of recognition for Fellow-Crafts and Masters is thus described in the Sloane MS.:

"Their gripe for fellow craftes is grasping their right hands in each other, thrusting their thumb naile upon the third joynt of each others first Fing'r; their masters gripe is grasping their right hands in each other; placing their four fingers nailes hard upon the carpus or end of others wrists, and their thumb nailes thrust hard directly between the second joynt of the thumb and the third joynt of the first Finger; but some say the mast'rs grip is the same I last described, only each of their middle Fing'rs must reach an inch or three barley corns length higher to touch upon a vein y't comes from the heart."

No indication is to be found in this passage of the existence at the time of three degrees and three separate rituals. All that it tells us is that the Fellow-Crafts were provided with one form of salutation and the Masters with another, and we are left in uncertainty whether these forms used by one class were unknown to the other, or whether the forms were openly used only to distinguish one class from the other, as the number of stripes on the arm distinguish the grades of non-commissioned officers in the army.

That the latter was the use would appear evident from the fact that the close of the passage leaves it uncertain that the "gripes" were not identical, or at least with a very minute difference. "Some say," adds the writer, "the Master's grip is the same" as the Fellow-Craft's — "only" — and then he gives the hardly appreciable variation.

Here is another passage which appears to show that no value was attached to the use of the grip as marking a degree, though it might be employed to distinguish a rank or class.

"Another salutation," says the manuscript, "is giving the Mast'rs or fellows grip, saying the right worshipful the mast'rs and fellows in that right worshipful lodge from whence we last came, greet you, greet you, greet you well, then he will reply, God's good greeting to you, dear brother."

Here I take it that all that is meant is that the Masters saluted with the grip peculiar to their class, and the Fellows that peculiar to theirs. But what has become of the Apprentices? Did they salute with the grip of the Fellows or that of the Masters? If so, they

must have been acquainted with one or both, and then the secret instruction incidental to the condition of degrees and a distinct ritual must be abandoned, or the Apprentices were not admitted to the privileges of the Craft, and were debarred from a recognition as members of a lodge.

Let the following questions and answers decide that point. They are contained in the manuscript, and there called "a private discourse by way of question and answer."

"Q. Where were you made a mason?

"A. In a just and perfect or just and lawful lodge.

"Q. What is a perfect or just and lawful lodge?

"A. A just and perfect lodge is two Interprintices two fellow crafts, and two Mast'rs, more or fewer, the more the merrier, the fewer the better cheer, but if need require five will serve, that is, two Interprintices, two fellow craftes, and one Mast'r on the highest hill or the lowest valley of the world without the crow of a cock or the bark of a dog."

This was no lodge of Master Masons, nor of Fellow-Crafts, nor of Entered Apprentices, as they have been distinguished since the establishment of degrees. It was simply a lodge of Freemasons to legalize and perfect whose character it was necessary that representatives of all the classes should be present. The Apprentices forming a part of the lodge must have been privy to all its secrets; and this idea is sustained by all the Old Constitutions and "Charges" in which the Apprentices are enjoined to keep the secrets of the lodge.

The manuscript speaks of two words, "the Mast'r Word" and "the Mason word." The latter is said to have been given in a certain form, which is described. It is possible that the former may have been communicated to Masters as a privilege attached to their rank, while the latter was communicated to the whole Craft. In a later ritual it has been seen that there were two words, "the Jerusalem Word" and "the universal word," but both were known to the whole Fraternity. The Sloane MS. does not positively state that the two words used in its ritual were like these two, or that the Master's was confined to one class. It is, however, likely that this Word was a privileged mark of distinction to be used only by the Masters, though possibly known to the rest of the Fraternity. How else could it be given in the lodge where the three classes were present? Bro. Lyon has arrived at the same conclusion. He says: "It is our opin-

ion that in primitive times there were no secrets communicated by Lodges to either fellows or craft or master's that were not known to apprentices, seeing that members of the latter grade were necessary to the legal constitution of communications for the admission of masters or fellows."¹ The argument, indeed, appears to be unanswerable.

The Word might, however, as has been suggested, have been whispered by the Master communicating it to the one to whom it was communicated. If this were so, it supplies us with the origin of the modern Past Master's degree. But even then it could only be considered as a privileged mark of a rank or class of the Craftsmen and not as the evidence of a degree.

I will merely suggest, but I will not press the argument, that it is not impossible that by a clerical mistake, or through some confusion in the mind of the writer, "Mast'r Word" may have been written for "Mason Word," an expression which has been made familiar to us in the minutes of the Scottish lodges, and which is the only word the secrecy of which is required by the oath that is contained in the manuscript. On the other hand, "Master Word" is a phrase not met with in any other manuscript, Scotch or English.

The "Oath," which forms a part of the Sloane MS., supplies itself the strongest proof that, during the period in which it formed a part of the ritual, that ritual must have been one common to the three classes; in other words, there could have been but one degree, because there was but one obligation of secrecy imposed, and the secrets, whatever they were, must have been known to all Freemasons, to the Apprentices as well as to the Master. The "Oath" is in the following words:

"The Mason Word and everything therein contained you shall keep secret, you shall never put it in writing directly or indirectly; you shall keep all that we or your attenders shall bid you keep secret from man, woman or child, stock or stone, and never reveal it but to a brother or in a Lodge of Freemasons, and truly observe the charges in the Constitution; all this you promise and swear faithfully to keep and observe, without any manner of equivocation or mental reservation, directly or indirectly; so help you God and the contents of this Book."

¹ "History of the Lodge of Edinburgh," p. 23.

The "Mason Word," with the secrets connected with it, formed a very prominent part of the ritual of the Scotch Freemasons, though there is no reference to it in any of the English manuscripts except in the Sloane.

In fact, so important was this word considered as to be sometimes figuratively employed to designate the whole body of the Fraternity. Thus, in a record of the Musselburgh Lodge, in December, 1700, where complaint is made of the great disorders into which the lodge had fallen, it is said, among other evils, that the practice of Fellow Crafts encouraging Apprentices to take work as journeymen, "at last, by degrees, will bring all law and order and consequently the Mason Word to contempt"¹—where, evidently by a figure of speech, it is meant that the Fraternity or Craft of Masonry will be brought to contempt.

In the Lodge of Edinburgh, which was the principal Lodge of Scotland, and whose records have been best preserved, the Masons or employers were, up to the beginning of the 18th century, the dominant power, and seldom called the Fellows or Craftsmen of an inferior class, who were only journeymen, into their counsel.

The controversy between the Masters and journeymen, which led, in 1712, to the establishment of a new lodge, are faithfully described by Bro. Lyon from the original records.² It is sufficient here to say that one of the principal grievances complained of by the latter was in respect to the giving of the Mason Word, with the secrets connected with it and the fees arising from it. The Masters claimed the right to confer it and to dispose of the fee, so to speak, of initiation.

Finally, the controversy was partially ended by arbitration. The "Decreet-Arbitral," as is the Scottish legal phrase, or award of the arbitrators made on January 17, 1715, has been recorded, and has been published by Bro. Lyon. The only point of importance to the present subject is that the arbitrators decreed that the journeymen Masons, that is, the Fellow-Crafts, should be allowed "to meet together by themselves, as a Society for giving the Mason Word and to receive dues therefor."

From this fact it is clearly evident that the knowledge of the

¹ "History of the Lodge of Edinburgh," p. 175.

² *Ibid.*, p. 140.

"Mason Word" and the secrets pertaining to it formed no part of a degree exclusively confined to the Masters, but that all esoteric knowledge in connection with this subject was also the property of the Fellow-Crafts, and of the Apprentices, too, because it has been shown that they were required to be present at all lodge meetings.

The expression, "Mason Word," which is common in the Scottish lodge records, has been, so far, found only in one English manuscript, the Sloane 3329. But as the theory is now generally accepted as having been proved, that the Scottish Freemasons derived their secrets from their English brethren, there can hardly be a doubt that the regulations relative to this Word must have been nearly the same in both countries.

That this was the case after the organization of the Grand Lodge of England, there can be no doubt. It is proved by the visit of Dr. Desaguliers to Edinburgh in 1721, and long before. Bro. Lyon was aware of that visit. He had, from other considerations, expressed the opinion "that the system of Masonic degrees which for nearly a century and a half has been known in Scotland as Freemasonry, was an importation from England."¹

What this "Mason Word" was, either in England or Scotland, we have, at this day, no means of knowing. But we do know from the records of the 17th century, which have been preserved, that it was the most important, and in Scotland perhaps the only, secret that was communicated to the Craft.

"The Word," says Bro. Lyon, "is the only secret that is even alluded to in the minutes of Mary's Chapel, or in those of Kilwinning, Acheson's Haven, or Dunblane, or any other that we have examined of a date prior to the erection of the Grand Lodge."²

We know also that in England, in Scotland, and in Germany, the giving of the Word was accompanied by a grip and by the communication of other secrets.

But we know also, positively, that this Word and these secrets were bestowed upon Fellows as well as Masters, and also, as we have every reason to infer, upon Apprentices.

Besides the proofs that we derive from old Masonic records, we have a right to draw our inferences from the prevalence of similar customs among other crafts.

¹ "History of the Lodge of Edinburgh," p. 153.

² *Ibid.*, p. 22,

Thus, the carpenters, wrights, joiners, slaters, and other crafts who were connected in the art of building with the Masons, were called in Scotland "Squaremen," and they had a secret word which was called the "Squaremen Word." This word, with a grip and sign, was communicated to both journeymen and apprentices in a ceremony called the "brithering." A portion of this ceremony which was performed in a closely guarded apartment of a public-house was the investiture with a leather apron.¹

I can not doubt that the communication of the "Mason Word and the secrets pertaining to it" was accompanied by similar ceremonies in Scotland, and by a parity of reasoning also in England.

The final conclusion to which we must arrive from the proofs which have been adduced, is that as there was no such system as that of degrees known to the mediaeval Operative Freemasons, that no such system was practiced by the Speculative Freemasons who in 1717 instituted the Grand Lodge of England, until at least two years after its organization; that in 1719 the two degrees of Entered Apprentice and Fellow-Craft were invented; and that subsequently the present system of symbolic or ancient Craft degrees was perfected by the fabrication of a new degree, now recognized as the Third or Master Mason's degree.

At what precise time and under what circumstances this Third degree was invented and introduced into the Grand Lodge system of modern Freemasonry, is the next subject that must engage our attention.

¹ Lyon's "History of the Lodge of Edinburgh," p. 33.

CHAPTER XXXVI

THE INVENTION OF THE THIRD OR MASTER MASON'S DEGREE

WE have seen that up to the year 1719 the Masonic ritualistic system consisted of but one degree, which was common to the whole, and the secrets of which were communicated to the Apprentice at his initiation, or as it was, perhaps, more properly called, in reference to the paucity of ceremonies, his admission. At that time Desaguliers and his collaborators originated a Second degree, to be appropriated to the Fellow-Crafts. To do this it was necessary, or, at least, it was deemed expedient, to disintegrate the primitive degree and out of it to make two degrees, those of Entered Apprentice and Fellow-Craft.

For a short time—how long is to be hereafter seen—the Masonic system consisted of two degrees, and the summit of the system was the Fellow-Craft's degree.

From this time the Fellow-Crafts began to take a prominent place in the business of Masonry, and the Apprentice lost some of the importance he had obtained in early times as a component part of the Craft and an equal participant with Masters and Fellows in its secrets. He was permitted, it is true, to be present at the meetings of the lodge, and to take his share in its business (except, of course, where candidates were to be "passed"), and even to vote in the Grand Lodge on the question of an alteration of the "General Regulations," but the offices were to be held and the lodge represented in the Grand Lodge by Fellow-Crafts only. Of this there is abundant evidence in contemporary documents.

The first edition of Anderson's *Constitutions* contains "the Charges of a Free-mason, extracted from the Records of Lodges beyond Sea." The exact date when these "Charges" were compiled is not known. It must have been after 1718, for they distinctly refer to the Fellow-Craft's degree, and it must have been before

the beginning of 1723, for that is the year of their publication. It is, however, certain from their phraseology that when they were compiled for the use of the lodges, the Fellow-Craft's degree had been instituted, but the Master's degree was not yet known. For this reason I am inclined to place the date between 1718, in which year Anderson tells us that "several old copies of the Gothic Constitutions were produced and collated," and 1721, when he submitted his manuscript, including the "Charges" and "Regulations" to the Grand Lodge. There is no date prefixed to the "Charges," but I think it not improbable that they were constructed by Payne in 1720, at the same time that he compiled the "General Regulations." It is certain that they must have been in existence on December 27, 1721, when a committee was appointed by the Grand Lodge to examine them and the Constitutions. And this date sufficiently accounts for the fact that there are no allusions in them to the Master's degree.

These "Charges," therefore, give us a very good idea of the status of Apprentices and Fellow-Crafts in English Masonry at the time when the system consisted of two degrees, and the "part of Master" had not yet been composed.

In Charge IV. it is said that if the Apprentice has learned his art, he then may in due time be made a Fellow-Craft, and then if otherwise qualified may become a Warden and successively Master of his lodge, the Grand Warden, and at length the Grand Master.

Here we see that at that time the Fellow-Craft was at the summit of the Fraternity so far as degrees and qualifications for promotions in rank were concerned. Nothing is said of the degree of Master; it was still simply as in primitive times—a gradation of rank.

In the same Charge we are told that "no Brother can be a Warden until he has passed the part of a Fellow-Craft, nor a Master¹ until he has acted as a Warden; nor Grand Warden until he has been Master of a lodge; nor Grand Master unless he has been a Fellow-Craft before his election."

It is very evident that at this time there could be no degree higher than that of the Fellow-Craft. If there had been, that higher degree would have been made the necessary qualification

¹ That is, Master of a Lodge, as the context shows.

WILLIAM PRESTON

for these high offices. We are not without the proof of how these "Charges" would have been made to read had the degree of Master Mason been in existence at the time of their compilation.

Notwithstanding that Speculative Freemasonry owes much to Dr. Anderson, we are forced to reluctantly admit that, as an historian, he was inexact and inaccurate, and that while he often substituted the inventions of tradition for the facts of history, he also often modified the phraseology of old documents to suit his own views.

In 1738 he published a second edition of the *Book of Constitutions*, a work which, although at first perhaps carelessly approved, was subsequently condemned by the Grand Lodge. In this work he inserted a copy of these "Charges." But now the Master's degree had been long recognized and practiced by the lodges as the summit of the ritual.

Now let us see how these "Charges" were modified by Dr. Anderson in this second edition, so as to meet the altered condition of the Masonic system. The Apprentice is no longer admonished, as he was in the first edition, that his ambition should be to become a Fellow-Craft and in time a Warden, a Master of a Lodge, a Grand Warden, and even a Grand Master. But in the copy of 1738 he is told that "when of age and expert he may become an Entered Prentice, or a Free-Mason of the lowest degree, and upon his due improvement a Fellow-Craft and a Master Mason."

Again, in the "Charges" of 1720,¹ it is said that "no brother can be a Warden until he has passed the part of a Fellow-Craft."

In the "Charges" of 1738, it is said that "the Wardens are chosen from among the Master Masons."

In Charge V. of 1720 it is directed that "the most expert of the Fellow-Crafts shall be chosen or appointed the Master or Overseer of the Lord's Work."

In the same Charge, published in 1738, it is prescribed that "a Master Mason only must be the Surveyor or Master of Work."

Now, what else can be inferred from this collation of the two editions (which, if deemed necessary, could have been much further extended), except that in 1720 the Fellow-Craft was the highest de-

¹I assume this date for convenience of reference, and because, as I have already shown, it is probably correct.

gree, and that after that year and long before 1738 the Master's degree had been invented.

But let us try to get a little nearer to the exact date of the introduction of the Third degree into the Masonic system.

The *Constitutions of the Free-Masons*, commonly called the *Book of Constitutions*, was ordered by the Grand Lodge, on March 25, 1722, to be printed,¹ and was actually printed in that year, for it was presented by Dr. Anderson to the Grand Lodge "in print" on January 17, 1723. So that although the work bears on its title-page the imprint of 1723, it must really be considered as having been controlled in its composition by the opinions and the condition of things that existed in the year 1722.

Now, in the body of this book there is no reference to the degree of Master Mason. It is true that on page 33 the author speaks of "such as were admitted Master Masons or Masters of the Work," by which expression he evidently meant not those who had received a higher degree, but those who in the "Charges" contained in the same book were said to be "chosen or appointed the Master or Overseer of the Lord's Work," and who the same Charge declares should be "the most expert of the Fellow-Craftsmen."

On the contrary, when speaking of the laws, forms, and usages practiced in the early lodges by the Saxon and Scottish kings, he says: "Neither what was conveyed nor the manner how, can be communicated by writing; as no man can indeed understand it without the key of a Fellow-Craft."²

So that in 1722, when this note was written, there was no higher degree than that of Fellow-Craft, because the Fellow-Crafts were, as being at the summit of the ritual, in possession of the key to all the oral and esoteric instructions of the Craft.

Guided by the spirit of the "General Regulations," printed in the first edition of Anderson's *Constitutions*, I am induced to place the invention of the Third degree in the year 1722, although, as will be hereafter seen, it did not get into general use until a later period. The investigations which have led me to this conviction were pursued in the following train, and I trust that the reader, if he will follow

¹ Its preparation by Dr. Anderson had been previously directed on September 29, 1721. This and the date of its publication in January, 1723, lead us irresistibly to the conclusion that the work was written in 1722.

² Anderson's "Constitutions," 2nd edition, p. 29, note.

the same train of investigation with me, will arrive at the same conclusion. In pursuing this train of argument, it will be unavoidably necessary to repeat some of what has been said before. But the subject is so important that a needful repetition will be surely excused for the sake of explicitness in the reasoning.

The "General Regulations" were published in the first edition of the *Book of Constitutions*, edited by Anderson. This edition bears the imprint of 1723, but Anderson himself tells us that the work was "in print" and produced before the Grand Lodge on the 17th of January in that year. Hence, it is evident that although the work was published in 1723, it was actually printed in 1722. Whatever, therefore, is contained in the body of that work must refer to the condition of things in that year, unless Anderson may (as I shall endeavor to show he has done) have made some slight alteration or interpolation, toward the end of 1722 or the very beginning of 1723, while the book was passing through the press.

I have shown by the "Old Charges," whose assumed date is 1720, that at that time the degree of Fellow-Craft was the highest recognized or known in Speculative Freemasonry, and I shall now attempt to prove from the "General Regulations" that the same condition existed in 1722, the year in which those "Regulations" were printed.

The "General Regulations" consist of thirty-nine articles, and throughout the whole composition, except in one instance, which I believe to be an interpolation, there is not one word said of Master Masons, but the only words used are Brethren and Fellow-Crafts—Brethren being a generic term which includes both Fellows and Apprentices.

Thus it is said (art. vi.), that "no man can be entered a Brother in any particular Lodge or admitted to be a Member thereof without the unanimous consent of all the members."

That is, no man can be made an Entered Apprentice, nor having been made elsewhere, be affiliated in that particular lodge.

Again (art. vii.), "every new Brother, at his making, is decently to cloath the Lodge." That is, every Apprentice at his making, etc.

The word "Brother," although a generic term, has in these instances a specific signification which is determined by the context of the sentence.

The making of a Brother was the entering of an Apprentice, a

term we still use when speaking of the making of a Mason. The Fellow-Craft was admitted, or, as Ashmole says in his Diary, "admitted into the Fellowship of Freemasons."

Lyon,¹ referring to the nomenclature of the Scottish lodges "of the olden time," says, that the words "made" and "accepted" were frequently used as indicating the admission of Fellow-Crafts, but he adds that the former was sometimes, though rarely, used to denote the entry of Apprentices. He states, however, that toward the end of the 17th century these words gave way to the expression "passed," to indicate the reception of a Fellow-Craft, and that the Lodge of Mary's Chapel, at about that time, used the word "accepted" as equivalent to the making or passing of a Fellow-Craft. But the Schaw statutes of 1598, which are among the very oldest of the Scottish records extant, employs the word "entered" in reference to the making of an Apprentice, and received or "admitted" in reference to the making of a Fellow-Craft.

I think, however, that in the English lodges, or at least in the "General Regulations" of 1720, the words "making a Brother" meant, as it does in the present day, the initiation of an Entered Apprentice, and that Fellow-Crafts were "admitted." The word "passed" soon afterward came into use.

With this explanation of certain technical terms which appeared to be necessary in this place, let us proceed to examine from the document itself what was the status of Fellow-Crafts at the time of the compilation of the "General Regulations" by Grand Master Payne, in 1720, and their adoption in 1722 by the Grand Lodge. From this examination I contend that it will be found that at that period there was in Freemasonry only two degrees, those of Entered Apprentice and Fellow-Craft.

It will be admitted that in a secret society no one has such opportunities of undetected "eavesdropping" as the guardian of the portal, and hence, the modern ritual of Freemasonry requires that the Tiler shall be in possession of the highest degree worked by the body which he tiles.

Now the 13th General Regulation prescribes that a Brother "who must be a Fellow-Craft should be appointed to look after the door of the Grand Lodge."

¹ "History of the Lodge of Edinburgh," p. 76.

But it may be argued that the Grand Lodge always met and worked in the Entered Apprentices' degree, and that Apprentices as well as Fellow-Crafts were present at its communications.

I admit the fact, and acknowledge that from this point of view my argument would be untenable. But why was not the office of Tiler entrusted to an Entered Apprentice? Because, if there were three degrees at the time, it would have been manifestly improper to have bestowed this trustworthy and responsible office on one who was in possession of only the lowest. And if it was prudent and proper, as I suppose will be admitted, that it should have been bestowed on one of the highest degree, why was it not given to a Master Mason? Simply, I reply, because there were no Master Masons, as a degree class, from whom the selection could be made. As the laws of every lodge at the present day prescribe that the Tiler must be a Master Mason, because the Third degree is the highest one known to or practiced in the lodge, so the laws of the Grand Lodge in 1723, or the "General Regulations," required the Tiler to be a Fellow-Craft because the Second degree was the highest one known to or practiced in the Grand Lodge at that time. It would seem hardly to need an argument to prove that if the Third degree had been in practical existence when these "Regulations" were approved by the Grand Lodge, they would have directed that the guardian of the door should be in possession of that degree.

Another clause in this 13th Regulation is very significant. The Treasurer and Secretary of the Grand Lodge are permitted to have, each, a clerk, and it is directed that he "must be a Brother and Fellow-Craft." Again, and for a similar reason, the officer is selected from the highest degree. Had the Third degree been known at that time, these assistants would surely have been chosen from among the Master Masons; for if not, they would have had to be sometimes entrusted with the records of the transactions of a degree of which they had no right to possess a knowledge.

In the 14th Regulation it is prescribed that in the absence of the Grand Wardens the Grand Master may order private Wardens, that is, the Wardens of a subordinate lodge, to act as Grand Wardens *pro tempore*, and then, that the representation of that lodge in the Grand Lodge may be preserved, the lodge is to supply their place, not by two Master Masons, but "by two Fellow-Crafts of the

same lodge, called forth to act or sent thither by the particular Master thereof."

The fact that the second was the highest degree known in the early part of the year 1723 is confirmed by the formula inserted in the first edition of the *Book of Constitutions*, and which is there entitled "the Manner of Constituting a New Lodge, as practiced by his Grace the Duke of Wharton, the present Right Worshipful Grand Master, according to the ancient usages of Masons." It was, according to Anderson's record in the second edition, presented to the Grand Lodge and approved on January 17, 1723. It is therefore a fair testimony as to the condition of the degree question at that date.

In this formula it is said that "the new Master and Wardens being yet among the Fellow-Craft" the Grand Master shall ask his Deputy if he has examined them and finds the Candidate well skilled, etc. And this being answered in the affirmative, he is duly installed, after which the new Master, "calling forth two Fellow-Craft, presents them to the Grand Master for his approbation," after which they are installed as Wardens of the lodge.¹

This, I think, is conclusive evidence that the degree of Fellow-Craft was then the highest known or used. In January, 1723, it did not require a Mason to be more than a Fellow-Craft to prove himself, as Wharton's form of Constitution has it, "well skilled in the noble science and the Royal Art, and duly instructed in our mysteries, and competent to preside as Master over a lodge."

In the 25th of these "General Regulations" it is directed that a committee shall be formed at the time of the Grand Feast, to examine every person bringing a ticket, "to discourse him, if they think fit, in order to admit or debar him as they shall see cause." It was, in fact, an examining committee, to inquire into the qualifications of applicants for admission to the annual meeting of the Grand Lodge. The members of such a committee must necessarily have been in possession of the highest degree practiced by the Grand Lodge. It is very evident that a Fellow-Craft was not competent to examine into the qualifications and attainments of a Master Mason. Yet the Regulation prescribes that to compose

¹ Anderson's "Constitutions," edition of 1723, pp. 71, 72.

Such a committee "the Masters of lodges shall each appoint one experienced and discreet Fellow-Craft of his lodge."

But there is evidence in these "Regulations," not only that Fellow-Crafts were in 1723 appointed to the responsible offices of Tilers, Wardens, and Committees of Examination, but that they were competent to fill the next to the highest office in the Craft. The 17th Regulation says that "if the Deputy Grand Master be sick, or necessarily absent, the Grand Master may chuse any Fellow-Craft he pleases to be his Deputy *pro tempore*."

This, I think, is as conclusive proof as legitimate logical deduction can produce, that at the beginning of the year 1723, which was the date of the publication of these "Regulations" for the government of the Grand Lodge, the degree of Fellow-Craft was the highest practiced by the Grand Lodge, and that the degree of Master Mason was not then known or recognized in the system of Speculative Freemasonry. A Fellow-Craft presiding over Master Masons would indeed be a Masonic anomaly of which it would require something more than a blind reverence for the claims of antiquity to extort belief.

The citations that I have made seem to me to leave no doubt on the mind. The whole spirit and tenor of these "General Regulations," as well as the "Form of Constituting a new Lodge," which is so closely appended to them as to make, as it were, a part of them, go to prove that at the time they were approved by the Grand Lodge, which was on January 17, 1723, there were but two degrees recognized in Speculative Freemasonry, namely, those of Entered Apprentice and Fellow-Craft; and that at that time the degree of Master Mason constituted no part of the system.

That Anderson himself placed the same interpretation on these passages, and was perfectly aware of the deduction to be made from them, is evident from the fact that when he next published these "General Regulations," which was in the second edition of the *Book of Constitutions*, in 1738, at which time there is no doubt of the existence of the Master's degree, he almost invariably changed the words "Fellow-Craft" to "Master Mason."

And, accordingly, we find that in 1738 the Wardens, the Tiler, and the Assistant Treasurer and Secretary were required to be Master Masons. The change had taken place, and the Third degree had been adopted between the years 1723 and 1738.

But those who deny this theory and contend that the Third degree is of greater antiquity, and was known and practiced long before the beginning of the 18th century, would quote against my argument the words contained in the 13th Regulation, which words are as follows:

"Apprentices must be admitted Masters and Fellow-Craft only here (in the Grand Lodge) unless by a dispensation."

I candidly admit that if this passage be proved to be a genuine part of the original "General Regulations," compiled in 1720 by Grand Master Payne and approved in 1723 by the Grand Lodge, the question would be decided at once and we could no longer doubt that the Third degree was in existence not only in 1723, but three years before, that is, in 1720.

But I do not hesitate to assert that this passage is an interpolation by Anderson and Desaguliers, made for a certain purpose, and I think that this assertion is capable of critical proof.

In criticism there are two methods of determining whether a suspected passage in an ancient work or an old document is genuine or spurious.

The first method is by the collation of other editions or manuscripts. If, in the examination of an ancient manuscript, a certain passage is found which is not met with in any other manuscripts of an anterior or a contemporary date, it is deduced from this collation that the passage is an interpolation by the writer of that particular manuscript, because if it were genuine and a part of the original writing it would have been found in all the older manuscripts, from one of which it must have been copied.

It is by this method of reasoning that the most eminent Biblical critics have arrived at the conclusion that the celebrated passage in the First Epistle General of St. John (v. 7) is an interpolation. Since it is not found in any of the earlier Greek manuscripts of the Epistle, it must, they argue, have been subsequently inserted, perhaps from a marginal commentary, either carelessly or designedly, by some later copyist whose error has been followed by all succeeding scribes. This is criticism from external evidence.

But there are other instances in which it is not possible to collate the book or manuscript which contains the suspected passage with others of an earlier date. Where there is but one copy extant, there can, of course, be no comparison. In such cases it becomes

necessary to determine whether the passage be genuine or spurious by what the critics call the method by internal evidence.

If the suspected passage is found to contain the expression of opinions which, we are led to believe from the known character of the author, he could not have uttered; or, if the statements which it sets forth are plainly in conflict with other statements made in the same work; or if it be found in a part of the work where it does not harmonize with the preceding and following portions of the context; or, in short, if the whole spirit and tenor of the other writings of the same author are in unmistakable opposition to the spirit and tenor of the passage under review; and, above all, if a reasonable motive can be suggested which may have given occasion to the interpolation, then the critic, guided by all or most of these reasons, will not hesitate to declare that the suspected passage is spurious; that it formed no part of the original book or manuscript, and that it is an interpolation made subsequent to the original composition. This is criticism from internal evidence.

It is by this method that the critics have been led to the conclusion that a certain passage in the *Antiquities* of Flavius Josephus, in which he eulogizes Jesus, was not written, and could not have been written, by the Jewish historian. Not only does its insertion very awkwardly interrupt the continuity of the narrative in which the author was engaged at the time, but the sentiments of the passage are wholly irreconcilable with the character of Josephus. As a Pharisee, at least professedly, he was influenced by all the prejudices of his sect and his nation against the new sect of Christians and its founder. Such a man never could have vouched, as the writer of this passage does, for the Messiahship, the miraculous powers, and the resurrection of Jesus.

Hence it is now believed by nearly all scholars that the passage was interpolated as a "pious fraud" by some early Christian who was anxious to enlist in favor of his religion the authority of one of the most eminent of its adversaries.

It is now my purpose to apply these principles to an investigation of the only passage in the "General Regulations" which furnishes any evidence of the existence of the Third degree at the time when they were compiled.

As the copy of the "General Regulations" contained in Anderson's *Constitutions* of 1723 is the first edition; as the original

manuscript copy is lost; and as there were no previously printed copies, it is impossible, through comparison and collation, to prove from external evidence that the passage referring to the Third degree is spurious.

We must then have recourse to the second method of critical investigation, that is, by internal evidence.

And submitted to this test, the suspected passage fails, I think, to maintain a claim to genuineness.

Although the first edition of the *Constitutions* is now readily accessible in consequence of its numerous reprints, still, for the sake of convenience to the reader, in the discussion I shall copy the whole of the paragraph in which the suspected passage is contained, marking that passage by italics.

The passage will be found in the first paragraph of Article XIII. of the "General Regulations," and is in these words:

"At the said Quarterly Communications, all Matters that concern the Fraternity in general, or particular Lodges or single Brothers, are quietly, sedately, and maturely to be discours'd of and transacted: *Apprentices must be admitted Masters and Fellow-Craft only here unless by a Dispensation.* Here also all Differences that can not be made up and accommodated privately, nor by a particular Lodge, are to be seriously considered and decided; And if any Brother thinks himself aggrieved by the decision of this Board, he may appeal to the annual Grand Lodge next coming, and leave his Appeal in Writing, with the Grand Master or his Deputy, or the Grand Wardens."

Anyone not prepossessed with the theory of the antiquity of the Third degree who will look at this paragraph will, I think, be struck with the suspicious incongruity of the clause in italics in relation to the parts that precede and follow it. I will endeavor to demonstrate this point as follows:

The 13th Article of the "General Regulations" is divided into eight paragraphs. Each of these paragraphs is wholly independent and homogeneous in respect to its subject-matter. Each is devoted to the consideration of one subject only, to the exclusion of all others.

Thus the first paragraph relates to matters that concern lodges and private brethren, such as differences that can not be settled otherwise than by the Grand Lodge. The second paragraph relates to

the returns of lodges and the mode and manner of making them. The third relates to the charity fund and the most effectual method of collecting and disposing of money for that purpose. The fourth to the appointment of a Treasurer and a Secretary for the Grand Lodge, and to their duties. The fifth to the appointment of a clerk for each of those officers. The sixth to the mode of inspecting their books and accounts. The seventh to the appointment of a Tiler to look after the door of the Grand Lodge. And the eighth provides for the making of a new regulation for the government of these officers whenever it may be deemed expedient.

Thus it will be seen, from this synopsis, that each of these paragraphs embraces but one subject. Whatever is begun to be treated at the opening of a paragraph is continued without interruption and without the admission of any other matter to its close.

This methodical arrangement has, in fact, been preserved throughout the whole of the thirty-nine "Regulations." No Regulation will be found which embodies the consideration of two different and irrelevant subjects.

So uniformly is this rule observed that it may properly be called a peculiar characteristic of the style of the writer, and a deviation from it becomes, according to the axioms of criticism, at once suspicious.

Now this deviation occurs only in the first paragraph of the 13th Article, the one which has been printed above.

That paragraph, as originally written, related to the disputes and difference which might arise between particular lodges and between single brethren, and prescribed the mode in which they should be settled when they could not "be made up and accommodated privately." Leaving out the lines which I have printed in italics, we will find that the paragraph is divided into three clauses, each separated from the other by a colon.

The first clause directs that all matters that concern the Fraternity in general, particular lodges or single brethren, "are quietly, sedately, and maturely to be discoursed of and transacted" in the Grand Lodge. It is to questions that might arise between lodges and brethren—questions which in modern phraseology are called grievances—that the clause evidently refers. And in the Grand Lodge only are such questions to be discussed, because it is only there that they can be definitely settled.

The second clause continues the same subject, and extends it to those differences of brethren which can not be accommodated privately by the lodges of which they are members.

And the third clause provides that if the decision made by the Grand Lodge at its Quarterly Communication is not satisfactory to the parties interested, it may be carried up, by appeal, to the Grand Lodge in its Annual Communication.

Now, it is evident that this whole paragraph is intended to explain the duties of the Quarterly Communication as a Board of Inquiry in respect to matters in dispute between lodges and between the Craft, and the paragraph itself calls the decision of the Grand Lodge on these occasions the "Decision of this Board."

Viewed in this way, this first paragraph of the 13th Article is entirely congruous in all its parts, refers to but one subject, and is a perfect specimen of the style adopted by the compiler and pursued by him in all the other portions of the "Regulations" without a single exception—a style plain, simple, and methodical, yet as marked and isolated from other styles as is the Doric roughness of Carlyle or the diffusiveness of De Quincey from the manner of composition of other authors in a more elevated class of literature.

But if we insert the passage printed in italics between the first and second clauses, we will at once see the incongruity which is introduced by the interpolation.

Placed as it is between the first and second clauses, it breaks the continuity of the subject. A regulation which refers to the differences and disputes among the Craft, and the mode of settling them, is disjointed and interrupted by another one relating to an entirely different subject—namely, the initiation of Master Masons and Fellow-Crafts.

What has the subject of initiation to do with that of fraternal or lodge disputes? Why should a regulation relating to degrees be mixed up with another of a totally distinct and different character?

Judging, as we are not only authorized but compelled, as critical observers, to do, from the style of the compiler of the "Regulations" and the uniform custom pursued by him, we feel certain that if this passage formed a genuine part of the "Regulations," he would have placed it in an independent paragraph. That this has not been done affords a strong presumption that the passage is an interpolation, and that it formed no part of the "Regulations"

when compiled about the year 1720, most probably by Grand Master Payne, at the same time that he compiled the "Charges" printed in the same volume.

Still more suspicious is the fact that except in this passage there is not in the "General Regulations" the slightest allusion to Master Masons or to the Master's degree. As has already been shown, the whole spirit and tenor of the "Regulations" is to the effect that the highest grade in Freemasonry at that time, and the one from which all officers were to be selected, was that of Fellow-Craft. It is impossible to believe that if, at the time of the preparation of the "Regulations" and their approval by the Grand Lodge, the degree of Master Mason was in existence, it would have been passed over in such complete silence, and all important matters referred to a subordinate degree.

Hence I again deduce the conclusion that at the time of the compiling of these "Regulations" and their approval by the Grand Lodge, the Third degree was not in existence as a part of Speculative Masonry.

And then I assume as a logical deduction from these premises that the clause in the first paragraph of the 13th General Regulation is an interpolation inserted in those "Regulations" between the time of their being approved and the time of their final passage through the press.

It is barely possible that the suspected clause may have been inserted in the copy presented to the Grand Lodge on March 25, 1722, for examination and approval, and have escaped the attention of the reviewers from the fact that it was obscurely placed in the center of a paragraph relating to an entirely different subject. Or the Committee may have concurred with Desaguliers and Anderson in the policy of anticipating the control of the degree when it should be presented to the Craft, by an *ante factum* regulation.

Be that as it may, the passage formed neither then nor at any time thereafter a genuine part of the "General Regulations," although from its appearance in the printed copies it was as a mere matter of course accepted as a part of the law. It was, however, soon afterward repealed and a regulation was adopted on November 22, 1725, which remitted to the Master and Wardens, with a competent number of the lodge, the power of making Masters and Fellows at discretion.

The questions next arise, by whom, at what time, and for what purpose was this interpolation inserted?

By whom? I answer, by Anderson at the instigation of Desaguliers, under whose direction and with whose assistance the former had compiled the first edition of the *Book of Constitutions*.¹

At what time? This question is more difficult to answer than the preceding one. At the communication of the Grand Lodge, September 29, 1721, Anderson was ordered to prepare the *Book of Constitutions*. On December 27, 1721, the manuscript was presented to the Grand Lodge and referred to a committee. On March 25, 1722, the Committee reported and the work was ordered to be printed. On January 17, 1723, Anderson produced the new *Book of Constitutions*, which was again approved, "with the addition of the Ancient manner of constituting a lodge."

Now, between September, 1721, when the book was ordered to be prepared, and March, 1722, when the work was approved and ordered to be printed, the passage could not have existed as a regulation, because, in the first place, it was directly antagonistic to the body of the work, in which there is no mention of the Third degree;² but, on the contrary, it is distinctly stated that the Fellow-Crafts were in possession of all the secrets, and they alone could understand them.³ And, secondly, any such regulation would come in direct conflict with the "Manner of Constituting a Lodge" approved at the same time, and which, completely ignoring the Master's degree, directed the Master and Wardens to be selected from among the Fellow-Crafts of the lodge. The Master's degree could not have been known at that time as a part of the system of

¹ This edition is dedicated to the Duke of Montague, not by Anderson, but by Desaguliers, with an air of patronage to the author, as if it were a work accomplished by his direction.

² In describing the Temple of Solomon, Anderson, it is true, enumerates among the workmen "3,600 Princes or Master Masons, to conduct the work according to Solomon's directions." (Page 10.) But it is very clear that these were simply "Masters of the Work"—the "Magistri Operis" of the old Operative Freemasons—skilled Craftsmen appointed to superintend the bands or lodges of workmen engaged in the construction of the building.

³ In a note on a page of the "Book of Constitutions," Anderson says: "No man can indeed understand it (Masonry) without the key of a Fellow-Craft." Certainly, he at that time knew nothing of a higher degree. This passage was probably written in 1721, when he was directed by the Grand Lodge to compile a "Book of Constitutions." Much of the proposed work was then in manuscript.

Freemasonry, and no regulation in reference to it was therefore accessory.

Anderson has by implication admitted the soundness of this reasoning, because when he published the second edition of the *Constitution* in 1738, the Third degree being then a recognized part of the system, he changed the words "Fellow Crafts" wherever they occurred in the "Charges," as indicating the highest degree in the "Regulations," and in the "Manner of Constituting a Lodge," to the words "Master Mason."

I think, therefore, that the suspected clause was inserted in the 13th Regulation at the beginning of the year 1723, just before the work was issued from the press. There was neither time nor opportunity to make any other changes in the book and its appendices, and therefore this clause stands in reference to all the other parts of the Constitutions, Regulations, etc., in all the incongruity which I have endeavored to demonstrate.

For what purpose? The reply to this question will involve the determination of the time at which the Third degree was introduced into the ritual of Freemasonry. The theory which I present on this subject is as follows:

If the suspected clause which has been under consideration be admitted to be no genuine part of the *Book of Constitutions*, then it must follow that there is not the slightest evidence of the existence of the Third degree in the Ritual of Speculative Masonry up to the year 1723.

It is now very generally admitted that the arrangement of Freemasonry into the present system of three degrees was the work of Dr. Desaguliers, assisted by Anderson, Payne, and perhaps some other collaborators. The perfecting of this system was of very slow growth. At first there was but the one degree, which had been derived from the Operative Masons of preceding centuries. This was the degree practiced in 1717, when the so-called "Revival" took place. It was no doubt improved by Desaguliers, who was Grand Master in 1719, and who probably about that time began his ritualistic experiments. The fact that Payne, in 1718, "desired any brethren to bring to the Grand Lodge any old writings and records concerning Masons and Masonry in order to shew the usages of antient times,"¹ exhibits a disposition and preparation for improvement.

¹ "Book of Constitutions," 2d edition, 1738.

The First and Second degrees had been modeled out of the one primitive degree about the year 1719. The "Charges" compiled in 1720 by Grand Master Payne recognize the Fellow-Craft as the leading degree and the one from which the officers of lodges and of the Grand Lodge were to be selected. The same recognition is found in the "General Regulations," and in the *Constitutions* which were printed in 1723.

Up to this time we find no notice of the Third degree. The "particular lodges" conferred only the First degree. Admission or initiation into the Second degree was done in the Grand Lodge. This was perhaps owing to the fact that Desaguliers and the inventors of the new degree were unwilling to place it out of their immediate control, lest improper persons might be admitted or the ceremonies be imperfectly performed.

In 1722 I imagine that Desaguliers and his collaborators had directed their attention to a further and more complete organization.

The Operative Masons had always had three different ranks or classes of workmen, but not degrees in the modern Masonic sense of that word. These were the Masters, who undertook the work and superintended it; the Fellow-Crafts or Journeymen, who did the manual labor; and the Apprentices, who were engaged in acquiring a knowledge of their handicraft.

After the "Revival," in 1717 (I use the term under protest), Desaguliers had divided the one degree which had been common to the three classes into two, making the degrees of Entered Apprentice and Fellow-Craft. It is not to be supposed that this was a mere division of the esoteric instruction into two parts. All is here, of course, mere guess-work. The rituals were oral, and there is no memorial of them left except what we can learn from *The Grand Mystery* and the Sloane MS. 3329. But we may believe that taking the primitive degree of the Operatives as a foundation, there was built upon it an enlarged superstructure of ceremonies and lectures. The catechism of the degree was probably changed and improved, and the "Mason Word," as the Operatives had called it, with the secrets connected with it, was transferred to the Second degree, to be afterward again transferred to the Third degree.

After this, Desaguliers continued to exercise his inventive genius, and consummated the series of degrees by adding one to be appropriated to the highest class, or that of the Masters. But not having

thoroughly perfected the ritual of the degree until after the time of publication of the *Book of Constitutions*, it was not probably disseminated among the Craft until the year 1723.

The Second degree, as we have seen, had been invented in the year 1719. Its ritual had been completed, but the Masters of the lodges had not yet become so well acquainted with its forms and ceremonies as to be capable of managing an initiation.

The lodges, therefore, between 1719 and 1723, did not confer the Second degree. They were not restricted from so doing by any regulation, for there were no regulations on the subject enacted until the approval of the *Book of Constitutions* by the Grand Lodge in January, 1723. Besides, if there had been any law restricting the conferring of the Second degree to the Grand Lodge, Desaguliers would not have violated the law, which was of his own making, by conferring it in 1721 in a lodge in Edinburgh.

The fact undoubtedly is, that the lodges did not confer the Second degree in consequence of a usage derived from necessity. Dr. Desaguliers and his collaborators were the only persons in possession of the ritual, and therefore qualified to confer the degree, which they always did in the Grand Lodge, for two reasons: first, for their own convenience, and secondly, because they feared that if the ceremony of initiation was intrusted to the officers of the lodges who were inexperienced and unskillful, it might be mutilated or unsatisfactorily performed.

In the meantime Desaguliers had extended his labors as a ritual-maker, and had invented a supplementary or Third degree. But as is said of a cardinal whose appointment the Pope has made but has not yet announced to the college of Cardinals, the degree was still *in petto*. The knowledge of it was confined to Dr. Desaguliers and a few of his friends.

It is absolutely impossible that the degree could have been known generally to the members of the Grand Lodge. For with the knowledge that the establishment of such a degree was even in contemplation, they would not have approved a series of regulations which recognized throughout the Second or Fellow-Craft as the highest degree in Speculative Freemasonry, and the one from which Grand Masters were in future to be selected.

But a code of laws was about to be established for the government of the Craft—a code expressly appropriated to the new sys-

tern of Speculative Freemasonry, which by this time had completely dissevered itself from the Operative institution.

This code was to be published for the information of the Fraternity, so that every Freemason might know what was to be henceforth his duties and his rights. Law was now to become paramount to usage, and if there were no positive regulation which restricted the conferring of the Second degree to the Grand Lodge, it would, if permanently adopted as a part of the new system, fall into the hands of the Masters of the particular lodges.

This was an evil which, for the reason already assigned, was, if possible, to be avoided. It would also apply to the Third degree, which, though not yet in practical existence, was, soon after the adoption of the "General Regulations," to be presented to the Grand Lodge and put in working order.

Therefore, anticipating the dissemination of the Third degree, and being desirous to restrict it as well as the Second, by a positive law, to the Grand Lodge, he, with Anderson, interpolated, at the last moment, into the 13th of the "General Regulations" the words, "Apprentices must be admitted Masters and Fellow-Craft only here, unless by dispensation."

This is a serious charge to make against any writer of good reputation, and it would be an act of great temerity to do so, unless there were ample proof to sustain it. But I think the arguments I have advanced, though only based on legitimate inferences and the internal evidence afforded by the document itself, have shown that this passage could never have formed a part of the "Regulations" as originally compiled by Payne and afterward approved and adopted by the Grand Lodge.

But while we pay all due respect to the memory of Dr. Anderson, and hold in grateful remembrance his zeal and devotion in the foundation and advancement of Speculative Freemasonry, it is impossible to concede to him the possession of those virtues of accuracy and truthfulness which are essential to the character of an historian.

The motive of Desaguliers and Anderson for inserting the interpolated clause into the "General Regulations" was to prevent the two new degrees from falling into the hands of unskilled Masters of lodges, until by future experience they should become qualified to confer them.

OF A
FREE-MASON,

EXTRACTED FROM

The ancient RECORDS of LODGES
beyond Sea, and of those in *England, Scotland,*
and *Ireland*, for the Use of the *Lodges* in LONDON:

TO BE READ

At the making of NEW BRETHREN, or when the
MASTER shall order it.

The General heads, viz.

- I.  F GOD and RELIGION.
II. Of the CIVIL MAGISTRATE supreme and
subordinate.
III. Of LODGES.
IV. Of MASTERS, *Wardens, Fellows,* and *Ap-
prentices.*
V. Of the Management of the *Craft* in working.
VI. Of BEHAVIOUR, *viz.*

1. In the Lodge while *constituted.*
2. After the Lodge is over and the *Brethren* not gone.
3. When Brethren meet without *Strangers*, but not in a
Lodge.
4. In Presence of *Strangers not Masons.*
5. At *Home*, and in the *Neighbourhood.*
6. Towards a *strange Brother.*

G

L. Con-

I *Concerning* GOD *and* RELIGION.

A *Mason* is oblig'd, by his Tenure, to obey the moral Law ; and if he rightly understands the Art, he will never be a stupid Atheist, nor an irreligious Libertine. But though in ancient Times *Masons* were charg'd in every Country to be of the Religion of that Country or Nation, whatever it was, yet 'tis now thought more expedient only to oblige them to that Religion in which all Men agree, leaving their particular Opinions to themselves ; that is, to be *good Men and true*, or Men of Honour and Honesty, by whatever Denominations or Persuasions they may be distinguish'd ; whereby *Masonry* becomes the *Center of Union*, and the Means of conciliating true Friendship among Persons that must have remain'd at a perpetual Distance.

II. *Of the* CIVIL MAGISTRATE *supreme and*
subordinate.

A *Mason* is a peaceable Subject to the Civil Powers, wherever he resides or works, and is never to be concern'd in Plots and Conspiracies against the Peace and Welfare of the Nation, nor to behave himself undutifully to inferior Magistrates ; for as *Masonry* hath been always injured by War, Bloodshed, and Confusion, so ancient Kings and Princes have been much dispos'd to encourage the Craftsmen, because of their Peaceableness and *Loyalty*, whereby they practically answer'd the Cavils of their Adversaries, and promoted the Honour of the Fraternity, who ever flourish'd in Times of Peace. So that if a Brother should be a Rebel against the State, he is not to be countenanc'd in his Rebellion, however he may be pitied as an unhappy Man ; and, if convicted of no other Crime, though the loyal Brotherhood must and ought to disown his Rebellion, and give no Umbrage or Ground of political Jealousy to the Government for the time being ; they cannot expel him from the *Lodge*, and his Relation to it remains indefeasible.

III. Of LODGES.

A **LODGE** is a Place where *Masons* assemble and work: Hence that Assembly, or duly organiz'd Society of *Masons*, is call'd a **LODGE**, and every Brother ought to belong to one, and to be subject to its *By-Laws* and the **GENERAL REGULATIONS**. It is either *particular* or *general*, and will be best understood by attending it, and by the Regulations of the *General* or *Grand Lodge* hereunto annex'd. In ancient Times, no *Master* or *Fellow* could be absent from it, especially when warn'd to appear at it, without incurring a severe Censure, until it appear'd to the *Master* and *Wardens*, that pure Necessity hinder'd him.

The Persons admitted Members of a *Lodge* must be good and true Men, free-born, and of mature and discreet Age, no Bondmen, no Women, no immoral or scandalous Men, but of good Report.

IV. Of MASTERS, Wardens, Fellows, and Apprentices.

All Preferment among *Masons* is grounded upon real Worth and personal Merit only; that so the *Lords* may be well served, the Brethren not put to Shame, nor the *Royal Craft* despis'd: Therefore no *Master* or *Warden* is chosen by Seniority, but for his Merit. It is impossible to describe these things in writing, and every Brother must attend in his Place, and learn them in a way peculiar to *this Fraternity*: Only *Candidates* may know, that no *Master* should take an *Apprentice*, unless he has sufficient Employment for him, and unless he be a perfect Youth, having no Maim or Defect in his Body, that may render him incapable of learning the *Art*, of serving his *Master's* **LOVE**, and of being made a *Brother*, and then a *Fellow-Craft* in due time, even after he has served such a Term of Years as the Custom of the Country directs; and that he should be descended of honest Parents; that so, when otherwise qualify'd, he may arrive to the Honour of being the **WARDEN**, and then the *Master* of the *Lodge*, the *Grand Warden*, and at length the **GRAND-MASTER** of all the *Lodges*, according to his Merit.

No Brother can be a WARDEN until he has pass'd the part of a *Fellow-Craft*; nor a MASTER until he has acted as a *Warden*, nor GRAND-WARDEN until he has been *Master* of a *Lodge*, nor *Grand Master* unless he has been a *Fellow-Craft* before his Election, who is also to be nobly born, or a *Gentleman* of the best Fashion, or some eminent *Scholar*, or some curious *Architect*, or other *Artist*, descended of honest Parents, and who is of singular great Merit in the Opinion of the *Lodges*. And for the better, and easier, and more honourable Discharge of his Office, the *Grand-Master* has a Power to chuse his own DEPUTY GRAND-MASTER, who must be then, or must have been formerly, the *Master* of a particular *Lodge*, and has the Privilege of acting whatever the GRAND-MASTER, his *Principal*, should act, unless the said *Principal* be present, or interpose his Authority by a Letter.

These Rulers and Governors, *supreme* and *subordinate*, of the ancient *Lodge*, are to be obey'd in their respective Stations by all the Brethren, according to the *old Charges* and *Regulations*, with all Humility, Reverence, Love, and Alacrity.

V. Of the Management of the CRAFT in working.

All *Masons* shall work honestly on working Days, that they may live creditably on *holy Days*; and the time appointed by the Law of the Land, or confirm'd by Custom, shall be observ'd.

The most expert of the *Fellow-Craftsmen* shall be chosen or appointed the *Master*, or Overseer of the *Lord's Work*; who is to be call'd MASTER by those that work under him. The *Craftsmen* are to avoid all ill Language, and to call each other by no disobliging Name, but *Brother* or *Fellow*; and to behave themselves courteously within and without the *Lodge*.

The *Master*, knowing himself to be able of Cunning, shall undertake the *Lord's Work* as reasonably as possible, and truly dispend his Goods as if they were his own; nor to give more Wages to any Brother or *Apprentice* than he really may deserve.

Both the *Master* and the *Masons* receiving their Wages justly, shall be faithful to the *Lord*, and honestly finish their Work, whether *Task*

or *Journey*; nor put the Work to *Task* that hath been accustom'd to *Journey*.

None shall discover Envy at the Prosperity of a Brother, nor supplant him, or put him out of his Work, if he be capable to finish the same; for no Man can finish another's Work so much to the *Lord's* Profit, unless he be thoroughly acquainted with the Designs and Draughts of him that began it.

When a *Fellow-Craftsman* is chosen *Warden* of the Work under the *Master*, he shall be true both to *Master* and *Fellows*, shall carefully oversee the Work in the *Master's* Absence to the *Lord's* Profit; and his Brethren shall obey him.

All *Masons* employ'd, shall meekly receive their Wages without Murmuring or Mutiny, and not desert the *Master* till the Work is finish'd.

A *younger* Brother shall be instructed in working, to prevent spoiling the Materials for want of Judgment, and for encreasing and continuing of *Brotherly Love*.

All the Tools used in working shall be approved by the Grand Lodge.

No *Labourer* shall be employ'd in the proper Work of *Masonry*; nor shall *free Masons* work with those that are *not free*, without an urgent Necessity; nor shall they teach *Labourers* and *unaccepted Masons*, as they should teach a *Brother* or *Fellow*.

VI. Of BEHAVIOUR, VIZ.

1. In the Lodge while constituted.

You are not to hold private Committees, or separate Conversation, without Leave from the *Master*, nor to talk of any thing impertinent or unseemly, nor interrupt the *Master* or *Wardens*, or any Brother speaking to the *Master*: Nor behave yourself ludicrously or jestingly while the *Lodge* is engaged in what is serious and solemn; nor use any unbecoming Language upon any Pretence whatsoever;

but

but to pay due Reverence to your *Master, Wardens, and Fellows*, and put them to worship.

If any Complaint be brought, the Brother found guilty shall stand to the Award and Determination of the *Lodge*, who are the proper and competent Judges of all such Controversies, (unless you carry it by *Appeal* to the GRAND LODGE) and to whom they ought to be referr'd, unless a *Lord's Work* be hinder'd the mean while, in which Case a particular Reference may be made ; but you must never go to Law about what concerneth *Masonry*, without an absolute Necessity apparent to the *Lodge*.

2. Behaviour after the LODGE is over and the Brethren not gone.

You may enjoy yourselves with innocent Mirth, treating one another according to Ability, but avoiding all Excess, or forcing any Brother to eat or drink beyond his Inclination, or hindering him from going when his Occasions call him, or doing or saying any thing offensive, or that may forbid an *easy and free* Conversation; for that would blast our Harmony, and defeat our laudable Purposes. Therefore no private Piques or Quarrels must be brought within the Door of the *Lodge*, far less any Quarrels about *Religion, or Nations, or State Policy*, we being only, as *Masons*, of the *Catholick Religion* above-mention'd ; we are also of all *Nations, Tongues, Kindreds, and Languages*, and are resolv'd against all *Politicks*, as what never yet conduc'd to the Welfare of the *Lodge*, nor ever will. This *Charge* has been always strictly enjoind and observ'd ; but especially ever since the *Reformation* in BRITAIN, or the Dissent and Seccession of these Nations from the *Communion* of ROME.

3. Behaviour when Brethren meet without Strangers, but not in a Lodge form'd.

You are to salute one another in a courteous manner, as you will be instructed, calling each other *Brother*, freely giving mutual Instruction as shall be thought expedient, without being overseen or overheard,

heard, and without encroaching upon each other, or derogating from that Respect which is due to any Brother, were he not a Mason: For though all *Masons* are as *Brethren* upon the same *Level*, yet *Masonry* takes no Honour from a Man that he had before; nay rather it adds to his Honour, especially if he has deserv'd well of the Brotherhood, who must give Honour to whom it is due, and avoid *ill Manners*.

4. Behaviour in Presence of STRANGERS not Masons.

You shall be cautious in your Words and Carriage, that the most penetrating Stranger shall not be able to discover or find out what is not proper to be intimated; and sometimes you shall divert a Discourse, and manage it prudently for the Honour of the *worshipful Fraternity*.

5. Behaviour at HOME, and in your Neighbourhood.

You are to act as becomes a moral and wise Man; particularly, not to let your Family, Friends, and Neighbours know the *Concerns* of the *Lodge*, &c. but wisely to consult your own Honour, and that of the *ancient Brotherhood*, for Reasons not to be mention'd here. You must also consult your Health, by not continuing together too late, or too long from home, after *Lodge Hours* are past; and by avoiding of Gluttony or Drunkenness, that your Families be not neglected or injured, nor you disabled from working.

6. Behaviour towards a strange Brother.

You are cautiously to examine him, in such a Method as Prudence shall direct you, that you may not be impos'd upon by an ignorant false *Pretender*, whom you are to reject with Contempt and Derision, and beware of giving him any Hints of Knowledge.

But if you discover him to be a true and genuine *Brother*, you are to respect him accordingly; and if he is in want, you must relieve him if you can, or else direct him how he may be reliev'd: You must employ.

ploy him some Days, or else recommend him to be employ'd. But you are not charged to do beyond your Ability, only to prefer a poor Brother, that is a *good Man and true*, before any other poor People in the same Circumstances.

FINALLY, All these Charges you are to observe, and also those that shall be communicated to you in *another way*; cultivating BROTHERLY-LOVE, the Foundation and Cape-stone, the Cement and Glory of this ancient Fraternity, avoiding all Wrangling and Quarrelling, all Slander and Backbiting, nor permitting others to slander any honest Brother, but defending his Character, and doing him all good Offices, as far as is consistent with your Honour and Safety, and no farther. And if any of them do you Injury, you must apply to your own or his Lodge; and from thence you may appeal to the GRAND LODGE at the *Quarterly Communication*, and from thence to the *annual GRAND LODGE*, as has been the ancient laudable Conduct of our Fore-fathers in every Nation; never taking a *legal Course* but when the Case cannot be otherwise decided, and patiently listening to the honest and friendly Advice of Master and Fellows, when they would prevent your going to Law with Strangers, or would excite you to put a speedy Period to all *Law-Suits*, that so you may mind the *Affair* of MASONRY with the more Alacrity and Success; but with respect to Brothers or Fellows at Law, the Master and Brethren should kindly offer their Mediation, which ought to be thankfully submitted to by the contending Brethren; and if that Submission is impracticable, they must however carry on their *Process*, or *Law-Suit*, without Wrath and Rancor (not in the common way) saying or doing nothing which may hinder *Brotherly Love*, and good Offices to be renew'd and continu'd; that all may see the *benign Influence* of MASONRY, as all true *Masons* have done from the Beginning of the *World*, and will do to the End of *Time*.

Amen so mote it be.

POST-

They were not long, it appears, in becoming qualified, or at least the doubts of their qualification were soon dispelled, for we find that on the 22d of November, 1725, less than three years after its appearance in the *Book of Constitutions*, the Regulation was rescinded, and it was ordered by the Grand Lodge that "the Master of a lodge, with his Wardens and a competent number of the lodge assembled in due form, can make Masters and Fellows at discretion."¹

It might be argued that although the words "Master Mason" may be an interpolation, the rule regulating the conferring of the Second degree might well have formed a part of the original "Regulations," seeing that they were not compiled until after the invention of the Second degree.

But the argument founded on the incongruity of subjects and the awkward interruption of their continuity in the paragraph occasioned by the insertion of the suspected words, is applicable to the whole passage. If the internal evidence advanced is effective against a single word of the passage on these grounds, it is effective against all.

But Bro. Lyon, in his *History of the Lodge of Edinburgh*,² has supplied us with an authentic document, which presents the strongest presumptive evidence of three facts. 1. That the Second degree had been invented before the year 1721, and at that time constituted a part of the new Speculative system. 2. That in the English lodges there was no positive law forbidding the conferring of it by them, but only a recognized usage. 3. That in the year 1721 the Third degree had not been invented.

In the year 1721 Dr. Desaguliers paid a visit to Edinburgh and placed himself -in communication with the Freemasons of that city.

A record of the most important Masonic event that occurred during that visit is preserved in the minutes of the Lodge of Edinburgh for the 24th and 25th of August, 1721. This record has been published by Bro. Lyon in his history of that lodge. It is in the following words:

"Att Maries chappell the 24 of August, 1721 years, James Wattson, present deacon of the Masons of Edinbr., Preses. The which day Doctor John Theophilus Desaguliers, fellow of the Royall Societie, and chaplain in Ordinary to his Grace, James, Duke of Chandois, late Generali Master of the Mason Lodges in England,

¹ Anderson's "Constitutions," 2d edition, p. 161.

² "History of the Lodge of Edinburgh," p. 151.

being in town and desirous to have a conference with the Deacon, Warden, and Master Masons of Edinbr., which was accordingly granted, and finding him duly qualified in all points of Masonry. they received him as a Brother into their Societie."

"Likeas, upon the 25th day of the sd. moneth the Deacon, Wardens, Masters, and several other members of the Societie, together with the sd. Doctor Desaguliers, haveing mett att Maries Chapell, there was a supplication presented to them by John Campbell, Esqr., Lord Provost of Edinbr., George Preston and Hugh Hathorn, Bailies; James Nimo, the asurer; William Livingston, Deacon-convenor of the Trades thereof, and George Irving, Clerk to the Dean of Guild Court, and humbly craving to be admitted members of the sd. Societie; which being considered by them, they granted the desire thereof, and the saids honourable persons were admitted and received Entered Apprentices and Fellow-Crafts accordingly."

"And sicklike upon the 28th day of the said moneth there was another petition given in by Sr. Duncan Campbell of Lochnell, Barronet; Robert Wightman, Esqr., present Dean of Gild of Edr.; George Drummond, Esq., late Theasurer thereof; Archibald M'Aulay, late Bailly there; and Patrick Lindsay, merchant there, craving the like benefit, which was also granted, and they were received as members of the societie as the other persons above mentioned. The same day James Key and Thomas Aikman, servants to James Wattson, deacon of the masons, were admitted and received entered apprentices, and payed to James Mack, Warden, the ordinary dues as such. Ro. Alison, Clerk."

I agree with Bro. Lyon that "there can be but one opinion as to the nature and object of Dr. Desaguliers's visit to the Lodge of Edinburgh." And that was the introduction into Scotland of the new system of Masonry recently fabricated by himself for the lodges of London. That he conferred only the First and Second degrees is to me satisfactory proof that the Third had not been arranged.

Lyon says "it is more than probable that on both occasions (the two meetings of the Lodge recorded above) the ceremony of entering and passing would, as far as the circumstances of the lodges would permit, be conducted by Desaguliers himself in accordance with the ritual he was anxious to introduce."¹

¹ "History of the Lodge of Edinburgh," p. 153.

This is undoubtedly true; but why did he not complete the instruction by conferring the Third degree? Bro. Lyon's explanation here is wholly untenable:

"It was not," he says, "till 1722-23 that the English regulation restricting the conferring of the Third Degree to Grand Lodge was repealed. This may account for the Doctor confining himself to the two lesser degrees."

Bro. Lyon, usually so accurate, has here unaccountably fallen into two important errors.

First, the regulation alluded to was not repealed in 1723 but was only promulgated in that year. The repeal took place in 1725.

His next error is that the restriction was confined to the Third degree, while in fact, if we accept the passage in the "General Regulations" as genuine, it restricted, as we have seen, the conferring of both the Second and Third degrees to the Grand Lodge.

Therefore, if Desaguliers had considered himself as governed by this regulation (which, however, was impossible, seeing that it had not been enacted until after his visit to Edinburgh), he would have been restrained from conferring the Second as well as the Third degree.

That he conferred the Second degree in a lodge of Edinburgh, notwithstanding the usage in London of conferring it only in the Grand Lodge, may be accounted for on the very reasonable supposition that he did not consider that the English usage was binding on Scottish Masons.

Besides, there was, at that time, no Grand Lodge in Scotland, and if he had not conferred the degree in a lodge, the object of his visit would have been frustrated, and that was to introduce into the sister kingdom the new system of Speculative Freemasonry which he had invented and which had been just adopted in England or rather in London.

But that he should have taken a long and arduous journey to Edinburgh (a journey far more arduous than it is in the present day of railroads) for the purpose of introducing into the Scotch lodges the ritual invented by him for English Freemasonry, and yet have left the task uncompleted by omitting to communicate the most important part of the degree which was at the summit, is incomprehensible, unless we suppose that the Third degree had not, at that time, been invented.

For if the language of the "General Regulations" receives the only interpretation of which they are capable, it is evident that in the beginning of the year 1723, when they were published in the *Book of Constitutions*, the degree of Fellow-Craft was the highest degree known to the Freemasons of London.

It is the belief of all Masonic scholars, except a few who still cling with more or less tenacity to the old legends and traditions, that the Third degree can not be historically traced to a period earlier than the second decade of the 18th century. It has not, however, been hitherto attempted by anyone, so far as I am aware, to indicate the precise time of its invention.

The general opinion seems to have been that it was first introduced into the ritual of Speculative Freemasonry a very short time after the organization of the Grand Lodge in London, in the year 1717. But I think that I have conclusively and satisfactorily proved that the actual period of its introduction as a working degree was not until six years afterward, namely, in the year 1723, and after the publication of the first edition of the *Book of Constitutions*, and that the only passage referring to it in that work or in the "General Regulations" appended to it, was surreptitiously inserted in anticipation of its intended introduction.

The first writer who questioned the antiquity of the Third degree as conferred under the Grand Lodge was Laurence Dermott, the Grand Secretary, and afterward the Deputy Grand Master of that body of Freemasons which, in the year 1753, seceded from the legal Grand Lodge of England and constituted what is known in Masonic history as the "Grand Lodge of Ancients," the members thus distinguishing themselves from the constitutional Grand Lodge, which they stigmatized as "Moderns." In the second edition of the *Ahiman Rezon*, published in 1764, he has, in the part called "A Philacteria," the following statement in reference to the Third degree:¹

"About the year 1717 some joyous companions who had passed the degree of a craft (though very rusty) resolved to form a lodge for themselves, in order (by conversation) to recollect what had been formerly dictated to them, or, if that should be found impracticable, to substitute something new, which might for the future

¹ This statement is not contained in the 1st edition, published in 1756.

pass for Masonry amongst themselves. At this meeting the question was asked, whether any person in the assembly knew the Master's part, and being answered in the negative, it was resolved *nem. con.* that the deficiency should be made up with a new composition, and what fragments of the old order found amongst them, should be immediately reformed and made more pliable to the humours of the people."

I should be unwilling to cite the unsupported testimony of Dermott for anything in reference to the "Modern" because of his excessive partisan spirit. But the extract just given may be considered simply as confirming all the evidence heretofore produced, that after the year 1717 a "Master's part" or Third degree had been fabricated. Dermott's details, which were intended as a sneer upon the Constitution Grand Lodge, should pass for nothing.

As for Dermott's assertion that the true Master's degree, as it existed before the Revival, was in the possession of the Grand Lodge of the Ancients, as it was called, it is not only false, but absolutely absurd, for if the Ancients were in possession of a Third degree which had been in existence before the year 1717, and the Moderns were not, where did the former get it, since they sprang out of the latter and carried with them only the knowledge which they possessed as a part of that Grand Lodge?

Dr. Oliver, notwithstanding his excessive credulity in respect to the myths and legends of Freemasonry, has from time to time in his various writings expressed his doubts as to "the extreme antiquity of the present arrangement of the three degrees."¹ In one of his latest works² he admits that Desaguliers and Anderson were accused of the fabrication of the Hiram legend and of the manufacture of the degree by their seceding contemporaries, which accusation, he says, they did not deny.³

Findel says: "Originally, it seems, there was but one degree of initiation in the year 1717. . . . The introduction of the degrees of Fellow-Craft and Master Mason took place in so imperceptible

¹ State of Freemasonry in the 18th Century. Introduction to his edition of Hutchinson.

² "The Freemason's Treasury," Spencer, 1863.

³ This is an example of the carelessness with which Masonic writers were accustomed to make their statements. The "seceding contemporaries" of Oliver consisted simply of Laurence Dermott, who first made the accusation, and when he made it, both Desaguliers and Anderson were dead.

a manner, that we do not know the accurate date. No mention is made of them before 1720, even not yet in the *Book of Constitutions* of 1722."¹

I do not, however, concur with this learned German writer in his hypothesis that the Third degree originated as a reward for Masonic merits, especially to be conferred on all the brethren who had passed the chair from 1717 to 1720. Doubtless, as soon as it was invented it was conferred on all who were or had been Masters of lodges, but Findel places too low an estimate on the design of the degree. I think rather that it was intended by Desaguliers to develop the religious and philosophic sentiment in Speculative Freemasonry which it was his intention to establish. It is probable that the "eloquent Oration about Masons and Masonry," which Anderson tells us he delivered before the Grand Lodge in 1721, but which is unfortunately lost, contained a foreshadowing of his views on this subject.

Bro. Hughan, who is of the very highest authority on all points of the documentary history of English Masonry, settles the question in the following remarks:²

"The sublime degree of a Master Mason, alias the 'Third degree,' may be very ancient, but, so far, the evidence respecting its history goes no farther back than the early part of the last century. Few writers on the subject appear to base their observations on facts, but prefer the 'traditions' (so called) derived from old Masons. We, however, give the preference to the minutes and by-laws of lodges, as all of which we have either seen, traced, or obtained copies of, unequivocally prove the degree of Master Mason to be an early introduction of the Revivalists of A.D. 1717. No record prior to the second decade of the last century ever mentions Masonic degrees, and all the MSS. preserved decidedly confirm us in the belief that in the mere Operative (although partly speculative) career of Freemasonry the ceremony of reception was of a most unpretentious and simple character, mainly for the communication of certain lyrics and secrets, and for the conservation of ancient customs of the craft."

Hughan cites a MS. (No. 23,202) in the British Museum showing that the rules of a Musical and Architectural Society formed in

¹ "History of Freemasonry," Lyon's Translation, p. 150.

² See *Voice of Masonry* for August, 1873.

February, 1724, in London, required its members to be Master Masons. This might be, and yet the degree not have been fabricated until January, 1723.

He also cites the minutes of a lodge held at Lincoln (England). From these minutes it appears that in December, 1734, the body of the lodge consisted of Fellow-Crafts; and when the "two new Wardens, as well as several other Brothers of the lodge, well qualified and worthy of the degree of Master had not been called thereto," the Master directed a lodge of Masters to be held for the purpose of admitting these candidates to the Third degree.

Hence, as Bro. Hughan says, the lodge at that time worked the degree only at intervals. And he concludes, I think, correctly, that as there was a rule prescribing the fee when a "Brother made in another lodge shall be passed Master in this," that "all lodges had not authority or did not work the degree in question." I suppose they had the authority but not the ability.

All this shows that the Third degree in 1734 was yet in its infancy.

The provision contained in the "General Regulations," which restricted the conferring of the Second and Third degrees to the Grand Lodge was rescinded on November 22, 1725, and yet we see that nine years afterward the Third degree was not conferred in all the lodges.

It is a singular circumstance that in 1731, when the Duke of Lorraine was made a Mason in a special lodge held at the Hague, notwithstanding that Desaguliers presided over it, he received only the First and Second degrees, and came afterward to England to have the Third conferred upon him.

The first evidence of the Third degree being conferred in Scotland is in the minutes of Canongate Kilwinning Lodge in a minute dated March 31, 1735.¹

The degree is first referred to in the minutes of St. Mary's Chapel Lodge under the date of November 1, 1738, when George Drummond, Esq., an Entered Apprentice, "was past a Fellow-Craft and also raised as a Master Mason in due form."²

According to Bro. Lyon, possession of the Third degree was not at this period a necessary qualification to a seat in the Grand

¹ Lyon, "History of the Lodge of Edinburgh," p. 213.

² Ibid., p. 212.

Lodge of Scotland. For thirty years after its introduction into Mary's Chapel it conferred no rights in the management of the lodge that were not possessed by Fellow-Crafts.

It was not, in fact, until the year 1765 that Master Masons alone were qualified to hold office.

Continental Speculative Masonry having derived its organized existence from the Grand Lodge of England, must necessarily have borrowed its forms and ceremonies and ritual from the same source, and consequently received the Third degree at a still later period.

From all that has been said, I think that we are fairly entitled to deduce the following conclusions:

1. When the four old Lodges of London met on June 24, 1717, at the "Goose and Gridiron Tavern" and organized the Grand Lodge of England, there was but one degree known to the Craft, to the esoteric instructions of which all Freemasons were entitled.

2. Between 1717 and 1720, in which latter year the "Charges" and probably the "General Regulations" were compiled by Grand Master Payne, a severance of this primitive degree into two parts was effected, and the Second or Fellow-Craft's degree was fabricated, the necessary result being that what was left of the primitive degree, with doubtless some modifications and even additions, was constituted as the Entered Apprentice's degree.

3. A Third degree, called that of the Master Mason, was subsequently fabricated so as to complete the series of three degrees of Speculative Masonry as it now exists.

4. The Third degree, as an accomplished fact, was not fabricated before the close of the year 1722, and was not made known to the Craft, or worked as a degree of the new system, until the beginning of 1723.

5. The inventor or fabricator of this series of degrees was Dr. John Theophilus Desaguliers, assisted by Anderson and probably a few other collaborators, among whom I certainly would not omit the learned antiquary, George Payne, who had twice been Grand Master.

In coming to these conclusions I omit all reference to the Legend of the Third Degree as to the time or place when it was concocted, and whether it was derived by Desaguliers, as has been asserted, from certain Jewish rabbinical writers, or whether its earliest form is to be found in certain traditions of the mediaeval Stonemasons.

CHAPTER XXXVII

THE DEATH OF OPERATIVE AND THE BIRTH OF SPECULATIVE FREEMASONRY

ROWTH, says Dr. South, "is progress, and all progress designs, and tends to the acquisition of something, which the growing thing or person is not yet possessed of."

This apothegm of the learned divine is peculiarly applicable to the history of that system of Speculative Freemasonry which, springing into existence at the "Apple Tree tavern," in London, at the close of the second decade of the 18th century, made such progress in the acquisition of new knowledge as to completely change its character soon after the beginning of the third decade.

We have seen that it was derived from an older institution whose objects were altogether practical, and whose members were always engaged in the building of public edifices. But there were other members of the guild who were not Operative Masons, but who had been admitted to the privileges of membership for the sake of the prestige and influence which the Fraternity expected to obtain from their learning, their wealth, or their rank.

These unprofessional brethren, who were at first called Theoretic Masons or Honorary members, but who afterward assumed the title of Speculative Freemasons, began even in the very outset of what they were pleased, most inaccurately, to call a Revival, to exercise an unexpected and detrimental influence on the Operative Guild.

This influence was so exerted that Operative Freemasonry was gradually extruded from the important place which it had so long occupied, and finally, in and after the year 1723, ceased entirely to exist.

The gradual transformation from Operative to Speculative Freemasonry is one of the most interesting points in the history of the institution, and is well worth our careful consideration.

Hardly more wonderful is the change from the insignificant acorn to the majestic oak, than was this expansion of a guild of working-men, limited in their design and their numbers, into a Fraternity of moralists and philosophers, whose object was the elevation of their fellow-men, and whose influence has extended into every quarter of the civilized world.

Operative Freemasonry, which flourished in the Middle Ages and long after as an association of skillful builders who were in the possession of architectural secrets unknown to the ruder workmen of the same craft, and who were bound to each other by a fraternal tie, no longer exists. Like the massive cathedrals which it constructed, it has crumbled into decay.

But Speculative Freemasonry, erected on its ruins, lives and will always live, a perpetual memorial in its symbols and its technical language of the source whence it sprang.

Let us inquire how the one died and how the other was born.

When on the 24th day of June in the year 1717 certain Freemasons of London met at the "Goose and Gridiron Tavern" and carried into effect the arrangement made in the previous February, by organizing a Grand Lodge, it is not to be presumed that any other idea had at that time entered their minds than that of consolidating the four Operative Lodges of which they were members into one body. The motives that actuated them were to produce a stronger union among the Craft than had previously existed, each lodge having hitherto been independent and isolated, and also to enlarge their numbers and to increase their influence, by throwing the door more widely open to the admission of gentlemen who were not otherwise connected with the Craft.

The fact is that the fashion then prevailed to a remarkable extent in London for men of like sentiments or of the same occupation to form themselves into clubs. The Freemasons, both Operative and Theoretic, in thus uniting, were doing nothing else than following the fashion, and were really instituting a club of a more elevated character and under a different name.

Hence the consolidation of the four Lodges was called a Grand Lodge, a title and an organization which had previously been unknown to English Freemasonry.¹

¹ It is not worth while to repeat the argument so often advanced, and by which Masonic scholars have satisfied themselves that no Grand Lodge ever existed in England before the year 1717.

There was no thought, at that early period, by those who were engaged in the organization, of changing to any greater extent the character of the society. It was still to be a Guild of Operative Freemasons, but consisting more largely in proportion than ever before of members who were not professional workmen.

"At the revival in 1717," says Dr. Oliver, "the philosophy of the Order was seldom considered, and our facetious brethren did not think it worth their while to raise any question respecting the validity of our legends; nor did they concern themselves much about the truth of our traditions. Their principal object was pass a pleasant hour in company with a select assemblage of brethren; and that purpose being attained, they waived all inquiry into the truth or probability of either the one or the other."¹

The scanty records of the transaction, which Dr. Anderson, our only authority, has supplied, make no mention of those distinguished persons who afterward took a prominent part in affecting the transmutation of Operative into Speculative Freemasonry, and who were indeed the founders of the latter system.

It is said, though I know not on what authentic authority, that Dr. Desaguliers, the corypheus of the band of reformers, had been admitted five years before into the honorary membership of the Lodge which met at the sign of the "Rummer and Grapes," and which was one of the four that united in the formation of a Grand Lodge.

If this be true, and there are good reasons for believing it, it can not be doubted that he was present at the organization of the Grand Lodge, and that he took an active part in the proceedings of the meetings both in February and in June, 1717.

Neither the names of Payne nor of Anderson, who subsequently became the collaborators of Desaguliers in the formation of Speculative Freemasonry, are mentioned in the brief records of those meetings. If they were present or connected with the organization, the fact is not recorded. Payne first appears in June, 1718, when he was elected Grand Master; Desaguliers in 1719, when he was elected to the same office. This would tend to show that both had been for some years in the Fraternity, since new-comers would hardly have been chosen for those positions.

¹ "Discrepancies of Freemasonry," p. 13.

It is not so certain that Anderson was a Freemason in 1717. It is not improbable that he was soon afterward admitted, for in September, 1721, he acquired such a reputation in the society as to have been selected by the Duke of Montagu, who was then the Grand Master, to digest the old Gothic Constitutions, a task of great importance.

Of one thing, however, there can be no doubt, that no one of these three persons, who were afterward so distinguished for their services in Speculative Freemasonry, had in 1717 been prominently placed before the Craft. In the selection of an officer to preside over the newly established Grand Lodge, the choice fell, not on one of them, but on a comparatively insignificant person, Mr. Anthony Sayer. Of his subsequent Masonic career, we only know that he was appointed by Desaguliers one of the Grand Wardens. He is also recorded as having been the Senior Warden at one of the four original Lodges after he had passed the Grand Mastership. He afterward fell into financial difficulties, and having received relief from the Grand Lodge, we hear no more of him in the history of Freemasonry.

It is to Desaguliers, to Payne, and to Anderson that we are to attribute the creation of that change in the organization of the system of English Freemasonry which gradually led to the dissolution of the Operative element, and the substitution in its place of one that was purely Speculative. The three were members of the same lodge, were men of education,¹ were interested in the institution, as is shown by their regular attendance on the meetings of the Grand Lodge until near the middle of the century, and were all zealously engaged in the investigation of the old records of the institution, so as to fit them for the prosecution of the peaceful revolution which they were seeking to accomplish.

Among the multitudinous books contributed by Dr. Oliver to the literature of Freemasonry, is one entitled *The Revelations of*

¹ John Robison, a professor of Natural Philosophy in Edinburgh, wrote and published in 1797 an anti-masonic work entitled "Proofs of a Conspiracy against all the Religions and Government in Europe," etc., the falsehoods in which, unfortunately for the author's reputation, were extended by French and Dutch translations. In this book he says of Anderson and Desaguliers that they were "two persons of little education and of low manners, who had aimed at little more than making a pretext, not altogether contemptible, for a convivial meeting." (P. 71.) This is a fair specimen of Robison's knowledge and judgment.

a Square, which contains much information concerning the condition of the ritual and the progress of the institution during the early period now under consideration. Unfortunately, there is such a blending of truth and fiction in this work that it is difficult, on many occasions, to separate the one from the other.

It is but fair, however, to admit the author's claim that his statements are not to be accounted "fabulous and without authority because its contents are communicated through an imaginary medium," for, as he avers, he is in possession of authentic vouchers for every transaction.

These vouchers consisted principally of the contents of a masonic diary kept by his father, who had been initiated in 1784, and was acquainted with a distinguished Freemason who had been a contemporary of Desaguliers. With this brother the elder Oliver had held many conversations, as well as with others of the 18th century. The substance of these conversations he had committed to his diary, and this came into the possession of his son, and is the basis on which he composed his *Revelations of a Square*.

If Dr. Oliver had given in marginal notes or otherwise special references to the diary and to other sources which he used as authorities for his statements, I do not hesitate to say that *The Revelations of a Square* would, by these proofs of authenticity, be the most valuable of all his historical works.

Still, I am disposed to accept generally the statements of the work as authentic, and if there be sometimes an appearance of the fabulous, it can not be doubted that beneath the fiction there is always a considerable substratum of truth.

According to Oliver, Desaguliers had at that early period determined to renovate the Order, which was falling into decay, and had enlisted several active and zealous brethren in the support of his plans. Among these were Sayer and Payne, the first and second Grand Masters, and Elliott and Lamball, the first two Wardens, with several others whose names have not elsewhere been transmitted to posterity.¹

There is nothing unreasonable nor improbable in this statement. It is very likely that Desaguliers and a few of his friends had seen and deplored the decaying condition of the four lodges in London.

¹ "Revelations of a Square," ch. i., p. 5.

It is also likely that their first thought was that a greater degree of success and prosperity might be secured if the lodges would abandon to some extent the independence and isolation of their condition, and would establish a bond of union by their consolidation under a common head.

Whatever views might have been secretly entertained by Desaguliers and a few friends in his confidence, he could not have openly expressed to the Craft any intention to dissolve the Operative guild and to establish a Speculative society in its place. Had such an intention been even suspected by the purely Operative Freemasons who composed part of the membership of the four lodges, it can not well be doubted that they would have declined to support a scheme which looked eventually to the destruction of their Craft, and consequently the organization of a Grand Lodge would never have been attempted.

But I am not willing to charge Desaguliers with such duplicity. He was honest in his desire to renovate the institution of Operative Freemasonry, and he believed that the first step toward that renovation would be the consolidation of the lodges. He expected that an imperfect code of laws would be improved, and perhaps that a rude and unpolished ritual might be expanded and refined.

Farther, he was not, it may be supposed, prepared at that time to go. Whatever modifications he subsequently made by the invention of degrees which at once established a new system were the results of afterthoughts suggested to his mind by a sequence of circumstances.

That the change from Operative to Speculative Freemasonry was of gradual growth, we know from the authentic records that are before us.

In the year 1717 we find an Operative guild presenting itself in cold simplicity of organization as a body of practical workmen to whom were joined some honorary members, who were not Craftsmen; with an imperfect and almost obsolete system of by-laws; with but one form of admission; with secrets common to all classes, and which were of little or no importance, for the architectural and geometrical secrets of the mediaeval Craft had been lost; and finally with an insignificant and unpolished ritual, a mere catechism for wandering brethren to test their right to the privileges and the hospitality of the Fraternity.

COLOGNE CATHEDRAL

Six years after, in 1723, this association of workmen has disappeared, and in its place we find a new society which has been erected on the foundations of that edifice which has crumbled into ruins; a society that has repudiated all necessary knowledge of the art of building; to which workmen may be admitted, not because they are workmen, but because they are men of good character and of exemplary conduct; with a well-framed code of laws for its government; with three degrees, with three forms of initiation, and with secrets exclusively appropriated to each; and with rituals which, produced by cultured minds, present the germs of a science of symbolism.

Operative Freemasonry no longer wields the scepter; it has descended from its throne into its grave, and Speculative Freemasonry, as a living form, has assumed the vacant seat.

That the transmutation was gradually accomplished we know, for six years were occupied in its accomplishment, and the records of that period, brief and scanty as they are, unerringly indicate the steps of its gentle progress.

From June, 1717, to June, 1718, under the administration of Anthony Sayer, Gentleman, as Grand Master, there are no signs of a contemplated change. He was not, if negative evidence may be accepted as the index of his character, the man to inaugurate so bold an enterprise. His efforts seem to have been directed solely to the strengthening and confirming of the union of the Operative lodges by consulting at stated periods with their officers.

From June, 1718, to June, 1719, George Payne presided over the Craft. Now we discover the first traces of a sentiment tending toward the improvement of the institution. Old manuscripts and records were anxiously sought for that the ancient usages of the Craft might be learned. In preparing for the future it was expedient to know something of the past.

The result of this collation of old documents was the compilation of the "Charges of a Freemason," appended to the first edition of the *Book of Constitutions*. The composition of this code is generally attributed to Anderson. Without positive testimony on this point, I am inclined to assign the authorship to Payne. He was a noted antiquary, and well fitted by the turn of his mind to labors of that kind.

Desaguliers was Grand Master from June, 1719, to June, 1720.

His administration is made memorable by the first great change in the system.

An examination of the old manuscripts which had been collected by Payne must have shown that the body of the Craft had always been divided into two classes, Apprentices and Fellows, who were distinguished by the possession of certain privileges as workmen peculiar to each.

In the lodge they assembled together and partook equally of its counsels. But the prominence of the Fellows in rank as a class of workmen and in numbers as constituting the principal membership of the four old Lodges, very probably suggested to the mind of Desaguliers the advantages that would result from a more distinct separation of the Fellows from the Apprentices, not by a recognition of the higher rank of the former as workmen, because if a Speculative system was to be established, a qualification derived from skill in the practical labors of the Craft would cease to be of avail; but a separation by granting to each class a peculiar form of initiation, with its accompanying secrets.

The fact, also, that in some of the old manuscripts, which were then called the "Gothic Constitutions," copies of which had been produced as the result of the call of Grand Master Payne, there were two distinct sets of "Charges," one for the Masters and Fellows and one for the Apprentices, would have strengthened the notion that there should be a positive and distinct separation of the two classes as the first preparatory step toward the development of the new system.

This step was taken by Desaguliers soon after his installation as Grand Master. Accordingly, in 1719, he modified the one degree or form of initiation or admission which had been hitherto common to all ranks of Craftsmen.

One part of the degree (but the word is not precisely correct) he confined to the Apprentices, and made it the working degree of the lodge. Another part he enlarged and improved, transferred to it the most important secret, the MASON WORD, and made it a degree to be conferred only on Fellow-Crafts in the Grand Lodge; while the degree of the Apprentices thus modified continued as of old to be conferred on new candidates in the lodge.

Thus it was that in the year 1719 the first alteration in the old Operative system took place, and two degrees, the First and Second, were created.

The Entered Apprentice now ceased to be a youth bound for a certain number of years to a Master for the purpose of learning the mysteries of the trade. The term henceforth denoted one who had been initiated into the secrets of the First degree of Speculative Freemasonry, a meaning which it has ever since retained.

In former times, under the purely Operative system, the Masters of the Work, those appointed to rule over the migratory lodges and to superintend the Craftsmen in their hours of labor, were necessarily selected from the Fellows, because of their greater skill, acquired from experience and their freedom from servitude.

But when the Theoretic Freemasons, the Honorary members, began to be the dominant party, in consequence of their increased number, their higher social position, and their superior education, it was plainly seen that any claim to privileges which was derived from greater skill in the practical art of building, from the expiration of indentures and from the acquisition of independence and the right to go and come at will, would soon be abolished.

The Operative members only could maintain a distinction between themselves founded on such claims. The Theoretic members were, so far as regarded skill in building or freedom from the servitude of indentures, on an equal footing, everyone with all the others.

But Desaguliers and his collaborators were anxious to retain as many as they could of the old usages of the Craft. They were not prepared nor willing to obliterate all marks of identity between the old and the new system. Nor could they afford, in the infancy of their enterprise, to excite the opposition of the Operative members by an open attack on the ancient customs of the Craft.

Hence they determined to retain the distinction which had always existed between Fellows and Apprentices, but to found that distinction, not on the possession of superior skill in the art of building, but in the possession of peculiar secrets.

The Second degree having been thus established, it became necessary to secure the privileges of the Fellows. These in the old system had inured to them by usage and the natural workings of the trade; they were now to be perpetuated and maintained in the new system by positive law.

Accordingly, in the following year, Payne made that compilation or code of laws for the government of the new society which is

known as the "General Regulations," and which having been approved by the Grand Lodge, was inserted in the *Book of Constitutions*.

It has been already abundantly shown that the whole tenor of these "Regulations" was to make the Fellow-Crafts the possessors of the highest degree then known, and to constitute them the sole legislators of the society (except in the alteration of the "Regulations") and the body from which its officers were to be chosen.

Thus the first step in the separation of Speculative from Operative Freemasonry was accomplished by the establishment of two degrees of initiation instead of one, and by making the Fellow-Crafts distinct from and superior to the Apprentices, not by a higher skill in an Operative art, but by their attainment to greater knowledge in a Speculative science.

For four years this new system prevailed, and Speculative Freemasonry in England was divided into two degrees. The system, in fact, existed up to the very day of the final approval, in January, 1723, of the *Book of Constitutions*.

The First degree was appropriated to the initiation of candidates in the particular, or, as we now call them, the subordinate lodges.

The Second degree conferred in the Grand Lodge was given to those few who felt the aspiration for higher knowledge, or who had been elected as Masters of lodges or as officers in the Grand Lodge.

The Operative members submitted to the change, and continued to take an interest in the new society, receiving in proportion to their numbers a fair share of the offices in the Grand Lodge.

But the progress of change and innovation was not to cease at this point. The inventive genius of Desaguliers was not at rest, and urged onward, not only by his ritualistic taste and his desire to elevate the institution into a higher plane than would result by the force of surrounding circumstances, he contemplated a further advance.

"Circumstances," says Goethe, in his *Wilhelm Meister*, "move backward and forward before us and ceaselessly finish the web, which we ourselves have in part spun and put upon the loom."

Desaguliers, with the co-operation of other Theoretic Freemasons, had united the four Operative Lodges into a Grand Lodge, a

body until then unknown to the Craft; he had established a form of government with which they were equally unfamiliar; he had abolished the old degree, and invented two new ones; and yet it appears that he did not consider the system perfect.

He contemplated a further development of the ritual by the addition of another degree. In this design he was probably, to some extent, controlled by surrounding circumstances.

The Fellow-Crafts had been invested with important privileges not granted to the Entered Apprentices, and the possession of these privileges was accompanied by the acquisition of a higher esoteric knowledge.

Among the privileges which had been acquired by the Fellow-Crafts were those of election to office in the Grand Lodge and of Mastership in a subordinate lodge.

It is not unreasonable to suppose that the Fellows who had been elevated to these positions in consequence of their possession of a new degree were desirous, especially the Master of the lodges, to be farther distinguished from both the Apprentices and the Fellow-Crafts by the acquisition of a still higher grade.

Besides this motive, the existence of which, though not attested by any positive authority, is nevertheless very presumable, another and a more philosophic one must have actuated Desaguliers in the further development of his system of degrees.

He had seen that the old Operative Craft was divided into three classes or ranks of workmen. To the first and second of these classes he had appropriated a degree peculiar to each. But the third and highest class was still without one. Thus was his system made incongruous and incomplete.

To give it perfection it was necessary that a Third degree should be invented, to be the property of the third class, or the Masters.

It is possible that Desaguliers had, in his original plan, contemplated the composition of three degrees, or it may have been that the willing acceptance of the First and Second by the Craft had suggested the invention of a Third degree.

Be this as it may, for it is all a matter of mere surmise and not of great importance, it is very certain that the invention and composition of the ritual of so philosophic a degree could not have been the labor of a day or a week or any brief period of time.

It involved much thought, and months must have been occupied

in the mental labor of completing it. It could not have been finished before the close of the year 1722. If it had, it would have been presented to the Grand Lodge before the final approval of the *Book of Constitutions*, and would then have received that prominent place in Speculative Freemasonry which in that book and in the "General Regulations" is assigned to the degree of Fellow-Craft.

But at that time the degree was so far completed as to make it certain that it would be ready for presentation to the Grand Lodge and to the Craft in the course of the following year.

But as the *Book of Constitutions* was finally approved in January, 1723, and immediately afterward printed and published, Desaguliers being desirous of keeping the new degree under his own control for a brief period, until its ritual should be well understood and properly worked, anticipated the enactment of a law on the subject, and interpolated the passage in the "General Regulations" which required the Second and Third degrees to be conferred in the Grand Lodge only.

Logical inferences and documentary evidence bring us unavoidably to the conclusion that the following was the sequence of events which led to the establishment of the present ritual of three degrees,

In 1717 the Grand Lodge, at its organization, received the one comprehensive degree or ritual which had been common to all classes of the Operative Freemasons.

This they continued to use, with no modification, for the space of two years.

In 1719 the ritual of this degree was disintegrated and divided into two parts. One part was appropriated to the Entered Apprentices; the other, with some augmentations, to the Fellow-Craft.

From that time until the year 1723 the system of Speculative Freemasonry, which was practiced by the Grand Lodge, consisted of two degrees. That of Fellow-Craft was deemed the summit of Freemasonry, and there was nothing esoteric beyond it.

On this system of two degrees the *Book of Constitutions*, the "General Regulations," and the "Manner of Constituting a new Lodge" were framed. When these were published the Craft knew nothing of a Third degree.

In the year 1723 Dr. Desaguliers perfected the system by presenting the Grand Lodge with the Third degree, which he had recently invented.

This degree was accepted by the Grand Lodge, and being introduced into the ritual, from that time forth Ancient Craft Masonry, as it has since been called, has consisted of these three degrees.¹

There can be little doubt that this radical change from the old system was not pleasing to the purely Operative Freemasons who were members of the Grand Lodge. Innovation has always been repugnant to the Masonic mind. Then, as now, changes in the ritual and the introduction of new degrees must have met with much opposition from those who were attached traditionally to former usages and were unwilling to abandon the old paths.

From 1717 to 1722 we find, by Anderson's records, that the Operatives must have taken an active part in the transactions of the Grand Lodge, for during that period they received a fair proportion of the offices. No one of them, however, had been elected to the chief post of Grand Master, which was always bestowed upon a Speculative.

But from the year 1723, when, as it has been shown, the Speculative system had been perfected, we lose all sight of the Operatives in any further proceedings of the society. It is impossible to determine whether this was the result of their voluntary withdrawal or whether the Speculatives no longer desired their co-operation. But the evidence is ample that from the year 1723 Speculative Freemasonry has become the dominant, and, indeed, the only feature of the Grand Lodge.

Bro. Robert Freeke Gould, who has written an elaborate sketch of the history of those times, makes on this point the following remark, which sustains the present views:

"In 1723, however, a struggle for supremacy, between the Operatives and the Speculatives, had set in, and the former, from that time, could justly complain of their total supercession in the offices of the Society."²

It is, then, in the year 1723 that we must place the birth of Speculative Freemasonry. Operative Masonry, the mere art of building, that which was practiced by the "Rough Layers" of England and the wall builders or *Murer* of Germany, still remains and will always remain as one of the useful arts.

¹ The dismemberment of the Third degree, which is said to have subsequently taken place to form a fourth degree, has nothing to do with this discussion.

² "History of the Four Old Lodges," p. 34.

But Operative Freemasonry, the descendant and the representative of the mediaeval guilds, ceased then and forever to exist.

It died, but it left its sign in the implements of the Craft which were still preserved in the new system, but applied to spiritual uses; in the technical terms of the art which gave rise to a symbolic language; and in the ineffaceable memorials which show that the new association of Speculative Freemasonry has been erected on the foundations of a purely Operative Society.

CHAPTER XXXVIII

INTRODUCTION OF SPECULATIVE FREEMASONRY INTO FRANCE

ECULATIVE Freemasonry having been firmly established in London and its environs (for it did not immediately extend into the other parts of England), it will now be proper to direct our attention to its progress in other countries, and in the first place into the neighboring kingdom of France.

The unauthentic and unconfirmed statements of Masonic scholars, until a very recent period, had thrown a cloud of uncertainty over the early history of Freemasonry in France, which entirely obscured the true era of its introduction into that country.

Moreover, the accounts of the origin of Freemasonry in France made by different writers are of so conflicting a nature that it is utterly impossible to reconcile them with historical accuracy. The web of confusion thus constructed has only been recently disentangled by the investigations of some English writers, conspicuous among whom is Bro. William James Hughan.

Before proceeding to avail ourselves of the result of these inquiries into the time of the constitution of the first lodge in France, it will be interesting to present the views of the various authors who had previously written on the subject.

In the year 1745 a pamphlet, purporting to be an exposition of Freemasonry, was published in Paris, entitled *Le Sceau Rompu, ou la Loge ouverte aux profanes*. In this work it is stated that the earliest introduction of Freemasonry into France is to be traced to the year 1718. This work is, however, of no authority, and it is only quoted to show the recklessness with which statements of Masonic history are too frequently made.

The Abbé Robin, who in 1776 published his *Researches on the Ancient and Modern Initiations*,¹ says that at the time of his writ-

¹ "Recherches sur les initiations anciennes et modernes," par l'Abbé Rxxx. The work, though printed anonymously, was openly attributed to Robin, by the publisher.

ing no memorial of the origin of Freemasonry in France remained, and that all that has been found does not go farther back than the year 1720, when it seems to have come from England. But of the date thus ascribed he gives no authentic evidence. It is with him but a surmise.

Thory, in 1815, in his *Acta Latomorum*, gives the story as follows,¹ having borrowed it from Lalande, the great astronomer, who had previously published it in 1786, in his article on Freemasonry in that immense work, the *Encyclopédie Méthodique*.

"The year 1725 is indicated as the epoch of the introduction of Freemasonry into Paris. Lord Derwentwater, the Chevalier Maskelyne, M. d'Hénquelty, and some other Englishmen, established a lodge at the house of Hure, the keeper of an ordinary in the Rue des Boucheries. This lodge acquired a great reputation, and attracted five or six hundred brethren to Masonry in the space of ten years. It worked under the auspices and according to the usages of the Grand Lodge at London.

"It has left no historical monument of its existence, a fact which throws much confusion over the first labors of Freemasonry in Paris."

In his record of the year 1736, he says that "four lodges then existed at Paris, which united and elected the Earl of Harnouester, who thus succeeded Lord Derwentwater, whom the brethren had chosen at the epoch of the introduction of Freemasonry into Paris. At this meeting the Chevalier Ramsay acted as Orator."²

T. B. Clavel, in his *Histoire Pittoresque de la Franc-Maçonnerie*,³ says that according to certain English and German historians, among others Robison and the aulic counsellor Bode, Freemasonry was introduced into France by the Irish followers of King James II., after the English revolution in 1688, and the first lodge was established at the Château de Saint Germain, the residence of the de-throned monarch, whence the Masonic association was propagated in the rest of the kingdom, in Germany and Italy.

Clavel acknowledges that he does not know on what documentary evidence these writers support this opinion; he does not, however, think it altogether destitute of probability.

¹ "Acta Latomorum, ou chronologie de l'Histoire de la Franc-Maçonnerie Française et Étrangère," p. 21.

² *Ibid.*, p. 51.

³ Chapter III., p. 107.

Robison, to whom Clavel has referred, says that when King James, with many of his most zealous adherents, had fled into France, "they took Freemasonry with them to the continent, where it was immediately received by the French, and was cultivated with great zeal, and in a manner suited to the tastes and habits of that highly polished people."¹

Leaving this wholly apocryphal statement without discussion, I proceed to give Clavel's account, which he claims to be historical, of the introduction of Freemasonry from England into France.

The first lodge, he says, whose establishment in France is historically proved, is the one which the Grand Lodge of England instituted at Dunkirk in the year 1721, under the title of *Amitié et Fraternité*. The second, the name of which has not been preserved, was founded at Paris in 1725 by Lord Derwentwater, the Chevalier Maskelyne, Brother d'Héguerty, and some other followers of the Pretender. It met at the house of Hure, an English tavern-keeper or restaurateur in the Rue des Boucheries in the Faubourg Saint Germain. A brother Gaustand, an English lapidary, about the same time created a third lodge at Paris. A fourth one was established in 1726, under the name of *St. Thomas*. The Grand Lodge of England constituted two others in 1729; the name of the first was *Au Louis d'Argent*, and a brother Lebreton was its Master; the other was called *A Sainte Marguerite*; of this lodge we know nothing but its name, which was reported in the Registry of the year 1765. Finally there was a fourth lodge formed in Paris in the year 1732, at the house of Laudelle, a tavern-keeper in the Rue de Bussy. At first it took its name from that of the street in which it was situated, afterward it was called the Lodge *d'Aumont*, because the Duke of Aumont had been initiated in it.²

Ragon, in his *Orthodoxie Maçonnique*, asserts that Freemasonry made its first appearance in France in 1721, when on October 13th the Lodge *l'Amitié et Fraternité* was instituted at Dunkirk. It appeared in Paris in 1725; in Bordeaux in 1732, by the establishment of the Lodge *l'Anolaise* No. 204; and on January

¹ "Proofs of a Conspiracy," p. 27.

² A review of the Report made in 1838 and 1839 to the Grand Orient of France by a Committee, which is contained in the French journal *La Globe* (tome I., p. 324), states that "cette loge fut regulierment constituée par la Grande Loge d'Angleterre, le 7 Mai, 1729, sous le titre distinctif de Saint-Thomas au Louis d'Argent"

1, 1732, the Lodge of *la Parfaite Union* was instituted at Valenciennes.¹

Two other French authorities, not, however, Masonic, have given similar but briefer statements.

In the *Dictionnaire de la conversation et de la Lecture* it is said that Freemasonry was introduced into France in 1720 by Lord Derwentwater and the English. The Grand Masters who succeeded him were Lord d'Arnold-Esler and the Duc d'Autin, the Comte de Clermont-Tonnerre and the Duc d'Orleans. In 1736 there were still only four lodges in Paris; in 1742 there were twenty-two, and two hundred in the provinces.²

Larousse, in his *Grand Universal Dictionary of the Nineteenth Century*,³ simply repeats this statement as to dates, simply stating that the first lodge in France was founded at Dunkirk in 1721, and the second at Paris in 1725, by Lord Derwentwater.

Rebold has written, in his *Histoire des Trois Grandes Loges*, a more detailed statement of the events connected with the introduction of Freemasonry into France. His narrative is as follows:

"It was not until 1725 that a lodge was for the first time founded at Paris by Lord Derwentwater and two other Englishmen, under the title of *St. Thomas*. It was constituted by them in the name of the Grand Lodge of London, on the 12th of June, 1720. Its members, to the number of five or six hundred, met at the house of Hure, a tavern-keeper in the Rue des Boucheries-Saint Germain. Through the exertions of the same English gentlemen a second lodge was established on the 7th of June, 1729, under the name of *Louis d'Argent*. Its members met at the tavern of the same name, kept by one Lebreton. On the nth of December of the same year a third lodge was instituted, under the title of *Arts Sainte Marguerite*. Its meetings were held at the house of an Englishman named Gaustand. Finally, on the 29th of November, 1732, a fourth lodge was founded, which was called *Buci*,⁴ from the name of the tavern in which it held its meetings, which was situated in the Rue de Buci, and was kept by one Laudelle. This lodge, after

¹ "Orthodoxie Maçonnique," p. 35.

² "Dictionnaire de la Conversation," art. Franc-Maçonnerie, vol. xxviii., p. 136.

³ "Grand Dictionnaire Universel du XIXme Siècle," par M. Pierre Larousse. Paris, 1872.

⁴ This is evidently a mistake of Rebold for Bussy.

having initiated the Duke d'Aumont, took the name of the Lodge *d'Aumont*.

"Lord Denventwater, who, in 1725, had received from the Grand Lodge of London plenary powers to constitute lodges in France, was, in 1735, invested by the same Grand Lodge with the functions of Provincial Grand Master. When he left France (in 1745) to return to England, where he soon after perished on the scaffold, a victim to his attachment for the House of Stuart, he transferred the full powers which he possessed to his friend Lord Harnouester, who was empowered to represent him as Provincial Grand Master during his absence.

"The four lodges then existing at Paris resolved to found a Provisional Grand Lodge of England, to which the lodges to be thereafter constituted in France might directly address themselves as the representative of the Grand Lodge at London. This resolution was put into effect after the departure of Lord Derwentwater. This Grand Lodge was regularly and legally constituted in 1736 under the Grand Mastership of Lord Harnouester."¹

Such is the story of the introduction of Speculative Freemasonry into France, which, first published by the astronomer Lalande, has been since repeated and believed by all French Masonic historians. That a portion of this story is true is without doubt; but it is equally doubtless that a portion of it is false. It will be a task of some difficulty, but an absolutely necessary one, to unravel the web and to distinguish and separate what is true from what is false.

The names of three of the four founders of the first lodge in Paris present a hitherto insurmountable obstacle in the way of any identification of them with historical personages of that period. The unfortunate propensity of French writers and printers to distort English names in spelling them, makes it impossible to trace the names of Lord Harnouester and M. Hugety to any probable source. I have made the most diligent researches on the subject, and have been unable to find either of them in any works relating to the events of the beginning of the 18th century, which have been within my reach.

Lord Derwent-Waters, as the title is printed, was undoubtedly Charles Radcliffe, the brother of James, the third Earl of Derwent-

¹ "Histoire des Trois Grandes Loges," par Em. Rebold, p. 44.

water, who had been beheaded in 1715 for his connection with the rebellion in that year, excited by the Old Pretender, or, as he styled himself, James III. Charles Radcliffe had also been convicted of complicity in the rebellion and sentenced to be beheaded. He, however, made his escape and fled to the continent. At first he repaired to Rome, where the Pretender then held his court, but afterward removed to France, where he married the widow of Lord Newburghe and remained in that city until the year 1733. He then went for a short time to England, where he appeared openly, but afterward returned to Paris and continued there until 1745. In that year the Young Pretender landed in Scotland and invaded England in the attempt, as Regent, to recover the throne of his ancestors and to place his father upon it.

Charles Radcliffe, who had assumed the title of the Earl of Derwentwater on the demise of his nephew, who died in 1731, sailed on November 21, 1745, for Montrose in Scotland, in the French privateer *Soleil*, for the purpose of joining the Pretender. He was accompanied by a large number of Irish, Scotch, and French officers and men. On the passage the privateer was captured by the English ship-of-war *Sheerness*, and carried, with its crew and passengers, to England.

On December 8th in the following year Radcliffe was beheaded, in pursuance of his former sentence, which had been suspended for thirty years.

Of Lord Harnouester, who is said by the French writers to have succeeded the titular Earl of Derwentwater as the second Grand Master, I have been unable to find a trace in any of the genealogical, heraldic, or historical works which I have consulted. The name is undoubtedly spelled wrongly, and might have been Arnester, Harnester, or Harnevester. The change made by the *Dictionnaire de la Conversation*, which converts it into "*d'Arnold-Ester*," only adds more confusion to that which was already abundantly founded.

Maskelyne is an English name. It was that of a family in Wiltshire, from which Nevil Maskelyne, the distinguished Astronomer Royal, born in 1734, was descended. But I am unable to identify the Chevalier Maskelyne, of the French writers, with any person of distinction or of notoriety at that period.

I am equally at a loss as to M. Hugetty, a name which has been

variously spelt as Heguetty and Heguely. The name does not, in either of these forms, indicate the nationality of the owner, and the probable transformation from the original forbids the hope of a successful investigation.

One fact alone appears to be certain, and fortunately that is of some importance in determining the genuineness of the history.

The titular Earl of Derwentwater was a Jacobite, devoted to the interests of the fallen family of Stuart, and the English, Irish, and Scotch residents of Paris, with whom he was on terms of intimacy, must have been Jacobites or adherents of the Stuarts also. The political jealousy of the British Government at that time made it unpleasantly suspicious for any loyal subject to maintain intimate relations with the Jacobites who were living in exile at Paris and elsewhere.

This fact will be an important element in determining the genuineness of the authority claimed to have been given to Lord Derwentwater by the Grand Lodge at London.

The German historians have generally borrowed their authority from the French writers, and on this occasion have not shown their usual thoroughness of investigation.

Lenning simply states that the first lodge of France was founded at Paris in 1725, and that it was soon followed by others.¹

Gadicke had previously said that Freemasonry was introduced into France from England and Scotland in the year 1660, but while it flourished in England it soon almost entirely disappeared in France. Afterward, in the year 1725, England again planted it in France, for in that year three Englishmen founded a lodge in Paris which was called the English Grand Lodge of France.²

Findel is a little more particular in his details, but affords us nothing new. He says that "it is impossible to determine with any certainty the period of the introduction of Freemasonry into France, as the accounts handed down to us are very contradictory, varying from the years 1721, 1725, 1727, to 1732. In an historical notice of the Grand Lodge of France, addressed to her subordinate lodges, there is a statement specifying that Lord Derwentwater, Squire Maskelyne, a lord of Heguerty and some other English noblemen, established a lodge in Paris in 1725, at Hure's Tavern. Lord Der-

¹ "Encyclopadie der Freimaureerei."

² "Freimaurer-Lexicon."

wentwater is supposed to have been the first who received a Warrant from the Grand Lodge of England. It is recorded that other lodges were established by these same authorities, and amongst others the Lodge *d'Aumont (au Louis a'Argent)* in 1729, in la Rue Bussy at Laudelle's tavern, the documents bearing the date of 1732 as that of their foundation."¹

Kloss, who has written a special work on the history of Freemasonry in France, supported as he says by reliable documents,² adopts the statements made originally by Lalande in the *Encyclopédie Méthodique*, and which were repeated by successive French writers.

So, on the whole, we get nothing more from the German historians than what we already had from the French.

We come next to the English writers, whose information must have been better than that of either the French or German, as they possessed a written history of the contemporary events of that period. Therefore it is that on them we are compelled to lean in any attempt to solve the riddle involved in the introduction of the Speculative institution into the neighboring kingdom. Still we are not to receive as incontestable all that has been said on this subject by the earlier English writers on Freemasonry. Their wonted remissness here, as well as elsewhere in respect to dates and authorities, leaves us, at last, to depend for a great part on rational conjecture and logical inferences.

Dr. Oliver, the most recent author to whom I shall refer, accepts the French narrative of the institution of a lodge at Paris in 1725, and adds that it existed "under the sanction of the Grand Lodge of England by virtue of a charter granted to Lord Derwentwater, Maskelyne, Higuetty and some other Englishmen."³

Elsewhere he asserts that the Freemasonry which was practiced in France between 1700 and 1725 was only by some English residents, without a charter or any formal warrant.⁴ In this opinion he is sustained by the Committee of the Grand Orient already alluded to, in whose report it is stated that "most impartial historians assert

¹ "Geschichte der Freimaurerei," Lyon's Translation, p. 200.

² "Geschichte der Freimaurerei in Frankreich, aus achten Urkunden dargestellt," von Georg Kloss. Darmstadt, 1852.

³ "Historical Landmarks," vol. ii., p. 32.

⁴ "Origin of the Royal Arch," p. 27.

that from 1720 to 1725 Freemasonry was clandestinely introduced into France by some English Masons."

The author of an article in the London *Freemasons Quarterly Review*,¹ under the title of "Freemasonry in Europe During the Past Century," says that "the settlement in France of the abdicated king of England, James II., in the Jesuitical Convent of Clermont, seems to have been the introduction of Freemasonry into Paris, and here it was (as far as we can trace) the first lodge in France was formed, anno 1725." The writer evidently connects in his mind the establishment of Freemasonry in France with the Jacobites or party of the Pretender who were then in exile in that kingdom, a supposed connection which will, hereafter, be worth our consideration.

Laurie (or rather Sir David Brewster, who wrote the book for him) has, in his *History of Freemasonry*, when referring to this subject, indulged in that spirit of romantic speculation which distinguishes the earlier portion of the work and makes it an extravagant admixture of history and fable.

He makes no allusion to the events of the year 1725, or to the lodge said to have been created by the titular Earl of Derwentwater, but thinks "it is almost certain that the French borrowed from the Scots the idea of their Masonic tribunal, as well as Freemasonry itself."² And he places the time of its introduction at "about the middle of the 16th century, during the minority of Queen Mary."³

After all that has hitherto been said about the origin of Speculative Freemasonry, it will not be necessary to waste time in the refutation of this untenable theory or of the fallacious argument by which it is sought to support it. It is enough to say that the author entirely confounds Operative and Speculative Freemasonry, and that he supposes that the French soldiers who were sent to the assistance of Scotland were initiated into the Scotch lodges of Operative Masons, and then brought the system back with them to France.

Preston passes the subject with but few words. He says that in 1732 Lord Montagu, who was then Grand Master, "granted a deputation for constituting a lodge at Valenciennes in French Flanders, and another for opening a new lodge at the Hôtel de Bussy, in Paris."⁴

¹ New Series, anno 1844, p. 156.

² "History of Freemasonry," p. 110.

³ *Ibid.*, p. 109.

⁴ "Illustrations," Jones's edition, p. 212.

The word "new" might be supposed to intimate that there was already an older lodge in Paris. But Preston nowhere makes any reference to the Derwentwater lodge of 1725, or to any other, except this of 1732. We learn nothing more of the origin of Freemasonry in France from this generally reliable author.

We now approach an earlier class of authorities, which, however, consists only of Dr. Anderson and the contemporary records of the Grand Lodge at London.

In 1738 Dr. Anderson published the second edition of the *Book of Constitutions*. In the body of the work, which contains a record, frequently very brief, of the proceedings of the Grand Lodge from 1717 to June, 1738, there is no mention of the constitution of a lodge at Paris, or in any other part of France.

In a "List of the lodges in and about London and Westminster," appended to the work,¹ he records that there was a "French lodge," which met at the "Swan Tavern" in Long Acre, and which received its warrant June 12, 1723. In the list its number is 18.

This fact is only important as showing that Frenchmen were at that early period taking an interest in the new society, and it may or may not be connected with the appearance, not long afterward, of a lodge at Paris.

In the list of "Deputations sent beyond Sea"² it is recorded that in 1732 Viscount Montagu, Grand Master, granted a Deputation for constituting a lodge at Valenciennes, in France, and another for constituting a lodge at the Hôtel de Bussy, in Paris.

According to the same authority, Lord Weymouth, Grand Master in 1735, granted a Deputation to the Duke of Richmond "to hold a lodge at his castle d'Aubigny, in France."³ He adds, referring to these and to other lodges instituted in different countries, that "all these foreign lodges are under the patronage of our Grand Master of England."⁴

This is all that Anderson says about the introduction of Freemasonry into France. It will be remarked that he makes no mention of a lodge constituted at Dunkirk in 1721, nor of the lodge in Paris instituted in 1725. His silence is significant.

Entick, who succeeded Anderson as editor of the *Book of Con-*

¹ "Constitutions," 2d edition, p. 186.

³ *Ibid.*, p. 195.

² *Ibid.*, p. 194.

⁴ *Ibid.*, p. 196.

stitutions, the third edition of which he published in 1756, says no more than his predecessor, of Freemasonry in France. In fact, he says less, for in his lists of "Deputations for Provincial Grand Masters,"¹ he omits those granted by Lords Montagu and Weymouth. But in a "List of Regular Lodges, according to their Seniority and Constitution, by order of the Grand Master,"² he inserts a lodge held at La Ville de Tonnerre, Rue des Boucheries, at Paris, constituted April 3, 1732, another at Valenciennes, in French Flanders, constituted in 1733, and a third at the Castle of Aubigny in France, constituted August 12, 1735. He thus confirms what Anderson had previously stated, but, like him, Entick is altogether silent in respect to the Dunkirk lodge of 1721, or that of Paris in

1725.

Northouck, who edited the fourth edition of the *Book of Constitutions*, appears to have been as ignorant as his predecessors of the existence of any lodge in France before the year 1732. From him, however, we gather two facts. The first of these is that in the year 1768 letters were received from the Grand Lodge of France expressing a desire to open a correspondence with the Grand Lodge of England. The overture was accepted, and a *Book of Constitutions*, a list of lodges, and a form of deputation were presented to the Grand Lodge of France.

The second fact is somewhat singular. Notwithstanding the recognized existence of a Grand Lodge of France it seems that in that very year there were lodges in that country which the Grand Lodge of England claimed as constituents, owing it their allegiance; for Northouck tells us that in 1768 two lodges in France, "having ceased to meet or neglected to conform to the laws of this society, were erased out of the list."

It may be that these were among the lodges which, in former times, had been created in France by the Grand Lodge of England, and that they had transferred their allegiance to the Grand Lodge of their own country, but had omitted to give due notice of the act to the Grand Lodge which had originally created them.

Our next source of information must be the engraved lists of lodges published, from 1723 to 1778, by authority of the Grand

¹ "Constitutions," by Entick, p. 333.

² *Ibid.*, p. 335. This list bears some resemblance to Cole's engraved list for 1756, but the two are not identical.

Lodge of England. Their history will be hereafter given. It is enough now to say, that being official documents, and taken for the most part from the Minute Book of the Grand Lodge, they are invested with historical authority.

The earliest of the engraved lists, that for 1723, contains the designations¹ of fifty-one lodges. All of them were situated in London and Westminster. There is no reference to any lodge in France.

The list for 1725 contains the titles of sixty-four lodges. The Society was extending in the kingdom, and the cities of Bath, Bristol, Norwich, Chichester, and Chester are recorded as places where lodges had been constituted. But no lodge is recorded as having been created in France.

In the list of lodges returned in 1730 (in number one hundred and two), which is contained in the Minute Book of the Grand Lodge,² a lodge is recorded as being at Madrid in Spain, the number 50 being attached, and the place of meeting the "French Arms," which would seem almost to imply, but not certainly, that most of its members were Frenchmen.³ Lodge No. 90 is said to be held at the "King's Head, Paris." This is the first mention in any of the lists of a lodge in Paris. The name of the tavern at which it was held is singular for a French city. But as it is said by Bro. Gould to be copied from "the Minute Book of the Grand Lodge," it must be considered as authoritative.

We next find an historical record of the institution of lodges in France by the Grand Lodge of England in Pine's engraved list for 1734.⁴ Bro. Hugan has said that the first historical constitution

¹ At that time lodges were not distinguished by names, but by the signs of the taverns at which they met, as the "King's Arms," the "Bull and Gate," etc.

² The list is given in Bro. Gould's "Four Old Lodges," p. 50.

³ This lodge met on Sunday, a custom still practiced by many French lodges, though never, as far as I know, by English or American lodges. Le Candeur, an old lodge of French members, in Charleston, S. C., which had its warrant originally from the Grand Orient of France, always met on Sunday, nor did it change the custom after uniting with the Grand Lodge of South Carolina.

⁴ A transcript of Pine's list for 1734, copied by Bro. Newton of Bolton from the original owned by Bro. Tunneh, Provincial Grand Secretary of East Lancashire. This transcript was presented by Bro. Newton to Bro. W. J. Hugan, who published it in the "Masonic Magazine" for November, 1876. He also republished it in pamphlet form, and to his kindness I am indebted for a copy. This list had been long missing from the archives of the Grand Lodge.

of a lodge at Paris is that referred to in Pine's list of 1734; but the lodge No. 90 at the "King's Head," recorded as has just been shown in the Grand Lodge list of 1730, seems to have escaped his attention.

Pine's list for 1734 contains the names of two lodges in France: No. 90 at the *Louis d'Argent*, in the Rue des Boucheries, at Paris, which was constituted on April 3, 1732, and No. 127 at Valenciennes in French Flanders, the date of whose Warrant of Constitution is not given.

In Pine's list for 1736 these lodges are again inserted, with a change as to the first, which still numbers as 90, is said to meet at the "Hotel de Bussy, Rue de Bussy." The sameness of the number and of the date of Constitution identify this lodge with the one named in the list for 1734, which met at the *Louis d'Argent*, in the Rue des Boucheries.

The list for 1736 contains a third lodge in France, recorded as No. 133, which met at "Castle Aubigny," and was constituted August 22, 1735.

In Pine's list for 1740 the three lodges in France are again recorded as before, one in Paris, one at Valenciennes, and one at Castle d'Aubigny,¹ but the first of them, formerly No. 90, is now said to meet as No. 78, at the *Ville de Tonnerre*, in the same Rue des Boucheries. This was apparently a change of name and number, and not of locality. It was the same lodge that had been first described as meeting as No. 90 at the *Louis d'Argent*.

In Benjamin Cole's list for 1756 the lodge's number is changed from 78 to 49, but under the same old warrant of April 3, 1732, it continues to meet at "*la Ville de Tonnerre*" in the Rue des Boucheries.

It is unnecessary to extend this investigation to subsequent lists or to those to be found in various works which have been mainly copied from the engraved lists of Pine and Cole. Enough has been cited to exhibit incontestable evidence of certain facts respecting the origin of Speculative Freemasonry in France. This evidence is incontestable, because it is derived from and based on the official records of the Grand Lodge of England.

¹The date of the Constitution of this lodge in the list for 1736 is August 22d. In the present and in subsequent lists the date is August 12th. The former date is undoubtedly a typographical error.

It was the custom of the Grand Lodge to issue annually an engraved list of the lodges under its jurisdiction. The first was printed by Eman Bowen in 1723; afterward the engraver was John Pine, who printed them from 1725 to 1741, and perhaps to 1743, as the lists for that and the preceding year are missing. The list for 1744 was printed by Eman Bowen; from 1745 to 1766 Benjamin Cole was the printer, who was followed by William Cole, until 1788, which is the date of the latest engraved list.

"The engraved lists," says Gould, "were renewed annually, certainly from 1738, and probably from the commencement of the series. Latterly, indeed, frequent editions were issued in a single year, which are not always found to harmonize with one another."¹

The want of harmony consisted principally in the change of numbers and in the omission of lodges. This arose from the erasures made in consequence of the discontinuance of lodges, or their failure to make returns. It is not to be supposed that in an official document, published by authority and for the information of the Craft, the name of any lodge would be inserted which did not exist at the time, or which had not existed at some previous time.

We can not, therefore, unless we might reject the authority of these official lists as authoritative documents, and thus cast a slur on the honesty of the Grand Lodge which issued them, refuse to accept them as giving a truthful statement of what lodges there were, at the time of their publication, in France, acting under warrants from the Grand Lodge at London.

Bro. Hughan asserts that the first historical record of the Constitution of a lodge at Paris is to be referred to the one mentioned in Pine's list for 1734, as having been held *au Louis d'Argent* in the Rue des Boucheries, and the date of whose Constitution is April 3, 1732.

It is true that Anderson's first mention of a deputation to constitute a lodge in Paris is that granted in 1732 by Viscount Montagu as Grand Master, and I presume that there is no earlier record in the Minutes of the Grand Lodge, for if there were, I am very sure that Bro. Hughan would have stated it.

But how are we to reconcile this view with the fact that in the list of lodges for 1730 a lodge is said to be in existence in that year

¹ "Four Old Lodges," p. 16.

in Paris? This list, as printed by Bro. Gould in his interesting work on the *Four Old Lodges*,¹ is now lying before me. It is taken from the earliest Minute Book of the Grand Lodge, and is thus headed, "List of the names of the Members of all the lodges as they were returned in the year 1730."

Now if this heading were absolutely correct, one could not avoid the inference that there was a "regular lodge" in Paris in the year 1730, two years before the Constitution of the lodge recorded in Pine's list for 1734, for among the lodges named in this 1730 list is "90. King's Head at Paris."

For a Parisian hotel, the name is unusual and therefore suspicious. But the list is authentic and authoritative, and the number agrees with that of the lodge referred to in the 1734 list as meeting at the *Louis d'Argent*, in the Rue des Boucheries.

Indeed, there can be no doubt that the lodge recorded in the list for 1730 is the same as that recorded in the list for 1734. The number is sufficient for identification.

Bro. Gould relieves us from the tangled maze into which this difference of dates had led us. He says of the list, which in his book is No. 11, and which he calls "List of lodges, 1730-32," that "this List seems to have been continued from 1730 to 1732."

The list comprises 102 lodges; the lodge No. 90, at the "King's Head, Paris," is the fifteenth from the end, and was, as we may fairly conclude, inserted in and upon the original list in 1732, after the lodge at the Rue des Boucheries had been constituted.

So that, notwithstanding the apparent statement that there was a regular lodge, that is, a lodge duly warranted by the London Grand Lodge in 1730, it is evident that Bro. Hughan is right in the conclusion at which he has arrived that the first lodge constituted by the Grand Lodge of England in Paris, was that known as No. 90, and which at the time of its constitution, on April 3, 1732, met at the Tavern called *Louis d'Argent*, in the Rue des Boucheries. Its number was subsequently changed to 78, and then to 49. It and the lodge at Valenciennes are both omitted in the list for 1770, and these were probably the two lodges in France recorded by Northouck as having been erased from the roll of the Grand Lodge of England in 1768. With their erasure passed away all jurisdiction

of the English Grand Lodge over any of the lodges in France. In the same year it entered into fraternal relations with the Grand Lodge of France. The lodge at Castle d'Aubigny is also omitted from the list of 1770, and if not erased, had probably voluntarily surrendered its warrant.

Thus we date the legal introduction of lodges into France at the year 1732. But it does not necessarily follow that Speculative Freemasonry on the English plan had not made its appearance there at an earlier period.

The history of the origin of Freemasonry in France, according to all French historians, from the astronomer Lalande to the most recent writers, is very different from that which it has been contended is the genuine one, according to the English records.

It has been shown, in a preceding part of this chapter, that the Abbé Robin said that Freemasonry had been traced in France as far back as 1720, and that it appeared to have been brought from England.

Rebold has been more definite in his account. His statement in substance is as follows, and although it has been already quoted I repeat it here, for the purpose of comment.

Speaking of the transformation of Freemasonry from a corporation of Operatives to a purely philosophic institution, which took place in London in 1717, he proceeds to say, that the first cities on the Continent where this changed system had been carried from London were Dunkirk and Mons, both in Flanders, but then forming a part of the kingdom of France. The lodge at Mons does not seem to have attracted the attention of subsequent writers, but Rebold says of it that "it was constituted by the Grand Lodge of England on June 4, 1721, under the name of *Parfaite Union*. It was, at a later period, erected into the English Grand Lodge of the Austrian Netherlands, and from 1730 constituted lodges of its own."¹

This narrative must be rejected as being unsupported by the English records. There may have been, as I shall presently show, an irregular lodge at Mons, organized in 1721, but there is no proof that it had any legal connection with the Grand Lodge of England.

Of the lodge at Dunkirk, Rebold says that it assumed the name

¹ See "Histoire des Trois Grandes Loges," p. 43.

of *Amitié et Fraternité*, and that in 1756 it was reconstituted by the Grand Lodge of France. Of the constitution of this lodge by the Grand Lodge at London, in 1721, we have no more proof than we have of the Constitution of that at Mons, and yet it has been accepted as a fact by Dr. Oliver and some other English authors. Rebold, however, is the only French historian who positively recognizes its existence.

He then tells us the story as it has been quoted on a preceding page of the foundation of the lodge of St. Thomas in 1725 at Paris by Lord Derwentwater and two other Englishmen, and of its constitution by the Grand Lodge at London on June 12, 1726.

Now the fact is, that while we are compelled to reject the statement that the Grand Lodge at London had constituted this lodge in the Rue des Boucheries in 1726, because we have distinct testimony in the records of the Grand Lodge that it was not constituted until 1732, yet we find it equally difficult to repudiate the concurrent authority of all the French historians that there was in 1725 a lodge in the city of Paris, established by Englishmen, who were all apparently Jacobites or adherents of the exiled family of Stuart.

Paris at that time was the favorite resort of English subjects who were disloyal to the Hanoverian dynasty, which was then reigning, as they believed, by usurpation in their native country.

Clavel tells us that one Hurre or Hure was an English tavern-keeper, and that his tavern was situated in the Rue des Boucheries. It is natural to suppose that his house was the resort of his exiled countrymen. That Charles Radcliffe and his friends were among his guests would be a strong indication that he was also a Jacobite.

Radcliffe, himself, could not have been initiated into the new system of Speculative Freemasonry in London, because he had made his escape from England two years before the organization of the Grand Lodge. But there might have been, among the frequenters of Hure's tavern, certain Freemasons who had been Theoretic members of some of the old Operative lodges, or even taken a share in the organization of the new Speculative system.

There was nothing to prevent these Theoretic Freemasons from opening a lodge according to the old system, which did not require a Warrant of Constitution. The Grand Lodge which had been organized in 1717 did not claim any jurisdiction beyond London and its precincts, and there were at that time and long afterward

many lodges in England which paid no allegiance to the Grand Lodge and continued to work under the old Operative regulations.

It can not be denied that the Grand Lodge which was established in 1717 did not expect to extend its jurisdiction or to enforce its regulations beyond the city of London and its suburbs. This is evident from a statute enacted November 25, 1723, when it was "agreed that no new lodge in or near London, without it be regularly constituted, be countenanced by the Grand Lodge nor the Master or Wardens admitted to Grand Lodge."¹

Gould, who quotes this passage, says: "It admits of little doubt, that in its inception, the Grand Lodge of England was intended merely as a governing body for the Masons of the Metropolis."² Even as late as 1735 complaint was made of the existence of irregular lodges not working by the authority or dispensation of the Grand Master.³

What was there then to prevent the creation of such a lodge in Paris by English Freemasons who had left their country? A lodge would not only be, as Anderson has called it, "a safe and pleasant relaxation from intense study or the hurry of business," but it would be to these exiles for a common cause a center of union. Politics and party, which were forbidden topics in an English lodge at home, would here constitute important factors in the first selection of members.

It was in fact a lodge of Jacobites. These men paid no respect to acts of attainder, and to them Charles Radcliffe, as the heir presumptive to the title of Earl of Derwentwater, was a prominent personage, and he was, therefore, chosen as the head of the new lodge.⁴

The tavern in which they met was kept by Hure or Hurre, or some name like it, who, according to the statement of Clavel and others, was an Englishman. His house very naturally became the resort of his countrymen in Paris. As it was also the *locale* of the Jacobite lodge, it may be safely presumed that Hure was himself a

¹ From the Grand Lodge Minutes.

² "The Four Old Lodges," p. 19.

³ See New Regulations in Anderson, 2d edition, p. 156.

⁴ The French writers and the English who have followed them are all wrong in saying that Lord Derwentwater was Master of the lodge in 1725. At that time Lord Derwentwater, the only son of the decapitated Earl, was a youth. On his death in 1731, without issue, his uncle, Charles Radcliffe, as next heir assumed the title, though, of course, it was not recognized by the English law.

Jacobite. Thus it came to pass that to signify that his hostelry was an English one, he adopted an English sign, and to show that he was friendly to the cause of the Stuarts he made that sign the "King's Head," meaning, of course, not the head of George I., who in 1725 was the lawful King of England, but of James III., whom the Jacobites claimed to be the rightful king, and who had been recognized as such by the French monarch and the French people.

Thus it happens that we find, in the engraved list for 1730, the record that Lodge No. 90 was held at the "King's Head, in Paris."

It may be said that all this is mere inference. But it must be remembered that the carelessness or reticence of our early Masonic historians compels us, in a large number of instances, to infer certain facts which they have not recorded from others which they have. And if we pursue the true logical method, and show the absolutely necessary and consequent connection of the one with the other, our deduction will fall very little short of a demonstration.

Thus, we know, from documentary evidence, that in a list of "regular lodges" begun in 1730, and apparently continued until 1732, there was a lodge held in Paris at a tavern whose sign was the "King's Head," and whose number was 90. We know from the same kind of evidence that in 1732 there was a lodge bearing the same number and held in the Rue des Boucheries.

All the French historians tell us that a lodge was instituted in that street in 1725, at a tavern kept by an Englishman, the founders of which were Englishmen. The leader we know was a Jacobite, and we may fairly conclude that his companions were of the same political complexion.

Now we need not accept as true all the incidents connected with this lodge which are stated by the French writers, such as the statement of Rebold that it was constituted by the Grand Lodge of England in 1726. But unless we are ready to charge all of these historians, from Lalande in 1786 onward to the present day, with historical falsehood, we are compelled to admit the naked fact, that there was an English lodge in Paris in 1725. There is no evidence that this lodge was at that date or very soon afterward constituted by the Grand Lodge at London, and, therefore, I conclude, as a just inference, that it was established as all lodges previous to the year 1717 had been established in London, and for many years afterward in other places by the spontaneous action of its founders. It

derived its authority to meet and "make Masons," as did the four primitive Lodges which united in forming the Grand Lodge at London in 1717, from the "immemorial usage" of the Craft.

As to the two lodges which are said to have been established in 1721 at Dunkirk and at Mons, the French generally concur in the assertion of their existence. Ragon alone, by his silence, seems to refuse or to withhold his assent.

There is, however, nothing of impossibility in the fact, if we suppose that these two lodges had been formed, like that of Paris, by Freemasons coming from England, who had availed themselves of the ancient privilege, and formed their lodges without a warrant and according to "immemorial usage."

What has been said of the original institution of the Paris lodge is equally applicable to these two.

It would appear that a Masonic spirit had arisen in French Flanders, where both these lodges were situated, which was not readily extinguished, but which led in 1733 to the Constitution by the English Grand Lodge of a lodge at Valenciennes, a middle point between the two, in the same part of France, and distant not more than thirty miles from Mons and about double that distance from Dunkirk.

Rebold says that the lodge at Dunkirk was re-constituted by the Grand Lodge of France in 1756, and he speaks as if he were leaning upon documentary authority. He also asserts that the lodge at Mons was, in 1730, erected into a Grand Lodge of the Australian Netherlands. He does not support this statement by any evidence, beyond his own assertion, and in the absence of proofs, we need not, when treating of the origin of Freemasonry in France, discuss the question of the organization of a Grand Lodge in another country.

Before closing this discussion, a few words may be necessary respecting the connection of the titular Earl of Derwentwater with the English lodge. A writer in the *London Freemason* of February 17, 1877, has said, when referring to the statement that the lodge at Hure's Tavern had received in the year 1726 a warrant from the Grand Lodge at London, "of this statement no evidence exists, and owing to the political questions of the day much doubt is thrown upon it, especially as to whether the English Grand Lodge would have given a Warrant to no Jacobites and to a person who was not Lord Derwentwater, according to English law."

But there was no political reason in 1726, certainly not in 1732, why a Warrant should not have been granted by the English Grand Lodge for a Lodge in Paris of which a leading Jacobite should be a member or even the head.

Toward Charles Radcliffe, who, when he was quite young, had been led into complicity with the rebellion of 1715 by the influence of his elder brother, the Earl of Derwentwater, and who had been sentenced to be beheaded therefor, the government was not vindictive.

It is even said by contemporary writers that if he had not prematurely made his escape from prison, he would have been pardoned. After his retirement to France, he remained at least inactive, married the widow of a loyal English nobleman, and in 1833, two years after he had assumed, when his nephew died without issue, the title of Earl of Derwentwater, he visited London and remained there for some time unmolested by the government. It was not until 1745 that he became obnoxious by taking a part in the ill-advised and unsuccessful invasion of England by the Young Pretender, and for this Radcliffe paid the penalty of his life.

The Grand Lodge at London had abjured all questions of partisan politics or of sectarian religion; some of its own members are supposed to have secretly entertained proclivities toward the exiled family of Stuarts, and there does not seem to be really any serious reason why a Warrant should not have been granted to a lodge in Paris, though many of its members may have been Jacobites.

I do not, however, believe that a warrant of constitution was granted by the Grand Lodge of England to the lodge at Paris in 1726. The French historians have only mistaken the date, and confounded the year 1726 with the year 1732. Both Thory and Ragon tell us that the lodge has left no historical monument of its existence, and that thus much obscurity has been cast over the earliest labors of Freemasonry in Paris.¹

One more point in this history requires a notice and an explanation.

Rebold says that in the year 1732 there were four lodges at Paris: 1. The lodge of *St. Thomas*, founded in 1725 by Lord Derwentwater and held at Hure's Tavern. 2. A lodge established

¹ Thory, in the "Histoire de la Fondation de Grand Orient of France," p. 20, and Ragon in the "Acta Latomorum," p. 22.

in May, 1729, by the same Englishmen who had founded the first, and which met at the *Louis d'Argent*, a tavern kept by one Lebreton. 3. A lodge constituted in December of the same year under the name of *Arts-Sainte Marguerite*.¹ Its meetings were held at the house of one Gaustand, an Englishman. 4. A lodge established in November, 1732, called *de Buci*, from the name of the tavern kept by one Laudelle in the Rue de Buci. This lodge afterward took the name of the Lodge *d'Aumont*, when the Duke of Aumont had been initiated in it.

It will not be difficult to reduce these four lodges to two by the assistance of the English lists. The first lodge, which was founded by Radcliffe, improperly called Lord Derwentwater, is undoubtedly the same as that mentioned in the 1730 list under the designation of No. 90 at the "King's Head." Rebold, Clavel, and the other French authorities tell us that it was held in the Rue des Boucheries

Now the list for 1734 gives us the same No. 90, as designating a lodge which met in the same street but at the sign of the *Louis d'Argent*. This was undoubtedly the same lodge which had formerly met at the "King's Head." The tavern may have been changed, but I think it more likely that the change was only in the sign, made by the new proprietor, for Hure, it seems, had given way to Lebreton, who might have been less of a Jacobite than his predecessor, or no Jacobite at all, and might have therefore discarded the head of the putative king, James. The first and second in this list of Rebold's were evidently to be applied to the same lodge.

The fourth lodge was held at the Hotel *de Buci*. Here, again, Rebold is wrong in his orthography, He should have spelt it Bussy. There was then a lodge held in the year 1732 at the Hôtel de Bussy. Now Anderson tells us, in his second edition, that Viscount Montagu granted a deputation "for constituting a lodge at the Hôtel de Bussy in Paris." But the lists for 1732, 1734, 1740, and 1756 give only one Parisian lodge which was constituted on April 3, 1732, and they always assign the same locality in the Rue des Boucheries, but change the number, making, however, the change from 90 to 78, and then to 49, and change also the sign, from the "King's Head" in 1732 to the *Louis d'Argent* in 1734, and to the *Ville de Tonnerre* in 1740 and 1756.

¹ Clavel ("Histoire Pittoresque," p. 108) calls it A Sainte Marguerite, which is probably the correct name. The Arts in Rebold may be viewed as a typographical error.

But it is important to remark that while the Engraved List for 1734 says that No. 90 met at the *Louis d'Argent* in the Rue de Boucheries, the list for 1736 says that No. 90 met at the Hôtel de Bussy, in the Rue de Bussy, and each of these lists gives the same date of constitution, namely, April 3, 1732.

I am constrained, therefore, to believe that the lodge at the Hôtel de Bussy was the same as the one held first at Hure's Tavern in 1725 as an independent lodge and which, in 1732, was legally constituted by the Grand Lodge of England, and which afterward met either at the same tavern with a change of sign or at three different taverns.

The first, second, and fourth lodges mentioned by Rebold, therefore, are resolved into one lodge, the only one which the English records say was legally constituted by the deputation granted in 1732 by Lord Montagu.

As to the third lodge on Rebold's list, which he calls *Arts-Sainte Margiterite*, but which Clavel more correctly styles *A Sainte Marguerite*, there is no reference to it, either in the English engraved lists or in the *Book of Constitutions*. It is said to have been founded at the close of the year 1729 and to have held its meetings at the house or tavern of an Englishman named Gaustand.

I can not deny its existence in the face of the positive assertions of the French historians. I prefer to believe that it was an offshoot of the lodge instituted in 1725 at Hure's, that that lodge had so increased in numbers as to well afford to send off a colony, and that, like its predecessor, the lodge *A Sainte Marguerite* had been formed independently and under the sanction of "immemorial usage."

Hence, I think it is demonstrated that between the years 1725 and 1732 there were but two lodges in Paris and not four, as some of the French writers have asserted. Bro. Hughan is inclined to hold the same opinion, and the writer in the *London Freemason*, who has previously been referred to, says that he thinks it "just possible." The possibility is, I imagine, now resolved into something more than a probability.

Having thus reconciled, as I trust I have, the doubts and contradictions which have hitherto given so fabulous a character to the history of the introduction of Speculative Freemasonry into France, I venture to present the following narrative as a consistent and

truthful account of the introduction of the English system of Speculative Freemasonry into France. It is divested of every feature of romance and is rendered authentic, partly by official documents of unquestionable character and partly by strictly logical conclusions, which can not fairly be refuted.

It was not very long after the foundation of purely Speculative Freemasonry in London by the disseverance of the Theoretic Masons from their Operative associates and the establishment of a Grand Lodge, that a similar system was attempted to be introduced into the neighboring kingdom of France.

Freemasons coming from England, either members of some of the old Operative lodges or who had taken a part in the organization of the London Grand Lodge, having passed over into France, founded in the year 1721 two independent lodges which adopted the characteristics of the new Speculative system, so far as it had then been completed, but claimed the right, according to the ancient usage of Operative Freemasons, to form lodges spontaneously without the authority of a Warrant of Constitution.

These lodges were situated respectively at Dunkirk and at Mons, two cities in French Flanders, and which were at that time within the territory of the French Empire.

Four years after, namely, in 1725, a similar lodge was founded in Paris, at the sign of the "King's Head," a tavern which was kept in the Rue des Boucheries by an Englishman named Hure or Hurre, or some other name approximating nearly to it. French historians inform us that the name of the lodge was *Si. Thomas*; but this name is not recognized in any of the English engraved lists. Then and for some time afterward English lodges were known only by the name or sign of the tavern where their meetings were held. But there is no reason for disbelieving the assertion of the French writers. The number and the place of meeting were the only necessary designations to be inserted in the Warrant when it was granted. Of the one hundred and twenty-eight lodges recorded in Pine's list for 1734, not one is otherwise designated than by its number and the sign of the tavern. So that the fact that the lodge is not marked in the English lists as "the Lodge of *Si. Thomas*" is no proof whatever that its founders did not bestow upon it that title.

The founders of this lodge were Charles Radcliffe, the younger brother of the former Earl of Derwentwater, whose title he six

years afterward assumed, and three other Englishmen, of whose previous or subsequent history we know nothing, but who are said by the French writers to have been Lord Harnouester, the Chevalier Maskelyne, and Mr. Heguetty.

These men were, it is supposed, Jacobites or adherents, passively at least, of the exiled family of Stuarts, represented at that time by the son of the late James II., and who was known in France and by his followers as James III. From this fact, and from the character of the tavern where they met, which was indicated by its sign, it is presumed that the lodge was originally formed as a resort for persons of those peculiar political sentiments. .

If so, it did not long retain that feature in its composition. The institution of Speculative Freemasonry became in Paris, as it had previously become in London, extremely popular. In a short time the lodge received from French and English residents of Paris an accession of members which amounted to several hundreds.

In December, 1729, another independent lodge was formed under the name of *A Sainte Marguerite*, which was held at the tavern of an Englishman named Gaustand. It was probably formed by members of the other lodge whose number had, from the popularity of the institution, become unwieldy. Of the subsequent career of this lodge we have no information. The records do not show that it was ever legally constituted by the Grand Lodge of England.

In 1732 Lord Montagu, the Grand Master of the Grand Lodge at London, granted a deputation for the Constitution of the original lodge in Paris, which was then holding its meetings at the Hôtel de Bussy, in the Rue de Bussy. It was accordingly constituted on April 3, 1732. But at the time of the Constitution it appears to have returned to its old locality, as it is recorded in the first part of the lists in which it is mentioned as meeting in the Rue des Boucheries at the "King's Head Tavern," and in the second list at the *Louis d'Argent*, which, as I have already said, I take to be the same house with a change of sign.

Thus the fact is established that the new system of Speculative Freemasonry was introduced into France from England, but not by authority of the English Grand Lodge, in the year 1721 by the founding of two independent lodges in French Flanders, and into Paris by the founding of a similar lodge in 1725.

In 1732 the Grand Lodge of London extended its jurisdiction

over the French territory and issued two deputations, one for the constitution of the lodge in Paris, and the other for the constitution of a lodge in French Flanders at the city of Valenciennes.

The former was constituted in 1732, in the month of April, and the latter in the following year.

The further action of the English Grand Lodge in the constitution of other lodges, and the future history of the institution which resulted in the formation of a Grand Lodge in France, must be reserved for consideration in a future chapter.

CHAPTER XXXIX

THE GRAND LODGE OF ALL ENGLAND, OR THE GRAND LODGE OF YORK

HE pretension, so stoutly maintained by many Freemasons who have not thoroughly investigated the subject, that there was a General Assembly of Masons held, and a Grand Lodge established, at the city of York in the year 926, by Prince Edwin, the brother of King Athelstan, is a tradition derived from the old *Legend of the Craft*. As such it has already been freely discussed in the preceding division of this work, and will not be further considered at this time.

The object of the present chapter will be to inquire into the time when, and the circumstances under which, the modern Theoretic Freemasons of York separated from the Operative association and, following the example of their antecessors in London, established a purely Speculative society to which they, too, gave the name of a Grand Lodge.

To distinguish it from the Grand Lodge which had been established eight years before in London, they applied to that body the title of the "Grand Lodge of England," while in a somewhat arrogant spirit they assumed for themselves the more imposing title of the "Grand Lodge of all England," epithets which were first employed by Drake in his speech at York in 1726.¹

¹ There is not the slightest evidence that the Grand Lodge in London ever accepted this distinction of titles, involving, as it did, an acknowledgment of the supremacy of its rival. Neither Anderson, Entick, nor Northouck have used in their successive editions of the "Book of Constitutions" these epithets. In these editions the body in London is always called simply "the Grand Lodge." It is not until 1775 that we meet with a more distinctive name. In the Latin inscription on the corner-stone of the Freemasons' Hall, which was laid in that year, Lord Petre is designated as "Summus Latomorum Angliæ Magister," or chief Master of Masons of England, while the Grand Lodge is called "Summus Angliæ Conventus," or Chief Assembly of England.

This distinction was suggested by the ecclesiastical usage of the kingdom, which, dividing the government of the church between two Archbishops, calls the Archbishop of York the "Primate of England," while his brother, the Archbishop of Canterbury, of somewhat more elevated rank and more extensive jurisdiction, is dignified as the "Primate of All England."

Angliæ and *totius Angliæ* are the distinctions between the two Archbishops, and so, also, they became the distinctions between the two Grand Lodges.

Operative Freemasonry was established with great vigor and maintained with strict discipline at York during the building of the Cathedral in the 14th century. Of this fact we have the most undoubted evidence in the *Fabric Rolls of York Minster*, which were published several years ago by the "Surtees Society."¹

These "Rolls," extending from 1350 to 1639, were made up during the progress of the work. They consist of accounts of contracts at different periods and regulations adopted from time to time for the government of the workmen. A fragment remaining of one of the Rolls, with the date of 1350, records that the Masons and the Carpenters who at that time were employed on the building were respectively under the control of William de Hoton, as the Master Mason, and Philip de Lincoln as the Master Carpenter. As Bro. Hughan very correctly remarks, "Without doubt the Master Mason thus referred to was simply the chief among the Masons, the others being Apprentices and Craftsmen."

One of the Rolls contains a code of rules which had been agreed upon in 1370. It is entitled *Ordinacio Cementariorum*. This is interesting, as it shows what was the internal government of the Craft at that period.

These regulations were made by the Chapter of the Church of St. Peter's at York, under whose direction the Minster was being built. They did not emanate from any General Assembly or Grand Lodge, nor even from a private lodge, but were derived from the ecclesiastical authority with which in that age Freemasonry was

¹The existence of these Rolls was discovered by Mr. John Browne, who based upon them his "History of the Metropolitan Church of St. Peter, York." They were printed at Durham in 1859 by the Surtees Society, and edited by Mr. James Raine, Jr., the Secretary of the Society, who has enriched the work with valuable notes, an Appendix, and a Glossary.

closely connected. Whether these Masons were acquainted with the old manuscripts which Anderson called the Gothic Constitutions it is impossible to say. We have no copies of any which date before the end of the 15th century, except the Halliwell MS., and the date of that is supposed to be 1390, which is twenty years after the adoption of the regulations by the Chapter of the Cathedral for the government of the Freemasons of York.

It is, however, almost, if not absolutely, demonstrable that the Halliwell MS. is a copy and a combination of two distinct poems, and it is, therefore, not unlikely that the York Masons, as a guild, were familiar with and even governed by its "points and articles."

The rules preserved in the Fabric Rolls were only intended for the direction of the Masons in their hours of labor and of refreshment, and contain no *Legend of the Craft*. A faithful copy of the *Ordinacio Cementariorum*, or Constitution of the Masons, translated into modern and more intelligible English,¹ will be interesting and useful as showing the guild organization of the Craft at York in the 14th century. This *Ordinacio* runs as follows: "It is ordained by the Chapter of the Church of Saint Peter of York that all the masons that shall work in the works of the same Church of Saint Peter shall, from Michaelmas day to the first Sunday of Lent, be each day in the morning at their work in the lodge, which is provided for the masons at work within the enclosure at the side of the aforesaid church,² at as early an hour as they can clearly see by daylight to work; and they shall stand there faithfully working at their work all day after, as long as they can clearly see to work, if it be an all work day; otherwise until high noon is struck by the clock, when a holiday falls at noon, except within the aforesaid time between Michaelmas and Lent; and at all other times of the year they may dine before noon if they will, and also eat at noon where they like, so that they shall not remain from their work in the aforesaid lodge, at no time of the year, at dinner time more than so short a

¹The earlier Rolls are written in the Low Latin of the Middle Ages. The later ones from 1544 are in the vernacular tongue of the times. The one about to be quoted is in a northern dialect, and is, as Mr. Raine observes, remarkable on account of its language as well as its contents.

²This confirms the statement made in the "Parentalia" that the Traveling Freemasons, when about to commence the erection of a religious edifice, built huts, or, as they were called, "lodges," in the vicinity in which they resided for the sake of economy as well as convenience.

time that no reasonable man shall find fault with their remaining away; and in time of eating at noon they shall, at no time of the year, be absent from the lodges nor from their work aforesaid over the space of an hour; and after noon they may drink in the lodge, and for their drinking time, between Michaelmas and Lent, they shall not cease nor leave their work beyond the space of time that one can walk half a mile; and from the first Sunday of Lent until Michaelmas they shall be in the aforesaid lodge at their work at sunrise and remain there truly and carefully working upon the aforesaid work of the church, all day, until there shall be no more space than the time that one can walk a mile,¹ before sunset, if it be a work day, otherwise until the time of noon, as was said before; except that they shall, between the first Sunday of Lent and Michaelmas, dine and eat as beforesaid, after noon in the aforesaid lodge; nor shall they cease nor leave their work in sleeping time exceeding the time in which one can walk a mile, nor in drinking time after noon beyond the same time. And they shall not sleep after noon at any time except between Saint Eleannes and Lammas; and if any man remain away from the lodge and from the work aforesaid, or commit offence at any time of the year against this aforesaid ordinance, he shall be punished by an abatement of his wages, upon the inspection and judgment of the master mason; and all their times and hours shall be governed by a bell established therefor. It is also ordained that no mason shall be received at work on the work of the aforesaid church unless he be first tried for a week or more as to his good work; and if after this he is found competent for the work, he may be received by the common assent of the master and keepers of the work and of the master mason, and he must swear upon the book that he will truly and carefully, according to his power, without any kind of guile, treachery, or deceit, maintain and keep holy all the points of this aforesaid ordinance in all things that affect or may affect him, from the time that he is received in the aforesaid work, as long as he shall remain a hired mason at the work on the aforesaid work of the church of Saint Peter, and that he will not go away from that aforesaid work unless the masters give him per-

¹Time of a mileway. A common method at that period of computing time. "Way. The time in which a certain space can be passed over. Two mileway, the time in which two miles could be passed over, etc."—Halliwell, "Dictionary of Archaic and Provincial Words." We had "half a mileway" above.

mission to depart from the aforesaid work; and let him whosoever goes against this ordinance and breaks it against the will of the aforesaid chapter have God's malison and Saint Peter's."

We learn from this ordinance, and others of the same import contained in these *Fabric Rolls*, that the Masons who wrought at the building of the York Cathedral in the 14th century were an entirely Operative guild, like their brethren who, at about the same time, were engaged in the construction of the Cathedrals of Cologne and Strasburg.

They confirm the statement made in Wren's *Parentalia* that the lodge was a building contiguous to the edifice they were constructing, and that in it they not only worked, cutting and otherwise preparing the stones, but also ate and slept there. Over them there was a superintendent of their work who was called the Master Mason.

What were the duties of the *Magister Cementarius* or Master Mason may be learned from an indenture between the Chapter and William de Hoton in the year 1351, a copy of which will be found at page 166 of the *Fabric Rolls*.

While overlooking other works, which shows that he might have different contracts at the same time, he was not to neglect the work of the Minster. If he became affected with blindness or other incurable disease so that he should be unable to work, he was to employ and pay an assistant—*subcementarius*—who was to be the Second or Deputy Master of the Masons—*Magister Secundarius Cementariorum*.

He was to oversee the building and to receive a salary of ten pounds of silver annually, and to be furnished with a dwelling-house within the inclosure of the Cathedral.¹

But while the Master Mason had the direct supervision of the workmen, there was an officer above him who was called the *Mag-*

¹From the "Fabric Rolls" the following list of Master Masons, who superintended the work from its beginning to its close, has been obtained by Mr. Raine:

1351, William de Hoton and William de Hoton, junior, probably the son of the first; 1368, Robert de Patrington; 1399-1401, Hugh de Hedon; 1415, William Colchester; 1421, John Long; 1433, Thomas Pak; 1442-43, John Bowde; 1445-47, John Barton; 1456, John Porter; 1466, Robert Spyllesby; 1472, William Hyndeley; 1505, Christian Horner; 1526, John Forman. In the lists of workmen many names foreign to Yorkshire will be found, and the names of foreigners also occur, such as Begon Baious and James Dum.—Preface to "Fabric Rolls," xx.

ister Operis, or Master of the Work. This is shown by another agreement with Robert de Patrington in 1368, wherein it is said that his salary is to be paid to him "by the hands of the Master of the work of our said church"—*per manus Magistri operis dicta ecclesiæ nostræ*.

Now, this *Magistri Operis*, or Master of the Work, sometimes called the *Operarius*, was not a member of the body of Masons, but, according to Ducange, an officer in Monasteries and Chapters of Canons, whose duty it was to have charge over the public works.

When the Cathedral was finished, the occupation of these Operative Masons ceased. But there were other religious edifices in the province on which they were subsequently employed, so that there was a continuous existence of Operative lodges during the succeeding centuries.

While the Freemasons were working on the York Minster, other guilds of Freemasons, or, rather, branches of the same guild, were employed in the construction of other cathedrals in different parts of England.

Thus the Cathedral of Canterbury was repaired and greatly enlarged about the year 1174; that of Salisbury was begun in 1220 and finished in 1260; that of Ely was begun in 1235 and finished in 1252, and Westminster Abbey was begun in 1245 and finished in 1285.

If the *Fabric Rolls* of these edifices should hereafter be discovered, ample evidence will doubtless be furnished of the existence of a common guild of Freemasons everywhere in England, similar to that which we now know existed at York during the same period of time, namely from the middle of the 14th to the middle of the 16th century, which was precisely the age of our oldest manuscript Constitutions.

The history of Operative Freemasonry at York and in the north of England was about the same as it was in London and in the south of the kingdom. There were times when it flourished, and times when it began to decay.

In another respect there was a similarity in the character of the guilds of both localities.

The York Lodge, like the lodges of London, and indeed of every other country, at first consisting only of practical workmen, began in time to admit into its association men who were not craftsmen—

men of rank or wealth or influence, who became honorary members, and in the course of time gradually infused a Speculative element into the lodges.

There is really no historical evidence whatever that during the period in which the Freemasons were occupied in the construction of the Minster there was any other lodge than that which was connected with the works, and under the control of the Cathedral Chapter. It is, however, very presumable that from long continuance it had abandoned the nomadic character so common with the Traveling Freemasons of the Middle Ages, and had assumed a permanent form, and thus become the parent of that Lodge which we find existing in 1705 in the city of York.

Anderson asserts that the tradition was "firmly believed by the old English Masons," that on December 27, 1561,¹ Queen Elizabeth sent an armed force to break up the annual Grand Lodge that was then meeting at York.

"But Sir Thomas Sackville, Grand Master," says Anderson, "took care to make some of the chief Men sent Freemasons, who then joining to that communication made a very honorable report to the Queen, and she never more attempted to dislodge or disturb them."

This story has been repeated by Preston and by others after him; but as all of them give it on the mere authority of Anderson, and as no other evidence has ever been adduced of its truth, we shall be compelled to reject it as historical, and receive it only as Anderson has called it a "tradition." Were it true, it would settle the question that there was a Grand Lodge at York in active existence in the 16th century.

In the "Manifesto" of the Lodge of Antiquity in 1778, it is asserted that "in the year 1567 the increase of lodges in the south of England being so great . . . it was resolved that a person under the title of Grand Master for the south, should be appointed with the approbation of the Grand Lodge at York, to whom the whole Fraternity at large were bound to pay tribute and acknowledge subjection."

¹Bro. Woodford, in his very able article on "The Connection of York with the History of Freemasonry in England," appended to Bro. Hughan's "Unpublished Records of the Craft" (p. 170), seems to attribute the particularizing of this date to the unknown author of "Multa Paucis." But the fact is that this date is first mentioned by Dr. Anderson, in the 2d edition of the "Book of Constitutions," p. 81.

If this statement were authentic it would not only confirm the fact that there was a Grand Lodge of York in the 16th century, but also that it exercised a supremacy over all the lodges of the kingdom.

Unfortunately for the interests of history the "Manifesto" of the Lodge of Antiquity was written for a particular object, which renders it partisan in character and suspicious in authority. And since there is no other evidence that in 1567 there was a Grand Lodge at York, or that it then appointed a Grand Master for the south of England, we are forced to dismiss this narrative of the Lodge of Antiquity with the Sackville story to the realm of fable, or at least of unsupported tradition.

The theory of the existence of a lodge at the city of York at the beginning of the 17th century is founded on the fact that in the year 1777 there was in the possession of the Lodge of York a manuscript Constitution of the date 1630, which is presumed to have been written at the time for the lodge in that city.

Such is the implied reasoning of Bro. Woodford, and although not absolutely conclusive, it may be accepted as probable, especially as Bro. Hughan tells us that there is evidence that a lodge existed there in 1643.¹

But the authentic history of that Society of Freemasons which met in the city of York, really begins with the year 1706.²

In the Inventory of Regalia and Documents which were in the possession of the Grand Lodge of all England taken by a committee in 1779, and which inventory is still in possession of the Lodge at York, one of the articles is recorded as being "A narrow folio Manuscript Book, beginning 7th March 1705-6, containing sundry Accounts and Minutes relative to the Grand Lodge."

This manuscript is now unfortunately mislaid or lost, but the report of the committee is satisfactory evidence that it once existed, and hence we have a sufficient proof that there was a lodge in the year 1706 and very probably long before in the city of York.

¹ "London Masonic Magazine," vol. iii., p. 259.

² It has been usual to quote the date of the commencement of the Minute Book of old York Lodge as 1705. But in the original the date is "7th March 1705-6." But March 7, 1705, of the old style is, according to the new style, March 18, 1706. So also, some-writers speak of the first meeting of the four lodges in London as occurring in 1716, because Anderson's date is February, 1716-17. They should remember that February, 1716-17, means always 1717.

In a work entitled the *Stream of English Freemasonry*, by Dr. J. P. Bell, a list is inserted of Grand Masters, as the author calls them, from the year 1705. But as Bro. Hughan observes, the presiding officers were always styled Presidents or Masters until 1725, when the Grand Lodge was organized and the office of Grand Master adopted.

Now, between 1705 or 1706, when we get the first authentic records of the existence of a lodge of Freemasons in the city of York, until the year 1725, when it assumed the rank and title of a Grand Lodge, the condition of guild Masonry or Freemasonry appears, so far as we can judge from existing records, to have been in about the same condition as it was in London just before the establishment of a Grand Lodge in that city at nearly the same period, with this difference, that in London there were four lodges and in York only one.

We have seen that from a very early period the guild of Operative Freemasons had existed in independent lodges established near the cathedrals or other public buildings in the construction of which they were engaged. We have seen this system pursued at the building of the Cathedral of York, and the written Constitutions which governed them then and there are extant in the *Fabric Rolls* of the Minster which have been published by the Surtees Society.

At that time the lodges were purely operative in their character. Subsequently, as in Scotland and in the south of England, persons of distinction, who were not working Masons, were admitted among the Craft, and thus the system of Theoretic or Honorary Members of the lodge was established.

The result was the same here as it had been elsewhere. The Operative element gradually yielded to the Speculative, which at the beginning of the 18th century had become in York more completely dominant than it was in London at the same period.

The manuscript book of Minutes beginning in March, 1706, has been lost, but there is extant a Roll which begins March 19, 1712, or rather 1713, for it appears that there is the same confusion of styles. The next minutes according to Bro. Hughan are of June, August, and December, 1713, which clearly shows that the minutes for March are of the same year, unless we suppose that there was a lapse of more than a year in the meetings—a thing not at all supposable.

At the lodge in March several members were sworn and admitted by Geo. Bowes, Esq., Deputy President. The Master was at that time a Speculative Freemason. In December, 1713, a "Private Lodge" was held, at which, says Hughan, "gentlemen were again admitted members, and at which Sir Walter Hawksworth, Knight and Baronet, was the President."

A "General Lodge of the Honorable Society and Company of Freemasons," so ran the Minutes, was held on Christmas, 1716, by St. John's Lodge, when John Turner, Esq., was admitted to the Society. These Minutes are signed, "Charles Fairfax, Esq. Dep. Prest."

All of which prove that at that time the Freemasons of York knew nothing of a Grand Lodge or a Grand Master, and that there was, even then, much more of the Speculative than of the Operative element in the Society.

From 1713 to 1725 there appears to have been but one lodge in the city of York, which did not, however, assume the title of a Grand Lodge, but in its minutes is called a "Private Lodge," and on a few occasions a "General Lodge." The presiding officer was called the President, who was assisted by a Deputy President.

There were at that time in the north of England many purely Operative lodges, and these as well as the York Lodge, which was more Speculative than Operative in its character, paid little or no attention to the proceedings of the Speculative Masons in London.

They gave no adherence to the Grand Lodge established in 1717, and were for a long time averse to the newly invented system by which Operative Freemasonry was displaced by a purely Speculative organization.

Still there were no signs of dissension while they all, in their implicit belief in the *Legend of the Craft*, assigned to the city of York the honor of being the birthplace of English Freemasonry. The Mother Lodge, as it was supposed to be, beheld without opposition the organization of the Grand Lodge at London, nor did it resist the Constitution in 1724 by that body of a lodge at Stockton-upon-Tees, in the adjoining county of Durham, nor of another in 1729 at Scarborough, in the county of York.

The fact is, that from 1713 to 1725 the "Old Lodge at York," as Anderson calls it, appears to have exercised but little energy. From 1713 to 1716 it held, says Findel, but one or two yearly

meetings, and none at all from 1717 to 1721, and only three meetings in the following two years.¹

But the publication in 1723 of its *Book of Constitutions* by the Grand Lodge at London, appears to have awakened the Lodge of York into a new life.

For unless we suppose an improbable coincidence, it is very evident that some stimulus must have been applied to its energies, since in 1725 it met eleven and in 1726 thirteen times.²

The year 1725 was to the Lodge at York what the year 1717 had been to the four lodges of London. The same result was achieved, though the course adopted for attaining it was different.

The Grand Lodge at London had been formed by the union of four lodges, a method that has ever since been followed, except as to the precise number, in the organization of all modern Grand Lodges.

The Grand Lodge of York was established, if we can depend on the very meager details of history that have been preserved, by the simple change of title from that of a Private Lodge to that of a Grand Lodge. This change took place on December 27, 1725, when the Grand Lodge was formed by the election of Charles Bathurst as Grand Master with a Bro. Johnson as his Deputy, and Bros. Pawson and Francis Drake as Wardens. Brothers Scourfield and Inigo Russel were respectively the Treasurer and Clerk.³

The Grand Lodge now openly denied the superior authority of the body which had been established in London eight years before, and while it was content that that organization should be known as the "Grand Lodge of England," it assumed for itself the more pretentious title of the "Grand Lodge of all England."

In thus constituting itself a Grand Lodge by a mere change of title, and the assumption of more extensive prerogatives, the "Old Lodge at York" had asserted its belief in its own interpretation of the *Legend of the Craft*.

"You know," says Bro. Drake, its first Junior Grand Warden, "we can boast that the first Grand Lodge ever held in England was held in this city; where Edwin, the first Christian king of the Northumbers, about the sixth hundredth year after Christ, and who

¹ Findel, "History of Freemasonry," Lyon's Translation, p. 160.

² Findel, *ibid*.

³ Hughan, "History of Freemasonry in York," p. 57, and Findel, p. 61.

laid the foundation of our cathedral, sat as Grand Master. This is sufficient to make us dispute the superiority with the lodges at London. But as nought of that kind ought to be among so amicable a fraternity, we are content they enjoy the title of Grand Master of England; but the *Totius Angliæ* we claim as our undoubted right."

Francis Drake, the author of this passage, which is taken from a speech delivered by him before the Grand Lodge at its session of December 27, 1726, was an antiquary who is well known by a work in folio published by him in 1735 on the *History and Antiquities of the City of York*. He was in respect to Freemasonry the Desaguliers of the Northern Grand Lodge. To him it was indebted for its first establishment and for the defense of its right to the position it had assumed.

Though he had been initiated only a year before his advancement to the position of Grand Warden, he seems to have taken at once a great interest in the institution and to have cultivated its history.

He was the first to advance the theory that the Edwin who is said in the *Legend of the Craft* to have convoked the General Assembly at York, was not the brother of Athelstan, but the converted King of Northumbria, and that the date of the Convocation was not in the 10th, but in the 7th, century.

This theory is now accepted by a great number of Masonic historians as the most plausible interpretation of the Legend.

Drake also exhibited in his speech a very sensible idea of what was the true origin of Freemasonry. He traces it to a purely Operative source, an opinion which is the favorite one of the historians of the present day.

The Grand Lodge at York, thus constructed by a mere change of title, had, in reality, by that act acquired a more plausible claim to be called a "Revival" than the Grand Lodge at London. It assumed to be a resumption of its functions by a Grand Lodge which had always been in existence since the days of Edwin of Northumbria, and which had been dormant for only a few years.

If this theory were sound, most undoubtedly the establishment of the Grand Lodge in 1725 would have been a real revival. Unfortunately, the facts are wanting which could support such a theory. There is not the slightest evidence, except that which is leg-

endary, that there ever was a Grand Lodge or a Grand Master in the city of York until the year 1725.

The fact is that, according to the modern principles of Masonic jurisprudence, the Grand Lodge of all England, as it styled itself, was not legally constituted, unless it be admitted that it was a mere continuation or revival of a former Grand Lodge at the same place. But this fact has not been established by any historical proof. The Grand Lodge was, therefore, really only a "Mother Lodge."

This system, where a private lodge assumes the functions and exercises the prerogatives of a Grand Lodge, under the title of a "Mother Lodge," was first invented by the French innovators at a later period, and never has been acknowledged as a legal method of constitution in any English-speaking country.¹

Laurence Dermott² has asserted that to form a Grand Lodge it was necessary that the representatives of five lodges should be present. He had selected this number designedly to invalidate the Constitution of the Grand Lodge of England, which had been formed by four lodges. His authority on Masonic law is not considered as good, and now the principle appears to be settled by the constant usage of America, and by its recognition in Great Britain and Ireland, that the requisite number of constituent lodges shall be limited to not less than three.

Some idea of the kind seems to have prevailed at an early period among the Masons of the south of England, although it had not been formulated into a statute, for Anderson, in 1738, spoke of the body which had been established, not as the "Grand Lodge," but as "the old Lodge of York City."³

So much I have deemed it necessary to say as a curious point of history, but the question of the legal constitution of the Grand Lodge of York is no longer of any judicial importance, as it has long since ceased to exist, and the lodges which were constituted

¹This is the very epithet applied by Drake to the Grand Lodge in his celebrated speech. He calls it "the Mother Lodge of them all." See the extract from the speech farther on in this chapter.

Except in Scotland, where the Lodge of Kilwinning assumed the title of "Mother Lodge," and issued warrants for Daughter Lodges. But the act was never recognized as legal by the Grand Lodge of Scotland.

²"Ahiman Rezon," p. xiii.

³"Constitutions," 2d edition, p. 196.

by it were, on its dissolution, legitimately enrolled on the register of the Grand Lodge of England.

Besides the change from a Private Lodge to a Grand Lodge, which was made in 1725, others were adopted at the same time, which are worthy of notice.¹

In 1725 and afterward the meetings of the Grand Lodge, which heretofore had been held in private houses, were transferred to taverns, in which they followed the example of their southern brethren. The "Star Inn" and the "White Swan" are recorded in the minutes of the first places of meeting.

In the earlier minutes we find the Craft styling themselves "the Honourable Society and Company of Freemasons." In 1725 they adopted the designation of the "Worshipful and Ancient Society of Free and Accepted Masons." The adoption of the word "Accepted" assimilated the Freemasons of York to those of London, from whose *Book of Constitutions* the former evidently borrowed it.

The minutes after 1725 record the initiation of "gentlemen," and the speech of Junior Warden Drake at the celebration in 1726 refers to three classes, the "working Masons," those who "are of other trades and occupations," and "gentlemen."

But there are many proofs in the records of the lodge that the second and third classes predominated, and that the Grand Lodge of York was earnestly striving, by the admission of non-Masons as members, to eliminate the Operative element, and, like its predecessor at London, to assume an entirely Speculative character.

It does not appear that at York there was that opposition to the change which had existed at London, where the Speculative element did not gain the control of the Society until six years after the organization in 1717. The Lodge at York had begun to prepare for the change twelve years before it assumed the rank of a Grand Lodge, for, in 1713, at a meeting held at Bradford, eighteen "gentlemen" were admitted into the Society.

¹ Findel and Hughan both visited the city of York at different periods and made a personal inspection of the lodge records. It is to the "History of Freemasonry," by the former, and to the "History of Freemasonry in York," by the latter, that I am indebted for many of my facts. Preston, though furnishing abundant details, is neither accurate nor impartial, and Anderson and his successors, Entick and Northouck, supply scarcely any information. Some intimation of the character of the Grand Lodge at the time of its establishment may be derived from the speech by Bro. Drake in 1726.

From the records we learn also that the "Regulations" adopted by the Grand Lodge at London were adopted for the government of the body at York. Indeed, it is very probable that the publication of these "Regulations" in 1723 had precipitated the design of the York Freemasons to organize their Grand Lodge.

There is no doubt that in the general details of their new system they followed the "Regulations" of 1723. The titles of the presiding officers were changed in accordance with the London system from President and Deputy President to Grand Master and Deputy Grand Master, and it is supposable that other changes were made to conform to the new "Regulations."

Indeed, Anderson expressly states that the lodge at York had "the same Constitutions, Charges, Regulations, etc., for substance as their Brethren of England," that is, of London.

But, in addition to the London "Regulations," the lodge at York had another set of rules for its government, which are still extant in the archives of the present York Lodge. They are contained on a sheet of parchment which is indorsed, "Old Rules of the Grand Lodge at York, 1725, No. 8."

These rules are said by both Findel and Hughan to have been adopted in 1725 by the new Grand Lodge. This is probable, because they are signed by "Ed. Bell, Master," who is recorded as having been the Grand Master in 1725; and they are subsequently referred to in the minutes of July 6, 1726, with the title of the "Constitutions."

But I think it equally probable that they were originally the rules which were made for the regulation of the lodge long before it assumed the rank and title of a Grand Lodge.

As the Constitution of a Grand Lodge, these rules are in remarkable contrast with the "Regulations" which were compiled by Payne for the use of the Grand Lodge at London and were published in the first edition of the *Book of Constitutions*.

They are nineteen in number, and with the exception of a single article—the eighth—they have the form of a set of rules for the regulation of a social and drinking club rather than that of a code of laws carefully prepared for the inauguration of a great moral and philosophical institution such as Speculative Freemasonry soon became, and such as it was evidently the design of Desaguliers, Payne, and Anderson to make it.

But even as the rules of a mere club they are interesting, inasmuch as they make us acquainted, by an official authority, with the condition of Speculative Freemasonry at York, and with the social usages of the Craft there, in the second and third decades of the 18th century.

As they have been published in full only by Bro. Hughan in his *History of Freemasonry in York*, a most valuable work but of which both the English and American editions were unfortunately too limited in the number of copies to make it generally accessible, I have, therefore, thought that it would not be unacceptable to the reader to find them reprinted here. A few marginal annotations have been added which are partly intended to prove the truth of the opinion that the rules were not framed in 1725 after the Grand Lodge had been established, but had been previously used for the government of the private lodge, and were only continued in force by the Grand Lodge.

*Rules Agreed to be Kept and Observed by the Ancient Society of Freemasons in the City of York, and to be Subscribed by Every Member Thereof at Their Admittance Into the Said Society.*¹

Imprimis. 1. That every first Wednesday in the month a lodge shall be held, at the house of a Brother according as their turn shall fallout.²

2. All subscribers to these articles, not appearing at the Monthly lodge, shall forfeit sixpence each time.

3. If any Brother appear at a lodge that is not a subscriber to these articles, he shall pay over and above his club the sum of one shilling.³

¹ It will be remarked that the title "Ancient Society of Free and Accepted Masons" which was adopted by the Grand Lodge is not here used, but the "Ancient Society of Freemasons," which was the form employed by the "Private Lodge" in all the minutes prior to 1725. This is a very strong proof that the Rules were not framed after the Grand Lodge had been organized.

² Monthly meetings at the houses of different members in turn though appropriate enough for a private lodge, would scarcely have been adopted as a regulation by a Grand Lodge. In this article we clearly see what was the usage of the old lodge before it promoted itself to a higher rank.

³ This article was evidently designed not for a Grand Lodge, but for the private lodge pursuing the social usages of a club. Freemasons who were not members of it might appear as visitors, but every visitor in addition to his "club," or share of the expenses of the evening which were equally distributed among all, was required to pay an additional shilling for the privilege of the visit.

4. The Bowl shall be filled at the monthly lodges with Punch once, Ale, Bread, Cheese and Tobacco in common, but if anything more shall be called for by any brother, either for eating or drinking, that Brother so calling shall pay for it, himself, besides his club.¹

5. The Master or Deputy shall be obliged to call for a Bill exactly at ten o'clock, if they meet in the evening and discharge it.²

6. None to be admitted to the Making of a Brother but such as have subscribed to these articles.³

7. Timely notice shall be given to all the Subscribers when a Brother or Brothers are to be made.

8. Any Brother or Brothers presuming to call a lodge with a design to make a Mason or Masons, without the Master or Deputy, or one of them deputed, for every such offense shall forfeit Five Pounds.⁴

9. Any Brother that shall interrupt the Examination of a Brother shall forfeit one shilling.

¹ This article must satisfy us that the "Old Lodge at York" had adopted the usages of the age, and while it cultivated Masonry from its ancient associations, it, like other societies of that period in England, indulged its members with the rational enjoyment of moderate refreshment, but strictly provided, by regulation, against all excess. The bowl was to be filled with punch only once. Other lodges elsewhere had similar regulations; they formed a part of the lodge organization in the beginning of the last century, when almost all associations assumed the form of clubs. But this very fact warrants us in believing that the rule was made for the government of the lodge, before it declared itself to be a Grand Lodge.

² The calling for the bill and the settlement of the expenses of the night's meeting is a rule that was universally adopted by all clubs. But mark the use of the word "Master" instead of "Grand Master." If these rules had been framed by the Grand Lodge in 1725, we may suppose that the latter title would have been employed.

³ The "making" of Masons is no part of the business of a Grand Lodge. The London "Regulations," it is true, for a short time prescribed that Fellow-Crafts and Master Masons should be made in the Grand Lodge, but the "making of Masons," that is, the initiation of candidates into the Society, was always done in a particular or subordinate lodge. The Grand Lodge of York having, when it was established, no constituents, since it was formed by a self-transmutation from a lodge to a Grand Lodge, must, of course, have continued to initiate or make brothers. But the rule most probably was made when the lodge was in its primary condition.

⁴ We must not suppose that "to call a lodge" denoted to hold a new lodge without warrant. If that were the meaning, the rule must have been enacted by a Grand Lodge. But the true meaning was that no brothers should call a meeting of the lodge without the consent of the Master. This is strictly a lodge rule. And here again we mark that the authority for calling was to come, not from the Grand Master of the Grand Lodge, but from the Master of the lodge.

10. Clerk's Salary for keeping the Books and Accounts shall be one shilling, to be paid him by each Brother at his admittance, and at each of the two Grand days he shall receive such gratuity as the Company shall think proper.

11. A Steward to be chose for keeping the Stock at the Grand Lodge, at Christmas and the Accounts to be passed three days after each lodge.¹

12. If any dispute shall arise, the Master shall silence them by a knock of the Mallet; any Brother that shall presume to disobey, shall immediately be obliged to leave the Company or forfeit five shillings.²

13. A Hour shall be set apart to talk Masonry.³

14. No person shall be admitted into the lodge but after having been strictly examined.⁴

15. No more persons shall be admitted as Brothers of this Society that shall keep a Public House.⁵

16. That these articles shall at lodges be laid upon the Table, to be perused by the Members, and also when any new Brothers are made, the clerk shall publicly read them.

17. Every new Brother, at his admittance, shall pay to the Waits,⁶ as their Salary, the sum of two Shillings, the money to be

¹ In the whole of the nineteen rules this is the only one in which we find the title "Grand Lodge." The epithet "Grand," or perhaps the entire article was inserted, it is to be supposed, when the rules of the Old Lodge were adopted, confirmed or continued by it, when it became a self-constituted Grand Lodge. It was necessary to appoint a Treasurer, here called a Steward, to take charge of the stock or fund of the Grand Lodge and to account for all expenditures. I am inclined to believe that the rule, like the other eighteen, was originally framed by the lodge, but on account of the financial importance of the subject made more specific when it was adopted by the Grand Lodge, so as to define precisely what fund it was, that had been entrusted to the Steward.

² Note again the use of "Master" and not "Grand Master."

³ "But one half-pennyworth of bread to this intolerable deal of sack!" An hour "to talk Masonry," once a month! Still, thankful for small favors, we recognize in this Article the connection of the club with the ancient Craft.

⁴ That visitors were required to submit to an examination proves that the ritual practiced by the lodge at York was the same as that in common use by the Craft elsewhere. Otherwise there could be no satisfactory examination of visiting strangers.

⁵ This was a very general and necessary rule with the clubs of the 18th century. As they were almost always held at taverns, it was deemed expedient to avoid any more friendly relation with the landlord than that of hired host and guests who paid their scot as they went.

⁶ Waits, says Mr. Raine, in his "Glossary of the Fabric Rolls," are "musicians who still (1859) parade the towns in the north of England at Christmas-time. At Durham

lodged in the Steward's hands and paid to them at each of the Grand days.¹

18. The Bidder of the Society shall receive of each new Brother, at his admittance, the sum of one shilling as his Salary.²

19. No money shall be expended out of the Stock after the hour of ten, as in the fifth article.

These rules appear to me to throw very considerable light upon the rather uncertain subject of the condition of Freemasonry in the city of York before and at the time of the establishment of what is known as the "Grand Lodge of all England."

Whether the usual theory that York was the birthplace of English Freemasonry, and that it was founded there in the 10th century by Prince Edwin, the brother of King Athelstan, as the old manuscripts say, or in the 7th century by Edwin, King of Northumbria, as was, for the first time, advanced by Drake in his speech made in 1726—whether this theory is to be considered as an historical statement, or merely an unsupported tradition, is a question that need not now be discussed.

The architectural history of the church, cathedral, or, as it is now commonly called, the Minster of York, may be comprised in a few lines.

In 627 a wooden church was built by Edwin, King of Northumbria, at the suggestion of Bishop Paulinus, who had converted him to Christianity.³

they had a regular livery and wore a silver badge. Their musical abilities at the present time are not of the most striking character, but formerly they were deemed worthy enough to assist the choristers of the Minster." In the "Fabric Rolls" under the date of 1602 there is a charge "to the Waites for their musicke to the same do. Imbassador, 13s. 4d." It was the Spanish Ambassador who was thus complimented at the expense of the Chapter during his visit to York. It is possible that as an extraordinary occasion a supper may have followed the initiation of a new brother, when the musical service of the Waites would be required to give zest to the entertainment.

¹Grand Days, says Brady (Clavis, *Calendaria* I., 164), were Candlemas Day, Ascension Day, Midsummer Day, and All Saints' Day. They were so called in the Inns of Court. The lodge might, however, have had, as its Grand Days, the festivals of St. John the Baptist and of St. John the Evangelist. This is merely problematical.

²The members were to receive "timely notice" when a Brother was to be made (Rule 7). He who served the notices and summoned the members was called the "Bidder."

³Bede says that the wooden church was temporarily erected for the public baptism of the king, but that immediately afterward he began a large stone edifice which included the wooden one, which was finished by his successor, Oswald. "Hist. Eccles.," ii., 14.

In 669 Bishop Wilfrid, the successor of Paulinus, made many important repairs and furnished the interior anew.

In 741, according to Roger Hovedon, the Minster was destroyed by fire.

In 767, according to Alcuin, who assisted in the work, Archbishop Albert erected a most magnificent basilica. This church, Raine thinks, was in existence at the time of the Norman Conquest, but in 1069 it was destroyed by fire.

In 1070 Bishop Thomas, the Norman, rebuilt the church from its foundations.

This church remained without alteration until 1171, when Archbishop Roger began to build a new choir. Raine doubts the story that the church of Archbishop Thomas was, in 1137, destroyed by fire.

In 1240 Archbishop Roger built the south transept, and immediately after commenced the building of the north transept.

In 1291 Archbishop John Romain laid the first stone of a new nave, which was completed in 1340 by Archbishop Melton.¹

It is at about this period that we become, through the *Fabric Rolls*, familiarly acquainted with the usages of the Freemasons who were employed from that time to its completion in the construction of the Minster under the direction of the Chapter of the church.

In 1361 the Presbytery was begun and completed in 1373 by Archbishop Thoresby.

In 1380 the choir was commenced, and the works being carried on without interruption, it was completed in 1400.

In 1405 the work of the central tower was begun and finished at an uncertain period.

In 1432 the southwestern tower was begun, and at a later date the northwestern tower was erected, both being completed about 1470, when the painted vault of the central tower was set up and finished.

In 1472, the work having been completed, the Cathedral was reconsecrated.

It is thus seen that for the long period of eight hundred and forty-five years, with intervals of cessation, the great work of build-

¹ So far I have been indebted for dates to the authority of Raine. Preface to "Fabric Rolls," pp. vii. et seq. What follows has been derived from R. Willis, "Architectural History of York Cathedral," p. 47.

ing a cathedral in the city of York was pursued by Masons, most of whom were brought from the continent.

Roger, the Prior of Hexham, who lived in the 12th century, tells us that Bishop Wilfrid, while building the first stone church at York, brought into England Masons and other skillful artisans from Rome, Italy, France, and other countries wherever he could find them.¹

Of the usages and regulations of these Masons, or of their organization as a guild or fraternity, we have no knowledge except that which is derived from conjecture or analogy.

But it is historically certain from the authority of the *Fabric Rolls*, to which such frequent reference has been made, that from the beginning of the 14th century Freemasons were employed in the construction of the cathedral which was then in course of erection, and that these Freemasons were organized into a body similar in its organization to that of the workmen who were engaged in the building of the cathedrals of Cologne and of Strasburg.

It is a singular coincidence, if it be nothing more, and it is certainly of great historical importance, that no manuscript Constitution yet discovered is claimed to have an older date than that of the 14th century, and about the time when the Freemasons of York were occupied in the construction of the cathedral of that city.

Hence it would not be an unreasonable hypothesis to suppose that the Freemasons who built the Cathedral of York in the 14th century were the original composers of the first of the "Old Constitutions," and of the *Legend of the Craft* which they all contain.

This would rationally account for the fact that in this Legend the origin of Freemasonry in England, as a guild, is attributed to Masons who congregated in the city of York, and there held a General Assembly.

If the Freemasons of the southern part of England had been the fabricators of the first copy of these Constitutions, they would have been more likely in framing the Legend to have selected London or some southern city as the birthplace of their guild, than to have chosen for that honor a city situated in the remotest limits of the

¹ De Roma, quoque, et Italia, et Francia, et de aliis terris ubicumque invenire poterat, cementarios, et quoslibet alios industrios artifices secum retinuerat, et ad opera sua facienda secum in Angliam adduxerat. Roger, Prior, Hagulst. liber i., cap. 5.

kingdom, and of which, from the difficulties of intercommunication, they would have no familiar knowledge.

But, on the other hand, nothing could be more natural than that the Freemasons who were living and working at York in the 14th century should have had a tradition among themselves that at some time in the remote past their predecessors had held a great convocation in their own city, and there and then framed that body of laws which were to become the Constitution of the Craft.

It is a self-evident proposition that there must have been a time when, and a place where, the first manuscript Constitution was written, and the *Legend of the Craft* was first committed to writing.

As to the time, we know of no manuscript that is older than the 14th century. The earliest is the Halliwell poem, and it has been assigned by competent authority to the year 1390. But there are good reasons for believing that the work published by Mr. Halliwell is really a compilation made up of two preceding poems, which might have been composed a few years before, and which would thus be brought to the very period when the Freemasons were at work on the York Cathedral.

As to the place where, we have only the internal evidence of the *Legend of the Craft*, which, as I have before said, would indicate from the story of the Assembly at York that the Legend was fabricated by the Freemasons of that city out of a tradition that was extant among them.

That the Halliwell poem does not particularize the city of York by name as the place where the General Assembly was held, is no proof that it was not so stated in the unwritten tradition out of which the poem was constructed. The tradition was probably so well known, so familiar to the Masons at York, that the writer of the poem did not deem it necessary to define the Assembly further than by the name of him who called it. But two centuries after, when the Freemasons of the south of England began to make copies of the Legend, they found it necessary to follow the tradition more closely and to define York as the place where the Assembly was held.

And then, too, these southern English Freemasons sought to impair the claim of their northern Brethren, and thus in the Cooke MS., written more than a century after the Halliwell poem, the "Legend of St. Alban" is introduced, and the Masons of Verulam

are said, instead of those of York, to have had "charges and maners" that is, Masonic laws and usages, "first in England."¹ But the later manuscripts admit the decay of Masonry after the death of St. Alban, and its subsequent revival at York.

Now, as the Halliwell poem speaks of the Assembly as having been held at "that syte," and as the subsequent manuscripts name that city as York, and retain the same tradition as the poem, we may, as Bro. Woodford justly says, fairly conclude that the "syte" or city in the Halliwell poem refers to York.

We need not absolutely determine, even if we could, whether Freemasonry was first established in England as a guild, at the city of York, as the earliest manuscript and the prototype of all the others says; or whether after its decadence subsequent to the rule of St. Alban, it was only revived in that city. Nor need we seek to settle the question whether the General Assembly was held and the Charges instituted by Edwin, the brother of Athelstan, in the 10th century, as all the old manuscripts say, or by Edwin, King of Northumbria, in the 7th, as was first advanced by Mr. Drake in 1726 (a theory which has since been adopted by several scholars), or finally by the Freemasons who built the York Cathedral in the 14th century, which appears to me to be the most plausible of all the hypotheses.

This need not, however, affect the probability of the fact that similar organizations existed among the Freemasons who at the same time were employed in the constructions of cathedrals in other parts of England and Scotland, of whose existence we have historical certainty, but of whose customs and regulations we have no knowledge because their *Fabric Rolls* have been either irrecoverably lost or have not yet been discovered.

Accepting, then, any of the three theories which have just been alluded to, we will arrive at the conclusion that Freemasonry assumed at the city of York that form which was represented at first by the building corporations or Craft guilds, known as Operative lodges in the 14th, 15th, 16th, and 17th centuries, and which in the 18th underwent a transmutation into that system of Speculative Freemasonry of which the Masonic lodges of the present day are the lineal offspring.

¹ Cooke MS., line 608.

It is true that such an hypothesis is based on tradition only and on a recorded legend. But this tradition is so universal and is sustained by so much of logical inference and by so many collateral authentic circumstances, which can only be explained by a reference to that tradition, that the tradition itself becomes invested with an almost historical character.

Resuming, then, the history of the rise and progress of the Grand Lodge of all England, we find its germ in the guild of those Operative Freemasons who, certainly in the 14th and 15th centuries, were employed in the construction of the Cathedral of York, even if we do not choose to trace them to a remoter period.

There is no reason to suppose that there was a cessation of the labors of the York Lodge when the Cathedral was completed in 1472.¹ We infer not only that it continued to exist, but that it extended its influence, for there is abundance of proof that there were many lodges in other parts of England, and the old manuscript charges show that these lodges were all regulated by one common law and by similar usages.

But of the especial history of the lodge at York during the 16th century we have no authentic information. We infer, however, that it was in existence early in the 17th, because a manuscript copy of the "Old Constitutions" and the "Legend" was prepared for it in 1630. This manuscript was in the archives of the lodge in 1777, but was afterward lost.

There is also in the archives of the York Lodge another and a later manuscript Constitution which is still extant, and which bears the date of 1693. The lodge was, we may presume, at that time in active operation.

We have next an authentic record that the minutes of the lodge as early as 1704 were at one time in existence. These minutes have been unfortunately mislaid or lost, and the earliest records of the lodge which have been preserved, commence with the year 1712.

I will not cite the unreliable statements of Preston and some other writers, that there was a Grand Lodge and a Grand Master at York in the 16th century, because they are entirely without proof. We are studying history, not amusing ourselves with fiction.

¹ As the church had been in fact rebuilt, it was reconsecrated on July 3, 1472, and that day was deemed to be the feast of the dedication of the church of York in future. Willis, "Architectural History of York Cathedral," p. 47.

But we do know that there was an Operative lodge at York about the close of the 14th century and for many years previous, and we also know that there was an Operative lodge in the same city about the beginning of the 17th century which was continued until the beginning of the 18th, and with no evidence to the contrary, we rightly infer that the one was the descendant or successor of the other.

Dr. J. P. Bell, in a work entitled the *Stream of English History*, gives a list of the presiding officers of the lodge from 1705 to 1781. I have not been able to get access to a copy of this work, and I am indebted for what I know of it to Bro. Hughan, who refers to it in his *History of Freemasonry in York*.

Hughan says that the List may be relied on. The author is, however, in error in assigning the title of Grand Master to the officers who presided from 1705 to 1724. They were, until the latter date, called "Presidents" or "Masters," and it was not until the lodge assumed the rank of a Grand Lodge in 1725 that the title of "Grand Master" was adopted.

Up to the year 1725 the lodge at York was strictly what it called itself, a "Private Lodge," and in its minutes it bears the name of St. John's Lodge. Preston says that in 1705 there were several lodges in York and its neighborhood. But I fail to find any other proof of this fact than his own assertion. Unfortunately, the disputes between the Lodge of Antiquity, of which Preston was a member, and the Grand Lodge of England, in which the Grand Lodge of York took a part, had created such a partisan feeling in Preston and his friends against the former and for the latter body, that his authority on any subject connected with York Masonry is of doubtful value. His natural desire was to magnify the Grand Lodge which had taken his own lodge under its protection, and to depreciate the one against which it had rebelled.

Until the contrary is shown by competent authority we must believe that in 1705 there was but one lodge at York, the same which twenty years afterward assumed the title and functions of a Grand Lodge.

From its earliest records we find that, though this was an Operative lodge in name, because at that time all Masonic lodges were of that character, yet the Theoretic members greatly predominated in numbers over the practical or working Masons. It was thus

gradually preparing the way for that change into a purely Speculative institution which about the same time was taking place in London.

It appears from the speech of the Junior Grand Warden, Drake, delivered before the Grand Lodge in 1726, that there were at that time three classes of members in the York Lodge, namely, "working Masons, persons of other trades and occupations, and Gentlemen." To the first of these classes he recommended a careful perusal of the Constitution, to the second class he counselled obedience to the moral precepts of the Society, and attention to their own business, without any expectation of becoming proficient in Operative Masonry. "You cannot," he says, "be so absurd as to think that a tailor, when admitted a Freemason, is able to build a church; and for that reason, your own vocation ought to be your most important study." On the "gentlemen" only, did he impress the necessity of a knowledge of the arts and sciences, and he especially recommended to them the study of geometry and architecture.

Francis Drake,¹ the author of this Speech, was a scholar of much learning and an antiquary. Like his contemporary, George Payne, of the London Grand Lodge, whom he resembled in the nature of his literary pursuits, his ambition seems to have been to establish a system of pure Speculative Freemasonry, to be created by its total severance from the Operative element.

Something of this kind he distinctly expresses in the close of his Speech before the Grand Lodge.

"It is true," he says, addressing the Gentlemen or Theoretic members, "by Signs, Words, and Tokens, you are put upon a level with the meanest brother; but then you are at liberty to exceed them as far as a superior genius and education will conduct you.

¹He was born in 1695, and in early life established himself at York as a surgeon and practiced, Britton says, with considerable reputation, but the investigation of antiquarian researches was his favorite pursuit. He published a "Parliamentary History of England to the Restoration" and many essays in the "Archæologia" and in the "Philosophical Transactions." His principal work, however, and the one by which he is best remembered, was published at London in 1736 under the title of "Eboracum," or the "History and Antiquities of the City of York from its Original to the Present Time." From its title we learn that Drake was a Fellow of the Royal Society and a member of the Society of Antiquaries of London. The work is in two folio volumes and illustrated by many engravings, which, considering the most of them were donations to himself and his work, made by his wealthy patrons, might have been executed in a better style of art.

I am creditably informed that in most lodges in London, and several other parts of this kingdom, a lecture on some point of geometry or architecture is given at every meeting. And why the Mother Lodge of them all should so far forget her own institutions can not be accounted for, but from her extreme old age. However, being now sufficiently awakened and revived by the comfortable appearance of so many worthy sons, I must tell you that she expects that every Gentleman who is called a Freemason should not be startled at a problem in geometry, a proposition in Euclid, or, at least, be wanting on the history and just distinctions of the five orders of architecture."

On December 27, 1725, the lodge resolved itself into a Grand Lodge (I know not how to use a better term), and Charles Bathurst, Esq., was elected Grand Master, with Mr. Johnson for his Deputy, and Messrs. Pawson and Drake, both of whom had been initiated in the previous September, as Grand Wardens.¹

On the festival of St. John the Evangelist, in the following year,² Bathurst was again elected Grand Master, and the Society marched in procession to Merchants' Hall, where a Speech was delivered by Bro. Francis Drake, the Junior Grand Warden.

Like its sister of London, the Grand Lodge at York was troubled with schism at a very early period of its existence.³ William Sourfield had convened a lodge and made Masons without the consent of the Grand Master or his Deputy. For this offense he was expelled, or as the Minutes say, "banished from the Society for ever."

It was agreed that John Carpenter, W. Musgrave, Th. Alleson, and Th. Preston, who had assisted Sourfield in his illegal proceedings, should, on their acknowledging their error and making due submission, be restored to favor.

Findel gives the following account of the subsequent proceedings which was taken by him from the Minutes of the Grand Lodge

"After the Minutes of December 22, 1726, a considerable space

¹ Bro. Findel, who had inspected the Minutes while on a visit to York, says these officers are there called Wardens, and not Grand Wardens. "History of Freemasonry," p. 161.

² Findel gives this date as 1725, but he is clearly in error, as the printed title of the Speech states that it was delivered "on St. John's Day, December 27, 1726."

³ The reader is reminded of the schismatic proceedings at the London Grand Lodge in 1722 in reference to the election of the Duke of Wharton as Grand Master.

is left in the page,¹ and then follow the Minutes of June 21, 1729, wherein it is said that two Gentlemen were received into the St. John's Lodge and their election confirmed by vote: Edw. Thompson, Esq., Grand Master; John Willmers, Deputy Grand Master; G. Rhodes, and Reynoldson, Grand Wardens. The Grand Master on his part appointed a Committee of seven brothers, amongst whom was Drake, to assist him in the management of the lodge, and every now and then support his authority in removing any abuses which might have crept in.

"The lodge was, however, at its last gasp, and therefore the Committee seem to have effected but little; for on May 4, 1730, it was found necessary to exact the payment of a shilling from all officers of the lodge who did not make their appearance and with this announcement the Minutes close."²

At this time, according to Findel, there were no lodges subordinate to the Grand Lodge. His statement, however, that after the meeting in May, 1730, it was inactive until 1760, is shown by the records to be not precisely accurate.

The fact is that the lodge, or the Grand Lodge, after 1729, must for some years have dragged out a life of inactivity. Bell's list shows that there were no Grand Masters (probably because there were no meetings) in 1730, 1731, and 1732. John Johnson, M.D., is recorded as Grand Master in 1733, and John Marsden, Esq., in 1734.

There are no records of Grand Masters or of Proceedings from 1734 until 1761. During that period of twenty years, while the Grand Lodge of England was diffusing the light of Speculative Freemasonry throughout the world, the Grand Lodge of all England was asleep, if not actually defunct.

From this long slumber it awoke in the year 1761, and the method of its awaking is made known to us in the Minutes of the meeting which have been preserved.

As this event is one of much importance in the history of Freemasonry at York, I do not hesitate to copy the Minute in full.

The Ancient and Independent Constitution of Free and Accepted Masons, belonging to the City of York, was, this Seven-

¹ In Dr. Bell's List, heretofore cited, there are no names of Grand Masters in 1722 and 1728.

² "History of Freemasonry," p. 164.

teenth day of March, in the year of our Lord 1761, Revived by Six of the Surviving Members of the Fraternity by the Grand Lodge being opened, and held at the House of Mr. Henry Howard, in Lendall, in the said City, by them and others hereinafter named.

When and where it was farther agreed on that it should be continued and held there only the Second and Last Monday in every Month.

PRESENT:

Grand Master, Brother	Francis Drake, Esq., F.R.S.
Deputy G. M. "	George Reynoldson.
Grand Wardens "	George Coates and Thomas Mason.

VISITING BRETHREN:

Tasker, Leng, Swetnam, Malby, Beckwith, Frodsham, Fitzmaurice, Granger, Crisp, Oram, Burton, and Howard.

Minutes of the Transactions at the Revival and Opening of the said Grand Lodge:

Brother John Tasker was, by the Grand Master and the rest of the Brethren, unanimously appointed Grand Secretary and Treasurer, he having just petitioned to become a Member and being approved and accepted nem. con.

Brother Henry Howard also petitioned to be admitted a Member, who was accordingly balloted for and approved nem. con.

Mr. Charles Chaloner, Mr. Seth Agar, George Palmes, Esq., Mr. Ambrose Beckwith, and Mr. William Siddall petitioned to be made Brethren the first opportunity, who, being severally balloted for, were all approved of nem. con.

This Lodge was closed till Monday, the 23d day of this instant Month, unless in case of Emergency.

The Grand Lodge, thus revived, had at first and for some years but one constituent lodge under its obedience, or, to speak more correctly, the Grand Lodge of all England and the Lodge at York were really one and the same body. While it claimed the title and the prerogatives of a Grand Lodge, it also performed the functions of a private lodge in making Masons. But it afterward increased its constituency, and in the year 1769 granted Warrants for opening lodges at Ripon, at Knaresborough, and at Iniskilling.

In 1767 the Grand Lodge of England, at London, had addressed a report of the business done at its quarterly communication to a lodge held at the Punch Bowl, in the city of York, and to which lodge it had granted a Warrant, as No. 259, on the 12th of January, 1761.

But this lodge having ceased to exist, the document appears to have fallen into the hands of the Grand Master of the York Grand Lodge. It was laid before the Grand Lodge at a meeting held on the 14th December, 1767, when it was resolved that a letter should be sent by the Grand Secretary to the Grand Lodge at London.

In this letter the pretensions of the York Grand Lodge are set forth in very emphatic terms. It is stated that "the Most Ancient Grand Lodge of all England, held from time immemorial in this city (York), is the only Lodge held therein."

It is also stated that "this Lodge acknowledges no Superior, that it exists in its own Right, that it grants Constitutions and Certificates in the same manner as is done by the Grand Lodge in London, and as it has from Time immemorial had a Right and used to do, and that it distributes its own Charity according to the true principles of Masons."

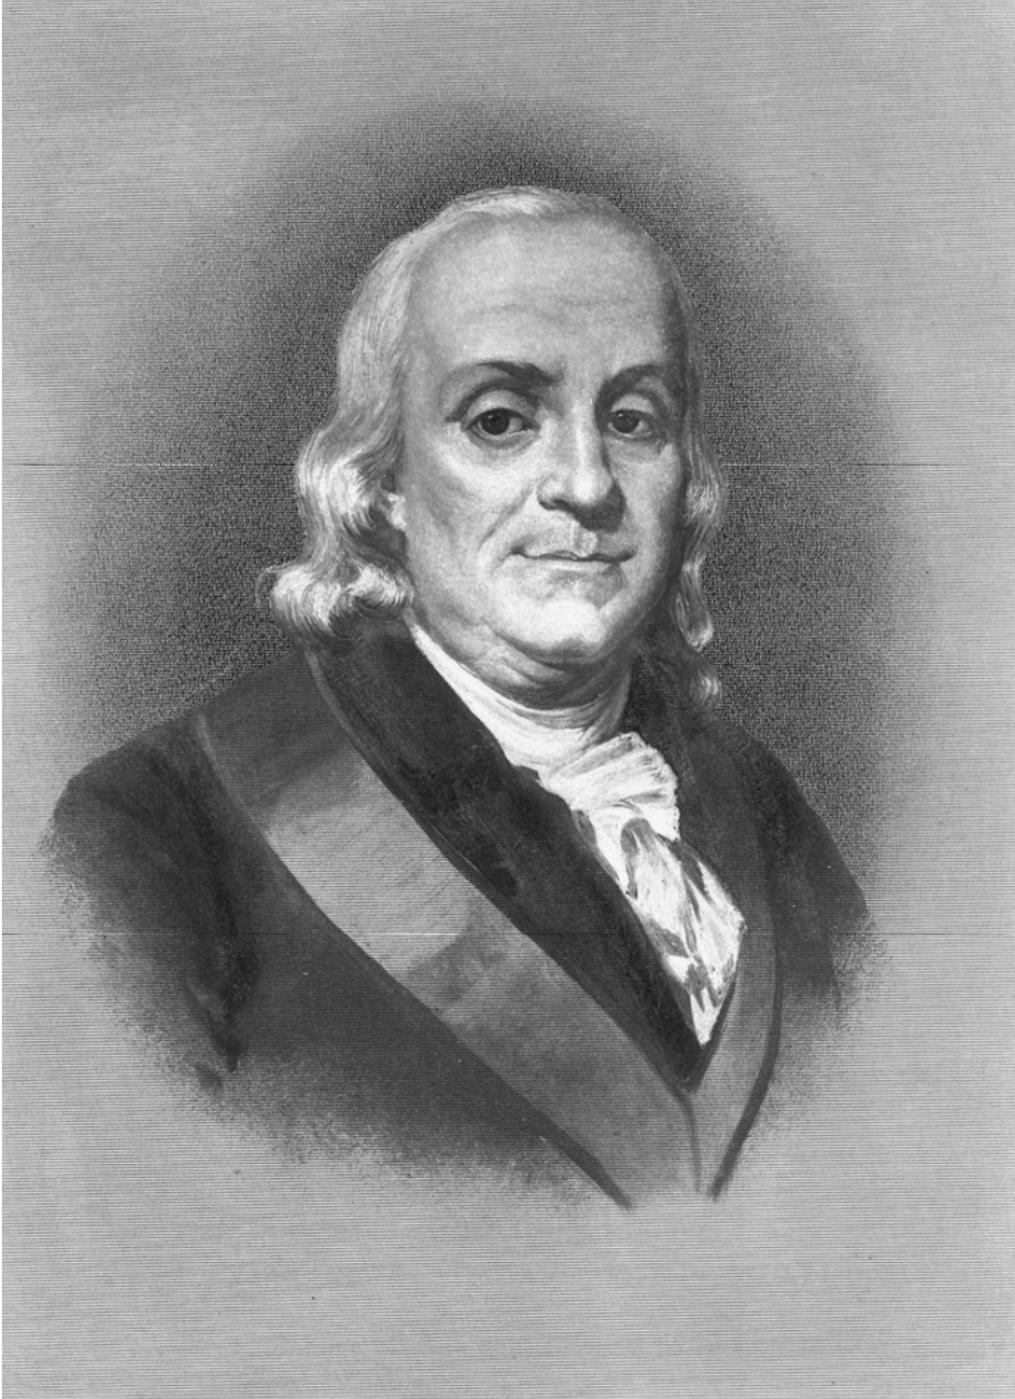

Hence it does not doubt that the Grand Lodge at London will pay due respect to it and to the Brethren made by it, professing that it had ever had a very great esteem for that body and the brethren claiming privileges under its authority.

Findel says that "a correspondence with the Grand Lodge of England in London, in the year 1767, proves that the York Lodge was then on the best of terms with the former."¹

I confess that I fail to find the proof of this feeling simply because there is no proof of the correspondence of which Findel speaks. A correspondence is the mutual interchange of letters. The Grand Lodge in London had sent an official communication to a lodge in the city of York, ignoring, in so doing, the Grand Lodge of York. This was itself an act of discourtesy. The lodge having been discontinued, this communication comes into the possession of the Grand Lodge at York, for which it had not been originally intended. It sends to the Grand Lodge at London a letter in which it asserts its equality with that Grand Lodge and the

¹ "History of Freemasonry," p. 166.

BENJAMIN FRANKLIN

immemorial right that it had to grant Warrants, which right it trusts that the Grand Lodge in London will respect.

It appears to me that this language, if it means anything, is a mild protest against the further interference of the London Grand Lodge, with the territorial jurisdiction of the Grand Lodge in York.

It is true that in the close of the letter the York Grand Lodge expresses its esteem for the Body at London and its willingness to concur with it in anything that will affect the general good of Masonry.

The letter was dignified and courteous. It asserted rights and prerogatives, which it need not have done if they had not been invaded, and it made the offer of a compact of friendship.

To this letter there is no evidence that the Grand Lodge of England deigned to make a reply. It was treated with frigid silence, and hence there was no correspondence between the two bodies.

Bro. Hughan, however, concurs with Bro. Findel, so far as to say that this letter is of much consequence in proving that the two Grand Lodges were on excellent terms.¹

I am very reluctant to differ with two such authorities on Masonic history, but I can not consider that the conclusion to which Bro. Hughan has arrived is a legitimate one. The letter certainly shows a desire on the part of the Grand Lodge of York to cultivate friendly relations with that in London. But there is no evidence that the amicable feeling was reciprocated.

On the contrary, all the records go to show that the Grand Lodge at London was aggressive in repeated acts which demonstrated that it did not think it necessary to respect the territorial rights of the Masonic authority at York.

In 1738 Dr. Anderson speaks of it not as a Grand Lodge, but as "the Old Lodge at York" which he says "affected independence." It was evidently, in his opinion, merely a lodge that was unwilling to place itself under obedience to his own Grand Lodge.

That the Grand Lodge of England refused to recognize the authority of the lodge at York in its sovereign capacity as a Grand

¹ "History of Freemasonry in York," p. 70.

Lodge having territorial jurisdiction over the north of England or even over the two Ridings of Yorkshire is shown by the records. In 1729, four years only after the lodge at York had assumed the title of a Grand Lodge, the Grand Lodge of England constituted a lodge at Scarborough; in 1738 another at Halifax; in 1761, a third and fourth at the city of York, and at Darlington the one two months before and the other three months after the York Grand Lodge had been resuscitated; in 1762, a fifth at Orley; in 1763, a sixth at Richmond; and in 1766, a seventh at Wakefield, all situated within the county of York, and one in the very city where the Grand Lodge held its sessions.

It is not surprising that the York Grand Lodge in time resorted to reprisals, and as will presently be seen, most decidedly invaded the jurisdiction of the Grand Lodge at London.

Dr. Bell, in *his History of the Grand Lodge of York*,¹ says that "the two Grand Lodges continued to go on amicably until the year 1734, when in consequence of the Grand Lodge of England having granted Warrants, out of its prescribed jurisdiction, shyness between the lodges ensued."

Both Bell and Findel, who make the same statement as to a lodge warranted in 1734, are wrong as to the date, for no lodge was constituted in York by the Grand Lodge of England in that year. But as it had constituted one in 1729, I am ready to give credit to the account of the "shyness." The mistake of a date will not affect the existence of the feeling.

Preston commits the same error as Bell and Findel concerning the Constitution of two lodges in York in 1734.² But he adds what is of importance, considering his intimacy with the subject, that the Grand Lodge in York highly resented the encroachments

¹ "History of the Provincial Grand Lodge of North and East Yorkshire, Including Notices of the Ancient Grand Lodge of York," cited by Bro. Hughan in his "History of Freemasonry in York," p. 45.

² It is from Preston that Bell and Findel have derived their authority for the statement of lodges having been constituted in 1734. Bro. Hughan investigated the subject with his wonted perseverance and says that "there is no register of any lodge being warranted or Constituted in Yorkshire or neighborhood in A.D. 1734. We have searched every List of Lodges of any consequence from A.D. 1738 to A.D. 1784, including the various editions of the Constitutions, Freemason's Calendars, Companions and Pocket Books, etc., but can not find any "Deputation granted within the jurisdiction of the Grand Lodge of all England, during 1734 by the Grand Lodge of England." "History of Freemasonry in York," p. 47.

of the Grand Lodge of England on its jurisdiction and "ever after seems to have viewed the proceedings of the Brethren in the South with a jealous eye; as all friendly intercourse ceased, and the York Masons from that moment considered their interests distinct from the Masons under the Grand Lodge in London."¹

Soon after the revival of the Grand Lodge it was visited by Preston and Calcott, two distinguished Masonic writers, and Hughan supposed that about this time the Royal Arch degree was introduced into the York system by the latter. This subject will, however, be more appropriately considered in a distinct chapter devoted to the history of that degree.

From the time of its re-opening in 1761 until near the close of the 18th century the Grand Lodge appears to have flourished with considerable activity.²

The festival of St. John the Evangelist was celebrated in 1770 by a procession to church, and a sermon on the appropriate text "God is love." Representatives from the three lodges at Ripon, Knaresborough, and Inskilling were present. Sir Thomas Gascoigne was elected Grand Master.³

In the same year a Warrant was granted for the Constitution of a lodge at Macclesfield in Cheshire, so that there were now at least four subordinates acknowledging obedience to the York Grand Lodge.

A controversy having sprung up between the Lodge of Antiquity in London and the Grand Lodge of England, the former body withdrew from its allegiance to the latter, and in 1778 received a Warrant from the Grand Lodge of York, authorizing it to assemble as a Grand Lodge for all that part of England situated to the south of the river Trent.

This episode in the history of the Freemasonry of England,

¹ Preston, Jones edition, p. 214.

² Findel says that from 1765 the name of "Bro. Drake is seldom mentioned." If we consider that at that date Drake had reached the seventieth year of his age, and that five years afterward, in 1770, he died, we will find ample cause in the infirmities of age for his withdrawal from participation in the active duties of Masonic labor.

³ This baronet was a lineal descendant of Nicholas Gascoigne, the brother of that celebrated Chief Justice who in the reign of Henry IV. committed the heir apparent to the throne, the "Merry Prince Hal," to prison for contempt of court. He was a native and resident of Yorkshire, having seats at Barstow, Lasingcroft, and Parlington, all in the county. See Kimber and Johnson's "Baronetage of England," London, 1771, vol. iii., p. 352.

which involved very important results, demands and must receive a more detailed consideration in a distinct chapter.

It is scarcely necessary to pursue the minute history of the Grand Lodge of York from that period to the date of its final collapse.

The last reference in the minutes of the lodge at York to the Grand Lodge of all England has the date of August 23, 1792. It is a rough minute on a sheet of paper, which records the election of Bro. Wolley as Grand Master, George Kitson as Grand Treasurer, and Richardson and Williams as Grand Wardens.¹

We have no evidence from any records that the Grand Lodge ever met again. It seems to have silently collapsed; the lodge at York continued its existence as a private lodge, and finally came under the jurisdiction of the Grand Lodge of England.

In fact, as the Rev. Bro. Woodford has stated, the York Grand Lodge was never formally dissolved, but simply was absorbed, so to say, by the predominance of its more prosperous southern rival of 1717.²

In bringing this history of the rise and progress of Speculative Freemasonry in the city of York to a close, I am almost irresistibly impressed with the opinion that the "Old Lodge at York" was never, in the legal sense of the word, a Grand Lodge. It was not formed, like the Grand Lodge at London, by the union and co-operation of several private lodges. It was never recognized as such by the Grand Lodge of England, but was always known as the "Old Lodge at York."

Anderson so called it in 1738, and his successor, Northouck, writing in 1784, says of it that "the ancient York Masons were confined to one lodge, which is still extant, but consists of very few members, and will probably be soon altogether annihilated."³

It was simply, like the lodges of Kilwinning in Scotland and of Marseilles in France, a "Mother Lodge," a term which, in Masonic language, has been used to denote a private lodge which, of its own motion, has assumed the prerogatives and functions of a Grand Lodge by granting Warrants. This title was applied to it by Drake,

¹ Hughan, "History of Freemasonry in York," p. 79.

³ Northouck, "Book of Constitutions," p. 240.

its Junior Grand Warden, when he delivered his "Speech" in 1726, the year after it had assumed the attitude of a Grand Lodge.

But it continued at all times to exercise the function of "making Masons," a function which has been invariably delegated by Grand Lodges to their subordinates.

As late as the year 1761, when, after a long slumber, the Grand Lodge was revived, one of its first acts was to ballot for five candidates who were, on the first opportunity, initiated by it.

In the rules adopted for its government in 1725 the title of "Lodge" is used by it five times as the designation of the Society, and that of "Grand Lodge" only once in reference to the funds.

Their rules are signed by Ed. Bell, who calls himself not "Grand Master," but simply "Master." In the vacillating position in which the Freemasons of York had placed themselves, between a desire to imitate their London brethren by establishing a Grand Lodge and a reluctance to abandon the old organization of a private lodge, they entirely lost sight of the true character of a Grand Lodge, as determined by the example of 1717.

It is not, therefore, surprising, as Bro. HUGHAN remarks, that these rules should offer a strange contrast to the Constitutions of the Grand Lodge of England which had been published two years before.

There can, however, be little or no doubt, as the same astute writer has observed, that in consequence of the publication of the London Constitutions the Freemasons of York "began to stir themselves and to assume the prerogatives of a Grand Lodge."

It is to be regretted that in borrowing from their Brethren the title of a Grand Lodge, the York Freemasons did not also follow their example by adopting the same regularity of organization.

In view of all these facts it is impossible to recognize the body at York in any other light than that of a Mother Lodge, a body assuming, without the essential preliminaries, the prerogatives of a Grand Lodge, while to the body established at London in 1717 must be conceded the true rank and title of the Mother Grand Lodge of the World, from which, directly or indirectly, have proceeded as its legitimate offspring all the Grand Lodges which have been organized in the 18th and 19th centuries.

Now, what must we infer from these historical facts? This and no more nor less: that there never was, as a legitimate organization, a Grand Lodge of York or a Grand Lodge of all England, but only a Mother Lodge in the city of York, which assumed the title and prerogatives of a Grand Lodge, but exercised the functions both of a Grand and a private lodge—an anomaly unknown to and unrecognized by Masonic law.

CHAPTER XL

ORGANIZATION OF THE GRAND LODGE OF SCOTLAND

It is much easier to write the history of the organization of the Grand Lodge of Scotland than that of England. The materials in the former case are far more abundant and more authentic, and the growth of the organization was more gradual, and each step more carefully recorded. In England almost the only authority or guide that we have for the occurrences which led to the establishment of the Grand Lodge, in the year 1717, is the meager history supplied by Anderson in the second edition of the *Book of Constitutions*.

The four old Lodges suddenly sprung, as we have already seen, into being, with no notification of their previous existence, and no account of the mental process by which their members were led to so completely change their character and constitution from the Operative to a purely Speculative institution.

In Scotland, on the contrary, the processes which led to the change are well marked—the previous condition of the lodges is recorded, and we are enabled to trace the distinct steps which finally led to the establishment of the Grand Lodge in the year 1736.

It would appear from historical evidence that in the 17th century there were three methods by which a new lodge could be formed in Scotland. The first of these was by the authority of the King, the second by that of the General Warden, perhaps the most usual way, and the third was by members separating from an old and already established lodge, and with its concurrence forming a new one, the old lodge becoming, in technical terms, the mother, and the new one the descendant.

All of these methods are referred to in a minute of the Lodge of Edinburgh in the year 1688. A certain number of the members of that lodge having left it, without its sanction formed a new lodge

in the Cannongate and North Leith. Whereupon the Lodge of Edinburgh declared the Cannongate and Leith Lodge to have acted "contrary to all custom, law, and reason," inasmuch as it had been formed in contempt of the Edinburgh Lodge, and "without any-Royal or General Warden's authority." This is said to be "Mason Law," and for its violation the lodge was pronounced illegal, all communication with its members, or with those who were entered or passed in it, was prohibited, and it was forbidden to employ them as journeymen under a heavy penalty. In a word, the lodge was placed in the position of what, in modern parlance, we should call "a clandestine lodge."

But the old law for the organization of new lodges seems by this time to have become obsolete, and the denunciation of the Edinburgh Lodge amounted to a mere *brutum fulmen*. The Cannongate and Leith Lodge continued to exist and to nourish, and almost a half century afterward was recognized, notwithstanding its illegal birth, as a regular body, and admitted into the constituency of the Grand Lodge.

We may therefore presume that at or about the close of the 17th century the Scottish lodges began to assume the privileges which Preston says at that time belonged to the English Masons, when any number could assemble and, with the consent of the civil authority, organize themselves into a lodge.

At the beginning of the 18th century there were many lodges of Operative Masons in Scotland, which had been formed in one of the three ways already indicated. The two most important of these were the Lodge of Edinburgh and that of Kilwinning. The latter especially had chartered several lodges, and hence was by its adherents called the Mother Lodge of Scotland, a title which was, however, disputed by the Lodge of Edinburgh and never was legally recognized.

A preliminary step to the establishment of a Speculative Grand Lodge must have necessarily been the admission into the ranks of the Operative Craft of non-professional members. We have seen the effect of this in the organization of the Grand Lodge of England. In Scotland the evidences of the result of the admission of these non-professionals is well shown in the minutes of the Lodge of Edinburgh. The contentions between the Operative and the non-operative elements for supremacy, and the final victory of the

latter, are detailed at length. If such a spirit of contention existed in England, as an episode in the history of its Grand Lodge, no record of it has been preserved.

The earliest instance of the reception of a non-professional member is that of Lord Alexander, who was admitted as a Fellow Craft in the Lodge of Edinburgh on July 3, 1634. On the same day Sir Alexander Strachan was also admitted.

But the mere fact that these are the first recorded admissions of non-operatives among the Craft does not necessarily lead us to infer that before that date non-operatives were not received into lodge membership.

On the contrary, there is a minute of the date of the year 1600 which records the fact that the Laird of Auchinleck was present at a meeting of the Lodge of Edinburgh, and as one of the members took part in its deliberations. William Schaw, who was recognized as the General Warden and Chief Mason of Scotland in 1590, was, most probably, not an Operative Mason. Indeed, all the inferential evidence lies the other way. Yet his official position required that he should be present at the meetings of the lodges, which would lead to the necessity of his being received into the Craft. The same thing is pertinent to his predecessors, so that it is very evident that the custom of admitting non-operatives among the Craft must have been practiced at a very early period, perhaps from the very introduction of Masonry into Scotland, or the 13th century.

It will be seen hereafter how this non-operative element, as it grew in numbers and in strength, led, finally, to the establishment of a non-operative or Speculative Grand Lodge.

But attention must now be directed to another episode in the history of Scottish Masonry, namely, the contests between the Masters and the Journeymen, which also had its influence in the final triumph of Speculative over Operative Masonry.

Taking the Lodge of Edinburgh as a fair example of the condition and character of the other lodges of the kingdom, we may say that during all of the 17th century there was observed a distinction between the Master Masons or employers and the Fellow Crafts or Journeymen who were employed.

The former claimed a predominant position, which the latter from necessity but with great reluctance conceded. It was only on

rare occasions that the Masters admitted the Fellows to a participation in the counsels of the lodge.

This assumption of a superiority of position and power by the Masters was founded, it must be admitted, upon the letter and spirit of the Schaw Statutes of 1598 and 1599.

In these Statutes the utmost care appears to have been taken to deprive the Fellows of all power in the Craft and to bestow it entirely on the Wardens, Deacons, and Masters.

Thus the Warden was to be elected annually by the Masters of the lodge, all matters of importance were to be considered by the Wardens and Deacons of different lodges to be convened in an assembly called by the Warden and Deacon of Kilwinning; all trials of members, whether Masters or Fellows, were to be determined by the Warden and six Masters; all difficulties were to be settled in the same way. In a word, these Statutes seem to have passed over the Fellows in the distribution of power and concentrated it wholly upon the Masters.

But this evidently very unjust and unequal distribution of privileges appears toward the middle of the 17th century, if not before, to have excited a rebellious spirit in the Fellows.

This is very evident from the fact that from the year 1681 enactments began to be passed by the Lodge of Edinburgh against the encroachments of the Fellows or Journeymen, who must have at or before that time been advancing their claim to the possession of privileges which were denied to them. "Though there can be no doubt," says Lyon, "that all who belonged to the lodge were, when necessity required, participants in its benefits, the journeymen appear to have had the feeling that it was not right that they should be entirely dependent, even for fair treatment, on the good-will of the Masters."

It was in fact but a faint picture of that contest for supremacy between capital and labor, which we have since so often seen painted in much stronger colors. The struggle in the Masonry of Scotland began to culminate in the year 1708, when a petition was laid before the Lodge of Edinburgh from the Fellows, in which they complained that they were not permitted to inspect the Warden's accounts.

The lodge granted the petition, and agreed that thereafter "six of the soberest and discretest Fellow-Craftsmen" should be

appointed by the Deacon to oversee the Warden's accounts. The lodge also granted further concessions and permitted the Fellow-Crafts to have a part in the distribution of the charity fund to widows.

But these concessions do not appear to have satisfied the Fellows, who, as Lyon supposes, must have been guilty of decided demonstrations, which led the lodge in 1712 to revoke the privilege of inspecting the accounts that had been conferred by the statute of 1708.

This seems to have brought matters to a climax. At the same meeting the Fellow-Crafts who were present, except two, left the room and immediately proceeded to organize a new lodge known afterward as the Journeymen's Lodge. Every attempt on the part of the Masters' Lodge to check this spirit of independence and to dissolve the schismatic lodge, though renewed from time to time for some years, proved abortive. The Journeymen's Lodge continued to exercise all the rights of a lodge of Operative Masons, and to enter Apprentices and admit Fellows just as was done by the Masters' Lodge from which it had so irregularly emanated.

Finally, in 1714, the most important and significant privilege of giving the "Mason Word" was adjudged to the Lodge of Journeymen by a decree of Arbitration.

The lodge, now perfected in its form and privileges, flourished, notwithstanding the occasional renewal of contests, until the organization of the Grand Lodge, when it became one of its constituents.

There can, I think, be no doubt that this independent action of the Journeymen Masons of Edinburgh led to an increase of lodges, when the prestige and power of the incorporated Masters had been once shaken. Twenty-four years after the establishment of the Journeymen's Lodge we find no less than thirty-two lodges uniting to organize the Grand Lodge of Scotland.

Another event of great importance in reference to the history of the Grand Lodge is now to be noticed. I allude to the process through which the Masons of Scotland attained to the adoption of a Grand Master as the title of the head of their Order.

There can be no doubt that the Grand Lodge of Scotland was organized upon the model of that of England, which had sprung into existence nineteen years previously. As the English Grand Lodge had bestowed upon its presiding officer the title of Grand

Master, it was very natural that the Scotch body, which had derived from it its ritual and most of its forms, should also derive from it the same title for its chief.

But while we have no authentic records to show that previous to 1717 the English Masons had any General Superintendent, under any title whatever, it is known that the Scottish Masons had from an early period an officer who, without the name, exercised much of the powers and prerogatives of a Grand Master.

On December 28, 1598, William Schaw enacted, or to use the expression in the original document, "sett down" certain "statutes and ordinances to be observed by all Master Masons" in the realm of Scotland. In the heading of these Statutes he calls himself "Master of Work to his Majesty and General Warden of the said Craft." In a minute of the Lodge of Edinburgh, of the date of 1600, he is designated as "Principal Warden and Chief Master of Masons."

Now in the Statutes and Ordinances just referred to, as well as in a subsequent code of laws, ordained in the following year, there is ample evidence that this General Warden exercised prerogatives very similar to those of a Grand Master and indeed in excess of those exercised by modern Grand Masters, though Lyon is perfectly correct in saying that the name and title were unknown in Scotland until the organization of the Grand Lodge in 1736.¹

The very fact that the Statutes were ordained by him and that the Craft willingly submitted to be governed by codes of laws emanating from his will—that he required the election of Wardens by the lodges to be submitted to and to be confirmed by him, "that he assigned their relative rank to the lodges of Edinburgh, of Kilwinning, and of Stirling," and that he delegated or "gave his power and commission" to the lodges to make other laws which should be in conformity with his Statutes—proves, I think, very conclusively that if he did not assume the title of Grand Master of Masons of Scotland, he, at all events, exercised many of the prerogatives of such an office.

It is true that it is said in the preamble to the Statutes of 1598 that they are "sett down" (a term equivalent to "prescribed") by the General Warden "with the consent of the Masters;" but the

¹Except in 1731, when the Lodge of Edinburgh elected its presiding officer under the title of Grand Master. This was, however, entirely local, and was almost immediately abandoned.

acceptance of such consent was most likely a mere concession of courtesy, for the Statutes of 1599 are expressly declared in many instances to be "ordained by the General Warden," and in other instances it is said that the law or regulation is enacted because "it is thought needful and expedient by the General Warden." All of which shows that the Statutes were the result of the will of the General Warden and not of the Craft. That the Masters accepted them and consented to them afterward was very natural as a matter of necessity. There might have been a different record had they been uncompliant and refused assent to regulations imposed upon them by their superior.

Therefore, though the theory of the existence of Grand Masters in Scotland under that distinctive title at a period anterior to the organization of the Grand Lodge must be rejected as wholly untenable, it can hardly be denied that William Schaw, under the name of General Warden, did, at the close of the 16th century, exercise many of the prerogatives of the office of Grand Master.

Schaw died in 1602, and with him most probably died also the peculiar prerogatives of a General Warden, but the Scottish Craft appear not to have been in consequence without a head.

This leads us to the consideration of the St. Clair Charters, documents of undoubted authenticity but which have been used by Brewster in *Laurie's History*, under a false interpretation of the existence of the office of Grand Master of Masons in Scotland, from the time of James II, an hypothesis which has, however, been proved to be fallacious and untenable.

There are two ancient manuscripts in the repository of the Grand Lodge of Scotland, which are known by the title of the St. Clair Charters. The date of the first of these is supposed to be about the year 1601, and is signed by William Schaw as Master of Work, and by the office-bearers of five different lodges. The date of the other is placed by Lyon, with good reason, at 1628. It is signed by the office-bearers of five lodges also.

In the Advocates' Library of Edinburgh there is a small manuscript volume known as the "Hays MSS." which contains copies of these charters, not materially or substantially varying from the originals in the repository of the Grand Lodge.

The genuineness of these original manuscripts is undeniable. Whatever we can derive from them in relation to the position as-

signed by the Scottish Craft to the St. Clairs of Roslin in the beginning of the 17th century will be of historical value.

By them alone we may decide the long-contested question whether the St. Clairs of Roslin were or were not Hereditary Grand Masters of the Masons of Scotland. The Editor of *Laurie's History of Freemasonry* asserts that these charters supply the proof that the grant to William Sinclair as Hereditary Grand Master was made by James II. Mr. Lyon contends that the charters furnish a conclusive refutation of any such assertion. The first of these opinions has for a long time been the most popular. The last has, however, under more recent researches been now generally adopted by Masonic scholars. An examination of the precise words of the two charters will easily settle the question.

The first charter, the date of which is 1601, states (transmuting the Scottish dialect into English phrase) that "from age to age it has been observed among us that the Lords of Roslin have ever been patrons and protectors of us and our privileges, and also that our predecessors have obeyed and acknowledged them as patrons and protectors, which within these few years has through negligence and slothfulness passed out of use." It proceeds to state that in consequence the Lords of Roslin have been deprived of their just rights and the Craft subjected to much injury by being "destitute of a patron, protector, and overseer." Among the evils complained of is that various controversies had arisen among the Craftsmen for the settlement of which by the ordinary judges they were unable to wait in consequence of their poverty and the long delays of legal processes.

Wherefore the signers of the charter for themselves and in the name of all the Brethren and Craftsmen agree and consent that William Sinclair of Roslin shall for himself and his heirs purchase and obtain from the King liberty, freedom, and jurisdiction upon them and their successors in all time to come as patrons and judges of them and all the professors of their Craft within the realm (of Scotland) of whom they have power and commission.

The powers thus granted by the Craft to the Lord of Roslin were very ample. He and his heirs were to be acknowledged as patrons and judges, under the King, without appeal from their judgment, with the power to appoint one or more deputies. In conclusion the jurisdiction of the Lords of Roslin was to be as ample and large as the King might please to grant to him and his heirs.

The second charter was issued in 1628 by the Masons and Hammermen of Scotland. It repeats almost in the same words the story contained in the first that the Lords of Roslin had ever been patrons and protectors of the Scottish Craft, and adds the statement that there had been letters patent to that effect issued by the progenitors of the King, which had been burnt with other writings in a fire which occurred in a year not stated within the Castle of Roslin.

The William Sinclair to whom the previous charter had been granted having gone over to Ireland, the same evils complained of in the beginning of the century were renewed, and the Craft now in this second charter grants to Sir William Sinclair of Roslin the same powers and prerogatives that had been granted to his father, as their "only protector, patron, and overseer."

The contents of these two charters supply the following facts, which must be accepted as historical since there is no doubt of the genuineness of the documents.

In the first place there was a tradition in the beginning of the 17th century, and most probably at the close of the 16th, if not earlier, that the Sinclairs of Roslin had in times long passed exercised a superintending care and authority over the Craft of Scotland.

This superintendence they exercised as protectors, patrons, and overseers, and it consisted principally in settling disputes and deciding controversies between the brethren without appeal, which disputes and controversies would otherwise have to be submitted to the decision of a court of law.

The tradition implied that this office of protectorate of the Craft was hereditary in the house of Roslin, but had not been exercised continuously and uninterruptedly, but on the contrary had, in the beginning of the 17th century, been long disused.

It is true that there is no reference in the first charter to any crown grant, at least in explicit terms, but it speaks of the Lord of Roslin as lying out of his "just right" by the interruption in the exercise of the prerogative of patron, and if he had or was supposed to have such "just right," then the implication is strong that it was founded on a royal grant. The second charter is explicit on this subject and asserts that the record of the grant had been destroyed by a conflagration. This statement is very probably a myth, but it shows that a tradition to that effect must have existed among the Craft.

We may imply also from the language of the first charter that the Craft were in some doubt whether by this non-user the hereditary right had not been forfeited, since it is required by them that Sinclair should "purchase and obtain" from the King permission to exercise the jurisdiction of a patron and judge. In fact the sole object of the charter was to authorize William Sinclair to get the royal authority to resume the prerogatives that had formerly existed in his family. Whether the Craft were correct in this judgment, and whether by lying in abeyance the hereditary right had lapsed and required a renewal by the royal authority are not material questions. It is sufficient that such was the opinion of the Scottish Masons at the time.

Lastly, the two charters are of historical importance in proving that at the time of their being issued, the title of Grand Master was wholly unknown to the Craft.

The Editor of *Laurie's History* is, therefore, entirely unwarranted in his theory, which, however, he presents as an undoubted historical fact that the Sinclairs of Roslin were "Hereditary Grand Masters of Scotland."

Equally unwarranted is he in making Kilwinning, in Ayrshire, the seat of his mythical Grand Lodge, not, as has been urged by Bro. Lyon, because the Sinclairs¹ had no territorial connection with Ayrshire, but simply because there is not the least historical evidence that Kilwinning was the center of Scottish Masonry, though the lodge in that village had assumed the character of a Mother Lodge and issued charters to subordinates.

The true historical phase which these charters seem to present is this: In the 17th century, or during a part of it, the Operative Masons of Scotland adopted the family of Sinclair of Roslin as their patrons and protectors, and as the umpires to whom they agreed to refer their disputes, accepting their decisions without appeal, as a much more convenient and economical method of settling disputes than a reference to a court of law would be. Out of this very simple fact has grown the mythical theory, encouraged by fertile imaginations, that they were Grand Masters by royal grant and hereditary right.

The immediate superintendence of the Scottish Masons seems,

¹ The modern spelling of the name is St. Clair, but I have for the present retained the form of Sinclair to be in conformity with the orthography of the charter.

however, to have continued to be invested in a General Warden. In 1688, when there was a secession of members from the Lodge of Edinburgh, who established an independent lodge in the Canon-gate, one of the charges against them was that they had "erected a lodge among themselves to the great contempt of our society, without any Royal or General Warden's authority."

But the St. Clairs were the patrons and the General Wardens were the Masters of Work, while no reference was made to nor any word said of the title or the prerogatives of a Grand Master.

The point is, therefore, historically certain that there never was a Grand Master in Scotland until the establishment of the Grand Lodge, in 1736.

As early as the year 1600 we find the record of the admission of a non-professional into the Lodge of Edinburgh. The custom of admitting such persons as honorary members continued throughout the whole of the 17th century. Before the middle of the century, noblemen, baronets, physicians, and advocates are recorded in the minutes as having been admitted as Fellow-Crafts. The evidence that at that time the Speculative element had begun to invade the Operative is not confined to the minutes of the Lodge of Edinburgh. There are records proving that the same custom prevailed in other lodges.

Much importance has rightly been attached to the fact that there is an authentic record of the admission of two gentlemen into an English lodge of Operative Masons in the year 1646. There are numerous instances of such admissions before that time in Scottish lodges. Indeed it has been well proved by records that it was a constant habit, from about 1600, in the Scottish lodges, to admit non-masons into the Operative lodges.

There ought not to be a doubt that the same practice prevailed in England at the same time. That there is no proof of the fact is to be attributed to the absence of early English lodge minutes. The Scottish Masons have been more careful than the English in preserving their records.

The minutes of the Scottish lodges, and the one authentic record contained in Ashmole's Diary, furnish sufficient evidence that in the 17th century the Operative Masons were admitting into their society men of wealth and rank, scholars, and members of the learned professions. This was undoubtedly the first step in that train of events

which finally led to the complete detachment of the theoretic from the practical element, and the organization of the present system of Speculative Freemasonry.

The change from an Operative to a Speculative system was very sudden in England. At least, if the change was gradual and foreseen, we can not now trace the progress of events because of the absolute want of records.

In Scotland the change was well marked and its history is upon record. It was much slower than that in England. It was not until nineteen years after the Grand Lodge of England was organized that a similar organization took place in Scotland. And whereas the English lodges all assumed the Speculative character at once, after the Grand Lodge was established, and abandoned Operative Masonry altogether, some of the Scottish lodges, for many years after their connection with the Grand Lodge of Speculative Masonry, retained an Operative character, mingled with the Speculative.

The closing years of the 17th century were marked in Scotland by contests between the Masters and the Journeymen Masons, the former having long secured the dominant power. These contests led in the Lodge of Edinburgh to a secession of the Fellow-Crafts, who having been denied certain privileges, formed an independent lodge, which after some years of conflict with the Mother Lodge received by a decree of arbitration the power of admitting Apprentices and Fellow-Crafts and what appears to have been deemed of vast importance, the privilege of communicating the "Mason Word."

This seems to have been at that time the sum of esoteric instruction received by candidates on their admission.

Another cause of contest in Scottish Masonry at that period was the growing custom of receiving non-professional members into the lodges of Operative Masons. This custom had originated at least a century before, and there are records in the 17th century from its very commencement of the presence in the lodges as members of persons who were not Operative Masons. But in the early part of the 18th century the practice grew to such an extent that at a meeting of the Lodge of Edinburgh in the year 1727, out of sixteen members present only three were operative Masons. And in the same year a lawyer was elected as Warden or presiding officer of the lodge.

In the year 1700 there were several lodges in various parts of Scotland. Although perhaps all of them contained among their members some persons of rank or wealth who were not Masons by profession, still the lodges were all Operative in their character.

Seventeen years afterward the English Operative Masons had merged their society into a Speculative Grand Lodge. The influence of this act was not slow to extend itself to Scotland, where the non-professionals began slowly but surely to dominate over the professional workmen.

In 1721 Dr. John Theophilus Desaguliers, who was the principal founder of the Grand Lodge of England, paid a visit to Edinburgh. He was received as a brother by the lodge, and at two meetings held for the purpose, several gentlemen of high rank were admitted into the fraternity.

As the records of these meetings are of historic importance, as showing the introduction of the new English system of Speculative Masonry into Scotland, I shall not hesitate to give them in the very words of the minute-book, as copied from the original by Bro. Lyon.

"Likeas (likewise) upon the 25th day of the sd moneth (August 1721) the Deacons, Warden, Masters, and several other members of the Societie, together with the sd Doctor Desaguliers having mett att Maries Chapell, there was a supplication presented to them by John Campbell Esqr. Lord Provost of Edinbr., George Preston and Hugh Hathorn, Bailies; James Nimo, Thesuarer, William Livingston Deacon convener of the Trades thereof; and Geroge Irving Clerk to the Dean of Guild Court,—and humbly craving to be admitted members of the sd Societie; which being considered by them, they granted the desire thereof, and the saids honourable persons were admitted and received Entered Apprentices and Fellow Crafts accordingly.

"And siclike upon the 28th day of the said moneth there was another petition given in by Sr. Duncan Campbell of Locknell, Barronet; Robert Wightman Esqr., present Dean of Gild of Edr.; George Drummond Esq., late Treasurer thereof; Archibald McAuley, late Bailly there; and Patrick Lindsay, merchant there, craveing the like benefit, which was also granted, and they received as members of the societie as the other persons above mentioned. The same day, James Key and Thomas Aikman servants to James

Wattson, deacon of the Masons, were admitted and received Entered Apprentices and payed to James Mack, Warden the ordinary dues as such."

There can be no doubt that the object of Desaguliers in visiting Scotland at that time was to introduce into the Scottish lodges the esoteric ritual so far as it had been perfected by himself and his colleagues for the Masons of England. Bro. Lyon very properly suggests that the proceedings of the lodge on that occasion "render it probable that taking advantage of his social position, he had influenced the attendance of the Provost and Magistrates of Edinburg and the other city magnates who accompanied them as applicants for Masonic fellowship in order to give a practical illustration of the system with which his name was so closely associated with a view to its commending itself for adoption by the lodges of Scotland."¹

Hence in these two meetings we see that the ceremonies of entering and passing were performed; or, in other words, that the two new degrees of Entered Apprentice and Fellow-Craft, as practiced in the Grand Lodge of England, were introduced to the Scottish Masons. The degree of Master was not conferred, and for this omission Bro. Lyon assigns a reason which involves an historic error most strange to have been committed by so expert and skilled a Masonic scholar as the historian of the Lodge of Edinburgh and the translator of Findel's work.

Bro. Lyon's words are as follows: "It was not until 1722-23 that the English regulation restricting the conferring of the Third Degree to Grand Lodge was repealed. This may account for the Doctor confining himself to the two lesser degrees."²

But the facts are that the regulation restricted the conferring of the Second as well as the Third degree to the Grand Lodge; that this regulation, instead of being repealed in 1722-23, was not promulgated until 1723, being first published in the Thirty-nine Articles contained in the *Book of Constitutions* of that date; and that it was not repealed until 1725.

Now if it be said that the restriction existed before it was promulgated, having been approved June 24, 1721, and was known to Desaguliers, it would have prevented him from conferring the Second as well as the Third degree.

¹ Lyon, "History of the Lodge of Edinburgh," p. 152.

² *Ibid.*, p. 153.

If, however, the regulation was in force in England in 1721, which I have endeavored heretofore¹ to prove to be very doubtful, Desaguliers, in violating it so far as respected the Second degree, showed that he did not conceive that it was of any authority in Scotland, a country which was not under the jurisdiction of the Grand Lodge of England.

If so, the question arises, why did he not, at the same meeting, confer the Third degree?

The answer is that the Third degree had not yet been fabricated. In the task of formulating a ritual for the new system of Speculative Masonry, Desaguliers, Anderson, and the others, if there were any who were engaged with them in the task, had, in 1721, proceeded no further than the fabrication of the ritual of the First and Second degrees. These degrees only, therefore, he communicated to the Masons of Edinburgh² on his visit to the lodge there. Subsequently, when the Third degree had received its form, it was imparted to the Masons of Scotland. Of the precise time and manner of this communication we have no record, but we know that it took place before the Grand Lodge of Scotland was organized. Lyon says that the year 1735 is the date of "the earliest Scottish record extant of the admission of a Master Mason under the modern Masonic Constitution."³

The visit of Desaguliers and the events connected with it develop at least two important points in the history of Scottish Masonry.

In the first place, we notice the great increase of non-professional members over the working craftsmen, so that in six or seven years after that visit the Speculative element had gained the supremacy over the Operative which led, in the second place, to the adoption of various forms indicative of the growing influence of Speculative Masonry, such as the change of the title of the presiding officer from "Warden" to that of "Master," and the substitution, in the nomenclature of the Craft, of the word "Freemason" for the formerly common one of "Mason."

¹ When treating of the origin of the three degrees.

² The connection of this visit of Desaguliers to Edinburgh with the history of the fabrication of the three degrees of Symbolic Masonry has already been discussed in a previous chapter devoted to that subject.

³ "History of the Lodge of Edinburgh," p. 213.

From all this, and from certain proceedings in the years 1727, 1728, and 1729 connected with the contests between the Theoretic and the Operative members of the lodges, "it may be inferred," says Bro. Lyon, "that, departing from the simplicity of its primitive ritual and seizing upon the more elaborate one of its Southern contemporaries, and adapting it to its circumstances, the ancient lodge of the Operative Masons of Edinburgh had, in a transition that was neither rapid nor violent, yielded up its dominion to Symbolical Masonry and become a unit in the great Mystic Brotherhood that had started into existence in 1717."¹

The next step that was naturally to be taken was the establishment of a Grand Lodge in close imitation in its form and Constitution of that of the similar body which had been previously instituted in the sister kingdom. The record of the occurrences which led to this event is much more ample than the meager details preserved by Anderson of the establishment of the Grand Lodge of England, so that we meet with no difficulty in writing the history.

It had long been supposed, on the authority of the *History* attributed to Laurie, that the Scottish Masons had been prompted to first think of the institution of a Grand Lodge in consequence of a proposition made by William St. Clair of Roslin to resign his office of "Hereditary Grand Master." This is said to have been done in 1736. Lyon, however, denies the truth of this statement, and says that more than a year before the date at which St. Clair is alleged to have formally intimated his intention to resign the Masonic Protectorate, the creation of a Grand Mastership for Scotland had been mooted among the brethren.²

The authentic history is perhaps to be found only in the pages of Lyon's *History of the Lodge of Edinburgh*, and from it I therefore do not hesitate to draw the material for the ensuing narrative.

On September 29, 1735, at a meeting of Canongate Kilwinning Lodge, a committee was appointed for the purpose of "framing proposals to be laid before the several lodges in order to the choosing of a Grand Master for Scotland." At another meeting, on October 15th, the same committee was instructed to "take under consideration proposals for a Grand Master."

On August 4, 1736, John Douglas, a surgeon and member of

¹ "History of the Lodge of Edinburgh," p. 160.

² *Ibid.*, p. 167.

the Lodge of Kirkcaldy, was affiliated with the Lodge of Canongate Kilwinning and appointed Secretary, that he might make out "a scheme for bringing about a Grand Master for Scotland."

On September 20th the lodge was visited by brethren from the Lodge Kilwinning Scots Arms, who made certain proposals on the subject.

The matter was now hastening to maturity, for on October 6th the Canongate Kilwinning Lodge met for the purpose, as its minutes declare, of "concerting proper measures for electing a Grand Master for Scotland." Proposals were heard and agreed to. The four lodges of Edinburgh were to hold a preliminary meeting, when proper measures were to be taken for accomplishing the desired object.

Accordingly delegates from the four Edinburgh lodges, namely, Mary's Chapel, Canongate Kilwinning, Kilwinning Scots Arms, and Leith Kilwinning, met at Edinburgh on October 15, 1736. It was then resolved that the four lodges in and about Edinburgh should meet in some convenient place to adopt proper regulations for the government of the Grand Lodge, which were to be sent with a circular letter to all the lodges of Scotland. A day was also to be determined for the election of a Grand Master, when all lodges which accepted the invitation were to be represented by their Masters and Wardens or their proxies.

The circular, which brought a sufficient number of lodges together at the appointed time to institute a Grand Lodge and elect a Grand Master, is in the following words:

"Brethren: The four lodges in and about Edinburgh, having taken into their serious consideration the great loss that Masonry has sustained through the want of a Grand Master, authorized us to signify to you, our good and worthy brethren, our hearty desire and firm intention to choose a Grand Master for Scotland; and in order that the same may be done with the greatest harmony, we hereby invite you (as we have done all the other regular lodges known by us) to concur in such a great and good work, whereby it is hoped Masonry may be restored to its ancient luster in this kingdom. And for effectuating this laudable design, we humbly desire that betwixt this and Martinmas day next, you will be pleased to give us a brotherly answer in relation to the election of a Grand Master, which we propose to be on St. Andrew's day, for the first

time, and ever thereafter to be on St. John the Baptist's day, or as the Grand Lodge shall appoint by the majority of voices, which are to be collected from the Masters and Wardens of all the regular lodges then present or by proxy to any Master Mason or Fellow-Craft in any lodge in Scotland; and the election is to be in St. Mary's Chapel. All that is hereby proposed is for the advancement and prosperity of Masonry in its greatest and most charitable perfection. We hope and expect a suitable return; wherein if any lodges are defective, they have themselves only to blame. We heartily wish you all manner of success and prosperity, and ever are, with great respect, your affectionate and loving brethren."

This circular letter was accompanied by a printed copy of the regulations which had been proposed and agreed to at the meeting. By these regulations the Grand Master was to name the new Grand Wardens, Treasurer, and Secretary, but the nomination was to be unanimously approved by the Grand Lodge, and if it was not these officers were to be elected by ballot. The requirement of unanimity would be very certain to place the choice of most occasions in the Grand Lodge. The Grand Master was to appoint his own Deputy, provided he was not a member of the same lodge. There were to be quarterly communications, at which the particular lodges were to be represented by their Masters and Wardens with the Grand Master at their head. There was to be an annual visitation by the Grand Master with his Deputy and Wardens of all the lodges in town. There was to be an annual feast upon St. John's day, and several other regulations, all of which were evidently copied from the Articles adopted in 1721 by the Grand Lodge of England and published in 1723 in the first edition of its *Book of Constitutions*.

There were several meetings of the four Edinburgh lodges, and finally, on November 25, 1736, it was agreed that the election of Grand Master should take place in Mary's Chapel on Tuesday, November 30, 1736.

But while these preliminary meetings were being held a rivalry sprung up (as might have been anticipated from the nature of human passions) between two of the lodges, in the choice of the proposed Grand Master.

The Lodge of Edinburgh nominated for that office the Earl of Home, who was one of its members. But the Canongate Kilwinning Lodge, which was really the prime instigator of the movement

for the institution of a Grand Lodge, was unwilling to surrender to another lodge the honor of providing a ruler of the Craft.

William St. Clair, who, notwithstanding the high claims advanced for his family does not appear to have taken any interest in Masonry, had been received as an Apprentice and Fellow-Craft only six months before (May 18, 1736) by the Canongate Kilwinning Lodge, and had been raised to the Third degree only eight days before the election, was placed before the fraternity by the lodge of which he was a recent member, as a proper candidate for the Grand Mastership. It will be seen in the subsequent details of the election that the Canongate Kilwinning Lodge availed itself of a strategy which might have been resorted to by a modern politician.

What Lyon calls "the first General Assembly of Scotch Symbolical Masons" was, according to agreement, convened at Edinburgh on Tuesday, November 30, 1736. There were at that time in Scotland about one hundred particular lodges. All of them had been summoned to attend the convention, but of these only thirty-three were present, each represented by its Master and two Wardens.

While in this scanty representation, only one-third of the lodges having responded to the call, we see that the interest in the legal organization of the Speculative system and the complete abandonment of the Operative had not been universally felt by the Scottish Craft, we find in the method of conducting the meeting that the spirit and forms of the English Constitution had been freely adopted by those who were present.

The list of the lodges which united in the establishment of a Grand Lodge is given both by Laurie's Editor and by Lyon, and it is here presented as an important part of the historical narrative. The lodges present were as follows:

Mary's Chapel,	Dumfermling,
Kilwinning,	Dundee,
Canongate Kilwinning,	Dalkeith,
Kilwinning Scots Arms,	Aitcheson's Haven,
Kilwinning Leith,	Selkirk,
Kilwinning Glasgow,	Inverness,
Coupar of Fife,	Lesmahagoe,
Linlithgow,	St. Brides at Douglas,

Lanark,
 Strathaven,
 Hamilton,
 Dunse,
 Kirkcaldy,
 Journey Masons of Edinburgh,
 Kirkintilloch,
 Biggar,
 Sanquhar,

Peebles,
 Glasgow St. Mungo's,
 Greenock,
 Falkirk,
 Aberdeen,
 Mariaburgh,
 Canongate and Leith,
 Leith and Canongate,
 Montrose.

After the roll had been called, and the draft of the Constitution with the form of proceedings had been submitted and approved, St. Clair of Roslin tendered a document to the convention which was read as follows:

"I, William St. Clair of Roslin, Esquire, taking into my consideration that the Masons in Scotland, did, by several deeds, constitute and appoint William and Sir William St. Clairs of Roslin, my ancestors and their heirs to be their Patrons, Protectors, Judges or Masters; and that my holding or claiming any such jurisdiction, right or privilege might be prejudicial to the Craft and vocation of Masonry, whereof I am a member, and I being desirous to advance and promote the good and utility of the said Craft of Masonry, to the utmost of my power, do therefore hereby, for me and my heirs, renounce, quit claim, overgive and discharge all right, claim or pretence that I or my heirs, had, have or anyways may have, pretend to or claim, to be Protector, Patron, Judge or Master of the Masons in Scotland, in virtue of any deed or deeds made and granted by the said Masons, or of any grant or charter made by any of the Kings of Scotland, to and in favour of the said William and Sir William St. Clairs of Roslin, my predecessors; or any other manner or way whatsoever, for now and ever. And I bind and oblige me and my heirs to warrant this present renunciation and discharge at all hands. And I consent to the registration hereof in the books of Council and Session or any other judges' books competent, therein to remain for preservation, and thereto I constitute . . . my procurators, etc. In witness whereof I have subscribed these presents (written by David Maul, Writer to the Signet) at Edinburgh, the twenty-fourth day of November, one thousand seven hundred and thirty-six years, before these witnesses, George Frazer, deputy auditor of

the excise in Scotland, Master of the Canongate Lodge, and William Montgomery, Merchant in Leith, Master of the Leith Lodge."

This document was signed by W. St. Clair and attested by the two witnesses above mentioned. The reading of it at the opportune moment, just before the election of Grand Master was entered upon, is the strategical point to which reference has already been made. It succeeded in securing, as had been expected by the promoters of the scheme, the immediate election of William St. Clair as the first Grand Master of the Grand Lodge of Scotland.

As a legal instrument the renunciation of his ancestral rights by St. Clair is worthless. Whatever prerogatives he may have supposed that he possessed as a Masonic "Protector, Patron, Judge and Master," referred exclusively to the Guild of Operative Masonry, and could not by any stretch of law have been extended to a voluntary association of Speculative Masons, the institution of which was expressly intended to act as a deletion of the Operative organization whose design and character were entirely cancelled and obliterated by the change from a practical art to a theoretical science. The laws of Operative Masonry can be applied to Speculative Masonry only by a symbolic process. If the Lords of Roslin had even been the "Hereditary Grand Masters" of the stonecutters and builders who were congregated in a guild spirit in the Operative lodges of Scotland, it did not follow that they were by such hereditary right the Grand Masters of the scholars and men of rank, the clergymen, physicians, lawyers, and merchants who, having no connection or knowledge of the Craft of Masonry, had united to establish a society of an entirely different character.

But in a critical point of view in reference to the traditional claims of the St. Clairs to the Hereditary Grand Mastership, this instrument of renunciation is of great value.

It is but recently that the historians of Freemasonry have begun to doubt the statement that James II. of Scotland had conferred by patent the office of Grand Master on the Earl of Orkney, the ancestor of the St. Clairs and on his heirs. Brewster had boldly asserted it in the beginning of the present century, and although it has been more recently doubted whether such patent was issued, the statement continues to be repeated by careless writers and to be believed by credulous readers.

Now the language used by St. Clair in his renunciation before the Grand Lodge of Scotland must set this question at rest. He refers not to any patent granted to his original ancestors the Earls of Orkney, but to the two charters issued in 1601 and 1628 in which not the king but the Masons themselves had bestowed the office of patrons and protectors, first on William St. Clair and afterward on his son.

James Maidment, Advocate, the learned Editor of Father Hay's *Genealogie of the Saint Claires of Roslyn*, comes to this conclusion in the following words:

"Thus the granter of the deed, who it must be presumed was better acquainted with the nature of his rights than any one else could be, derives his title from the very persons to whom the two modern charters were granted by the Masons; and in the resignation of his claim as patron, etc., exclusively refers to these two deeds or any 'grant or charter made by the Crown,' not in favor of William Earl of Orkney, but of William and Sir William St. Clair, the identical individuals in whose persons the Masons had created the office of patron."

But in the excitement of the moment the representatives of the lodges were not prepared to enter into any such nice distinctions.

The apparent magnanimity of Mr. St. Clair in thus voluntarily resigning his hereditary claims had so fascinating an influence that though many of them had been instructed by their lodges to vote for another candidate, St. Clair was immediately elected Grand Master with great unanimity.

The remaining offices were filled by the election of Capt. John Young as Deputy Grand Master; Sir William Baillie as Senior Grand Warden; Sir Alexander Hope as Junior Grand Warden; Dr. John Moncrief as Grand Treasurer; John Macdougall, Esq., as Grand Secretary; and Mr. Robert Alison, Writer, as Grand Clerk.

Upon the institution of the Grand Lodge nearly all the lodges of the kingdom applied for Warrants of Constitution and renounced their former rights as Operative lodges, acknowledging thereby the supreme jurisdiction of the Grand Lodge as the Head of Speculative Masonry in Scotland.

In a review of the proceedings which finally led to the estab-

lishment of a Speculative Grand Lodge in Scotland, several circumstances are especially worthy of remark.

It has been seen that from a very early period, as far back as the close of the 16th century, theoretical Masons, or persons who were a part of the working Craft, had been admitted as members of the Operative lodges. The custom of receiving non-professionals among the brethren was gradually extended, so that in the early years of the 18th century the non-professional members in some of the lodges greatly exceeded the professional.

In this way the transition from Operative to Speculative Masonry was made of easy accomplishment, so that when the Grand Lodge was established, several of the leading lodges which were engaged in the act of organization were already Speculative lodges in everything but the name.

Another event, which exerted a great influence in hastening the change in Scotland, was the visit of Desaguliers in the year 1721 to Edinburgh. He brought with him the ritual of Speculative Masonry, so far as it had then been formulated in England, and introduced it and the newly adopted English lodges into Scotland. Lyon refers to the formation of the Lodge Kilwinning Scots Arms in February, 1729, as one of the results of the Masonic communication between the northern and the southern capitals, which had been opened by this visit of Desaguliers. It was from the beginning a purely Speculative lodge, all of its original members having been theoretical Masons, chiefly lawyers and merchants. It was one of the four Edinburgh lodges which were engaged in the preliminary steps for the organization of the Grand Lodge.

As an evidence of how extensively the theoretical principle had spread, so that the scheme of abandoning the Operative character of the institution must have been easily effected, it may be stated that of the twelve hundred brethren returned to the Grand Lodge as members of the several lodges represented at the first election of officers in that body, one half were persons not engaged in mechanical pursuits.¹

The influence of English Masonry is also seen in the fact that in the middle of the 17th century the English *Legend of the Craft* was known to and used by the Aitcheson's Haven Lodge of Mussel-

¹ Lyon, "History of the Lodge of Edinburgh," p. 176.

burg and the Lodge of Edinburgh as well as other Scottish lodges and was in all probability used in the initiation of candidates. As the two manuscripts which still remain in Scotland are known from their form and language to have been copies of some of the old English Records of the "Legend" and "Charges," no better evidence than the use of them by Scottish lodges could be needed to prove that the English Masonry had been constantly from the 17th century exerting a dominating influence upon the Craft in Scotland which finally culminated in the organization of the Grand Lodge.

Finally, the Grand Lodge of Scotland presents an important and marked peculiarity in the cause and manner of its institution.

The first Grand Lodge of Speculative Masons ever established was the Grand Lodge of England organized in the year 1717 at London. From this Grand Lodge every other Grand Lodge in the world, with one exception, has directly or indirectly proceeded. That is to say, the Grand Lodge of England established in foreign countries either lodges which afterward uniting, became Grand Lodges, or it constituted Provincial Grand Lodges which, in the course of time and through political changes, assumed independence and became national supreme bodies in Masonry.

But however instituted as Grand Lodges, they derived, remotely, the authority for their legal existence from the Grand Lodge of England, so that that venerable body has very properly been called the "Mother Grand Lodge of the World."

The single exception to this otherwise universal rule is found in the Grand Lodge of Scotland. Of all Grand Lodges it alone has derived no authority for its constitution from the English body. The Scottish lodges existed contemporaneously with the English; at a very early period they admitted non-professional members and they began at the beginning of the 18th century to take the preliminary steps for their conversion from an Operative to a Speculative character. In this they were undoubtedly influenced by the English Masons, who about the same time had begun to contemplate the expediency of a similar conversion.

But although while the Scottish lodges, in organizing their Grand Lodge, were undoubtedly led to take the necessary steps by the previous action of the English lodges, and while they borrowed much of the forms and imitated the example of their English

brethren, they derived from them no authority or warrant of Constitution.

The Masonry of Scotland produced from its own Operative lodges its Speculative Grand Lodge, precisely as was the case with the Masonry of England. And in this respect it has differed from the Masonry of every other country where the Operative element never merged into the Speculative, but where the latter was a direct and independent importation from the Speculative Grand Lodge of England, wholly distinct from the Operative Masonry which existed at the same time.

CHAPTER XLI

THE ATHOLL GRAND LODGE, OR THE GRAND LODGE OF ENGLAND ACCORDING TO THE OLD INSTITUTIONS

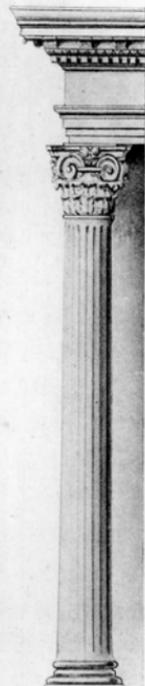

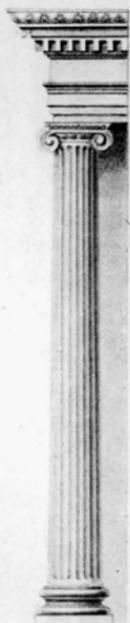

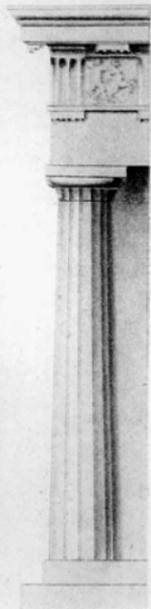

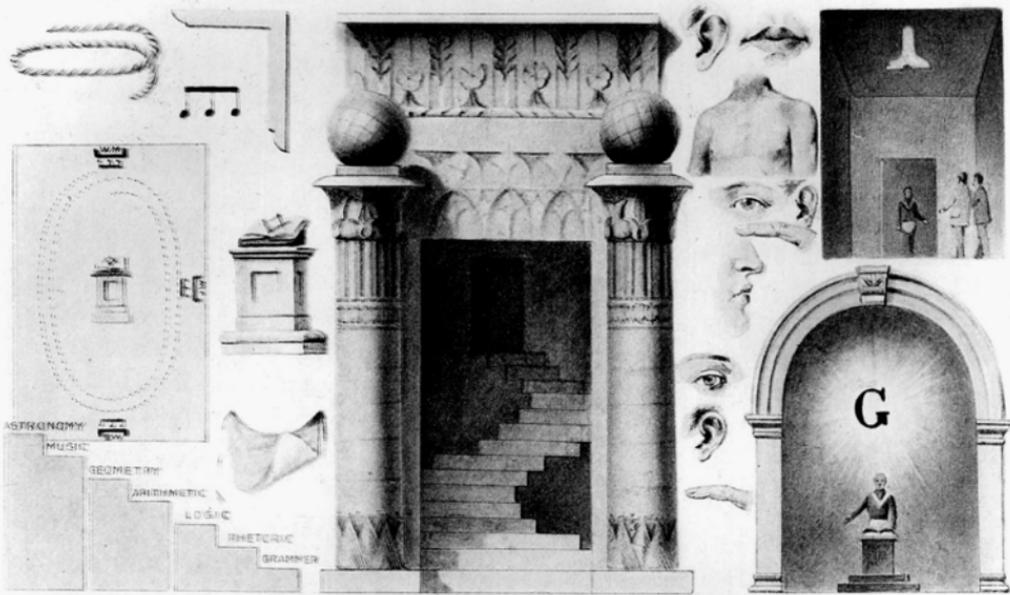

THE first important event in the history of English Freemasonry which seriously affected the harmony of the Fraternity, was the schism which occurred in the year 1753. The interposition of a new and rival authority in the north of England by the self-constitution of a Grand Lodge at the city of York in the year 1725, seems to have created no embarrassment, save in its immediate locality, to the Grand Lodge at London.

The sphere of its operations was limited to its own narrow vicinity, nor, until nearly half a century after its organization, did it seek, by traveling beyond those meager limits, to antagonize, in the south of the kingdom, the jurisdiction of the body at London.

But the schism which commenced at London and in the very bosom of the Grand Lodge in the year 1753, and to the history of which this chapter shall be dedicated, was far more important in its effects, not only on the progress of Speculative Masonry in England, but also in other countries.

The Grand Lodge, which in the above-mentioned year was organized as a successful rival and antagonist of the regular Grand Lodge, has received in the course of its career various names. Styling itself officially the "Grand Lodge of England according to the Old Institutions," it was also called, colloquially, the "Grand Lodge of Ancients," both designations being intended to convey the vain-glorious boast that it was the exponent of a more ancient system of Freemasonry than that which was practiced by the regular Grand Lodge, which had been in existence only since 1717. Upon that later system, as it was asserted to be, the Schismatics bestowed the derogatory designation of the "Grand Lodge of Moderns." And so the schismatic body having been formed by a secession from the

W

W

B

regular and constitutional Grand Lodge, its members were often called the "Seceders." Subsequent writers have been accustomed to briefly distinguish the two rival bodies as the "Moderns" and the "Ancients;" without however any admission on the part of the former of the legal fitness of the terms, but simply for the sake of avoiding tedious circumlocutions.

Another and a very common title bestowed upon the schismatic body was that of the "Atholl Grand Lodge," because the Dukes of Atholl, father and son, presided over it for many successive years, and it has also been sometimes called the "Dermott Grand Lodge," in allusion to Laurence Dermott, who was once its Deputy Grand Master, and for a long time its Grand Secretary, and who was one of its founders, its most able defender, and the compiler of its *Ahiman Rezon*, or Book of Constitutions.

In the present sketch this body will, for convenience, be distinguished as the "Atholl Grand Lodge," and its members as the "Ancients," without, however, the remotest idea of conceding to them or to their Grand Lodge the correctness of their claim for a greater antiquity than that which rightly belongs to the Constitutional Grand Lodge, established in 1717.

The progress of the schism which culminated in the organization of the Atholl Grand Lodge was not very rapid. As far back as 1739, complaints were made in the Grand Lodge against certain brethren, who, as Entick euphemistically phrases it, were "suspected of being concerned in an irregular making of Masons."¹

But the inquiry into this matter was postponed.

At a subsequent quarterly Communication held in the same year the inquiry was resumed, and the offending brethren having made submission and promised good behavior, they were pardoned, but it was ordered by the Grand Lodge that the laws should be strictly enforced against any brethren who should for the future countenance or assist at any irregular makings.²

The language of Entick is not explicit, and it authorizes us to suppose either that the pardon granted by the Grand Lodge was consequent on the submission of the offenders which had been made before the pardon was given, or that it was only promissory and depended on their making that submission.

¹ Entick, "Book of Constitutions," p. 228.

² *Ibid.*, p. 229.

Some may have made the submission and received the pardon, but the reconciliation was by no means complete, for Northouck¹ tells us that the censure of the Grand Lodge irritated the brethren who had incurred it, and who, instead of returning to their duty and renouncing their error, persisted in their contumacy and openly refused to pay allegiance to the Grand Master or obedience to the mandates of the Grand Lodge.

"In contempt of the ancient and established laws of the Order," says Northouck, "they set up a power independent, and taking advantage of the inexperience of their associates, insisted that they had an equal authority with the Grand Lodge to make, pass, and raise Masons."

In the note, whence this passage is taken, and in which Northouck has committed several errors, he has evidently anticipated the course of events and confounded the "irregular makings" by private lodges which began about the year 1739, with the establishment of the Grand Lodge of Ancients, which did not take place until about 1753.

This body of disaffected Masons appears, however, to have been the original source whence, in the course of subsequent years, sprang the organized Grand Lodge of the Ancients.

The process of organization was, however, slow. For some time the contumacious brethren continued to hold their lodges independently of any supreme authority. Nor is it possible, from any records now existing, to determine the exact year in which the Grand Lodge of the Ancients assumed a positive existence.

Preston tells us that the brethren who had repudiated the authority of the Constitutional Grand Lodge held meetings in various places for the purpose of initiating persons into Masonry contrary to the laws of the Grand Lodge.²

Preston also says that they took advantage of the breach which had been made between the Grand Lodges of London and York, and assumed the title of "York Masons." In this statement he is, however, incorrect. There was never any recognition by the London Grand Lodge of the body calling itself the Grand Lodge of York, nor was that Grand Lodge in active existence at the time, having suspended its labors from 1734 to 1761.

¹ Northouck, "Book of Constitutions," p. 240, note.

² Preston, "Illustrations," p. 210, Oliver's edition.

The name of "York Masons," adopted by these seceders, was derived from the old tradition contained in the *Legend of the Craft*, that the first Grand Lodge in England was established by Prince Edwin in 926 at the city of York.

Northouck assigns this reason for the title when he says that "under a fictitious sanction of the Ancient York constitutions, which was dropped at the revival of the Grand Lodge in 1717, they presumed to claim the right of constituting Lodges."¹

The Grand Lodge at London now committed an act of folly, the effects of which remain to the present day. Being desirous to exclude the seceding Masons from visiting the regular lodges, it made a few changes in the ritual by transposing certain significant words in the lower degrees, and inventing a new one in the Third.

The opportunity of raising the cry of innovation (a phrase that has always been abhorrent to the Masonic mind) was not lost. But availing themselves of it, the seceders began to call themselves "Ancient Masons," and stigmatize the members of the regular lodges as "Modern Masons," thus proclaiming that they alone had preserved the old usages of the Craft, while the regulars had invented and adopted new ones.

At this day, when the turbulence of passion has long ceased to exist, and when the whole Fraternity of English Masons is united under one system, it is impossible duly to estimate the evil consequences which arose from this measure of innovation adopted by the Grand Lodge.

If it had made no change in its ritual, but confined itself to the exercise of discipline according to constitutional methods, provided by its own laws, it is probable that the irregular lodges would have received little countenance from the great body of the Craft, and as they would have had no defense for their contumacy, except their objection to the stringency of the Grand Lodge regulations, that objection could have been easily met by showing that the regulations were stringent only because stringency was necessary to the very existence of the institution.

Unsustained by any justification of their rebellion, they would, under the general condemnation of the wiser portion of the Fra-

¹ Northouck, "Constitutions," p. 240, note.

ternity, have been compelled in the course of time to abandon their independent and irregular lodges and once more to come under obedience to their lawful superior, the Grand Lodge of England.

But the charge that the landmarks had been invaded and that innovations on the ancient usages had been introduced, had a wonderful effect in giving strength to the cause of those who thus seemed in their rebellion to be only defenders of the old ways.

"Antiquity," says one who was himself an Ancient York Mason, "is dear to a Mason's heart; innovation is treason, and saps the venerable fabric of the Order."¹

And so the seceders, instead of returning to their allegiance to the legitimate Grand Lodge, persisted in their irregularities, and making new converts, sometimes of individuals and sometimes of entire lodges, which were attracted by their claim of antiquity, at length resolved to acquire permanent life and authority by the establishment of a Grand Lodge to which they gave the imposing name of "The Grand Lodge of England according to the Old Institutions."

But the seceders themselves were not less obnoxious to the charge of innovating on the landmarks. One change in the existing ritual introduced by them was far more important than any mere transposition of passwords. This innovation having been extended by them into all the foreign countries where the Grand Lodge of the Ancients subsequently established lodges or Provincial Grand Lodges, and afterward compulsorily accepted by the Grand Lodge of the Moderns, at the union of the Grand Lodges at London in 1813, has entirely changed the whole system of Freemasonry from that which existed in the constitutional Grand Lodge of England during the 18th century.

This innovation consisted in a mutilation of the Third degree or "Master's Part," and the fabrication of a Fourth degree, now known to the Fraternity as the Royal Arch degree.

"The chief feature in the new ritual," says Brother Hughan, "consisted in a division of the Third degree into two sections, the second of which was restricted to a few Master Masons who were approved as candidates and to whom the peculiar secrets were alone communicated."²

¹ Dalcho, "Ahiman Rezon of South Carolina," second edition, p. 191.

² "Memorials of the Masonic Union," p. 5.

From the year 1723 and onward throughout the 18th century and the early portion of the 19th the Grand Lodge of Moderns practiced only three degrees. The adoption of a Fourth degree by the Grand Lodge of Ancients gave to that body a popularity which it probably would not otherwise have obtained. "Many gentlemen," says Hughan, in the work just cited, "preferred joining the 'Grand Lodge of Four Degrees,' to associating with the society which worked only three." And hence when, in 1813, the two rival bodies entered into a union which produced the present Grand Lodge of England, the Moderns were forced to abandon their ritual of three degrees, and to accept that of the Ancients. So in the second article of the Compact, it was declared "that pure Ancient Masonry consists of three degrees and no more; viz., those of the Entered Apprentice, the Fellow-Craft, and the Master Mason, including the Supreme Order of the Holy Royal Arch."

This was evidently a compromise, and compromises always indicate some previous attempt at compulsion. The constitutional Grand Lodge sought to preserve its consistency by recognizing only three degrees, while it immediately afterward, and in the same sentence, sacrificed that consistency by admitting that there was a Fourth, called the Royal Arch.

The Ancients had clearly gained a victory, but without this victory the union could never have been accomplished. But this subject of the Royal Arch will be more fully discussed when we come to the consideration of the origin and history of that degree.

I have already said that it is impossible to determine the precise year in which the Grand Lodge of Ancients was established. Before its actual organization the brethren of the different lodges appear to have combined under the title of the "Grand Committee." This body, it would seem, subsequently became the Grand Lodge.

The earliest preserved record of the transactions of this Committee has the date of July 17, 1751.¹ On that day there was an Assembly of Ancient Masons at the "Turk's Head Tavern," in Greek Street, Soho, when the Masters of the seven lodges which recognized

¹ Cited by Bro. Robert Freke Gould in his work on "The Atholl Lodges" (p. 2), to which work I am also indebted for valuable information in the way of quotations from the "Atholl Records." This is the earliest date cited in the "Atholl Records."

the Grand Committee as their head,¹ namely, lodges Nos. 2, 3, 4, 5, 6, and 7, "were authorized to grant Dispensations and Warrants and to act as Grand Master."

The first result of this unusual and certainly very irregular authority conferred upon all the Masters of private lodges to act as Grand Master was the Constitution in the same year of a lodge at the "Temple and Sun," Shire Lane, Temple Bar, which took the number 8, and this appears to have been the first Warrant issued by the Ancients.

The Warrant, which is in favor of James Bradshaw, Master, and Thomas Blower and R. D. Guest, as Wardens, is signed by the Masters of lodges Nos. 3, 4, 5, and 6. This would imply that the authority and prerogatives of a Grand Master were conferred not upon each Master, individually, but upon the whole of them, collectively, or at least upon a majority of them. These Masters constituted a body which in its exercise of the prerogatives of a Grand Master has since found its analogue in the "Council of the Order" into which the Grand Orient of France has for some years merged its Grand Mastership, though the mode of organization of the latter body materially differs from that of the former.

This "Grand Committee," whose presiding officer was called the "President," exercised the functions of a Grand Lodge without the name until the close of the year 1752. In 1751 it granted Warrants for two other lodges, numbered respectively 9 and 10; in 1752 it constituted five more, respectively numbered as 11, 12, 13, 14, and 15.

It will be seen that in its legislation the Grand Committee refers only to No. 2 as its oldest lodge. No. 1 must, however, have existed, though not named as such in the records. But in the list of Atholl Lodges given by Bro. Gould, No. 1 is stated to have been called the "Grand Master's Lodge," and its Warrant is dated August 13, 1759. In 1751 and 1752 it could not, however, have borne this title, because during those years there was no Grand Master recognized by the Ancients.

It was probably the senior lodge, the first which seceded from

¹ Bro. Gould thinks that this "Grand Committee," which subsequently was developed into a Grand Lodge, was no doubt originally the senior private lodge of the Ancients. *Ibid.*, Preface, p. ix.

the legitimate Grand Lodge, and with which Nos. 2, 3, 4, 5, 6, and 7 subsequently united.

These were lodges which on account of their irregularities and schismatic proceedings had been stricken from the roll of the Grand Lodge of England, and having assumed the name of Ancient Masons, had enrolled themselves under the lead of the oldest of their companions in secession.

This older lodge appears to have been the body known at first as the Grand Committee and which, some time after the organization of a Grand Lodge, received the title of "The Grand Master's Lodge" and the precedence of lodges as No. 1.

It is only in this way that we can reasonably explain the apparent anomaly that of the seven lodges which must have been engaged in 1751 in the work of the Ancients, no mention is made of No. 1, but that upon No. 2, with the five other lodges of later numbers, was conferred the functions of a Grand Master and the power of warranting lodges, while no mention is made of No. 1, the oldest of the seven. The fact was that No. 1 constituted the really governing body, known until a Grand Lodge was established as the Grand Committee. Bro. Gould, who has very carefully investigated the history of the Atholl lodges, entertains the same opinion.

He says: "The 'Grand Committee' of the 'Ancients,' which subsequently developed into their 'Grand Lodge,' was, no doubt, originally their senior private lodge, whose growth, in this respect, is akin to that of the Grand Chapter of the 'Moderns,' which, commencing in 1765 as a private Chapter, within a few years assumed the general direction of the R. A. Masonry, and issued Warrants of constitution."¹

Of this Grand Committee John Morgan was, in 1751, the Secretary. He appears to have been very remiss in the performance of his duties. His successor, Laurence Dermott, who was elected Secretary or Grand Secretary of the Committee February 5, 1752, reported that he had received "no copy or manuscript of the Transactions" from Morgan, and did not believe that that officer had ever kept a book of records. This neglect has thrown much obscurity on the early periods of the history of the Ancients.

The "Grand Lodge of England, according to the old Institu-

¹ "The Atholl Lodges," Preface, p. ix.

tions," appears to have been organized as a Grand Lodge on December 5, 1753, for on that day Robert Turner, the Master of Lodge No. 15, was elected the first Grand Master. Laurence Dermott, who was at that time the Secretary of the Grand Committee, became the Grand Secretary of the new Grand Lodge, and continued in that office until the year 1770.

In writing a sketch of the Grand Lodge of "Ancients," it would not be fitting to the prominent position he occupied in its history to give to Dermott only an incidental notice. First as its Grand Secretary, and afterward as Grand Master, he gave to the scheme of organizing a body rivaling that of the Constitutional Masons, a factitious luster which secured it an extraordinary share of popularity. It must be admitted that this was, in great part, accomplished by scandalous statements, devoid of truth; while such a course must detract from his moral character, we can not deny to him the reputation of being the best informed and the most energetic worker of all the disciples and adherents of the so-called "Ancient Masonry." In the early years of the Grand Lodge of "Ancients" we look in vain for the name of any officer or member distinguished for social rank or literary reputation. We look in vain, among those who were prominent in its history, for such scholars as Anderson or Payne or Desaguliers. The name of Dermott shows the only star in its firmament, not indeed peculiarly effulgent in itself, but whose brilliance is owing to contrast with the obscurity of those which surround it.

In some well written "Studies of Masonic History," published in Mackey's *National Freemason*, Bro. J. F. Brennan has thus described the successful efforts of Dermott to establish the popularity of his Grand Lodge.

"The history of that period, so far as concerns Laurence Dermott's strenuous and persistent determination to establish upon a firm foundation his Grand Lodge, has, except in slight degree, never been published, if it has ever been written. Enough to say, that notwithstanding the most earnest antagonism manifested towards him by the 1717 organization, or its then succession, he triumphantly did succeed, and not only divided the profits of Grand Lodgeism with the earlier organization in London, but as well led the Grand Lodges of Ireland and Scotland to believe that the 1717 organization was a spurious body and therefore unworthy of recog-

dition by those Grand Lodges while his Grand Lodge was really and properly the true Grand Lodge of English Freemasons. And not only did he thus succeed, but he also induced Freemasons in the then British American Colonies, which subsequently became the United States, particularly in Pennsylvania, Massachusetts, New York, North Carolina, Virginia and South Carolina to believe that in his Grand Lodge of Ancient York Masons, alone was true Freemasonry extant; and so well did he succeed that while in several of those colonies he established under his Charter lodges assuming to be Grand Lodges, in Pennsylvania, notably, he induced all the lodges there already and for several years established to surrender their Charters and accept from him Charters preferably, and as authority for their practice of what he designated the real Ancient York and only true Masonry recognized or properly recognizable, and his *Ahiman Rezon*, a plagiaristic adaptation of the 1723¹ publication of Anderson, the only correct 'Book of Masonic Constitutions.' "²

Of a man so successful in intrigue we know but little, save what we derive from his connection with the body which he served so faithfully. Unlike Anderson and Desaguliers and Payne and Folkes and other lights of the legitimate Grand Lodge, he wrote nothing and did nothing, outside of Masonry, which could secure his memory from oblivion.

Laurence Dermott was born in Ireland in the year 1720. In 1740 he was initiated into Freemasonry in a Modern lodge at Dublin, and on June 24, 1746, was installed as Master of Lodge No. 26 in that city.

It is undeniable that Dermott was a man of some education. Brother Gould says³ that "besides English and his native Irish, Dermott seems to have been conversant with the Jewish tongue. All the books kept by him as Grand Secretary are plastered over with Hebrew characters, and the proceedings of the Stewards' lodge record, under date of March 21, 1764, 'Heard the petition of G. J. Strange, an Arabian Mason, with whom the Grand Secretary conversed in the Hebrew language.'" The *Ahiman Rezon*, while the

¹ Brennan is here in error; the plagiarism, of which there is no doubt, is of the 1738 and not the 1723 edition of Anderson's "Constitutions."

² Mackey's "National Freemason," Washington, 1872, vol. i., p. 302.

³ Cited in the "Keystone," November 6, 1880.

title indicates a smattering at least of Hebrew, gives several proofs that Dermott was a man of some reading. He was not a profound scholar, but he was far from being illiterate.

In what year he removed to England is not known, but he afterward joined a lodge under the jurisdiction of the Constitutional Grand Lodge. In 1751 he removed his membership to Lodge No. 1, on the registry of the "Ancients," and was a member of it when on February 5, 1752, he was elected Grand Secretary of the seceders' Grand Lodge. From that time he devoted all his energies and what abilities he possessed to the advancement of the cause of the "Ancients," with what success has already been seen.

He was appointed Deputy Grand Master on March 2, 1771, by the third Duke of Atholl, who had just been elected Grand Master. On December 27, 1777, he resigned that position, and at his request W. Dickey was appointed as his successor by the fourth Duke of Atholl. He was again appointed Deputy on December 27, 1783, and was, at his own request, succeeded, on December 27, 1787, by James Perry, who was appointed by the Earl of Antrim, Grand Master at that time. Dermott's last appearance in the Grand Lodge was on June 3, 1789, after which period he is lost sight of.

During this long period of thirty-seven years Laurence Dermott was untiring in his devotion to the interests of the "Grand Lodge of England according to the Old Institutions," and to the propagation of what was called "Ancient York Masonry."

Six years after its organization the legitimate Grand Lodge, established in 1717, had prepared and published a *Book of Constitutions*. Dermott felt it necessary that his own Grand Lodge should also have a code of laws for its government.

Accordingly, in 1756 he published the Constitutions of the Grand Lodge of which he was the Grand Secretary, under the following title:

Ahiman Rezon: or a Help to a Brother, showing the Excellency of Secrecy and the first cause or motive of the Institution of Freemasonry; the Principles of the Craft and the Benefits from a Strict Observance thereof etc., also the Old and New Regulations, etc. To which is added the greatest collection of Masons Songs, etc. By Laurence Dermott, Secretary.

Other editions, with the title much abbreviated, were published subsequently, the last, by Thomas Harper, in 1813, the year before the union of the two Grand Lodges.

The third edition, published in 1778, has a much briefer title. It is the *Ahiman Rezon: or a Help to all that are, or would be Free and Accepted Masons, with many Additions.* By Lau. Dermott, D. G. M.

In this work, partly in an address "To the Reader" (pages i-xxi), and in what he calls "A Phylacterlal¹ for such Gentlemen as may be inclined to become Free-Masons" (pages xxii to xxviii), he gives a confused history of the origin of the Grand Lodge of Moderns and of his own Grand Lodge, claiming, of course, for the latter a priority of date, and decrying the former as a spurious innovation on genuine Freemasonry.

His attempted history is, on account of its meager details and its assumptions, unsupported by any authority, utterly without value. As a specimen of its worthlessness as an historical document, the following narrative of the Grand Lodge at London in 1717 affords a fair sample:

"About the year 1717," he writes, "some joyous companions who had passed the degree of a craft (though very rusty) resolved to form a lodge for themselves in order (by conversation) to recollect what had been formerly dictated to them, or if that should be found impracticable, to substitute something new, which might for the future pass for masonry amongst themselves. At this meeting the question was asked whether any person in the assembly knew the Master's part, and being answered in the negative, it was resolved, *nem. con.*, that the deficiency should be made up, with a new composition, and what fragments of the old order found amongst them should be immediately reformed, and made more pliable to the humors of the people."²

In this absurd way he proceeds to account for the invention of a ritual by the "Moderns," which they adopted as a substitute for the genuine possessed by the "Ancients."

¹ This is a Greek word, but improperly spelt by Dermott, and signifies a precaution or warning. Dermott appears to have been, like most smatterers, fond of using words borrowed from the dead languages, and incomprehensible or puzzling to plain readers. Witness his "Ahiman Rezon," the name which he gives to his Book of Constitutions, the prayer which he calls "Ahabath Olam," and this "Phylacteria." "A little learning," says Pope, "is a dangerous thing," and that seems to have been Dermott's infirmity.

² Dermott's "Ahiman Rezon," third edition, p. 35.

Recent researches into the history of the ritual and the formation of the three degrees which, with the addition of the Royal Arch, constitute what is called "Ancient Craft Masonry," make it unnecessary to prove by an argument that all of Dermott's statements on this subject are utterly false and the mere figment of his own invention.

It is indeed extraordinary that this unscrupulous writer should have had the audacity to assert that he and his followers were in possession of a system of Speculative Freemasonry much older than that which was practiced by the Grand Lodge, organized in 1717, and that they derived their authority to open and hold their lodges from this more ancient system.

The fact is that Dermott himself, like every one of those who before his appearance on the stage had separated from the Constitutional Grand Lodge and established what they called "Lodges of Ancient Masons," was originally made in a lodge of Moderns. Whatever he knew of Speculative Freemasonry was derived from a lodge in Ireland which had derived its authority and learned its lessons from the 1717 Grand Lodge at London.

The first schism, which took place in 1738, was not pretended to be based on the fact that the seceders were desirous of practicing an older and purer Masonry than that professed by the Grand Lodge at London. It was because they were unwilling to submit to the constitutional regulations which had been established by the Grand Lodge and because their irregular proceedings, in violation of those regulations, had met with necessary censure and deserved punishment.

It is true that after the secession and consequent erasure from the roll of these contumacious lodges, the Constitutional Grand Lodge, to prevent the visits of irregular Masons, had most unwisely made a few alterations in the modes of recognition.

These alterations were not adopted by the seceders, but retaining the old methods which had been in use, certainly as far back as 1723, some of them still earlier, they claimed to be "Ancient Masons," because they adhered to the old forms, while they stigmatized the Masons who still maintained their allegiance to the Constitutional Grand Lodge as "Moderns," because they practiced the new methods.

And this is in fact all there really is about this dispute concern-

ing "Ancients" and "Moderns," which for so many years distracted the English Craft, and the remembrance of which is to this day preserved and perpetuated in America, where Dermott Masonry at one time prevailed to a very great extent, by the title assumed by several Grand Lodges of "Ancient York Masons."

The hypothesis that there was any Speculative Freemasonry distinct from Operative Freemasonry that can be traced to an earlier origin than that of the Grand Lodge established in 1717, was a fiction invented by its propagators under the influence of interested motives and ignorantly accepted by their successors as an historical fact.

We know from documents now extant that Laurence Dermott, who was entered, passed, and raised in a lodge of what he afterward called a lodge of "Moderns," who afterward presided over a lodge of the same character in Ireland, and on his removal to England renewed his connection with a Modern lodge, and so remained until he was elected the Grand Secretary of the Grand Lodge of "Ancients."

It is almost impossible to believe, that with the knowledge which he must have had of current events, he could have honestly been of the opinion that there was any Speculative Freemasonry, or any Grand Lodge of Speculative Freemasonry, older than that established in 1717.

He must have known, too, while he was stigmatizing this body as illegal and sarcastically styling the system which it practiced "the memorable invention of modern masonry," that from it, and from it alone, every lodge of Speculative Masons, his own lodges included, either directly or indirectly had derived the authority for their existence.

Nothing more clearly shows the insincerity of Dermott's denunciation of the Grand Lodge of "Moderns" than his conduct in reference to the Regulations. It is known that in 1721 the Grand Lodge approved the "General Regulations of the Free and Accepted Masons," which had been compiled the year before by Grand Master Payne. In 1723 these were published by authority of the Grand Lodge, together with the "Old Charges," which had been "collected from the old Records" and "the manner of Constituting a New Lodge" as practiced by Grand Master the Duke of Wharton.

In 1738, by authority of the same Grand Lodge, a second edition

of the *Book of Constitutions* was published under the editorship of Dr. Anderson. In this edition Anderson made some material changes in the language of the "Old Charges," and in "the manner of Constituting a New Lodge," so as to adapt them to the changes in the Ritual by which the Master Mason superseded the Fellow-Craft as the crowning degree of Speculative Freemasonry. He also published the "General Regulations" in two columns; in the first were the "Old Regulations," printed without change, and in the other column, opposite to them, were "the New Regulations, or the Alterations, Improvements or Explications of the Old, made by several Grand Lodges since the first edition."

Now this second edition, having after inspection of the manuscript been "approved and recommended" by the Grand Lodge, "as the only *Book of Constitutions* for the use of the lodges,"¹ became the law for the government of those whom Dermott had called the "Modern Masons," and the organization of which he had declared to be "defective in number and consequently defective in form and capacity."²

If such were his honest opinion, then he must have believed that the Grand Lodge of 1717, so constituted, was an illegal body, and consequently incapable of enacting any laws or regulations or instituting any ceremonies which could be of binding force upon the Fraternity which derived its existence from an older institution.

But we find that so far from repudiating the laws enacted by this illegal and defective organization, he adopted them in full for the government of his own Grand Lodge, which he had claimed to be the only perfect and legal one.

Therefore, when he compiled his *Ahiman Rezon* and bestowed it upon the "Ancients" as their Book of Constitutions, Dermott, instead of seeking laws for its government in that older system, whose parentage he claimed, deliberately appropriated from the 1738 *Book of Constitutions*, without a change, except here and there a brief marginal comment, the whole of the "Old Charges," the "Old and

¹ Anderson's "Constitutions," edition of 1738, p. 199. In the next edition the editor, Entick, restored the original phraseology of 1723, but the "Charges" and "Regulations" in the edition of 1738 continued to be the law of the Grand Lodge for eighteen years, and were so when Dermott adopted them for the government of his Grand Lodge.

² Dermott's "Ahiman Rezon," p. xiv.

New Regulations," and "the manner of Constituting a New Lodge."

The irresistible conclusion from this is that while pretending to believe that the organization of 1717 was invalid and an innovation on an older system from which he and his adherents denied their existence, Dermott actually knew and felt that the organization was valid and legitimate, that the Grand Lodge then formed was regular and constitutional, and that the laws and regulations adopted by it were the only constitutional authority for the government of the Craft.

There can be no doubt that Dermott was insincere in his professions and consciously untruthful in his statements, and that while the Masonic schism was made by him the instrument for advancing his own interests, he was well aware that all his pretensions as to the superior antiquity of his own Grand Lodge, and his denunciations of the Grand Lodge of 1717 as a modern and illegal organization, were false.

But the rapid progress made by the Grand Lodge of "Ancients" in the popular regard, which, in the beginning was mainly attributable to the untruthful statements and the specious arguments of Dermott, for many years threw a veil over the defects of his character.

"Throughout his eventful career," says Hughan, "he always managed to secure a good working majority in his favor, and the extraordinary success of the schism was an argument in confirmation of his views, which the most of his followers acknowledged."¹

Success, says Seneca, makes some crimes honorable, and Dermott, the falsifier of history, had for a long time an honorable name in England and America among the adherents of the Grand Lodge of which he was, if not the founder, certainly the chief supporter.

It is here proper to say a few words in relation to Dermott's connection with the fabrication of the Royal Arch degree. This degree, which Dermott enthusiastically calls "the root, heart, and marrow of masonry,"² was, undoubtedly, one of the most efficient elements in giving popularity to the lodges of the "Ancients," because it presented as an additional and much extolled degree, an incentive to candidates which was wanting in the lodges of the "Moderns."

¹ Hughan, "Memorials of the Masonic Union," p. 8.

² Dermott, "Ahiman Rezon," second edition, 1764, p. 46.

It is, however, incorrect to credit Dermott (as has been done by many writers) with its invention or even its introduction into the system of the "Ancients." It was known to and practiced by the schismatic lodges, who were censured for their "irregular makings" as early as 1738, by the Constitutional Grand Lodge. Dermott, as we have seen, was made in a "Modern" lodge in Ireland, became affiliated with a Modern lodge in London when he removed to England, and could have known nothing of the Royal Arch degree until he joined No. 9, an "Ancient," in 1751.

That he afterward cultivated and perhaps enlarged or improved the degree, and gave to it a prominence which it did not at first possess, is not improbable. But it is an error to attribute to him its invention.

But this subject will be more appropriately and more fully treated in the Chapter to be devoted to the History of the Origin of the Royal Arch degree.

The third and fourth Dukes of Atholl played so prominent a part in the history of the Grand Lodge of "Ancients" as to give to that body, as has already been said, the distinctive title of the "Atholl Grand Lodge." It is indeed to the social influence of these noblemen, combined with the shrewdness and indomitable energy of Laurence Dermott, that the Grand Lodge was indebted for the remarkable success which it achieved.

The Grand Lodge at the date of its organization out of the "Grand Committee" had elected, on December 5, 1753, Robert Turner, who was the Worshipful Master of Lodge No. 15, as Grand Master. In 1754 Edward Vaughan was elected to that office. In 1756 the Earl of Blessington received the Grand Mastership, and was succeeded in 1760 by the Earl of Kelly, who, after five years of service, was followed in 1766 by the Hon. Thomas Mathew, who served until 1771.

In 1771 John, the third Duke of Atholl, was elected Grand Master. The Duke was a member of the Scottish Craft, and in the following year was elected Grand Master of the Grand Lodge of Scotland, so that, as he continued in his English office until his death, in 1774, he was at the same time Grand Master both of the Grand Lodge of Scotland and of the "Ancient" Grand Lodge of England. The effect of this unusual concurrence of two offices, whereby the leadership of the Craft in two countries was vested in the same person,

was seen in a close union which about that time was cemented between the Grand Lodge of Scotland and that of the "Ancients" in England.

In 1782 the Earl of Antrim was elected Grand Master, and served until 1790. From 1773 to 1779 the Earl had been Grand Master of the Grand Lodge of Ireland.

This shrewd policy of electing leading Masons in the two sister kingdoms to the highest position in the "Ancient" Grand Lodge of England, very soon displayed the effect which Dermott had wisely expected to be produced.

On September 2, 1771, the Grand Lodge of "Ancients," meeting at the "Half Moon Tavern" in Cheapside,¹ Laurence Dermott being in the chair as Deputy Grand Master, adopted the following resolution, which the Grand Secretary was ordered to transmit to the Grand Lodge of Ireland:

"It is the opinion of this Grand Lodge that a brotherly connection and correspondence with the Right Worshipful Grand Lodge of Ireland has been and will always be found productive of honor and advantage to the Craft in both kingdoms."

At the same time it was ordered that the Grand Secretary should annually transmit to the Grand Lodge of Ireland the names of officers elected and any other information that might be of interest to the Craft.

It was further ordered that no Mason made under the sanction of the Grand Lodge of Ireland should be admitted as a member nor partake of the General Charity of the Grand Lodge of England unless he produced a certificate from the Irish Grand Secretary.²

At the same meeting, on the proposition of Dermott, a correspondence was ordered to be opened with the Grand Lodge of Scotland.

The response from both the Grand Lodges of Ireland and of Scotland was very satisfactory to the "Ancients."

On November 5, 1772, the Grand Lodge of Ireland, Viscount

¹The Half Moon in Cheapside was, during the 17th and 18th centuries, a tavern of some notoriety. Ashmole records in his Diary, under date of March 11, 1682, that he was at "a noble dinner given at the Half Moon Tavern in 'Cheapside.'" The Grand Lodge of Ancients met there, but subsequently removed to the Crown and Anchor.

²Dermott had previously opened a correspondence with Thomas Corker, the Deputy Grand Secretary of Ireland, to prepare the way for this action. See "Ahiman Rezon," edition of 1778, p. lvi.

Dunluce being Grand Master, adopted a resolution which declared that it entirely agreed with the Grand Lodge of England that a brotherly connection and correspondence between the two Grand Lodges had been and always would be found of honor and advantage to the Craft in both kingdoms.¹

It was also ordered that the particular occurrences of the Grand Lodge of Ireland should from time to time be continued to be transmitted to the Grand Secretary of England, and that "hereafter no English Mason shall be considered worthy of their charity without producing a certificate from the Grand Lodge of England."

The letter suggested by Dermott was sent to the Grand Lodge of Scotland. It was of the same purport and almost in the same language as that transmitted to Ireland, except that the Grand Lodge of England expressed the opinion that a brotherly connection and correspondence with the Grand Lodge of Scotland "will be found productive of honor and advantage to the fraternity in general."

There is no reference, as I have stated in the preceding note, to any former correspondence, but only the proposal for a future one.

On November 30, 1772, the Earl of Dumfries being Grand Master, and the Duke of Atholl being present as Grand Master elect, the letter and resolution of the "Grand Lodge of England according to the Old Institutions" being read (so says the record), "the Grand Lodge were of opinion that the brotherly love and intercourse which the Right Worshipful Grand Lodge of England were desirous to establish would be serviceable to both Grand Lodges and productive of honor and advantage to the fraternity."²

The Grand Lodge of Scotland accordingly commenced the correspondence by transmitting the names of the officers that day elected, and ordered the same to be done yearly, together with any other information that might be of honor and advantage to the Craft.

It also ordered "that no Mason, made under the sanction of the

¹ The use of the word "continued" and the phraseology in the resolution of both bodies that a brotherly connection and correspondence "have been and always will be" would indicate that such a connection and correspondence had previously existed between the two Grand Lodges. This phraseology is not used by the Grand Lodge of England in the resolution sent to the Grand Lodge of Scotland, nor is it employed by that body in its responsive resolution. In both, the reference is only to a future correspondence.

² Laurie, "History of Freemasonry," p. 208. Dermott, "Ahiman Rezon," p. lx.

'Grand Lodge of England according to the Old Institutions,' shall be admitted a member of the Grand Lodge of Scotland, nor partake of the general charity without having first produced a certificate of his good behavior from the Secretary of the Grand Lodge of England."¹

The reader will notice a very important difference in the phraseology of the orders of the two Grand Lodges of Ireland and Scotland, which if intentionally made would indicate the feelings of each to the Constitutional Grand Lodge of England.

The Grand Lodge of Ireland, addressing the Grand Lodge of "Ancients," calls it "the Grand Lodge of England," and refuses recognition to any "English Mason" who does not produce a certificate from it.

The necessary effect of this order would be to repudiate the Grand Lodge of "Moderns" and to place all its members under the ban as illegal Masons. It is very evident that no member of a lodge of "Moderns" would seek or obtain a certificate from the Grand Lodge of "Ancients," and without this, if he visited Ireland, he would be debarred by the terms of the Order from all his Masonic rights and privileges. Such an order would, according to the views of the present day, be considered as a recognition of the Grand Lodge of "Ancients" as the only regular Masonic authority in England.

The Grand Lodge of Scotland was more prudent in its choice of language. It specifically designated the body in England with which it was about to establish a brotherly correspondence as "the Grand Lodge of England according to the Old Institutions," and required only Masons made under its sanction to present its certificates. Thus we may justly infer that Masons made under the sanction of the Grand Lodge of "Moderns" were not excluded from Masonic visitation if they had the certificate of their own Grand Lodge.

The Grand Lodges of Ireland and Scotland, however, subsequently reconsidered their action and eventually assumed the position of neutrality or indifference in the contest, but, says Hughan, "during the period that they especially countenanced the refractory brethren, the latter made considerable out of the fact, and proclaimed their alliance with these two Grand Lodges far and near."²

¹ Laurie, "History of Freemasonry," p. 208. Dermott, "Ahiman Rezon," p. lx.

² Hughan, "Masonic Memorials," p. 14.

Looking at the subject from the legal stand-point of the present day, one can not but be greatly surprised at the action taken by the Irish and Scottish Masons.

Here are two Grand Lodges, the former of which was indebted to the legitimate Grand Lodge of England for its organization and the latter for its ritual, deliberately ignoring that body and acknowledging as legitimate a schismatic association which their ancient ally had declared to be irregular.

Evidently Masonic jurisprudence had not then assumed those formal principles by which it is now distinguished and by which it governs the institution.

Scarcely less surprising is it that the Constitutional Grand Lodge of England appears to have taken no notice of these proceedings, nor entered any protest against their want of comity. Neither Preston nor Northouck, in their chronicle of the times, make any reference to this manifest invasion of legitimate authority. It is passed over by both in silence as something which they either deemed inexplicable or not worthy of mention.

The Grand Lodge itself, when four or five years after it repeated its denunciation of the "Ancients," treated the two Grand Lodges which had sustained its rival with a courtesy which under similar circumstances at this day it would hardly repeat.

On April 7, 1777, the Constitutional Grand Lodge held an "extraordinary" communication to take into consideration "the proper means of discouraging the irregular assemblies of persons calling themselves ancient masons," when the following resolution was passed:

"It is the opinion of this Grand Lodge, that the persons calling themselves ancient masons, and now assembling in England or elsewhere, under the patronage of the Duke of Atholl are not to be considered as masons, nor are their meetings to be countenanced or acknowledged by any lodge or mason acting under our authority. But this censure shall not extend to any mason who shall produce a certificate or give other satisfactory proof of his having been made a mason in a regular lodge under the Constitution of Scotland, Ireland, or any foreign Grand Lodge in alliance with the Grand Lodge of England."¹

¹ Northouck, "Constitutions," p. 323.

So the Grand Lodges of Ireland and Scotland were recognized by the Constitutional Grand Lodge as in friendly alliance with it, notwithstanding that the one had repudiated all English Masons who were not "Ancients," and the other had acknowledged the Grand Lodge of "Ancients" as a regular and legally constituted organization.

The comparison which is thus afforded of the energy of the "Ancients" and the apathy of the "Moderns" would alone sufficiently account for the rapid success and growing popularity of the former body, were there no other causes existing to produce the same result.

It was very natural that the "Ancient" Grand Lodge, elated by this success and popularity, should in an official document issued in 1802 have declared that its members "can not and must not receive into the body of a just and perfect lodge, nor treat as a Brother any person who has not received the obligations of Masonry according to the "Ancient" Constitutions as practiced by the United Grand Lodges of England, Scotland, and Ireland, and the regular branches that have sprung from their sanction."¹

The schismatics had now claimed to be regular, and the regular Masons were relegated by them to the realms of schism. It is the nature of men, says the Italian historian Guicciardini, when they leave one extreme in which they have been forcibly held to rush speedily to the opposite. Just before the middle of the 18th century the "Ancient" Masons, who were embraced in only a few lodges, were accepting the censures of the Constitutional Grand Lodge for their irregularities, and were humbly but not sincerely making promises of reformation. At its close they were denouncing their old masters as irregular and proclaiming themselves to be the only true Masons in England.

Mention has been frequently made of the successful progress of the "Ancients" in the propagation of their system. The authentic records of the time afford the most satisfactory evidence of this fact.

Commencing its organized opposition to the regular Grand Lodge in 1751, under a superintending head styled the "Grand Committee," which was in fact the premier lodge, and six others, it constituted in 1751 and 1752 seven others. In 1753 these lodges

¹ See the edition of the "Ahiman Rezon," 1804, p. 130.

organized the "Grand Lodge of England according to the Old Institutions." In the course of the next four years it constituted thirty additional lodges in London and ten more in various parts of the kingdom, namely, two at Bristol, three at Liverpool, and one each at Manchester, Warrington, Coventry, Worcester, and Deptford, so that at the end of the year 1757 there were or had been fifty-four lodges in England acknowledging allegiance to the "Ancient" Grand Lodge.

But its operations were not confined to the narrow limits of the kingdom. Lodges and a Provincial Grand Lodge were established in Nova Scotia as early as 1757, and in a few years there were lodges and Provincial Grand Lodges in Canada, in the American colonies, in the West, at Minorca in the Mediterranean, in the distant island of St. Helena, and in the East Indies.

In 1774 the third Duke of Atholl died, being at the time, as he had been since 1771, the Grand Master of the "Ancients."

His son and the successor to his title, John the fourth Duke, was not a Mason at the time of his father's death. On February 25, 1775, as we learn from the Minutes of the Grand Committee,¹ he received the first three degrees in the Grand Master's Lodge of Ancient Masons, and was immediately chosen as Master of that lodge. On March 1st, in the same year, only four days after his initiation, he was unanimously elected to succeed his father as Grand Master.

The object of Dermott and his companions in thus elevating a mere tyro to the magistral chair was simply to retain for their Grand Lodge the great influence and patronage of the Scottish House of Atholl. In 1782 the Duke was succeeded by the Earl, afterward the Marquis, of Antrim, an Irish nobleman, who held the office of Grand Master until 1791.

The Duke of Atholl was then re-elected, and continued to preside over the Grand Lodge until the year 1813, when he resigned and was succeeded by the Duke of Kent, who assumed the office as a preliminary step toward the union of the two Grand Lodges, which was consummated in that year.

The following is a correct list of the Grand Masters of the "Grand Lodge of England according to the Old Institutions," or

¹ Cited by Bro. Gould in his "Atholl Lodges," p. i.

more familiarly speaking, the "Grand Lodge of Ancients," or the "Atholl Grand Lodge," from its birth to its death. It was first compiled by Bro. W. J. Hugan, and published in his *Masonic Memorials*. I have verified it (though verification was hardly necessary of so accurate an historian) by collation with other authorities.

1753,	Robert Turner,
1754-55,	Edward Vaughan,
1756-59,	Earl of Blessington,
1760-65,	Earl of Kellie,
1766-70,	Hon. Thomas Mathew,
1771-74,	John, third Duke of Atholl,
1775-81,	John, fourth Duke of Atholl,
1782-90,	Earl of Antrim,
1791-1813,	John, fourth Duke of Atholl,
1813,	Duke of Kent.

The following is a list of the Grand Secretaries who served during the same period:

1752,	John Morgan,
1752-70,	Laurence Dermott,
1771-76,	William Dickey,
1777-78,	James Jones,
1779-82,	Charles Bearblock,
1783-84,	Robert Leslie,
1785-89,	John McCormick,
1790-1813,	Robert Leslie,

It is inconceivable how Preston could have committed so grave an historical error as to say, "the fact is, that the 'Ancients' after their secession continued to hold their meetings without acknowledging a superior till 1772, when they chose for their grand master the Duke of Atholl."¹ He was apparently utterly ignorant of the fact, here shown, that their first Grand Master was elected in 1753, and that from that time until the dissolution of their Grand Lodge in 1813 the office was filled by an uninterrupted succession of Grand Masters. *Voilà justement comme on écrit l'histoire.*²

In conclusion it is necessary to say something of the character

¹ "Illustrations of Masonry," p. 358.

² Voltaire, "Chariot," I. p. 7.

and pretensions of the Grand Lodge which created a Masonic schism that lasted in an organized form for sixty years, and which extended its influence into every part of the civilized world where the English language was spoken.

The Freemasons, who about 1738 seceded from the Constitutional Grand Lodge of England, and soon after began to call themselves "Ancient Masons," and who stigmatized the regular members of the Craft as "Moderns," were not incited to the secession in consequence of any innovations that had been made upon the ritual by the Grand Lodge from which they separated.

Those innovations were the consequence and not the cause of their secession. They were made by the Grand Lodge, so as to produce a change in the working that would exclude the visits of the seceders to the regular lodges. They were indeed not very important and did not at all affect the traditional history or the symbolic system of Speculative Freemasonry. The adoption of them was certainly, however, a very great error, and the seceders were not slow to avail themselves of the charge of innovation, so distasteful to the Masonic mind, to produce a feeling of sympathy in their behalf.

But the truth is that the first innovation, and this, too, a very important one, was made by the "Ancients" themselves, and the practice of it was the cause of the censures passed by the regular Grand Lodge, which was the first step that led to the final separation.

It is important to settle the nature of this innovation, because it is really the "chief corner-stone" on which the schism of the "Ancients" was founded, and because one of the almost contemporary historians of the Regular Grand Lodge has committed a grave error in respect to it.

Northouck, who in 1784 gave us the best edited edition of the *Book of Constitutions*, in speaking of the conduct of the Masons engaged in the "irregular makings" which in 1739 elicited the censures of the Grand Lodge, has the following passage:

"In contempt of the ancient and established laws of the Order, they set up a power independent, and taking advantage of the inexperience of their associates, insisted that they had an equal authority with the Grand Lodge to make, pass, and raise masons. At this time no private lodge had the power of passing or raising masons; nor could any brother be advanced to either of these degrees but in

the Grand Lodge, with the unanimous consent and approbation of all the brethren in communication assembled."¹

It is unaccountable that Northouck should ignorantly or designedly have made an assertion so entirely untruthful as that which is contained in the last clause of the above-cited paragraph.

It is true that in 1723, at about the time of the fabrication of the Second and Third degrees a clause was inserted in the 13th of the Thirty-nine Regulations which declared that "Apprentices must be admitted Masters and Fellow Crafts only here (in the Grand Lodge) unless by dispensation." This was done, in all probability, to secure the proper conferring of the newly fabricated degrees in the hands of their inventors and of experienced Masons, instead of entrusting them to Masters of lodges who might be incompetent to preserve the purity of the ritual.

But this objection was soon obviated as the degrees became more common, and the inconvenience of the Regulation being recognized, it was repealed in 1725.

On November 22, 1725, they adopted a new regulation that "The Master of a lodge with its Wardens and a competent number of the lodge assembled in due form can make Masters and Fellows at discretion."²

Seeing that this new regulation was published both by Anderson in 1738 and by Entick in 1756 in their respective editions of the *Book of Constitutions*, with which Northouck must have been familiar, especially with the latter, and seeing also that there is no provision restraining the passing and raising of Candidates by private lodges contained in the code of Regulations published by Northouck in his edition, but on the contrary, one which expressly recognizes that right,³ it is, as I have said, unaccountable that he should have ignorantly committed the error of which he has been guilty, nor is it to be believed that he would have done so designedly.

The truth is that the act which called down upon certain Masons the censures of the Grand Lodge, and which finally pro-

¹ Northouck's edition of "Book of Constitutions," note on p. 240.

² See Anderson, edition of 1738, p. 160, and Entick, edition of 1756, p. 280, where this new Regulation will be found.

³ "Nor shall any Lodge be permitted to make and raise a brother at the same meeting, without a dispensation from the Grand Master or his Deputy, on very particular occasions." Regulations published by Northouck in his editions of the "Constitutions," p. 392.

duced the separation, was not the conferring of the Second and Third degrees in their lodges, for this was a prerogative that had long before been conceded to them, but it was the conferring of the Master's degree in a form unknown to the existing ritual of the Grand Lodge, and the supplementing it with an entirely new and Fourth degree.

The "irregular making of Masons," which according to Entick¹ was complained of in 1739, was the mutilation of the Third degree and the transferring of its concluding part to another degree called the "Royal Arch."

The Chevalier Ramsey, a Freemason of much learning, was the inventor of a series of degrees supplementary to the system of Craft Masonry, which have furnished the substratum for most if not all of the Modern Rites. Among these was one now known to ritualists as the "Royal Arch of Solomon."

Ramsey went to England in the year 1728, where he received from the University of Oxford the degree of Doctor of the Laws. He sought, it is said, to induce the Grand Lodge to adopt his system of high degrees. But the leading members of that body were extremely conservative and refused to make any change in the ritual.

But there were some of the Fraternity with whom he was more successful. It is not by any means intended to affirm that the Royal Arch degree of Ramsey was accepted in the form or even with the legend which he had invented.

This would not be true. But the theory advanced by Ramsey doubtless awakened in their minds new views and suggested ideas which were novel, but which were believed to be essential to the perfection of Masonic symbolism.

From the earliest times of Speculative Masonry the "Word," or, as it was called by the Masons of Scotland, the "Mason Word," had always held a prominent place in the Masonic ritual, and was, we have every reason to believe, one of the few symbols retained by the Speculative out of the Operative system. The triangle, it will be remembered, always in Christian Iconography an emblem of the Godhead, was a favorite architectural ornament used by the Stonemasons of the Middle Ages.

¹ Entick, "Constitutions," p. 228.

Adopted by the Speculative Freemasons, it was placed by them, when they fabricated their ritual, as a prominent symbol in the Master's degree, to which it had been transferred from the original degree or ritual common to all the Craft.¹

But the Master's degree as it was constructed by Dr. Desaguliers and his collaborators was as to the history of this "Word" imperfect. The legend detailing the method by which it had been lost to the Craft was preserved, but no provision had been made to account for its recovery.

The legend was not carried out to its denouement. The story was left unfinished, and although the "Word" was there and was communicated to the Master, no one could tell, for he was not informed, how it got there.

Now Ramsey, who was a thinker and a man of much learning, had seen this defect in the Masonic scheme and had supplied the deficiency by the invention of his "Royal Arch of Solomon." He thus perfected what he had found unfinished, and gave completeness and connection to all the details of the allegory.

Some of the English Masons had doubtless seen the fault in the system of Desaguliers which had been adopted and sanctioned by the Grand Lodge. When Ramsey arrived in England and proposed his new arrangement by which that fault was to be amended, though the Grand Lodge, as the representative of the Fraternity, refused to accept his system, and preferred to "stand on the old ways," imperfect as they were, there were brethren not so strictly conservative in their views who were impressed with the advantage of accepting the suggestions of Ramsey. These brethren were the seceders who, about the year 1738, were concerned in "irregular makings," that is, who undertook to confer the Master's degree in a form different from that which was sanctioned by the Grand Lodge.

At this distance of time it is impossible to know, with anything like precision, what were the precise changes made by the "Ancients" in the old and accepted ritual of the "Moderns." It is, however, very satisfactorily evident, from the course of contempo-

¹In primitive lodges of Scotland, and the practice prevailed in England and elsewhere, the Mason Word was communicated to Apprentices. Lyon says "this was the germ whence has sprung Symbolical Masonry." "History of the Lodge of Edinburgh," p. 23

aneous history and from the succession of events, that that change, whatever it was, finally led to the development of the Royal Arch degree, such as it is now practiced, as a necessary completion of the Master's part, and therefore as a recognized section of Ancient Craft Masonry.

In so far, then, the secession of the "Ancients," however unjustifiable it was in its inception as a violation of Masonic law, was in its subsequent results of great advantage to the system of Speculative Freemasonry. It gave to Masonic symbolism a completeness and perfection that was altogether wanting under the old arrangement of only three degrees, and supplied a break in the history of the "Word" which it is strange that the ritualists of the earlier period of the 18th century had not perceived nor appreciated.

The introduction of this degree was for a long time vehemently opposed by the regular Grand Lodge as an innovation on the landmarks. They even treated it with contempt.

To a petitioner from Ireland applying for relief the Grand Secretary of the Grand Lodge of "Moderns" replied: "Our Society is neither Arch, Royal Arch, nor Ancient, so that you have no right to partake of our charity."¹

But the innovation was advocated with such ability and became so popular that the regular Grand Lodge was compelled to succumb to what was evidently the wish of the Fraternity, and at length to adopt what they had so persistently condemned.²

On June 12, 1765, a Royal Arch Chapter was formed in connection with the "Moderns," which was in the subsequent year converted into a Grand Chapter. Hughan says it "was virtually, though not actually, countenanced by the Grand Lodge. It was purely a defensive organization to meet the wants of the regular brethren, and prevent their joining the Ancients for exaltation."³

In 1813, at the union of the Grand Lodges, the "Holy Royal Arch" was legally recognized as a constituent part of Ancient Craft Masonry.

A doubt is, however, cast over the accuracy of Bro. Hughan's assertion that in 1766 the Grand Chapter was even virtually counte-

¹ I give this anecdote on the authority of Dermott ("Ahiman Rezon," p. xvi.), but there is no reason to doubt its truth.

² "Masonic Memorials," p. 8, note.

³ Ibid.

nanced by the Grand Lodge of "Moderns" by two contemporaneous records.

The first is the declaration already given of the Grand Secretary of the "Modern" Grand Lodge, made about that time, that they were "neither Arch, Royal Arch, nor Ancients;" and the other a letter written on June 7, 1766, by the same Grand Secretary to the Provincial Lodge of Frankfort-on-the-Main, in which he declares that the Royal Arch is "a Society which we do not acknowledge and which we regard as an invention designed for the purpose of introducing innovations amongst the Brotherhood and diverting them from the fundamental rules which our ancestors laid down for us."¹

In this conflict of authority there appears to be but one reasonable explanation. It is probable that some of the "Modern" Masons, tempted by the success and popularity of the Arch degree among the "Ancients," had independently formed a chapter of their own, and soon converted it into a self-created Grand Chapter, just as the lodge at York, forty years before, had resolved itself into a Grand Lodge.

Although this was done without the sanction of the Grand Lodge, and though it was precisely the same innovation which in 1738 had met with the severe censure of that body, it is to be presumed that no notice was taken of the act, because experience had taught the Grand Lodge that the best policy would be not to endanger by opposition a second rebellion from its authority.

So Royal Arch Masonry was permitted to exist by sufferance. But the victory of the "Ancients" was fully accomplished in 1813, when the Grand Lodge of "Moderns" was compelled to recognize that which they had at first styled an innovation and to acknowledge the Royal Arch to be a component part of Ancient Craft Masonry.

Thus the two Grand Lodges continued to move in parallel but not amicable lines, both indulging at times in mutual recriminations and each denouncing the other as irregular. The "Ancients," as well as the "Moderns," extended their jurisdiction beyond the limits of England into foreign countries. They exercised this power, however, in a different manner.

The Grand Lodge of "Moderns" usually appointed Deputations

¹ Findel cites this in his "History of Freemasonry," p. 184.

or Provincial Grand Masters in various countries, by whom lodges were organized, and afterward Provincial Grand Lodges.

The "Ancients" never practiced this method. It was their usage to grant Warrants, directly, for the establishment of lodges, and these, as soon as there were a sufficient number, proceeded to organize Grand Lodges, under the incorrect title of "Ancient York Masons."

Such was the universal practice on the American Continent, where the Grand Lodges established under the obedience of the Grand Lodge of "Moderns" and those organized by the York or Ancient Lodges preserved the distinctive principles of their parents and inherited their angry passions.

But such a condition of things was too alien to the benign and fraternal sentiments of Freemasonry to be perpetuated. Movements toward a reconciliation were inaugurated toward the close of the 18th century, and finally, in 1813, the Atholl Grand Lodge was forever dissolved by a fusion of the two contending bodies in England into the now existing body under the title of the "United Grand Lodge of England." This excellent example was speedily followed by similar amalgamations in all the States where the rivalry had prevailed.

But the fusion in England, which closes the history of the Atholl Grand Lodge, is too important an event to be treated otherwise than in a separate chapter.

CHAPTER XLII

THE GRAND LODGE OF ENGLAND, SOUTH OF THE TRENT; OR THE SCHISM OF THE LODGE OF ANTIQUITY

F the four old Lodges of London which united in the formation of a Grand Lodge in the year 1717, the one which at that time met at the "Goose and Gridiron Ale-house" in St. Paul's Churchyard, assumed the precedence as No. 1, and under all its changes of name and locality retained that precedence until the union of the two Grand Lodges in 1813, when, in casting lots, it lost its primitive rank and became No. 2, a number which it has ever since retained. Anderson calls it "the Senor Lodge whose Constitution is immemorial."¹

About the year 1729 it removed from the "Goose and Gridiron," to the "King's Arms Tavern," also in St. Paul's Churchyard. Here it remained, except for a brief interval in 1735 until 1768, having taken in 1760 the name of the "West India and American Lodge." In 1768 it removed to the "Mitre," in Fleet Street, and in 1770 adopted the title of the "Lodge of Antiquity," which it has ever since continued to use.²

These four Lodges had been established previous to the formation of the Grand Lodge, under the old system which permitted a sufficient number of Masons to meet together and form a lodge, the only authority required being the consent of the chief magistrate of the place.³

This privilege, which they called immemorial usage, they claimed and received from the new Grand Lodge, which required all other lodges which should be constituted to previously obtain a Warrant

¹ In the List of lodges in the 1738 "Book of Constitutions," p. 184.

² Gould's "Four Old Lodges," note 9, p. 6.

³ Preston, "Illustrations," Oliver's edition, p. 182.

from the Grand Master, but permitted the four original Lodges to act as they always had done without such authority.

The history of these four Lodges may be thus briefly told:

Lodge No. 2, which originally met at the "Crown" in Parker's Lane, became extinct in 1730.

Lodge No. 3, which met at the "Apple Tree Tavern," memorable as the place where the preliminary meeting for the organization of a Grand Lodge was held, in 1723, on account of some difference among its members, renounced its immemorial privileges and accepted a Warrant of Constitution from the Grand Lodge as No. 10.

Lodge No. 4, afterward No. 2, first held at the "Rummer and Grapes," afterward removed to the "Horn Tavern." In 1747 it was, for non-attendance of its representative at the Quarterly Communications, erased from the roll of lodges,¹ but reinstated in 1751. In 1774 it united with the Somerset Lodge, which had been warranted in 1762 as No. 269.

Preston, in a passage of his 1781 edition, asserted that by this act "the members of the lodge tacitly agreed to a renunciation of their rights as one of the four original Lodges, put themselves entirely under the authority of the Grand Lodge and claimed no distinct privilege by virtue of an immemorial Constitution."

This is not an accurate statement, and Preston did well to erase it from the subsequent editions of his book. The act of incorporation with the Somerset Lodge was really an absorption of that lodge into the Horn Lodge, whose number remained unchanged, and at the union of 1813 it was admitted on the Register without a Warrant of Constitution and as acting from "Time Immemorial."

There is not the least doubt cast upon the record of Lodge No. 1, which met at the "Goose and Gridiron," and which has for more than a century been known as the "Lodge of Antiquity." It never at any time abandoned its claim to all the privileges of a lodge dating from time immemorial and vigorously though perhaps erroneously asserted them when an attempt was made to violate them, and the "Lodge of Antiquity" has remained to the present day without a Warrant.

In Pine's List of lodges for 1729 it is stated that the lodge was

¹ Entick, "Book of Constitutions," p. 248.

established in 1691, but Hughan believes it to have been much older. It is said that the celebrated architect, Sir Christopher Wren, was made a Freemason in this lodge. Aubrey, the antiquary, in his *Natural History of Wiltshire*, says that on May 19, 1691, there was "a great convention at St. Paul's Church of the fraternity of Adopted Masons where Sir Christopher Wren is to be adopted a brother, and Sir Henry Goodrie of the Tower and divers others." It is probable that this passage suggested to the maker of Pine's List the notion of giving to the lodge the date of 1691 as the time of its establishment.

Supposing that the lodge, which in 1717 met at the "Goose and Gridiron," was the one that in 1691 admitted Wren to the Fraternity, the roll of distinguished members will be confined to the architect of St. Paul's and to William Preston, the celebrated Masonic historian. The statement that Dr. Desaguliers was initiated in it has been proved to be incorrect.

The fourth lodge, the one that met at the "Rummer and Grapes," and afterward at the "Horn Tavern," can boast a much larger list of Masonic worthies. Among them at the earliest stage of its existence are the names of Desaguliers, Payne, and Anderson, all of whom were probably made in it, either just before or immediately after the organization of the Grand Lodge. Desaguliers is said to have been made in 1712, and I am disposed to believe that both Payne and Anderson, as well as he, were Freemasons in 1717 and were personally engaged in the formation of the Grand Lodge. Between 1723 and 1738 a great many noblemen, both English and foreign, were admitted to its membership, while the roll of Nos. 1 and 2 contain no brethren of Masonic or social rank, and that of No. 3 claims only the name of Anthony Sayer, the first Grand Master.¹

Bro. Gould thinks that in the earliest years of the Grand Lodge, Nos. 1, 2, and 3 represented the Operative and No. 4 the Speculative elements of the Society.² This is probably true. We know that the first three lodges were not distinguished in their membership by the name of a single personage of rank or learning, and that in 1723 the Master of No. 1 was a stonemason. On the other hand, Desaguliers, Payne, and Anderson, the prime instigators of the change from purely Operative to purely Speculative Freemasonry, were all members of No. 4.

¹ Gould, "Four Old Lodges," p. 9.

² Gould, *ibid.*

In after times, Lodges Nos. 2 and 3 became extinct, and No. 4 continued to exist in placid obscurity, while No. 1, having become the "Lodge of Antiquity," played a prominent part in the history of the Grand Lodge of England, and under the leadership of William Preston was the cause of a schism, which at one time threatened to be very disastrous to the cause of Freemasonry, though happily it proved to be temporary in its duration.

It is because of the part taken by the "Lodge of Antiquity" in this schismatic proceeding, in which it sought to defend itself on the ground that it, as one of the four old Lodges, was entitled to certain privileges and exemptions from the authority of the Grand Lodge, which did not appertain to the younger lodges, that I have deemed it necessary to take a glance at the condition of these four primary lodges, as preliminary to the history of the contest in which one of them was engaged.

In this contest No. 1, or the "Lodge of Antiquity," alone was prominent. Nos. 2 and 3 had become extinct, and No. 4 took no other part in the dispute than that of remaining loyal to the Grand Lodge.

The history of the dissensions between the "Lodge of Antiquity" and the Grand Lodge of England, which terminated in the establishment of a fourth Grand Lodge within the jurisdiction of England, may be briefly related as follows:

In the year 1777, during the Grand Mastership of the Duke of Manchester, the Master, Wardens, and a part of the members of the "Lodge of Antiquity," under a resolution of the lodge, celebrated the festival of St. John the Evangelist by attending divine service at St. Dunstan's Church, in Fleet Street, walking there and returning to the "Mitre Tavern" in the clothing of the Order, and this without having obtained a Dispensation for the procession from the Grand Master or his Deputy.

This was a flagrant violation of the law of the Grand Lodge which prescribed that no Mason should attend any public procession clothed with the badges and ensigns of the Order, unless a dispensation for that purpose was obtained from the Grand Master or his Deputy; and the penalty for a violation of this law was a forfeiture of all the rights and privileges of the Society and a deprivation of the benefits of the general fund of charity.

This law, which had been enacted in 1754, must have been well

known to the Master and the members of the lodge, and its open violation by them in the face of that knowledge would lead us to assent to the statement of Findel that they wished to come to an open rupture with the authority to whom they owed allegiance.¹

This act was very properly condemned by the Grand Lodge. "Various opinions," says Preston, "were formed on the subject, and several brethren were highly disgusted."

It is surprising that there should be more than one opinion of the unlawfulness of an act which palpably violates a written statute; but it is very natural that the perpetrators of an offence, if they are not penitent, should be "disgusted" with the punishment which has followed.

Another circumstance soon followed which, according to Preston, tended still further to widen the breach.

For some alleged misconduct the lodge had expelled three of its members. The Grand Lodge, deeming, as we may fairly suppose, that some injustice had been done, ordered them to be reinstated.

Preston says that the Grand Lodge interfered without proper investigation. But it can not be presumed upon the authority of a partisan that the Grand Lodge would have exercised this high prerogative of reinstatement without a fair investigation of all the circumstances connected with the original expulsion. The good old principle must here prevail that in respect to all acts of an official nature, the presumption is that they have been fairly executed, and that all has been rightly and duly performed until the contrary is shown.²

Unfortunately, it is almost wholly upon Preston, in his edition of 1781, that we must depend for our authority in the recital of this history. But this statement must be taken with all the allowance due to an active partisan. Preston was a prominent actor and indeed a leader in this contest, and in telling his story might have repeated the words of Pater Æneas to the Queen of Carthage:

". . . quoque ipse miserrima vide,
Et quorum pars magna fui."

The lodge vainly resisted this act of the Grand Lodge and to re-admit the expelled members "Matters," says Preston, "were agitated to the extreme on both sides; resolutions were precipitately

¹ "History of Freemasonry," Lyon's Translation, p. 181.

² "Omnia presumuntur legitime facta donec probetur in contrarium."

entered into, and edicts inadvertently issued; memorials and remonstrances were presented."

Finally an open rupture ensued. The lodge withdrew the attendance of its Master and Wardens as representatives from the Quarterly communications, but continued to exercise its functions as a lodge, independently of the jurisdiction of the Grand Lodge. It issued a Manifesto in which it detailed its grievances and asserted its rights and appealed for sympathy and support to the Grand Lodges of Scotland, Ireland, and York.

The Grand Lodge of England, on its part, was not less resolute. It expelled the rebellious members of the lodge, extended its protection to the three members whose expulsion had been ostensibly the original cause of all the difficulties, and recognizing them as the only legitimate representatives of the "Lodge of Antiquity," ordered, but of course in vain, a surrender to them of the property of the lodge.

The position which was now assumed by the "Lodge of Antiquity" was precisely that which it had occupied before its union in 1717 with the three other lodges in the establishment of a Grand Lodge, namely, that of a lodge, instituted without a Warrant, and by the mere consent of its founders, as all the Operative lodges had been instituted prior to the formation of a Grand Lodge.

As the Manifesto of the "Lodge of Antiquity" which was issued on December 16, 1778, is a full exposition of the grounds on which the lodge based its right to assume independency and eventually to accept from the Grand Lodge at York the rank and title of "The Grand Lodge of England south of the Trent," it is very necessary, to a correct understanding of these important transactions, that the reader should be placed in possession of a copy of the document. It is accordingly here printed, as follows:¹

TO ALL REGULAR, FREE AND ACCEPTED MASONS.

WHEREAS, the Society of Free Masons is universally acknowledged to be of ancient standing and great repute in this kingdom, as by our Records and Printed Constitutions, it appears that the first Grand Lodge in England was held at York, in the year 926,

¹The copy here printed is from Bro. Hughan's "History of Freemasonry in York" (American edition, p. 117), and is one of the most interesting documents in that valuable work.

by virtue of a Royal Charter granted by King Athelstan, and under the patronage and government of this Grand Lodge, the Society considerably increased; and the ancient charges and regulations of the Order so far obtained the sanction of Kings and Princes, and other eminent persons, that they always paid due allegiance to the said Grand Assembly.

AND WHEREAS, it appears, by our Records, that in the year 1567, the increase of lodges in the South of England, being so great as to require some Nominal Patron to superintend their government, it was resolved that a person under the title of Grand Master for the South should be appointed for that purpose, with the approbation of the Grand Lodge at York, to whom the whole Fraternity at large were bound to pay tribute and acknowledge subjection. And after the appointment of such Patron, Masonry nourished under the guardianship of him and his successors in the South, until the Civil Wars and other intestine commotions interrupted the assemblies of the Brethren.

AND WHEREAS, it also appears that in the year 1693, the Meetings of the Fraternity in their regular lodges in the South became less frequent and chiefly occasional, except in or near places where great works were carried on. At which time the "Lodge of Antiquity" or (as it was then called) the Old Lodge of St. Paul, with a few others of small note, continued to meet under the patronage of Sir Christopher Wren, and assisting him in rearing that Superb Structure from which this respectable lodge derived its Title. But on completing this Edifice in 1710, and Sir Christopher Wren's retiring into the country, the few remaining lodges in London and its suburbs, continued without any nominal Patron, in a declining state for about the space of seven years.

AND WHEREAS, in the year 1717, the Fraternity in London agreed to cement under a new Grand Master, and with that view the Old Lodge of St. Paul, jointly with three other lodges, assembled in form, constituted themselves a nominal Grand Lodge *pro tempore* and elected a Grand Master to preside over their future general meetings, whom they afterwards invested with a power to constitute subordinate lodges, and to convene the Fraternity at stated periods in Grand Lodge, in order to make Laws, with their consent and approbation, for the good government of the Society at large.

BUT SUBJECT to certain conditions and restrictions then expressly stipulated, and which are more fully set forth in the 39th article of the General Regulations in the first *Book of Constitutions*, this article with thirty-eight others, was afterwards at a meeting of the Brethren in and about the cities of "London and Westminster, in the year 1721, solemnly approved of, ratified and confirmed by them, and signed in their presence by the Master and Wardens of the Four old Lodges on the one part, and Philip, Duke of Whar-ton, then Grand Master, Dr. Desaguliers, D.G.M., Joshua Timson and William Hawkins, Grand Wardens, and the Masters and Wardens of sixteen lodges which had been constituted by the Fraternity, betwixt 1717 and 1721, on the other part. And these articles the Grand Master engaged for himself and his successors, in all time coming, to observe and keep sacred and inviolable. By these prudent precautions the ancient Land-marks (as they are properly styled) of the four old Lodges were intended to be secured against any encroachments on their Masonic Rights and Privileges.

AND WHEREAS, of late years, notwithstanding the said solemn engagement in the year 1721, sundry innovations and encroachments have been made, and are still making on the original plan and government of Masonry, by the present nominal Grand Lodge in London, highly injurious to the institution itself, and tending to subvert and destroy the ancient rights and privileges of the Society, more particularly of those members of it under whose sanction, and by whose authority, the said Grand Lodge was first established and now exists.

AND WHEREAS, at the present time there only remains one of the said four original ancient Lodges—The Old Lodge of St. Paul, or as it is now emphatically styled, The "Lodge of Antiquity." Two of the said four ancient lodges having been extinct many years, and the Master of the other of them having on the part of his lodge, in open Grand Lodge, relinquished all such inherent rights and privileges which, as a private lodge, acting by an immemorial Constitution it enjoyed. But the "Lodge of Antiquity," conscious of its own dignity, which the Members thereof are resolutely determined to support, and justly incensed at the violent measures and proceedings which have been lately adopted and pursued by the said nominal Grand Lodge, wherein they have assumed an unlawful prerogative over the "Lodge of Antiquity," in manifest breach of

the aforesaid 39th article, by which means the peaceful government of that respectable lodge has been repeatedly interrupted, and even the original independent power thereof, in respect to its own Internal Government, disputed.

THEREFORE, and on account of the Arbitrary Edicts and Laws which the said nominal Grand Lodge has, from time to time, presumed to issue and attempted to enforce, repugnant to the ancient Laws and principles of Free Masonry, and highly injurious to the "Lodge of Antiquity,"

WE, the Master, Wardens and Members of the "Lodge of Antiquity," considering ourselves bound in duty, as well as honour, to preserve inviolable the ancient rights and privileges of the Order, and as far as in our power, to hand them down to posterity in their native purity and excellence, do hereby, for ourselves and our successors, solemnly disavow and discountenance such unlawful measures and proceedings of the said nominal Grand Lodge; and do hereby declare and announce to all our Masonic Brethren throughout the Globe. That the said Grand Lodge, has by such arbitrary conduct, evidently violated the conditions expressed in the aforesaid 39th article of the General Regulations, in the observance of which article the permanency of their authority solely depended.

And in consequence thereof, WE, do by these presents retract from and recall all such rights and powers as We or our predecessors, did conditionally give to the said nominal Grand Lodge in London; and do hereby disannul and make void all future Edicts and Laws, which the said Grand Lodge may presume to issue and enforce, by virtue of such sanction, as representatives of the ancient and honorable Society of Free and Accepted Masons.

AND WHEREAS we have, on full enquiry and due examination, happily discovered, that the aforesaid truly ancient Grand Lodge at York does still exist, and have authentic Records to produce of their antiquity, long before the establishment of the nominal Grand Lodge in London in the year 1717; We do, therefore, hereby solemnly avow, acknowledge and admit the Authority of the said Most Worshipful Grand Lodge at York, as the truly ancient and only regular governing Grand Lodge of Masons in England, to whom the Fraternity all owe and are rightfully bound to pay allegiance.

AND WHEREAS, the present members of the said Grand Lodge

at York have acknowledged the ancient power and authority or the "Lodge of Antiquity" in London as a private lodge and have proposed to form an alliance with the said lodge, on the most generous and disinterested principles,—We do hereby acknowledge this generous mark of their friendship towards us, and gratefully accept their liberal, candid and ingenuous offers of alliance:—And do hereby, from a firm persuasion of the justice of our cause, announce a general union with all Regular Masons throughout the world, who shall join us in supporting the original principles of Free Masonry, in promoting and extending the authority of the said truly ancient Grand Lodge at York, and under such respectable auspices in propagating Masonry on its pure, genuine and original plan.

AND LASTLY, we do earnestly solicit the hearty concurrence of all regular lodges of the Fraternity in all places where Free Masonry is legally established to enable us to carry into execution the aforesaid plan, which is so apparently beneficial to our most excellent institution, and at the present critical juncture, so essentially necessary to curb the arbitrary power which has been already exerted, or which, hereafter, may be illegally assumed, by the nominal Grand Lodge in London, and so timely prevent such unmasonic proceedings from becoming a disgrace to the Society at large.

By Order of the Right Worshipful Lodge of Antiquity,
in open Lodge assembled, this 16th day of December
A.D., 1778, A. L. 5782.

J. SEALY, Secretary.

Before proceeding to the arguments adduced in this manifesto by the "Lodge of Antiquity," to defend its action in withdrawing from the Grand Lodge, it will be proper to say, that as an historical document it is utterly worthless.

The statement that the first Grand Lodge was held at York under a Charter granted by King Athelstan in the 10th century, is founded on the mere tradition contained in the *Legend of the Craft*; it was denied by the Masons of York, who attributed the origin of their society to a much earlier period; it has been doubted or disbelieved by some of the most eminent Masonic scholars of the present day; and finally there is not the slightest historical proof that there was ever a Grand Lodge or Grand Master in England prior to the second decade of the 18th century.

Again: The assertion that in 1567 the Grand Lodge at York appointed a Grand Master for the south of England, and that he and the Fraternity under him "were bound to pay tribute and acknowledge subjection" to the Grand Lodge of York, is wholly unsupported by historical evidence. Anderson, who was ever ready to frame history out of legends, does indeed record the existence of a Grand Lodge, holding annual communications at York,¹ and tells us the apocryphal story of Queen Elizabeth and Grand Master Sackville. He also states that it was a tradition of the old Masons that in 1567, on the demission of Sir Thomas Sackville, two Grand Masters were chosen, one for the north and one for the south, but he makes no allusion to the position of the latter as subordinate to the former. He makes no further mention of the Grand Lodge at York in the subsequent pages of the *Book of Constitutions*, but always speaks of the Grand Master and the Grand Lodge at London as the sole Masonic authority in England. Thus, unhistorical and merely traditionary as is the authority of Anderson on this subject, it completely fails to give any support to the assertion of the writer of the Manifesto, that in the 16th century the Grand Lodge at York was the supreme Masonic power of all England, and that it delegated a subordinate rank and position to a "nominal Grand Master" for the south of the kingdom.

From this Manifesto it will be seen that the "Lodge of Antiquity" withdrew its allegiance to the Grand Lodge of England, in consequence of the wrong it supposed that body had inflicted upon it, by the reinstatement of certain members whom it had expelled. It then asserted its independence and attempted to resume the position which it had occupied before the organization of the Grand Lodge, as a lodge working without a Warrant.

In defense of its action, the lodge refers in the Manifesto to the 39th General Regulation, which it says had been violated by the Grand Lodge in its treatment of the "Lodge of Antiquity."

But the most liberal construction of that Regulation will fail to support any such theory.

The 39th Regulation simply recognizes the inherent power of

¹ When Bro. Woodford in his Essay on the "Connection of York with the History of Freemasonry in England," asserted that the statement in the Manifesto was "the only existing evidence that in 1567 there was a Grand Lodge at York," this passage in Anderson must have escaped his attention.

the Grand Lodge to make new regulations or to alter the old ones, provided that the landmarks be preserved, and that the new regulation be adopted at a stated communication by a majority of the brethren present.

Now there is no distinct charge of the violation of a landmark by the Grand Lodge, and if there was there is no provision in the Regulations for its redress by the secession of a lodge.

The whole tenor of the Thirty-nine Regulations adopted in 1721, is to make the Grand Lodge a supreme Masonic power. It is, moreover, provided in the 8th Regulation that no number of Brethren shall withdraw from the lodge in which they were made and form a new lodge without the consent of the Grand Master.

The facts are briefly these. The Grand Lodge having reinstated three members who we are bound to presume had been wrongly expelled, the lodge refused to recognize the act of reinstatement, and withdrew from its allegiance to the Grand Lodge, and assuming independence, proceeded to work out a Warrant, under its old Operative Constitution and without the consent or approval of the Grand Lodge.

The Grand Lodge refused to admit the legality of this act. It continued to recognize the three members and any others who adhered to them as the true "Lodge of Antiquity," and viewed the recusant members as Masons who had violated the 8th Regulation, by withdrawing from their lodge and joining a new lodge without the Grand Master's Warrant.

Bro. Robert Freke Gould, in his *History of the Four Old Lodges*,¹ has advanced the doctrine that the "Lodge of Antiquity" had a legal right to secede from the Grand Lodge, and he supports his opinion by the very extraordinary argument that if the Grand Lodge had a right to expel a lodge from the Union, that is, to erase it from the roll of lodges, this would imply a correlative right in a subordinate lodge to withdraw or secede from the Union of lodges or the Grand Lodge. The adoption of such a doctrine would make every Grand Lodge a merely temporary organization, subject at any moment to be impaired by the arbitrary withdrawal of as many lodges as thought proper to exercise this privilege of secession. This would inevitably be a termination to all power of discipline and of

¹ "Four Old Lodges," p. 28.

coercive government. He has unfortunately sought to illustrate his views by a reference to the American Constitution which he supposes to have conceded to any one or more of the States the right of secession. He does not seem to be aware that this doctrine, generally called a "political heresy," though at one time maintained by most Southern Statesmen, was always disavowed by the people of the North, and finally forever obliterated by the severe arbitrament of a four years' intestine war.

The fact is that the four old Lodges entered voluntarily into the compact which resulted in the establishment of a Grand Lodge in London in the year 1717. The Regulations adopted by the Grand Lodge four years afterward, for its government and that of its subordinates, was approved and accepted by all the lodges then existing, among which were the four Lodges, and the names of the Master and Wardens of the "Lodge of Antiquity" head the list of the signers of the Act of Approbation. The "Lodge of Antiquity" was, therefore, forever bound by the compact, and by regulations enacted under its authority.

By the compact made prior to the enactment of the Thirty-nine Regulations, and which was entered into by the four old Lodges, it was agreed that in future every lodge should owe its existence to the consent of the Grand Master expressed by his Warrant of Constitution, and such has been the invariable practice, not only in England but in every country into which Freemasonry had penetrated.

As an act of courtesy, the four Lodges were exempted from the duty of applying for Warrants, and were permitted to continue their labors under the old system of Operative Freemasonry by authority of a self-constitution through which they had been established under the old system of Operative Freemasonry which had existed prior to the organization of the Grand Lodge.

But this was the only distinct privilege which they possessed. In all other matters, every lodge was alike subjected to the control of the Grand Lodge, and to the constant supervision of the Grand Master. This system of government, so different from that of the Operative Freemasonry which had previously prevailed, had been accepted by the four original Lodges. They themselves had inaugurated it; they had accepted all the consequences of the great change, and it was no longer in the power of any one of them, at any future period, to annul the contract into which they had entered.

All the regulations adopted after their compact refer in general terms to the collective body of lodges without making any exception in favor of the four original Lodges. Especially was this the fact with respect to the Thirty-nine Regulations adopted in 1721. The laws therein enacted were just as applicable to Lodge No. 1 as to Lodge No. 20, for the former lodge had, as well as the latter, and all the intermediate ones, formerly accepted them and declared that they and the Charges, as published by Anderson, should be received in every lodge "as the only Constitutions of Free and Accepted Masons."¹

Hence it follows, that in withdrawing from the Grand Lodge and establishing a lodge, independent of its authority, the contumacious members of the "Lodge of Antiquity" acted illegally, and violated the Constitutions which the Freemasons of England had accepted for half a century as the fundamental law of the Order.

On second sober thought, Preston himself, who had undoubtedly been the ringleader in this schism, when he was restored to the privileges of Masonry, in 1789, expressed his regret for what he had done in the past, and his wish to conform in future to the laws of the Grand Lodge.² As the Grand Lodge had made no concessions, Preston thus admitted the constitutionality of the law, against which as being unconstitutional, he and his colleagues had been contending for eleven years.

The recusant members of the "Lodge of Antiquity" having declared their independence of the Grand Lodge, and continued after their expulsion from the Society to hold their lodge and to perform the work of Masonry, the Grand Lodge permitted those members who had maintained their obedience to assemble as the real "Lodge of Antiquity," still without a Warrant, and to appear by their Master and Wardens at the Grand Communications as the representatives of the lodge.

There were thus two lodges of Antiquity in the field—the lodge recognized by the Grand Lodge, consisting of the members who had refused to take part in the schismatic proceedings; and the lodge

¹ See the act of Approbation in Anderson's 1723 edition of the "Constitutions," p. 74.

² The official record of the Grand Lodge for November 25, 1789, says that Preston and seven other members of the "Lodge of Antiquity," who had been expelled in 1779, had "signified their concern that through misrepresentation, as they conceived, they should have incurred the displeasure of that Assembly, and their wish to be restored to the privileges of the Society, to the laws of which they were ready to conform."

consisting of the members who had withdrawn from their allegiance, and had established themselves as an independent body, working under the old Operative system.

Of the former lodge, it is unnecessary and irrelevant to the present history to take any further notice. It probably pursued "the even tenor of its way" quietly and unobtrusively. In the lists of lodges made during the period of the schism, its name and number are retained without alteration as the "Lodge of Antiquity No. 1, Freemasons' Tavern, Great Queen Street, formerly the 'Goose and Gridiron,' St. Paul's Church Yard." ¹

The latter lodge, the one whose existence I have sought to prove was illegal, very soon proceeded to adopt measures still more offensive in their character.

It has been commonly stated that it applied to the Grand Lodge at York for a sanction of its acts, and for authority to continue its existence as a lodge.

This is not correct. The true statement of the relative positions of the Grand Lodge at York and the independent Grand Lodge of Antiquity is fully set forth in a correspondence between certain members of the two bodies which is still extant.²

From this correspondence it appears that Bro. Jacob Bussey, the Grand Secretary of the Grand Lodge of York, while in London had an interview with some of the members of the "Lodge of Antiquity." Under a misapprehension of the views of these Brethren, on his return home he stated that it was their desire to obtain a Warrant of Constitution as a lodge from the York Grand Lodge. Having learned the fact of this misapprehension from a communication, made on August 29th, by Bussey, after his return to York, to Bro. Bradley, the Junior Warden of the "Lodge of Antiquity," the officers of that lodge addressed a letter on September 16, 1778, to the Grand Master and Brethren of the Grand Lodge at York. In this letter is the following explicit statement of their views:

"Though we should be happy to promote Masonry under the Banners of the Grand Lodge at York, an application by petition for a Warrant for a Constitution to act as a private lodge here was never our intention, as we considered ourselves sufficiently empow-

¹ List of Lodges, in 1781, taken from the Calendar for 1788. See Gould, p. 68.

² See this correspondence in Bro. Hughan's "History of Freemasonry in York, pp. 74-76.

ered by the Immemorial Constitution of our lodge, to execute every duty we can wish as a private lodge of Masons."

They were, however, ready, they go on to say, if satisfied by proofs of the existence of the Grand Lodge at York before the year 1717, to accept from it a Constitutional authority to act in London as a Grand Lodge for that part of England which is south of the river Trent.

The Grand Secretary, however, in his August letter, appears to have furnished the required proofs, and consequently Bradley, the Junior Warden of the "Lodge of Antiquity," wrote to him on September 22, 1778.¹ In this letter he again disclaimed any desire on the part of the "Lodge of Antiquity" to receive a Warrant as a private lodge, but expressed its willingness to accept "a Warrant or Deputation to a few members of the 'Lodge of Antiquity' to act as a Grand Lodge for that part of England, south of the Trent, with a power to constitute lodges in that division when properly applied for, and a regular correspondence to be kept up and some token of allegiance to be annually given on the part of the brethren thus authorized to act."

The same letter contained a list of the names of the brethren of the "Lodge of Antiquity" as the persons suggested to be placed in the Warrant or Deputation, should it be granted. These were as follows, and though at this distant time and place I am unable to verify the fact, it may be fairly presumed that the suggestion was accepted, and that when the Deputation was accepted, the following Brethren constituted the first officers of the new Grand Lodge:

JOHN WILSON, Esq., Master of the Lodge of Antiquity, as Grand Master.

WILLIAM PRESTON, Past Master of the same Lodge, as Deputy Grand Master.

BENJAMIN BRADLEY, Junior Warden of the same, as Senior Grand Warden.

GILBERT BUCHANAN, Secretary of the same, as Junior Grand Warden.

JOHN SEABY, Senior Steward of the same, as Grand Secretary.

Further correspondence, protracted for more than a year, followed, but finally the "Warrant of Confirmation" was sent, and on

¹ Benjamin Bradley's Letter of September 22d. See Hughtan's "History," p. 76.

April 19th the "Grand Lodge of England South of the Trent" was inaugurated, the Grand Master installed, and the other officers appointed.

There are two things which are here worthy of notice as historical facts.

In the first place, the body thus erected was in no proper sense a sovereign and independent Grand Lodge, as Grand Lodges are known to be at this day and as was at the time the Grand Lodge at London. It was rather, though not so called by name, a sort of Provincial Grand Lodge, erected by a Grand Lodge, to which it acknowledged that it owed allegiance and to which it paid an annual contribution in money and a fee of two guineas for every Warrant of Constitution that it granted.

In the second place, it was not to the "Lodge of Antiquity" that the Deputation was granted, as it never changed its condition or its title as a private lodge. The Deputation was given, it is true, to certain of its officers, and its Master was most probably the first Grand Master, as there was no other source whence the officers could be drawn.

As soon as the new Grand Lodge was inaugurated, the "Lodge of Antiquity" became subordinate to it, and a return made in March, 1789, the lodges then under the Grand Lodge South of the Trent, are said to be, exclusive of the "Lodge of Antiquity," No. 1, or the Lodge of Perfect Observance, and No. 2, or the Lodge of Perseverance and Triumph. These lodges were respectively Warranted on August 9th, and November 15, 1779.

The "Lodge of Antiquity," like the Grand Steward's Lodge in the Grand Lodge of England, seems to have assumed precedence without a number. It was a right which it claimed from its "immemorial Constitution."

Preston says, in his 1781¹ edition, that "a Grand Lodge, under the banner of the Grand Lodge in York, is established in London, and several lodges are already constituted under that banner, while the 'Lodge of Antiquity' acts independent by virtue of its own authority."

If the word "several" is here properly applied, other Warrants must have been issued between July 1, 1780, when the two lodges

¹"Illustrations of Masonry," edition of 1781, p. 295. In the subsequent editions, published after the reconciliation, these statements are omitted.

mentioned above were said to be "the only lodges" which had been constituted, and the time when Preston made his statement. But of this we have no other evidence.

The "Grand Lodge of England South of the Trent" does not appear to have made any especial mark in Masonic history. It originated in a mistaken view, assumed by its founders, of their rights and privileges. These views were strenuously opposed by all the other lodges which composed the Mother Grand Lodge and were finally abandoned by themselves.

At the Grand Feast of the Grand Lodge of England held in 1790, a reconciliation was effected principally through the mediation of Bro. William Birch, a Past Master of the "Lodge of Antiquity." Unanimity was happily restored; the Manifesto of the "Lodge of Antiquity," in which it had asserted its claims and defended its conduct, was revoked; the Master and Wardens of the lodge resumed, as heretofore, their seats in the Grand Lodge whence they had seceded in 1778; the Brethren of the lodge who had retained their loyalty were reunited with the original members; and the "Grand Lodge of England, South of the Trent," after an ephemeral career of little more than ten years, ceased to exist.¹

But this episode in the history of English Freemasonry, bitter as were the feelings which the separation engendered, has not been without compensating advantages in its results.

It has permanently settled the important principle of Masonic jurisprudence, that the old Operative law or usage which recognized the right of a competent number of Freemasons to establish a lodge without the authority of a Warrant, has been forever abrogated by the transformation of the Operative Art into a Speculative Science, and that henceforth, in all time to come, the supreme authority to grant Warrants and to constitute lodges is vested solely in Grand Lodges.

This principle, so essential to the harmony and the perpetuity of Speculative Freemasonry, was almost worth a ten years' struggle to secure its permanent maintenance.

It has thus been seen that in the year 1780 there were in England four bodies claiming to be Grand Lodges.

1. The Grand Lodge of England, established in London in the year 1717.

¹ See Preston, Oliver's edition, p. 249.

2. The Grand Lodge of all England, established at York in the year 1725.

3. The Grand Lodge of England, according to the Old Institutions, established at London in the year 1753, and

4. The Grand Lodge of England South of the Trent, established also at London in the year 1780.

It has been heretofore shown that the second of these self-styled Grand Lodges was really a Mother Lodge, and that its pretended organization as a Grand Lodge was in violation of the law and precedent established eight years before by the Grand Lodge at London.

It has also been shown that the third and fourth of these pretended Grand Lodges were illegal secessions from the primitive Grand Lodge, and that their assumption of authority was in violation of the compact of 1721, and was unsupported by any principle of Masonic law which then prevailed and was recognized by the Craft.

It follows then, as has hitherto been said, that the first of these bodies, the one established at London in 1717, is the only really legal and regular Grand Lodge that ever existed in England, and that it is, as it has always claimed to be, the Premier and Mother Grand Lodge of the World.

Of the three irregular bodies, the Grand Lodge at York and the Grand Lodge South of the Trent were both, in the course of time, quietly absorbed into the Grand Lodge of England, and thus obscurely ceased to exist.

The Grand Lodge according to the Old Institutions, more commonly known as the Atholl Grand Lodge, or the Grand Lodge of Ancients, had a higher vitality, lived for a longer period, became prominent as a successful rival of the regular and older body, and with it was eventually merged in 1813 to the United Grand Lodge of England.

But a future chapter must be devoted to the history of this important and interesting event

CHAPTER XLIII

THE UNION OF THE TWO GRAND LODGES OF ENGLAND

THE fusion of the two rival Grand Lodges—the "Ancients" and the "Moderns"—was the most important event that has occurred in the history of Speculative Freemasonry since the organization of 1717.

The mutual denunciations of two bodies, each practicing almost the same rites and ceremonies, each professing to be actuated by the same principles, and each tending to the accomplishment of the same objects, and each claiming to be the supreme Head of the Masonic Institution while it accused its antagonist of being irregular in its organization and a usurper of authority, could not have failed eventually to impair the purity and detract from the usefulness of the Institution.

The sentiment of active opposition on the part of the "Moderns" had grown with the increasing success of their rivals. In 1777 the constitutional Grand Lodge had declared "that the persons who assemble in London and elsewhere in the character of Masons, calling themselves Ancient Masons, and at present said to be under the patronage of the Duke of Atholl, are not to be countenanced or acknowledged by any regular lodge or Mason under the constitution of England; nor shall any regular Mason be present at any of their conventions to give a sanction to their proceedings, under the penalty of forfeiting the privileges of the Society, nor shall any person initiated at any of their irregular meetings be admitted into any lodge without being re-made."¹

This anathema was followed at different periods during the rest of the century by others of equal severity. The "Modern Masons," knowing the legality of their own organization and the false pretensions of the "Ancients," are to be excused and even justified for the

¹ Peston gives this degree in full; Northouck only summarizes it. See Preston, "Illustrations," Oliver's edition, p. 242, and Northouck, "Constitutions," p. 323.

intensity of their opposition and even for the harshness of their language. Feeling assured, from all the historical documents with which they were familiar, that the Grand Lodge organized in 1717 was the only legitimate authority in English Masonry, it was natural that they should denounce any pretension to the possession of that authority by others as an imposture.

The "Ancients," who, notwithstanding the positiveness with which they asserted their claim to a superior antiquity, must, unconsciously at times, have felt their weakness, never displayed so acrimonious a spirit. On the contrary, they were unwilling to enter into discussions which might elicit facts detrimental to the solidity of their pretensions.

Hence, we find Dermott saying: "I have not the least antipathy against the gentlemen of the modern society; but, on the contrary, love and respect them;"¹ and though in a subsequent edition he complains that this amicable sentiment was not reciprocated, he admits the equal right of each society to choose a Grand Master, and expresses the hope to see in his life-time a unity between the two.²

In 1801 the Grand Lodge of "Ancients," in a circular addressed to the Craft, made the following declaration:

"We have too much respect for every Society that acts under the Masonic name, however imperfect the imitation, to enter into a war of reproaches; and, therefore, we will not retort on an Institution, established in London, for some years, under high auspices, the unfounded aspersions into which a part of their body have suffered themselves to be surprised."³

About the beginning of the 19th century many leading Masons among the "Moderns" began to recognize the necessity of a union of the two Societies. I am compelled to believe, or at least to suspect, that at first the success of the "Ancients" was a controlling motive in this desire for a fusion of the two Grand Lodges.

At this time there were Grand Lodges of "Ancients," or as they styled themselves, "Grand Lodges of Ancient York Masons," which had emanated from the London body, in Canada, Pennsylvania, Maryland, South Carolina, New York, Massachusetts, Nova Scotia, Gibraltar, and most of the provinces and islands of the East and

¹ "Ahiman Rezon," edition of 1764, p. 24.

² Ibid., edition of 1778, pp. 43-44.

³ Ibid., edition of 1807, p. 124.

West Indies, and a recognition by the Grand Lodges of Ireland and Scotland.¹

Elated with this success and with the diffusion of their authority, the "Ancients" did not at first incline favorably to the idea of a union of the Craft. They were willing to accept such a union, but it must be without the slightest compromise or concession on their part.

Long before the close of the 18th century the "Ancients" had made an important change in the character of the claim for regularity which they had advanced in the beginning of the contest.

Some time after the Grand Lodge of England, according to the "Old Institutions," was organized by a secession of several lodges from the Constitutional Grand Lodge, Laurence Dermott, writing in its defense, sought to attribute to it an origin older than that claimed by the Grand Lodge which had been instituted in 1717, and asserted that that organization "was defective in number and consequently defective in form and capacity."²

Again he declares that when this Grand Lodge was about to be established, "some joyous companions," who were only Fellow-Crafts, met together, and being entirely ignorant of the "Master's part" had invented a "new composition" which they called the third degree.³

At a later period the "Ancients" appear to have abandoned, or at least to have ceased to have pressed this claim to a priority of existence and to a greater regularity of organization. More mature reflection and the force of historical evidence led their leaders to the conviction that both of these claims were wholly untenable.

After the death of Laurence Dermott they began to confine their claim to legality, and their defense of the secession from the Constitutional Grand Lodge upon the single ground that the latter had made innovations upon the ancient landmarks, and by their change of words and ceremonies had ceased any longer to maintain the pure system of Speculative Freemasonry.

While these "variations in the established forms" were maintained by the Grand Lodge of "Moderns," the Grand Lodge of

¹ "Ahiman Rezon," edition of 1807, p. 117.

² *Ibid.*, edition of 1778, p. 14.

³ *Ibid.*, p. 35. It will be noted that Dermott did not make these grave accusations in his previous editions of the "Ahiman Rezon." They are first advanced in the edition published in 1778.

"Ancients" declared it to be impossible to hold Masonic intercourse with those who thus deviated from the legitimate work of the Order.

Hence, though, as has been seen, the Ancients were less aggressive in their language toward their rivals and did not indulge in the harsh censures which characterized the Constitutional Grand Lodge, they were, until after the commencement of the 19th century, more averse than that body to a union of the two divisions of the Fraternity, and met all advances toward that object with something more than indifference.

The evidence of this fact is abundantly shown in the transactions of both bodies.

We learn, on the authority of Preston, that in November, 1801, a charge was presented to the Constitutional Grand Lodge against some of its members for patronizing and officially acting as principal officers in a lodge of "Ancients." The charge being proved, it was determined that the laws should be enforced against them unless they immediately seceded from such irregular meetings. They solicited the indulgence of the Grand Lodge for three months, hoping that they might be enabled in that time to effect a union between the two societies. This indulgence was granted, and that no impediment might prevent the accomplishment of so desirable an object, the charges against the offending brethren were for the time withdrawn. A committee of distinguished Masons, among whom was the Earl of Moira, who was very popular with the Craft of "Moderns," was appointed to pave the way for the intended union, and every means were ordered to be used to effect that object.

Lord Moira declared, on accepting the appointment as a member of the Committee, that he should consider the day on which such a coalition should be formed as one of the happiest days of his life, and that he was empowered by the Prince of Wales, then Grand Master of the "Moderns," to say that his arms would be ever open to all the Masons in the kingdom, indiscriminately.¹

This was the first open and avowed proposition for a union of the two Grand Lodges. It emanated from the "Moderns," and up to that date none had ever been offered by the "Ancients," who were silently and successfully pursuing their career—in ex-

¹ Preston, "Illustrations," old edition, p. 329.

tending their influence, making lodges at home and abroad, and securing the popular favor of the Craft.¹

The effort, however, was not successful. After suspending all active opposition, the Constitutional Grand Lodge learned in February, 1803, that no measures had been taken to effect a union; it resumed its antagonistic position, punished the brethren who had been charged with holding a connection with the "Ancients," and unanimously resolved that "whenever it shall appear that any Masons under the English Constitution shall in future attend or countenance any lodge or meeting of persons calling themselves Ancient Masons under the sanction of any person claiming the title of Grand Master of England, who shall not have been duly elected in the Grand Lodge, the laws of the Society shall not only be strictly enforced against them, but their names shall be erased from the list and transmitted to all the regular Lodges under the Constitution of England."²

What were the means adopted by the Constitutional Grand Lodge to accomplish the much-desired object are not now exactly known. But that they were highly distasteful to the "Ancients" is very clear from the action of their Grand Lodge adopted on March 2, 1802.

This action was evidently intended as a reply to the proposition of the rival body of "Moderns," tendered in the preceding November. The declaration of the Grand Lodge of "Ancients" is printed in Harper's edition of the *Ahiman Rezon*, published in 1807.³ As this work is not generally accessible to the Fraternity, and as the document presents a very full and fair expression of the position assumed by the "Ancients" at that advanced period in the history of their career, I shall copy it without abbreviation.

"It was represented to this Grand Lodge, that notwithstanding the very temperate notice which was taken in the last Quarterly Communication, of certain unprovoked expressions used toward the Fraternity of Ancient Masons, by a Society generally known by the appellation of the Modern Masons of England, that body has been

¹There is no doubt that at that day, in America certainly, the "Ancients" were more popular than the "Moderns." Hence there appears to have been a settlement of expedience exhibited in the desire of the latter to effect a coalition.

²Preston, "Illustrations," old edition, p. 330.

³Pages 125-131.

further prevailed on to make declarations and to proceed to acts at once illiberal and unfounded with respect to the character, pretensions, and antiquity of this institution. It was not a matter of surprise that from the transcendent influence of the pure and unchanged system of Ancient Masonry, practiced in our regular lodges, the solidity of our establishment, the progressive increase of our funded capital, the frequency and extent of our benevolence, and, above all, from the avowed and unalterable bond of union, which has so long and so happily subsisted between us and the Ancient Grand Lodges of Scotland, Ireland, America, and the East and West Indies, it should be a most desirable object to the body of Modern Masons to enrol the two societies under one banner by an act of incorporation; but we did not expect that they would have made use of the means which have been attempted to gain the end. Bearing, as they do, the Masonic name, and patronized by many most illustrious persons, we have ever shown a disposition to treat them with respect, and we cannot suppress our feelings of regret, that unmindful of the high auspices by which they are, for the time, distinguished, they should here condescend to the use or language which reflects discredit on their cause. Truth requires no acrimony, and brotherhood disclaims it. It is a species of warfare so inconsistent with the genuine principles of Masonry, that they may wage it without the fear of a retort. Actuated by the benignity which these principles inspire, we shall content ourselves with a tranquil appeal to written record. It is not for two equal, independent and contending institutions to expect that the world will acquiesce in the *ipse dixit* of either party. We shall not rest our pretensions, therefore, on extracts from our own books, or on documents in our own possession—but out of their own mouths shall we judge them."

In their *Book of Constitutions*, quarto edition, anno 1784, p. 240, they make this frank confession: "Some variations were made in the established forms." This is their own declaration, and they say that these were made "more effectually to debar them and their abettors (that is, us, the ancient masons) from their lodges. "Now what was the nature of these changes? Fortunately, the dispute did not rest between the two rival bodies; it was not for either to decide which had the claim of regular descent from the ancient stock of the "York Masons." There was a competent tribunal. The Masonic world alone could exercise the jurisdiction and pronounce a verdict

on the case. Accordingly, after frequent visitations made to our lodges by the brethren from Scotland and Ireland, who repaired to England, the two Grand Lodges of these parts of the united empire pronounced in our favor and declared that in the Ancient Grand Lodge of England the pure, unmixed principles of Masonry—the original and holy obligations—the discipline and the pure science, were preserved. It was not in the forms alone that variations had been made by the modern order. They had innovated on the essential principles, and consequently the Masonic world could not recognize them as brothers.

"In the strict and rigorous, but beautiful, scheme of Ancient Masonry, every part of which was founded on the immutable laws of truth, nothing was left for future ages to correct. There can be no reforms in the cardinal virtues; that which was pure, just, and true as received from the eternal ordinance of the divine Author of all good, must continue the same to all eternity. In this grand mystery, every part of which contributes to a sacred end, even the exteriors of the science were wisely contrived as the fit emblems of the white and spotless lamb, which is the type of Masonic benignity.

"The Grand Lodge can not be more explicit. They will not follow the blameable practice of entering into a public discussion of what ought to be confined to the sanctuary of a regular lodge. Suffice it to say, that after mature investigation by the only persons who were authorized to pronounce a judgment on the subject, resolutions of correspondence were passed by the Ancient Grand Lodges of England, Ireland, and Scotland, which were entered in their respective archives, and which the Fraternity will find in our *Book of Constitutions*.

"These resolutions have been constantly acted upon from that time to the present day. We have since been further strengthened by the formal accession of the Grand Lodges of America and of the East and West Indies to the Union. And it may now be said, without any impeachment of the modernized order, that the phalanx of Ancient Masonry is now established to an extent of communication that bids defiance to all malice, however keen, and to all misrepresentation, however specious, to break asunder. May the Eternal Architect of the World preserve the Edifice entire to the latest posterity; for it is the asylum of feeble man against the shafts of adversity, against the perils of strife, and what is his own enemy,

against the conflict of his own passions. It draws more close the ties of consanguinity where they are, and creates them where they are not; it inculcates this great maxim as the means of social happiness, that, however separated by seas and distances, distinguished by national character or divided into sects, the whole community of man ought to act toward one another, in all the relations of life, like brothers of the same family, for they are children of the same Eternal Father, and Masonry teaches them to seek, by amendment of their lives, the same place of rest.

"The Ancient Grand Lodge of England has thought it due to its character to make this short and decisive declaration, on the unauthorized attempts that have recently been made to bring about a union with a body of persons who have not entered into the obligations by which we are bound, and who have descended to calumnies and acts of the most unjustifiable kind.

"They desire it therefore to be known to the Masonic world and they call upon their regular lodges, their Past and Present Grand Officers, and their Royal Arches and Masters, their Wardens and Brethren throughout the whole extent of the Masonic communion, to take notice, that they can not and must not receive into the body of a just and perfect lodge, nor treat as a Brother, any person who has not received the obligations of Masonry according to the Ancient Constitutions, as practiced by the United Grand Lodges of England, Scotland, and Ireland, and the regular branches that have sprung from their sanction. And this our unalterable decree.

"By Order of the Grand Lodge."

A careful perusal of this document will show that the position which had been assumed by the "Ancients" at the middle of the 18th century, when they organized their Grand Lodge, was abandoned by them at its close. Dermott maintained that his Grand Lodge was regular in its organization on the ground that the organization of the other body was irregular and illegal, and illegitimate. One of the reasons he assigned for this illegality was that it had been formed by a less than lawful number of lodges. There were but four lodges engaged in the organization of the Grand Lodge at London in the year 1717. But, says Dermott, with the utmost effrontery, knowing, as he must have known, that there was no such

law or usage in existence nor ever had been, "to form a Grand Lodge there must have been the Masters and Wardens of five regular lodges;" and he adds that "this is so well known to every man conversant with the ancient laws, usages, customs, and ceremonies of Master Masons, that it is needless to say more."¹ Hence the Grand Lodge of 1717 "was defective in number and consequently defective in form and capacity."

Another charge made by Dermott against the "Moderns" was that they were ignorant of the true Third degree and had fabricated a mere imitation of it, a "new composition" as he contemptuously calls it.

But at the close of the century both these charges were abandoned and a new issue was joined. The ground on which the "Ancients" rested the defense of their secession in 1738 from the Constitutional Grand Lodge was that that body had made "variations in the established forms;" in other words, that it had introduced innovations into the ritual.

Now this would seem to be a singularly surprising instance of mental aberration, if we did not know the perversity of human nature. When charging the "Moderns" with the introduction of innovations, the "Ancients" appear to have completely forgotten that far more serious innovations had been previously introduced by themselves.

The "Moderns" had only made a transposition of a couple of words of recognition; the "Ancients" had mutilated the Third degree and fabricated out of it a Fourth, hitherto unknown to the Craft. It ill became these bold innovators to condemn others for the very fault they themselves had committed to a far greater extent.

We are ready to exclaim with the Roman satirist: "*Quis tulerit Gracchos de seditione querentes?*"² "Who could endure the Gracchi when they complained of sedition?"

Having thus, by implication, at least, admitted the legality of the original organization of the Constitutional Grand Lodge and the correctness of its primitive work, and restricting their charge of irregularity to the single fact of the existence of innovations, the "Ancients," notwithstanding the emphatic language in their address of

¹ "Ahiman Rezon," edition of 1778, p. 13.

² Juvenal, Satire II., 24

1802, in which they had declared the impossibility of recognizing their rivals, had certainly made the way more easy for future reconciliation and union.

Had they continued to maintain the theory of Dermott that the Grand Lodge of "Moderns" was an illegal and un-Masonic body, which had never known or had the Master's part, I do not see how the "Moderns" could, with consistency and self-respect, have tendered, or the "Ancients" listened to, any offer of union and a consolidation.

But about the beginning of the 19th century there were many Masons, especially among the "Moderns," who felt the necessity of a reconciliation, since the protracted dissension was destructive of that harmony and fellowship which should properly characterize the institution. We have seen that the Prince of Wales had in 1801, when he was Grand Master of the "Moderns," expressed his willingness for a union of all English Masons. This sentiment was shared at a later period by his brothers, the Dukes of Kent and Sussex.

But of all the distinguished members of the Constitutional Grand Lodge, none was so zealous and indefatigable in the effort to accomplish a reconciliation as the Earl of Moira, who in 1795 had been Acting Grand Master under the Grand Mastership of the Prince of Wales.¹

In 1801 he had been appointed one of a committee to attempt to effect a union of the two Grand Lodges—a mission which was unsuccessful in its results. But he was more felicitous two years afterward in his efforts to induce a good understanding between the Grand Lodge of Scotland and the Constitutional Grand Lodge of England.

It has been heretofore seen that at an early period in the career of the Atholl Grand Lodge, the Grand Lodges of Ireland and Scotland had been induced, through the influence and misrepresenta-

¹ To no person, says Preston, had Masonry for many years been more indebted than to the Earl of Moira (now Marquis of Hastings). Toward the end of the year 1812 his Lordship was appointed Governor-General of India; and it was considered by the Fraternity as only a just mark of respect to invite his Lordship to a farewell banquet previous to his departure from England, and to present him with a valuable Masonic Jewel, as a memorial of their gratitude for his eminent services. Preston, "Illustrations of Masonry," old edition, p. 346.

tions of Dermott, to take the part of the "Ancients" and to recognize them as the only legal Masonic authority in England.

In 1782 the Constitutional Grand Lodge, supposing, it seems fallaciously, that there was some prospect of establishing a friendly correspondence with the sister kingdoms, concurred in a resolution recommending the Grand Master to use every means which in his wisdom he might think proper, for promoting a correspondence with the Grand Lodges of Scotland and Ireland, so far as should be consistent with the laws of the Society.¹

As this last provision necessarily required, on the part of the Irish and Scottish brethren, a denunciation of their friends the "Ancient Masons," we may infer this to have been the cause of the unsuccessful result of the negotiation. Notwithstanding this resolution, says Preston, the wished-for union was not then fully accomplished.²

But twenty years had to elapse before a spirit of conciliation was shown by the Grand Lodge of Scotland, and eight more before the Grand Lodge of Ireland exhibited a similar spirit.

At the annual session of the Grand Lodge of Scotland in November, 1803, the Earl of Moira being present, addressed the Grand Lodge in what Laurie calls an impressive speech, equally remarkable for the eloquence of its sentiments and the energy of its enunciation.

As the account contained in *Laurie's History* is a contemporary one, it may be considered as reliable and is worth giving in the very words of the author of his work.³

"The Earl of Moira stated that the hearts and arms of the Grand Lodge of England had ever been open for the reception of their seceding brethren, who had obstinately refused to acknowledge their faults and return to the bosom of their Lodge; and that though the Grand Lodge of England differed in a few trifling observances from that of Scotland they had ever entertained for Scottish Masons that affection and regard which it is the object of Freemasonry to cherish and the duty of Freemasons to feel. His Lordship's speech was received by the brethren with loud and

¹ Northouck, "Constitutions," p. 340.

² "Illustrations," old edition, p. 257.

³ Laurie's "History of Freemasonry" was published at Edinburgh in 1804—the last entry in the book is the account of this speech.

reiterated applause—the most unequivocal mark of their approbation of its sentiments.¹

It was afterward stated by the Earl of Moira, that at that communication the Grand Lodge of Scotland had expressed its concern that any difference should subsist among the Masons of England and that the lodges meeting under the sanction of the Duke of Atholl should have withdrawn themselves from the protection of the Grand Lodge of England, but hoped that measures might be adopted to produce a reconciliation, and that the lodges now holding irregular meetings would return to their duty and again be received into the bosom of the Fraternity.²

This was certainly an unqualified admission by the Grand Lodge of Scotland that in its previous action in respect to the contending bodies in England it had been in error. It did not now hesitate to style the "Ancients" whom it had formerly recognized irregular Masons, and to acknowledge that their organization was illegal.

The inevitable result was soon apparent. The Grand Lodge of Scotland entered into fraternal correspondence with the Constitutional Grand Lodge of England and recognized it as the Supreme Authority of English Masonry. This good feeling was still further augmented by the election in 1805 of the Prince of Wales as Patron and Grand Master of the Grand Lodge of Scotland and the appointment of the Earl of Moira as Acting Grand Master, both of which high offices were respectively held at the same time by the same persons in the Constitutional Grand Lodge of England.

Here then was a thorough reversal of the conditions which had previously existed. In the year 1772 the office of Grand Master, both in England and in Scotland, had been filled by the same person, the Duke of Atholl. But it was over the irregular and illegal English body that he presided. The result was a close and friendly alliance between the Grand Lodge of Scotland and the schismatic Grand Lodge in England.

Again in the year 1805 we see the Grand Lodge of England and the Grand Lodge of Scotland united under one and the same Grand Master, the Prince of Wales. But now it was the regular Grand Lodge of England that shared the honor of thus royal head-

WILLIAM R. SINGLETON

ship with the Scottish Grand Lodge. The result in this latter case was of course exactly contrary to that which had ensued in the former.

From this time there was no question as to the relations existing between the two Grand Lodges.

Still further to strengthen the cement of this union, if such strengthening were necessary, was the occurrence soon after of an event in Scottish Masonry.

Schism, which had wrought so much evil in English Masonry, «it length made its appearance among the Scottish lodges.

In the year 1808 several lodges had seceded, from political motives, it is believed, from the Grand Lodge of Scotland. They had organized an independent body with the title of "The Associated lodges seceding from the present Grand Lodge of Scotland " and on July 4th had met in the Cannongate Kilwinning Lodge room, and elected a Grand Master.¹

The Grand Lodge of Scotland announced this rebellious action to the Grand Lodge of England, which expressed its fullest sympathy with the Grand Lodge, approved of the methods it pursued to punish the seceders and to check the secession, and proclaimed the doctrine now universally accepted in Masonic law, that a Grand Lodge, as the representative of the whole Craft, is the sole depository of supreme power.

Thus was the union of the two Grand Lodges still more closely cemented, and the Grand Lodge of Scotland became an earnest advocate and collaborator in the effort to extinguish the English schism.

In the same year the Grand Lodge of Ireland addressed a communication to the Grand Lodge of England, in which it took occasion to applaud the principles of Masonic law enunciated by that Grand Lodge in its reply to its Scottish sister. The Grand Lodge of Ireland also expressed its desire to co-operate with that of England in maintaining the supremacy of Grand Lodges over individual lodges. It also pledged itself not to countenance or receive as a Brother any person standing under the interdict of the Grand Lodge

¹ It is unnecessary and irrelevant to enter here into the history of this secession. The details will be found at full length in Bro. Lyon's "History of the Lodge of Edinburgh," pp. 264-281. We are here interested only in its supposed influence upon the relations of the Grand Lodges of Scotland and England.

of England for Masonic transgression. It thus cut itself aloof from its former recognition of the Atholl Grand Lodge.¹

It is scarcely necessary to say that this act was received by the Constitutional Grand Lodge with a reciprocal feeling of fraternity.

Thus from the year 1808 the three regular and legitimate Grand Lodges of Great Britain were united in an alliance, the prominent object of which was the extinction of the schism which had prevailed in England for three-quarters of a century and the consolidation of all the jarring elements of English Freemasonry under one head.

With such powerful influences at work, it is not surprising that the happy and "devoutly wished-for consummation" was soon effected.

The leading Freemasons of England, on both sides of the contest, readily lent their aid to the accomplishment of this result.

The Prince of Wales having been called, in consequence of the King's mental infirmity, to the Regency, the established etiquette required that he should resign the Grand Mastership, a position which he had occupied for twenty-one years.

On his retirement the Duke of Sussex was elected Grand Master of the Constitutional Grand Lodge. He was recognized as an ardent friend of the proposed union. Through his influence, as Preston supposes,² the Duke of Atholl, who was Grand Master of the "Ancients," had been led to see the desirableness of a union of the two societies under one head.

A similar desire for union began now to prevail among the Freemasons of both sides, especially among the "Ancients," who had hitherto rejected all proposals for a compromise of any kind that did not include the concession of everything on the part of the "Moderns."

In 1809 a motion looking to a union was submitted to the Grand Lodge of "Ancients," but ruled out by the presiding officer, who refused to put the question.³

Nevertheless, the right spirit prevailed, and in 1810 a "Union Committee" was appointed by the Grand Lodge of "Ancients." which held a joint meeting with a similar committee of the Grand

¹ Preston, "Illustrations," old edition, p. 340.

³ Hughan's "Memorials," p. 14.

Lodge of "Moderns," on July 21, 1810, on which occasion the Earl of Moira, Acting Grand Master of the Constitutional Grand Lodge, presided.

At a meeting of the Grand Lodge of "Moderns" on April 12, 1809, that body rescinded all its former resolutions which forbade the admission of the "Ancients" into their regular lodges,¹ and thus really took the first step toward a formal recognition of the seceders.

In 1810 the "Ancients" began to make concessions. They directed all resolutions relating to the union to be published and submitted to the Craft for their consideration. They also made alterations in their regulations to conform to those of the "Modern."²

But the time had now arrived when the necessities of concord and harmony imperatively demanded a cessation of the antagonism which had so long existed between the two rival Grand Lodges and their consolidation under a common head, so that Speculative Freemasonry in England should thereafter remain "one and indivisible."

The "Moderns" had long been desirous of a union, which, on the other hand, the "Ancients" had always strenuously opposed. "It is," says Bro. Hughan, "to the credit of the 'Moderns' that they were the firm supporters of the Union, even when the 'Ancients' refused the right hand of fellowship."³

It is not to be denied that the success of the "Ancients" in winning popularity among the Craft, especially in America, where they had largely extended their influence, was a principal reason for their rooted aversion to any sort of compromise, which would necessarily result in the extinction of their power and their independent position.

But many events had recently begun to create a change in their views and greatly to weaken their opposition to a union of the two Grand Lodges.

In the first place, the charge that the "Moderns" had made innovations on the landmarks was losing the importance which had been given to it in the days of Laurence Dermott. It was still maintained, but no longer urged with pertinacious vigor. History was

¹ Hughan's "Memorials," p. 15.

² Their regulations, says Hughan, were also altered so as to conform as much as possible to those of the regular Grand Lodge. "Memorials of the Masonic Union," p. 15.

³ Ibid.

beginning to vindicate truth, and those "Ancients" who thought at all upon the subject, must have seen that their secession from the regular Grand Lodge had preceded the innovations of that body, and that they themselves had been guilty of far greater innovations by the disruption of the Third degree and the fabrication of a Fourth one.

In the second place, the theory maintained by Dermott and accepted by his followers, that the regular Grand Lodge of England, instituted at London in the year 1717, was an illegal body, defective in numbers at its organization and without the true degrees, had long been abandoned as wholly untenable. History was again exercising its functions of vindicating truth. It is very evident, and the "Ancients" knew it, that if the Grand Lodge organization of 1717 was illegal, their own of 1753 must have been equally so, for the latter had sprung out of the former. It was felt to be dangerous, when men began to investigate the records, to advance a doctrine which logically led to such a conclusion.

A third reason, and a very strong one, which must have controlled the "Ancients" in arriving at a change of views, must have been the defection of the Grand Lodges of Scotland and Ireland. These two bodies which had at first entered into an alliance with the Atholl Grand Lodge at the expense of the Constitutional Grand Lodge, had changed sides, and had now recognized the latter body as the only legal head of Freemasonry in England, had admitted that the "Ancients" were irregular, and had refused to give them recognition as Masons.

A fourth reason was that the Duke of Atholl, who had long been at the head of the Grand Lodge which bore his name and that of his father, and who for two generations had been identified with its existence, had been won by the arguments or influenced by the friendship of the Duke of Sussex, the Grand Master of the Constitutional Grand Lodge, and had resolved to resign his Grand Mastership in favor of the Duke of Kent, for the avowed purpose of preparing for a union of the Craft.

Yielding to these various influences and perhaps to some others of less note, the Grand Lodge of "Ancients" in the year 1813 abandoned its opposition to a union, and accepted the preliminary measures which had been adopted by the friends of that union.

At a special meeting of the "Grand Lodge of Free and Ac-

cepted Masons of England, according to the Old Institutions" held on November 8, 1813, at the "Crown and Anchor Tavern," in the Strand, a letter was read from the Duke of Atholl intimating his desire of resigning the office of Grand Master in favor of his Royal Highness, the Duke of Kent.¹

At the same meeting the resignation of the Duke of Atholl was accepted and the Duke of Kent was unanimously elected to succeed him as Grand Master of the Grand Lodge of "Ancients."

Edward, Duke of Kent and Strathcarne, the fourth son of George the Third, was then forty-six years of age. He was initiated into Freemasonry in a lodge at Geneva, in Switzerland. At the time of this election he was and had long been the Grand Master of the "Ancient Masons" of Canada. He was, therefore, identified with the cause of the "Ancients," but like his brothers, the Prince of Wales and the Duke of Sussex, he was greatly desirous of a consolidation of the two Grand Lodges. At as early a period as January, 1794, he had expressed this sentiment in his reply to an address from the Masons of Canada, when he said: "You may trust that my utmost efforts shall be exerted, that the much-wished for union of the whole Fraternity of Masons may be effected."²

On December 1, 1813, the Duke of Kent was installed as Grand Master of the "Ancients." On this occasion the Duke of Sussex, as Grand Master of the Constitutional Grand Lodge, was present with several of his Grand Officers. To qualify them for visitation they were previously "made Ancient Masons in the Grand Master's Lodge No. 1, in a room adjoining."

The transactions on that day must be considered as a conclusive settlement of the vexed question of legality. The fact that the Grand Master of the Grand Lodge of "Moderns" was present, and by his presence sanctioned the installation of the Grand Master of the Grand Lodge of "Ancients," and that to qualify himself to do so had submitted to an initiation in the system of the "Ancients," forever precluded the "Moderns" from making a charge of irregularity against their rivals; these in turn were equally precluded from denying the Masonic legality of a body whose Grand Master had

¹ The minutes of this meeting will be found in Hughan's "Memorials of the Union," p. 16.

² *Freemason's Magazine*, vol. iii., July, 1794, p. 14.

been made participant in their mysteries, and had taken a part in the solemn ceremonies of installation of their presiding officer.

Indeed, the union had already been virtually accomplished, and all that was now needed was its formal ratification by the two Grand Lodges.

On September 1st the Duke of Kent, not then Grand Master, had been associated by the Grand Lodge of "Ancients" with Deputy Grand Master Harper and Past Deputy Grand Masters Perry and Agar as a Committee to take the preliminary steps for effecting a union of the two fraternities.

This Committee had held several conferences with the Duke of Sussex, who was assisted by three of his Grand Officers, Bro. Wright, Provincial Grand Master of the Ionian Isles, and Past Grand Wardens Tegart and Deans.

The joint committee had drawn up articles of union between the two Grand Lodges Which had been signed and sealed in duplicate at Kensington Palace, the residence of the Duke of Sussex.

Early in December, at the Quarterly Communications, these Articles had been submitted to both Grand Lodges and solemnly ratified, and the following Festival of St. John the Evangelist had been appointed for the Assembly of the Grand Lodges in joint communication to carry out the provisions which had been agreed upon.

Each Grand Master had appointed "nine worthy and expert Master Masons or Past Masters," to whom were assigned by the Articles of Union the following important duties.

Under the Warrant of their respective Grand Lodges they were to meet together in some convenient central place in London, when each party having opened a lodge according to the peculiar forms and regulations of each, they were reciprocally and mutually to give and receive the obligations of both Fraternities, deciding by lot which should take priority in the giving and receiving. They were then to hold a lodge under dispensation, to be styled the "Lodge of Reconciliation," or they were then to visit the different lodges and having obligated their officers and members to instruct them in the forms of both the systems.¹

These and other preliminary arrangements having been complied with, the two Fraternities, with their Grand Lodges, met on Decem-

¹ See "Articles of Union," Article V.

ber 27, 1813, at Freemasons' Hall, which had been fitted up agreeably to a previously devised plan, and the whole house tiled from the outer porch.¹

On each side of the room the Masters, Wardens, and Past Masters of the several lodges were arranged on benches, and so disposed that the two Fraternities were completely intermixed.

The two Grand Lodges were opened in two adjoining rooms, each according to its peculiar ceremonies, and a Grand Procession being formed, the two bodies entered side by side the Hall of Assembly, the Duke of Sussex closing one procession and the Duke of Kent the other.

On entering the Hall the procession advanced to the Throne, and opening inward the two Grand Masters proceeded up the center and took seats on each side of the Throne.

The Past Grand officers and illustrious visitors occupied the platform, and the two Senior Grand Wardens, the two Junior Grand Wardens, and the two Grand Secretaries and Grand Treasurers occupied the usual stations in the West, South, and North.

Silence having been proclaimed, the services began with prayer, offered up by Rev. Dr. Barry, the Grand Chaplain of the "Ancients."

After the act of union had been read by Sir George Naylor, Grand Director of Ceremonies, the following proclamation was made by the Rev. Dr. Coghlan, Grand Chaplain of the Grand Lodge of "Moderns."

"Hear ye: This is the Act of Union engrossed in confirmation of Articles solemnly concluded between the two Grand Lodges of Free and Accepted Masons of England, signed, sealed, and ratified by the two Grand Lodges respectively: by which they are hereafter and forever to be known and acknowledged by the style and title of THE UNITED GRAND LODGE OF ANCIENT FREEMASONS OF ENGLAND. How say you, Brothers, Representatives of the two Fraternities? Do you accept of, ratify and confirm the same?"

To which the whole Assembly answered: "We do accept, ratify and confirm the same."

¹This account is condensed from Oliver's edition of Preston, pp. 368-373. The "Order of Proceedings" to be observed on the occasion are given by Bro. Hughan in his Memorials. They do not essentially differ from the details by Preston, and the latter has the advantage of being in the past tense.

The Grand Chaplain then said: "And may the Great Architect of the Universe make the Union perpetual." To which all the Brethren replied: "So mote it be."

The Articles of Union were then signed by the two Grand Masters and six Commissioners, and the seals of both Grand Lodges were affixed to the same.

Proclamation was then made by Rev. Dr. Barry in the following words:

"Be it known to all men that the Act of Union between the two Grand Lodges of Free and Accepted Masons of England is solemnly signed, sealed, ratified and confirmed, and the two Fraternities are one, to be henceforth known and acknowledged by the style and title of "The United Grand Lodge of Ancient Freemasons of England: and may the Great Architect of the Universe make their Union perpetual."

The Brethren all responded "Amen," and a symphony was played by the Grand Organist, Bro. Samuel Wesley.

The Ark of the Masonic Covenant, which had been placed in front of the Throne, was then approached by the two Grand Masters, their Deputies and Wardens.

The Grand Masters standing in the East, the Deputies on their right and left, and the Grand Wardens in the West and South, the square, level, plumb, and mallet were successively delivered to the Deputy Grand Masters and by them presented to the two Grand Masters, who having applied the square, level, and plumb to the Ark and struck it thrice with the mallet, they made the following invocation:

"May the Great Architect of the Universe enable us to uphold the grand edifice of union, of which this Ark of the Covenant is the symbol, which shall contain within it the instruments of our brotherly love and bear upon it the Holy Bible, Square, and Compasses, as the light of our faith and the rule of our works. May He dispose our hearts to make it perpetual."

And the Brethren all responded, "So mote it be."

The Masonic elements of consecration, corn, wine, and oil, were then poured upon the Ark, according to the ancient Rite, by the two Grand Masters, accompanying the act with the usual invocation.

This constituted the impressive ceremony by which the union of the hitherto rival Fraternities was consecrated.

The Grand Lodges of Scotland and Ireland were not represented, in consequence of the shortness of the notice, but letters of congratulation were received from each, with copies of resolutions which had been passed by both.

As the two Fraternities differed in their forms and ceremonies, it was necessary that some compromise should be effected so that a universal system might be adopted by the united Grand Lodge. The determination of what that system of forms should be, had been entrusted to the "Lodge of Reconciliation" as its most important, and doubtless its most difficult duty.

This duty was accomplished in the following manner: After the ceremonies of ratification had been performed, the "Lodge of Reconciliation" retired to another apartment, accompanied by the Count Lagardje, Past Grand Master of the Grand Lodge of Sweden, Dr. Van Hess of the Grand Lodge of Hamburg, and other distinguished Masons, when the forms and ceremonies which had been previously determined upon by the "Lodge of Reconciliation" were made known.

On their return to the Assembly-room, Grand Master the Count Lagardje announced that the forms which had been settled and agreed on by the "Lodge of Reconciliation" were "pure and correct."

They were then recognized as the only forms to be thereafter observed and practiced in the United Grand Lodge and by the lodges under its obedience.

The recognized obligation was then administered by the Rev. Dr. Hemming, standing before the Bible, Square and Compasses lying on the Ark, and repeated by all the Brethren, who solemnly vowed, with joined hands, to abide by the same.

The next step was the organization of the new Grand Lodge by the election of its officers.

For this purpose the Officers of the two Grand Lodges divested themselves of their insignia, and the chairs were taken by Past Grand Officers of the two Fraternities.

The Duke of Kent addressed the assembly. He stated that the great object for which he had taken upon himself the office of Grand Master of the Ancient Fraternity, as declared at the time, was to facilitate the accomplishment of the union. He then nominated the Duke of Sussex as Grand Master of the united Grand Lodge.

The Duke of Sussex was unanimously elected and placed upon the throne by the Duke of Kent and Count Lagardje.

The Grand Master nominated the Grand officers for the year ensuing. The Grand Lodge was then called to refreshment, and on returning, some necessary business having been transacted, the Grand Lodge was closed in ample form.

It is impossible to arrive at any absolutely accurate knowledge of the numerical strength of the two Fraternities at the time of the union. This arises from the fact that the lists made by both Grand Lodges at that date contained the names of many lodges which were either extinct or had passed over to other jurisdiction.

Thus in the list of the "Moderns" ending in 1812, as given by Bro. Gould in his *Four Old Lodges*, the number of lodges runs up to 640; but of these many, as the list commences with the year 1721, must have long ceased to exist, and several are recorded as being in Germany and France, where the English Grand Lodge had no longer any jurisdiction, and nineteen are credited to the United States of America, where independent Grand Lodges had long been established.

In the same inaccurate way we find that the list of the "Ancients," published in 1813 in their *Ahiman Rezon*, records 354 lodges as being under its jurisdiction.

Many of these, however, had passed from its jurisdiction or must have ceased to exist. Ten lodges, for instance, are credited to the United States, and some to other foreign countries where the Grand Lodge no longer possessed any authority.

We may, however, estimate the comparative strength of the two Fraternities at the union by the registry of lodges made at that time, when the members were assigned by lot.

In that list, which is given by Bro. Hughan in his *Memorials of the Union*, 636 lodges are enrolled. Of these, 385 were "Moderns," and 251 "Ancients." If, however, it be considered that the former had been in existence for ninety-six years and the latter only sixty,¹ it will be seen that the relative proportion of successful growth was greatly in favor of the "Ancients."

Notwithstanding that the Constitutional Grand Lodge had secured the adhesion of a much higher class in the social element,

¹The Grand Lodge of "Moderns" was instituted in 1717, that of the "Ancients" in 1753. The former commenced with four Lodges, the latter with seven.

that from the fifth year of its existence it had been presided over by an uninterrupted succession of Peers of the realm, and that at the very period of the Union its Grand Master was a son of the reigning monarch, and that its acknowledged Patron was the heir-apparent of the Crown,¹ the Atholl Grand Lodge without these advantages enjoyed a much greater share of popularity among the masses of the Craft.

This popularity can properly be attributed only to that innovation on the accepted ritual of the Constitutional Grand Lodge which produced the secession. The dismemberment of the Master's degree and the fabrication of a Fourth degree called the Royal Arch, gave to the seceders a prestige not enjoyed by their rivals. Candidates eagerly repaired for initiation to the body, which promised them a participation in a larger amount of mystical knowledge.

The "Moderns" soon became aware of this fact, and it was not very long before, notwithstanding their outcry against innovation, they adopted the same degree or at least quietly suffered its intrusion into their own system. A Royal Arch Chapter and then a Grand Chapter was established by some "Moderns" about the year 1766, and though it was not actually countenanced, it was not denounced by the Constitutional Grand Lodge.

It has been supposed by some writers that the "Ancients" were sustained by and indeed represented the Operative element of the Craft in opposition to the purely Speculative, which was represented by the "Moderns."

But of this there is no satisfactory historical evidence. In 1723 the Operative Freemasons who, in 1717, had taken a part in the organization of the Grand Lodge, had been laid upon the shelf by that body, nor is it likely that at a long interval they would renew the contest in which they had been so signally defeated.

The excellent results which followed from the union of the two Fraternities, in the restoration of peace and concord, and the consequent strengthening of the Institution, have preserved the method in which this union was effected from adverse criticism.

The union was a compromise, and in all compromises there are

¹ Whatever influence these circumstances must have naturally exerted in a monarchy, its importance will hardly be appreciated at its full value by the citizens of a republic. Anderson says that at first the Freemasons were content "to choose a Grand Master from among themselves, till they should have the honor of a Noble Brother at their head."

necessarily mutual concessions. But it is a question whether these concessions by both parties did not involve the sacrifice of certain principles which both had hitherto deemed important.

The "Articles of Union" which constituted the groundwork on which the consolidation of the two Grand Lodges was framed, are twenty-one in number. Most of these relate to local regulations made necessary by the circumstances. Only three—the second, third, and fourth—have reference to the concessions made in the ritual and in the system of Speculative Freemasonry. These articles are in the following words:

"II. It is declared and pronounced that pure Ancient Masonry consists of three degrees, and no more, viz.: those of the Entered Apprentice, the Fellow-Craft, and the Master Mason, including the Supreme Order of the Holy Royal Arch. But this article is not intended to prevent any lodge or Chapter from holding a meeting in any of the degrees of the Orders of Chivalry, according to the Constitutions of the said Orders.

"III. There shall be the most perfect unity of obligation, of discipline, of working the lodges, of making, passing and raising, instructing and clothing the Brothers; so that one pure, unsullied system, according to the genuine landmarks, laws and traditions of the Craft shall be maintained, upheld and practiced, throughout the Masonic World, from the day and date of the said union until time shall be no more.

"IV. To prevent all controversy or dispute as to the genuine and pure obligations, forms, rules and ancient traditions of Masonry and further to unite and bind the whole Fraternity of Masons in one indissoluble bond, it is agreed that the obligations and forms that have, from time immemorial, been established, used and practiced in the Craft, shall be recognized, accepted and taken, by the members of both Fraternities, as the pure and genuine obligations and forms by which the incorporated Grand Lodge of England, and its dependent lodges in every part of the World shall be bound: and for the purpose of receiving and communicating due light and settling this uniformity of regulation and instruction (and particularly in matters which can neither be expressed nor described in writing), it is further agreed that brotherly application be made to the Grand Lodges of Scotland and Ireland, to authorize, delegate and appoint, any two or more of their enlightened members, to be present at the Grand As-

sembly on the solemn occasion of uniting the said Fraternities; and that the respective Grand Masters, Grand Officers, Masters, Past Masters, Wardens and Brothers, then and there present, shall solemnly engage to abide by the true forms and obligations (particularly in matters which can neither be described nor written), in the presence of the said Members of the Grand Lodges of Scotland and Ireland, that it may be declared, recognized and known, that they are all bound by the same solemn pledge, and work under the same law."

An examination of these three articles will clearly demonstrate that both Grand Lodges made concessions to each other, which involved the sacrifice in turn of the very points of ritualism on which each had, for nearly three-fourths of a century, maintained its right to supremacy.

In Article II. the Royal Arch is recognized as an inherent portion of "Ancient Craft Masonry." Yet when about 1738 the Freemasons began soon after to call themselves "Ancient Masons," their lodges were erased from the roll and their members expelled because they had practiced this same degree. Nothing then and long after so much incensed the "Moderns" as this innovation, as they called it, of a new degree. "Our society," said their Grand Secretary, Spencer, "is neither Arch, Royal Arch, nor Ancient."

On this point the "Ancients" certainly achieved a victory. The attempted qualification in the declaration that Ancient Craft Masonry consisted of only three degrees, which was a concession to preserve the consistency of the "Moderns," was without meaning, since it was immediately followed by the admission that there was a Fourth degree.

In Article III. it is declared that the methods of initiation and instruction should be according to the genuine landmarks, laws, and traditions of the Craft. But the United Grand Lodge adopted the changes in the words of the degrees, which had been introduced by the Constitutional Grand Lodge, to prevent the intrusion of the seceders into the regular lodges. The preservation of these words and certain other changes was certainly not in accordance with the "landmarks," supposing these landmarks to be the usages of the Craft, adopted at or soon after the organization in the year 1717. The result has been to create in these respects a difference between

the Continental and the English-speaking Masons, the former adhering to the original forms.¹

This would be a victory for the "Moderns," but not one of so much importance as that achieved by the "Ancients" in the recognition of the Royal Arch degree.

The assertion in Article IV. that the obligations and forms which were agreed upon at the Union were those which "from time immemorial have been established, used and practiced by the Craft," is thus found to be merely a "*façon de parler*" too much in vogue even at the present day, when referring to the antiquity of usages. The "time immemorial" thus vaunted, dwindles down, in fact, to the date of the organization of the "Lodge of Reconciliation," to which the regulation of these "obligations and forms" had been entrusted.

The confirmation of this new system by the Grand Lodges of Scotland and Ireland, which was provided for in the same article, was not carried into effect, for no representatives of these bodies were present.

The Grand Lodge of Ireland, it may be presumed, as the Irish Masons had long favored the high degrees, would give its implicit assent to the First Article in which even the degrees of Chivalry were recognized by sufferance.

But the Grand Lodge of Scotland had always contended that Ancient Craft Masonry, or as it was styled, "St. John's Masonry," consisted of only three degrees.² In 1800 it had prohibited its lodges from holding any meetings above the degree of Master Mason under penalty of the forfeiture of their charter.³ And only four years after the United Grand Lodge of England had recognized the Royal Arch as a part of Ancient Craft Masonry, the Grand Lodge of Scotland resolved that no person holding official position in a Royal Arch Chapter should be admitted to membership in the Grand Lodge.⁴

But in fact we must look for a defense of these compromises by the two Grand Lodges of England to the peculiar and threatening condition in which they were placed. Without compromise

¹The Gordian knot presented by the change in the Master's Word made by the "Moderns" was cut, by the adoption or sanction of both words, and they are still so used in English lodges. In the United States of America the word of the "Moderns" has long since passed out of the memory and the knowledge of the Craft, and the original word of Desaguliers and his collaborators alone is used.

²"The Constitution of the Grand Lodge of Scotland."

⁴Ibid., p. 295.

and mutual concession of many things the maintenance of which both had once deemed essential, no union could have been effected, and without a Union the success and permanency of one, if not of both bodies, would be seriously endangered.

It must therefore be acknowledged, notwithstanding any criticism on the methods pursued, which were demanded by the claims of historic truth that, here at least, the generally to be condemned maxim of the Jesuits, which justifies the means by the end accomplished, may find some excuse.

Looking back, at this distant period, upon the history of the Craft from the middle of the 18th to the beginning of the 19th century, when the passions and prejudices which distracted the Fraternity have ceased to exist, we recognize the fact that the rivalry of the two factions was destined to be ultimately of advantage to the institution.

Oliver, speaking of this and other secessions which occurred in the 18th century, says: "I am persuaded that these schisms, by their general operation, rather accelerated than retarded the outward progress of Masonry; for at the precise time when they were most active, we find the science spreading over all the European nations and exciting the attention of all ranks and classes of mankind."¹

Antagonism, in the long run, leads to development. The protracted struggle which finally terminated in the recognition of the Royal Arch, not only gave to the Master's degree a completeness which it had before wanted, but by the establishment of a new ritual, which more nearly approached perfection than the old one, tended to develop a more philosophic spirit in the system of Speculative Freemasonry. Of this fact ample evidence is given in the lectures of Dr. Hemming which were adopted by the United Grand Lodge, and which are much more intellectual than any that preceded them.²

The old and comparatively meager ritual of Desaguliers, and Anderson, with the slight additions of Martin Clare, of Dunckerley and Preston, presenting only an imperfect system, would, but for the Union, have been continued to the present day, if Speculative Freemasonry had not long before died of inanition.

¹ "Historical Landmarks," ii., p. 313.

² It is to Hemming that we are indebted for that sentence which defines Freemasonry as "a system of morality, veiled in allegory and illustrated by symbols." It must be confessed, however, that he made some omissions and alterations in the old lectures, which had better been spared. But "nihil est ab omni parte beatum."

The rivalry of the two bodies gave an active expansion of that spirit of charity which is incidental to every Brotherhood. Neither could afford to be less kindly disposed to the distressed of their fold than the other. And this spirit of charity, thus developed during the struggle, was vastly strengthened and made of more practical utility by the consolidation of the Fraternity.

But the most important advantage derived from the long antagonism was the development of the science of symbolism, which has given to the Institution a just claim to the title of Speculative Masonry, which it had long before assumed, and elevated it to the rank of a system of moral philosophy.

Now, for the first time since the disseverance, in the beginning of the 18th century, of the Speculative from the Operative element was it announced as the accepted definition of Freemasonry that it was "a system of morality, veiled in allegory and illustrated by symbols."

It was Hemming who proclaimed this sublime definition in the Union lectures which he framed and which has awakened the thoughts and directed the Speculations of all Masonic scholars who have written since his day.

There are, it is true, some few defects in the lectures of Dr. Hemming, but they are on the whole superior to those of Preston—superior because more philosophic and more symbolical. Preston's system was the germ, Hemming's the fruit, and the fruit always is better than the germ.

In conclusion it may be said that the rivalry of the two factions was productive of this good, that it stimulated each to seek for a higher plane of action and of character; and the union which finally took place, no matter what was the actuating motive, was the most fortunate event that had ever occurred in the Masonic Society, since it developed a higher plane for its action, and secured it a long and prosperous continuance of life which one or both of the antagonizing parties must have long since forfeited had there been no Union effected.

Peace, harmony, and concord firmly established, a consolidation of interests—a more enlarged practice of charity and brotherly relief, and a more elevated character of Speculative Freemasonry—these were the results of the Union in 1813 in England, which was speedily imitated in all other countries where the rivalry had previously existed.

CHAPTER XLIV

THE GRAND LODGE OF FRANCE

It has, I think, been conclusively shown in a preceding chapter that in the year 1732 there were but two lodges in the city of Paris, one of which had received a Warrant from the Grand Master of the Grand Lodge of England and the other had been formed, we may suppose, by a secession or, as we should now say, a demission of a portion of the members of the first lodge, grown,

numerically,
too large.

There is no authentic record that the Grand Master or the Grand Lodge of England ever granted a Deputation for the establishment of a Provincial Grand Master or a Provincial Grand Lodge in France. Indeed, it has been very plausibly urged that the granting of such a Deputation to the titular Earl of Derwentwater, a convicted traitor to the English Government, whose execution had only been averted in 1715 by his escape from prison, would have been a political impossibility.

Kloss, in his *History of Freemasonry in France*, says that "the unfortunate international political relations which existed between England, the mother-country, and France, the daughter, prevented that free intercourse and development which might have been looked for."¹

And yet the French authorities claim that to him such a Deputation had been granted.

Thus, we are met, on the very incipience of our investigation of the history of the institution of a Grand Lodge in France, by contradictory statements from the English and French authorities.

There is no way of reconciling these contradictory statements. We must utterly reject the impossible or the improbable, and accept

¹ "Geschichte der Freimaurerei in Frankreich aus achten urkunden dargestellt," von Georg Kloss, I., 336.

only that which has the support of reliable authority and as to which there is no conflict between the writers on both sides of the channel.

But the adoption of this rule will not always save us from the pressure of critical difficulties. The authority of the English writers is generally of a merely negative character. With the exception of the statement of Anderson, that Viscount Montagu granted two Warrants for lodges—one at Paris and one at Valenciennes, in the year 1732—there is, in the contemporary English records, an absolute silence in reference to all Masonic affairs in France.

The French writers are more communicative, but they have so often mistaken fable for fact, and tradition for history, that we seldom find satisfaction in receiving their statements. One of them admits that the absence of any historical monuments of the first lodge has cast some obscurity over the early operations of Freemasonry in Paris.¹

In fact, the history of Speculative Freemasonry in France, until the year 1736, may be considered as almost hypothetical and traditionary. It is said that there was a Provincial Grand Lodge and a Provincial Grand Master, but the evidence on this subject is altogether wanting—at least such evidence as a faithful historian would require.

In the "Historical Instruction" sent in 1783 by the Grand Lodge of France to its constituent lodges, it is said that Lord Derwentwater was considered as the first Grand Master of the Order in France.²

Rebold is more circumstantial in his details than any other French writer. He says that "Lord Derwentwater, who in 1725 received from the Grand Lodge at London plenary powers to constitute lodges in France, was, in 1735, invested by the same Grand Lodge with the functions of Provincial Grand Master, and when he quitted France to return to England, where soon after he perished on the scaffold, a victim to his attachment to the Stuarts, he transferred the plenary powers which he possessed to his friend Lord Harnouester, whom he appointed as the representative, during his absence, of his office of Provincial Grand Master."³

¹ Ragon, "Acta Latomorum," I., p. 22.

² Thory, "Histoire de la Fondation du Grand Orient," p. 12. Findel.

³ "Histoire des Trois Grandes Loges," p. 44. Ragon, who is less imaginative or inventive than Rebold, though he, also, too often omits or is unable to give his authorities,

Considering the political condition of England, which had only a few years before been the scene of a rebellion in which the family of Charles Radcliffe, the titular Earl of Derwentwater, played an important part—considering that he himself was nothing more nor less than an escaped convict, liable at any moment when apprehended to undergo the sentence of death which had been adjudged against him by the law, and considering the existence of a party of Jacobites who still secretly wished for the downfall of the House of Hanover, and the restoration of the family of Stuart to the throne, it is really absurd to suppose that the Grand Lodge of England, which claimed at least to be loyal, could have selected such a person as its representative among the Freemasons of France.

We may, therefore, I think, unhesitatingly look upon this story of the premier Grand Mastership of the titular Earl of Derwentwater as a myth, with no other foundation than the mere fact, which will be admitted, that he was a chief instrument in establishing, without Warrant, the first lodge in Paris, and that by his family relations he possessed much influence among the English Freemasons in Paris, who were for the most part Jacobites or adherents of the House of Stuart.

Rebold, who has accepted every tradition of those days of myths as an historical fact, proceeds to tell us that the four lodges which were then in Paris determined to establish a Provincial Grand Lodge of England, to which, as the representative of the Grand Lodge at London, the lodges which might in future be constituted should directly address themselves. This resolution, he says, was put into execution after the departure of Lord Derwentwater, and this Grand Lodge was regularly and legally constituted in 1736 under the presidency of Lord Harnouester.¹

The hypothesis, universally advanced by the French writers, that Charles Radcliffe, commonly called Lord Derwentwater, was Grand Master from 1725 to 1736, therefore is not tenable. There is no

merely says that Derwentwater was chosen as their Grand Master by the brethren at the time of the introduction of Freemasonry into Paris.

"Acta Latomorum," p. 52. Lalande, in his article on Freemasonry in the "Encyclopedie," places the affair of Derwentwater's Grand Mastership in the true light, when he says that as the first Paris lodge had been opened by Lord Derwentwater, he was regarded as the Grand Master of the French Masons, and so continued until his return to England, without any formal recognition on the part of the brethren.

¹ Ibid.

testimony, such as is worth accepting in an historical inquiry, to support it. That he was not so appointed by the Grand Lodge of England can not be denied. The existing political condition of the country would make such an appointment most improbable if not impossible, and, besides, there is no reference in the records of the Grand Lodge to an act, which would have been too important to have been passed over in silence.

The condition of French Freemasonry was such as to render it extremely difficult, indeed almost impossible, to attain any accurate or reliable account of its history.

French historians do not deny this. Thory, who had the best opportunities as an historical investigator, and who was more familiar than any of his contemporaries with Masonic documents, does not hesitate, when referring to a period even a little later, to give this opinion of the chaotic condition of French Masonry in the earlier part of the 18th century.

"Masonry was then in such a disordered condition that we have no register or official report of its assemblies. There did not exist any bodies organized in the nature of Grand Lodges, such as were known in England and Scotland. Each lodge in Paris or in the kingdom was the property of an individual who was called the Master of the lodge. He governed the body over which he presided according to his own will and pleasure. These Masters of lodges were independent of each other, and recognized no other authority than their owner. They granted to all who applied the power to hold lodges, and thus added new Masters to the old ones. In fact, it may be said that up to 1743 Masonry presented in France under the Grand Masterhips of Derwentwater, Lord Harnouester, and the Duke d'Antin the spectacle of the most revolting anarchy."¹

Such a description, whose accuracy, considering the impartial authority whence it is derived, can not be doubted, must render it utterly useless to look for anything like a constitutional or legal authority, in the English meaning of the term, for the administra-

¹ "Histoire de la Fondation du Grand Orient," p. 13. Clavel confirms this testimony. He says that "all the lodges which were afterwards established in Paris and the rest of France owed their constitution to the societies (the primitive lodges) of which we have just spoken. Most of them assumed the powers of Grand Lodges and granted Letters of Constitution to new lodges." — "Histoire Pittoresque de la Franc-Maçonnerie," p. 108.

tion of the Masonic government during the time in which Derwentwater played an important part in its affairs.

Until 1732 there was no lodge in France which derived its authority to act from the warrant of a Grand Lodge. The one formed in 1725, by Derwentwater, Harnouester, Maskelyne, and Heguetty, and those which had been previously founded in other parts of France—at Dunkirk and at Mons—must have been instituted under the old principle of the Operative Freemasons, which ceased to be recognized in England, in the year 1717, that a sufficient number of brethren might assemble for Masonic work, without the authority of any superintending power. Warrants were not known or recognized in England until that year. They had not yet been extended into France. The first Warrant known in France was that which was granted by the Grand Lodge at London to the lodge in the Rue de Bussy at Paris, and numbered in the English list as No. 90.

But for years afterward lodges continued to be organized, as we have just seen, in France under the old Operative system of lodge independence.

During all this period there was no Grand or Provincial Grand Master in France. But Charles Radcliffe, who had, it seems, been the introducer of Speculative Freemasonry into Paris, must have been very popular with his English companions, who, like himself, were adherents of the exiled House of Stuart. After the death of his nephew he assumed the title of Earl of Derwentwater, and as such was recognized by the French king and the Pretender. He was a leader of the Jacobite party, and it is very generally supposed that it was in the interests of that party that he organized his lodge at Paris, the first prominent members of which belonged to the same political party.

It is not, therefore, astonishing that his connection with Freemasonry, as the founder of the first Parisian lodge, has led to the traditional error of supposing him to have been the first Grand Master of the French Freemasons. In his day there was no Grand Lodge nor Grand Master in that kingdom.

The astronomer Lalande, who wrote a very sensible history of Freemasonry for the French Encyclopaedia, recognizes this fact, when he says that Lord Harnouester was the first regularly chosen Grand Master.

The tradition that when Derwentwater left France for England in 1733 (not as Thory erroneously states in 1735), he appointed Lord Harnouester as his Deputy and Representative during his absence, is therefore a mere fiction. He could not delegate a position and powers which he did not possess. But it is reasonable to suppose that on the departure of Derwentwater, Lord Harnouester as of high rank, influence, and popularity among the English exiles who were Masons, assumed the position of a leader, which Derwentwater had previously occupied.

After a temporary absence in England, where, notwithstanding the sentence of death which had been adjudged against him in 1715, he was not arrested, the government exercising a merciful forbearance, he returned to the Continent, but we find no evidence of his having taken any further active interest in Masonic affairs.

The French writers all agree in saying that in 1736 Lord Harnouester was elected Grand Master. But we have no record of the circumstances attending his election. Rebold's statement that he was elected by the lodges then existing in Paris, may or may not be truth. There is not sufficient historical testimony of the fact to remove it out of the realm of tradition.

Thory simply says, "Lord Harnouester was elected Grand Master, after Lord Derwentwater, in 1736."¹ Of Harnouester we know so little that we have not been able to identify him with any of the public personages of the period, or to find any record of him in the contemporary lists of the English peerage.

If, however, we accept, on the mere dictum of the French historians, the truth of the statement that Harnouester was the first Grand Master of Masons in France, we must also accept the statement, equally authentic or unauthentic, that his Grand Mastership was a brief one and unattended with any events that it has been deemed worthy to record.

Thory merely says that the Duke d'Antin succeeded Harnouester in 1738.²

Rebold indulges in more details, which, however, we must take on his sole authority. He says that "in 1737 Lord Harnouester, the second Provincial Grand Master of France, wishing to return to England, requested that his successor should be appointed, and

¹ "Histoire de la Fondation du Grand Orient," p. 14.

² Ibid.

having expressed the desire that he should be a Frenchman, the Duke d'Antin, a zealous Mason, was chosen to succeed him in the month of June, 1738."¹

The account given by French writers of the character of the Duke is a very favorable one. It is said that he was selected by the Freemasons for their presiding officer from among those of the nobility who had shown the most zeal for the Order.

Of his own attachment to it, he had shown a striking proof by disobeying the express command of the King, Louis XV., who had forbidden his courtiers to unite with the society, and especially in daring to accept the Grand Mastership, notwithstanding that the monarch had declared, when he was informed that the Masons were about to elect such an officer, that if the choice fell on a Frenchman who should consent to serve he would immediately send him, by a *lettre de cachet*, to the Bastille. But the threat was not carried into execution.²

We are now about to pass out of the realm of what, borrowing a term of science from the anthropologists, may be called the pre-historic age of French Freemasonry. Henceforth we shall have something authentic from contemporary authorities on which to lean. The myths and mere traditions which mark the story of the second decade of the 18th century will be succeeded by historical facts, though we must still be guarded in accepting all the speculations which the writers of France have been prone to blend with them so as in many instances to give us a mingled web of romance and history.

Before continuing the history of the Grand Lodge from the accession of the Duke d'Antin, it will not be uninteresting nor unprofitable to suspend the narrative and to take a view of the condition of Freemasonry in France, and especially in Paris, at the period of time embracing a few years before and a few years after his accession to the Masonic throne.

At so early a period as 1737, the institution, though apparently very popular among the *noblesse* and the *bourgeoisie*—the lords and the citizens—had become distasteful to the King, Louis XV., whom we have already seen threatening to imprison its Grand Master if he was a Frenchman.

¹ "Histoire des Trois Grandes Loges," p. 45.

² *Ibid.*, p. 49, note.

This fact is confirmed by a statement made in the *Gentleman's Magazine* for March, 1737. The statement is in a letter from Paris and is in the following words:

"The sudden increase of the Society of Free Masons in France had given such offense that the King forbid their meetings at any of their lodges."

This was the cause of an apologetic letter which was published in Paris and a part of it copied into the *Gentleman's Magazine* for the following month.¹

Portions of this letter are worth copying, because of the principles which the French Masons, at least, professed at the time.

"The views the Free Masons propose to themselves," says this apology, "are the most pure and inoffensive and tend to promote such qualities in them as may form good citizens and zealous subjects; faithful to their prince, to their country and to their friends. . . . The duty it prescribes to those who bear it is to endeavor to erect temples for virtue and dungeons for vice. . . . Their principal design is to restore to the earth the reign of Astrea and to revive the time of Rhea."

From Kloss and from all the French writers we have the record of other instances of the persecution to which the Freemasons in Paris were subjected at this period by the municipal authorities, whose actions were undoubtedly in accord with the sentiments of the king. One of these is worth a relation.

On the 10th of September, 1787, the police surprised a lodge of Freemasons which was being held in the house of one Chapelot. He had for safety bricked up the door of his public and secretly opened another to the room of meeting. Notwithstanding these precautions, the police obtained an entrance and dispersed the assembly. Chapelot was condemned to pay a fine of a thousand livres and was deprived of his license as a tavern-keeper for six months.

¹This expression is found in some of the early French rituals as a definition of the object of Freemasonry. The English Masonic borrowed and made use of it. In a Prologue spoken at Exeter, in 1771, are the following lines:

" The Lodge, the social virtues fondly love:
 There Wisdom's rules we trace and so improve:
 There we (in moral architecture skill'd)
 Dungeons for Vice—for Virtue temples build,"

See Jones's *Masonic Miscellanies*, p. 164.

On April 27, 1738, Pope Clement XII. fulminated his celebrated bull in *eminenti*, in which all the faithful were forbidden to attend the meetings of the Masonic lodges, or in any way to consort with the Freemasons under the penalty of *ipso facto* excommunication, absolution from which, except at the point of death, was reserved to the Supreme Pontiff.

This condemnation by the Church gave an increased vigor and vigilance to the attacks of the police. On St. John the Evangelist's day, 1738, the Freemasons having assembled at the room of the lodge in the Rue des Deux-Ecus to celebrate the feast of the Order, were arrested and several of them imprisoned.

But notwithstanding these efforts to suppress the Order in France, it grew apace, and was not without an acknowledged standing outside of the Order, and of a recognition of its independence and regularity by the Grand Lodge at London.

This we learn from Anderson, who, in his second edition of the *Book of Constitutions*, published by authority of the Grand Lodge of England, in 1738, says:

"But the old lodge at York City and the lodges of Scotland, Ireland, France, and Italy, affecting independence, are under their own Grand Masters, though they have the same Constitutions, Charges, Regulations, etc., in substance, with their brethren of England and are equally zealous for the Augustan style, and the secrets of the ancient and honorable fraternity."¹

Anderson was right in his statement that the usages of the Craft in the two countries were similar. The ritual of the French Freemasons, at that early period, has not been altogether lost. An interesting description of it was published in a contemporary journal of London, and as the volume which contains it is not generally accessible except in large public libraries, it is here copied in full. The reader will be pleased to compare the ceremonies of admission to the Society, as practiced in the year 1737, in Paris, with those of the London Masons at about the same period, which appear in a preceding part of this work.

In the *Gentleman s Magazine*, published at London, in March, 1737, is the following letter, which bears the date of "Paris, January 13:"

¹ Anderson's "Constitutions," second edition, 1738, p. 196.

"THE SECRET OF THE ORDER OF FREE MASONS AND THE CEREMONIES OBSERVED AT THE RECEPTION OF MEMBERS INTO IT.

"First of all, persons must be proposed in one of the Lodges by a Brother of the Society as a good Subject; and when the latter obtains his request, the Recipiendary is conducted by the Proposer, who becomes his Godfather, into one of the Chambers of the lodge where there is no light, and there they ask him whether he has a calling to be received: He answers, Yes. After which they ask him his Name, Sirname, and Quality, take from him all Metals or Jewels which he may have about him, as Buckles, Buttons, Rings, Boxes, etc., his Right knee is uncovered, he wears his left shoe as a slipper, then they blindfold him and keep him in that condition about an hour delivered up to his reflections; after this the Godfather goes and knocks three times at the Door of the Reception room, in which the venerable Grand Master of the Lodge¹ is, who answers by three knocks from within and orders the door to be opened; then the Godfather says that a Gentleman by name . . . presents himself in order to be received. (Note, That both on the outside and within this chamber several Brothers stand with their swords drawn in order to keep off profane people.) The Grand Master who has about his neck a blue ribband cut in a triangle says, Ask him whether he has the calling? The Godfather puts him the question and the Recipiendary, having answered in the affirmative, the Grand Master orders him to be brought in: Then they introduce him and make him take three turns in the room round a sort of ring on the floor in which they draw with a pencil upon two Columns a sort of representation of the ruins of Solomon's Temple, on each side of that space, they also make with the pencil a great I and a great B, which they don't explain till after the Reception. In the middle there are three lighted wax candles laid in a Triangle upon which they throw gunpowder and rosin at the Novice's arrival, in order to frighten him by the effect of these matters. The three turns being made, the Recipiendary is brought

¹ Kloss, in his *Geschichte*, infers from a contemporary document which he quotes that at this time the title of Grand Master was equivalent in France to that of Worshipful Master of a lodge. The use of the title in this account of the ritual leaves no doubt of the truth of that fact. To this indiscriminating use of the two titles are we to attribute much of the confusion and uncertainty that exists in reference to the leadership in French Freemasonry, at this early period of its history.

into the middle of the writing above mentioned in three pauses over against the Grand Master, who is at the upper end behind an arm-chair on which is the Book of St. John's Gospel and asks him: Do you feel a Calling? Upon his answering, Yes, the Grand Master says. Shew him the Light, he has been long enough deprived of it. In that instant they take off the cloth from before his eyes and all the Brothers standing in a circle, draw their swords; they cause the Recipiendary to advance on three pauses up to a stool which is at the foot of the arm-chair; The Brother Orator addresses him in these terms: You are going to embrace a respectable Order which is more serious than you imagine; there is nothing in it against the Law, against Religion, against the State, against the King, nor against Manners:

"The venerable Grand Master will tell you the rest. At the same time they make him kneel on the stool with his Right knee which is bare and hold his Left Foot in the air: Then the Grand Master says to him, 'You promise never to trace, write, or reveal the secrets of Free Masons or Free Masonry but to a Brother in the lodge or in the Grand Master's presence.' Then they uncover his Breast to see if he is not a Woman and put a pair of Compasses on his left pap, which he holds himself; he puts his Right Hand on the Gospel and pronounces his Oath in these terms: 'I consent that my Tongue may be pulled out, my heart torn to pieces, my Body burnt, and my Ashes scattered, that there may be no more mention made of me amongst mankind if, etc.,' after which he kisses the Book. Then the Grand Master makes him stand by him; they give the Free Mason's Apron which is a white skin, a pair of men's gloves for himself and a pair of women's gloves for the person of that sex, for whom he has the most esteem. They also explain to him the I and B traced on the floor which are the type of the Sign by which Brothers know one another. The I signifies Jahkin and the B, Boiaes. In the Signs which the Free Masons make amongst one another they represent these two words by putting the Right Hand to the Left side of the Chin, from whence they draw it back upon the same line to the Right Side; then they strike the skirt of their coat on the Right Side and also stretch out their hands to each other, laying the Right Thumb upon the great joint of his comrade's first finger which is accompanied with the word Jahkin, they strike their breasts with the Right Hand and take each other by the

hand again by reciprocally touching with the Right Thumb the first and great joint of the middle finger which is accompanied with the word Boiaes. This ceremony being performed and explained, the Recipientary is called Brother, after which they sit down and, with the Grand Master's leave, drink the new Brother's health. Every body has his bottle. When they have a mind to drink they say, Give some powder, viz: Fill your glass. The Grand Master says, Lay your hands to your firelocks; then they drink the Brother's health and the glass is carried in three different motions to the mouth; before they set it down on the table they lay it to their Left pap, then to the Right and then forwards and in three other pauses they lay the glass perpendicular upon the table, clap their hands three times and cry three times Vivat. They observe to have three wax candles disposed in a triangle on the table. If they perceive or suspect that some suspicious person has introduced himself amongst them, they declare it by saying it rains, which signifies that they must say nothing. As some people might have discovered the Signs which denote the terms Jahkin and Boiaes, a Free Mason may be known by taking him by the hand as above mentioned and pronouncing I, to which the other answers A, the first says K, the second replies H, the first ends with I, and the other with N, which makes Jahkin: It is the same in regard to Boiaes."

The administration of the Duke d'Antin was not, so far as respects the institution and the successful carrying out of reforms, a success. The anarchy and independence of the lodges which had hitherto prevailed did not altogether cease. The claim of a personal possession and an immovable tenure of office made by many Masters, especially tavern-keepers, who had organized lodges at their places of public entertainment, was not altogether abandoned. Warrants of Constitution were frequently issued by private lodges, which should have emanated from the Grand Lodge, had there really been such a body in existence, of which fact there is much doubt. Thory admits that there was in 1742, the year before d'Antin's death, no Grand Lodge organized like that of England, and an English writer having stated that in the year mentioned there were twenty-two lodges in Paris and more than two hundred in all France, he confesses his inability to verify the statement because French Freemasonry was at that time in such a disordered

condition that there were no registers or official reports of lodge meetings.¹

The persecutions of the Church, of the Court, and the police were unabated, and if the Masonic reign of the Duke d'Antin was eventful in nothing else, it certainly was in the continual contests of the enemies and the friends of Masonry, the one seeking to crush and the other to sustain it. That the latter often were placed in danger, and sometimes endured a sort of martyrdom when their meetings were detected, is well known. And for their zeal and their perseverance under all these difficulties and dangers in preserving the existence, however feeble, of the institution and in delivering to their successors for better growth and greater strength, the Freemasons owe them a debt of gratitude.

The ritual, too, of the order in France was, as we have seen, derived from that of the English system, though changes and innovations were already beginning to appear. The extract given above shows that the ceremony of the table lodge and the peculiar language accompanying it were the pure invention of French ingenuity, wholly unknown then and since to English-speaking Masons.

In 1743 the Duke d'Antin died and he was succeeded in the Grand Mastership by the Count of Clermont. There were other candidates, and the Prince of Conti and Marshal Saxe received some votes during the election. This shows that French Masonry, whatever were its faults of irregularity, had not fallen in the social scale.

The Count of Clermont was higher in rank than the Duke d'Antin. He belonged to the royal family of Orleans and was the uncle of the infamous Duke of Chartres, afterward Duke of Orleans (who succeeded him in the Grand Mastership), and was the father of Louis Philippe, subsequently the popular King of France.

But the French Masons were disappointed in the advantageous results which they anticipated would follow the choice of one so illustrious in rank as their leader. This will be seen hereafter.

His election, if we may believe the French authorities on the subject, was accomplished by forms that made it regular and legal, the Masters of the Parisian lodges having for that purpose united in a General Assembly on December 11, 1743.

¹ "Fondation du Grand Orient," p. 13.

Hence Thory¹ says that it is from this epoch that we are to regard the existence of the Grand Lodge of France as legal and authentic, because it was founded at Paris with the consent of the Masters of the lodges in the Provinces.

He says that it assumed the title of the "English Grand Lodge of France." Whether it did so at the time of its organization or at a subsequent period is uncertain, but it is proved that it bore that title in 1754, for Thory says that he had seen a print engraved in that year by Jean de la Cruz on which were the words—"Grande Loge Anglaise de France."

But the assertion made by some writers that the use of the title was authorized by the Grand Lodge at London, with whom the Freemasons of Paris had, about that time, been in successful negotiation for recognition and patronage, is undoubtedly a fiction. There is not a particle of evidence in the contemporary records of the Grand Lodge of England that any such negotiations had taken place. It has, however, been seen heretofore that Anderson, in 1738, acknowledged that the independent authority of the Grand Master of the French Masons was recognized in England, and that the brethren in Scotland, Ireland, and France were placed upon the same footing of autonomy.

Very soon after his election as Grand Master the Count of Clermont ceased to pay much attention to the administration of the affairs of the Fraternity, whose interests were thus materially affected by his indifference.

One of the greatest difficulties with which the Grand Lodge had to contend in its efforts to secure harmony and to preserve discipline arose from the practice which it pursued of granting Charters to lodges, the Masters of which held their offices for life. They were called "*Maitres inamovibles*"—unremovable or perpetual Masters. A great many of these were already in existence, having been created under the irregular system of the preceding times, and the new Grand Lodge unfortunately increased the number.

Then "unremovable Masters" organized local administrations under the denomination of "Provincial Grand Lodges," which were governed by the presiding officers of the lodges which had created them.

¹ "Histoire de la Fondation du Grand Orient," p. 14.

Thory speaks of these early days of the English Grand Lodge of France as the period of illegal constitutions, of false titles, of ante-dated charters delivered by pretended Masters of lodges or fabricated by the lodges themselves, some of which claimed a fictitious origin which went back to the year 1500.¹

Another evil to which French Freemasonry was subjected at the beginning of its legal and constitutional career was the inundation of high degrees and the establishment of Chapters and Councils which became the rivals of the Grand Lodge.

It is to the Chevalier Ramsay that the Order is indebted for the doubtful gift of these high degrees which began to overshadow primitive, symbolic Freemasonry, and for the invention of new theories as to the origin of the Institution, which wholly rejecting the Operative element, on which the true symbolism of Freemasonry so much depends, sought to trace its existence as a Speculative Organization to the era of the Crusades and to the work of the Christian Knights.

The Grand Lodge of France, like that of England, recognized and practiced only the three symbolic degrees. Its charters to the lodges which it instituted authorized them to confer only these three degrees. It claimed that the complete cycle of Speculative Freemasonry was embraced within these prescribed limits. They denied that there was or could be any mystical knowledge above and beyond that which was taught in the Master's initiation. And it emphatically refused to concede that there existed any higher authority than itself from which the power to impart this knowledge could be derived.

Now when Ramsay's Rite of six or seven degrees was rapidly developed into other Rites professing a still greater number—when both at Paris and in the Provinces, other bodies began to be established by the illegal acts of some of the lodges, which, with the lofty titles of Colleges, Chapters, Councils and Tribunals, assumed an authority equal to that of the Grand Lodge in respect to the primitive degrees and one superior to it in respect to the new systems—when these self-constituted or illegally constituted bodies, looked with contempt on the meager initiations and the scanty instructions of the simple system of the lodges, and claimed a more elevated,

¹ "Acta Latomorum," Tome i., p. 56.

more philosophic, more splendid system of their own—it is not surprising that hundreds should have been attracted by their false theories, their grandiloquent pretensions, and the glamour which they created by their high titles, their glittering jewels, and their splendid decorations, so that pure and simple Masonry was beginning to lose its attractions and the Grand Lodge its prestige.

Nor is it less surprising that, as Thory has said, the result of all these disorders was such a complication, that at that epoch and for a long time afterward a stranger and even a Frenchman could not positively determine which was the true constitutional authority of Freemasonry in the kingdom, in what body it was vested or by what it was justly exercised.

Harassed by these conflicts for authority, these incessant assumptions of jurisdiction, which were debasing its position, the Grand Lodge resolved to take a higher stand, which it was supposed, or hoped, would secure for it a stronger hold upon the obedience of the Fraternity.

In 1743 it had adopted, as has been shown, the title of "The English Grand Lodge of France." This title had been assumed, not with the authority of the Grand Lodge at London, nor because there was any official connection with the two organizations, for there is not the slightest evidence of any historical value to that effect, but rather as an indication, as we may suppose, that the Freemasonry of France had originally come from England.

But there must have prevailed an idea that the English Grand Lodge of France was in some way a dependence on the London body, which would of course impair its claim to absolute sovereignty.

Accordingly, the French Grand Lodge asserted its thorough independence in the year 1756 by omitting the word English from its title and assuming the name of "The National Grand Lodge of France."

Thory, and all the other French writers who followed him, has said that "it shook off the yoke of the Grand Lodge at London," a phrase that is altogether inaccurate, as no such "yoke" had ever existed.

The effect, however, of this apparent declaration of independence was not such as had been expected. Chapters of High Degrees persisted in their rivalry of jurisdiction, and irregular and illegal

OPERATIVE MASONS OF THE MIDDLE AGES

chapters were still issued by the perpetual or irremovable Masters of many of the lodges. French Freemasonry was yet in a sort of chaotic condition.

To add to these annoyances and to still further embarrass the efforts for the establishment of a constitutional authority, the Count of Clermont withdrew from all participation in the administration of affairs as Grand Master, and confided the discharge of his functions to a substitute or Deputy, in the selection of whom he was by no means judicious.

The first appointment of a Substitute was one Baure, a banker. This selection was a most unfortunate one for the Craft. Baure, instead of devoting himself to the affairs of the Order, neglected to assemble the Grand Lodge. This inactivity was very disastrous, inasmuch as it encouraged the continuance of old irregularities and the introduction of many new ones.

A contemporary writer mentions among these that certain tavern-keepers who had on former occasions prepared their houses for the meetings of lodges to which they had been admitted as serving brothers, wishing to revive the banquets from which they had derived so much profit, now assumed the functions of Masters and conferred the degrees on candidates regardless of their proper qualifications. Warrants became, like the initiations, objects of traffic, and lodges whose constitutions were purchased, opened their doors to the lowest classes, and celebrated their indecent orgies in disreputable eating houses.¹ Freemasonry under this Baure was falling into a deplorable condition.

At last, but by no means too soon, he was dismissed by the Grand Master, whose next selection was one Lacorne, a dancing-master. His social position was inferior to that of his predecessor, and his character not as good. In vain the old and respectable members of the Fraternity protested against the appointment of Lacorne, who had by some services to the Grand Master secured his favor, and in reward he received the title of Particular Substitute, with a power to execute all the functions of his superior.

If the fault of Baure had been a supine inactivity, that of Lacorne was too much activity employed in a wrong direction. The

¹ La Chaussie, in a Memoire Justicatif, quoted by Thory, "Fondation du Grand Orient," p. 20.

Craft had exchanged King Log for King Stork. The history of the Grand Lodge for many succeeding years is a history of agitations, dissensions, and schisms fomented by Lacorne to suit his own private ends.

Lacorne hastened to hold a meeting of the Grand Lodge, which was followed by several others, in the course of which he succeeded in effecting a reorganization of the body, which had almost ceased to exist under the indifference of his predecessor. He admitted a great many Masons of all conditions and professions, and consulted his own caprice in the selection of officers.¹

The first signs of a coming schism began now to make their appearance. The old members of the Fraternity, who had refused to recognize the new Substitute, refrained from any participation in these acts, more especially as, in the appointment of his officers, he had selected illiterate men.

The Grand Lodge was soon divided into two factions, the one the adherents, the other the opponents, of Lacorne. Both claimed to represent the constitutional authority, and each arrogated the titles and the functions of a Grand Lodge, so that two pretended Grand Lodges were in active existence at the same time.

These dissensions lasted for several years. Finally some zealous brethren, who foresaw the threatened destruction of the Order, or at least its reduction to a state of anarchy, offered their services to effect a reconciliation. The offer was accepted. Representations were made to the Count of Clermont, who was prevailed upon to divest Lacorne of the powers which he had so much abused, and to appoint as his successor M. Chaillon de Joinville.

Peace and harmony seemed to be about to be restored. The two contending parties came together. All the Masters in Paris hastened to assist in the reconciliation. The Grand Lodge was re-established and a circular was issued on June 24, 1762, which announced the auspicious event to the Freemasons of France.²

But the promise of peace proved too soon to be fallacious. The two rival Grand Lodges, which had existed under the administration of Lacorne, were apparently dissolved and a United Grand Lodge was organized; but the elements which composed it were so different in character that it is not surprising that new and still more

¹ Thory, "Fondation de la Grand Orient," p. 21.

² Ibid.

bitter factions arose in a short time to disturb its harmony and to seriously affect its usefulness.

The cause which led to the birth of these new factions was a very natural one, and is to be found in the uncongeniality of the two parties who had united in the re-establishment of the Grand Lodge, arising from the great difference in the character, habits of life, and social condition of the individuals.

The old Masters and Past Masters who had contributed to the support of the institution in the earlier years of the Grand Mastership of the Count de Clermont, were members of the nobility, the bar, and the better class of citizens. They mingled with reluctance with the new-comers and the partisans of Lacorne, who for the most part were workmen without education or men of bad reputations, wholly incapable, from their want of culture and refinement, to conduct the labors of the Grand Lodge.¹

The old Masters would willingly have expelled them, and in so doing they would undoubtedly have improved the moral and intellectual tone of the Grand Lodge; but the objectionable members had legal and Masonic rights, which made them in one sense the equals of their adversaries, and it was well considered by the latter that any violent coercive measures would expose the Order to the danger of new and perhaps fatal convulsions.

Accordingly, the old brethren resolved to temporize. The regulations of the Grand Lodge prescribed a triennial election of officers. The time having arrived, very few of the new members and the partisans of Lacorne were elected to any of the offices. These, feeling assured that this act had been preconcerted, declared the election to be illegal and protested against it.

They caused defamatory libels to be printed, and scattered them with profusion among the Fraternity. In these the Grand Lodge and its officers were bitterly abused.

Under these circumstances, the older brethren who formed the most numerous as well as the most respectable part of the Grand Lodge, could do no less than vindicate its authority by expelling the malcontents from it and from all their Masonic rights and privileges.

The expelled members encountered the decree of expulsion with

¹ Thory, "Fondation de la Grand Orient," p. 22.

renewed libels, insults, and personalities, to which the other side responded by publications of a similar character. The war of words became so vigorous and offensive even to public decency that the government thought it necessary to interfere and to issue, in 1767, an order prohibiting any further assemblies of the Grand Lodge.

It must have been previous to this suspension of its meetings by the government and when the Grand Lodge had hoped that its union of the discordant elements would effect a permanent and a happy reconciliation, that it announced its existence to the Grand Lodge of England and sought to establish a fraternal interchange of courtesies between the two bodies.

Northouck tells us that on January 27, 1768, the Grand Master of the Grand Lodge of England informed the brethren that he had received from the Grand Lodge of France letters expressing a desire of opening a regular correspondence with the Grand Lodge of England. These letters having been read, it was resolved "that a mutual correspondence be kept up, and that a *Book of Constitutions*, a list of lodges, and a form of a deputation, bound in an elegant manner, be presented to the Grand Lodge of France."¹

This, it must be remarked, is the first official recognition, by the Grand Lodge of England, of the existence and legality of such a body in France. But the ready willingness of the English Masons to cement a union with their brethren of the neighboring Grand Lodge appears to have led to no active results.

At the very time that this friendly act of the English Grand Lodge was recorded the Grand Lodge of France had suspended its labors. The body was temporarily dissolved and its members dispersed.

The expelled members availed themselves of this favorable opportunity to renew their efforts to obtain a supremacy of the Order. They held clandestine meetings in the faubourg St. Antoine, and notwithstanding the vigilance of the magistrates, they resumed the ordinary labors of Freemasonry, and even went so far as to grant several charters to new lodges. They sent to the lodges in the country circulars in which they stated that the Grand Lodge having, in obedience to superior authority, ceased its labors, had delegated to

¹ Northouck, "Book of Constitutions," p. 291.

three Brethren, Peny, Duret, and L'Eveille, the exercise, during the continuance of the persecution, of all its rights and powers.

But they did not succeed in this bold effort at deception. The provincial lodges on examining the lists of expelled Masons which had long before been sent to them by the Grand Lodge, saw that among them were the names of those persons who had signed the circular as well as of those who were said to have been appointed as commissioners to exercise the functions of the Grand Lodge during its enforced abeyance. They therefore wrote to the Substitute of the Grand Master, M. Chaillon de Joinville, for an explanation, which was readily given. He denounced the encyclical letter as a false document and declared its signers to be rebels. In consequence the provincial lodges declined the correspondence which had been offered to them and refused to take a part in the conspiracy against the Grand Lodge.

This illegal faction was led by Lacorne, who had been deposed from his office as Substitute of the Grand Master. The legal faction, for the Grand Lodge was thus divided, was headed by Chaillon de Joinville, the successor of Lacorne in the office of Substitute General.

This body also held its secret meetings and also issued Charters, which, however, to avoid the appearance of violating the suspensory decree of the Magistrates, were all dated anterior to the issuing of that decree.

The object of the Lacorne faction was to abolish the Grand Lodge and to replace it by a new power from which all the respectable members should be removed and all authority be vested in the hands of the conspirators. As a preliminary step, they sought, but without success, to obtain from the lieutenant of police a revocation of the edict of suspension.

At length the death of the Grand Master, the Count of Clermont, which event occurred in 1771, gave a renewal of their hopes of seizing the supreme power. France presented, at this time, the spectacle of two Grand Lodges, or rather of two discordant and rival factions, each pretending to represent a Grand Lodge and each exercising the functions of a Supreme authority.

One of these was the National Grand Lodge, which had existed under the Count of Clermont and which, though interdicted by the government in 1767, still continued, though it held no meetings

openly, to exercise its prerogatives through its acknowledged officers.

The other body was a fragment, consisting of the adherents of Lacorne, all of whom had been expelled by the legal Grand Lodge, but who in violation both of the law of Masonry and the Municipal decree of interdiction, persisted in holding clandestine meetings, granting constitutions to new lodges, and in short exercising, without the least semblance of legal authority, all the functions of a Grand Lodge.

It is very clear that on the death of the Count of Clermont the National Grand Lodge, the only body in which the supreme authority of Freemasonry was at the time vested, had but one course to adopt. It should have assembled in open session, and duly elected a successor.

Unfortunately for its own interests and for those of the institution over which it held so loose a control, it did no such thing.

Discouraged by the useless efforts it had made to obtain, from the government, a revocation of the decree of suspension, it supposed that the time was not propitious for an attempt to revive its dormant existence. Its hesitancy and its timidity were eventually the causes of its destruction.

On the contrary, the Lacorne faction, consisting, as has been said, wholly of expelled Masons, who had previously formed the disreputable part of the Grand Lodge, were more politic and more bold.

Proclaiming themselves as the nucleus of the old Grand Lodge, the labors of which had been suspended in 1767, they approached the Duke of Luxembourg, with the design of securing his influence in getting the Duke of Chartres to accept the Grand Mastership as the successor of the Count of Clermont.

Their application was successful. The Duke of Chartres consented to accept the position.

The expelled faction, elated with the success of their plan, convoked a general assembly of all the Masters in Paris, including even the members of the Grand Lodge which had formerly expelled them.

The acceptance of the Grand Mastership by one who was closely related to the sovereign, but whose infamous character had not yet been developed, had produced much enthusiasm among the Craft

The Grand Lodge was willing to be indulgent. The expelled members were restored to all their Masonic rights. On June 24, 1771, the nomination of the Duke of Chartres as Grand Master was confirmed and announced to all the lodges of Paris and the provinces.

The submission of the Grand Lodge to what it supposed to be the inevitable force of events, did not have the effect it had hoped of securing harmony in the Craft. The expelled members, though now restored, do not appear to have forgotten or forgiven the wrongs which they thought had been inflicted on them. The old members were still in their view their enemies. They resolved to maintain a factious rivalry, with the ulterior purpose of abolishing the old Grand Lodge and establishing a new body on its ruin—"Carthage must be destroyed."

A new element of discord was now introduced, the tendency of which was favorable to the execution of these views—an element not new in French Masonry, but which had not before been introduced into the internal government of the Order. This element was found in the cultivation of the *Hautes grades*, or High Degrees.

It is well known that we are to attribute this innovation, wholly unknown to the ancient Operative or to the modern Speculative system, to the inventive genius of the Chevalier Ramsay. He was the first to devise these supplements to Craft Masonry and to endeavor to develop the instructions of the Third degree by the establishment of higher initiations, to which the initiation of the Master Mason was to be deemed subordinate. Ramsay's system of seven degrees was, however, simple in comparison with those subsequently introduced into France by his followers and disciples.

France was soon inundated by these "high degrees," combined in various series forming what were called "Rites," and thrusting themselves into rivalry and competition with the legal authorities which professed to know nothing about them.

The Grand Lodge of France, like its sister of England, had always remained true to the simplicity of the Speculative system, founded as it was on the traditions of the old Operative Craft, who had recognized only three classes of workmen. It had more than once authoritatively declared that Ancient Craft or Speculative Freemasonry consisted only of three degrees. This was a fundamental point in its organic law, and it had never as a body violated it.

Not so, however, was it with its leaders, many of whom had

been attracted by the glimmer of imposing titles and brilliant decorations. Chaillon de Joinville, who was then the Substitute Grand Master under the Count of Clermont, had, as far back as 1761, proclaimed himself the "chief of the high degrees and a Sublime Prince of the Royal Secret." As such he had issued a commission authorizing Stephen Morin to disseminate these high degrees in America.

That fact is, itself, enough to show how far the influence of this advanced Masonry had already extended when it had been enabled to secure as its chief the actual head of the legitimate Grand Lodge. But we also find that, from an early date, there existed at Paris and in other places in France, Colleges, Councils, and Chapters which were engaged in the cultivation and in the conferring of these high degrees, but which were always without the official recognition of the Grand Lodge.

But this recognition they greatly desired, and when the dissidents began to conspire for the abolition of the Grand Lodge and the establishment of a new body, they readily lent their assistance, because they anticipated, as was really the case, that these high degrees would receive some sort of recognition from it.

And in this hope they were encouraged by the fact that on June 24, 1771, when the Duke of Chartres was elected and proclaimed as "Grand Master of the Grand Lodge," he was also proclaimed by the additional title of "Sovereign Grand Master of all Scottish Councils, Chapters, and Lodges of France."¹

Thus, for the first time the symbolic Freemasonry of the primitive Speculative lodges and the Scottish Masonry of the High Degrees were reunited under one Grand Master by those who had formerly opposed the fusion of the two systems, and now accepted it without opposition but not without regret. The presence of the Duke of Luxembourg, who presided over the meeting in which the Grand Master was proclaimed, was an influence which closed the mouths of the discontented, who might under more auspicious circumstances have been less reticent, and less complaisant.

We can not doubt that the object of the dissidents or schismatics (which are the titles bestowed by Thory on the Lacorne or less reputable faction of the Grand Lodge) was to entirely change the

¹ See Thory, "Histoire de la Fondation du Grand Orient," p. 27.

features of the system of Freemasonry which had existed in France since the establishment of the first lodge and to substitute for it another less primitive and more complicated one. This they could only expect to do by the total dissolution of the old Grand Lodge and the organization of some other Masonic authority on its ruins.

Hence, Thory is led to say that at this meeting when the Duke of Chartres was elected, there was the first appearance of the symptoms which threatened the destruction of the Grand Lodge. The assembly was entirely influenced by the dissident brethren. The old controversy as to amendments of the statutes was revived, the necessity of correcting existing abuses was vehemently insisted on and the old members saw too late to successfully oppose them the aims of their rivals. Eight commissioners were appointed to report to the Grand Master some method for effecting the proposed reforms.

The history of the proceedings of these eight commissioners, in carrying out the reforms contemplated by the dissidents, has been given by a contemporary writer,¹ and it proves that they arrogated powers which the Grand Lodge had never intended to entrust to them, and exercised them with an energy that crushed by its own force all opposition.

Encouraged by the protection of the Duke of Luxembourg, who had been appointed by the Duke of Chartres as his Substitute, they held meetings at the Hotel de Chaulnes, where they exercised the functions of a General Assembly or Grand Lodge. They were joined by several Masters of the Parisian lodges and deputies from some of the lodges in the Provinces, their professed design being to abolish the old Grand Lodge. Some of the changes which were calculated to produce that effect were opposed by a few of the Masters and delegates. But their opposition was overruled and they were compelled to withdraw from the future meetings of the commissioners.

After much noisy discussion a plan was at length presented of a new constitution. This was adopted by the eight commissioners,

¹ Le Frère de la Chaussee, a man of letters, who took an active part in the Masonic discussions of the day, was a member of the old Grand Lodge and wrote a "Memoire justificatif," whence Thory has derived many of the facts on which he has based his "History of the Grand Orient."

without having submitted it to the Grand Lodge for its approval or even for its consideration.

On December 24, 1772, the old Grand Lodge of France was declared to have ceased to exist, and for it was substituted a National Grand Lodge, which was to constitute an integral part of a new power which should administer the affairs of the Order under the title of the GRAND ORIENT OF FRANCE.

The progress of this body, its controversies with the old Grand Lodge, whose members would not consent that it should be thus summarily abolished, and its final triumph and recognition as the head of Freemasonry in France, a position which it holds at the present day, must be the subject of another chapter.

CHAPTER XLV

ORIGIN OF THE GRAND ORIENT OF FRANCE

THE truth of history compels us to acknowledge the fact that the Grand Orient, now and for a century past the supreme Masonic authority in France, was, in its inception, a schismatic body. Those principles of law, then recognized, as they still are, as directing the organization of Grand Lodges, appear to have been violated in almost every point by the dissidents who broke off from the old Grand Lodge and conspired to establish its rival.

The Grand Lodge was still in existence; it is true it was not energetic in action, but it was not asleep; its consent had neither been asked nor obtained for this radical change in its constitution; the lodges had not been invited to meet in general assembly nor to give their sanction to the dissolution of the old body and to the creation of the new one; everything had been done by the irresponsible authority of the eight commissioners, who were merely a committee appointed to make a report on the condition of the Order and to suggest reforms to the Grand Lodge. But they exceeded their powers; made no report, and proceeded in secret sessions, to which none but their friends and co-conspirators were admitted, to the inauguration of a new system, the adoption of which was to result in the abolition of the body which had appointed them and the creation of a new one, of which not the remotest idea was entertained by the authority from which they derived their powers.

But if ever a violation of law could be defended by the necessity of a reform of abuses, which could not be effected in a more legal manner, such defense might surely be found in the corrupt condition to which Freemasonry had been reduced by the mal-administration of affairs through the neglect of the Grand Lodge, the indifference of the Grand Masters, and the usurpations of their Substitutes.

Under the constitution of the old Grand Lodge it will be shown that there were many abuses and corruptions of the pure and primitive principles on which Speculative Freemasonry had been founded at the beginning of the century. A reformation of these abuses was undoubtedly necessary, if the existence of the Order was to be preserved. There ought not to have been any objection to the reform, it is only the method in which it was effected that is to be condemned.

A comparison of the old constitution of the Grand Lodge with that of the Grand Orient presents us with the abuses of the one and the reforms proposed by the other.

The Grand Lodge of France was composed only of the Masters of the lodges of Paris. Hence the Masons and the lodges of the Provinces had no voice in the government of the Order, though they were required to contribute to the revenues of the Grand Lodge and pay implicit obedience to its decree. It was simply the old tyrannic principle of taxation without representation, and was in direct violation of the organic law on which the Mother Grand Lodge at London had been instituted.

The Quarterly Communications, on which the supreme authority rested, was composed of thirty officers who were elected triennially.

There was also a Council consisting of nine officers and nine Masters of Paris lodges, whose decisions were, however, only provisional and required to be confirmed by the Quarterly Communication to which they were reported.

The power of punishing offending members was vested in the Masters of lodges, but there lay an appeal to the Grand Lodge.

The Masters of lodges were in general chosen for life, and were not removable by the lodges over which they presided, and which in fact were merely, in many instances, instruments provided for the pecuniary interests of their Masters.

Thory, very strangely, calls the constitution of which these are the principal points "simple, uncomplicated, and conformable to the regulations of foreign Grand Lodges." The reader will be able to give to these two favorable views their proper value.

He admits that there were abuses, but he attributes them to the factions which agitated the Grand Lodge after the death of the Duke d'Antin, and to the state of anarchy which supervened on the sus-

pension of the labors of the Grand Lodge by the order of government.

Doubtless, these circumstances exerted an unfavorable influence on the purity of the administration of the law, but whatever were the/causes, the abuses existed, and, of course, their reformation was urgently demanded.

In all these points the new constitution of the Grand Orient provided a remedy and presented the desired reform, as may be seen from the following brief view of its principal features.

"The Statutes of the Royal Order of Freemasonry in France," for such was the imposing title of the new constitution, provided in the initial article that the "Masonic Body of France," that is, the Grand Orient, should be composed, as its only members, of regular Masons, meaning thereby the members of lodges which had received Warrants from or had them renewed by the Grand Orient.

In this way, while all regular Masons were recognized as constituting a part of the great Masonic family of France, those who still retained their allegiance to the old and rival Grand Lodge were excluded from recognition.

This was a defensive act, the necessity of which excused its severity.

Again: It was declared that the Grand Orient should be composed of all the actual Masters or the deputies of lodges not only of Paris but also of the Provinces.

The Grand Lodge had never recognized the Provincial lodges as forming any part of its constituency. Their recognition by the Grand Orient as entitled to participate in its labors was the removal of a very flagrant abuse of the Masonic law of equality.

Again: All the Warrants of constitution which had been granted by the old Grand Lodge to irremovable Masters, that is, to Masters elected for life, were suppressed by the Grand Orient, which recognized as Masters only those who were elected from time to time by the lodges.

These were the most important points of difference between the Grand Lodge and the Grand Orient; but they were so important as to make the old Masonic form of government, as Thory expresses it, an oligarchical government by an irresponsible few, while that of the new one was representative, the only form that was recognized by the founders of the Speculative system of Freemasonry.

In a Society based on the principle of equality it is very evident that the administration of affairs should not be confided to a privileged class, to the exclusion of many of its members.

Hence, though the Grand Orient of France originated in a schismatic usurpation of power, and was therefore irregular and illegal in its methods of organization, the end would seem to have justified the means. It can not be doubted that at that important epoch, the Masonic Order in France was indebted for its salvation from impending dissolution to the establishment of the Grand Orient.

The "Grand Orient" was, as it were, the generic title assumed for the whole Masonic Order; within its bosom was the body called "The National Grand Lodge." The distinctive titles were, however, more shadowy than real. The "Grand Orient" is the name by which the Supreme authority of Freemasonry is always described by French as well as other writers.

The title was a novel one, first invented in France at that time. It had never before been heard of in Masonic language, though it has long since become quite common on the Continent of Europe and in South America. It has, however, never been adopted by the Freemasons of any of the English-speaking nations, who adhere to the primitive and better phrase, "Grand Lodge," as the title of the Supreme Masonic authority.

The first meeting of the Grand Orient as a National Grand Lodge was held on March 5, 1773. Other meetings succeeded, until June 24th, when the new Constitution was adopted, and the nomination of the Duke of Chartres as Grand Master, which had been made by the old Grand Lodge, was confirmed. The amovability of the Masters of lodges, and the right of the Provincial lodges to be represented in the Grand Orient were again proclaimed, and the choice of fifteen officers of honor as well as the nomination of the ordinary officers was referred to the Duke of Luxembourg.

But though the Duke of Chartres had been nominated as Grand Master, he had not yet formally accepted the nomination, an act which the members of the new Grand Orient felt to be imperatively necessary to the success of their designs. Having been previously elected to the same office by the old Grand Lodge, the founders of the Grand Orient recognized the policy of withdrawing him from all connection with the rival organization and of securing the adhesion to their cause of a prince of the royal blood.

Morally considered, no man in France was more unfit to be called to the head of the Masonic institution than the Duke of Chartres. From his early youth he had exhibited a depraved disposition, and passed amid companions, almost as wicked as himself, a life of vice and in the indulgence of the most licentious practices. When on the death of his father he became the Duke of Orleans, he developed a hatred for the king, who had refused to elevate him to posts to which his high birth entitled him to aspire, but from which he was excluded by his blackened reputation. Inspired with his hatred for the king, and the court, and moved by his personal ambition, he fomented the discontents which were already springing up among the people. On the breaking out of the revolution he became a seeker for popular favor; rivalled the bitterness of the most fanatical Jacobins, renounced his rank and title and assumed as a French citizen the name of Philip Égalité, repudiated Freemasonry as opposed to republican ideas, such as were then the fashion, threw up his office as Grand Master, was elected to the National Assembly, voted for the death of his cousin Louis the Sixteenth, and finally, as a fitting close to his life of infamy, expired on the guillotine, one of the many victims of the reign of terror.

At the period of his election as Grand Master, the Duke of Chartres had, though very young,¹ already exhibited a foreshadowing of his future career of infamy. Enough certainly was known of his vicious character to have made him an unfit leader of a virtuous society. But motives of policy overcame all other considerations.

The Duke himself was reluctant to accept the position which was tendered to him. Some jests made by the wits of the court, who perhaps saw the unfitness of the appointment, are said to have been the cause of the coldness with which he viewed the dignity tendered to him.²

A deputation consisting of four members of the Grand Orient, all men of rank, waited on the Duke to obtain his consent to the adoption of the new constitution, which would of course have been the recognition of the new body which had enacted it. But he refused to see the deputation.

¹ He was born in 1747, and was therefore only twenty-six when elected Grand Master.

² This was the cause assigned by contemporary writers for the reluctance with which he gave his consent. See Thory, "Fondation de la Grand Orient," p. 39.

The joyful event of the birth of a son¹ and heir presented it was supposed a more favorable opportunity for obtaining his consent to their proceedings. The expectation was gratified. The Duke of Luxembourg, who took an earnest interest in the success of the Grand Orient and who exercised much influence over the mind of the prince, repaired to his residence long before the appearance of the deputation and succeeded in obtaining his consent to grant an interview.

Having been admitted to his presence, his approval of the proceedings by which the Grand Orient was organized was obtained, and he consented that his installation as Grand Master should take place soon after his return from a visit to Fontainebleau which he was obliged to make.

Accordingly, he was installed in his own house, called *la Folie Titon*, in the Rue de Montreuil, on October 28, 1773. The Grand Orient was thus legalized, so far as his patronage could make it so, as the supreme legislative authority of the Masonic Order in France. Hence, this installation by its rival of the same Grand Master whom it had itself elected in 1771, and who still retained that position, was a cause of great annoyance to the old Grand Lodge. The old Grand Lodge did not, however, cease at once to exist, but continued its labors, exercising a warfare with the Grand Orient for several years.

It held a session on June 17, 1773, at which were present those Masters of the Paris lodges who were still faithful to it and some deserters from the Grand Orient, who had abandoned that body when it suppressed the law of immovability.

At this session the Grand Lodge fulminated its decrees against the Grand Orient, which it declared to be a schismatic body, surreptitiously formed—a mere faction.

On September 10th it declared the eight commissioners deprived of all Masonic rights, and forbade their admission to any of the lodges.

Though fully recognizing the embarrassment which resulted from the installation of the Duke of Chartres, it determined to maintain its independence and to continue its labors with the assistance of the few lodges which still adhered to it. For this purpose it continued

¹ This was the Duke of Valois, afterward Duke of Chartres, then Duke of Orleans, and finally King Louis Philippe of France.

its denunciations of the Grand Orient and revoked all its decrees as fast as they were passed. It had among its adherents some able men, who employed their talents in the composition and publication of circulars and even books in which the Grand Orient and all its proceedings were denounced.

Responses were not wanting on the part of the Grand Orient, among whose most able and energetic defenders was the Duke of Luxembourg, while M. Gouilliard, a Doctor of Laws and the Grand Orator of the Grand Lodge, was the most conspicuous writer on behalf of that body.

It would be tedious to follow in all its details this internecine war of "paper pellets," which lasted with equal acrimony on either side for many years. It will be sufficient to pursue, with rapid sketch, the progress of each of the rival bodies until the close of the century, when a union was finally accomplished.

In 1774 the Grand Lodge assumed the title of the "Sole and only Grand Orient of France,"¹ and proceeded to the election of its Grand Officers under the auspices of the Duke of Chartres, whom it recognized as "Grand Master of all the lodges of France." It again decreed that the so-called Grand Orient of France was irregular, and its members and partisans were clandestine Masons; it forbade its lodges to admit them as visitors unless they abjured their errors and promised submission to the Grand Lodge; it also interdicted the members of its own lodges from visiting the Grand Orient.

In 1775 the Grand Lodge granted Warrants to eight lodges in Paris and to still more in the Provinces, and continued to increase the number of lodges under its obedience for many successive years, so that its existence was not merely a formal one. On the contrary, it appears to have been a troublesome though not eventually a successful rival of the Grand Orient.

In 1780 it must at last have felt the inconvenience of having a Grand Master only in name, for there is no record that the Duke of Chartres, or his Substitute, the Duke of Luxembourg, ever attended its communications. To remedy this evil, the Grand Lodge in 1780 appointed three Honorary Presidents, who were to supply the place of the Grand Master in his absence from the meetings.

¹ Seul et Unique Grand Orient de France.

That the old Grand Lodge was not yet moribund notwithstanding the greater activity of its rival, the Grand Orient, is evident from the fact that in its Tableau issued in 1783, it reports the number of lodges under its jurisdiction in Paris as well as the Provinces as amounting to the respectable number of 352. In the same year the English printed lists enumerate 453 lodges, but many of these were extinct and 123 were situated in foreign countries, so that there were actually at that time more lodges in France under obedience to the old Grand Lodge than there were in England under the jurisdiction of the constitutional Grand Lodge.¹

But in 1789 the political troubles which then began to agitate the kingdom, and which soon after resulted in the French Revolution, had a very serious effect on the condition of Freemasonry. The attendance on the lodges was very infrequent, and finally, in 1792, the Grand Lodge suspended its labors and the members were dispersed.

From the time of its organization in 1773, the Grand Orient had maintained a successful existence; it was patronized by a better class of Masons than that of which the Grand Lodge was composed, and had the support of the Grand Master of both bodies, his substitute, the Duke of Luxembourg, showing a very evident partiality for the Grand Orient, and not only never attending the meetings but actually denouncing the authority of the Grand Lodge.

The record of its transactions for these sixteen years supply us with more interesting incidents than those which marked the quiet progress of the Grand Lodge during the same period.

Its contests with the Grand Lodge for supremacy were unremittingly maintained. The mutual recriminations of both bodies did not tend to cultivate a spirit of fraternity. Finding itself embarrassed for the want of the registers and other archives which were retained by the Grand Lodge, the Grand Orient went so far as to apply to the Lieutenant of Police and cause the arrest and imprisonment of the keeper of the Seals and some other members of the Grand Lodge. But the effort to obtain possession of the documents, even by this harsh means, was unsuccessful.

It was found impossible for want of the registers to discover the number and names of the country lodges, most of which, having

¹ See List No. 16 in Gould's "Four Old Lodges," p. 68.

been established under the old, corrupt system of immovable Masters or Masters for life, retained their allegiance to the Grand Lodge, which still preserved the usage.

The Grand Orient, therefore, that the knowledge of its existence and its authority might be brought nearer these country lodges, established Provincial Grand Lodges, as another of the important changes which it was making in the usages of French Freemasonry.

These Provincial Grand Lodges were not, however, established on the same plan as those of England. Their design was, as has been said, to relieve the Grand Orient of the embarrassment of governing lodges at a distance. A provincial Grand Lodge was to be established not in a Province only, but in any town or place where there were not less than three lodges; it was to have a superintendence over them; its decrees were to be subject only to appeal to the Grand Orient, it was to collect and transmit all dues; and was to be the medium of all correspondence between the lodges and the Grand Orient.

The Grand Orient became rather aristocratic in its ideas and refused to recognize as members of the Order persons who were attached to the public theatres and to all artisans who were not Master workmen in their trades. Subsequently it forbade the lodges to meet in public taverns, a reformation which their English brethren had not yet reached.

In 1774 the title of "Royal Order," by which Freemasonry had hitherto been designated in France, was exchanged for that of the "Masonic Order," certainly a more appropriate name.

In 1775 the Grand Orient was occupied in determining the form of the Masonic government in the kingdom, and several decrees were made for the regulation of the deputies and representatives of lodges. It expressed its intention to purify the Order and the lodges which were profaned by the presence of corrupt men, and a commission was appointed to carry these views into effect.

The Duke of Chartres presided at a meeting of the Grand Orient in July, 1776, being the first time that he had been present since his installation in 1773.

The prevalence of "high degrees" and of Councils and Chapters which conferred them independently of the Grand Orient, had led the members of that body to take into consideration the expediency of following what had now become the fashion on the Continent

and more especially in France, and of developing within its own bosom a rite which should be founded on the three symbolic degrees which had hitherto been practiced by it and by the Grand Lodge. A chamber of degrees or committee to regulate this matter was accordingly appointed in 1782. Two years after this chamber reported four degrees, which, with the three symbolic as a foundation, were to constitute the "*Rite Française*."

These degrees were entitled *Elu*, *Ecosais*, *Chevalier d'Orient*, and *Chevalier Rose Croix*, or, as they may be translated, Elect Mason, Scottish Mason, Knight of the East and Knight Rose Croix. Though there were some modifications of the rituals, the degrees were not an original conception of the Committee, but were borrowed substantially from those systems which had been practiced in France since the time of the Chevalier Ramsay.

The degrees having been adopted by the Grand Orient, it decreed that they should henceforth be the only ones recognized and practiced in the several chapters which were attached to the lodges under its jurisdiction.

Undoubtedly the adoption of these new degrees was a manifest innovation on the pure system of primitive Speculative Freemasonry, an innovation which the more conservative spirits of the English-speaking Grand Lodges had always resisted.

But under the peculiar character which Continental Masonry had long assumed, it was far better that the Grand Orient should adopt a system of development comparatively simple and consisting of only four additional degrees, and confine its lodges within those limits, than to permit them to become the victims of the numerous and extravagant systems by which they were surrounded and which were practiced by irresponsible Chapters and Councils.

The French lodges of the Grand Orient were thus provided with a uniform system of their own, far better than the many diverse ones, which bid defiance to all homogeneity of Speculative Freemasonry.

In 1791 the lodges under the Grand Orient, like those under the Grand Lodge, suspended their labors and closed their doors in consequence of the existing political agitations. Still the Grand Orient, even in that year, constituted two or three lodges, but Freemasonry had really assumed a dormant condition throughout the kingdom.

But notwithstanding the dissolution of the lodges, several of the officers of the Grand Orient boldly sustained its activity so far as circumstances would permit. In France, in this day of trial, there were, as there were in America in a long subsequent period of persecution, some Masons who were willing to become Martyrs to their convictions of the purity of the Institution, and to the love which they bore for it.

But no such sentiments animated the bosom of the recreant Grand Master, the Duke of Chartres, who by the death of his father had become Duke of Orleans, and who, having abandoned his family and his class, had repudiated his hereditary title and assumed, according to the fashion of the *sans culottes*, the name of Citizen Equality—*le citoyen Égalité*.

The Secretary of the Grand Orient having in December, 1792, addressed him an official note relative to the labors of the Grand Orient, the Duke made a reply in the following words, on May 15,

1793.

"As I do not know how the Grand Orient is constituted, and as I moreover, do not think that there should be any mystery or secret society in a republic, especially at the beginning of its establishment, I no longer wish to have anything to do with the Grand Orient or with the meetings of Masons."

This peremptory, and in its terms insulting, withdrawal was received, as it may be supposed, by the members of the Grand Orient with expressions of the utmost indignation. It is said that the sword of the Order, one of the insignia of the Grand Master, was broken by the presiding officer and cast into the midst of the Assembly, and the Grand Mastership was declared vacant.

In 1795 a few of the lodges resumed their labors, and M. Rotiers de Montaleau was elected Grand Master. He, however, refused to take the title, and assumed that of "Grand Venerable," with, however, all the prerogatives and functions of a Grand Master.

The progress of Masonic restoration to activity was, however, very slow. In 1796 there were but eighteen lodges in active operation in the whole of France, namely, three at Paris, and the remaining fifteen in the Provinces.

In May, 1799, commissioners who had been appointed by the Grand Lodge and the Grand Orient concluded a treaty of union be-

tween the two rival bodies. The Grand Lodge in this treaty agreed to the abolition of the usage it had always hitherto maintained of the irremovability of Masters, and accepted the doctrine of the Grand Orient, that they should hereafter be elected by the members of the lodges.

On June 22, 1799, the two hitherto rivals met in a United Assembly, and the union of all the Freemasons of France was consummated, the title of Grand Orient being continued, to designate the supreme Masonic authority, and the Grand Lodge ceased to exist.

Thus the rivalry which had existed in France for twenty-six years between two bodies, each claiming to be the head of the Order, was terminated by an amicable union.

In England the same sort of rivalry had existed between the Grand Lodge of the "Moderns" and that of the "Ancients" for a much longer time, and was terminated at a later period by a similar union.

But in the circumstances connected with this internecine war there were some singular coincidences which are worthy of remark.

In the first place, the original disruption was based in each kingdom on a single fundamental point of difference.

In England it was on the recognition of a Fourth degree in the ritual. The "Moderns" contended that there were in Speculative Freemasonry no more than the three primitive degrees of Apprentice, Fellow-Craft, and Master. The "Ancients" affirmed that for the completion of the ritual a Fourth degree, which they called the "Royal Arch," was essentially necessary, and that without it as a development of the Third degree, the system of Speculative Masonry was imperfect and worthless.

In France the single point of difference between the two bodies was that of the irremovability of the Masters, of lodges. The Grand Lodge had from the very beginning of its authentic history granted constitutions to certain Masters for the establishment of lodges over which they were to preside by a perpetual tenure of office, that is, they were Masters for life. Now as these "irremovable Masters" were often, nay almost always, appointed through corrupt motives, and as the lodges thus became, in a way, their personal property, the attempt was made to abolish them and to make the presidency of the lodges elective.

This reform, for it was evidently a reform, was opposed by the

Grand Lodge, and hence those who were in favor of it established the Grand Orient, for the purpose of carrying out their views, and hence one of its first acts was to pass a decree abolishing the usage and suppressing the irremovable Masters.

There were, of course, supplementary motives for the schism, but this was undoubtedly the leading one.

So in England and in France there was a schism founded on a single difference of opinion, but this difference as it existed in each country never extended into the other. The English lodges never entertained the question of Masters for life, because from the organization of the Grand Lodge at London, those officers had always been annually elected, and this doctrine was held by both Grand Lodges.

The French lodges were never embarrassed by the question of a Fourth degree, which was the bone of contention in England. Though there were Chapters and Councils in which a Royal Arch degree under various modifications had existed from the time of the Chevalier Ramsay, these bodies had no legal connection with or recognition by either the Grand Lodge or the Grand Orient, both of which maintained the doctrine that pure Freemasonry consisted of only three degrees.

Another point of very interesting coincidence in the contention in the two countries was the following.

As both in England and France there were, during the contest, two bodies, each claiming Masonic sovereignty, it is evident that in each, one of the bodies must have been irregular, illegal, and schismatic, for it is the law of Freemasonry that the sovereignty can not be divided.

In England the schismatic and illegal body was the Grand Lodge of the "Ancients," the legal and constitutional one was the Grand Lodge of the "Moderns."

In France the schismatic and illegal body was the Grand Orient, which had been surreptitiously and irregularly formed; the legal and constitutional body was the Grand Lodge. Now it is very remarkable that when in each country the dissensions which had so long existed were brought to an amicable end and a union effected in the settlement of the principal question upon which the schism had been founded, the irregular and schismatic gained the victory, and the regular body was compelled to accept the doctrine which it had so long and so pertinaciously resisted.

Thus in England the Grand Lodge of "Moderns" recognized the Royal Arch, which it had always repudiated as an innovation, as one of the regular degrees of ancient Craft Masonry.

In France the Grand Lodge abandoned the doctrine of the irremovability of Masters, for which it had always strenuously contended, and accepted the theory and usage of the Grand Orient that the office of Master should be elective.

But though the Grand Lodge and the Grand Orient had been merged into one governing body of the French Masons, there were still difficulties presenting themselves in the effort to establish a unification of the Masonic system in the kingdom.

The abundance of high degrees, which from a very early period had been introduced into France, had been conferred in Councils and Chapters, which had never been recognized by either the Grand Lodge or the Grand Orient, but which had always acted independently of either authority.

Such were the Council of Emperors of the East and West, the General Grand Chapter, and finally the Supreme Council which had been organized by Count de Grasse Tily in 1804, under the authority of the Supreme Council at Charleston in the State of South Carolina.

In 1802 the Grand Orient had forbidden its lodges to confer any degrees which were not recognized by it. This caused the Scottish lodges, or those conferring these degrees, to establish a separate locality in the boulevard Poissonnière. Here they continued in defiance of the decree of the Grand Orient to practice the Scottish Rite. Finally, they established the "General Scottish Grand Lodge of France." The existence of this body was but an ephemeral one, for in two years it united with the Grand Orient.

Seeing the infatuation of the French Masons for the decorations and the mysteries of these high degrees, the Grand Orient, through the prudent counsels of Rotiers de Montaleau, the Grand Master, that it might put an end to all divisions in reference to Masonic Rites, declared that it would unite in its own bosom and recognize all Rites and Degrees whose dogmas and principles were in harmony with the general system of the Order.

Hence, at the present day the Grand Orient assumes jurisdiction over all the degrees of Freemasonry from the First to the Thirty third.

After an abortive attempt to effect a union between the Grand Orient and the Supreme Council of the Ancient and Accepted Rite, the latter body assumed and still maintains jurisdiction over the Rite on which it is founded, and grants constitutions to lodges of the Symbolic degrees.

Hence, at the present day there are in France two independent authorities in Freemasonry—the Grand Orient, which claims jurisdiction over all Rites, and the Supreme Council, which confines its jurisdiction to the Ancient and Accepted Rite.

Very recently out of this body has sprung an independent Scottish Grand Lodge, whose existence as permanent or ephemeral is yet to be determined.

But these matters belong to the contemporary history of the present day, and as our investigations are properly restricted to the Origin of the Grand Orient, which subject has been fully discussed, an end may now properly be given to the present chapter.

CHAPTER XLVI

INTRODUCTION OF FREEMASONRY INTO THE NORTH AMERICAN COLONIES

THE intercourse of the English colonies with the mother country was continuous, and, considering the condition of navigation, conducted entirely by sailing-vessels, was frequent. The colonists brought with them, in their immigration to the new country, the language, the laws, and the customs of their ancestors. The personal and political relations existing between the people on either side of the Atlantic were very intimate, and the wide ocean formed no sufficient barrier to the introduction among the Americans of new discoveries and inventions, of new styles of living or of new trains of thought, which, springing up in England, were in a brief course of time brought over by visitors or by new settlers to the growing colonies. It is not, therefore, to be doubted that very soon after the establishment of Speculative Freemasonry in London, by the organization of a Grand Lodge, in 1717, persons who had been initiated in the London lodges came over to America and brought with them the principles of the new system as it was just beginning to be taught at home.

At whatever precise date we may place the legal establishment of the first lodge in America, it is very certain, from the testimony of authentic public documents, that there was no lack of Freemasons in America not very long after the establishment of the system in England and anterior to the known legal organization of any lodge in the country.

Of course, it is understood that many of these Freemasons had been initiated in England, either while on a temporary visit to that country, if they were residents of the colonies, or, if they were recent immigrants, then before they left their old home for their new one.

This is very plain; nothing could be more natural than that a

colonist going "home," as England was affectionately styled, should have availed himself of the opportunity afforded by his visit, to unite with a society enticing by its mystic character and its great popularity, and that among the emigrants who were daily crossing the ocean, to make their homes in the new country, there should have been many who were members of that society.

But the question has never yet been mooted whether some persons had not been initiated in America before any deputation had been issued by a Grand Master of England for the organization of a regular lodge, under the constitutions adopted at London in 1723.

Yet this is a very interesting question, and the fact that it is a novel one never having before been entertained, makes it still more interesting.

I may premise the investigation into which I am about to enter, by saying that whether the fact be proved or not, its occurrence is by no means impossible.

We have seen that lodges were established in France as early as 1721, eleven years before the constitution of a regular lodge by the Grand Lodge at London. I have already said that these lodges were organized without a Warrant, by certain Freemasons from England, who had exercised the ancient privilege of the Operatives to open lodges and make Masons without a Warrant, whenever a competent number were present. This privilege had been surrendered in 1717 by the four London Lodges to the newly erected Grand Lodge, but it was for some time after asserted occasionally. It was in France, may it not also have been in America?

The first Deputation granted from England for the colonies was granted by the Duke of Norfolk to Daniel Coxe, Esq., of New Jersey. The date of this Deputation is June 5, 1730. It appoints him Provincial Grand Master of New York, New Jersey, and Pennsylvania, and it empowers him to constitute lodges.

While there is the indisputable evidence of the original Deputation still preserved in the Archives of the Grand Lodge of England, as well as the printed List of Deputations published by Anderson in the Second edition of the *Book of Constitutions*, and many other irrefragable proofs that the Deputation was granted to Coxe in June, 1730, there is not the slightest testimony of any kind, even traditional, that any similar Deputation can have been previously granted to any person residing in the American Colonies.

In other words, the proof is very satisfactory that previous to the latter half of the year 1730¹ there was no legal authority in the colonies to constitute lodges according to the English regulation adopted in 1717.

If, then, there were any lodges which met in the colonies previous to that date, they must have been lodges which derived their authority for meeting from the old Operative usage, which was that a sufficient number of Masons met together were empowered to make Masons and to practice the rites of Masonry without a Warrant of Constitution.

It has now been conceded that the first constitutional lodge of Freemasons acting under the authority of a Warrant was established in Philadelphia in the latter part of the year 1730. The evidence of this will be hereafter given in its proper place.

But there are also proofs that one or more lodges were in existence in Philadelphia before the time of the reception by Coxe of the Deputation which had been granted to him by the Duke of Norfolk.

The first of these proofs is furnished by the celebrated Dr. Benjamin Franklin, who was in 1730 the Printer and also the Editor of a paper published in Philadelphia with the title of the *Pennsylvania Gazette*.

In No. 108 of that paper, published on December 8, 1730, is the following article: "As there are several lodges of FREE MASONS erected in this Province, and people have lately been much amused with conjectures concerning them, we think the following account of Free Masonry, from London, will not be unacceptable to our readers."

Now Coxe's Deputation was only issued in June of that year. It could hardly have taken less than two or three months for it to pass from the Grand Secretary's office in London into the hands of Bro. Coxe in New Jersey. Between the time of his receiving it and the publication of the article just cited from Franklin's *Gazette*, the interval would be hardly long enough to enable Coxe to organize and constitute *several lodges*.

¹The Deputation having been issued at London, June 5, 1730, allowing for necessary delays and the length of the passage across the ocean at that time, it could hardly have reached Philadelphia before the end of August or more probably September in the same year.

We know from the records that there was one lodge constituted in 1730, but we have no evidence of the constitution in that year of any others, either by Coxe as Provincial Grand Master or by any brother appointed by him as his Deputy.

And yet Franklin says (and he was neither a truthless nor a careless writer) that there were *several lodges* at that time in the Province of Pennsylvania.

But as *several* includes more than one, where did the additional lodges come from? They were not constituted by Coxe nor by his authority, at least we have no knowledge of any such constitution.

It is therefore not unlikely that these lodges were like the first lodges in France, formed by what the Freemasons had been taught was their prescriptive right, and who, without a Warrant, had before the coming of the Deputation assembled together in competent number and practiced the rites of Masonry.

But there is something more than probable conjecture to support this theory. A letter was written in 1754 by Henry Bell, at that time residing in the town of Lancaster (Pennsylvania), to Dr. Thomas Cadwallader of Philadelphia, in which he makes the positive statement from his own knowledge and participation in the circumstance that there actually was in 1730, perhaps before, at least one lodge formed by prescriptive right without a Warrant.

Bro. Bell's letter, containing this important historical statement, was exhibited in the office of the Grand Secretary of the Grand Lodge of Pennsylvania in the year 1772. A copy of it made at that time was published in the *Early History and Constitutions* of the Grand Lodge and is as follows:

"As you well know, I was one of the originators of the first Masonic lodge in Philadelphia. A party of us used to meet at the Tun Tavern, in Water street, and sometimes *opened a lodge* there. Once in the fall of 1730 we formed a design of obtaining a charter for a regular lodge, and made application to the Grand Lodge of England for one, but before receiving it, we heard that Daniel Coxe of New Jersey had been appointed by that Grand Lodge as Provincial Grand Master of New York, New Jersey, and Pennsylvania. We therefore made application to him, and our request was granted."

It thus appears from the testimony of one engaged in the transaction, that for some time previous to any authority existing in

America for granting Warrants, a lodge had been opened in Philadelphia, without the sanction of such Warrant and of course by the old prescriptive right, which had always prevailed as the law of Freemasonry, until the right was surrendered in 1717 by the four Lodges which united in forming the Grand Lodge at London.

Bro. Clifford P. MacCalla, who has been a most indefatigable and successful explorer of old documents connected with the early history of Freemasonry in Pennsylvania, published in his valuable paper, the *Key Stone* (December 22, 1877), an important and interesting letter which furnishes the evidence that there were Freemasons in Philadelphia one year at least before the severance of the Speculative from the Operative element, and the organization of the Grand Lodge at London.

This letter is dated "March 10, 1715,"¹ and was written by John Moore, the King's collector at the port of Philadelphia, and addressed to James Sandilands, Esq., of Chester, Penn.

The letter is an official one, communicating the fact that he had received from England a bell and some altar furniture, intended for a church at Chester, and requesting to know how they were to be delivered. But this business matter having been dismissed, the letter concludes with the following remarkable passage:

"Ye winter has been very long and dull, and we have had no mirth or pleasure except a few evenings spent in festivity with my Masonic Brethren."

Since the authenticity of this letter is indisputable,² it is of great historical importance. It shows without a doubt that in America, as in England and in Scotland, there were Freemasons, who lived under the old partly Operative and partly Speculative régime anterior to what has been called the "Revival," which took place in

¹ Although the double reference, as 1715-16, was generally affixed to dates in the first three months of the year, to indicate the old and the new styles, it is very probable that by "March 10, 1715," the writer meant what we should now write as "March 10, 1716."

² Bro. MacCalla states that at the time of publication the letter was in the possession of Bro. Horace W. Smith, the great-grandson of the Rev. Dr. William Smith, the Secretary of the Grand Lodge of Pennsylvania; the grandson of Bro. William Moore Smith, Grand Master of Pennsylvania, and the son of Richard Penn Smith of Lodge No. 72 in Philadelphia, and that the granddaughter of John Moore, the writer of the latter, intermarried with the Rev. Dr. Smith, the great-grandfather of its present custodian. The letter is thus traced through a reputable descent, which gives it all needful color of authenticity.

London in 1717, when the Speculative began to be wholly dis severed from the Operative system.

In England and Scotland we know that these Freemasons were united in lodges, which worked without the sanction of a Warrant of Constitution, which was a new regulation adopted for the first time at the time of the so-called Revival. They were organized, as has been already said, by a prescriptive right by which a competent number of Freemasons were always authorized to assemble and perform the rites of Masonry.

There is, it is true, no direct evidence that the Freemasons referred to in the letter of Bro. Moore pursued the same plan in 1715, and "spent their evenings in festivity" in an organized lodge. But it is very probable that such was the fact. There is no reason why, if there were a sufficient number of Freemasons then living in Philadelphia, and who were in the habit, as the letter indicates, of meeting for festive purposes, they should not have followed the custom which prevailed "at home," and for better regularity and discipline in their meetings have formed themselves into a lodge.

At all events, we have the positive proof that fifteen years later there was a lodge which met in Philadelphia in 1730 and for some time before, which acted without a Warrant, until the latter part of that year, when it asked for and received one from Coxe, the Provincial Grand Master.

We have no such direct proof of the existence in other parts of the continent of lodges held by "prescriptive right," but there are some circumstances that lead us to believe that such was sometimes the case.

In 1736 the brethren of Portsmouth in New Hampshire applied to Henry Price for a charter. The petition is at least singular in its phraseology. It is subscribed by "persons of the holy and exquisite Lodge of St. John," as if there were already a lodge existing under that title, and in asking for a "Deputation and power to hold a lodge according to order as is and has been granted to faithful Brothers in all parts of the World;" and in asking for the Deputation, they say, "we have our constitutions, both in print and manuscript, as good and as ancient as any that England can afford."¹

¹ See the petition in Bro. Gardiner's able report in the "Transactions of the Grand Lodge of Massachusetts," anno 1871, p. 307.

Now, this may mean either that the Portsmouth brethren were in possession of rituals and other necessary books to use in forming a lodge; or it may mean that they were already working and had been working as a lodge by prescriptive right and now wanted to be duly regularized under the new system which Price had just received from England. It is an open question.

The colonies into which Freemasonry under the new system of the Revival was first introduced were Pennsylvania, Massachusetts, South Carolina, and Georgia.

There is no positive evidence that any lodges existed under the old Operative System, in either Massachusetts or South Carolina. In the former Price opened his Provincial Grand Lodge in 1733, and in such of the records as have come to light there is no reference to any previous meeting of the Masons.

In South Carolina Hammerton opened a lodge at Charleston in October, 1736, under a Warrant granted by the Grand Master, Lord Weymouth. There is no traditional or other evidence that any lodge of Masons had ever met in the Province before that date.

In Georgia regular Freemasonry under the Grand Lodge of 1717 was introduced in 1736 when Solomon's Lodge at Savannah was opened under sanction of a Warrant from Lord Weymouth. But the late Bro. W. S. Rockwell, in his *Ahiman Rezon of Georgia*, published in 1859, says that "many still living in Savannah have heard from older Brethren who have passed to that 'undiscovered country from whose bourne no traveller returns,' that a Lodge was at work in that city before Solomon's Lodge No. 1 had an existence."¹

If there were any such lodge, it must have been one which worked under the "prescriptive right" or "immemorial usage" of the olden time.

In Pennsylvania we have already seen that at least one such lodge was in existence in 1730 before Coxe had received his authority as Provincial Grand Master. And there is also evidence that Freemasons were in the habit of meeting in Philadelphia for convivial purposes at least two years before the organization of the Grand Lodge at London.

Now it is true that we have no evidence of the existence of these

independent lodges anywhere in the colonies outside of Pennsylvania, nor any intimation of their existence, except the traditional report, mentioned by Rockwell, that a lodge had been in operation in Savannah before the Constitution of Solomon's Lodge and the suspicious phraseology of the petition for a lodge at Portsmouth, N. H., which might have emanated from a number of Masons who either were desirous of forming a new lodge, or who already working as a lodge by the old prescriptive right, wished to be regularized under the new system.

But notwithstanding this deficiency of positive evidence, does not all this show that there were lodges of this character in various parts of the colonies long before the issuing of Warrants by the London Grand Lodge? That is to say, we have a right to suppose that Freemasonry was first established in this country by the voluntary association of a certain number of Masons together without the sanction of a Warrant. This was the rule in England previous to the year 1717, when this right of meeting by what was termed "immemorial usage" was surrendered to the Grand Lodge by the four Lodges in London.

But the right and the practice was not at once abandoned everywhere. Some lodges in the rural districts of England continued to act without Warrants for a few years, and lodges under the old privileges were established in France, apparently by the Jacobites or adherents of the House of Stuart.

There is no reason therefore to doubt that the same custom prevailed to some extent in the American Colonies. During the constant intercourse which was maintained between the Mother-country and its colonies, many Freemasons would be constantly repairing to them, either as visitors, as emigrants, or as officers of the parent government.

The Freemasonry that they brought with them they would naturally desire to practice in the new country into which they had come. Hence it is probable that they voluntarily associated in lodges and practiced the rites of the Institution in other parts of the colonies, as we now know that they did in Philadelphia in 1715.

The negative evidence that there are no minutes or records extant of the meetings of such lodges is not of the least value. It is not certain that they kept any records, or if they did, it is natural that in the lapse of time and with the intervention of so many stir-

ring events, these records may have been lost. There are very few lodges of any antiquity, now existing in this country, whose earliest records have been preserved.

So the absence of records is no proof that such unwarranted lodges did not exist at an early period in this country, and the indisputable fact attested by documentary proof that one or more did exist at that early period in Pennsylvania, gives strong presumption to the hypothesis that similar lodges existed in some of the other colonies.

I advance therefore the following theory in reference to the introduction of Freemasonry into the American Colonies. I do not deny that it is, with the exception of the colony of Pennsylvania, a mere hypothesis, but an hypothesis is not necessarily false nor untenable because the proofs of it are not as strong as the enquirer might desire.

It can not be doubted or denied that the Masonic spirit which was prevailing in England in the early part of the 18th century, and which led in 1717 to the establishment of a Speculative Grand Lodge in London was carried into the remotest part of the British empire by emigrants and settlers in the colonies who preserved in their new home the manners and customs, the habits and associations, which had distinguished them in their old one.

Now as lodges existed in London and other parts of England and had long existed, organized under the old law of the Craft which authorized the congregation of Masons for Masonic purposes, without the sanction of a Warrant, we may reasonably suppose that Freemasons coming from England into the colonies, some of whom had probably been members of such lodges at home, would continue the custom in the new country into which they had come and there institute similar lodges.

At first the brethren may have met together for the purpose of preserving their Masonic recollections and of renewing the pleasures of their Masonic re-unions at home. Such appears to have been the case with the brethren referred to by Bro. Moore, who met in Philadelphia in 1715. As the Speculative Grand Lodge was not organized in London until two years afterward, these Masons must have come out of the old Operative lodges.

At first, these Masons may have been content to meet together without proceeding to make initiations. But there was no law to

prevent their doing so, and I see no reason why they should not have proceeded to secure the prosperity of the Institution by an increase of its numbers.

Hence, I think that lodges must have been in existence in the colonies long before the granting of a Deputation to Coxe. There are no records now extant of the meetings of any such lodges, but as I have already said, this was not to be expected, and the fact that no such records can now be found, is not the slightest evidence that they never existed.

Certainly we know from authentic testimony, which has already been cited, that such a lodge was in existence and in operation in Philadelphia in 1730, and we know not how many years before, which applied to Daniel Coxe, when his Deputation as Provincial Grand Master arrived, and received from him authority to continue their labors as a regular lodge.

If this occurred in Pennsylvania, why should not the like have occurred in other colonies? Why should not there have been lodges thus voluntarily formed, in Massachusetts before the Deputation of Price, in South Carolina before that of Hammerton, or in Georgia before that of Lacy?

To say that there are no records of any such lodges is no answer to the question. The early records of Freemasonry, everywhere, have been too poorly kept and too illy preserved to authorize us to found any argument on their absence. Horace wisely tells us that many heroes perished before Agamemnon, unwept and unsung, because there was no poet to record their deeds.

The conclusion to which I arrive by this course of reasoning is, then, that Freemasonry was introduced into the colonies of North America at a very early period in the 18th century, by means of officers of the parent government, or emigrants intending to be future permanent residents.

These Freemasons soon established lodges in various places, which they worked without the sanction of Warrants, and under the regulation which existed in England at the time when they left it. At this period Warrants were unknown and lodges met whenever and wherever a competent number of brethren thought proper to establish one.

It was in this way that the love of Freemasonry was preserved in these distant regions, and when at length the new system of

warranting lodges which had been inaugurated in 1717 by the four old Lodges in London began to be understood and Deputations for Provincial Grand Lodges and Provincial Grand Masterships began to be sent over from the parent country, these primitive, unwarranted lodges ceased to exist and their members took out Warrants which regularized them.

They had performed their mission. They had introduced Freemasonry into America. They had fostered it, with the best of their feeble means. They had planted the seed, and the nursing of the plant and the gathering of the crop they were willing should be left to those who came after them.

The new system brought by the various Deputations from England resulted in the introduction of the regulations which had been adopted by the English Grand Lodge. Provincial Grand Lodges were organized and no lodge was instituted except under the sanction of a Warrant.

From this time Freemasonry in the colonies begins to be purely historical, and in that light its early history is now to be considered.

CHAPTER XLVII

THE EARLY GRAND LODGE WARRANTS

FROM what has been said in the immediately preceding chapter it appears that we may divide the narrative of the introduction of Freemasonry into the Colonies of North America into two distinct eras, which, in imitation of the archaeologists, we might almost call the pre-historic and the post-historic eras of American Speculative Freemasonry. The pre-historic era embraces that period of time which is included between the first immigration of settlers from Britain into the colonies and the granting of the first Deputation for a Provincial Grand Lodge. More strictly, it would be confined to the first thirty years of the 18th century.

Freemasonry was not, I think, in a condition, before the opening of the 18th century, to inspire its disciples with an enthusiasm which would lead to the propagation of the Order and the establishment of lodges in a new country.

Under the slow but persevering efforts of Speculative members of the Operative lodges, Freemasonry was gradually assuming a new character. The old Operative element was beginning to die off. It finally "gave up the ghost" about the year 1723, when the purely Speculative became not only the predominating but actually the sole element of the Institution.

It was while this transition was going on that many Freemasons, who were initiated under the old system before 1717, and under the new one after that date, emigrated into the American Colonies and carried with them their attachment for the Institution which they had acquired at home.

If any lodges were established before 1717, the act must have been a spontaneous one under the usage, which is described by Preston, by which a competent number of Masons were permitted to assemble for Masonic work without the sanction of a Warrant of

Constitution, a thing which was unknown to the Craft until after the adoption of a special regulation in 1717.

After that year it is true that every regular lodge was required to be sanctioned and authorized by a Warrant from the Grand Lodge, and this regulation, which ought rather to be called a compromise between the four old Lodges, and the new Grand Lodge was generally obeyed in London, where we have no evidence that any lodges were formed after 1717 without the sanction of a Warrant of Constitution.

But such was not the case at that early period in other countries where the principles of English Speculative Freemasonry were carried by immigrants. We know that English lodges were formed in France before 1712 in the old, which had now become an irregular, manner.

The same thing occurred in the American Colonies before 1730. Mention has been already made, in the preceding chapter, of an assembly of Masons in Philadelphia in 1716, and it has also been stated in that chapter, that a lodge without a Warrant was held in the same city in 1730 and probably for some years previously.

There is an excuse for this, if an excuse be needed, in the difficulty there was of obtaining a Warrant from England. Again the old regulation or custom was abrogated, only for those lodges within the "bills of mortality," that is to say, in the city of London and its purlieus.

"It admits of little doubt," says Bro. Gould, "that in its inception the Grand Lodge of England was intended merely as a governing body for the Masons of the Metropolis."¹

Hence we find in the Minutes of the Grand Lodge under the date of November 25, 1723, the declaration or agreement, "That no new lodge *in or near London*, without it be regularly constituted, be countenanced by the Grand Lodge, or the Master or Wardens admitted to the Grand Lodge."

The earlier records of the Grand Lodge, contained in Anderson's second edition, show in other places very plain indications that the regulation which required a Warrant of Constitution was not intended to apply to lodges outside of London.

But the fact is, that even in England, the regulations were not

¹ "Four Old Lodges," p. 19.

at that period strictly enforced. "The general laws of Masonry, however," says Dr. Oliver, "were but loosely administered." It is not to be supposed that a more implicit obedience to them was paid in distant parts of the empire.

The Grand Lodge was too young and too weak to extend the influence of its newly created authority beyond the narrow limits of its domestic territory.

CHAPTER XLVIII

ORIGIN OF THE ROYAL ARCH

NO event in the history of Speculative Freemasonry has had so important an influence upon its development, as a system of symbolism, as the invention of the Royal Arch degree and its introduction into the Masonic ritual.

It is evident that the limitation of the system to three degrees, terminating in the "Master's part," left the cycle of symbolism in as incomplete a condition as would be a novel with the last chapter unwritten.

The ritual, as it was devised and presented to the Craft in the beginning of the 18th century, when the Speculative element was wholly dissevered from the Operative, was an immature conception of its inventors, and was marked by the imperfections and deficiencies which are always attendant on immaturity.

Accepting the meagre ritual, principally intended to embody merely methods of recognition, Desaguliers and his collaborators had gradually extended it, first by the development of the one simple degree, which had been common to the whole body of the Craft, into two and finally into three degrees.

Here, unfortunately, they desisted from further labors in the construction of a ritual. The experiment had so far been successful. It had given renewed vitality to an institution which had long languished; it had excited the curiosity and gained the support of many who had hitherto felt no interest in the ruder system of the Operative lodges; and it had placed the society upon a much higher plane than that which it formerly occupied before the absolute dis-severance of the two elements of which it was composed.

It is much to be regretted that the experiment of fabricating a ritual so prudently begun, and which was so successful in its results, had not been continued, and the Third degree been supplemented by a Fourth that should have given perfection to the symbolic scheme.

What was precisely the ritual of the Master's degree as fabricated by Desaguliers, Payne, Anderson, and their contemporaries, it is impossible for us to know. The knowledge of facts which has been only orally transmitted are often lost in the lapse of time; tradition is scarcely ever unchanged; and when there is no written record to guide our inquiries, we necessarily grope in the dark.

The Masonic system of symbolism as now constituted presents us with a triple series of antagonisms—that of ignorance and knowledge; that of darkness and light; and that of loss and recovery.

With the first and second of these antagonisms we have nothing here to do. It is the last only that interests us in the present connection.

The antagonism of loss and recovery, when it is symbolized by death and resurrection—by the ending of the present and the beginning of the future life, is perfectly represented in the Master's degree. But when it refers to the doctrine of Divine Truth symbolized by the *Word*, which being lost for a time is ultimately recovered, the Third degree, as now constructed, and as it probably always was, fails completely to carry out the symbolism.

Everyone who has devoted full attention to the study of the ritual of Speculative Freemasonry must admit that the *Word* constitutes the central point around which the whole system of Masonic symbolism revolves. Its possession is the consummation of all Masonic knowledge when lost, its recovery is the sole object of all symbolic, Masonic labor.

These are not mere truisms, having only a general bearing upon the subject of symbolism; they are important axioms, indispensably connected with the history of the origin of the Royal Arch degree, and with the primary cause of its invention.

Even in the time of pure, unadulterated Operative Freemasonry, the *Word* was an important secret of the institution. The German Stonemasons had, at a very early period, a word, sign, and grip, and in the 17th century, if not before, the Operative Masons of Scotland attached much importance to the secrets of the *Mason Word*. Analogically we may infer that the English Operative Masons were also in possession of it, though no reference is made to it in the *Old Constitutions* or in the *Legend of the Craft*.

Whether this was or was not the same Word as that which after-

ward became the nucleus of the Royal Arch degree, it is impossible to determine. Most probably it was not. The Word given in the Catechism of the German Steinmetzen, which is to be found in Findel and that contained in the catechism of the Sloane MS., are different from each other and neither of them is the *Word* now used. There may, however, have been another Word, communicated only to a select few, which for obvious reasons has not been referred to, in either of these records. But this is merely conjectural, and I confess is hardly probable.

The *Word* as we now have it is indicative of a more elevated character of religious symbolism, to which the purely Operative Freemasons never apparently attained.

On the other hand, it can not be denied that the Freemasons of the Middle Ages indulged to a great extent in a species of religious symbolism. Christian iconography abounds in their architectural decorations, among which we find the triangle in its various modifications.

The question is therefore by no means settled by the reticence of the old catechisms on the subject. Happily, its settlement is not a matter of vital importance in the discussion of the Origin of the Royal Arch degree. Its decision would only determine whether the fabricators of the high degrees of which the Royal Arch was the earliest were original inventors of the *Word*, or only the followers of the older Freemasons and the resuscitators of their ideas.

Leaving the settlement of this question in abeyance, let us pursue our historical investigations of the origin and growth of the Royal Arch degree.

It is the opinion of many eminent Masonic scholars that the original Third or Master's degree of Desagulier's, which, with some modifications made from time to time by successive ritualists, continued to be recognized by the Constitutional Grand Lodge of England until the Union in 1813, contained the true Master's or Royal Arch *Word*.

Dr. Oliver has furnished, I think, a very convincing proof that the *True Word* was communicated in the original ritual of the Third degree, as practiced from 1723 onward. In his *Origin of the English Royal Arch*, he makes the following statement:

"I have now before me an old Master Mason's tracing-board or floor-cloth, which was published on the continent almost immediately

after symbolical Masonry had been received in France as a branch from the Grand Lodge of England in 1725, which furnished the French Masons with a written copy of the lectures then in use; and it contains the true Master's *Word* in a very prominent situation."¹

It can not be denied that his deductions from this circumstance are very legitimate. He goes on to say:

"This forms an important link in the chain of presumptive evidence, that the *Word*, at that time, had not been dissevered from the Third degree and transferred to another. If this be true, as there is every reason to believe, the alteration must have been effected by some extraordinary innovation and change of landmarks. And I am persuaded, for reasons, which will be speedily given, that the ancients are chargeable with originating these innovations, for the division of the Third degree and the fabrication of the English Royal Arch appear, on their own showing, to have been their work."

A future proof of the fact that the true *Word* was contained in the original Third degree may be found in Wilkenson's edition of the *Book of Constitutions*. That work was published at Dublin in 1769 and in front of the first page is a tracing-board, purporting to be the delineation of "A lodge fitted up for the reception of the most respectable Master." Among the emblems depicted are the hillock, the sprig of Acacia and the coffin surrounded by the heraldic *guttés de larmes*, or drops of tears, symbolic of grief, all of which refer to the Hiramic Legend of the Master's degree, while, in a prominent place and in conspicuous letters, is the true Master's *Word*.

In another work Dr. Oliver says that the "Royal Arch *Word* was anciently the true *Word* of the Third degree,"² and he refers to a French writer of 1745 as stating that "the Master's *Word* was originally . . . but that it was changed after the death of Adoniram."

The writer here referred to is, I think, Guillemain de St Victor, who, however, published the first edition of his *Recueil Precieux de la Maçonnerie Adonhiramite*, not in 1745, but in 1781. Guille-

¹ "Origin of the Royal Arch," p. 20.

² "Discrepancies of Freemasonry," p. 75. In this posthumous work Dr. Oliver has evidently made the personages of his interesting dialogues merely the media fog communicating his own opinions.

main gives the *Word* in full, which is precisely the Royal Arch *Word* of the present day. It was engraved on the tomb of Hiram upon a triangular plate of gold, and it was, he says, *l'ancien mot de maître*.¹

Now, what Guillemain knew of the Third degree had for its basis the primitive ritual of the Constitutional Grand Lodge of England, for this had passed over into France and been adopted on the Continent long before that Grand Lodge made the changes so much objected to by the seceding Masons of 1740. His authority may therefore be accepted as confirmatory of Oliver's statement that the Third degree originally contained the *True Word*.

But though it should be admitted that the Master's degree was known to the framers of the ritual of that degree, as it was fabricated soon after the organization of 1717, and was communicated in the last part of the degree, it will not follow that there was anything more than a mere communication of it, without comment or explanation.

Something in the teachings of the ritual must have been wanting; else why should there have been a secession of a part of the Craft, who sought professedly to supply a defect which they felt by supplementing a Fourth degree.

The loss and the recovery of the *Word* constitute the foundation on which the entire system of Masonic symbolism is built. Without these important points, Speculative Freemasonry as "a science of morality, veiled in allegory and illustrated by symbols" would be a total failure. As a moral and social institution inculcating the practice of virtue and cultivating the principle of brotherhood, it might remain. But it would in no respect differ from hundreds of other societies professing the same objects, which have sprung into existence, and wanting the vitality which a deep, religious symbolism has given to Freemasonry, have all passed through only an ephemeral existence.

Hence, the invention about the middle of the 18th century of a Fourth degree which should supply the deficiency of the original "Master's part," gave an impetus to the institution, which history records in the successful progress of the seceders who had adopted the invention.

¹ "Recueil Preceieux de la Maçonnerie Adonhiramite," p. 105, edition of 1787.

The interpretation of the loss and the recovery of the *Word*, lie, as has already been said, at the very foundation of all Masonic symbolism.

Now, it is more than probable that the fabricators of the original Third degree were acquainted with and communicated to their initiates the history of the loss. We know that the Hiramic legend constituted an important part of the ritual, and the loss of the *Word* must have been included in the allegory which forms the substance of that legend.

But as the history of the recovery of the *Word* is not included in the legend, it is evident that the original Third degree could have made no reference to it, and the dual symbolism of a loss and a recovery could not have been perfect.

The degree, as originally intended, being founded on the Hiramic legend, gave, of course, a history of the way in which the *Word* was lost. But though afterward it was communicated, as it is said, to a select few, we do not learn from its ritual in what way it was restored to the Craft. There was, therefore, an important defect in the symbolism of the system.

Now, this defect must have at length attracted the attention of some of the students of the ritual who were looking at Speculative Freemasonry as something more than a mere social organization, and who were desirous to lift it to a more elevated plane of intellectuality.

It was on the continent that the disposition to expand the ritual first displayed itself. It was this disposition which, in time, passed out of the limits of propriety and gave rise to the almost innumerable *hauts grades*, which have rather overclouded than purified the atmosphere of Masonic symbolism.

At first, however, the attempt at expansion was conducted with moderation, and was confined to only two points—to supplying the deficiency in the history and symbolism of the *Word*, and to inventing a new account of the origin of the institution.

With the latter of these expansions, the present subject has no connection. It is only to the former that we must direct our attention.

The first innovator on the original ritual of Desaguliers and his collaborators was the noted Chevalier Ramsay, and it is to him that we have to trace the first addition to that ritual which was to sup-

plement the Third degree with another, which has since under great modifications been known to English-speaking Freemasons as the Royal Arch.

The Masonic labors of Ramsay entitle him to, at least, a brief sketch of his life and character.¹

Andrew Michael Ramsay, commonly known as the Chevalier Ramsay, was born at Ayr, in Scotland, on June 9, 1668. Having completed his education at the University of Edinburgh, where he was distinguished for ability and diligence, he became, in 1709, the tutor of the two sons of the Earl of Wemyss.

Subsequently, he left his native country and retired to Holland. There he became acquainted with Peter Poiret, a learned and philosophical disciple of the celebrated Quietist Antoinette Bourignon. Poiret was a prominent teacher of the mystic theology which then prevailed on the continent.

To his intimacy with this pious mystic, Ramsay was very probably indebted for that love of mystical speculation which he subsequently developed as the inventor of high degrees in Freemasonry, and as the author of a Masonic rite.

In 1710 Ramsay visited Fénélon, Archbishop of Cambrai, became his guest and pupil, and six months afterward a proselyte to Romanism.²

Through the influence of the Archbishop he received the appointment of preceptor to the young Duke de Chateau-Thierry and the Prince de Turenne.

As a reward for his services in that capacity he was created a Knight of the Order of St. Lazarus, whence he derived the title of "Chevalier," by which he is always designated.³

In 1724 Ramsay went to Rome and was appointed tutor to the two sons of the titular James III., who, as the son and heir of James II., the exiled King of England, still claimed the throne of his an-

¹ See a biography of Ramsay in Mackey's "Encyclopædia of Freemasonry," from which the present sketch is condensed.

² In his "Life of Fénélon," Ramsay gives the full details of the intellectual process and the arguments of the prelate through which his conversion was effected. "Life," pp. 189-247.

³ The Order of St. Lazarus was first instituted in Palestine and the knights were devoted to the care of persons infected. They afterward united with the other Orders in the war against the Saracens. We may presume that Ramsay's connection with this Order first suggested to him the idea of tracing Freemasonry to the Crusades and ascribing its origin to a system of knighthood, which he embraced in his high degrees.

cestors. He is known in history generally by the more appropriate title of the "Old Pretender."

Ramsay's close connection with the exiled family of Stuart, and with their adherents, the Jacobites, undoubtedly exerted much influence in the shaping of certain high degrees and in the modified interpretation of certain legends, so as to give a coloring to the preposterous theory that Speculative Freemasonry was invented or at least used as a political means of promoting the restoration of the House of Stuart to the English throne. Ramsay, himself, is not clear from the suspicion of having sown the germs of this theory. He was a firm believer in hereditary right, and, being an aristocrat at heart, he spurned the idea that Freemasonry could have had an Operative origin.

In the year 1728 he visited England and became an inmate of the family of the Duke of Argyle. While in England the University of Oxford conferred upon him the degree of Doctor of Laws, a tolerable evidence of his reputation as a man of letters.

On his return to France he took up his residence at Pointoise, a seat of the Prince of Turenne, and spent the remainder of his life as Intendant in the Prince's family, dying on May 6, 1743, in the seventy-fifth year of his life.

The literary career of Ramsay was marked by the production of only a few works, but each of these give evident proofs of his learning and of his skill as a writer. His first work appears to have been *The Life of François de Salignac de la Motte Fénélon, Archbishop and Duke of Cambrai*. This was published at London in 1723, and gave rise to a severe criticism by "Britannicus" in several consecutive numbers of the *London Journal* of that year.

In 1727 he published *The Travels*. This work, composed after the style of Fénélon's *Telemaque*, was enriched by a learned "Discourse on the Theology and Mythology of the Persians." The book was so favorably received as to be speedily translated into the French, the Dutch, the German, and the Danish languages. A much altered and improved edition was subsequently published by the author at Glasgow in Scotland.¹

¹The copy in my possession bears the imprint of James Knox, Glasgow, but without a date. Kloss registers several London and Paris editions of the work varying from 1760 to 1829, but omits any mention of this Glasgow edition. See Kloss, "Bibliography," No. 3936

In the latter years of his life he wrote as a tribute of friendship a *History of the Viscount Turenne*. After his death his greatest work appeared, namely, *The Philosophical Principles of Natural and Revealed Religion, Unfolded in a Geometrical Order*. This work, published in two quarto volumes at Glasgow in 1748, stamps its author not only as a man of varied learning but as a profound metaphysician and an astute logician. Of all the adversaries of Spinoza, none has so adroitly and successfully attacked the errors of that incredulous philosopher as Ramsay.

His contributions of published works to the literature of Speculative Freemasonry are still fewer. They consist of only two productions, and the authorship of one of these is only conjectural.

In 1738 there was published at Dublin, Ireland, a work, reprinted at London in 1749, with the title of *Relation apologetique et historique de la Societé des Francs-Maçons, par J. G. D. M. F. M. Kloss*, who styles it a comprehensive and fundamental apology for the Institution of Freemasonry, and attributes its authorship without doubt to Ramsay. By order of the Sacred Congregation it was burnt in the following year, at Rome, by the public executioner, for containing "impious propositions and principles," and "the faithful" were prohibited from reading it. This act of literary cremation was the first instance of the impotent persecution of the Order by the Roman Church after the publication of the celebrated Bull *in eminenti* of Pope Clement XII.

In 1740, when Ramsay was Grand Orator of the Grand Lodge of France, he pronounced a discourse before that body. It was first published in 1741 in the *Almanach des Cocus*, under the erroneous title of *Discours d'un Grand Maître*. Ramsay never attained to that official dignity.

This *Discourse* and the *Apologetic Relation*, conjecturally attributed to him, are the only published writings of Ramsay on Masonic subjects that have come down to us. It is not known indeed that he ever published any others.

But this *Discourse* is of great importance, inasmuch as in it he develops in explicit terms his theory of the origin of Freemasonry. It is sufficient here to say that that theory repudiated the idea of its connection with an Operative art and traces its birth to Palestine and to the time of the Crusaders. He thus gave to Freemasonry

not an architectural but a religious and military character which connected it with the Orders of Knighthood.

It is to the influence of this theory on the Masonic mind that we are to attribute the subsequent incorporation of Templarism into the system of Freemasonry, a thought that never suggested itself to the original founders of the Society.

But though Ramsay wrote but little on Freemasonry for the public eye, no one during the 18th century exerted a greater influence over continental Masonry, and that influence, as it will hereafter be seen, extended, in some degree, even into England.

He was an assiduous and enthusiastic ritualist, and sought to develop the Masonic system by the invention of new degrees.

To him we are indebted (though the value of the debt is questionable) for the invention of the system of Rites, wherein the science of Speculative Freemasonry is expanded by a superstructure of "high degrees," based upon the primitive three.

At that time the Grand Lodge of England recognized and practiced only the three degrees of Apprentice, Fellow-Craft, and Master Mason. The same system was pursued by the Grand Lodge of France.¹

This simple system had no congruity with the theory of Ramsay. It made no reference to the Orders of Chivalry and bore no appearance of a relationship to anything but an Operative art.

Ramsay, therefore, found it necessary to construct a new system, which should bear the evidence not of an Operative, but of a Chivalric origin.

If in carrying out these views he had rejected the primitive degrees, his new system would have had no pretensions to be a Masonic one.

He was unwilling to attempt such a revolution, which would, most probably, have been unsuccessful in its results.

Speculative Freemasonry had by that time become a popular institution—it possessed wealth and influence, and men of rank and learning eagerly sought admission into the society. Ramsay, himself, was undoubtedly attached to it, though his aristocratic tendencies induced him to seek for it a more elevated sphere.

¹ La Grande Loge de France ne reconnaissait que les trois grades symboliques; ses constitutions ne s' étendaient pas au delà. Thory, "Fondation de la G. L. de France," p. 15.

Besides, he must have seen that it furnished, even in what he deemed its imperfect state, a firm foundation on which to erect the edifice of his "high grades."

Ramsay, therefore, constructed a new system, which has since been called a Rite. His example was afterward imitated, but with less moderation as to the number of degrees, by ritualists who inundated Freemasonry with their new inventions. But of all the succeeding rites, though some of them extended to nearly a hundred degrees, only one of the original ideas of Ramsay, that, namely, of perfecting the Master's part, by the symbolism of a recovery of the *Word*, was sedulously preserved.

This first Masonic Rite, which has since been known by the title of "The Rite of Ramsay," consisted of six degrees, designated as follows:

1. Entered Apprentice.
2. Fellow-Craft.
3. Master Mason.
4. Ecossais or Scottish Master.
5. Novice.
6. Knight of the Temple or Templar.

Rhigellini adds a seventh degree, which he says was the Royal Arch; but I find no evidence elsewhere of this fact, and Rhigellini, I am sorry to say, is worse than useless as an historical authority.¹

The fifth and sixth of these degrees embodied his ideas of the chivalric or Templar origin of the Institution. Their consideration would throw no light upon the investigation of the Royal Arch which we are now pursuing.

It is the Fourth only in which we are interested—the *Ecossais*—from which it is supposed that the suggestions were derived which gave origin to the invention of the Royal Arch degree in England and to the great Masonic schism which followed.

Ramsay went to England in 1728. How long he remained there is uncertain, but it was long enough to win the favor of the University of Oxford, and to obtain from that body one of its highest literary favors. He had also gained warm friends in that coun-

¹ Rhigellini, "La Maçonnerie, etc.," tome ii., p. 125. It was a part of Ramsay's system to ascribe the invention of these degrees to Godfrey of Boulogne, in the days of the Crusaders. It was Ramsay's legend with less foundation in truth than legends usually possess.

try, among whom may be named the Duke of Argyle, in whose family he resided, and Lord Landsdowne, to whom he dedicated his *Travels of Cyrus*, and of whose "singular friendship" he boasts.

It is not, therefore, improbable that he possessed some influence with the Freemasons of England, among whom it is said he sought to introduce his new ritual.¹ But he failed in his effort to get it adopted by the Grand Lodge, which was then, as it still is and always has been, extremely conservative in its views.

But though unsuccessful with the Grand Lodge, his Royal Arch seems to have excited an interest in some of the Fraternity. His method of supplying the allegorical symbol of a recovery of the lost *Word* had awakened them to the fact that this symbolism, so necessary to perfect the circle of Masonic symbology, was wanting in the old system of three degrees as then practiced by the Grand Lodge.

For some few years no effort was made to incorporate the new system into the then accepted ritual. But the thought did not die. It continued to grow, and at last was given actual life when, about 1738 or perhaps a few years earlier,² certain of the brethren began to manipulate the Master's degree, and to add to the story of the loss of the *Word* the new legend of its recovery.

This tampering with the Third degree was met by the Grand Lodge first with grave censure, and then, as the participants in the scheme continued to be refractory, with their expulsion.

This led, as we have already seen, to the schism which divided the Masons of England into two parties, distinguished by the titles of the "Moderns" and the "Ancients."

The latter having organized a Grand Lodge, adopted a new ritual of four degrees, and called the last the Royal Arch.

It has been said that Ramsay invented the Royal Arch degree. He did no such thing. He did not even invent the name. But he did the symbolism which referred to the recovery of a *Word* that had been once lost and afterward recovered. And this constitutes the whole essential sum and substance of all Royal Arch Masonry, no matter under what name and in what Rite it is to be found.

¹ Il voulut introducere a Londres, en 1728, un nouveau Rite; mais il echoua dans ce projet. Thory, "Acta Latomorum," tome iL, p. 568.

² The Grand Lodge first officially noticed the "irregular makings" in 1738; but it does not follow that they had not been occurring for some time before attention was called to them.

We may suppose, and the supposition is a very tenable one that he said to his disciples in England, "Your ritual gives you a recital of how the *True Word* of a Master was lost, but it does not tell you how it was afterwards restored to the Craft; and in this respect your system is perfect. The discovery of a lost *Word* constitutes a most important part of the symbolism of Speculative Freemasonry. This symbolism and the Legend which refers to it, I offer you as necessary development and improvement of your system."

His disciples accepted the idea of the symbolism, but they rejected his Legend, and invented one of their own.

Neither the Legend of what has been called Dermott's Royal Arch, though he was not its author, nor Dunckerley's, nor that which has been in existence in England certainly since the Union of 1813, has any similitude to that of Ramsay's *Ecossais* degree.

So then, the correct historical statement would be that Ramsay suggested to the English Masonic mind the symbolism of a *Recovered Word*, for which Speculative Freemasonry was indebted to his inventive genius.

In this guarded sense of the expression it may be permitted to be said, that he introduced the doctrine of the Royal Arch into English Freemasonry. Without the suggestive influence of his ideas, Royal Arch Masonry would have been unknown to the Masonic system.

This theory, which is, I think, generally accepted as correct by Masonic scholars, has met with, so far as I know, only one opponent.

The late Bro. Charles W. Moore, the learned editor for many years of the *Freemasons' Monthly Magazine*, published at Boston, Mass., in an article¹ "On the Origin of Royal Arch Chapters, at Home and Abroad," says, "it is not true that Ramsay had anything to do with the Royal Arch degree." His grounds for this unbelief are thus stated:

"Ramsay's system consisted of the three degrees of *Ecossais*, Novice, and Knight Templar only. If he ever invented a Royal Arch degree, which is very doubtful, no traces of it now remain."²

Now the error of Bro. Moore consisted in his confounding the doctrine and symbolism of the Royal Arch degree with the specific name adopted in England. He could find no such title as Royal

¹ "Moore's Magazine," vol. xii., April, 1853, p. 160.

² *Ibid.*, p. 163, note,

Arch among the degrees of Ramsay's Rite, and he rashly concluded that he had nothing to do with it.

It did not occur to him to look in Ramsay's system for the doctrine of the Royal Arch, under another name. Had he done so, he would have found it in the Fourth degree, or *Ecossais*, of that system.

The word *Ecossais*, which may be correctly translated as *Scottish Master* or *Scottish Mason*, was invented and first used by the Chevalier Ramsay as the name of a grade in the Masonic ritual which he had constructed. In pure French the word signifies Scottish or Scotsman, and is said to have been adopted by Ramsay, because it was a part of his Legend, that though the degree, like the rest of Freemasonry, was originally fabricated by the Crusaders, it passed over from the Holy Land into Scotland, where at Kilwinning it found for a long period an abiding place, until it was disseminated over Europe.

From this as the original degree has sprung up numerous others having the same name and the same design.

That design is to detail the method in which the *Lost Word* was recovered, so that the true symbolism of the *Word* may be preserved.

This symbolism, which gave perfection to that of the hitherto incomplete Third degree, was so acceptable to the Fraternity everywhere, that in all the Rites subsequently established over the continent, the *Ecossais* of Ramsay was adopted with certain modifications.

The extent to which this cultivation of *Ecossaism*, or the doctrine of the *True Word*, was carried by the ritualists who succeeded Ramsay may be shown from the fact that Ragon, in his almost exhaustive *Nomenclature* of the degrees, enumerates no less than eighty-three which bear the name of *Ecossais*.

In every legitimate *Ecossais* degree we meet with these two essential characteristics: first, there is a communication of the *True Word* which had been lost; and secondly there is a Legend which details the mode by which it was recovered and restored to the Craft.

In all these degrees the *Word* is substantially the same; in most of the Continental Rites the Legend of Ramsay, which accompanied it, has been preserved, with but little or no alteration.

The English Masons accepted the suggestions of Ramsay as to the necessity of expanding the Third degree or Master's part. They adopted the *Word* which indeed it is said had always existed in the original ritual of the Third degree; but they transferred its collocation from the Third to a Fourth degree; and they wholly rejected Ramsay's Legend, fabricating a new one for themselves, for which there is some reason for believing that they were partly indebted to a talmudic or rabbinical tradition. They also declined to adopt Ramsay's nomenclature, and having perhaps no liking for a name which, by implication at least, gave a Scottish origin to the Institution, they abandoned the title of *Eccossais* and took instead of it that of Royal Arch.

If the details of this narrative and the conclusions drawn from it are correct, then the theory has been established that the brethren who seceded about 1738 from the Constitutional Grand Lodge of England, with its three primitive degrees, and afterward organized a schismatic Grand Lodge of their own with an additional or Fourth degree, were indebted to Ramsay for the idea which led to the innovation.

Ramsay introduced the doctrine of the Royal Arch into English Masonry, but he did not succeed in introducing his degree.

Having thus settled the question of the origin of English Royal Arch Masonry, we are next to inquire at what time it was introduced into England and incorporated in the ritual of English Speculative Freemasonry.

There is no authority anywhere to be found which traces the existence of a Royal Arch degree in England anterior to the year 1738.

The earliest printed work which makes any reference to the degree is a book entitled *A Serious and Impartial Enquiry into the Cause of the Present Decay of Free-masonry in the Kingdom of Ireland*, by *Fifield Dassigny, M.D.*, published in London in 1744.¹

The references of the author of this work to the subject of Royal Arch Masonry, are, viewing the time when they were printed, of

¹The book is very scarce, there not being a copy in the British Museum. There is none to be found in any library in Ireland, and only one in America, which is in possession of Bro. Carson of Cincinnati, O. Bro. Hughan having obtained a copy, republished it in his "Memorials of the Union." The passage here quoted is from p. 96 of his republication.

great interest, and may throw some light on a contested point of history. They are, therefore, here quoted in full, as follows:

"Now as the landmarks of the constitution of Free-Masonry are universally the same, throughout all kingdoms, and are so well fixt that they will not admit of removal, how comes it to pass that some have been led away with ridiculous innovations, an example of which I shall prove by a certain propagator of a false system some few years ago, who imposed upon several worthy men under a pretense of being Master of a Royal Arch, which he asserted he had brought with him from the city of York; and that the beauties of the Craft did principally consist in the knowledge of this valuable piece of Masonry. However, he carried on his scheme for several months, and many of the learned and wise were his followers, till at length his fallacious art was discovered by a Brother of probity and wisdom, who had some small time before attained that excellent part of Masonry in London and plainly proved that his doctrine was false; whereupon the Brethren justly dispised him and ordered him to be excluded from all benefits of the Craft, and altho' some of the fraternity had expressed an uneasiness at this matter being kept a secret from them (since they had already passed thro' the usual degrees of probation) I cannot help being of opinion that they have no right to any such benefits until they make a proper application, and are received with due formality, and as it is an organized body of men who have passed the chair, and given undeniable proofs of their skill in Architecture, it can not be treated with too much reverence, and more especially since the character of the present members of that particular lodge are untainted and their behaviour judicious and unexceptionable; so that there can not be the least hinge to hang a doubt on, but that they are most excellent Masons."

As Dassigny's book was published in 1744, the phrase "a few years ago" may be interpreted as applying to about the year 1741, or perhaps even 1740. With this explanation as to time, we may infer several facts from this passage.

In the first place, it appears that an adventurer coming to Dublin to propagate the Royal Arch thought it favorable to his interests to claim that he had brought the degree from the city of York. From this we may infer that it was a belief among the Freemasons of Ireland as well as elsewhere, that there was a Royal

Arch organization then existing at York. This is not an absolutely essential inference, because he may have depended for its success on the prestige given to that city in the Masonic mind by the traditional belief that it was the cradle of Masonry.

But the inference gains some strength from what Dassigny says in a foot-note: "I am informed in that city (York) is held an assembly of Master Masons under the title of Royal Arch Masons, who as their qualifications and excellencies are superior to others, they receive a larger pay than working Masons."

Here we have the explicit statement of a contemporary writer that such a belief was in existence. Whether it was founded in fact or in fiction is another question. Yet it is a proverbial dogma that there is no rumor without some foundation. "Flame," says Plautus, "is very close to smoke."¹

However, Bro. Hughan, whose authority as a Masonic historian demands great respect, says it is doubtful whether an Assembly of Royal Arch Masons ever met in York so early as 1744, for there is no trace of such a degree until many years later in any of the Records preserved.²

But the absence of any records of a Royal Arch degree among the papers of the Grand Lodge of York, which have been preserved, is no sufficient evidence of the non-existence of that degree between 1740 and 1744. These wanted records may have been among those which have been lost or destroyed. Against this explainable deficiency of evidence by official records, which it is admitted are not complete, we have the testimony of a contemporary writer of repute and intelligence who says that there was in 1744 a rumor that the Royal Arch degree was conferred in York at that time.

The question therefore of this early existence of Royal Arch Masonry in York must still remain in abeyance; it is *sub judice*, nor can it ever be decided, until further testimony is produced. But notwithstanding the high authority of Bro. Hughan, I am disposed to think that in 1744 and a few years before, the Royal Arch degree was conferred in the city of York, having of course been brought there from London, where it originated.

It does not follow that at that time there was any regular organi-

¹ Flamma fiemo est proxima. Plautus, "Curculio," i., 53.

² "Memorials of the Union," p. 6.

zation connected with the Grand Lodge (which, by the way, was at that time dormant, or of which we have no records) or with the lodge which was still in existence. The degree was about that time just beginning, even in London, to assume an official shape, and irregularities must have prevailed. Bro. Hughan tells us that Bro. William Cowling, an officer of the present York Lodge, is of opinion in reference to the later and undisputed organization of a Chapter in 1780, that "the Royal Arch Degree was kept distinct from the Craft at York, but that there was a very intimate connection between them."¹

What is here said of the later organization may probably be applied to an earlier one. If so, it would be vain to look in the missing records of the York Grand Lodge from 1735 to 1760, if they are ever found, for any reference to Royal Arch Masonry.

Returning to the extract from Dr. Dassigny's *Enquiry* we infer, in the second place, that in the year 1744 there were Royal Arch Masons in Dublin who appreciated the degree as a valuable addition to the Masonic system.

We infer, thirdly, that at that time there was an organized body of Past Masters there who regularly conferred the degree, restricting it, however, to those Masons who had passed the chair. As this was the regulation which existed in London, it is evident, if other proof were wanting, that the degree given in Ireland was originally derived from London and from the "Ancients."

After this digression for the purpose of demonstrating the time of the first appearance of the degree at the cities of York and Dublin, we may return to our investigation of the history of its origin in England.

We have seen that in 1728, soon after the Chevalier Ramsay had fabricated his system of high degrees, among which was one that, under the title of *Ecossais* or "Scottish Master" developed his doctrine of the Royal Arch or the recovery of the *true Word*, he came to England.

There he had personal intercourse with many Freemasons and communicated to them his views, and demonstrated to them the incompleteness of the established ritual, which, terminating in the

¹ Hughan, "Memorials of the Union," p. 82.

Master's part, and the loss of the *Word*, made no provision for its recovery.

To the greater part of the English Freemasons his theory was either unintelligible as a doctrine or offensive as an innovation. Hence, the efforts he is said to have made for its adoption by the Grand Lodge proved unsuccessful.

But, happily for the progress of Masonic light, there were some thinkers of more enlarged views. They saw the deficiency in the old ritual, and were ready to accept any modification that would improve it.

With this party, small at first but gradually increasing in numbers, the ideas of Ramsay became popular.

But while they adopted his doctrine concerning the recovery of the true *Word* as the basis of a new degree to be added to the ritual of three degrees, they refused in the end to adopt his legend.

It is not unlikely that the first English Freemasons who were engaged in 1738 in the "irregular makings" which were censured by the Grand Lodge may have used Ramsay's legend for a time.

This is mere guess-work. Still, it is very supposable that Ramsay taught his whole system to a few disciples who naturally would seek to propagate.

Dassigny, in his *Enquiry*, throws some gleams of light on this obscure subject in the following passage:

"I can not help informing the Brethren that there is lately arrived in this city a certain itinerant Mason whose judgment (as he declares) is so far illumined, and whose optics are so strong that they can bear the view of the most lurid rays of the sun at noon day, and altho' we have contented ourselves with three material steps to approach our *Summum Bonum*, the immortal GOD, yet he presumes to acquaint us that he can add three more, which, when properly placed, may advance us to the highest heavens."¹

Now, it is at least a coincidence that Ramsay's newly invented Rite added just three degrees to the three of the original ritual. May not this "itinerant Mason" referred to by Dassigny have been a disciple of Ramsay, who was seeking to introduce his ritual into Dublin?

But as I have said before, this is mere guess-work. It only

¹ Dassigny's "Enquiry," in Hughan's republication in the "Memorials," p. 97.

gives a sort of probability to the hypothesis that Ramsay had succeeded in imbuing the minds of certain English Freemasons with the principles of his system, so that they were prepared to formulate out of it a degree, which, though differing in name and differing in legend, retained its doctrine.

And so out of this system of Ramsay the seceding Masons of England formulated a Fourth degree, which they called the "Royal Arch," and which, though owing its origin to Ramsay's *Ecossais*, resembled it only in the doctrine of a lost *Word*, recovered, which is the true and only doctrine of Royal Arch Masonry, under whatsoever name it may be known.

It may be considered as a well-settled fact in history that the Royal Arch degree was not known in England before the year 1738,¹ at which time it was practiced by certain brethren who afterward assumed the name of "Ancient Masons," and finally seceded from the Constitutional Grand Lodge.² The degree then conferred was suggested by and founded on the *Ecossais* degree of Chevalier Ramsay.

"If the Royal Arch degree," says Brother Hughan,³ "in its separate and distinct form, existed prior to 1738, and indeed, was as old as the Third degree, how comes it that the regular Grand Lodge of England persistently refused to recognize it until 1813, but the body of Masons which seceded from this original and premier Grand Lodge, made much of the degree, and by it, we may truly say, succeeded in making their numerical position in a few years almost equal to the regular Grand Lodge itself?"

The degree as practiced by the seceding Masons was, as Dr. Oliver⁴ remarks, "imperfect in its construction," and its rude and unfinished state betrayed its recent origin.

Its form was, however, gradually improved. When the Grand Lodge of Ancients was organized in 1753, that body adopted it as one of its series of degrees, making it the Fourth in order of precedence.

At first, the degree was conferred in the lodges and as a supplement to the Third degree.

¹ Hughan, "History of Freemasonry in York," p. 38.

² See Northouck's "Book of Constitutions," where, in a note to p. 239, a full but not altogether impartial account of the secession is given.

³ In a Review of Higgins's "Anacalypsis," in the "Voice of Masonry," vol. xiii., p. 887.

⁴ "Origin of the Royal Arch," p. 21.

Dr. Oliver describes it as having at that early period "jumbled together, in a state of inextricable confusion, the events commemorated in Ramsay's Royal Arch, the Knights of the Ninth Arch, of the Burning Bush, of the East or Sword, of the Red Cross, the Scotch Fellow-Craft, the Select Master, the Red Cross of Babylon, the Rose Croix," etc.¹

I know not whence Oliver derived his authority for this statement. But as none of the degrees which he mentions were then fabricated, it is impossible that he can be correct.

It is very probable that the *Legend of Enoch* which was embodied in Ramsay's *Ecossais*, and which was afterward adopted in the degree of Knights of the Ninth Arch, was at first used by the seceders in conferring their Fourth degree. But it was afterward changed for the very different Legend which is still taught in the English Royal Arch.

After a short time, when the degree had been nursed into a better shape by the Grand Lodge of Ancients, it was conferred into a body called a "chapter," but still constituting a part of a Warranted lodge.

The regulations "for the Instruction and Government of the Holy Royal Arch Chapter," adopted by the Atholl Grand Lodge, declare that "every regular and warranted lodge possesses the power of forming and holding meetings in each of these several degrees, the last of which from its pre-eminence is denominated among Masons a chapter." And this regulation continued in force until the Union of 1813.²

The earliest official minute of the Royal Arch degree among the "Ancients" bears the date of 1752.³ At that time the "Ancients" were organized in a General Assembly, which bore the name of a "Grand Committee."

The degree was then conferred in the lodges but only on those who had passed the chair. We have seen that this right of the lodges to confer the Royal Arch was always recognized by the Atholl Grand Lodge.

But a Grand Chapter was subsequently established, at what precise date is not accurately known.

¹ "Origin of the Royal Arch," p. 21.

² See the "Ahiman Rezon" published in 1807, p. 107.

³ Hughan, "Memorials of the Union," p. 6.

On April 6, 1791, the "Ancients" published "Laws and Regulations for the Instruction and Government of the Holy Royal Arch Chapters, under the sanction of the Grand Lodge of England, according to the Old Constitutions." These Regulations were subsequently revised, amended, and approved "in a General Grand Chapter" held at the "Crown and Anchor Tavern," in the Strand, on April 1, 1807, and are contained in the *Ahiman Rezon* of that year.

The first of these Regulations that, "There shall be a General Grand Chapter of the Holy Royal Arch held half yearly at the 'Crown and Anchor,' Strand, on the first Wednesday in the months of April and October. That agreeably to established custom the officers of the Grand Lodge, for the time being, are considered as the Grand Chiefs, and are to preside at all Grand Chapters, according to seniority; they usually appoint the most expert R. A. companions to the other Offices; and none but Excellent Masons, being members of warranted lodges, in and near the Metropolis, shall be members thereof. Certified sojourners may be admitted as visitors only."¹

It will be perceived that the organization of this Grand Chapter of the "Ancients," though not recognized as legal, prepared the model on which the subsequent Grand Chapter of England has been founded. The government by three Chiefs has also been adopted in America, though they are no longer made identical, as they still are in England, with the three principal officers of the Grand Lodge.

Warrants were granted by the Grand Chapter for the formation of chapters, but only where the parties composing such chapter possessed a regular Warrant granted by the Grand Lodge.² Hence, every chapter under the system of the "Ancients" was, though independent as to the degree, an appanage of a warranted lodge. An application for initiation to the Royal Arch degree was to be directed "to the presiding chiefs of the chapter of Excellent Royal Arch Masons, under sanction of lodge number——."³

This usage prevailed in America as long as lodges of "Ancient Masons" existed there. I have in the early part of my life personally known several old Royal Arch Masons who received the degree in lodges attached to chapters.

¹ "Ahiman Rezon," 1807, p. 108.

² "Laws and Regulations of the General Grand Chapter," No. iv. ³ *Ibid.*, No. vi.

The chapters, though thus closely connected with the lodges, were so far under a separate jurisdiction as to be required to make returns of their exaltations and payment of fees to the Grand Chapter.¹

Another regulation required that none should receive the Royal Arch degree but those who had "passed the chair."² The earliest custom was to confer it only on those who had been Masters of lodges. But this practice having been found inconvenient, as it too greatly restricted the number of candidates, the law was subsequently violated, and a fictitious degree of Past Master was instituted, brethren being permitted by a mere ceremony to "pass the chair" without having ever been elected Masters of lodges. Thus the distinction of *actual* and *virtual* Past Masters came in vogue, the degree or rank of Past Master being thus virtually conferred as a prerequisite to exaltation.

In 1813 the United Grand Lodge of England abolished this practice and it now admits Master Masons to be exalted. But the practice still prevails in the chapters of the United States, though efforts have at times been unsuccessfully made to abandon it.

The "Moderns" had seen with some envy, as we may suppose, the success which the "Ancients" were securing, and they very properly attributed it to the prestige given to the seceders by their fabrication of a Fourth degree.

It was therefore a very judicious movement on their part to avail themselves of a like prestige by the extension of their ritual and the adoption also of an additional degree.

Hence we find that some of the "Moderns" formed a chapter for conferring the Royal Arch degree on June 12, 1765.³ It has been believed that Thomas Dunkerley was the founder of this chapter, but Bro. Gould denies this, because the minutes show that he did not become a member of it until January 8, 1766.

But I am unwilling to reject the almost universally accepted tradition that to him we owe the fabrication of the Royal Arch of the "Moderns"—a degree which is said to have differed in many points from that of the "Ancients."

Dunkerley, who was an illegitimate son of George the Second, and whose claims to that paternity received a sort of quiet recognition from the royal family, was a man of excellent character and

¹ "Laws and Regulations of the General Grand Chapter," No. xii. ² *Ibid.*, No. viii.

³ Gould, "Atholl Lodges," p. 38.

of considerable talents. He was very popular with the Craft and was the author of a new system of lectures, or an improvement of the old, which had been sanctioned by the Grand Lodge.

In the course of his Masonic studies he appears to have been convinced of the policy, under existing circumstances, of supplementing the deficiencies of the original Third degree. We may indeed attribute to him a higher motive than that of policy, and believe that as a Masonic scholar he saw the necessity of completing the system by the fabrication of a Royal Arch degree.

It does not therefore follow that because Dunkerley's name does not appear as a member of the new chapter until six months after its formation, he may not have had an important part in its organization. If he was, as there can be no valid doubt, the original fabricator of the Royal Arch of the "Moderns," from whom, except from him, could the original members of the new chapter have received the degree which qualified them to enter upon its organization?

That he appeared later on the scene does not militate against his influence and his quiet work in its formation. There are no records extant to show what he was doing between the time when he invented the degree and that when it was first put into practice by the foundation of a chapter. The leading character in a drama does not always make his appearance in the first act, nor the hero of a novel in the first chapter.

It is more logical to suppose that the inventor of the Royal Arch of the "Moderns" was the founder of the chapter in 1765. But if Dunkerley was not the inventor, who was? History upon the best grounds assigns the invention to him, and to him also I am willing to ascribe the foundation of the chapter, though his name does not appear on its records until six months after its formation.

The chapter did not long continue to hold the position of a private body. In 1766, according to Bro. Hughan,¹ it assumed the rank of a Grand Chapter. This it must have done, just as the lodge at York in 1725 resolved itself into a Grand Lodge. There were no other chapters to unite with it, as the four Lodges did in 1717 to form a Grand Lodge. It simply changed its title and enlarged its functions.

Dr. Oliver places the date of the formation of the Grand Chap-

¹ "Memorials of the Union," p. 8, note.

ter at a later date, that of 1779.¹ This is, however, only an assumption, as he gives no proof of the correctness of his statement, and on a point of Masonic history dependent on the authority of old documents and the correctness of a deduction from them I am compelled to prefer the accuracy and the judgment of Bro. Hughan to those of even the venerable Oliver.

Notwithstanding that the Grand Chapter counted some of the most distinguished "Modern" Masons among its members, it was never officially recognized as a Masonic organization by the Grand Lodge. In 1792 it was resolved that the Grand Lodge has nothing to do with the proceedings of the Society of Royal Arch Masons.²

Still, it met with marked success. In 1796 it had one hundred and four chapters under its obedience and to which it had granted warrants.

Unlike the Grand Chapter of the "Ancients," it was independent in its jurisdiction, being, as has been seen, wholly unconnected with the Grand Lodge. Its presiding officers were called the three Principals, and bore respectively as titles the initials of the names Zerubbabel, Haggai, and Joshua. Thus there was Principal Z., Principal H., and Principal J. This usage has been preserved in the present Grand Chapter of England. It had for its chief Principal Thomas Dunkerley as long as he lived, and for its first Patron, the Duke of Cumberland, who on his demise was succeeded by the Duke of Clarence.

In 1813, on the union of the two Grand Lodges of the "Ancients" and the "Moderns," the Royal Arch degree was recognized as a component part of Ancient Craft Masonry, and the Supreme Grand Chapter was established as one of the powers of English Freemasonry.

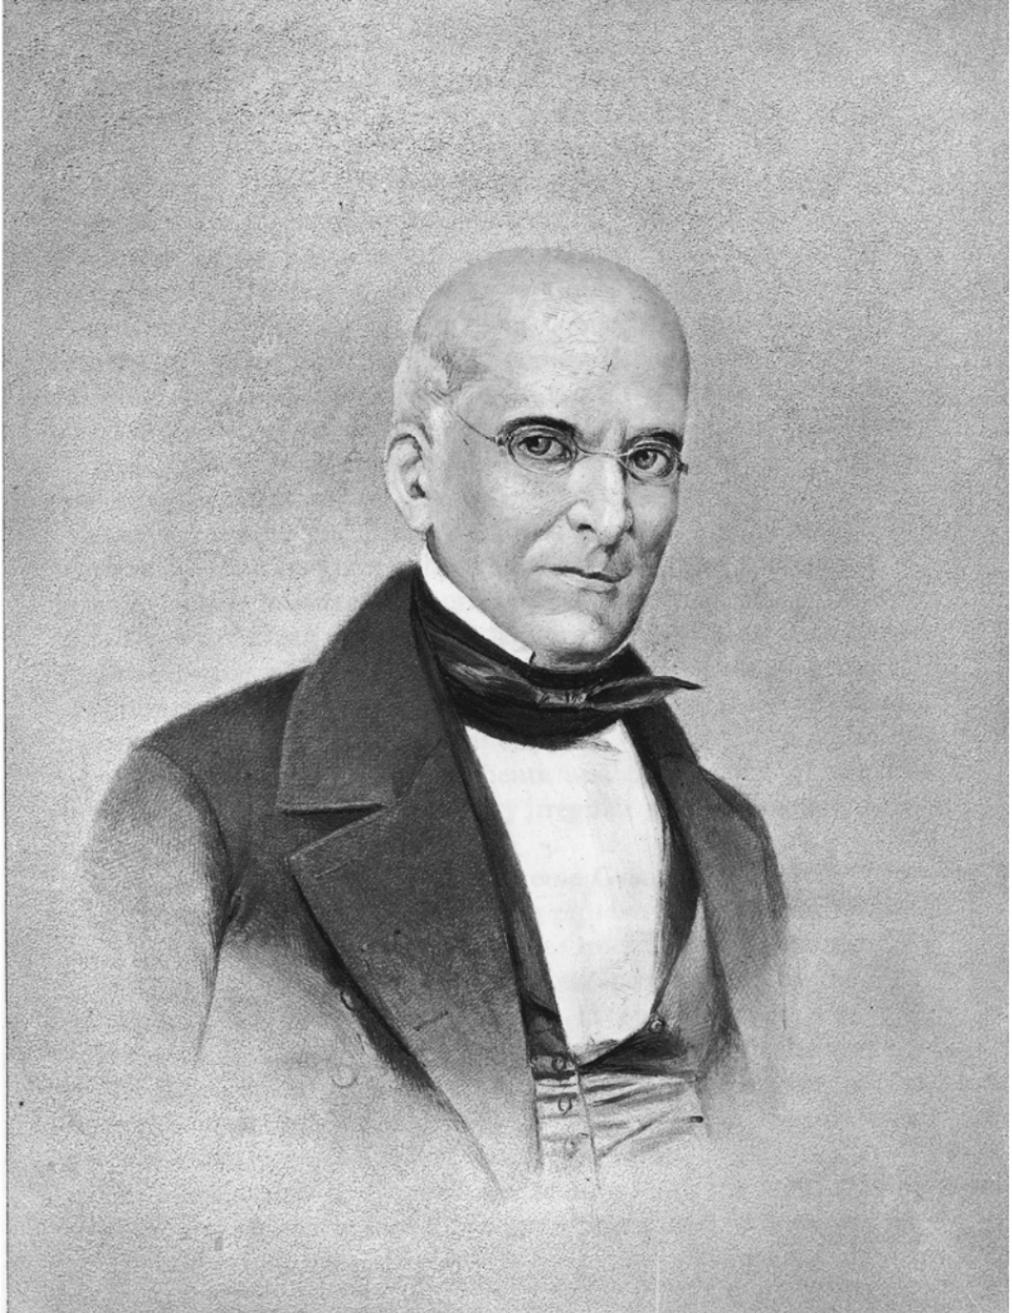

Of the two rituals then in use that invented by Dunkerley, which had been practiced by the "Moderns," was preferred,³ but the regulation of the "Ancients," which closely united the Grand Lodge

¹ "Origin of the Royal Arch," p. 38.

² Hughan presents this fact in his "Memorials," p. 8. The Grand Chapter, he says, was purely a defensive organization to meet the wants of the regular brethren and to prevent their joining the "Ancients."

³ Dunkerley's ritual was Christian in its character, and his principal symbol, the *foundation stone*, was made to allude to the Saviour. In 1834 this ritual was abolished by the Grand Chapter, and a new one, less sectarian in its interpretation of the symbols, was adopted, which still continues in England and in English chapters.

J. M. RAGON

and the Grand Chapter and vested the presiding officers of both bodies in the same persons, was adopted. Hence, the Duke of Sussex, who had been elected the Grand Master of the Grand Lodge, became, by virtue of his office, the chief Principal of the Grand Chapter.

Lyon says that the Royal Arch degree was introduced into Scotland about the middle of the last century, through the medium of military lodges whose members had received it in Ireland.¹ The statement that the degree was first worked in Scotland by the "Ancient Lodge of Stirling" in 1743 in connection with the Knight Templar and other high degrees, is said by Bro. Lyon to be without authentic evidence. But the writer of the introduction to the *General Regulations for the Government of the Order of Royal Arch Masons of Scotland* asserts that the Minute Book of the Chapter from 1743 is still extant.²

About 1800 several Templar Encampments were founded in Scotland by charters granted by a body assuming that prerogative in Ireland. These charters authorized the conferring of the Royal Arch degree. There were other chapters which at that time practiced the degree without a charter.³ The establishment of a Grand Encampment in 1811 by a charter granted by the Duke of Kent, the head of Templarism in England, put a stop to the practice of Royal Arch Masonry in Encampments, and that branch of the institution was for some time in a very irregular position, though there were many working chapters.

But on August 28, 1817, the Supreme Grand Royal Arch Chapter of Scotland was established by the representatives of thirty-four chapters at a General convocation of the Order held at Edinburgh.⁴

The Grand Lodge of Scotland, persistently wedded to the idea that Speculative Freemasonry consists of only three degrees, has always refused to recognize the Royal Arch as a part of the system. At first it prohibited its members from receiving the degree, but as that extreme of opposition has long since ceased, the antagonism now reaches only a quiet, official non-recognition.

The introduction of Royal Arch Masonry into the continent of America, and especially into the United States, will occupy our attention in the following chapter.

CHAPTER XLIX

THE INTRODUCTION OF ROYAL ARCH MASONRY INTO AMERICA

THE Royal Arch degree was introduced into the North American Colonies not very long after its invention or adoption in England.

The Grand Lodge of Ancients granted its first Warrant for a lodge in the colonies in the year 1758.¹ In the same year, as will be seen hereafter, a chapter connected with an Atholl lodge was established. This alone would prove, if such proof were necessary, that the Royal Arch Masonry of Pennsylvania, where it first appeared on this continent, was derived from the "Grand Lodge of England, according to the Old Institutions," and that the degree which was then worked was what is commonly known as Dermott's Royal Arch.

Of course, the degree must have been conferred in a chapter working under a Master's Warrant, as at that time no Grand Chapter had been organized.

The Grand Lodge of Ancients had always granted this privilege to its lodges, and it was maintained up to the early years of the present century by several of the American lodges. Thus as late as January, 1803, Orange Lodge of Ancient York Masons, an Atholl lodge in Charleston, S. C, granted the privilege of its Warrant "for the use of the Royal Arch Chapter of South Carolina."²

The first Royal Arch Chapter in America of which we can find any account, was held in Philadelphia in the year 1758. The author of the *Historical View* prefixed to Pennsylvania *Ahiman Rezon*, says that it was held "anterior" to that year. This is manifestly an error, as the date of the Warrant of the first lodge of the "Ancients"

¹ It is so stated in Gould's "Register of the Atholl Lodges," p. 16, and the fact is confirmed by the recent researches of the Grand Lodge of Pennsylvania.

² "Historical Sketch of Orange Lodge." See Mackey's "History of Freemasonry in South Carolina," p. 471.

in that city, and indeed in the country, was June 7, 1758, and it is evident that no chapter could have preceded the lodge in date of birth, as the former derived its authority from the latter, and worked under its Warrant.

The author of the *Historical View*, which has just been referred to, stated that it worked under the Master's Warrant of Lodge number 3, and that it was recognized by and had communion with a military Chapter working under a Warrant number 351 granted by the Grand Lodge of England, meaning, as the context clearly shows, the Atholl Grand Lodge or the Grand Lodge of the Ancients.¹

There can be no doubt of the truth of the statement that a chapter of Royal Arch Masons was established in Philadelphia about the year 1758 and that it worked under the Master's Warrant of Lodge number 3. Bro. Clifford MacCalla, who is the very best authority on the early history of Freemasonry in Pennsylvania, says that the minutes of this Chapter, which he designates as Jerusalem Chapter number 3, are in existence as far back as 1767, and that they mention prior minutes.²

But it is not easy to reconcile the statement that it held communion with a military lodge, numbered 351, granted by the Atholl Grand Lodge, with the facts of history.

Up to the year 1756 the Atholl Grand Lodge had granted only two military Warrants, numbers 41 and 52, one in 1755 and the other in 1756. In fact, at the end of the year 1757 the numbers on the roll of that Grand Lodge as accurately arranged by Bro. Gould amounted to only 68.³

There was a military Warrant numbered 351, but it was not granted until October, 1810.⁴

Indeed, number 351 is too high for the year 1758 roll of either of the Grand Lodges of England, or of those of Ireland or Scotland. Even in England, the oldest of the four bodies, the numbers had not at that early period gone far into the two hundreds.

What then was this military Lodge, numbered as 351, at a time

¹ "Ahiman Rezon of Pennsylvania," edition of 1825, p. 79.

² "Philadelphia, the Mother City of Freemasonry in America," p. 99.

³ Gould's "Atholl Lodges," p. 16.

⁴ *Ibid.*, p. 102. By a typographical error the number is printed 361 instead of 351, as it should evidently have been.

when no such numbers could have been reached by the existing registrations, and what was this Lodge number 3 on the Pennsylvania roll which held communion with it, and both of which were thus engaged in the propagation of the Royal Arch degree in America?

Bro. MacCalla, referring to the military lodges in Pennsylvania during and before the war of the Revolution, says that "Lodge number 18 was in the 17th Regiment British army." Now in the first official list of the Atholl lodges given in the *Ahiman Rezon* for 1807, we find "18, 17th Regiment of foot," as the third of the military lodges. No date is given for its Warrant, but from its position in the list we may presume that it was one of the oldest lodges. Gould says it was originally warranted as number 237, and he gives the original 18 as having been constituted as a civil lodge at London in 1753. This lodge becoming extinct, the number seems by a system of registration peculiar to the Atholl Masons to have been taken up by the military lodge instead of its original number,

237.

Again this military Lodge number 18 makes its appearance in another official quarter.

C. Downes, Past Master of Lodge number 141, on the registry of Ireland, published at Dublin in 1804, Lists of lodges "according to the 'Old Constitutions' of the kingdom of Great Britain, and also of America, the East and the West Indias, &c." Downes was the printer to the Grand Lodge of Ireland and with its permission had edited the Irish *Ahiman Rezon*. His Lists are therefore possessed of some official authority.

In his List of military lodges he also gives Lodge number 18, in the 17th Regiment, as third lodge in order of sequence as having been warranted by the Atholl Grand Lodge of England.

But he also gives a list of the lodges which had been warranted up to the year 1804, amounting to 65. How many of these had been discontinued, and what was the date of any of their warrants, we can not learn from the List, which gives only the numbers and places and times of meeting.¹

The 8th Pennsylvania lodge in Downes's List is marked as

¹In an article on "Military Lodges," published by Bro. Gould in the "Freemasons' Chronicle," and copied into the "Keystone" (July 31, 1880), he finds, after much research, much difficulty in "disentangling the history of Lodge number 18." The only explanation at all satisfactory, and that not altogether so, is the one given in the text.

"number 18, British 17th Regiment of Foot." The coincidence here apparent would indicate that this was the same lodge as that marked in Downes's, Harper's, and Gould's list of military lodges warranted by the Atholl Grand Lodge of England. By what process it changed its obedience from its Mother Grand Lodge to the Grand Lodge of Pennsylvania, Downes does not inform us.

We have an authentic record that in 1767 there had been and was a military lodge in an Irish regiment stationed at Philadelphia.

The records of Lodge number 3, which have been copied in the *Early History and Constitution of the Grand Lodge of Pennsylvania*,¹ contained the following item:

"Dec. 9, 1767. The majority of (the) Body was of opinion that it would not be proper to admit Bro. Hoodless a member of this or to enter, pass, or raise any person belonging to the army, in this lodge, as there is a lawfull warranted Body of good and able Masons in the Royal Irish regiment."²

So much for the military lodge which is said to have introduced Royal Arch Masonry into the American Colonies, and through whose instrumentality the degree was first conferred in Lodge number 3.

Our next inquiry must be directed to the character and position of this lodge, which, without rhetorical exaggeration, may be well called the Mother of Royal Arch Masonry in America.

The Lists of the Atholl lodges show that the Grand Lodge of the Ancients granted a Warrant for a lodge at Philadelphia in the year 1758. On the Pennsylvania roll this lodge was known as number 2, but in Gould's List it is marked as "No. 69, Philadelphia, 7 June 1758." On June 13, 1761, the Grand Lodge of Ancients granted a Warrant for another lodge, which Gould records as "89, number 1 Philadelphia." This Warrant was, however, lost and another one was issued on June 20, 1764.

It is from the date of this Warrant that the organization of the Provincial Grand Lodge of Pennsylvania is reckoned.

Why the lodge warranted in 1758 should be designated as number 2, while that warranted three years afterward should be desig-

¹ Compiled and published by authority of the Grand Lodge, 1777.

² "Early History," etc., p. 11. The "Royal Irish Regiment" afterward became the 18th on the Muster roll of the British army. See Debrett's "British Imperial Calendar for 1819," p. 137.

nated as number 1, can be accounted for in only one way. There was most probably a deputation accompanying the Warrant for number 2, which deputation must have organized a Provincial Grand Lodge which took the number 1. The *Ahiman Rezon of Pennsylvania*, for 1825, referring to Lodge number 2, says that "the patents to Provincial Grand Masters were usually in force for one year, at the expiration of which, if a Grand Lodge was formed, it elected its Grand Master, Wardens, Secretary and Treasurer. . . . If no Grand Lodge was constituted upon a patent, it expired, and another patent was issued as occasion required."¹

The writer then concludes that "it is probable that no Grand Lodge had been organized upon the first patent issued for Pennsylvania since a second was issued on June 20, 1764, by the Grand Lodge of England to William Ball, Esqr., and others authorizing them to form and hold a Grand Lodge for the then province."²

This conjecture is very plausible. The deputation which accompanied the Warrant for number 69 in Philadelphia may have been intended for a Provincial body, which was not, however, completely organized, but which nevertheless took the number 1, while the lodge which on the registry of the Atholl Grand Lodge of England bore the number 69 was changed on the Pennsylvania roll to number 2. The Provincial deputation which had been appointed in 1758 not having completely fulfilled its functions by the permanent establishment of a Provincial Grand Lodge, another Warrant for that purpose was issued in 1761, and that having been lost on the way, a second was issued in 1764, and the Provincial Grand Lodge was formed. In fact this must have been merely a continuation of the first lodge or deputation, and the Lodge number 69, which had been originally transmuted into number 2, retained that number, and, excepting the Provincial Grand Lodge, we find no number 1 on the registry of Pennsylvania.

But though this deputation of 1758 did not formally and permanently organize a Provincial Grand Lodge, or if it did, has left no record of the transaction, it performed the functions of one by warranting another lodge, which received the number 3.

Of this fact we have the following evidence. When the Grand Lodge of Ancients granted its warrant for a lodge in 1758, no further

¹ "Ahiman Rezon of Pennsylvania," for 1825, p. 67.

² *Ibid.*, p. 68.

notice of Pennsylvania was taken by it until it granted the Warrant numbered 89 on its register in 1761, which being lost was replaced by another of the same tenor issued in 1764, and which Gould calls number 1, at Philadelphia.

Between 1758 and 1764 it granted no more Warrants for the establishment of lodges in Pennsylvania, nor did it ever afterward do so. With the exception of the Warrant issued at first in 1761 and renewed or rather replaced in 1764, Freemasonry in Pennsylvania appears, from the year 1758, to have been controlled solely by some authority within the Province, and from that authority Lodge number 3 must have received its Warrant.

The first act of the Provincial Deputation, or Provincial Grand Lodge, or whatever may have been the character and designation of the authority existing in Philadelphia in the year 1758 was to grant a Warrant for the establishment of another lodge as number 3.

There is no record extant of this Warrant, but the author of the *Early History of the Grand Lodge of Pennsylvania* says that "Lodge number 3 of Philadelphia by tradition dates its warrant about the same time as number 2."¹

This Lodge number 3 is the one which in 1758, with the concurrence and under the instruction of the military lodge in the 17th Royal Irish Regiment, introduced the Royal Arch degree into Pennsylvania and worked it, as all "Ancient" lodges at that time did, under the authority of its Master's Warrant.

The absence of the records of early Freemasonry in Pennsylvania, which were lost or destroyed during the revolution, forces us to trust, more than is desirable in writing history, to conclusions mainly based on conjectures; but the conjectures are reasonable, sustained by the strongest evidence and entirely consistent with facts derived from the very few authentic documents that remain.

We are told in the Pennsylvania *Ahiman Rezon* that other Chapters were afterward established "upon like principles." That is, they were established under the shadow of Master's Warrants.

The writer of the *Historical View of Masonry*, contained in the 1825 edition of the Pennsylvania *Ahiman Rezon*, tells the story of the further progress of Royal Arch Masonry in that State in the following words:

¹ "Early History and Constitution of the Grand Lodge of Pennsylvania," p. 35.

"In November, 1795, an irregular attempt was made, at the instance of one Molan, to introduce innovations in the Arch degree and to form an independent Grand Royal Arch Chapter, under the Warrants of numbers 19, 52, and 67, held in the city of Philadelphia, and a lodge constituted by authority of the Grand Lodge of Maryland, and another holding under the Grand Lodge of Georgia. Chapter number 3 instituted an enquiry into these proceedings, which they declared, after investigation, to be contrary to the established uniformity of the Craft. The Grand Lodge, upon complaint made, unhesitatingly suspended the Warrants of numbers 19, 52, and 67, and having received the report of the committee raised for that purpose, resolved that Molan ought not to be received as a mason by the lodges or brethren under its jurisdiction. The offending lodges, by the mild and firm course of the Grand Lodge, were convinced of their errors, and were received into favor, having their Warrants restored to them.

"Throughout this controversy, the Grand Lodge acknowledged the right of all regular warranted lodges, so far as they have ability and number, to make masons in the higher degrees, but lest differences might exist, or innovations be attempted in such higher degrees, which for want of some proper place to appeal, might create schism among the brethren, they resolved that a Grand Royal Arch Chapter should be opened, under the immediate sanction of the Grand Lodge of Pennsylvania; and that all past and present officers of the Grand Lodge, having duly obtained the degree of Royal Arch, and all past and existing officers of Chapters of Royal Arch masons, duly and regularly convened under the sanction of a warrant from the Grand Lodge of Pennsylvania, to be considered as members of the Grand Royal Arch Chapter; and that all members of the regular Chapters shall be admitted to their meetings, but without the right to vote or speak therein, unless requested."¹

It has, from this record, been maintained that this was the first Grand Chapter established in America, and that Webb was mistaken in giving the priority to that organized at Hartford in 1798.

But the truth is that the Grand Chapter established at Philadelphia in 1795 was not a Grand Chapter in the sense attached to such

¹ "Ahiman Rezon of Pennsylvania," edition of 1825, p. 79.

a body by those who organized at Hartford the Grand Chapter of the Northern States.

The Grand Chapter of Pennsylvania was merely an instrument of the Grand Lodge. That body alone could grant permission to hold a Chapter, and no Chapter could be held unless with the sanction of the Warrant of a lodge, and it was expressly declared that the Grand Chapter was to be opened "under the immediate sanction of the Grand Lodge."

Now all these principles of dependence were repudiated by Webb and his associates. They expressly declared in the very outset of their labors of organization—no matter whether the statement was historically accurate or not—that no Grand Lodge could "claim or exercise authority over any convention or Chapter of Royal Arch masons." In the first constitution which they formed they placed Chapters exclusively under the control of Grand Chapters, and by implication abolished all authority of Grand Lodges over them and at the same time denied the right of any Chapter to work under the Warrant of a Master's lodge.

This system has ever since prevailed in the United States. It was subsequently adopted by the Grand Chapter of Pennsylvania itself.

The Grand Chapter established at Philadelphia in 1795 was only an organization for the more convenient administration of Royal Arch Masonry in the bosom and under the superintendence of the Grand Lodge.

The Grand Chapter established in 1798 at Hartford was, as has been shown, of a very different construction, and based on very different principles of Masonic law.

To the Grand Chapter formed at Hartford in 1798 must therefore in all fairness be given the precedency of date as being the first independent Grand Chapter established in the United States—indeed we may say it was the first in the world, as the Grand Chapters previously established in England were like that of Pennsylvania, dependent instruments of the Grand Lodge.

The credit, however, must be given to Philadelphia of having introduced Royal Arch Masonry into the British Colonies. We have no record of the establishment of a Chapter in any other of the Provinces before the year 1758, at which time, as we have seen, the degree was conferred in a Chapter attached to Lodge number 3,

But during the succeeding years of the 18th century the degree, under various modifications, was introduced into other States, principally by Atholl, or as they were pleased most incorrectly to style themselves, "Ancient York Masons."

The original system inaugurated by the "Ancients" was strictly followed, and as Thomas Smith Webb, the founder of the American system, has said, during all that period "a competent number of companions, possessed of sufficient abilities, under the sanction of a Master's Warrant, proceeded to exercise the rights and privileges of Royal Arch Chapters, whenever they thought it expedient and proper, although in most cases the approbation of a neighboring Chapter was deemed useful if not proper."¹

The degree practiced was that of the Grand Lodge of Ancients from whom it was derived. Virginia was, however, an exception. Whether the English Royal Arch was worked in the early period of Freemasonry in that State is not known. Dr. Dove, the author of the *Virginia Text Book of Royal Arch Masonry*, our best authority on the subject, does not inform us.

Joseph Myers was one of the deputies of M. M. Hayes, who had, under the authority of Stephen Morin, been engaged in the dissemination of the twenty-five degrees of the Rite of Perfection, which was afterward developed into the Ancient and Accepted Rite of thirty-three degrees.

Soon after 1783 Myers removed to Richmond, Va., where, says Bro. Dove, he imparted the degrees of the Rite *Ecossais* to many Master Masons.²

Among these degrees was the Arch of Enoch, which was really Ramsay's Royal Arch. This degree, Dove says, was taught in Virginia until the year 1820, when it was abandoned and Webb's degree, which was the modification of the English system, and which is now universally practiced in the United States, was adopted.

During the latter part of the 18th century several Chapters were organized in Virginia, each of which worked under the authority of Master's Warrant. Such were the Chapters at Norfolk, Richmond, Staunton, and Dumfries. In the year 1808 the first three united in the organization of a "Supreme Grand Royal Arch Chapter," which immediately assumed jurisdiction over the degree in the State.

¹ "Freemason's Monitor," p. 155.

² "Virginia Text Book," p. 91.

The Royal Arch degree was introduced into New York not long after its introduction into Pennsylvania, and most probably by some of the English military lodges, many of which were at that time in the Province.¹

Independent Royal Arch Lodge was warranted in December, 1760. Bro. John G. Barker, the author of the *Early History of Masonry in New York*, says "that the history of this lodge, prior to the year 1784, is involved in obscurity, as is also the derivation of its name."²

But it is evident that the peculiarity of the name refers to the fact of its having been engaged in working the Royal Arch degree. I do not therefore hesitate to place, conjecturally, the introduction of that degree into the Province at a time contemporaneous with the organization of the lodge.

From New York, Royal Arch Masonry extended into other Northern Provinces, and independent Chapters were established which eventually gave birth to the General Grand Chapter.

Chapters were successively formed in different parts of the Province, each acting under the authority of a Master's Warrant. One of the most important of these was Washington Chapter in the City of New York, which, as it will hereafter appear, granted Warrants for the establishment of other Chapters.

In 1798 a Deputy Grand Chapter was formed under the newly adopted constitution of the Grand Royal Arch Chapter of the Northern States, and when in 1799 that body changed its title to that of the "General Grand Chapter," the Deputy Grand Chapter of New York assumed rank and name as a "Grand Chapter."

In the Province of Massachusetts, Royal Arch Masonry was introduced about the year 1769, probably a year or two later.

In that year the Grand Lodge of Scotland granted a Warrant for a lodge under the title of "St. Andrew's Lodge number 82." In the same year, if we may credit the statement of Bro. C. W. Moore,³ "the degree was conferred in Boston in a "Royal Arch

¹ Of the nine lodges engaged in 1782 in the organization of the Provincial Grand Lodge of New York, six were military lodges, attached to different regiments in the British Army.

² *Early History and Transactions of the Grand Lodge of the State of New York*, published by Kane Lodge, 1876, p. 17.

³ "Freemasons' Monthly Magazine," vol. xii., p. 165.

Lodge," which he "thinks" was attached to St. Andrew's Lodge. Subsequent researches have removed all uncertainty on that point.

There is no positive information as to the original source whence the ritual of the degree as it was practiced by the St. Andrew's Chapter was derived. Its introduction has been attributed to Moses Michael Hayes, who is said to have introduced it from France, under the authority of a patent dated December 6, 1778. This statement Bro. Moore declares to be not true,¹ and his close official connection for a long series of years with the Masonry of Massachusetts, certainly makes him a competent judge.

But besides Hayes was one of the Inspectors appointed by Stephen Morin for the propagation of the Rite of Perfection which subsequently became the Ancient and Accepted Rite, and if the degree had been instituted by him, it would have assumed, which it did not, the form of Ramsay's Royal Arch, or the thirteenth degree of that Rite, as it did in Virginia, where Royal Arch Masonry was introduced by Myers, who was one of the collaborators of Hayes.

But according to Moore, the degrees conferred by the St. Andrew's Chapter corresponded in number and name with the degrees which were then conferred in Scotland, and hence he asserts with great plausibility that the system was brought over from Scotland, perhaps at the same time that the Warrant for St. Andrew's Lodge was issued.

The degree had no rapid growth in Massachusetts. In 1798 there were but two Chapters in the State. St. Andrew's at Boston, and King Cyrus's at Newburyport. These two united to form a Deputy Grand Chapter, and in 1799 became the Grand Chapter of Massachusetts, under the new Constitution of the General Grand Chapter.

The history of the introduction of Royal Arch Masonry into Rhode Island presents some interesting facts in reference to the degrees which were at that time conferred preparatory to the Royal Arch.²

In the year 1793 a number of the members of St. John's Lodge number 1, in the city of Providence, met to consult upon the prop-

¹ "Freemasons' Monthly Magazine," vol. xii., p. 165.

² The facts stated in this narrative are derived from the Records of St. John's Lodge, extracts from which were published in "The Warden," a Masonic magazine, printed at Providence, No. IV., September, 1879, p. 23 et seq.

er steps to be taken for the establishment of a Royal Arch Chapter, after consulting with those brethren who were already in possession of the degree.

An agent was accordingly sent to New York, who, on October 5, 1793, returned with a Dispensation issued by Washington Chapter in the city of New York.

Though called in the official records a Dispensation, the words of the instrument show that it was really a Warrant of Constitution. Its date is September 3, 1793.

The brethren proceeded under this Warrant to organize Providence Chapter number 2. This was done on November 23, 1793, with the assistance of certain Royal Arch Masons who had been invited from Newport, and who were members of a Chapter.

As we learn from the records of this Chapter, the essential officers were, a High Priest, King, Scribe, Royal Arch Captain, and Zerubbabel, the latter officer evidently being the one now known as Principal Sojourner. The fact that an inferior office was attributed to Zerubbabel instead of the more exalted station of King, as is now the case, shows that the ritual used in New York and in Rhode Island was different from the present one.

Such a position for the "Prince of the Captivity" is more conformable to the ritual of the Sixteenth degree or Prince of Jerusalem, in the Rite of Perfection which afterward became the Scottish Rite, but altogether incompatible with the functions ascribed to him in the Royal Arch of the present day.

This circumstance would indicate that there is some foundation for the hypothesis that in its early introduction into the American Colonies, Royal Arch Masonry was to a considerable extent affected by the rituals of the *Hautes Grades* or High Degrees, which were brought over from France in 1761 by Stephen Morin as the Agent of the "Deputies General of the Royal Art," for the purpose of "multiplying the sublime degrees of High Perfection."¹

Morin appointed his Deputies, who spread over the West India islands and the continent of North America, and there is very strong evidence that they or some of them exercised an influence in the organization of Royal Arch Masonry in several parts of the country. Charters for Mark Lodges were originally issued by Grand Councils

¹ The language of the Patent issued to Morin.

of the Prince of Jerusalem. The Select degree was one of the honorary degrees conferred by the Inspectors—we have seen that Myers, one of Morin's Inspectors, organized the Royal Arch Masonry of Virginia according to the ritual of the Thirteenth degree—Moses Michael Hayes, who was also an Inspector of the new Rite, was at one time Grand Master of the Grand Lodge of Massachusetts, and as he was a very zealous Mason and a very energetic officer, it can scarcely be doubted that he exercised an influential connection with St. Andrew's Chapter, the first Chapter established in that State—and finally we have a significant fact stated in the records of the organization of the chapter at Providence, which shows the intimate relation which existed at that time between the Royal Arch Masons who founded the Chapter and certain possessors of the High Degrees imported into this country by the deputies and agents of Stephen Morin.

When the Dispensation or Warrant had been issued by Washington Chapter for the holding of a Chapter at Providence, the brethren to whom it had been granted, feeling perhaps incompetent, from their want of skill and experience to undertake unaided the task of organization, invited the assistance of the Royal Arch Masons who resided at Newport to give their assistance in the ceremony. The invitation having been accepted, the lodge met on Tuesday evening, October 29th. But "unavoidable necessity having prevented the attendance of the brethren from Newport, the brethren who had met, agreed to postpone any further meeting until they should arrive." Nearly a month passed before any further steps were taken toward the organization, and it was not until November 23d that the Newport Royal Arch Masons having then made their appearance, the organization was completed.

The evidence of the connection of these Newport brethren with the "High Degrees" is to be found in the following extract from the record of the proceedings:

"Our worthy and respectable Brethren from Newport, viz.: R. W. Moses Seixas, 45th Degree or Deputy Inspector General of Masonry in and thro'out the State, and Master of St. John's Lodge number 1, in Newport, the W. Peleg Clark 28th Degree or Knight of the Sun, and Senior Warden of the Grand Lodge in this State, and the Hon. Thomas W. Moore 28th Degree or Knight of the Sun and Consul of his Britannic Majesty in this State, having this

Day cheerfully attended at the Council chamber in this Town, agreeably to invitation, for the express Purpose of assisting in the Formation of a Royal Arch Chapter, the Brethren of the Royal Arch here, with the brethren aforesaid and our worthy Brother, Samuel Stearns, 7th Degree, R. A. (who also attended by Invitation), proceeded agreeably to the Directions in that case provided to open and consecrate a Royal Arch Chapter, by the name of 'Providence Chapter of Royal Arch Masons' under the Dispensation from the M. W. Washington Chapter of R. A. Masons of New York, etc."¹

The figure "45" is evidently either an error of the pen in the manuscript record or of the press in the printed copy in *The Warden*. It should be "43." In David Vinton's *Short Historical Account of Masonry* appended to his *Masonic Minstrel*, which was published at Dedham, in Massachusetts, in the year 1816, will be found a list of the degrees said to be conferred in Charleston, New York, and Newport. The number is 43, and the last, or 43d, is Sovereign Grand Inspector-General. The number is made up by adding to the thirty-three degrees of the Scottish Rite ten others, embracing the degrees of the American Rite and several Orders of Knighthood. In this enumeration the Knight of the Sun is made the 38th, and therefore I suppose that the number "28" prefixed to that degree in the extract above quoted is also an error. This enumeration of 43 degrees was never accepted nor used by the legitimate bodies of the Scottish Rite, but only by some spurious associations which then existed. Newport was the locality of one of these associations, and Moses Seixas was its chief. This does not, however, affect the truth of the statement that the possessors of the "High Degrees," whether legally or illegally obtained, sought, in the infancy of Royal Arch Masonry in this country, to take a part in its institution and in giving complexion to its ritual.

There is another record in these minutes of the proceedings of Providence Chapter which is of far greater importance, as it shows, officially, the number, names, and sequence of the degrees which in the year 1793 and for some time before were considered as essentially preliminary to the reception of the Royal Arch.

At the meeting on October 5, 1793. when the Dispensation was

¹ Proceedings of Providence Chapter, published in "The Warden," No. iv., p. 24.

received from New York, we find the following proceedings recorded:

"Our M. W. having suggested that in order to confer the R. A. Degree it would be necessary that the Brethren who were Candidates for the same should previously be initiated in Three Degrees which were between that of Master Mason and the R. A., and to accomplish the business as soon as possible, proposed the immediate opening of a lodge for that purpose, which was done accordingly.

"Present, M. W. DANIEL STILLWELL, M.

W. JONA. DONNISON, S. W.

W. JACOB SMITH, J. W.

BR. WILLIAM MAGEE.

And the Brethren whose names here follow after due preparation were regularly initiated in the degrees of Master Mark, Past Master, and Most Excellent Master."

This record conclusively proves that Thomas Smith Webb was not the inventor of the Mark and Most Excellent degrees, an opinion that has been entertained by several Masonic writers. Webb was not initiated into the symbolic degrees until about the year 1792; certainly not before, for having been born in October, 1771, he was not qualified by age to receive those degrees at an earlier period. The Royal Arch degree he of course obtained at a still later date, and it is certain that in October, 1793, he could not have been competent by skill or experience to invent a ritual, nor could he have had influence enough to establish it.

All that can justly be ascribed to him is that in 1798, and in the subsequent years in which he was engaged in teaching a ritual, he modified the degrees of the Chapter, as well as those of the lodge, so as to give them that permanent form which they have ever since retained.

But though it appears very satisfactorily from this record that about the year 1793 the system of degrees given in a Royal Arch Chapter was well settled in the Northern States, at least in New York and in New England, yet in other parts of the United States and in Canada there remained for a long time, even to the early years of the 19th century, a great diversity in the names and number of the preparatory degrees.

In Philadelphia, where Royal Arch Masonry made its first ap-

pearance, having been derived from England through a military lodge, warranted by the Ancient Masons, the system pursued by the Atholl Grand Lodge appears to have adopted, and the Royal Arch immediately followed the Master's degree. Such was the case in Royal Arch Lodge number 3, whose minutes, as far back as 1767, have been preserved.¹

This lodge was so styled because it conferred the Royal Arch degree as well as the three symbolic degrees. In its minutes, so far as they have been published, we shall find no allusion to any preparatory steps. Indeed, the only reference to the degree in the earlier minutes is on December 3, 1767, when the important admission is made that the initiation into the symbolic degrees of a candidate who had been Entered, Passed, and Raised by three Royal Arch Masons acting without a Warrant was lawful.² There is no evidence elsewhere, either in England or America, that this prerogative was ever claimed or admitted for the possessors of the Royal Arch degree.

It was, however, from the earliest period made the qualification of the Royal Arch degree that the candidate should have passed the chair either by election or by a dispensation from the Grand Master.

We learn from the minutes of Jerusalem Chapter number 3 that in 1783 the Royal Arch as given in Pennsylvania differed so much from that conferred in Scotland that Bro. George Read, coming from the latter country, where he had been made a Royal Arch Mason, "not being able to make himself known in some of the most interesting points, he was (in consequence of his certificate) granted the privilege of a second initiation." Bro. Charles E. Meyer, when quoting this extract from the Minutes, in his *History of Royal Arch Masonry and of Jerusalem Chapter number 3*, as a proof that the rituals of Scotland and Pennsylvania were not alike, says: "It would be interesting to know what these points were that Bro. Read did not possess."

¹"See Early History and Constitutions of the Grand Lodge of Pennsylvania," Part I., p. 11.

²"It appearing by good authority that Bro. John Hoodless has been *duly* and *lawfully* entered, passed and raised at Fort Pitt in the year 1759 by our brethren, John Maine, James Woodward and Richard Sully, all Royal Arch Masons."—Minutes of Royal Arch Lodge, No. 3.

I think it very probable that there was a difference in the rituals of the two countries at that time, as there is at the present day. But the proof of it from this record is not positive, since the question may very naturally arise, whether the difficulty in this case arose from the difference of ritual or from the ignorance or forgetfulness of the candidate, who had possibly not retained in full the lesson which he had been taught.

In May, 1795, we have the first record of the adoption of the Mark as a preparatory degree, though Bro. Myers thinks it was doubtless previously conferred as a side degree.

The first record of the Most Excellent Master's degree in the minutes of Jerusalem Chapters is on November 5, 1796, and from that time the three preparatory degrees have been conferred in Pennsylvania as they are in the other States.

In Virginia, the Royal Arch was introduced as we have already seen by Myers, and was not the degree practiced either by the Ancient Masons of England or by the Chapters of this country. It was the Thirteenth degree or Royal Arch of Solomon, contained in the series of degrees of the Rite of Perfection. Dislocated from its proper place in the original Rite to which it belonged, it was made to follow the Third degree, without the interpolation of any preparatory step.

Subsequently the Virginia Chapters introduced preliminary degrees, derived from other sources. In the minutes of the Grand Chapter, as late as 1808, we find references to the degrees of "Most Excellent Master," and of "Arch and Royal Arch Excellent and Super-Excellent Masons."¹

In Connecticut all the Chapters except one had derived their Warrants from Washington Chapter of New York, and necessarily adopted the system of degrees which was practiced by it and by the Chapters which it established. These degrees, as we have already seen in the instance of Providence Chapter in Rhode Island, were the Master Mark, Past and Most Excellent Master as preliminary to the Royal Arch.²

¹ Dove, "Royal Arch Text Book," p. 132.

² There was not, however, absolute uniformity. According to Wheeler ("Records of Capitular Masonry in Connecticut," p. 21), the minutes of Solomon Chapter No. 5 at Derby contain no notice of the Past Master's degree until January, 1796, and the Mark and Most Excellent Master are not mentioned until a later period.

But in Vanden Broeck Chapter, at Colchester, which was warranted in 1796 by the Grand Chapter of New York, the names and sequence of the preparatory degrees was as follows: Mark Master, Excellent Master, and Super-Excellent Master. In 1800 it conformed to the system which has been established by the General Grand Chapter. Excellent Master was exchanged for Past Master, and Super-Excellent for Most Excellent.¹ It is probable that the change was rather in the nomenclature than in the ritual.

We have already seen that the names and ranks of the officers of Chapters in the 18th century differed from those now used. For instance, Zerubbabel, who now occupies one of the prominent places in our modern ritual, was formerly placed at the bottom of the list.

The by-laws of Hiram Chapter, at Newtown, which were adopted March 3, 1792, give the following succinct account of the duties of these officers, and throw considerable light upon the ritualistic history of the time:

"It shall be the duty of the High Priest to preside at every meeting, to direct the business and to give occasionally a lecture; of the King to preside in the absence of the High Priest, and to assist him in his duty; of the Scribe, to preside in the absence of both, to cause the Secretary to enter in a fair and regular manner the proceedings of the Chapter in a book provided for that purpose, to summons the members for attendance at every regular and special meeting and also to administer the obligation; of Zerubbabel, to superintend the arrangements of the Chapter; of the Royal Arch Captain, to keep watch at the Sanctuary; of the three Grand Masters, to watch the vails; of the Treasurer, to receive the monies, to keep an account thereof and to pay none but on the warrant of the High Priest, and to render an account at the meeting previous to the annual election; of the Secretary, to keep the minutes under the direction of the Scribe, to receive the fees for admission, and to pay the same to the Treasurer; of the Clothier, to provide and to take care of the clothing; of the Architect, to provide and take care of the furniture."²

The Royal Arch was probably introduced into many of the Southern States, as it had been into the Northern, either by possessors of the degree coming direct from England, or by military

¹ "Records of Capitular Masonry in Connecticut," p. 24.

² By-laws of Hiram Chapter, Article VIII. See Wheeler's "Early Records," p. 10.

lodges in the British army, and which held their Warrants from the Grand Lodge of the Ancients.

Chapters were, however, not organized as independent bodies, but the degree was, until some time after the beginning of the 19th century, conferred both in South Carolina and Georgia, and, I think, also in North Carolina,¹ in Chapters dependent on and deriving their authority from Master's Warrants.

Many years ago, while investigating the history of Royal Arch Masonry in South Carolina, I was led to make the following statements, the correctness of which I have since had no reason to doubt.²

I have in years past made the acquaintance of several Royal Arch Masons in the upper part of South Carolina, who had received their degrees in Master's lodges. The long period which had elapsed since their withdrawal from the active pursuits of Freemasonry, and the imperfection of memory attendant on their extreme age, prevented them from furnishing me with all the particular information in reference to the ritual which I desired, but I learned enough from my frequent conversations with these Patriarchs of the Order (all of whom must long since have succeeded to their heritage in the Celestial Lodge) to enable me to state, positively, that in the upper counties of the State, at as late a period as the year 1813, the Royal Arch degree was conferred in Master's lodges. The same condition of things existed in the neighboring State of Georgia.

The manuscript "Minutes of Royal Arch Chapter number 1, under the sanction of Forsyth's Lodge number 14," are now, or were, some years ago, in the Archives of the Grand Chapter of Georgia. For an examination of these interesting records I was indebted to the kindness of the Grand Secretary, Comp. B. B. Russell.

The Chapter met in the City of Augusta, and the Minutes, to which I shall have occasion again to refer, are restricted to the year 1796.

These records state that the chapter at Savannah, having announced its intention to apply to the Grand Lodge of Georgia for

¹ The first warrant for an independent chapter in North Carolina was granted in 1808 by the Grand Chapter of Virginia to "sundry Royal Arch Masons" in Bertie County. But the petition was recommended by the Lodge at Windsor, and by the Master of the Lodge at Winston. The Royal Arch Masons who signed the petition had, it is to be supposed, previously received the degree in these Lodges. Dove, "Royal Arch Text Book," p. 122.

² Mackey's "History of Freemasonry in South Carolina," 1861, p. 471.

a dispensation or warrant, a letter was written to the brethren at Savannah by the chapter at Augusta on May 27, 1796, in which the following declaration appears:

"If there is any rule or by-law that requires a Royal Arch Chapter to apply for a special dispensation or Warrant, it is unknown to us. We conceive that the Warrant given to Forsyth's Lodge was sufficient for the members thereof to confer any degree in Masonry agreeable to the ancient usages and customs."¹

The same usage was pursued at the same time in South Carolina, where, as has been previously stated, Orange Lodge number 14 in 1796 adopted a resolution to "sanction the opening of a Royal Arch Chapter under its jurisdiction, and again in January, 1803, resolved "that the privilege of the Warrant of this lodge be granted for the use of the Royal Arch Chapter of Charleston."²

That this usage was not confined to the Atholl lodges is seen from the fact that while Orange Lodge in South Carolina was a lodge of "Ancient Masons," all the lodges in Georgia were "Moderns," the Atholl Grand Lodge of England never having extended its jurisdiction over that State nor organized any lodges in it.

The first Chapters in these States, under the constitution of the General Grand Chapter, were established in 1805 at Beaufort in South Carolina and at Savannah in Georgia.

The Grand Chapter of the former State was formed in 1812; that of the latter in 1816.

But reverting to the subject of the early ritual of Royal Arch Masonry and to the differences which prevailed toward the end of the 18th century in the names and character of the degrees, we shall meet with some interesting information in these Minutes of the Royal Arch Chapter at Augusta.

The business of electing candidates for the Royal Arch having been accomplished in an informal meeting of Royal Arch Masons. a Master Mason lodge was opened, when, the qualification for exaltation being to "pass the chair," they were made what are now called "Virtual Past Masters."

We find this in the records of the first meeting of the Chapter of which the following is an exact transcript made by me from the original manuscript.

¹ "MS. Minutes of Forsyth's Royal Arch Chapter."

² "Historical Sketch" appended to By-laws of Orange Lodge, p. 4.

"At a meeting of the subscribers, Royal Arch Masons at Forsyth's Lodge room the 29th February, 1796.

"Read a petition from Brothers Joseph Hutchinson, William Dearmond, and John McGowan, Master Masons of Forsyth's Lodge, praying to become Royal Arch companions; and the same being agreed to, a Master's lodge was then opened.

"Present: Thomas Bray, Master; Thomas Davis, S. W.; D. B. Butler, J. W.; Joseph Hutchinson, Tyler; William Dearmond, John McGowan.

"Brothers Hutchinson, Dearmond, and McGowan were regularly passed the chair and obtained the degree of Past Master, and returned thanks for the same. The lodge was then closed.

"A Royal Arch Chapter was then opened in ancient form.

"Present: Thomas Bray, H. P.; Thomas Davis, C. S.; D. B. Butler, K.

"Bro. Hutchinson (attending) received the preparatory degrees; also Brothers Past Masters Dearmond and McGowan. They were then in rotation raised to the super-excellent degree of Royal Arch Masons, and returned thanks for the same."

Subsequent minutes are of the same character, except that the election of the candidates took place in a Master's lodge and not as in the first in an informal meeting of Royal Arch Masons. But, of course, we are to suppose that all the Master Masons present were not only Past Masters but also Royal Arch Masons.

But what were the preparatory degrees? That question is answered by the Minutes of November 29, 1796, where the names of these degrees are for the first time given. The record is as follows:

"At an extra meeting of Forsyth's Lodge, convened by the order of the W. M. and held at the court-house on Tuesday 29th November, 1796.

"Present: Thomas Bray, Master; Thomas Davis, S. W.; William Dearmond, J. W. *pro tem*.

"A Master's Mark lodge was opened for the purpose of conferring the degrees of Fellow-Craft Mark and Master Mark on Brothers John McGowan, Lawrence Trotti, and John B. Wilkinson, when they, attending, received the same and returned thanks to the lodge; which was then closed. A Past Master's lodge was then opened.

"Present: Thomas Bray, M.; Thomas Davis, S. W.; William Dearmond, J. W. *pro tem*.; John McGowan.

"The lodge was opened for the purpose of conferring the degree of Past Master on Brothers Lawrence Trotti and John B. Wilkinson, when, they attending, were regularly passed the chair and obtained the degree of Past Master, and gave thanks for the same. The lodge was then closed in ancient form. The Royal Arch Chapter was then opened.

"Present: Thomas Bray, H. P.; Thomas Davis, C. S.; John McGowan, K.; William Dearmond, R. A. C.

"The minutes of the last Chapter were read. The M. E. H. P. informed the companions present that the Chapter was called for the purpose of conferring the Super-excellent degree on Brothers Lawrence Trotti and John B. Wilkinson, who were then attending. Bro. Trotti was then duly prepared and received the preparatory degree of R. M. and R. A., also Brother Wilkinson. They were then raised to the super-excellent degree of Royal Arch Mason, and returned thanks. The Chapter was then closed by order of the M. E. H. P."

These records supply us with several interesting and important facts relating to the ritual and the organization of Royal Arch Masonry in America about the close of the 18th century.

The Chapter degrees were then, as has been already shown from other sources, conferred under the sanction of the Warrant of a Master's lodge, but the body in which the Royal Arch degree was given was called a Chapter.

Nine Royal Arch Masons were not then deemed necessary to the opening of a Chapter or the conferring of the degree.

The only officers mentioned are a High-Priest, Chief Scribe, King, Royal Arch Captain, Treasurer and Secretary, and the Scribe appears to have taken precedence of the King. The officer called "Zerubbabel" in the Northern Chapters, is not mentioned in the Southern. In the latter it is probable that the same officer was called the "Royal Arch." The Royal Arch Captain could not have supplied his place, for both officers are recorded in the Minutes of the Providence Chapter in Rhode Island. The absence of an officer called "Zerubbabel" in the Southern Chapters, while it is found in all Northern ones, would evidently indicate some difference in the rituals of the two sections of the country. It is also significant on this point, that in the records of the Chapters at Augusta, no mention is made of the three Grand Masters of the Vails. They are in

cluded in the list of officers of all the Chapters in Connecticut which derived their Warrants and, we may suppose, their rituals from the Washington Chapter in New York.

It was always deemed an indispensable qualification for the reception of the Royal Arch degree that the candidate should be a Past Master. This practice, established in England at the origin of the degree, was followed by all the Chapters in America. As the restriction of the degree to those only who had presided for twelve months over a Symbolic lodge and thus become "Actual Past Masters" would have circumscribed the number of candidates within a very narrow and inconvenient limit, the ceremony of passing the chair was invented, by which the candidate became a "Virtual Past Master." This usage, which was the real origin of what is now called the Past Master's degree, was adopted by all the American Chapters, and thus the earliest records of the Augusta Chapter show that each person before being raised to the degree of Royal Arch was made to "pass the chair."

At first, as is shown by the minutes of February 29, 1796, the ceremony was performed in a Master's lodge. The same usage was observed at several subsequent meetings, but on December 26, 1796, for the first time it is recorded that the Master's lodge was closed and a Past Master's was opened for the purpose of conferring what had then become, not a mere qualification, but a preparatory degree.

Other preparatory degrees are mentioned in the earliest Minutes, but their names are not given until a later period. From the later minutes we learn what these degrees were. They are recorded in the November minutes as having the following names and being given in the following order:

Past Master, Fellow-Craft Mark, Master Mark, R.M., and R.A. These last two degrees are never recorded otherwise than by their initials, but we have every reason to believe, from other authorities, that they were Royal Master and Royal Ark, or Royal Ark Master.

Samuel Cole, writing in 1826, says of these two degrees that "they are considered as merely preparatory and are usually conferred immediately before the solemn ceremony of exaltation." Cole's work received the sanction of the Grand Lodge of Maryland, and it is hence evident that these two degrees were at one time

conferred in the Chapters of the State. They were not known to or practiced in the chapters of the Northern States.

It will be noticed also, as a further evidence of the want of uniformity in the rituals of the 18th century, that the Minutes of the Chapter at Augusta make no reference to the Most Excellent Master's degree, which from an early period was always conferred as a preparatory step to the Royal Arch in the Northern States.

Passing over from the United States to Canada, we shall find the Royal Arch ritual at the close of the 18th century in another but still confused condition.

In the year 1856 the members of Ancient Frontenac Chapter, attached to the St. John's Lodge number 491, English Register, situated at Kingston in Canada, published a history of the Chapter from its organization. From this little but interesting work may be gleaned a very satisfactory statement of the character and condition of Royal Arch Masonry at the end of the 18th and the beginning of the 19th century.

Ancient Frontenac Chapter, which is or was the old Chapter in Canada West, was established at Freemasons' Tavern, in the town of Kingston, on June 7, 1797, under the sanction of a Warrant which had been granted to Lodge number 6 on November 20, 1795, by R. W. William Jarvis, at that time Provincial Grand Master of Canada, under the Atholl Grand Lodge of England.

Master's lodges in Canada, as in the neighboring United States, assumed the right to hold Chapters for conferring the Royal Arch degree. It was a right always sanctioned by the usages of the "Ancients" and tolerated by the "Moderns," nor ever denied until after the organization of the General Grand Chapter at Hartford. As late as February, 1806, at a convocation held in Kingston a charge was preferred against a member of Frontenac Chapter of "unmasonic conduct in striving to separate the Holy Royal Arch Chapter from the body of number 6."

Until the year 1809, the three principal officers of the Chapter were designated as "1, High-Priest; 2, Solomon, King of Israel; and 3, Hiram, King of Tyre." Judging by this, we must conclude that the ritual used in Frontenac Chapter differed very materially from all the various systems which prevailed at the time in other parts of America.

The earliest records of the Chapter do not show any recognition

of preparatory degrees. The "Most Excellent" was first conferred on April 17, 1807, and the "Mark" on July 20, 1818. These degrees were not, however, even then obligatory, but appear to have been taken or not, at the action of the candidate; and as there was an attendant expense, few of the brethren availed themselves of the opportunity of receiving them. The Past Master's was, however, a prerequisite qualification toward exaltation, and, as elsewhere, it was always conferred in the Master's lodge to which the Chapter was attached.

Up to the end of the last century, many candidates were exalted when only *seven* Royal Arch Masons were present, the mystical number *nine* not being then required to constitute a quorum for conferring the degree.

Capitular Masonry seems to have been separated in Canada from Lodge Masonry in 1806, for on January 18th in that year a decision was received from the Provincial Grand Master for holding a Chapter at Kingston, which, says the pamphlet from which I have been quoting, was "the first step towards this Chapter working under a warrant separate from that of the Craft lodge."

On February 10, 1818, the Grand Royal Arch Chapter of Upper Canada was established, and on March 25th of the following year Frontenac Chapter number 1 received its Charter as one of its constituents.

The extracts given in the preceding pages, from the records of Chapters working at the close of the last and the beginning of the present century, have been sufficient to show that there prevailed at that time, in the different parts of the American Continent, a very confusing variety in the ritual of the Royal Arch and in the number of preparatory degrees, which clearly demonstrates that the conflicting systems must have been derived from different sources.

What these sources were it is impossible to precisely say, at least in every instance, in consequence of the unavoidable scantiness of the records. The general drift of history leads us to believe that among these sources were the Grand Lodge of Ancients, in England, and at a later period the Grand Lodge of Moderns, both of whom disseminated the degree through their military lodges, the Grand Lodge of Scotland, or rather the Royal Arch Masons of that kingdom, who practiced the degree without the recognition of their Grand Lodge, and as in Virginia and the Southern States the pos-

sessors of the "Sublime degrees," as they were called, which had been introduced into this country from France by Stephen Morin and his emissaries or deputies.

The result of borrowing rituals from so many different sources inevitably led to a deplorable diversity in the ceremonies, which led the Royal Arch Masons in some of the Northern States to attempt the laying of a firm foundation on which a uniform system might be established, and the constitution of a superintending authority which should maintain that uniformity, and give to Capitular Masonry a symmetry and shapeliness which should secure to it a permanence and success such as had been previously given to Craft Masonry by the ritualistic labors of Desaguliers and his associates in the second and third decades of the 18th century.

This work of reformation and of purification, in which the dross was rejected and the pure ore only retained, was finally accomplished by the institution of the General Grand Chapter of the United States, which was one of the most important events in the Masonic history of the United States.

To this event we must therefore next direct our attention. But the extent and interest of the subject demand a separate chapter for its consideration.

CHAPTER L

THE GENERAL GRAND CHAPTER OF THE UNITED STATES

S the system of Royal Arch Masonry which is practiced in the United States of America is really indebted to the organization of the General Grand Chapter for its existence and popularity, no history of that body could be complete without some account of the Masonic life of Thomas Smith Webb, who was the founder of both the system and the General Grand Chapter.

I shall therefore precede the history of the origin of the General Grand Chapter by a brief sketch of the Masonic services of that distinguished ritualist.¹

Thomas Smith Webb was the son of English parents who had emigrated to this country a few years before his birth, and settled at Boston, in the State of Massachusetts, where he was born, on October 13, 1717.

Having received an elementary education in the public schools, he was bound as an apprentice to the art of printing, or perhaps of book-binding. There is some uncertainty about this question, but the testimony preponderates in favor of the former. It is, however, not material as, in after life, he did not pursue either calling.

Having soon after removed to Keene, in New Hampshire, he there married, and about the year 1792 was initiated in the primary degrees of Freemasonry.

Subsequently he removed to Albany in New York. It is probable that he there received the higher degrees, as we find him, while residing there, engaged in the establishment of a Chapter of Royal Arch Masons and a Commandery of Templars. We may also sup-

¹In "Mackey's Encyclopædia of Freemasonry" will be found a copious memoir of Webb, from which, as the creation of my own pen, I have not hesitated to borrow the materials and indeed much of the language of the present sketch.

pose that while living in Albany he became acquainted with the Ineffable degrees of which Albany was an early seat.

It was about this time that Webb commenced his career as a Masonic ritualist and teacher. In 1797 he published the first edition of his *Freemasons Monitor; or Illustrations of Masonry*.¹ In the Preface to this work he acknowledges his indebtedness to Preston for the observations on the first three degrees. But he states in his Preface that he has made an arrangement of the lectures which differs from that of Preston, because the latter's distribution of the sections is not "agreeable to the present mode of working."² If other proof were wanting this would be enough to show that the "Prestonian work," as it has been called, differed from that then practiced in the United States, and ought to be an answer to those who at a later period have attempted to claim an identity between the ritual and lectures of Webb and those of Preston.

About 1801 he removed to Providence, R. I., and commenced the manufacture of wall-paper on an extensive scale. But he did not abandon his labors in the field of Speculative Masonry. By invitation he became a member of St. John's Lodge number 2, of Providence. He passed through the various grades of office and was elected in 1813 Grand Master of the Grand Lodge of Rhode Island.

His labors in the constitution of a Grand, and afterward a General Grand Chapter, will be hereafter referred to.

While continuing his interest in the manufacture in which he was engaged he did not neglect his Masonic labors, but in 1816 visited the Western part of the United States and appeared to have been actively employed in the organization of Chapters and Encampments.

He died at Cleveland, O., where he was on a visit on July 6, 1819, and was buried with Masonic honors. The body was subsequently disinterred and carried to Providence, where it was reinterred by the Grand Lodge of Rhode Island.

¹ This edition is very rare. The title-page, in a copy now lying before me, is as follows: "The Freemasons Monitor; or Illustrations of Masonry: In two Parts. By a Royal Arch Mason, K. T.—K, of M.—&c, &c. Printed at Albany, for Spencer and Webb, Market street, 1797," p. 284.

² "The observations upon the first three degrees are principally taken from Preston's 'Illustrations of Masonry,' with some necessary alterations. Mr. Preston's distribution of the first lecture into six, the second into four, and the third into twelve sections, not being agreeable to the present mode of *working*, they are arranged in this work according to the general practice." First edition. Preface.

As to Webb's Masonic character and services, I see no reason to say otherwise than what I have already said on a former occasion.

His influence over the Freemasons of this country is to be ascribed almost wholly to his personal communication with them and to his oral teachings. He has made no mark in Masonic literature of any importance. His labors and his reputation as an author are confined to a single work, and that one of but little pretension. It is, indeed, only a meager syllabus of his Lectures. He seems, though the author of a Masonic system now universally practiced in the United States, to have been but very inadequately imbued with the true philosophical spirit of symbolism. He was an able workman of the ritual which he had invented, and an effective teacher, and to this he owed his popularity. The deficiencies of his system are to be regretted, but Webb undoubtedly deserves commendation for his devotion and perseverance in the establishment of a system of ritualism which has been productive of such abundant fruit.

The Freemasons of America have generally attributed to him the invention of the preliminary degrees of the Chapter. But of this fact we have no satisfactory evidence, while there is much to the contrary. It has been seen in a preceding chapter that the Mark and Past degrees, as well as the Most Excellent, though probably under a different name, had been conferred in Chapters before Webb had been exalted in Albany to the Royal Arch.

But what Webb really did, was to change the rituals of these degrees and to give to them the form which is now universally adopted in the Chapters of this country.

For instance, the Mark Master's and the Most Excellent Master's songs, which now constitute essential parts of the working of those degrees, and are indispensably connected with their most important ceremonies, were composed by him and first published in his *Free-Masons Monitor*. They could therefore have been introduced into the work only after his composition of them.

In short, Webb can be deemed the founder of what is now called the "American Rite" only in so far that he modified the degrees which had previously existed, and gave to them not only a new and improved form, but established them in a legitimate sequence which has ever since been recognized by the constituted authorities.

Previous to his teaching, there was no regularity in the management of the preliminary degrees. In some Chapters they were con-

ferred as preparatory to the Royal Arch; in others they were omitted, and the Royal Arch immediately followed the Third degree. For the permanent regularity now existing, we are certainly indebted to Thomas Smith Webb.

With this brief sketch of the Masonic life of this popular ritualist, we are now prepared to direct our attention to that portion of his labors which were especially given to the establishment of Royal Arch Masonry on a plan peculiar to this country.

The supplement of the Master's degree, which had been introduced by the Seceders into the English system, about the middle of the last century, was not long after imported into this country. This importation has been generally attributed to the military lodges which worked under the *régime* of the Atholl Grand Lodge, and which had received, at the time of their constitution, the instructions and the privileges of the Royal Arch.

It has been seen that the first American Chapter was instituted at Philadelphia in 1758, and that the degree had been received from an English military lodge, at that time stationed in that city.

At a somewhat later period in the century the Royal Arch degree was conferred in many lodges in the United States, under a Master's Warrant. This custom continued for several years to be observed in the Southern States, where distinct Chapters were unknown until the 19th century.

But in the Northern States, the control of the Royal Arch was assumed by independent Chapters at an earlier period.

From the records of the General Grand Chapter it appears that St. Andrew's Chapter was instituted at Boston, in 1769; King Cyrus Chapter at Newburyport, Mass., in 1790; Providence Chapter at Providence, R. I., in 1793; Solomon Chapter at Derby, Conn., in 1794; Franklin Chapter at Norwich, another of the same name at New Haven, Conn., and Hudson Chapter at Hudson, N. Y., in 1796.¹

Temple Chapter at Albany, N. Y., is mentioned in the Proceedings of a convention held in 1797, and was probably instituted at an earlier period.

On October 24, 1797, a convention of Royal Arch Masons was held in Boston, for the purpose of forming a Grand Chapter.

At this convention delegates from three Chapters were present:

¹ "Compendium of Proceedings of the General Grand Chapter from 1797 to 1856," p. 8.

St. Andrew's, of Boston; Temple, of Albany, and King Cyrus, of Newburyport.

This convention, probably in consequence of the small number of Chapters represented, did no more than issue a circular addressed to the various Chapters in the Northern States, recommending a future meeting to be held at Hartford.

In this circular the delegates at Boston enunciated the principle which has since been universally accepted as the law of Royal Arch Masonry in the United States; namely, that "no Grand Lodge of Master Masons can claim or exercise authority over any convention or Chapter of Royal Arch Masons, nor can any Chapter, although of standing immemorial, exercise the authority of a Grand Chapter."¹

On January 24, 1798, a convention of delegates from seven Chapters assembled at Hartford, in the State of Connecticut.

At this convention the following Chapters were represented: St. Andrew's, of Boston; King Cyrus, of Newburyport; Providence, of Providence; Solomon, of Derby; Franklin, of Norwich; Franklin, of New Haven; and Hudson, of Hudson.

The States represented were, therefore, Massachusetts, Rhode Island, Connecticut, and New York.

It was then unanimously resolved that the delegates should establish a Grand Chapter for the States of New Hampshire, Massachusetts, Rhode Island, Connecticut, Vermont, and New York, to be denominated "The Grand Royal Arch Chapter of the Northern States of America."²

On the next day, delegates from Temple and from Horeb Chapter, both of New York, presented their credentials. These nine Chapters then proceeded to the organization of a Grand Chapter.

On January 26, 1798, a constitution was adopted and immediately afterward the officers were elected.

The preamble to this constitution ordains and establishes the body as "The Grand Royal Arch Chapter for the Northern States of America," a title under which jurisdiction was assumed over the States of New Hampshire, Massachusetts, Rhode Island, Connecticut, Vermont, and New York.

In each of these States there was to be under the jurisdiction of the Grand Chapter a Deputy Grand Chapter, over which a Deputy

¹ "Compendium of Proceedings," p. 6.

² *Ibid.*, p. 9.

Grand High-Priest was to preside, assisted by a Deputy Grand King and a Deputy Grand Scribe.

The Grand Chapter was to be composed of its officers elected for the time, of the Past Grand High-Priests, Kings, and Scribes, and of the first three officers of the Deputy Grand Chapters.

The Deputy Grand Chapters were to be composed of the elected officers, of the Past Deputy Grand High-Priests, Kings, and Scribes, and of the High-Priests, Kings, and Scribes of the subordinate Chapters.

The Grand Chapter was to meet biennially and the Deputy Grand Chapters annually, and the first meeting of the former body was to be held at Middletown, Conn., on the following September.

In this Constitution the nomenclature and precedency of the Capitular degrees, which had hitherto been somewhat unsettled, was finally determined, so that the names and order of sequence should remain forever thereafter as they were then established.

This arrangement has ever since remained unchanged and makes the Mark Master, Past Master, and Most Excellent Master essentially preliminary degrees, to be followed by the Royal Arch degree as the consummation of the system.

This constitution gave to the Grand Chapter an exclusive power to hear and determine all controversies between Chapters within its jurisdiction, and an appellate jurisdiction over all the proceedings of the Deputy Grand Chapters.

As far as regards the States of Massachusetts, Rhode Island, Connecticut, and New York, which States were represented in the convention, the Constitution was definitely adopted. But the Chapters in Vermont and New Hampshire, not having sent delegates, a committee was appointed to solicit their concurrence in the organization.

The convention then proceeded to the first election on the newly adopted constitution, which resulted in the following choice of officers:

Ephraim Kirby, of Connecticut, Grand High-Priest; Benjamin Hurd, Jr., of Massachusetts, Grand King; Thomas Smith Webb, of New York, Grand Scribe; William Woart, of Massachusetts, Grand Secretary; Rev. Abraham Lynsen Clarke, of Rhode Island, Grand Chaplain; Stephen Titus Hosmer, of Connecticut, Grand Treasurer, and Gurdon Lathrop, of Connecticut, Grand Marshal.

It will be seen that the meeting here described was only that of a convention to take the preliminary steps for the organization of a Grand Chapter. The first meeting of the "Grand Chapter of the Northern States," after that organization, was holden on October 19, 1798, at the city of Middletown in Connecticut. The object of the meeting, as expressed in the Proceedings, was "for the choice of officers." Although these had already been elected, at the meeting of the convention in January preceding, that election was not by the Grand Chapter, which was at that time inchoate, and could hardly have been considered as regular. It was therefore legalized by the subsequent action on October 1, 1798, which was in fact the first meeting of the Grand Chapter.

"Agreeably to the Constitution," says the compendium, "the Grand Chapter proceeded to the choice of officers, when on sorting and counting the votes the old officers were all declared re-elected."¹

No other business was transacted, and the Grand Chapter adjourned to hold its second meeting on the second Wednesday of January, 1799, at Providence, in the State of Rhode Island.

The Grand Chapter accordingly convened at Providence on January 9, 1799, when the representatives of the Deputy Grand Chapters of Massachusetts, Rhode Island, and New York were present.

At this Convocation some important changes in the regulations were made, and the constitution was revised.

The title of the Grand Chapter was altered to that of the "General Grand Chapter of Royal Arch Masons for the six Northern States of America," and its meetings were changed from a biennial to a septennial period. The Deputy Grand Chapters were in future to be styled "State Grand Chapters." The powers of the General Grand Chapter were much abridged. The section giving it appellate jurisdiction over the State Grand Chapters was omitted from the new Constitution, and has never again been re-asserted. Its powers were confined to a control of the ritual and to the establishment of Chapters in States where there were no Grand Chapters. It continued, however, to maintain the prerogative of defining the powers and functions of State Grand Chapters. This prerogative has never been denied, and the law of Royal Arch Masonry, as it now exists and has ever since the close of the last century existed in this country, is dependent on the Constitution of the General Grand Chapter.

¹ "Compendium of Proceedings," p. 18.

Thus, the internal regulations of the State Grand Chapters and their subordinates are all directed by this Constitution. It prescribed the method of granting charters, the number of petitioners, the fee to be paid, the titles of the officers, the time of election, the price of the degrees, and the rule for receiving candidates, with several other points, all of which have always been implicitly obeyed.

In a word, the Constitution of the General Grand Chapter has been received as, in some sort, the common law of Royal Arch Masonry in this country. This law, derived from and formulated by that body, has universally been accepted, and it is admitted that it cannot be repealed or rescinded in any of its parts by any inferior body.

If the General Grand Chapter had accomplished no other good result by its organization, this alone would furnish a sufficient defense of its institution, and an answer to those discontented spirits who from time to time have sought for its dissolution.

The third convocation was holden at Middletown, Conn., on January 9, 1806. Representatives from only four States were present. The Constitution was again revised, and some important changes were made. Hitherto the General Chapter had claimed jurisdiction over only the six Northern States. But it now sought to extend its territorial limits over the whole country and assumed the more pretentious title of "The General Grand Chapter of Royal Arch Masons for the United States of America." This title it has ever since retained.

An oath of allegiance was also for the first time prepared, and every officer of a lodge or Chapter under the jurisdiction of the General Body was required, on assuming office, to swear that he would support and maintain the General Grand Royal Arch Constitution.

The exclusive right of issuing charters to subordinate Chapters, in States where there were Grand Chapters, was conferred by this constitution on those bodies, while the General Grand Chapter reserved to itself the right of issuing warrants for Chapters which were to be established in States where no Grand Chapters existed.

The next septennial convocation of the General Grand Chapter should have taken place in 1813. But at that time the United States were engaged in a war with Great Britain, and the situation of the country incidental to such a cause was such as to prevent the General Grand Chapter from convening.

A special session was called in 1816 at the city of New York. But no business of any especial importance was transacted, except the admission of the Grand Chapter of Maryland and the District of Columbia, under a provision which permitted it to confer the degrees of Royal and Select Master as preliminary to the Royal Arch. This permission has always been refused to other Grand Chapters, as being in positive contradiction of the terms of the constitution, which recognizes only three preparatory degrees in the Chapter. In the subsequent history of the General Grand Chapter this too liberal action has been found to be productive of some trouble.

Indeed, in the very inception of this proceeding there was an evident irregularity. The Grand Chapter of Maryland proposed to enter the Union of the Grand Chapters and to support the Constitution of the General Grand Chapter, but "requests that it shall not be forced to alter its mode of working."

This was reported to the General Grand Chapter by the Committee of conference, which recommended the admission of the Grand Chapter of Maryland, "under a consideration of all the circumstances," which of course must have referred to its request to continue its peculiar mode of working. The terms of the report were agreed to by the Maryland delegates, and accepted by the General Grand Chapter, which immediately afterward resolved that the Grand Chapter of Maryland and the District of Columbia be admitted under its jurisdiction, "subject to the Constitution and Regulations of the said General Grand Chapter."

It is very difficult to discover the real meaning and result of this action. The acceptance of the report permitted the Maryland body to confer its two additional preliminary degrees. The adoption of the subsequent resolution prohibited it from so doing, because the Constitution to which it was made subject as a condition of admission, recognized only three preliminary degrees, and excluded the two conferred in Maryland.

The Maryland companions selected the explanation which was most agreeable to their own views. They entered the Union of Grand Chapters, and continued, for a time, to confer the Royal and Select Master's degrees as preliminary to exaltation to the Royal Arch. Subsequently they dropped the Council Degrees and confined themselves to the usual four degrees.

In 1829 the General Grand Chapter recommended that these

degrees, which have always been under the control of independent organizations, known as Grand Councils, should be conferred in Royal Arch Chapters, but in 1853 it retraced its steps and declared that the Mark, Past, and Most Excellent Master were the only capitular degrees, thus returning to the original arrangement of Webb.

In 1870 another attempt was made by several of the Grand Chapters to get the two degrees of Royal and Select Master incorporated as preparatory steps in the Capitular system, but it did not succeed, and most probably never will.

According to adjournment another session of the General Grand Chapter was holden in the city of New York on September 9, 1819. No business of great importance was transacted and it was ordered that the next convocation should be held at the city of Washington in February, 1823. No such meeting was held.

The sixth session of the General Grand Chapter was holden at the city of New York on September 14, 1826, which was the regular septennial convocation. The Grand Chapters were largely represented, delegates from no less than fifteen of them being present.

The Constitution was again revised, and among other amendments the word "triennial" was substituted for "septennial," so that the Convocations were thenceforth to be holden every three years. This regulation has ever since been continued.

Probably the most important event that occurred at this meeting was an attempt made to dissolve the General Grand Chapter. This was the first effort at a suicidal policy which has since been several times repeated, but always without success.

The attack was made by the Grand Chapter of Kentucky, which presented a memorial, copies of which had previously been transmitted to the different Grand Chapters with the hope that they would unite in the action.

In this memorial the Grand Chapter of Kentucky set forth at great length its reasons for desiring a dissolution of the organization. They are the same arguments which have since been advanced at different times.

The objections urged against the General Grand Chapter were its nationality, the danger of its usurping the functions and destroying the sovereignty of the State Grand Chapters, the existence in it of life members, whose voice and numbers might become more potential than the votes of the elected delegates who would soon be in a

minority, and, finally, the great expense of supporting such an organization.

But the arguments, plausible as they might have appeared, had no weight with the Grand Chapters, nearly all of which expressed their opposition to any such movement. When the question was submitted to the convocation, only two votes, those of the delegates from Kentucky, were found in its favor. Every other officer and member voted against a dissolution.

It is "passing strange" that an institution whose utility has been proved by ample experience, should ever have met with opposition to its existence. We have already seen that to it we are indebted for that common and universal law, which has done so much good in the establishment of an organized system.

When we remember the discordant condition of Royal Arch Masonry at the close of the last century, when the number of the degrees, their names and the order of their sequence, which varied in every State and sometimes even in adjacent Chapters, when there was no positive and generally recognized principles of Masonic law, and no authority to which to appeal for the settlement of controversies in ritual or in custom, and when we view the uniformity which now prevails in all parts of the country, which is undoubtedly owing to the weight and influence of the General Grand Chapter as a well-organized head, it can not be denied that all American Royal Arch Masons owe a debt of gratitude to the founders of that institution which thus wisely brought order out of chaos.

It is not worth while to extend this history beyond the period at which we have arrived. From the year 1826 the General Grand Chapter, now placed on a stable foundation, has continued to meet triennially at different cities of the United States. There has been but one interruption to this continuity. In 1862 a civil war then dividing the country into two hostile sections so that there was a military impossibility for the convocation to be held at the appointed place, which was Memphis in Tennessee, the General Grand High-Priest, Albert G. Mackey, suspended the meeting until the restoration of peace, and by his proclamation the session was held at Columbus, O., in 1865. The session lasted but one day, when it adjourned to meet in the same place and on the next day in a new triennial session.

Its jurisdiction now extends over the whole of the United States,

embracing all the Grand Chapters except those of Pennsylvania and Virginia, which have never entered into the confederation, and Texas, which withdrew during the war, 1861-65, and has never reunited.

The following list of all the Presiding officers of the body since its organization will be of interest as an historical document. It will be seen to embrace the names of some who have been distinguished in Freemasonry or in political life:

- 1798, EPHRAIM KIRBY, of Connecticut
- 1799, EPHRAIM KIRBY.
- 1806, BENJAMIN HURD, of Massachusetts.
- 1816, DEWITT CLINTON, of New York.
- 1819, DEWITT CLINTON.
- 1826, DEWITT CLINTON.
- 1829, EDWARD LIVINGSTON, of Louisiana.
- 1832, EDWARD LIVINGSTON.
- 1835, Rev. PAUL DEAN, of Massachusetts.
- 1838, Rev. PAUL DEAN.
- 1841, Rev. PAUL DEAN.
- 1844, Rev. PAUL DEAN.
- 1847, ROBERT P. DUNLAP, of Maine.
- 1850, ROBERT P. DUNLAP.
- 1853, ROBERT P. DUNLAP.
- 1856, CHARLES GILMAN, of Maryland.
- 1859, ALBERT G. MACKEY, of South Carolina.
- 1865, JOHN L. LEWIS, of New York.
- 1868, JAMES M. AUSTIN, of New York.
- 1871, JOSIAH H. DRUMMOND, of Maine.
- 1874, JAMES H. ENGLISH, of Arkansas.
- 1877, JOHN FRIZZEL, of Tennessee.
- 1880, ROBERT F. BOWER, of Iowa.

- *1883, ALFRED F. CHAPMAN, of Massachusetts.
- *1886, NOBLE D. LARNER, of District of Columbia»
- *1889, DAVID F. DAY, of New York.
- *1891, JOSEPH P. HORNER, of Louisiana.
- *1894, GEORGE L. MCCAHAN, of Maryland.
- "1897, REUBEN C. LEMON, of Ohio.

* Presiding officers since the death of Dr. Mackey.

REPRINT.

In Deo Fiducia Nostra.

—:o:—

Or .: of Washington, June 24th, 1881.

THE GRAND COMMANDER OF THE SUPREME COUNCIL FOR THE
SOUTHERN JURISDICTION OF THE UNITED STATES:

To the Free-Masons of the Ancient and Accepted Scottish Rite throughout this Jurisdiction:

בְּבוֹת

אֵינִי

אֲנִי

DEAR BRETHREN: Sickness and old age have brought the ending of his days to the Dean of the Supreme Council, its Secretary-General, Brother ALBERT GALLATIN MACKEY. Born at Charleston, in South Carolina, on the 12th of March, 1807, made a Mason there, it is said, in the year 1831, he became a member of the Supreme Council and Secretary-General in 1844, and continued to be both until his death, at Fortress Monroe, in Virginia, on the 20th of June, 1881.

The Masonic Text-books written by him for the Symbolic Lodge, the Chapter of Royal Arch, and the Council of Royal and Select Masters, his Treatises on Masonic Jurisprudence, on Parliamentary Law as applied in Masonry, and on Symbolism, his Lexicon and Encyclopædia of Free-Masonry, and the Masonic Periodicals at different times edited by him, have made his name as an Author widely and well known in this and in other countries. He stood, indeed, at the head, *facile princeps*, of all the Masonic writers of the world. A ripe scholar and an accomplished writer as well as an educated physician, he would have won even a larger fame in other and wider fields of literature.

Bro. Mackey was Grand Secretary of the Grand Lodge of South Carolina for many years, a Commander of Templars, Grand High Priest of the Grand Chapter of Royal

Arch Masons of the State, and General Grand High Priest of the General Grand Chapter of the United States. In the Sessions of 1856 and 1859 of that Body, he was especially prominent in debate. In our Supreme Council, in 1870, he was elected Lieutenant Grand Commander, and declined, preferring to continue to be Grand Secretary. The Symbolic Masonry, above all, is his debtor, because most of his works were written for the use of the Masons of the Blue Degrees; and he intended to render it further service, if he had lived, by exploding some of the fictions that have been imposed upon Masons for history and truth.

Bro. Mackey had lived all his life among gentlemen, and had the manners and habits of a gentleman. Tall, erect, of spare but vigorous frame, his somewhat harsh but striking features were replete with intelligence and amiability; he conversed well, and was liked as a genial and companionable man, of a cheerful, tolerant and kindly nature, who if he had quarrels with individuals, had none with the world. Idolized by his wife and children, he loved them devotedly, and suffered intensely when, one after another, his two intelligent and amiable daughters died. He had many friends, and made enemies, as men of strong will and positive convictions will always surely do. He plotted no harm against any one, and sought no revenge, even when he did not forgive, not being of a forgiving race, for he was a McGregor, having kinship with Rob Roy.

Masonry will not soon lose as great a man, and she may well put dust upon her head and wear sackcloth in her Lodges, where, in Masonry, his heart always was.

Of course, as he grew old, he had his crosses and troubles, and fortune was not kind to him. Adversity may be profitable; but the world goes too hardly with too many of us; and Sallust truly says:

'In luctu atque miseriis mortem ærumnarum requiem, non cruciatum, esse:'

'In grief and sorrows, death is a rest from troubles, and not a misfortune.'

A great man hath fallen in Israel; and, in the words of Pushmataha the Chahta Chief, it is like the falling of a huge oak in the woods. The fall will be heard afar off, and the sound be re-echoed from many and far-off lands.

Upon the reading of this letter in the Bodies of our Obedience, the altars and working-tools will be draped in black, and the Brethren will wear the proper badge of mourning during the space of sixty days. And may our Father Which is in Heaven have you always in His holy keeping!

Albert Pike ^{33d,}
Grand Commander.

Supreme Council, 33°, A.: A.: S.: Rite,
For the Northern Masonic Jurisdiction of the U. S.

⚡ ORIENT, BOSTON, MASS. ⚡

Office of the *M.: P.: Sov.: Gr.: Commander*,
Milwaukee, Wis., July 10th, 1881.

*The M.: P.: Sovereign Grand Commander, to all Free Masons of the Ancient
Accepted Scottish Rite of the obedience of the said Supreme Council.*

Sorrow!

Sorrow!

Sorrow!

BRETHREN :

With profound sorrow I announce to you the decease of our Illustrious Brother ALBERT GALLATIN MACKEY of the A.:A.: Scottish Rite of the Southern Masonic Jurisdiction of the U. S. He died at Fortress Monroe, Virginia, on the 20th of June, 1881. Bro.: MACKEY was born at Charleston, South Carolina, on the 12th of March, 1807, and had long since passed the allotted span of three score years and ten.

For a full half century he had been an active, zealous Mason, always laboring where his work was most needed, to elevate and dignify Masonry and enlarge the sphere of its usefulness. During his long and active masonic career he honored many exalted official stations, the duties of all of which he discharged with signal fidelity. He was for many years Grand Secretary of the Grand

Lodge of South Carolina, "a Commander of Templars, Grand High Priest of the Grand Chapter of Royal Arch Masons of the State and General Grand High Priest of the General Grand Chapter of the United States."

In the Ancient Accepted Rite he was the Dean of the Supreme Council of the Southern Masonic Jurisdiction, and at the time of his decease and for many years prior thereto, the Grand Secretary General of our sister Supreme Council. A ripe scholar and an accomplished writer, his taste naturally led him to enter the literary field of the craft, in which his labors were of immeasurable value to the Great Brotherhood he loved so well. The various works he prepared and published, and without which no masonic library is complete, have rendered his name a household word among the fraternity everywhere, and constitute a fitting monument of his love for masonry and his patient and intelligent labor in its behalf. After a long and useful life he has been called to rest, his departure leaving a void to be filled—when? by whom? Others may indeed extend and enlarge the work he commenced, but it was he who laid the foundation, and first reared the superstructure. In addition to the various text books prepared by him for the use of Lodges and Chapters, and his other works of a more general character, the Fraternity are more indebted to him than to any other one man for its present admirable system of masonic jurisprudence. When such a man falls, it is meet that his brethren, who alone can appreciate his entire worth, should deplore his loss.

While we tender our sincere sympathy to our Brethren of the Southern Jurisdiction, who were more immediately connected with our deceased Brother, we also feel the loss we have all sustained, and mingle our tears with theirs.

Let these letters be read in all the Bodies of our obedience at the first meeting thereof held after its receipt, and let the altars and working tools be draped with the usual badge of mourning for the space of sixty days.

Given at the Grand Orient, the day and year aforesaid.

 *H. H. Palmer* 
Gov. & Co. Com.

REPRINT

ROYAL ORDER OF SCOTLAND.

In Cruce stat securus Amor.

Washington, 24 June, 1881, A. O. 568.

The Brethren of the Provincial Grand Lodge of the United States will already have learned that their Brother, the Senior Provincial Grand Warden, SIR ALBERT GALLATIN MACKAY, closed his eyes upon this world, and his life here ended, at seven of the clock on the morning of the 20th day of this month of June. Worn and wasted by age and disease, he fell into unconsciousness a little while before he died, and his life passed painlessly away, as when one falls asleep.

He was born at Charleston, in South Carolina, on the 12th of March, 1807, and so was an old man. Made a Mason in 1831, he had laboured in Masonry during half a century, and the works of his brain, published for the use of Masonic Bodies and for the instruction of the Brethren, are known to all reading Masons at home, and to many abroad. By them he will be long remembered. He was a man of mark, who toiled in the Masonic field assiduously, an accomplished writer and impressive speaker, and one who made many friends, a genial and companionable man, whose death a host of Masons will regret.

I invite the Brethren of the Provincial Grand Lodge to wear with me the badge of mourning of the Order, on account of the death of this Veteran Brother and Knight, during the space of thirty days from the receipt of this letter.

Morte detur aliquando otium
Quiesque fessis.

Albert Pike

Prov'l Grand Master

THE HISTORY OF THE INTRODUCTION AND PROGRESS
OF FREEMASONRY IN THE UNITED STATES

THE HISTORY OF THE

SYMBOLS OF FREEMASONRY

AND THE

HISTORY OF THE A. . A. . SCOTTISH RITE

BY

WILLIAM R. SINGLETON, 33D

PART THREE

THE HISTORY OF THE INTRODUCTION
AND PROGRESS OF FREEMASONRY
IN THE UNITED STATES

SALUTATORY

THE death of Dr. Albert Gallatin Mackey, June 21, 1881, prevented the completion of his great work on the "History of Freemasonry." The preceding chapters, ending on page 1302, were all written by him, and, as he had contemplated continuing his labors until the whole history of the Masonic Orders and Degrees should have been completed, his publishers have complimented the present writer by selecting him to do, imperfectly as it will appear, what so able a writer as Dr. Mackey would have done, had his life been spared a little longer. Dr. Mackey's long and useful career as a Masonic savant and writer had endeared him to all Masonic students over the wide world of Masonry. Wherever the English language is spoken may be found the Masonic works of our distinguished brother. In the conclusion of the admirable "Historical Sketch of the Order of Knights Templar," by Theodore S. Gourdin, of Charleston, S. C., 1855, he says: "The history of our Order remains yet to be written. It can not be attempted by an American, alone and unaided. In fact, it can not be written at all in this country; for we have not the materials. But this great work can and ought to be undertaken by the Templars of the United States. . . . Let them select a Brother, who, from his great learning and his thorough knowledge of the principal modern languages, as well as the dead, is fully qualified for the work. I know but two brethren in the United States who are qualified to execute the work proposed: Bro. Albert G. Mackey, of Charleston, S. C.; and Bro. William S. Rockwell, of Milledgeville, Ga."

We thus see that, at as early a date as 1855, Bro. Mackey shared, with that other eminent and distinguished Brother, Rockwell, the highest reputation for scholarship among all the Masons of the United States. He then continues: "Then would a history be written worthy of our illustrious Order, and of the distinguished

body which governs it in this country! The author of such a work would earn, for himself, an immortal reputation, and each individual brother who contributed his mite would enjoy the delightful consciousness that the Masonic world was, in a measure, indebted to him for a work which would prove the great desideratum of the age."

The rapid and continued increase of the membership of the Templar Order has kept pace with the growth of the population of the United States, and the progress in all branches of human knowledge, in science, and arts, as we shall demonstrate when we give a history of the Order and show in each particular State, what is the present membership, and the great field for usefulness laid open and the prospect before us, for the great battles which are yet to come, between truth and error, light and darkness, ignorance and enlightenment, crime and obedience to lawful authority, fanaticism, bigotry, and persecution against toleration, liberality and freedom of thought

The Templars, in the Crusades, for two hundred years fought with material armor against the Infidels and Turks of Syria, but our modern Templars are engaged against more powerful and insidious foes, scattered everywhere in our midst. The Templars of the Crusades were carried from the West to the East, to fight for the Christianity as then known and practiced, a system of ignorance, the great parent of superstition, bigotry, fanaticism, intolerance, and persecution; these are the elements which finally culminated in the Middle Ages, in the Inquisition; and by which the Templar Order, for so many centuries the instrument of the Church of Christ in oppressing mankind, was totally destroyed, and the leaders burned at the stake by Clement V. and Philip the Fair, after they had no further use for them.

"God works in a mysterious way His purpose to fulfill!"

The Templars, now only such in name, may be the instruments of God, in turn, in the next century, to deliver His true children from the fangs of the monster who for so many ages has kept mankind, so far as they could be, within his power, in total ignorance of the TRUTH as it was, and is yet, in Christ the Lord, for whose sake and in whose name the original Templars fought, bled, and died upon so many hard-fought battle-fields of Syria. Let this thought be in the mind of every Knight Templar of the present day and in the future, whose eyes may see these words, written in the year 1899: That

this great country, beginning with a few emigrants from several European nations, bringing with them to Virginia, first, at Jamestown, the descendants of the pride and chivalry of Old England; then the Puritans in New England—while these differed greatly in their method of interpreting the Scriptures, they were yet agreed in the great principles therein inculcated, viz.: EQUALITY, FRATERNITY, AND LIBERTY.

These, the descendants of the Reformation, have grown from the original Thirteen Colonies, despised and looked down upon by the great monarchies of Europe and Asia, with scorn and sometimes with contempt. Now these scornful peoples begin to appreciate what is before them in the future.

We therefore say to the Commanderies, Preceptories, and Encampments, and also to each private member of the Knightly Order of the Temple, remember your vows of obedience to the Grand Master of all Temples. The sword which you wield is not a weapon of carnal warfare, but a symbol, whose significance you have learned, and should ever put in practice in the defence of *Truth*, not as explained by the Mother Church of the Middle Ages, for the purpose of propagating *error*, but the truth as so well understood by every Templar, and in whose cause he should be prepared to make every sacrifice, and perform his pilgrimage even to the loss of life while engaged therein, and remember that you shall reap your reward if ye faint not.

"Magna est Veritas, et prevalebit."

WILLIAM R. SINGLETON.

CHAPTER LI

GENERAL HISTORY OF CHRISTIAN KNIGHTHOOD

N our examination of various authors who have written on Templarism, we have found it very difficult, if at all possible, to determine, categorically, when the American Rite of the "Commandery" was really formulated. We learn from ancient as well as recent writers that the Knights of the Red Cross of Rome and Constantine,

Knights of the Holy Sepulcher, Knights of St. John the Evangelist, and Knights of the Grand Cross were of a much earlier date than the Knights of the Templar Order. The Knights of the Red Cross of Rome and Constantine was the first Order of Christian Knights. The Knights of the Red Cross, which is the first degree conferred in the Commandery of Knight Templars in the United States, has no connection whatever with the Templar Order of the Crusades, nor the events in the history of the other Knightly Order of the Red Cross of Rome and Constantine first above mentioned.

The real history of the present American degree of the Red Cross is, that it is composed of the 15th and 16th degrees of the A. . A. . S. . R. . ; and the incidents commemorated therein are located at the time of the captivity of the Jews, after the destruction of King Solomon's Temple, and the return of the Jews to Palestine by direction of Cyrus, and after him by Darius the Persian monarch.

The original symbol of the red cross, which is a Christian symbol, has no place in the Ritual of the Commandery degree of Red Cross, which relates to the Jews in captivity and the Persian Court of that date. The first red cross of Constantine, with its motto, "*In hoc signo vinces*," was adopted by Constantine the Great as the "Labarum" from the following circumstance, according to tradition: The night before the battle between himself and Augustus Maxentius the sign of the cross appeared to him in the heavens, with the inscription "*In hoc signo vinces*" This battle has been called "*of*

Saxa Rubra," which was an ancient station on the "Flaminian Way," eight miles north of Rome, which meant "*red stones*."

Having been successful in defeating his opponent, Constantine, on December 25, A.D. 312, instituted a new order of knights, of the "Red Cross of Rome and Constantine." The red cross became a badge, and was worn on the right arm of each knight or on his shield, this insignia thereafter being the highest honor of knight-hood.

The Order of the Knights of the Holy Sepulcher, some writers say, "was instituted by Constantine, at the prayer of his mother Helena, for the avowed purpose of protecting the Holy Sepulcher, and defending it from the enemies of the Christian faith. Only Knights of the Red Cross, by royal decree, were eligible for the Order." It is also said that Constantine "instituted the Order of Knight of the Grand Cross, which he conferred (in 326) on several of his generals and ministers, as a special mark of merit and distinction."

The same writers say: "After the death of Constantine (337) the popes of Rome claimed, and exercised, sovereign authority over the Order throughout Christendom, delegating to the Papal Nuncios and Cardinal Princes, at the various Catholic Courts, the right to nominate candidates for the Order of Knights of the Red Cross of Rome and Constantine. Samuel Cole, in the *Freemason's Library*,¹ gives a list of the various Masonic degrees and says:

"In a later publication, 1816, we find the following list of Masonic degrees, which the author states are conferred on the Sublime Grand Lodges in Charleston, S. C., in the city of New York and in Newport, R. I.: No. 9 is Knight of the Red Cross; No. 10, Knight of Malta; No. 11, Knight of the Holy Sepulcher; No. 12, Knight of the Christian Mark; No. 13, Knight Templar. The degrees enumerated amount to forty-three. Besides these degrees there were ten others which were in the possession of most of the Inspectors given in different parts of the world, and which they generally communicate, free of expense, to those brethren who are high enough to understand them—such as Select Masons of 27, and the Royal Arch, as given under the Constitution of Dublin; six degrees of *Maçonnerie d'Adoption*, *Compagnon Ecosais*, *le Maître Ecosais*, et le

¹ "Freemason's Library" and General Ahiman Rezon. Baltimore, Md., 1826.

Grand Master Ecossais, etc., making, with the regular number of forty-three, in the aggregate fifty-three degrees.

"It will be well here to notice that the Select Masons of 27, which the Grand Chapter of Virginia *alone* retains in her curriculum and confers prior to the Royal Arch, was designed, by the Consistories of the Ancient and Accepted Rite of the last century, and by the Supreme Council of the A. . A. . S. . Rite of 1802, *to follow the Royal Arch*. A great many of our distinguished Masons think that the Select of 27 should precede the Royal Arch, as, by its *chronology*, it does; but they forget that the same chronological circumstances occur in the present arrangement of the Mark degree, which not only follows the Fellow-Craft but also the Master's degree, while chronologically the events of the first section were prior to the completion of the Temple."

Cole thus refers to the Knight of the Red Cross: "After having, as we had supposed, satisfactorily shown that the Order of Knights Hospitalers of the Order of St. John of Jerusalem, who were afterwards called Knights of Rhodes, and now Knights Templars and Knights of Malta, is indisputably the oldest order of knighthood in the world, we are suddenly transported into the distant regions of Persia, and instructed to believe that the Order of the Cross was instituted 520 years before the birth of Christ, namely during the reign of Darius."¹ This was written prior to 1826, and he continues: "This Order has not, until late years, been practiced in America. I have, indeed, conversed with well-informed knights, who received the degree in Ireland; perhaps it may have originated there—be that as it may, it has found its way into our books, and is practiced, though very imperfectly, in some of our encampments, usually preceding the degrees of Knights Templars and Knights of Malta. A reference to the foregoing list will show us that the author has given us two other degrees, which are intended to precede the two last mentioned, namely, Knights of the Holy Sepulcher and Knights of the Christian Mark. Nor shall we have cause to wonder, if, in the process of time, an attempt should be made to precede the important Degree of Knights Templars, etc., with that of Knight of the Golden Spur, Knight of the White Elephant, or of the Golden Fleece."

Cole does not seem to have been aware that the 15th and 16th

¹ Samuel Cole: "Freemason's Library," p. 321, 1826. Note.—Cole refers, of course, to the Red Cross of Rome and Constantine.—EDITOR.

degrees of the A.: A.: S.: R.: were the materials for the so-called Red Cross, which has no connection historically with the Templarism of Christianity.

The Caleph Muez destroyed the church of the Holy Sepulcher, which was rebuilt by the Red Cross Knights and Knights of the Holy Sepulcher, in 969. In 1093 Philip I., King of France, revived the Order of Knights of the Holy Sepulcher, and nominated his son, the Dauphin of France, as Grand Marshal. After the return of the Crusaders from the Holy Land, the Knights of the two Orders were called the first and second grades of the "Knight of the Red Cross of Rome and Constantine."

From A.D. 337 to 1094 the Popes exercised sovereign authority over the Orders. In 1099 there was held a Grand Conclave of the Orders of the "Knights of the Red Cross and Knights of the Holy Sepulcher."

Addison says: "The Holy Sepulcher presented itself to the eyes of the pilgrims, surrounded by a magnificence which redoubled their veneration.

"An obscure cavern had become a marble temple paved with precious stones and decorated with splendid colonnades. To the east of the Holy Sepulcher appeared the Church of the Resurrection, in which they could admire the riches of Asia, mingled with the arts of Greece and Rome. Constantine celebrated the twenty-first year of his reign, A.D. 333, by the inauguration of this church, whose corner-stone had been planted under the auspices of his sainted mother, and thousands of Christians came, on occasion of this solemnity, to listen to the panegyric of Christ from the lips of the learned and holy Bishop Eusebius. St. Jerome, who, toward the end of the 4th century, had retired to Bethlehem for literary labors and religious solitude, informs us, in one of his letters, that pilgrims arrive in crowds in Judea, and that around the holy tomb the praises of the Son of God were to be heard uttered in many languages. From this period pilgrimages to the Holy Land were so numerous that several doctors and fathers of the Church thought it their duty to point out the abuses and dangers of the practice. They told Christians that long voyages might turn them aside from the path of salvation; that their God was not confined to one city; that Jesus Christ was everywhere where faith and good works were to be found. But such was the blind zeal which then drew Chris-

tians toward Jerusalem that the voices of the holy doctors were scarcely heard. The councils of enlightened piety were not able to abate the ardor of the pilgrims, who believed they should be wanting in faith and zeal if they did not adore Jesus Christ in the very places where, according to the expression of St. Jerome, 'the light of the Gospel first shone from the top of the Holy Cross.'

"As soon as the people of the West became converted to Christianity, they turned their eyes to the East. From the depths of France, from the forests of Germany, from all the countries of Europe, new Christians were to be seen hastening to visit the cradle of the faith they had embraced. An itinerary for the use of pilgrims served them as a guide from the banks of the Rhone and the Dordogne to the shores of the Jordan, and conducted them on their return from Jerusalem to the principal cities of Italy. When the world was ravaged by the Goths, the Huns, and the Vandals, pilgrimages to the Holy Land were not at all interrupted. Pious travelers were protected by the hospitable virtues of the barbarians, who began to respect the Cross of Christ, and sometimes even followed the pilgrims to Jerusalem. In these times of trouble and desolation a poor pilgrim who bore his scrip and staff often passed through fields of carnage and traveled without fear amidst armies which threatened the empires of the East and the West.

"Illustrious families of Rome came to seek an asylum at Jerusalem and by the tomb of Christ. Christians then found, on the banks of the Jordan, that peace which seemed banished from the rest of the world. This peace, which lasted several centuries, was not troubled before the reign of Heraclius, A.D. 610-641. Under this reign the armies of Chosroes, King of Persia, invaded Syria, Palestine, and Egypt. The Holy City fell into the hands of the worshipers of fire. The conquerors bore away into captivity vast numbers of Christians and profaned the churches of Jesus Christ. All the faithful deplored the misfortunes of Jerusalem, and shed tears when they learned that the King of Persia had carried off, among the spoil of the vanquished, the Cross of the Saviour, which had been preserved in the Churches of the Resurrection."¹

At the Council of Clermont in Auvergne, November, 1095, Pope Urban addressed himself to all the nations represented at

¹ "Addison," p. 66.

the council, and particularly to the French, who formed the majority:

"Nation beloved by God," said he, "it is in your courage that the Christian Church has placed its hope. It is because I am well acquainted with your piety and your bravery that I have crossed the Alps and am come to preach the word of God in these countries. You have not forgotten that the land which you inhabit has been invaded by the Saracens, and but for the exploits of Charles Martel (A.D. 732) and Charlemagne (A.D. 768-800), France would have received the laws of Mohammed. Recall without ceasing, to your minds, the dangers and glory of your fathers. Led by heroes, whose names shall never die, they delivered your country, they saved the West from shameful slavery. More noble triumphs await you under the guidance of the God of armies. You will deliver Europe and Asia; you will save the city of Jesus Christ—that Jerusalem which was chosen by the Lord, and from whence the law is to come to us."

As Urban proceeded, the sentiments by which he was animated penetrated to the very souls of his auditors. When he spoke of the captivity and misfortunes of Jerusalem, the whole assembly was dissolved in tears; when he described the tyranny and the perfidy of the Infidels, the warriors who listened to him clutched their swords and swore in their hearts to avenge the cause of the Christians.

"When Jesus Christ summons you to his defense, let no base affections detain you in your homes. See nothing but the shame and the evils of the Christians; listen to nothing but the groans of Jerusalem, and remember well what the Lord has said to you: He who loves his father or his mother more than Me is not worthy of Me; whoever will abandon his house, or his father, or his mother, or his wife, or his children, or his inheritance, for the sake of My name, shall be recompensed a hundred-fold, and possess life eternal."

At these words the auditors of Urban displayed an enthusiasm that human eloquence had rarely before inspired. The assembly arose in one mass as one man and answered him with the unanimous cry, "Dieu le veut! Dieu le veut!" "It is the will of God! It is the will of God!" "Yes, without doubt, it is the will of God," continued the eloquent Urban; "you to-day see the accomplishment of the word of our Saviour, who promised to be in the

midst of the faithful when assembled in His name. It is He who has dictated to you the words that I have heard. Let them be your war-cry, and let them announce everywhere the presence of the God of armies." On finishing these words, the Pontiff exhibited to the assembled Christians the sign of their redemption. "It is Christ himself," said he to them, "who issues from His tomb, and presents to you His Cross. It will be the sign raised among the nations, which is to gather together again the dispersed Children of Israel. Wear it upon your shoulders and upon your breasts. Let it shine upon your arms and upon your standards. It will be to you the surety of victory or the palm of martyrdom. It will unceasingly remind you that Christ died for you, and that it is your duty to die for him."

When Urban had ceased to speak, loud acclamations burst from the multitude. Pity, indignation, despair at the same time agitated the tumultuous assembly of the faithful. Some shed tears over Jerusalem and the fate of the Christians. Others swore to exterminate the race of the Mussulmans. But all at once, at a signal from the Sovereign Pontiff, the most profound silence prevailed—Cardinal Gregory, afterward St. Innocent II, pronouncing, in a loud voice, a form of General Confession, the assembly all fell upon their knees, beat their breasts, and received absolution for their sins.¹

Joseph François Michaud, in his *History of the Crusades*, states: "To the feudal Princes, assembled in the Holy Land in A.D. 1099, belongs the glory and honor of reviving the Order of the 'Knights of the Holy Sepulcher.' The Order was conferred on the Knights of the Red Cross for rare personal valor and courage. Every recruit receiving the Order of 'Knight of the Holy Sepulcher,' or that of 'Knight of St. John,' was required to wear a Red Cross on his arm or shield."

In 1100 the Crusaders of every country carried the banner of the Order of Knights of the Red Cross of Rome and Constantine.

A Grand Conclave of that Order assembled in Rome, May, 1119. Emperor Michael Angelo Comnenus was chosen Sovereign Grand Master. The Sovereign Grand Council issued an edict limiting the active membership of Knights of the Grand Cross to fifty

¹ McCoy's "Addison," pp. 87, 88.

Sir Knights in each kingdom or independent country, and that a Grand Cross Knight shall have precedence, in all assemblies of Sir Knights of the Red Cross, immediately after the Sovereign Grand Master.

Pope Innocent III. urged the Knights of the Red Cross, Knights of the Holy Sepulcher, and Knights of St. John to overthrow the Infidels in Constantinople in 1193. Richard of England in 1195 was proclaimed Sovereign Grand Master of the Knights of Rome and Constantine, and Senior Knight of the Grand Cross, by the Duke of Burgundy, for valorous services in front of Jerusalem. After the return of the Crusaders (1200), to about 1654, the history of the Order of Knights of Rome and Constantine is somewhat uncertain. No General Assembly was held. The Kings of Spain and France and the Emperor of Germany asserting sovereignty by Divine authority in their respective countries. In 1270 the Knights of the Red Cross of Rome and Constantine, under the leadership of the monarch of France, a Knight of the Grand Cross of the Order, drove the Mohammedans out of Carthage. In 1460 the germs of a new civilization had been scattered over Europe by this Order. They opened up the East to the nations of Europe and brought Asia and Europe in closer relations. In 1550 Father Boniface, a Prior of the Order, was appointed Warden of the Holy Sepulcher, by Pope Julius III. The Orders of Red Cross, Holy Sepulcher, and St. John were resuscitated in England, the first conclave being instituted by the German ambassador to the Court of St. James, February, 1688. The Abbe Guistiniani, a Venetian priest of great learning, while visiting England, May, 1692, conferred these three Orders, of Red Cross, Holy Sepulcher, and of St. John, on several of the attachés of the English Court. The Abbé was the first writer to gather, prepare, and preserve the traditions and rituals of the Order as now existing. Sir Bernard Burke says: "*Duke Francis I., of Parma, of the house of Farnese, was installed (September, 1699) Grand Master of the Knights of the Red Cross of Rome and Constantine with much pomp.*"

Baron Hunde states: "The great and rapid progress of Freemasonry on the European Continent is largely due to the efforts of the Knights of the Red Cross of Rome and Constantine." He also credits the Knights of the Red Cross as being the true Templars and as the only Order of Christian Knighthood that has had a regular

succession since it was instituted in 312. After the Royal Arch degree was introduced into English Freemasonry prior to 1760. Many companies of the Royal Arch, in England, petitioned the local conclaves to modify the ancient *landmarks* of the Order, in *the interest and welfare of Royal Arch Masonry*, by changing the qualifications of membership in the Knights of the Red Cross of Rome and Constantine and the Appendant Orders, from a *Master Mason* to *Royal Arch Mason*. From time immemorial a Master Mason, if a believer in the Christian religion, has been the qualification necessary for membership. In January, 1760, the Grand Masters of the English and Scottish Knights of the Red Cross of Rome and Constantine assembled in London, and adopted as a requirement for Knighthood in the Order that the applicant be a Royal Arch Mason and a believer in the Christian religion.

At Charleston, S. C., November 12, 1783, in St. Andrew's F. & A. M. Lodge, the Order of Knight of the Red Cross of Rome and Constantine was conferred on a class of eight, a dispensation having been obtained in England by a retired British officer, then residing in Charleston. This is the second authentic account of the conferring of the Order in America.

The history of the Order of the Red Cross of Rome and Constantine and also of Masonry being both silent as to the first connection of these two, there is some authority in the statement of the Grand Secretary of the Grand Lodge of Masons of England, that (in 1788) all the Grand Officers of the Grand Lodge of England and Scotland received the Order of Knight of the Red Cross of Rome and Constantine on their election, and before being installed as a Grand Officer. The retiring Grand Master, if he served two or more terms, receiving the Order of Knight of the Grand Cross on retiring from the Grand East. Masonry and Knights of the Red Cross evidently became closely allied early in the 17th century. All of the above extracts, referring to the Knights of the Red Cross of Rome and Constantine, Knights of the Holy Sepulcher, and Knights of St. John, have been taken, with some slight alterations of language, from a small pamphlet, issued by C. L. Stowell, K. T. 33°, Sovereign Grand Master of the Knights "of the Red Cross of Rome and Constantine," and Thos. Leahy, K. T. 32°, Grand Registrar General—which pamphlet is an addition to the literature on the subject of the Knighthly "Appendant Orders," and shows the chronological se-

quence of those degrees from their origin and present connection with Freemasonry, through the degree of Knights of Malta—which at present is conferred after the degree of Knight Templar.¹

ORDERS OF KNIGHTHOOD.

Peter Heylin, in his *Cosmography of the World* (1660), says;

"The Chief Orders of Knighthood in this Kingdom (Jerusalem), after the recovery from the power of the *Turks*, were:

"1. Of the *Sepulcher*, said to be instituted originally (A.D. 314) by Queen *Helena*, the Mother of *Constantine* the Great, by whom the Temple of the *Sepulcher* was indeed first built; but more truly by *Philip*, King of France, Anno 1099, at such time as that Temple was regained from the *Turks*. The Arms, the same with that of the Kings (the Arms of the Christian Kings in *Hierusalem* was *Luna*, a cross Crosset, crossed, *Sol*, which was commonly called the *Hierusalem* Cross), representing the five wounds of our Saviour CHRIST. At the first, conferred on none but Gentlemen of blood and fortunes, now (A.D. 1660) salable to any that will buy it of the *Pater-Guardian* who with a Convent of *Franciscans* doth reside near that Temple.

"2. Of Saint *John* of *Hierusalem*, begun by one Gerrard, Anno 1114, and confirmed by *Pope Paschalis* the second. Their Badge or Cognizance is a White Cross of eight points. Their duty to defend the *Holy Land*, relieve Pilgrims, and succor *Christian* Princes against the Infidels. They were to be of Noble Parentage and Extraction; and grew in time to such infinite riches, especially after the suppression of the *Templars* (most of whose lands were after given to the Order), that they had at one time in the several parts of *Christendom* no fewer than 20,000 Mannors; and of such reputation in all Christian Kingdoms, that in *England* the Lord Prior of this Order was accounted the prime Baron in the *Realm*. But now (1660) their Revenue is not a little diminished, by the withdrawing of the Kings of *England*, and other Protestant Princes, from the Church of *Rome*; who on that change seized on all the Lands of that Order in their several Countries, and either kept them to themselves, or disposed them to others, as they pleased.

¹ See Mackey in chapters xxviii.-xxix., ante.

Their first *Great Master* was that *Gerrard* by whom they were founded; the last that had his residence in the *Holy Land* was one *John D. Villers*, in whose time, being driven out of *Palestine*, they removed unto *Cyprus*, and in the time of *Fulk de Villaret*, Anno 1309, to the Isle of *Rhodes*. Outed of which by *Solomon the Magnificent*, Anno 1522, they removed from one place to another, till at last by the magnificence of Charles V., Anno 1530, they were settled in *Malta*; and there we shall speak further of them,

"3. Of the *Templars*, instituted by *Hugh of Pagenes*, Anno 1113, and confirmed by *Pope Eugenius*. Their ensign was a *red cross*, in token that they should shed their blood to defend *Christ's Temple*. They were buried *cross-legged*, and wore on their backs the figure of a Cross; for which they were by the common people called Cross-backs, and by corruption *crook-backs*. Edmund, Earl of Lancaster, second son to *Henry the Third*, being of this Order, was vulgarly called Edmund *Crook-back*; which gave *Henry the Fourth* a foolish occasion to feign that this *Edmund* (from whom he was descended) was indeed the eldest son of King *Henry the Third*, but for his *crookedness* and *deformity*, his younger brother was preferred to the Crown before him. These knights had in all Provinces of *Europe* their subordinate Governors, in which they possessed no less than 16000 Lordships; the greatness of which revenue was not the least cause of dissolving the Order. For *Philip the Fair*, King of France, had a plot to invest one of his sons with the Title of *King of Hierusalem*, and hoped to procure of the Pope the revenue of this Order to be laid unto that Kingdome, for support of the Title: which he thought he might the better do, because *Clement the V.*, then Pope, for the love he bore to *France*, had transferred his seat from *Rome* to *Avignon*. But herein his hopes deceived him; for this Order being dissolved, the lands thereunto belonging were given to the Knights *Hospitallers* or of *St. John*. The crimes objected against this Order were—first, their revolt from their professed obedience unto the Patriarch of *Jerusalem*, who was their Visitor. Secondly, their unspeakable pride; and, Thirdly, their sins against Nature. The House of our Law-Students in London called the *Temple* was the chief house of the Knights of this Order in *England*; and was, by the Knights of *St. John*, whose principle Mansion was in *Smithfield*, sold unto the Students of the

Laws, for the yearly rent of 10*l.*, about the Middle of the reign of Edward III. These three Orders M. Seiden (and deservedly) put not in his *Title of honour*, in that they were prohibited to kiss a woman; honorary Knighthood and the love of Ladies going together, like Virtue and Reward."

KNIGHTS TEMPLARS DURING THE SEVEN CRUSADES FROM 1118 TO
1291.

Hugo de Paganis, after arriving in Palestine, as a Crusader and pilgrim, finding that the Moslem inhabitants infested the approaches to Jerusalem and other sacred places, and persecuted such pilgrims as were not in sufficient numbers to protect themselves, gathered with him eight other companions, viz.: Godefroi de St. Aldemar, Roral, Gundemar, Godefroi Bisol, de Montdidier, Archibald de St. Aman, Andrew de Montbar, and the Count of Provence, and bound themselves to the Patriarch of Jerusalem, in A.D. 1118, "to guard the approaches to the Holy City, so that pilgrims to the sacred places might have easy access; to live as regular Canons of the Church, under the Benedictine rule; and to fight for the King of Heaven and the Bride of Christ, in chastity, obedience, and self-denial. In 1119 Hugo de Paganis became the first Master. The palace of the Latin Kings of Jerusalem, which had been a Mosque on Mount Moriah—which Mount constitutes now the Haram Es Sheriff—and then was known as "Solomon's Temple," was assigned to them as their quarters.¹ This Mosque, after many vicissitudes from the time of its first erection, is at the present day called the "Mosque of Omar," because at one time in its history he was supposed to have been its builder, but it has been well determined by good authority that he was not; but when he conquered Jerusalem, between A.D. 640 and 644, he put it in thorough repair.²

¹In consequence of the services to the Christians performed by the "Poor Fellow Soldiers," Baldwin II., King of Jerusalem, gave them for a habitation, for hitherto they seem to have had no fixed place of abode, "the palace or royal house to the South of the Temple of the Lord, vulgarly called the Temple of Solomon" (Addison). There seems to be confusion in this locality, by different writers, owing to the ignorance concerning the various buildings on this site.—EDITOR.

²Mosque of Omar or *Kubbet es Sakra* (Dome of the Rock). This building, which is on the Platform or Original Site of Solomon's Temple, is an Octagon of 66 feet to each

From this palace, or "Solomon's Temple," these Knights took the name of "Templars," and were also called "poor fellow soldiers of Christ and the Temple of Solomon." They had every one of them seen hard service under the leadership of Godefroi de Bouillon, and were well qualified to render efficient service in aid of pilgrims and all others requiring their assistance.

Their fame and valuable services soon spread over all Europe, and many of the sons of noble houses were induced to enter into this body, so distinguished by its acts of benevolence and charity. The Order was brought prominently to the especial notice of St. Bernard, Abbot of Clairvaux, by whom a pastoral was issued praising the valor and extolling the merits of the Templars. At the Council of Troyes, in 1128, statutes were formulated for the new Order. Seventy-two rules of discipline were adopted, which met the concurrence of Pope Honorius II. and the Patriarch of Jerusalem. So rapid was the growth of this Order that they had been established in every kingdom of Latin Christendom. Domains in Normandy were granted to them by Henry I. of France. In 1129 they were established in Castile, in 1131 in Rochelle, in Languedoc in 1136, in Rome in 1138, in Brittany in 1141. The White Mantle was chosen to be worn to distinguish them from the Hospitalers, who wore a robe of black. The Red Cross was added in 1146 by Pope Eugenius III., to be placed on the breast as a symbol that the Order was expected to invite martyrdom.

Hugo de Paganis, the first Master of the Templars, visited England, and many English knights followed him to Palestine as Members of the Order. Among these was Fulk, Count of Anjou, who afterward was King of; Jerusalem, in 1131. Hugo de Paganis died in 1136.

side, having four porticoes and a range of pointed windows incrusting with beautifully colored Persian tiles. Within are two concentric ranges of columns and square pillars—the interior range supporting the drum of the magnificent dome, which is nearly 100 feet in height and over 60 feet in diameter. Within the central range is a rock 60 x 50 feet rising seven feet above the pavement—tradition saying that it was upon this rock Abraham was about to sacrifice his son Isaac. Underneath this rock is a cave—a chamber 14 x 16 feet, in which the Mohammedans now worship. The walls and the drum are covered with beautiful Byzantine Mosaics of different dates, and the windows are filled with splendid sixteenth century colored glass. It is supposed that this Mosque was originally a very early Byzantine church. It was no doubt greatly improved by Omar, when the Mohammedans occupied Jerusalem. Some writers say, by Abd-el-Malek Ibn Marwan, before the time of Omar.

Robert de Craou, a nephew of Anselm, Archbishop of Canterbury, succeeded Paganis as Grand Master of the Order.

The Second Crusade was excited by the troubles and dangers to which the Christians of Syria were exposed from the conquering arms of the Turks, who defeated the Franks at Antioch, and had taken Edessa, and threatened the destruction of all the Christian kingdoms of Syria. In this crusade Everard de Baris, the third Master of the Templars, was greatly renowned for his deeds of valor. This crusade, as before stated, was incited by St. Bernard, Abbot of Clairvaux in Champagne, who was distinguished for his learning and devotion. Under Louis VII., King of France, and Conrad III., Emperor of Germany, two immense armies marched for the Holy Land—this was in 1147. Manuel Comnenus, the Greek Emperor, through whose country the armies marched, by his treacherous conduct, caused great and a long series of disasters. A fruitless attempt was made to take Damascus, and the expedition was finally abandoned; only a small remnant of this vast host returned to Europe. Saladin, the Sultan of Egypt, in 1187 caused a Third Crusade to be started. Frederick Barbarossa, Emperor of Germany; Philip Augustus, King of France; and Richard I. of England, were the Leaders of this crusade. In 1189 the Emperor of Germany set out first, but unfortunately died of a fever caused by imprudently bathing in the Orontes River, the modern Nahr-el-Asi, the chief river in Northern Syria; it flows past Antioch, and empties into the Mediterranean Sea. His army was then joined to the forces of the other two monarchs at Acre. Nearly two years were passed by these armies in the siege of Acre before it was surrendered, although Saladin made every effort to relieve the defenders. Nine battles were fought, and over 100,000 Christians perished during the siege. Unfortunately, from the peculiar temperaments of Philip of France and Richard of England, they could not agree; and Philip returned to Europe. Richard led his army to Ascalon and defeated Saladin; but was finally driven from Jerusalem. Richard performed prodigies of valor during this crusade, by which the admiration of the Saracens was excited, and from which he derived his name of "Cœur de Lion." He made a treaty with Saladin, by which the pilgrims were protected from injury and oppression; he then returned to Europe, in 1192. Saladin died in 1193; the unity of his empire was destroyed. The Sultans of Damascus, Egypt,

and Aleppo became hostile to each other, and the Christians of Syria were not molested for many years. Pope Innocent III., in 1203, promoted the Fourth Crusade. At Venice an extensive armament was fitted out. The expedition, however, was diverted from its true mission against the Mohammedans, and, led by Baldwin, Count of Flanders, proceeded against Constantinople. In 1204 the Crusaders took this city, and then founded there the Latin dynasty of emperors who continued to fill the throne for fifty-six years.

Frederick II., Emperor of Germany, in 1228 led the Fifth Crusade, and it was ended by a treaty which he made with the Sultan of Egypt, according to which Palestine was ceded to Frederick, and free toleration granted to the two faiths of Christianity and Mohammedanism. By this arrangement the Christians lived in Jerusalem in peace and prosperity, until the Mongols, in the middle of the 13th century, disturbed this harmony.

Louis IX. (St. Louis) of France, in consequence of the capture and pillage of Jerusalem by the barbarous Mongols, in 1249, undertook the Sixth Crusade. After he had taken Damietta he was completely defeated by the Sultan of Egypt and taken prisoner; but was, in 1250, ransomed by his subjects. In alliance with Prince Edward (afterward Edward I.), son of Henry III. of England, St. Louis undertook the Seventh and last Crusade, in 1269, because of the capture of Antioch by the Mame-luke¹ Sultan of Egypt. Louis went to Africa, expecting to receive the King of Tunis as a convert to Christianity; he, however, found him to be a determined enemy. A pestilence having seized upon the French camp, they perished by thousands upon the burning sands. St. Louis died in his tent; and his son, after making a treaty with the King of Tunis, returned to France. Prince Edward, who at the age of fifteen had been married (August 5, 1254) to Eleanora of Castile (*infanta donna*), not ten years of age, sister of King Alphonso, surnamed the "Astronomer," proceeded to Palestine, accompanied by his wife, who, leaving her three infants in England at Windsor, met her lord at Bordeaux, and from thence they sailed to Ptolomais, and in that campaign he won a great battle and stormed Nazareth. Embarking at Cyprus he won another victory, June, 1271, at Cahow.

¹ Mame-luke, meaning in Arabic *slave*.

The Saracens became greatly alarmed, and an attempt was made against Edward by the prince of the Assassins, called the "Old Man of the Mountains." He employed a fanatic, who, pretending to be a Christian convert, was admitted to the presence of Edward, aimed a dagger at his side, but stabbed him in the arm. Although wounded as he was, he overcame and killed the assassin before his attendants reached him. Being fearful that the weapon had been poisoned, for the wound turned black, when the Master of the Temple and the doctors recommended incision, the Princess Eleanora, agonized at what her lord had to suffer, cried and lamented, until his brother Edmund said: "My sister, it is better you should cry than all England weep." Edward, holding out his arm, bade his surgeons "cut away and spare not, he would bear it," and told his favorite knight, John de Vesci, to "carry the Princess away from a sight not fit for her to witness." Sir John carried her away to her ladies, she shrieking and struggling all the time. The surgical operation was effectual, and, owing to Edward's virtue of temperance and Eleanora's tender care of him, he was convalescent in fifteen days.¹

The forces of Edward, having been greatly reduced by sickness and want, prepared to leave the Holy Land, where his wife had given birth to a daughter, celebrated under the name of "Joanna of Acre," in which city she was born, and who afterward married Gilbert de Clare, the first nobleman of England. On their arrival in Sicily sad news met them—that their heir, Prince John, had died suddenly, and his brother Henry also. A messenger arrived on the third day, announcing that Edward's royal sire, Henry III., had expired, and Edward was now King of England. He had borne the loss of his sons with firmness, but was thrown into agonies upon the news of his father's death. When surprise was expressed at this he replied, "Eleanora may bring me more sons, but the loss of a father can never be replaced."

This closed the era of the Crusades. Antioch had fallen by the hands of the Sultan of Egypt, and the inhabitants were slaughtered or carried into slavery in 1268. All the other towns in Syria, successively, were reduced and fell into the hands of the Mohammedans excepting Acre, which for some time was the seat of the Christians. It was captured by the Sultan in 1291, and 60,000 of its inhabitants

¹ Agnes Strickland, "Queens of England," 1871, p. 97.

were massacred or sent into slavery. Soon afterward all the churches and fortifications of the Latin Christians throughout Syria were destroyed.

We might with some profit here pause, and reflect upon the wonderful effect that resulted from these vast and religious wars, between the Western Christian nations and the hordes of ignorant and benighted Mohammedan believers of the East, which successively followed from the First Crusade in 1096. No less than 275,000 men, mostly the dregs of the population of the various nations of Europe, were commanded by a religious fanatic, Peter the Hermit. The first detachment, under Walter the Penniless, was destroyed by the Bulgarians, a few only succeeding in reaching Constantinople, where those led by Peter himself joined with them. After many difficulties a part of these succeeded in reaching Asia Minor, opposite Constantinople, where, upon the plains of Nice, they were defeated with great slaughter by the Turkish Sultan. A third and fourth expedition met with similar misfortune. However, the real Crusaders very soon thereafter arrived at Constantinople, who consisted of six armies of veteran soldiers, who were commanded by the most skillful and experienced commanders of that age: Godfrey of Bouillon; Duke of Lorraine; Hugh the Great, brother of Philip I., King of France; Robert, son of William the Conqueror of England; Count Robert of Flanders; Bo'he-Mond, Count of Tarentum, with his cousin, the noble and illustrious Tancred; and Count Raymond of Toulouse; amounting to nearly 600,000 men.

This force, under these noble leaders, defeated Sultan Sol'i-man, and took possession of his capital, Nice, in 1097, and afterward marched on to Syria, and besieged and took Antioch, in 1098, after seven months' siege; during which time Peter the Hermit, with multitudes of others, deserted the Crusaders. The Persian Sultan, having sent an immense army of Mohammedans to aid the others, they were also defeated and routed. The Crusaders then marched to Jerusalem, and found their numbers reduced to 40,000. This city surrendered to the Crusaders in 1099, after a short siege; and Godfrey de Bouillon was unanimously chosen King. Soon thereafter he met the Sultan of Egypt, with an immense army, at Ascalon, and there defeated him.

The Kingdom of Jerusalem, in a short time, was extended, until

it embraced the whole of Palestine; nearly all or the best parts of Asia Minor were restored to the Eastern Empire; Bohemond was made Prince of Antioch. At this time the two Orders of Knights Hospitalers of St. John and Knights Templars above referred to were founded, "and for nearly fifty years the three Latin principalities or Kingdoms of the East—viz.: *Edessa, Antioch, and Jerusalem*—maintained themselves against the Mohammedans, and increased in power and wealth."

Then a Turkish Emir, who, having been made Governor of Aleppo, had defeated the Franks at Antioch, had taken Edessa, and threatened the destruction of all the Christian Kingdoms in Syria.

The influence of these crusades, extending from 1090 to 1291, a period of two hundred years, was very evident upon the European nations who had so repeatedly furnished their contingents to supply the armies who fought so hard and through so many difficulties in that unfavorable climate of Syria. In reading the accounts of these various crusades we are constantly reminded that in nearly every successful battle the conduct of the brave and gallant Knights Templars insured a complete victory.

The great reputation which they gained caused a constant increase of their numbers from the very best elements of the higher classes in Europe—and a constant increase of lands and monasteries and other estates. The political and social improvement of the nations of Europe followed. They tended to break up the feudal system, and the great barons were compelled to sell their extensive estates, in order to get the means of paying for the equipments of their armies; and their estates were divided up among the people generally. Popular freedom was given to towns and cities, with political privileges, in return for contributions of money to pay for troops and equipments. Commerce was encouraged by the demand for so many ships to transport such immense amounts of supplies and men—and every branch of trade was greatly stimulated and increased to furnish arms, equipments, and food supplies. Knowledge was diffused among the people, who formerly were almost as ignorant of the outer world as their domestic animals. There was in those two centuries a wonderful advance in science, art, and literature. The Greek and Saracenic civilization was soon imbibed by those who visited the East, and on their

***TEMPERANCE. FORTITUDE, PRUDENCE, AND
JUSTICE***

return to Europe, their own countries soon felt the influence in every branch of human knowledge.

Among those who returned, and thus impressed at home the great improvement in manners and customs, none were more influential than the Knights of the several Orders. Their influence was greater by far than any others who were fortunate to return; and consequently, according to human nature everywhere, these Orders became distasteful to all classes by their arrogant and tyrannical conduct, both to high and low; until the King of France, Philip the Fair, and Pope Clement V., for their own selfish purposes, and to gain the wealth of these Orders, determined to suppress them, which resulted in, first, their imprisonment for several years, until the plot was ripe; then by their execution, after the minds of the people had become sufficiently reconciled to their suppression.

During A.D. 1118, some writers say 1188, according to a Swedish Legend, "the Rose Croix came from the East into Europe, to propagate the doctrine of Jesus. Three of them founded in Europe the Order of Masons of the East [some writers say that our *Knight of the Red Cross* may probably have been derived from this degree], to serve as a preparatory seminary for those pupils whom they intended to instruct in the most sublime sciences."¹

To Ormesius, a priest of Alexandria in Egypt, is attributed the origin of the Order of Rose Croix. He with six others embraced Christianity at the solicitation of St. Mark the Evangelist, A.D. 46.² This tradition may be reconciled with the tradition of the formation of the Order of the Temple in Paris, which declares that the "Order of the East gave birth to the Order of the Temple; that, in Ancient Egypt, we find the cradle of the Order of the East." Also, "the Swedish brethren," as Reghellini observes, "have always enjoyed in the Order a very brilliant reputation for their learning; the proof of which is that all nations have adopted, in the Master's degree, the *distress sign* as it was established in the catechism of their symbolic degrees."³ This, however, can not be reconciled with that, which gives the origin of the Rose Croix, by the admission of the Order of St. John of Jerusalem of 27,000 Scottish Masons, who had given their

aid to the Christian Princes during the wars of the First Crusade, as given by Oliver¹ and several others.² Addison says³: "That the first authentic notice of an intention on the part of the Hospitalers to occupy themselves with military matters occurs in the bull of Pope Innocent the Second, A.D. 1130." It is very probable that the latter Order was not of a military character at this time.

The Order of the Templars, by the exertions of Baldwin, King of Jerusalem, was greatly extended throughout Europe. The church, through the Pope and clergy, was enlisted in their favor. A code or set of rules was given them, afterward confirmed by a Papal Bull. Large grants of land, and also money, were made to the Templars, after the visit of Hugo de Payens, to Normandy, England, and Scotland, as before mentioned (A.D. 1128). According to Reghellini, "Eighty-one Masons, under the conduct of Garimont, Patriarch of Jerusalem, crossed into Europe, in 1150" (date probably erroneous). "They went to the Bishop of Upsala, in Eastern Sweden, who received them very favorably, and by this means the Bishop was initiated into the mysteries brought from the Copts; afterward they intrusted to him the sacred depot of these doctrines, rites, and mysteries. The Bishop of Upsala took care to conceal them in the subterranean vault of the tower of the four crowns, which at that time was the treasure-house of the King of Sweden. Nine of these Masons, among whom was Hugo de Payens, established in Europe the Order of the Templars, who subsequently received the depot, which had been given to the Bishop of Upsala, which held the doctrines, dogmas, and mysteries of the Coptic Priests. Reghellini adds: "It was by this action that the Templars became the conservators and guardians of the mysteries, rites, and ceremonies brought from the East by the Masons and the Levites of the true light."⁴ Hugo of the Temple, as he is sometimes called, before he left England, appointed a Prior to govern⁵ the Order in England.

The enthusiasm which prevailed in favor of the Templars was so great over Europe at this time that the King of Navarre bequeathed his kingdom to the Order. Most of the Barons of Navarre and Aragon ratified the act; notwithstanding which, the claims of the Templars were afterward successfully resisted. After Hugo had

⁵ "Addison," p. 27.

laid the foundations of the Order, he returned to Jerusalem and was greeted with great distinction (A.D. 1129), and a grand Council of War was called; soon after which he died.

Hugo de Payens was succeeded by Robert de Craou, surnamed the Burgundian, son-in-law of Anselm, Archbishop of Canterbury, in 1136, who became a Templar after the death of his wife. The Templars were defeated in several battles by Zenghis and Nouredin, and lost several towns, the principal one being Edessa. In consequence of these defeats application was made to the Pope for assistance by the clergy of the Eastern Churches, and he commissioned St. Bernard to preach the Second Crusade. In 1146 Everard des Barres, or de Barri, succeeded; Lord Robert convened a general chapter at Paris, where the Second Crusade was arranged. The Red Cross was permitted to be worn by the Templars by Eugenius III. In 1148 the red cross banner was first unfurled in battle, it is supposed, at Damascus. It was a white standard, having in the center the blood-red cross, the symbol of martyrdom. Reghellini supposes the origin of this symbol to be of the highest antiquity. The Second Crusade having been a failure, the Master returned with King Louis to Paris. The Templars could only collect one hundred and twenty knights and one thousand serving brethren to recover the province of Antioch, which had been invaded by the enemy. The Master abdicated, and spent the rest of his life in the Monastery of Clairvaux.

He was succeeded by a nobleman of illustrious family of Burgundy, in France, Bernard de Tremelay, a valiant and experienced soldier, who was chosen Master in 1151. The Infidels were defeated near Jerusalem (1152) in a night attack, and driven to the Jordan, five thousand being left dead on the plain near the ford. Against this victory a disastrous defeat was encountered by the Templars, who in 1153 attempted to take the city of Ascalon. "They penetrated, at dawn of day, through a breach in the wall, reached the center of the town, were surrounded by the Infidels, and 'slain to a man.' Their bodies were exposed in triumph from the walls."

Bertrand de Blanquefort, of a noble family of Guienne, a pious and God-fearing man, succeeded to the Mastership in 1154. The enemy captured him, with Otho, the Marshal, and eighty-five others in an ambush near Tiberias in 1156. Shortly thereafter, *thirty* Knights Templars put to flight, slaughtered, and captured two hundred Infidels. At the instance of Manuel Comnenus, Emperor of

Constantinople, the Master was liberated (1158). In 1167 "Philip of Naplous became Master; he was the first Master who had been born in Palestine. He had been lord of the fortresses of Krak and Montreal in Arabia Petræa; having assumed the habit and taken the vows of the Order of the Temple, after the death of his wife." Philip resigned his office in 1170, and Odo de St. Amand, of undoubted courage and resolution, succeeded as Master of the Temple, according to William, Archbishop of Tyre, "having the fear neither of God or man before his eyes." In 1168, because the Master of the Temple refused to invade Egypt, in violation of certain treaties, Gilbert d'Assalit, the Guardian of the Hospitalers, the friend and confidant of Almaric, King of Jerusalem, armed the Hospitalers as a great Military Society, in imitation of the Templars.

Egypt having been unjustifiably invaded by the Christian Knights, without the Templars, Saladin crossed the desert with 40,000 horse and foot, and after ravaging the borders of Palestine, advanced to and laid siege to Gaza, but was forced to retire again into Egypt by the Templars.

After this the Templars and Hospitalers became the guardians of the *true cross*—the former marched on the right, and the latter on the left of the sacred emblem.

The Templars conquered the Assassins in 1172, and their chief, "the Old Man of the Mountains," was forced to sue for peace. Near Ascalon, in a battle (November 1, 1177), "the Infidels were defeated. Odo with *eighty* Knights broke through the famous guard of Mamelooks, slew their commander, and forced Saladin to fly, almost naked, on a fleet dromedary." At the battle of Jacob's Ford, "where there was much hard fighting, the Master of the Hospital, covered with wounds, having fled, and the Count of Tripoli also, the Templars were all killed or taken prisoners and the Master Odo de St. Amand fell into the hands of the enemy. The fortress was burned down, and all the Templars taken in the place were sawn in two except the most distinguished."

THE CAUSES WHICH LED TO THE MARTYRDOM OF DE MOLAY AND
OTHERS.

During the difficulties between Philip, King of France, and Boniface VIII., the Templars coincided with the Pope. The King had issued coin below the proper standard, which caused a rebellion, and as the rents of the Templars were very great, they were thought by the King to be the instigators of the disaffection. The King determined to be revenged, and was not long in finding someone suited to his purpose. The evidence of the party who, to obtain the royal pardon, gave his testimony, was merely "hearsay," but two apostates from the Order, who were expelled and condemned to imprisonment for their crimes, corroborated this testimony. This information was treasured up by the King, to be made use of at the right time. Clement, an unprincipled man, in order to gain the summit of his ambition, had pledged himself on the holy sacrament to comply with a condition of which he was then ignorant. He became the instrument of the vindictive and wily monarch. This Order, which had been for one hundred and seventy years the admiration of all Christendom, its members having shed freely their blood, and given thousands of lives to defend Christianity, and lavished their treasures in defense of the Cross against the Infidels, were declared to be heretics and apostates; they were accused of the blackest crimes, all of which were impossible. All the Templars in French dominions were simultaneously arrested and cast into prison. Tortures of every kind were unsparingly applied. Some, to escape these horrible pains, confessed these crimes and absurdities imputed to them, in hopes of obtaining pardon. Most of these, after being restored to liberty, renounced their confessions and solemnly declared that the excessive torments to which they had been put alone induced them to confess that which they knew to be false. They were then treated as relapsed heretics and cast into the flames. Neither age nor rank could escape of those who persisted in denying the guilt of the Order. Some languished in loathsome dungeons for years and perished from neglect, disease, and starvation. Others, more robust, were in time restored to liberty, to wander about the world with mutilated limbs, to gain a living as best they could.

It would seem that these events, so well known to the nations of Europe, would have taught them all along the ages, from the Crusades to the 19th century, the humanitarian principles inculcated in their religion. Unfortunately, cruelty of every kind was so deep set in the very nature of all the Latin races, that where the religious sentiment was prevalent it was utterly impossible for the Roman Church ever to forgive any individual, high or low, who dared to controvert in the least manner any dogmatic utterance which might be promulgated from the Church authorities. Total obedience, the most abject and servile, was exacted from every individual. The history of every nation upon the continent of Europe, and where the Pope of Rome had authority elsewhere, shows that cruelties of the worst description were visited upon all who would not conform to the exactions of the Church of Rome. Such were the influences of that "curse of the world" which followed upon the suppression of the Templars by that "Curse of France"—as *Philip the Fair* was styled by Dante—that cruelties for differences in religious matters have been continued to the present day where any particular church is sustained by secular authority. The conduct of Spain in her treatment of her West and East Indian colonies in political matters is but the continuation of the old religious persecutions of the "Inquisition," "which caused countless millions to mourn." The persecutions of the Spanish governors in Cuba, Porto Rico, and Philippines, are the latest phases of the Spanish "Inquisition" and the "French Bastile"—The Devil's Island being but an outgrowth of that famous fortress destroyed in Paris during the Revolution.

EXECUTION OF DE MOLAY.

Let us now complete the history of the Templars of the Crusades. One recent author says: "The last scene of this dreadful tragedy was yet to be enacted. The four most noble victims were reserved for the last. James de Molay, the Grand Master; Guy, the Grand Preceptor; Hugo de Parait or Peraldes, the Visitor General; and Theodore Bazile de Merioncourt, who had returned from the East (1307), when summoned by the Pope, and who had languished in prison for five years and a half, were (March 11, 1313) led out to a scaffold which had been erected in front of Notre-

Dame, publicly to avow confessions which the Grand Master had declared were forged. The confessions were read, their assent was required. Two were silent, and were condemned to be incarcerated for life. "But the Grand Master raising his arms, bound with chains, toward heaven, and advancing toward the edge of the scaffold, declared, in a loud voice, that to say that which was untrue was a crime, both in the sight of God and man. 'I do,' said he, 'confess my guilt, which consists in having to my shame and dishonor suffered myself, through the pain of torture and the fear of death, to give utterance to falsehoods, imputing scandalous sins and iniquities to an illustrious Order, which hath nobly served the cause of Christianity. I disdain to seek a wretched and disgraceful existence by engrafting a naked lie upon the original falsehood.' He was here interrupted by the Probo and his officers, and Guy, the Grand Preceptor, having commenced with strong asseverations of his innocence, they were both hurried back to prison."¹

King Philip was then informed of the occurrence, and in his blind fury ordered them to be immediately executed. This took place at four o'clock the same day, Addison says at *dusk*. There is no apparent discrepancy in this, as in March it often occurs that it is dusky soon after 4 P.M. They were conducted to the "Isle de la Cité," a funeral pile having been erected, and not yet completed, near where now stands the equestrian statue of Henry IV.

While the work of completion was going on, the Grand Master solemnly declared the innocence of his brethren, and then prayed as follows: "Permit us, O God! to remember the torments which Jesus Christ suffered to ransom us, and to imitate the example which he set us in enduring, without a murmur, the persecutions and tortures which injustice and blindness prepared for him. Pardon, O my God! the false accusations which have caused the total destruction of the Order of which Providence appointed me the head. And if thou wilt deign to hear the supplication which we now offer thee, grant that the deceived world may, at some future day, better know those who have endeavored to live for thee. We hope to receive, from thy goodness and mercy, the reward for the torments and death which we are about to suffer—to enjoy thy divine presence in the realms of bliss."

¹ "Addison," p. 279. Vertot gives this speech in different words, though alike in substance, vol. i., p. 219.

They were then hurried off to the stake, the executioners of the King being fearful of an insurrection of the people. Small fires were kindled under their feet. "This hellish torture was borne with fortitude and resignation, without cries or groans, imploring the mercy of God and maintaining the innocence and purity of their beloved Order to the last. At length De Molay, when his body was almost consumed, having yet command of his tongue, looking at the crowd before him, exclaimed:

"You who behold us perishing in the flames shall decide our innocence! I summon Pope Clement V. to appear in *forty days*, and Philip the Fair in *twelve months*, before the just and terrible throne of the ever-living God, to render an account of the blood which they have unjustly and wickedly shed!"¹

The fires burned lower and lower, and in time became extinguished! The mortal parts of James de Molay and Guy had been reduced to ashes—their spirits had returned to their creator!

Vertot and *L'Histoire de l'ab. de l'Ord.* both doubt the truth of this tradition. The manuscript of Knights Hospitalers, the manuscript of Knights Hospitalers of de la Hogue, and the degree of Novice of the Order of Unknown Phil. Judges state that De Molay made this prediction *just* before he was placed on the funeral pile.^{2*}

¹ Vertot, vol. i., p. 219.

² "Orthodoxie Maçonnerie," p. 393.

* Vertot, in his account of the origin of the Order of Knights Templars, states that "A Templar and a citizen of Breziers, having been apprehended for some crime, were committed together to a dungeon; for want of a priest, they confessed each other; that the citizen, having heard the Templar's confession, in order to save his own life, accused the Order to Philip, King of France; charging them, on the authority of what his fellow-prisoner had told him, with idolatry, sodomy, robbery, and murder; adding that the Knights Templars being secretly Mahomedan, each Knight, at his admission into the Order, was obliged to denounce Jesus Christ, and to spit on the Cross, in token of his abhorrence of it. Philip, on hearing these accusations, pardoned the citizen, and disclosed to the Pope this extraordinary confession, with a request that their Order should be suppressed."—Cole, "Masonic Library," p. 286.

Vertot says that "In Germany the historians of that nation relate that Pope Clement having sent his bull for abolishing the Order to the Archbishop of Metey, for him to enforce, that prelate summoned all his clergy together, that the publication might be made with greater solemnity; and that they were suddenly surprised by the entry of Wallgruffer, Count Sauvage, one of the principals of the Order, attended by twenty other Templars armed and in their regular habits. The Count declared that he was not come to do violence to any body, but, having heard of the bull against his Order, came to insist that the appeal which they made from that decree to the next Council and successor of Clement should be received and published. This he pressed so warmly that the Archbishop, not

"The fate of the persecutors of the Order is not unworthy of notice. A year and a month after the horrid execution, the Pope, Clement V., was attacked by a dysentery, and speedily hurried to his grave. His dead body was transported to Carpentras, where the Court of Rome then resided. It was placed at night in a church which caught fire, and the mortal remains of the Holy Pontiff were almost entirely consumed. His relations quarreled over the immense treasures he left behind him, and a vast sum of money, which had been deposited for safety in a church at Lucca, was stolen by a daring band of German and Italian freebooters. Before the close of the same year, King Philip IV. died of a lingering disease which had baffled all the art of his medical attendants, and the condemned criminal, upon the strength of whose information the Templars were originally arrested, was hanged for fresh crimes. "History attests," says Raynouard, "that all those who were foremost in the persecution of the Templars came to an untimely and miserable death. The last days of Philip IV. were embittered by misfortune. His nobles and clergy leagued against him to resist his exactions. The wives of his three sons were accused of adultery, and two of them were publicly convicted of that crime."

"The chief cause of the ruin of the Templars," justly remarks Fuller, "was their extraordinary wealth. As Naboth's vineyard was the chiefest ground of his blasphemy, and as in England Sir John Cornwall, Lord Fanhope, said merrily, not he, but his stately house at Ampthill, in Bedfordshire, was guilty of high treason, so certainly their wealth was the principal cause of their overthrow. We may believe that Philip IV. would never have taken away their lives, if he might have taken their lands without putting them to death, but the mischief was, he could not get the honey unless he burnt the bees."

thinking it proper to refuse men whom he saw armed, complied. He sent the appeal afterward to the Pope, who ordered him to have it examined in a Council of his province. Accordingly a synod was called, and after a lengthy trial, and various formalities which were then observed, the Templars of that province were declared innocent of the crimes charged upon them.—Cole, "Masonic Library," pp. 288, 289.

Notwithstanding this verdict of innocence it does not appear that either their government or their possessions were restored to them as a distinct order. Their estates in the German Empire were divided between the Knights of Malta and the Teutonic Knights. Many of the Templars joined themselves to the Knights of Malta; and some writers hold this to be probable, for prior to this time the habit of the Knight Templar was originally *white*; but they now distinguish themselves by the same color as the Knight of Malta, viz., black.

King Philip IV., the Pope, and the European sovereigns appear to have disposed of all the personalty of the Templars, the ornaments, jewels, and treasures of their churches and chapels, and during the period of five years over which the proceedings against the Order extended they remained in the actual receipt of the vast rents and revenues of the Fraternity. King Philip IV. put forward a claim upon their lands in France, to the extent of a million dollars, for the expenses of the prosecution, and Louis, his son, claimed a further sum of \$300,000. "I do not know," says the celebrated Voltaire, "how much went to the Pope, but evidently, the share of the Cardinals, the Inquisitors delegated to make the process good, amounted to immense sums." The Pope, according to his own account, received only a small portion of the personalty of the Order, but others make him a large participator in the good things of the Fraternity.

ERA SUBSEQUENT TO THE DISPERSION OF THE KNIGHTS TEMPLARS.

Extracts from writings of Edward Manning, Cardinal Archbishop of Westminster:

"The south of France, where a large Jewish and Saracenic element remained, was a hotbed of heresies, and that region was also a favorite one with the guild of Masons. It is asserted too that, as far back as the 12th century, the lodges of the guild enjoyed the special protection of the Knights Templars. It is easy in this way to understand how the symbolical allusion to Solomon and his Temple might have passed from the Knights into the Masonic formulary. In this way too might be explained how, after the suppression of the Order of the Temple, some of the recalcitrant, maintaining their influence over the Freemasons, would be able to prevent what had been hitherto a harmless ceremony into an elaborate ritual that should impart some of the errors of the Templars to the initiated. A document was long ago published, which purports to be a charter granted to a lodge of Freemasons in England, in the time of Henry VII., and it bears the marks in its religious indifference of a suspicious likeness between Freemasons of then and now. In Germany the guild was numerous, and was formally recognized by a diploma granted in 1489 by the Emperor Maximilian. But this sanction was finally revoked by the Imperial Diet in 1707.

"So far, however, the Freemasons were really working stonemasons; but the so-called Cologne Charter (the genuineness seems certain), drawn up in 1535 at a reunion of Freemasons gathered at Cologne to celebrate the opening of the Cathedral Edifice, is signed by Melanchthon, Coligny, and other ill-omened. Nothing certain is known of the Freemasons—now evidently become a sect during the 17th century, except that in 1646 Elias Ashmole, an Englishman, founded the Order of Rose Croix, Rosicrucians, or Hermetic Freemasonry, a society which mingled in a fantastic manner the jargon of alchemy and other occult sciences with Pantheism. This Order soon became affiliated to some of the Masonic lodges in Germany, where from the time of the Reformation there was a constant founding of societies, secret or open, which undertook to formulate a philosophy or religion of their own.

"As we know it now, however, Freemasonry first appeared in 1725, when Lord Derwentwater, a supporter of the expelled Stuart Dynasty, introduced the order into France, professing to have his authority from a lodge at Kilwinning, Scotland. This formed the basis of that variety of Freemasonry called the Scotch Rite. Rival organizations soon sprang up. Charters were obtained from a lodge at York, which was said to have been of a very ancient foundation."¹

From this extract some of our recent writers have thought that "this connection exists just so far as the Templary of our own day clings to its knightly practices, and is true to its Templar Dogmas of the Christian faith and teaching."

The same spirit of Clement V. is here shown by this famous Manning.

From the various high-grade systems which sprang into existence in Europe during the middle and latter part of the 18th century came the Templary on the continent of Europe, for in each system there was to be found the Knight Templar degree. The Ancient and Accepted Rite of Twenty-five degrees, and its successor, the "Ancient and Accepted Scottish Rite," formulated at the close of the last century, are permeated with the Templar spirit.

The principles in all of the several rites wherein is to be found

¹ A Catholic Dictionary containing some "Account of the Doctrine, Discipline, Rites, Ceremonies, Councils, and Religious Orders of the Catholic Church." By William E. Addis, Secular Priest, sometime Fellow of the University of Ireland, and Thomas Arnold, MA., Fellow of the same university. Second Edition, London. Large 8vo, 1884. *In loco*.

the Templar degree, are dogmatic utterances, and "squared with the words of that Ancient Landmark, God's Holy Word." The lessons of duty found in our modern Templarism are to be applied and practiced in our daily life, and he who follows faithfully all the teaching of our Order will be a "Christian in deed and in truth, and in whom there is no guile."

History says Philip died a few weeks after the martyrdom of De Molay, and Addison fixes the period of the death of the Pope a year and one month afterward, and he also says, "History attests that all those who were foremost in the persecution of the Templars came to an untimely and miserable death."¹

By the execution of the principal officers of the Templar organization their enemies supposed that the Order was destroyed for all time; "but the Eagle of St. John was merely scorched—not killed. From the ashes of the old Phoenix has arisen another Order, more glorious in all its aspects than the original; and in the latter part of the 19th century, the Knightly Order of the Templars, clad in the Armor of Integrity, and armed with the sword of knowledge, have waged, are still waging, and will ever wage eternal war against the three ancient enemies of the human race—*Falsehood, Fanaticism, Superstition! Dieu le veut*—"The will of God." "

After the execution of De Molay and the dispersion of the Templars, in all the nations of Europe, their possessions were confiscated and divided among various other Orders; the survivors were compelled to leave their homes, discard their garb of Templars, and mingle again with the world.

If traditions can be relied upon, some preserved their "Order of the Temple at Paris;" and some the "Templars in Scotland," of whom Charles Edward Stuart was chosen Grand Master. Some, it is said, sought refuge in the Society of Free and Accepted Masons, in order "that they might there enjoy with impunity the religious dogmas which they had brought with them from the East—the liberal sentiments of the Johannite Christians—the pure doctrines of the primitive Christian Church. Many entered the preceptories of the Knights Hospitalers, after a part of their lands had been granted to them." From this circumstance no doubt the modern degree of Knights of Malta has been incorporated into the Encampments of

¹ "Addison," p. 280.

Knights Templars. The Knights of Malta were never anciently claimed to have been Freemasons. "In 1740 the Grand Master of the Order of Malta caused the bull of Clement XII. to be published in the Island of Malta, and forbade the meetings of Freemasons. On this occasion several Knights and many citizens left the Island." "In 1741 the Inquisition pursued the Freemasons at Malta. The Grand Master proscribed their assemblies under severe penalties, and six knights were banished from the Island, in perpetuity, for having assisted at a meeting."

From tradition, after the death of De Molay. in 1313, the Templars were divided into four parties, viz.:

1. The Templars in Portugal and Italy—known since as Knights of the "Order of Christ."

2. Those who accepted Peter d'Aumont as the successor of De Molay.

3. Those who asserted that John Marc Larmenius was his successor.

4. Those who refused to accept either Larmenius or D'Aumont.

Passing by the first, second, and third classes, our sketch need only to refer to the fourth—as Modern Templarism is supposed to be derived from the fourth class, which may be divided into two classes—the Scotch and English.

Edward having debarred the Templars from taking refuge either in England or Ireland, and who attempted to force them, as he had done their brethren, in those countries to enter the preceptories of the Knights of St. John, they were forced to join Bruce, who gave them ample protection; and it is said by their assistance he was enabled to defeat the forces sent against him by Edward at the battle of Bannockburn. He is said to have created, on June 24, 1314, the Order of St. Andrew du Chardin,¹ to which was afterward united that of Heredom (H. D. M.). He reserved to himself and to his successors forever the title of Grand Master; and founded the Royal Grand Lodge of the Order of H. D. M. at Kilwinning. As our object is, if possible, to trace the origin of our Templar Orders, we must here drop the history of the Royal Order and refer to the General History preceding—Chapter XXIX.—where a full

¹This order was most probably created by James II. in 1440.—Mackey, in this work, chapter xxix., p. 259 et seq.

statement is made, according to all the light which could possibly be thrown on this difficult problem.

By the death of De Molay, the Order of the Temple was broken up, and the members scattered in all directions, as they had no common head. Those of them who had been leaders in each country were mostly imprisoned for life, or executed, the brethren, persecuted in all directions, and for concealment, wandered about and cast off the clothing of the Order, and again mingled with other men. Addison says: "Papers and certificates were granted to men with long beards, to prevent them from being molested by the officers of justice as suspected Templars."

Their assemblies were forbidden under severe penalties, and at one time six Knights were banished from the island for having been at one of the meetings. There was no ritual of the Order, hence the ritual now used, which is a very beautiful and impressive one, is entirely modern. Gourdin says: "From ignorance of the true causes which forced some of the Templars to enter the Order of Malta has arisen the highly reprehensible practice of dubbing the candidate 'a Knight of the most valiant and magnanimous Order of Knights Templars and Knights of Malta of the Order of St. John of Jerusalem.' This ritual was once in force in the United States, and was incorporated in the diploma or patent."

1. The Order of Christ. When the Templars were suppressed in Portugal, their property, of all kinds, was assigned over to the Order of Christ, the equestrian militia, the latter name having been changed to the former. This Order, since its foundation in 1317, has been always protected by the Kings of Portugal, and also by the Popes. They wear "a long and loose *black* mantle, turned up with ermine and thereupon the Crosses." They are called "Christian Militia," which is their motto. Thory says that "A Portuguese Mason founded at Paris, in 1807, in a Lodge, a chapter of this Order; he applied the formulas of reception to those of Freemasonry. It was the Templar system. He pretended to have received from Portugal the power to create Knights."¹ The same Order was in Italy. Pope John XXII. reserved the right of nominating those members called Pontifical Knights.²

2. The D'Aumont Templars. They professed the system of

¹ "Acta Latomorum," tome i., p. 299.

² "Encyclopedia of Heraldry," vol. i.

"Strict Observance," which its opponents declare to have been organized in Prussia by Baron Hund, who derived his knowledge of the doctrines in the Chapter of Clermont, in Paris, he being a member in 1754.¹ This system is exclusively used in Germany and Sweden. A long list of Grand Masters is produced who succeeded De Molay, the first being D'Aumont, who is said to have been elected on an island of Scotland, December 27, 1313.² In Sweden it is said that the Grand Chapter of Stockholm has the last will and testament of De Molay, and that Beaujeau, his nephew, collected his ashes, interred them, and erected his monument with suitable inscriptions.³

3. The Larmenius Templars. James de Molay, foreseeing the evils by which the Order was threatened, nominated as his successor John Mark Larmenius, of Jerusalem, and invested him with the Patriarchal and Apostolic power. Larmenius transmitted this power to Brother Thibault of Alexandria in 1324.⁴ The Order of Paris claim to have the Charter of transmission signed by Laminus and also the others who succeeded him in Office, down to the present time. They claim also to have the original statutes of the year 587 in manuscript, and several relics which formerly belonged to the martyrs. Some of the Templars were sent out in 1826 to Greece, to fight the Turks.⁵

There has been a difference of opinion among the brethren as to the authenticity of these legends relative to D'Aumont, Beaujeau, and Larmenius, and the relics. Some writers have asserted that De Molay had appointed *four* Grand Chiefs of the Order in Europe: at Edinburgh in the north; Paris in the west; Naples in the south, and Stockholm in the east.⁶ According to the rules of the Order at that time it is very doubtful if De Molay appointed any one as his successor, as the office had, up to that time, been elective, and no one appointed by De Molay or anyone else would have been recognized by the Order at large unless he had been regularly elected; hence we may be sure that De Molay had no successors.

4. The fourth were the Templars, who did not recognize either of

the three above mentioned who assumed the authority of a Grand Master. Those may be divided into two classes: 1st. The Scotch Templars. These may be sub-divided into two sections: *a.* Those who fought with Robert Bruce; *b.* Those who entered the Order of Knights Hospitalers.

1. The Templars in Scotland, in consequence of the hostility of Edward III., King of England, were forced to join with Bruce, as he had refused to let them take refuge either in England or Ireland, and had endeavored to force them, as he had their brethren in those countries, to enter the preceptories of the Knights of St. John. These Knights having joined Bruce and aided in the victory at Bannockburn, he created, June 24, 1314, the Order of St. Andrew du Chardon, to which was afterward united that of Heredom (H. D. M.).¹ He raised the Lodge of Kilwinning in Scotland, founded at the time of the constitution of the abbey of that name, in 1150, to the rank of Royal Grand Lodge of Heredom. These Scotch Templars are reported to have been expelled in 1324 by Larmenius, who had invented different signs and words to exclude them from the Order of which he was chief, because they had assisted Bruce, and of having joined the order of H. R. D. M. Some writers have conjectured that from this Royal Order had sprung the Ancient and Accepted Rite. The present writer feels confident that the third degree of Symbolic Masonry was originally derived from the H. R. D. M.

"From the General Regulations of Royal Arch Masons of Scotland, it may be inferred that the preservation of a remnant of the Templars in Scotland is chiefly to be attributed to the wars between Robert Bruce and Edward III. of England." It is confidently said that "the 25 degrees of Heredom were practiced at York, in 1784, by the College of Heredom Templars, being No. 1 under the Constitution of the Ancient Lodge at York, south of the river Trent, sitting at York."

In 1785 the Order of H. R. D. M. resumed its functions at Edinburgh, the presiding officer being styled *Wisdom*.² The body at Edinburgh established a Chapter at Rouen in 1786.³ On January 4, 1787, a Chapter of *Harodim* was opened in London,⁴ but it is not known whether this was a branch of the Royal Order. About

DREAM OF CONSTANTINE

ΕΥ ΤΟΥΤΩ ΝΙΚΑ

the beginning of the present century there was a consistory at Hull and one at Grimsby.¹

Rebold has it that the Grand Lodge of Heredom of Kilwinning united together with all the subordinates to the St. John Grand Lodge of Edinburgh.²

2. Those who entered the Order of Knights Hospitalers. In Scotland, in England and Ireland, many of the Templars' joined the Order of the Knights of St. John. They resided amicably in the same preceptories at the end of the 14th and beginning of the 15th centuries, and continued thus until the Reformation.³ But they did not, however, hold all their lands in common.⁴ Many of these Knights of both Orders embraced Protestantism, and fraternized with the Freemasons. The Preceptor in Scotland, having become a Protestant, resigned the whole possessions of the Preceptory, of the Hospitalers and Templars, received the same, as Lord Torphichen, from the Crown. Those Knights who remained Roman Catholics united with David Seaton. The Grand Master, Viscount Dundee, was slain at Killiecrankie. Charles Edward Stuart, who had been admitted, September 24, 1745, at Holyrood, became the Grand Master.⁵ Mr. Oliphant, of Bachiltar, succeeded him. He died in 1745.⁶ From the General Regulations of Royal Arch Masons of Scotland it may be inferred that the Masonic branch of the Order preserved the ceremonies which are used at a reception. The Sterling Ancient Lodge conferred the degree of Royal Arch, Red Cross, or Ark, the Sepulcher, Knights of Malta and Knights Templars, until the beginning of the last century, when two lodges were formed. The Ancient Lodge joined the Grand Lodge of Scotland in 1736, and the new one, called the Royal Arch, in 1759, when another division took place. And these degrees were conferred in an encampment until 1811, when the supreme encampment of Masonic Knights Templars was formed in Scotland.⁷ Sev-

eral encampments in Scotland, however, obtained, about 1795, charters from Ireland with the privilege of conferring the Royal Arch degrees, though the encampments in the latter country were merely private bodies.¹

3. The English Templars. It is supposed, that with the exception of the Encampment of Observance, all the encampments in the United States and England owe their origin to the three original "Encampments of Baldwin," established at Bristol, Bath, and York.² Oliver says: "In England and Ireland, as the Conciliæ Magnæ-Britannicæ show, the Templars were put down, and the Knights compelled to enter the preceptories of their opponents, the Knights of St. John, as dependants."³ "Their lands were confiscated and given to the latter Order. But in treating of the manner in which a remnant of the Order was preserved in England, I must avail myself of information kindly furnished me by an eminent Brother who resides in Bristol."

"The Order of Knights Templars has existed in Bristol from time immemorial. The Templars held large possessions in this ancient city, and, with their House or Preceptory, and the Men of the Temple, are mentioned in many old charters and documents. The Temple Church and Parish of Temple point out the locality of their residence. About fifty years ago an active and respected member of the Craft, Brother Henry Smith, now deceased, introduced from France three degrees of the Ancient and Accepted Rite, which, with the degree of R. C, long before that time connected with the Knights Templars, were united into an Order or Community, called the Royal Orders of Knighthood. These were the degrees of the Nine Elect, the 9th degree of the Ancient and Accepted Rite, the Knights Grand Architects of Kilwinning, the 14th degree of that Rite, and the Knights of the East, the Sword and Eagle, answering to the 16th degree, and the Knights R. C. or 18th degree, were, together with the order of the Knights Templars, held and practiced under one authority. In our oldest records the style or title of Knights Templars is given with the addition of K.-H., but that degree was, as far as I know, never given, and even the meaning of the title has fallen into oblivion."

² "Lexicon," p. 265. Temp. chart, p. 47, by J. L. Cross.

³ "Historical Landmarks," vol. ii., p. 20, note 46.

"A candidate for admission into any one of the five degrees before mentioned must be a Royal Arch Mason. He may, however, take any one of the five degrees first, which may happen to be about to be given, at the time he seeks admission, as one general payment to the fund of the United Orders entitles him to admission to all. An attempt was made to enforce the proper progression through the five degrees, but failed.

"Nothing is known here of the Order of the Temple of Paris, but that is the real source of the present Grand Conclave of England, the late Grand Master, the Duke of Sussex, having been created at Paris in that body.

"I will shortly endeavor to explain the difference between the Encampment of Baldwyn and the Grand Conclave.

"The Duke of Sussex, having been installed as Knight Templar at Paris, I believe by Sir Sidney Smith, then Grand Master, was created Grand Master of the Knights Templars in England. From some cause or other, he never would countenance the Christian degrees connected with Masonry, and would not permit a badge of one of these degrees to be worn in a Craft Lodge. In London, of course, he ruled Supreme, and the meetings of Knights Templars there, if they continued at all, were degraded to the mere level of public-house meetings. A true descendant of the Knights of St. John of the Hospital was held, with all circumstances of ribaldry, at St. John's Gate, Clerkenwell, and the degrees conferred at a weekly convivial meeting for the sum of 5s. On the death of the Duke of Sussex it was resolved to rescue the Order from its degraded position, and the Grand Conclave of England was formed, some of the officers of the Duke of Sussex's original Encampment, which he held once, and I believe once only, being then alive.

"In the mean time, of the three Original Encampments of England, *the genuine representatives of the Old Knights of the Temple*, two had expired, those of Bath and York, leaving *Bristol the sole relic of the Order with the exception of those encampments which had been created in various parts of the country*, not holding under any legitimate authority, but *raised by Knights who had*, I believe, without exception, *been created in the Encampment of Baldwyn at Bristol*.

"Under these circumstances, the Knights of Baldwin felt that their place was at the head of the Order, and though willing, for the

common good, to submit to the authority of Colonel Tynte, or any duly elected Grand Master, they could not yield precedence to the Encampment of Observance (the Original Encampment of the Duke of Sussex) derived from a foreign and spurious source, the so-called Order of the Temple in Paris, nor could they consent to forego the privileges which they held from an immemorial period, or to permit their ancient and well-established ceremonies, costume, and laws to be revised by persons for whose knowledge and judgment they entertained a very reasonable and well grounded want of respect. The Encampment of Baldwyn, therefore, refused to send representatives to the Grand Conclave of England, or to acknowledge its authority in Bristol, until such time as its claims should be treated with the consideration it is believed they deserve. I am, however, in hope that an arrangement will shortly be effected, and all the Templars in England united under one head."¹

Gourdin, from whose admirable *Historical Sketch of Knights Templars* we have made many extracts, says, in continuation of the matters referred to in the above letter: "While we approve of the noble conduct of the Encampment of Baldwin, and trust that it may soon attain the eminent position to which it is entitled as the sole surviving preserver of our Ancient Mysteries in England, during many centuries of trial"

Some writers have contended that the Masonry of modern times "originated in the Holy Land during the Crusades, and was instituted by the Knights Templars." Laurie, or Brewster, who it is said wrote the work which bears Laurie's name, embodies the tradition as follows:

"Almost all the secret associations of the Ancients either flourished or originated in Syria and the adjacent countries. It was here that the Dionysian Artists, the Essenes, and the Kassideans arose. From this country also come several members of that trading association of Masons which appeared in Europe during the dark ages; and we are assured that, notwithstanding the unfavorable condition of that Province, there exists at this day, on Mount Libanus, one of these Syrian Fraternities. As the Order of the Templars, therefore, was originally formed in Syria, and existed there for a considerable time, it would be no improbable supposition that they received

¹ Letter of David W. Nash, September 29, 1853, to Theo. S. Gourdin, Charleston, S. C. in his "Historical Sketch," 1855.

their Masonic knowledge from the Lodges in that quarter. But we are fortunately, in this case, not left to conjecture, for we are expressly informed by a foreign author [Adler, de Drusis], who was well acquainted with the history and customs of Syria, that the Knights Templars were actually members of the Syriac fraternities." There is no evidence of Freemasonry in Syria at that period.

It is very certain, from the best histories of the Templar Order, that, in addition to the open ritual for the reception of a candidate for the Order, there was a secret ritual, and no one was admitted within their quarters during the ceremony of reception. This does not, however, prove that, whatever secret ceremonies were used, they were in any manner connected with the Freemasons. Recent examinations by our most advanced Masonic scholars, such as Wm. James Hughan, Robert Freck Gould, and others too numerous to mention who are members of the Lodge *Quatuor-Coronati* in England, and the Grand Secretary of the Grand Lodge of Scotland, J. Murry Lyon, that, prior to the formation of the Grand Lodge of England in 1717, there was no ritualistic observance in the reception to Masonry. Nor have any indications been found anywhere in the world, that our modern rituals of the various degrees of the Lodge, Chapter, Council, and Templar Order, had any ancient formulas whatever. To the careful student, every one of these ritualistic formulas bears intrinsic evidence of the modern era in Masonry. In the three degrees of the Blue Lodge, the want of congruity and manifest errors as to the facts at the building of King Solomon's Temple, the topography itself of the site of the Temple, and the situation of the City of Jerusalem—all concur in the conclusion that the ceremonies are all symbolic and allegorical, and consequently so much the more valuable to the student of symbolism and the philosophy contained in these degrees—and this can be said also of all the other degrees.

The Knights of Malta being at the present day incorporated in the Order of Knights Templars, we deem it necessary that this sketch should include some important matters connected with that Order, which, from our preceding notices of them, it will be seen succeeded the Knights Hospitalers, or Knights of St. John, and so-called Knights of Rhodes.

Pilgrims and traders from the West to Palestine were so numerous and constant, it became requisite to build in the city of

Jerusalem hospitals or places of entertainment during their stay in Jerusalem. In 870 Bernard, a monk, founded in the valley of Jehoshaphat, close to the Church of the Virgin, a hospital, consisting of twelve houses for pilgrims from the West, which held possession of gardens, vineyards, and fields for grain. There was a collection of books given by Charlemagne (in 768 to 800). A market was held in front of this place. When, in the ninth century, pilgrimage was greatly increased, a hospital was established in the city of Jerusalem, for the Latin pilgrims, which was erected by Amalfi and the Latin traders, about A.D. 1050. They also erected a church to the Holy Virgin, called St. Mary of the Latins. This hospital was the residence of the Benedictines, who devoted themselves to the necessities of the pilgrims, and contributed to the wants of those who were poor, or had been robbed by the banditti who infested all the roads leading to Jerusalem, and also aided them to pay the taxes required by the Moslems for permits to visit the Holy Places.

The great increase of pilgrims required another hospital which was raised near their church, having a chapel dedicated to St. John Eleemon (Almoner), a canonized Patriarch of Alexandria, who was the son of the King of Cyprus in the 6th century. He was elected Patriarch and founded a Fraternity in Jerusalem, whose object was to attend upon the sick and wounded Christian pilgrims to the Sacred Land. The Greek and also Roman Churches canonized this Archprelate by the name of St. John of Jerusalem.

Gerard, as before mentioned, presided over the Hospital of St. John at the time the Crusaders appeared at Jerusalem. When the city was taken (July 15, 1099), the wounded pilgrims were received, and "Duke Godfrey de Bouillon, some days afterward, visited them, to whom he personally administered aid and consolation, and, to mark his sense of the humane services rendered by the brethren, he endowed the hospital with his own Lordship of Montboire, in Brabant, and all its dependencies. Having enjoyed universal favor, Gerard and his brethren desired to be separated from the Monastery of St. Mary *de Latina* and become independent. There was no opposition to this, and they made a rule for themselves, to which they vowed obedience in the presence of the Patriarch, and assumed a black mantle with a white cross on the breast.

In 1130, from the Bull of Pope Innocent II., we have the first authentic notice of an intention of the Hospitalers to have any con

nection with military affairs. This Bull gives information that the Hospitalers retained, at their own expense, a body of foot-soldiers and horsemen to defend the pilgrims in going to and returning from the Holy Places. The Hospitalers had resolved to add the protecting to the task of relieving pilgrims.

In 1168, the first year of Philip of Nablous as Grand Master of the Templars, the King of Jerusalem and Knights Hospitalers went forth on their memorable and unfortunate expedition to invade Egypt. The Templars refused to join this expedition, as it was in violation of all treaties.

From this period there was an entire change in the Order of the Hospital of St. John, and they became a great military body; their Superior was styled Grand Master, and he led in person the brethren into the field of battle. They, however, still continued their duties as attendants upon the sick and to relieve the indigent.

The Order of the Holy Sepulcher was instituted at the same period as the Knights of St. John of Jerusalem, and for the same causes.

The following is a list of the Patriarchs of Jerusalem, A.D. 1099 to 1187, from De Vogué:

Diambert	}	1099 to 1107	Etienne (Stephen)..	1128 to 1130
Arnulphe		Guillaume (William).....	1130 to 1146		
Ebremard		Foulcher	1146 to 1157		
Gibelin.....		1107 to 1111	Amanry.....		1157 to 1180
Arnulphe		1111 to 1118	Eraclius (Heraclius).....		1180 to 1190
Gormond		1118 to 1128			

In 1847 the Pope re-established the Patriarchate of Jerusalem in the person of Bishop Velerga. He only had authority to confer the Order of Knights of the Holy Sepulcher. This was done in the apartment styled the Chapel of the Apparition, where Jesus is said to have appeared to Mary after his resurrection. The Candidate, kneeling before the Patriarch, is asked the traditional questions, and is then girded with the sword and spur of King Godfrey. We have in a former part of this sketch explained the union of the Knights of the Red Cross of Rome and Constantine with the Knights Hospitalers and Knights of the Holy Sepulcher, so that, when these Orders, after the Crusades had ceased, had been driven

successively from Cyprus and Rhodes and found refuge in the island of Malta, which was tendered to them by Charles V., King of Spain, and when the Order of the Templars was suppressed and many of them found a home with the Order of Malta, the junction of the two Orders was formed. We presume that when the modern Order of Knights Templars was formulated, the ritual of Malta was added to that of Knight Templar, and we consider the association much more consonant with the history of these two Orders than the degree of Knight of the Red Cross of Persia and Syria, which has evidently been mistaken for the Red Cross of Rome and Constantine, as before explained.

ORDER OF KNIGHTS OF MALTA.

This Order has been known at different periods by the title of the Knights of St. John of Jerusalem, Hospitalers of St. John, Knights of St. John D'Acre, Knights of Rhodes, and finally Knights of Malta.

In the year 1048 some pious merchant from Amalfi, in the kingdom of Naples, built a church and monastery at Jerusalem, which they dedicated to St. John the Almoner. The monks were hence called Brothers of St. John, or Hospitalers, and it was their duty to assist those sick and needy pilgrims whom a spirit of piety had led to the Holy Land. They assumed the black habit of the hermits of St. Augustine, distinguished only by a white cross of eight points on the left breast. They rapidly increased in numbers and in weakly and at the beginning of the 12th century were organized as a military order by Raymond du Puy, who added to their original vow of chastity, obedience, and poverty, the obligation of defending the Church against Infidels. Raymond then divided them into three classes: Knights, who alone bore arms; Chaplains, who were regular ecclesiastics; and Servitors, who attended to the sick. After long and bloody contests with the Turks and Saracens, they were finally driven from Palestine in the year 1191. Upon this they attacked and conquered Cyprus, which, however, they lost after eighteen years' occupation. They then established themselves at the island of Rhodes, under the Grand Mastership of Fulk de Villaret, and assumed the title of the Knights of Rhodes.

It was here that the illustrious Villars died in the seventieth year of his age and the fourteenth of his Grand Mastership. In justice to his distinguished merit, the following epitaph was inscribed on his tombstone: "Here lies Virtue victorious over Fortune."

On December 15, 1542, after a tranquil occupation of this island for more than two hundred years, they were finally ejected from all their possessions by the Sultan Soliman the Second.

After this disaster they successively retired to Castro, Messina, and Rome, until the Emperor Charles V., in 1530, bestowed upon them the island of Malta, upon the condition of their defending it from the depredations of the Turks and the Corsairs of Barbary, and of restoring it to Naples, should they ever succeed in recovering Rhodes.

This island was formerly called Melita, from the vast quantities of honey which it produced. The Romans gained possession of it when they conquered Sicily; they were deprived of it by the Arabs in 828, who were expelled by Roger the Norman in 1190. From that period it continued under the dominion of the Kings of Sicily, till it fell, by the conquest of that island, into the hands of the emperor, Charles V.

The Order now took the name of the Knights of Malta, by which title they have ever since been designated. Here the organization of the Order was as follows: The chief of the Order was called "Grand Master of the Holy Hospital of St. John of Jerusalem and Guardian of the army of Jesus Christ." He was elected for life, and resided at the city of Valette. He was addressed by foreign powers with the title of "altezza eminentissima," and enjoyed an annual revenue of about one million guilders. The Knights were divided into eight languages, according to their respective nations. The languages were those of Provence, Auvergne, France, Italy, Aragon, Germany, Castile, and England. Upon the extinction of the language of England, that of Anglo-Bavaria was substituted. The Grand Officers were also eight in number, and consisted of the chiefs of the different languages, as follows:

1. The Chief of the language of Provence was Grand Commander.
2. " " Auvergne was Marshal.
3. " " France was Hospitaler.
4. " " Italy was Grand Admiral.

5. The Chief of the language of Aragon was Grand Conservator,
6. " " Germany was Grand Bailiff.
7. " " Castile was Grand Chancellor.
8. " " England was Turcopolier, or
 Captain-General of the Cavalry.

The Knights, in time of war, wore over their usual garments a scarlet surcoat, embellished before and behind with a broad white cross of eight points. In time of peace, the dress of ceremony was a long black mantle, upon which the same cross of white linen was sewed.

From the time that the island of Malta was bestowed upon the Order, until the year 1724, the Knights were continually at war with the Turks; during which time the latter had expended vast quantities of blood and treasure, and the former had exhibited the most magnanimous examples of patience and undaunted heroism. A peace was at length concluded for twenty years, to be renewed at the expiration of that period, if the parties could agree.

In 1565 the island of Malta was beleaguered by Soliman II., on which occasion the Knights suffered immense loss, from which they never entirely recovered. Of the eight languages, the English became extinct in the 16th century; those of France, Auvergne, and Provence perished in the anarchy of the French Revolution; Castile and Aragon were separated at the peace of Amiens; and the remaining two have been since abolished. The Order, therefore, as respects its ancient constitution, has now ceased to exist.

On June 9, 1798, the island of Malta was taken by the French under Bonaparte. In the same year the Knights chose Paul I., Emperor of Russia, as their Grand Master, who took them under his protection. Upon his death they elected Prince Carriciolo. Upon the reduction of the island by the English in 1800, the chief seat of the Order was transferred to Catania in Sicily, whence, in 1826, it was removed, by the authority of the Pope, to Ferrara. The last public reception of the Order took place at Sonneburg in 1800, when Leopold, the present King of Belgium, and Prince Ernest, of Hesse Philippsthal Barchfeld, with several other Knights, were created.

In 1841 Ferdinand I., Emperor of Austria, issued a decree restoring the Order in Italy, and endowing it with a moderate rev-

enue. But the wealth, the power, and the magnificence of the Order have passed away with the age and the spirit of chivalry which gave it birth.

COMMENTARY REMARKS.

In Chapter XXIX. of this work, p. 258 *et seq.*, Bro. Mackey reviews the history of the Templars in Scotland, and emphatically denies any claims of the Scottish Modern Templars to be the successors of the Templars who were dispersed after the death of De Molay. We shall not, in this sketch, attempt any defense of their claims or those of the Templars of the present day as to the legitimate succession. However, we must give our readers some extracts from Addison which will demonstrate that there were some reasons why such claims have been set up.

Lawrie, in his *History of Freemasonry in Scotland*, says that before 1153 King David I. introduced the Knights of the Temple into Scotland and established them at the Temple on the Southesk, and was greatly attached to them.

Little is known of the history of the Knights Templars from the time of Alexander II. until the 14th century, except that all their privileges (which we have omitted) were continued to them by succeeding kings, who directed their piety and their bounties toward the religious Orders. The possessions of the Fraternity were so extensive that their lands were scattered "over the whole kingdom of Scotland toward England and over the whole kingdom to the Orchardis."

At the time of the persecution of the Order in other countries correspondently the Templars of Scotland suffered spoliation, but it is to be remarked, to the credit of the people of Scotland, that there is no account of any single member having suffered any personal torture. Their estates were transferred to their rivals the Hospitalers, and like their brethren in England a number very probably entered into that Order.

The Knights of St. John had also been introduced by David I. into Scotland, and Alexander II. had granted a charter to them soon after that granted to the Knights Templars. Their first Preceptory was at Torphicen, in West Lothian, which continued to be their principal residence, and after the acquisitions of the lands of the

Templars and some others, their possessions came to be immense at the date of the Reformation.

A union was effected, at the beginning of the reign of James IV., between the Knights Templars and the Knights of St. John, and their lands were consolidated. The precise period of this union is not known, but the fact is established by the charter of King James, October 19, 1488, confirming the grants of lands made by his predecessors to these two Orders in Latin, which is thus translated: "To God and the Holy Hospitalers of Jerusalem and to their brethren of the Soldiers of the Temple of Solomon." Both Orders were then united and placed under the charge of the Preceptor of St. John, and there can be no doubt that such an arrangement was political and natural.

It was in Scotland alone that the Knights Templars owned independent property. The ban against them being yet in force throughout Europe, necessarily contracted their sphere of action. The Knights of the Hospital, however, being entirely free of any obstruction, had great wealth and influence, and stood high in the favor of the sovereigns of Europe. Both Orders were represented by the Preceptor of St. John in the Parliament of Scotland, and the union continued down to the Reformation.

From the era of the Reformation these two Orders, combined, appear in Scotland only as a Masonic body; but the late Mr. Deucher averred that so early as 1590 a few of the brethren had become mingled with the Architectural Fraternity, and that a Lodge at Stirling, patronized by King James, had a Chapter of Templars attached to it, who were termed cross-legged Masons, and whose initiatory ceremonies were performed, not in a room, but in the old Abbey, the ruins of which are still to be seen in the neighborhood. The first authentic notice we can find on the subject is in M. Thory's excellent *Chronology of Masonry*, wherein it is recorded that about 1728 Sir John Mitchell Ramsay, the well-known author of *Cyrus*, appeared in London with a system of Scottish Masonry, up to that date perfectly unknown in the Metropolis, tracing its origin from the Crusades, and consisting of three degrees, the Ecosais, the Novice, and the Knight Templar. For further notice of this subject we refer our readers to Chapter XXIX., ante.

During the 18th century the Scottish Order can be but faintly traced; though Mr. Deucher had, in 1836, the assurance of well-in

formed Masons that, thirty or forty years previously, they knew old men who had been members of it for sixty years, and it had sunk so low at the time of the French Revolution that the sentence which the Grand Lodge of Scotland fulminated in 1792 against all degrees of Masonry except those of St. John, was expected to put a period to its existence. Soon after this, however, some active individuals revived it, and with the view to obtaining documentary authority for their chapters, as well as avoiding any infringement of the Statutes then recently enacted against secret societies, adopted the precaution of accepting Charters of Constitution from a body of Masonic Templars, named the Early Grand Encampment, in Dublin, of whose origin we can find no account, and whose legitimacy, to say the least, was quite as questionable as their own. Several charters of this description were granted to different Encampments of Templars in Scotland about the beginning of the present century; but these bodies maintained little concert or intercourse with each other, and certainly were not esteemed in the country. Affairs were in this state when, about 1808, Mr. Alexander Deucher was elected Commander or Chief of the Edinburgh Encampment of Templars; and his brother, Major David Deucher, along with other Officers of the Royal Regiment, was initiated into the Order. A General Convocation of all the Templars of Scotland, by representatives, having taken place in Edinburgh, they unanimously resolved to discard the Irish Charters, and to rest their claims, as the representatives of the ancient Knights, on the general belief and traditions of the country.

They further determined to entreat the Duke of Kent, the Chief of the Masonic Templars in England, to become the patron protector of the Order in North Britain, offering to submit themselves to his Royal Highness in that capacity and to accept from him a formal Charter of Constitution. The Duke of Kent lost no time in complying with their request, and his Charter erecting them into a Conclave of "Knights of the Holy Temple and Sepulcher, and of St. John of Jerusalem. H. R. D. M. ✠ K. D. S. M." bears date June 19, 1811.¹

By a provision in it Mr. Deucher, who had been nominated by the brethren, was appointed Grand Master for life.²

Mills, Southerland, De Magny, Dumas, Burnes, Gregoire, and

¹ "Addison," p. 548.

² *Ibid.*, p. 549.

others show that the Order of Knights Templars, although suppressed, was never dissolved in France.

The persecution of the Templars in the 14th century does not close the history of the Order; for though the Knights were spoliated, the Order was not annihilated. In truth, the Cavaliers were not guilty, the brotherhood was not suppressed, and, startling as is the assertion, there has been a succession of Knights Templars from the 12th century even down to these days; the chain of transmission is perfect in all its links. James de Molay, the Grand Master, at the time of the persecution, anticipating his own martyrdom, appointed, as his successor in power and dignity, Johannes Marcus Larmenius of Jerusalem, and from time to time to the present there has been a regular, uninterrupted line of Grand Masters. The Charter of transmission, with the signatures of the various chiefs of the Temple, is preserved at Paris, with the ancient statutes of the Order, the rituals, the records, the seals, the standards, and the early memorials of the early Templars.¹

The brotherhood has been headed by the bravest Cavaliers in France; by men who, jealous of the dignities of knighthood, would admit no corruption, no base copies of the Orders of Chivalry, and who thought that the shield of their nobility was enriched by the impress of the Templars' Red Cross. Bertrand du Guesclin was the Grand Master from 1357 till his death, 1380, and he was the only French commander who prevailed over the Chivalry of Edward III. of England. From 1478 to 1497 we may mark Robert Lenoncourt, a Cavalier of one of the most ancient and valiant families of Lorraine. Philippe Chabot, a renowned Captain in the reign of Francis I., wielded the staff of power from 1516 to 1543. The illustrious family of Montmorency appears as Knights Templars, and Henry, the first Duke, was chief of the Order from 1574 to 1614. At the close of the 17th century, James Henry de Duras, a Marshal of France, the nephew of Turenne, and one of the most skillful of the soldiers of Louis XIV., was Grand Master. From 1724 to 1776, three princes of the Bourbon family were Grand Masters, viz.: Louis Augustus, Duke of Maine, 1724-1737; Louis Henry Bourbon Condé, 1737-1741; and Louis Francis Bourbon Condé, 1741-1746. Louis Hercules Timoleon, Duke de Cosse Brissac, accepted

¹ "Addison," p. 550.

the office of Grand Master in 1776 and remained in office until he died in the cause of royalty at the commencement of the French Revolution. The Grand Master at that time was Bernardus Fabre Palaprat. There are Colleges in England and in many of the chief cities in Europe.¹

Grand Master Bernard Raymond died in 1838; he was succeeded in the regency of the Order by Admiral Sir William Sidney Smith, until his death in 1840. At that time, among the subjects of Great Britain who were office-bearers were the names of the Duke of Sussex, Grand Prior of England; the Duke of Leinster, Grand Prior of Ireland; the Earl of Durham, Grand Prior of Scotland; the Chevalier Burnes (Grand Master of Scottish Freemasons in India), Grand Preceptor of Southern Asia; the Chevalier Tennyson D'Eyncourt, Grand Prior of Italy; General George Wright, Grand Prior of India, etc. Among the functionaries of France were Prince Alexander de Wirtemberg, Dukes de Choiseul and Montmorency, and Counts Le Peletier, D'Aunay, De Lanjuinais, De Brack, De Chabrilan, De Magny, De Dienne, and others equally distinguished.² In consequence of the political changes in France, an institution so much identified with ancient nobility and tradition naturally fell into abeyance; it, however, in 1874, is said by McCoy's Addison to number about thirty British Ministers, most of whom are in the Public Service in India, received by the Grand Preceptor of Southern Asia, under legative powers from the Grand Master, Bernard Raymond, sanctioned by the Duke of Sussex, without whose approval no British subject was admissible.³

The history of Sir William Sidney Smith's connection with the Order of Knights Templars is well substantiated, and is brought very near to our period, as will appear in the following extracts from John Barrow's *Life and Correspondence of Admiral Sir W. Sidney Smith*.⁴

From the end of 1815, Sir Sidney mostly made his residence in Paris, France. It was here, in fact, that he carried on the vast correspondence with the Knights Liberators, and also with another Order of Knighthood, of which he became a member, invested at the fountain-head, in a curious and romantic manner.

The following is Sir Sidney's own account of his obtaining this

¹ "Addison," p. 251.

² *Ibid.*, p. 551.

³ *Ibid.*, p. 552.

⁴ London, 1848.

cross, which he wore during his life, and which is now in possession of the Convent of the Order of St. John of Jerusalem at Paris. The paper is in Sir Sidney's own handwriting, but has no address, though, judging by the appeal made on a point of conscience and religion, it was probably meant for the English Bishop resident in Paris at that time, viz., Dr. Luscomb.

Sir Sidney wrote a letter to a friend from Paris, dated October 28, 1839, saying:

"I am most anxious to leave Paris before another insurrection; though as Regent of the 'Order of the Orient' and the '*Milice du Temple*,' denominated the Order of the Temple, I must always have a *piéd à terre* (foot of ground) here, a *residence* magistral.

"In the exercise of my duty, representing the King in his dignity, as his Minister Plenipotentiary at the Ottoman Porte, and being decorated by Sultan Selim with his imperial Aigrette, and with a commission to command his forces by sea and land, on the coast of Syria and Egypt, consequently representing that Sovereign in his authority, in the absence of the Grand Vizier (his highness being the one to exert it, when present), and as the Captain Pasha was expressly put personally under my Orders, I thought it my duty to land at Cyprus, for the purpose of restoring subordination and the hierarchy of authority, on a sudden emergency, which arose from the bursting out of an insurrection of Janissaries, Arnants, and Albanians, in the year 1799, after the raising of the siege of Acre.

"On visiting the Venerable Greek Archbishop afterward at the capital (Nicosia), to prevent him from disgracing himself by a visit to me, which I understood was his intention, his grace met me Outside the city gates. I, of course, dismounted to receive his welcome and animated harangue, at the termination of which he embraced me paternally, and at the same moment adroitly threw the Templar's cross, which he wore as an Episcopal decoration on his breast, *around the neck of his English guest*, saying, "This belonged to an Englishman formerly, and I now restore it. It belonged to Sr. Richard (Agió Ricardo), surnamed "Cœur-de-Lion," who left it in this church at his departure, and it has been preserved in our treasury ever since. Eighteen archbishops, my predecessors, have signed the receipt thereof, in succession. I now make it over to you, in

token of our gratitude for saving all our lives, the archbishops ecclesiastics, laymen, citizens, and peasantry."¹

CONCLUSION.

In all writings, sketches, and theses upon any particularly important subject, it is eminently proper to draw conclusions thereupon, that those who read may learn and duly appreciate the value of such examinations upon the subject-matter under consideration.

The old philosophers suggested that upon all valuable questions, or propositions, there should be, first, the affirmation; second, the denial; third, the discussion; fourth, the conclusion. We have, in preceding pages, endeavored, by quotations and deductions from the most approved authors, shown, we think, the true history of the Organization, the progress, triumphal success, decline, and final destruction of the most glorious, chivalric, and magnanimous Order of Knights which the world has ever witnessed.

In the day of their successful and triumphant battles of Truth against Error over their Saracen and Turkish opponents, they excited the wonder of their friends in the West and the highest admiration of their enemies. They were enthused by their zeal for the cause of Christ, as were also the Crusaders of every rank who suffered every inconvenience, toil, dangers, from their human foes, and the more insidious foes found in the climatic conditions of the countries through which they passed and were more than decimated by the peculiar local circumstances which accompanied and surrounded them, in their journeys, marches, and camping-grounds; yet they faltered not, nor ever ceased in their persistent efforts, which many times were so eminently successful in repelling all attacks, and in the forward movements to conquer and possess the strongholds of the Infidels. In the First Crusade, after untold misfortunes due to the special conditions of the country, diseases of the climate, and attacks of their foes, they, with a mere handful compared with the vast numbers with which they crossed the Hellespont, at length conquered and took Jerusalem, and finally, with the aid of the Templars and Hospitalers, succeeded in extending the Kingdom of Jerusalem

¹ "Addison," p. 554.

over the whole country of Palestine. Their success, as is often the case in human affairs, caused their rulers to forget the circumstances of the "Crusade," and, exalting *themselves* above the great CAUSE for which they should be fighting, strove for dominion and empire for themselves, each individual claiming rank and power, for human glory, and not for *Christ's* sake. Human history from time immemorial teaches the scholar this great lesson, that all things are by the direction of a Divine Providence. This is the true philosophy of all history; without that Providence we are driven to the evident conclusion of Fatalism of the Mohammedan, or Fortuity of the Infidel. These three conditions are alone possible. Which shall we choose? The vast majority of the world in all ages have chosen and acted under the "Faith" in a

"Divinity above who shapes our *ends*, rough hew them as we may."

Does history repeat itself? What shall we say of the events at the close of the 19th century, as to the war between Spain and the "Young giant of the West?" Can we perceive any parallel between the 11th, 12th, and 13th century Crusades and that of the 19th? Both have been impelled by a force beyond human conception. History has told us why the Old Crusades were undertaken—viz., for the Salvation, the conservation of the doctrines of Christ, which was for Humanity's sake. Can any deny that the United States, almost unanimously, entered into the War for "Humanity's" sake and not for conquest or aggrandizement?

Our limits will not admit of the many extracts from various writers, in continuation of the history of the Knight Templar Order in France, England, Scotland, and Ireland, which could be made to show that, up to the close of the 18th century, and some years in the present century, the Order was in a measure intact in Europe, and consequently, when Masonry was introduced into the United States, very many of the brethren belonged to the Templar Order, and from them we may surmise that the several encampments which are mentioned in the history of Masonry in this country can trace their origin. This particular matter will engage our attention when we write the history of the Knights Templars in the United States in the appropriate chapter.

LIST OF GRAND MASTERS OF KNIGHTS TEMPLARS

1. Hugho de Payens, 1118.
2. Robert de Craon, 1136.
3. Everard des Barres or Barri, 1146.
4. Bernard de Tremelay, 1151.
5. Bertrand de Blanquefort, 1154.
6. Philip of Naplous (Native), 1167 to 1170.
7. Odo de St. Amand, 1170.
8. Arnold de Torroge or de Troy, 1180, Chief Preceptor; while St. Amand was a prisoner the Chief Preceptor died at Verona, 1185.
9. Gerard de Riderfort, 1185. Taken captive near Brook Kishon, 1187; surrendered October 2, 1187; seat removed to ancient Tyre, successfully defended against Saladin; Grand Master released, 1188; eleven cities given up as a ransom; Grand Master fell at siege of Acre, October 4, 1189.
10. Brother Walter, 1189. During four years of siege of Acre, 100,000 Christians perished, among them Patriarch Heraclius. Third Crusade, preached by William, Archbishop of Tyre, Richard Cœur de Lion, and Philip Augustus, King of France, arrived in Palestine, 1191.
11. Robert de Sable or Sabloil, 1191. Great battle of Ramlah was gained and city of Gaza taken by Templars, 1191. About this time three encampments were established in England, at Bristol, Bath, and York.¹ Those in Bath and York were in existence in the early part of the present century, the one in Bristol in active operation in 1855. King Richard, in the guise of a Templar, left Palestine October 25, 1192. Bro. Richard John Bridges was the Eminent Commander of this Ancient and Venerable body, probably the oldest Encampment of Knights Templars in the world.
12. Gilbert Horal, or Erail, 1195. Many strong fortifications were built; most celebrated was Pilgrims' Castle, which would hold a garrison of four thousand men.
13. Philip Duplessis, 1201. King John of England frequently resided at the Temple in London. He was there when he resigned England and Ireland "to his lord Pope Innocent the Third" and signed the "Magna Charta."

¹Letter of D. W. Nash, Secretary General H. E. for England and Wales, September 29, 1853. MS.

14. William de Charters became Grand Master. The Grand Master died at siege of Damietta, 1218.
15. Peter de Montague, Grand Preceptor of Spain, the Veteran Warrior, 1218. Damietta was surrendered to the Infidels, together with the prisoners of Tyre and Acre, and he obtained in return "the wood of the true Cross" and the prisoners at Cairo and Damascus; and the Sultan granted a truce for eight years,
16. Herman de Perigord, 1236. In this time a treaty was made with the Infidels to surrender again the Holy City to the Christians, 1242. In 1243 the Templars rebuilt the "formidable Castle of Saphet," In a great battle in 1243, near Gaza, with the Carizmians, a pastoral tribe of Tartars, which continued two days, the Grand Master was slain. Thirty-three Templars and twenty-six Hospitalers alone escaped. Pope Innocent IV. ordered a new crusade to be preached, but very little assistance was obtained.
17. William de Sonnac, "A Veteran Warrior," 1245. The brethren in the West« era Preceptories were summoned to Palestine, The Carizmians, in 1247, were annihilated. The Grand Master presented to Henry III. "a magnificent crystal vase, containing a portion of the blood of our Lord Jesus Christ."¹ The Templars, with Louis IX. of France, took Damietta in 1249. Louis was taken captive; afterward released by paying ransom. In 1250, in a battle near the Tanitic branch of the Nile, the Grand Master lost one eye, but was enabled to cut his way through the lines of the enemy with only two knights; however, soon after, on the first Friday in Lent, he lost the other eye and was killed.
18. Reginald de Vichier, Grand Marshal, 1152. King Louis, after his release from captivity, aided in placing Palestine in a defensible condition.
19. Thomas Berard, 1256. The country was in a miserable condition. The Bibars or Benocdar, the Sultan of Egypt, with 30,000 cavalry, had invaded Palestine (1262), The Infidels took all the strongholds with the exception of Pilgrims' Castle and Acre. When the Castle of Saphet capitulated (1266), Benocdar put the whole garrison to death, because of their refusal to become Mahomedans. Edward, afterward Edward I. of England, drove the enemy back to Egypt; a truce lasting ten years was made.
20. William de Beaujeu was elected, May 13, 1273. Lists of Strict Observance give Robert —, who died in 1277, and then Pierre de Beaujeu.

This closed the Seventh and last Crusade. An effort was made by the Pope to raise another crusade; having, however, died in the meantime, with him all hopes of assistance from Europe died also. In 1291 the city of Tripoli and fortress of Margat were taken by the Infidels, and very soon thereafter, in the third year from recommencement of hostilities, Acre and the Pilgrims' Castle were all that were left to the Christians.

¹ Gourdin. Hist. Sketch, p. 12.

Acre was besieged on April 4th of the same year by Sultan Kahlil with 60,000 horse and 140,000 foot, and Acre had only 12,000 men under the Grand Master, "exclusive of the forces of the Templars and Hospitalers, with 500 foot soldiers and 200 cavalry commanded by the King of Cyprus."

Addison says: "So the garrison, which plainly saw they could not hold out long without a commander that was skilled in the art of war, elected Brother Peter Beaujeu, Grand Master of the Templars, a general of great experience, who had grown old in the command of armies, to be Governor of the place. Necessity of State, the truest interpreter of merit, made them offer the command to him, and it was done even with the consent of the King of Cyprus himself, who on a juncture of such importance and so full of danger was well contented to forget the title, which he had always affected, of King of Jerusalem."¹

Beaujeu was killed on May 18, 1291, and the three hundred knights who had fought their way to the Temple appointed Theobald de Gaudini Grand Master (Addison fails to give his first name; the Manual calls him Theobaldus Gaudinius).²

The Grand Master, however, and a few companions, with the treasure of the Order and ornaments of the Church, May 19th, at night, made their escape through a secret postern, and safely reached Cyprus.³ The rest of the Knights were buried beneath the ruins of "the Tower of the Master" when it fell, victims to their resolution to protect, at all hazards, the Christian women from insult and violation by the ruthless Infidels, and to their jealous devotion to the religion of the Cross. The power of the Latin Church in the East was extinguished by the destruction of the city of Acre. Limisso, in Cyprus, became the chief seat of the Order. However, from Vertot, we learn that an anonymous writer says that Knight Roger succeeded Beaujeu as Grand Master, and that he established the seat of the Order at Ninove, a town of Cyprus, which belonged to the Order. He also says that Jean de Gaudin succeeded Brother Roger.⁴

James de Molay, Preceptor of England, was elected Grand Master by a general Chapter of the Order in 1297. He is thus described by an enemy of the Order, a French writer: "Molay was the younger brother of one of the most distinguished houses of the 'Comte' of Burgundy. His elder brother possessed, in that country, a large property, and had a higher position. From his youth, Molay had been a member of the Order; in it he had acquired a great reputation. He had passed through all the degrees, and had become a Grand Prior.

¹ Vertot, vol. i., p. 171, says: "The Sultan tempted the Grand Master with offers of immense sums, to which the Templar made no answer but by showing a just indignation at the Sultan's fancying him capable of listening to him."

² "Manual," p. 252, and Lists of Strict Observances.

³ "Addison," p. 395. Vertot (vol. i., p. 173) says: "Out of five hundred Templars that behaved themselves so bravely in the defense of Acre, only two escaped, who, getting into a boat, landed happily on the coast of Cyprus."

⁴ Vertot, vol. i., p. 174. "Histoire de lab. de l'ord. des Templiers," p. 5. In another place he calls Gaudin, Monaqui de Gaudin, p. 24.

He was a lord of true merit; brave, of high intellect, of a mild and amiable character; his morals were pure, and his character without a reproach. He had always appeared with distinction at the Court of France, and had been fortunate enough to merit the favor of the King, who, in 1297, had selected him to hold, at the baptismal font, M. Robert, his fourth son. He was still held in such high esteem, when all the lords of the Court, who were yet ignorant of the hatred of the King, and his fatal determination against the Order, concerning which he preserved the most profound secrecy, aided in the election of Molay, even believing that they were affording a pleasure to that prince."

An endeavor was made by the Grand Master to recover Palestine in 1302, which the Sultan of Egypt defeated, with a loss to the Knights of one hundred and twenty. This closed the efforts for the recovery of the Holy Land, and the usefulness of the Knightly Orders as military organizations ceased. No longer did the people of the several nations in Europe manifest any zeal in the Crusades. The Templars, by many grants, from time to time, had become possessed of large estates, and they were very rich, and consequently very powerful. Instead of Christendom having now any use for these military Orders, who were so prosperous from the donations of the lords and princes, they were jealous of them.

The clergy were also in constant dispute with them, and the Pope had been compelled to intervene. By some means Philip had become manifestly displeased with the Templars, and it is asserted that his need of money, and his own avarice, prompted him to suppress the Order, that he might enjoy the benefits to be derived from the confiscation of their riches and estate.

GRAND MASTERS OF THE ORDER OF ST. JOHN, RHODES, AND MALTA, A.D. 1099

TO 1799.

1. Gerard Tunc, installed, 1099; died, 1118.
2. Raymond du Puys, installed, 1118, died, 1160.
3. Otteger Balben, installed, January, 1160.
4. Arnaud de Comps, installed, 1162.
5. Gilbert d'Ossaly (De Saily), installed, 1163; drowned, 1170.
6. Castus, installed, 1170.
7. Joubert (De Osbert), installed, 1175; died, 1177.
8. Du Moulin (Roger de Moulin), installed, 1177; killed, May 1, 1187.
9. N. Gardiner, installed, 1187; died at Askalon, 1187.
10. Godfrey de Duison, installed, 1192; died, 1201.
11. Alphonso, installed, 1202; abdicated.
12. Godfrey Lo Rath, installed, 1205; died, 1208.
13. Gawen de Montacute, installed, 1208; died, 1231.
14. Bernard de Taxis, installed, 1231.
15. Girino, installed, 1232; died, 1236.
16. Bertrand de Comps, installed, 1236; slain in battle, 1241.
17. Peter de Villebride, installed, 1241; slain in battle, 1243.
18. William de Chateau-neuf, installed, 1243; died, 1259.

19. Hugh de Revel, installed, 1259; died, 1278.
20. Nicholas de Lorgne, installed, 1278, died broken-hearted, 1289.
21. John de Villiers, installed, 1289; died, 1297.
22. Otho de Pins, installed, 1298.
23. William Villaret, installed, 1300; died, 1306.
24. Fulk de Villaret, installed, 1307; deposed, 1319.
25. Heiion de Villannoba, installed, 1319; died, 1346.
26. Deodate de Gozon, installed, 1346; died, December, 1353.
27. Peter de Cornillan, installed, 1354; died, 1355.
28. Roger de Pins, installed, 1355.
29. Raymond de Berenger, installed, 1365; died, 1374.
30. Robert de Julliac, installed, 1374; died, 1377.
31. Heredia Castellan d'Emposta, installed, 1377.
32. Richard Caracciolo, installed, 1383; died, 1395.
33. Philip de Naillac, installed, 1396; died, June, 1421.
34. Antony Fluvian, installed, 1421; died, October 26, 1437.
35. John de Lastic, installed, 1437; died, May 19, 1454.
36. James de Milly, installed, 1454; died, August 17, 1461.
37. Peter Raymond Zacosta, installed, 1461; died February 14, 1467.
38. John Orsini, installed, 1467; died, 1476.
39. Peter D'Aubusson, installed, 1476; died, June 30, 1503.
40. Almeric Amboise, installed, 1503; died, November 8, 1512.
41. Guido de Blanchefort, installed, 1512; died, 1512.
42. Fabricius Carretto, installed, 1512; died, January, 1521.
43. Philip Villers de l'Isle Adam, installed, 1521; died, August 22, 1534.
44. A. del Ponte, installed, 1534; died, November, 1535.
45. Desiderio di s. Jalla, installed, 1536; died, September 26, 1536.
46. Homedez, installed, 1536; died, September 6, 1553.
47. Claudius de la Sengle, installed, 1553; died, August, 1557.
48. John de Valetta, installed, 1557; died, August 21, 1568.
49. Peter del Moate, installed, 1568; died, January 20, 1572.
50. Cassiere, installed, 1572.
51. Verdale, died, 1595.
52. Garzes, installed, 1595; died, February, 1601.
53. Wignacourt, installed, 1601; died, 1622.
54. Vasconcellos, installed, 1622.
55. De Paul, installed, 1622; died, 1636.
56. Paul de Lascaris Castellar, installed, 1636; died August 14, 1657.
57. Redin, installed, 1657; died, February 6, 1660.
58. Clermont de Chattes Gessan, installed, 1660; died, June 8, 1660.
59. Raphael Cotoner, installed, 1660; died, 1663.
60. Nicholas Cotoner, installed, 1663; died, April 29, 1680.
61. Caraffa, installed, 1680.
62. Wignacourt, installed, 1690; died, September 4, 1697.
63. Perrellas, installed, 1697; died, February, 1720.
64. Zondadari, installed, 1720; died, 1722.
65. Anthony Manoel de Vilhena, installed, 1722; died, 1742.

- 66. Pinto de Fonseca, installed, 1742.
- 67. Ximenes, installed, 1773; died, November, 1776.
- 68. Rohan, installed, 1776; died, 1797.
- 69. Hompesch, installed, 1797.

LIST OF RULERS OF THE LATIN KINGDOM OF PALESTINE, A.D. 1099-1205.

- I. Godfrey de Bouillon, crowned, 1099; died, July 11, 1100.
- II. Baldwin I., crowned, 1101; died, 1118,
- III. Baldwin II., crowned, 1118; died, 1131.
- IV. Foulques (Fulk), Count Anjou, crowned, 1131; died, 1144.
- V. Baldwin III., crowned, 1144; died, 1162.
- VI. Almeric, crowned, February 18, 1162; died, 1174.
- VII. Baldwin IV., crowned, ; abdicated, 1184.
- VIII. Baldwin V., crowned, 1184; died, 1186.
- IX. Sibylla and her husband, Guy de Lusignan, crowned, 1186, Sibylla died, 1191; Guy abdicated, 1192.
- X. Henry, Count of Champagne, crowned, 1192, killed by accident, 1194.
- XI. Amauri, King of Cyprus, crowned, 1194; died, 1205.

The following lists of Popes of Rome A.D. 1088 to A.D. 1316, will be found useful for reference. The authority is Haydn's *Dictionary of Dates*.

 Benedict XI., 1303.
 Clement V., 1305.
 John XXII., 1316.

As a comment upon the chronological confusion of the times we append from Dr. Barclay's *City of the Great King*, a second Table of the Crusades:

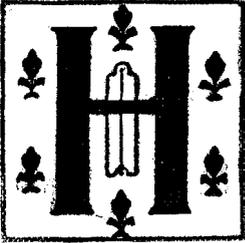

Crusade I., 1096-1099. Capture of Jerusalem.
 Crusade II., 1147.
 Crusade III., 1189.
 Crusade IV., 1202.
 Crusade V., 1217.
 Crusade VI., 1238.
 Crusade VII., 1243.
 Crusade VIII., 1270.

Dr. Barclay wisely adds: "The cessation of the Crusades was not produced by any abatement of the love of arms, or of the thirst of glory to the chivalry of Europe. But the union with these martial qualities, of that fanatical enthusiasm which inspired the Christian warriors of the 11th century, had been slowly but almost thoroughly dissolved."

¹After the Seventh Crusade and the surrender of all the places in Syria, there were several expeditions inaugurated, but the seventh was the last crusade.

CHAPTER LII

THE INTRODUCTION OF KNIGHT TEMPLARISM INTO AMERICA

HAVING given in Chapter LI. a short history of the Knights Templars during the Crusades, and the suppression of that magnanimous and Christian Order by the Church of Rome, aided by its wretched and villanous adherents, the various sovereigns of Europe; and having also shown the remnants of the Order down to recent times, in England and France, it becomes a pleasing task to trace, as nearly as possible, the connection between those noble spirits, who gave their fortunes and their lives for the cause of Christianity against the Infidels and Mohammedans of Asia, and our modern Templars, who do not use the material implements of a carnal warfare, but employ the legitimate symbols of the Knightly Armor, to contend against the world, the flesh, and the devil.

All of our recent writers on the Order of the Temple agree, that there can not be found any direct connection between the ancient and present Templar systems; yet, like the sunken rivers found in many parts of the world, where we can trace the waters thereof, after they disappear on one side of a mountain, and discover where these same waters again appear, and proceed onward to the sea; the same flowing spirit which was manifested in the lives of the original Templars, from their origin in the 12th century until they disappeared beneath the obstructions placed in their path by the monarchies of Europe, and the succeeding prejudices of the peoples of each, we can now clearly trace in the Templar rituals of England and the United States the fundamental principles of the ancient Order, of "Fidelity, Zeal, and Obedience," without those superstitions which always have been the accompaniments of the Priestly Orders of the Romish Church. Those superstitions of the early Templars were abolished by them after the close of the Crusades. The Tem-

plars, very soon thereafter having learned the deceptions of priestcraft, failed to pay the required respect and obedience to the hierarchy; and, consequently, were antagonized by the Church, and their existence as an Order soon thereafter terminated. The modern Templars pay due allegiance to, and worship, the risen Saviour, in spirit and in truth, with no unmeaning ceremonies.

We learn from various writers that, in the progress of Freemasonry in the American Colonies, somewhere about the latter half of the 18th century, some officers of an Irish regiment claimed to be possessed of the Knight Templar Order, and through them, several of our own Masons received the several appendant degrees and the Order of Knight Templar. Patents issued to such Knights, bearing dates as early as 1783, are now extant, notably one from Charleston, South Carolina. Toward the close of that century there appeared several appendant degrees, unknown to earlier times, such as Excellent, Superexcellent, Royal Arch Masons. In some of the New England States these degrees were promulgated and conferred under the charters of Blue Lodges; such as the body in the City of Washington in 1794—two record books of which the present writer had the honor of discovering among the old papers in the office of the Grand Secretary of the Grand Lodge of the District of Columbia in 1875, which no living Mason in the District could give an account of. This body was called the "Excellent, Superexcellent, Royal Arch Encampment." The first book ran from 1795 to 1799; and then the body closed its labors and divided their funds. The second book was commenced in 1804 when the same body, under the charge of Companion Philip P. Eckles, of Baltimore, resumed its labors and continued until August 21, 1808, when the book ends abruptly after the annual election of officers.

A book was published by Companion Joseph K. Wheeler, of Connecticut, which gave an account of similar bodies, bearing the same title, in the State of Connecticut. From these came the first independent particular Royal Arch Chapters, and from which Thos. Smith Webb and John Hanmer, both from Temple Chapter of Albany, New York, formed the first Grand Chapter of New England and New York in 1798, the history of which will be found under Capital Masonry (Chapter XLIX.). Also under the chapter relating to the history of the Ancient and Accepted Scottish Rite will be

found the writer's views as to what was the reason for these degrees being brought into the Masonry of the Blue Lodge, which we here casually mention as having been part and parcel of the very many appendant degrees communicated to the Brethren who had passed through the curriculum of the twenty-five degrees of the Rite of Perfection, or the Ancient and Accepted Rite of 1762-65, which was, in 1802, at Charleston, enlarged into thirty-three degrees of the Ancient and Accepted Scottish Rite by the Mother Council. It is well known to all well-read and advanced Masonic scholars, that all degrees of Masonry above the third degree, or so-called Master Mason's degree, are the outcome of the "thousand and one degrees" promulgated and sometimes worked in France and Germany from the middle to the close of the 18th century. Until the emperors of the East and West formulated the regular twenty-five degrees of the A.·A.·A.·R.· in 1762, those various degrees were communicated to all who desired, and were willing to pay for them. Within the regular twenty-five degrees were found the Arch and Templar degrees. Also from two of them the present Red Cross of the Commandery was formulated, which degree has no connection with the primitive Red Cross of "Rome and Constantine," attributed to Constantine the Great.

As to the Templar degree ritual, it is entirely different from the English ritual, as the latter, at the present day, is different from the ritual of the last century at its close and the commencement of the present. We have a certified copy of that ritual made as early as 1801 from an older ritual, which is also a copy from a much older one, which was sent to Brother General Albert Pike, and by him given to the present writer.

The first authentic information that we have of the Templar Order in the United States, is found in the history of St. Andrew's Royal Arch Chapter, which held its first recorded meeting, August 28, 1769, in the Mason's Hall in Boston, under the charter of St. Andrew's Royal Arch Lodge, from the Grand Lodge of Scotland, and the record of that date shows that the degree of Knight Templar was conferred.¹ At that time, and somewhat later, the bodies were termed "Excellent, Superexcellent, Royal Arch Encamp-

¹ Oration of Companion W. Sewall Gardner, at Centennial of St. Andrew's Chapter, pp. 42, 43.

ments," as before stated. The records of that Chapter show that "Brother William Davis came before the Lodge, begging to have and receive the parts belonging to the Royal Arch Masons, which being read, was received, and he unanimously voted in, and was accordingly made by receiving the four steps, that of Excellent, Super-excellent, Royal Arch, and Knight Templar."¹ In all the histories of the chapters in the New England States, the above titles were first used; as also in the Chapter organized in the City of Washington, under the Charter of Federal Lodge. The Red Cross does not appear in any of those old bodies. It has occurred to the writer that after the Templar degree had been dropped by Thos. Smith Webb, when in 1796 the movement had been inaugurated to institute the General Grand Chapter of New England and New York, that some of the Brethren formed a separate body for the Templar Order; and wishing to have the "Red Cross of Constantine" united with the Templar degree, as was the case after the Crusades, they must have mistaken the united degrees of the 15th and 16th for the "Constantine Red Cross." At all events, there is considerable difficulty in accounting for the curious mixture of the Persian Mysteries with the solemn ceremonies of the Christian Order of the Temple. Some writers say that "the records of Kilwinning Lodge, of Ireland, warranted 8, in 1779, show that its Charter was used as the authority for conferring the Royal Arch, Knight Templar, and Rose Croix degrees as early as 1782; but the Red Cross and the Rose Croix are two different degrees, and should not be confounded. It is thought possible that the Irish lodges, having the High Knight Templar degree, communicated it to their American Brothers prior to the Revolution, though there is no evidence of it; on the contrary, the records show that it was conferred first (1769) in America, and afterward in Ireland, 1779."²

Bro. Theo. S. Parvin says: "In 1766 there were two Military Lodges stationed at Boston: No. 58 on the register of England, connected with the Fourteenth Regiment, and No. 322, register of Ireland, attached to the Twenty-ninth Regiment. As early as 1762 St. Andrew's Lodge, of Boston, applied to the Grand Lodge of Scotland, from which it had received its Warrant, for leave to

¹ Oration of Companion W. Sewall Gardner, at Centennial of St. Andrew's Chapter, pp. 42, 43.

² Bro. Fred. Speed in "History of Freemasonry," p. 704.

confer the Royal Arch degree; and subsequently, under this Warrant, it conferred both the degrees of Royal Arch and Knight Templar. Even prior to this, as early as 1758, Lodge No. 3, at Philadelphia, working under Warrant as No. 359, granted by the Grand Lodge of All England, also worked as a chapter, and conferred the Royal Arch degree; but, as previously stated, we do not find that this Chapter ever conferred the degree of Knight Templar."¹

Some writers suppose that it was possible "that the degree of Knight Templar was conferred in Military Lodges and perhaps in other Lodges prior to the Revolutionary War."²

From about the years 1776 to 1783, during the War of Independence, but little attention was given to Masonic organization except in the military lodges. After peace had assumed her sway and the country began to thrive in all material interests, and the various Grand Lodges of the separate States were organized, what were termed the "higher degrees," which had been, up to that period, always conferred in the lodges under the sanction of their Warrants, became the subject of a more independent character. We find from the various histories of the Royal Arch Chapters, especially in the New England States, that in various towns and cities independent bodies were organized, wherein the degrees of Royal Arch, Excellent, and Superexcellent Masters were attached to the Templar degree; and in some instances, the Red Cross, whatever ritual of that degree may have been used in its conference, was given.

"Few of these organizations have continued until the present time, and still fewer have left any records of the earlier years of their existence. An occasional discovery of an ancient diploma, or other fragment, has revived previously formed opinions as to which is the elder organization; but for the reason that bodies were self-constituted, and consisted of individuals who, being in possession of a degree, called to their assistance the requisite number of other qualified brethren, and gave the degrees to certain chosen spirits, and then dissolved never to meet again, it is manifest that there can be no gathering together of the facts; and that beyond an occasional hint, received from the meager record of some old lodge-book, as it may be unearthed from its hiding-place, nothing further is to be looked for. As time passed on, and these occasional gatherings became more frequent, when the number of Templars had increased

¹ Bro. Fred. Speed in "History of Freemasonry," p.. 703.

² Ibid.

sufficiently, and more permanent organizations began to be made, out of these emergency bodies grew permanent ones."¹

There has been much discussion in the various older jurisdictions as to the first duly organized encampment (commandery), and we do not know if the question has been finally settled. From the Proceedings of the Grand Encampment of 1883 we learn from the Address of Grand Master Dean that there was "Indisputable evidence that the degrees of Knight of the Red Cross and Knight Templar were conferred in Charleston, South Carolina, in a regularly organized body as far back as the year 1782."²

"The South Carolina Encampment, No. 1, of Knights Templars and the Appendant Orders was established in 1780, as is evident from the old seal in our archives. But it does not appear from what source our ancestors derived their first Charter, all of our records previous to November 7, 1823, having been lost or consumed by fire. It is clear, however, that this encampment was in active operation in 1803, and continued so until long after the date of our oldest record, for, on December 29, 1824, it was "Resolved that, in consideration of the long and faithful services of our Most Eminent Past Commander, Francis Sylvester Curtis, *who regularly paid his arrears to this Encampment for more than twenty years*, he is considered a life-member of this Encampment, and that his life-membership take date from November, 1823."³ In a "list of various Masonic degrees," in Cole's *Ahiman Reson*, extracted from a publication in 1816, the Knight of the Red Cross is termed the ninth degree, the *Knight of Malta* the tenth, and the *Knight Templar* the thirteenth; and they are said to be conferred in the Sublime Grand Lodges in Charleston, S. C., in the City of New York, and in Newport, R. I.⁴ On November 7, 1823, that encampment, which was then regularly working at Sir Knight Roche's Asylum, under the command of the M. E. Sir Moses Holbrook, M.D., Grand Commander, received "*the authority from the G. G. E.*" to work. At the following meeting (November 15th) Moses Holbrook was re-elected to the office which he then held, John Barker was elected

⁴ "Freemason's Library," p. 317.

an honorary member, January 16, 1824. It was, at this time, the practice to introduce the *candidates separately in both degrees*. On January 18, 1824, James Eyland was created a Templar. The encampment met January 30, 1824, at Sir Knight H. G. Street's Asylum, and the meetings, which had hitherto taken place on *every* Friday evening, were changed, February 15, 1824, to the last Wednesday in each month, and the last Wednesday in November was fixed for the annual election. March 31, 1824, Sir John Barker was voted to be recommended to be Grand Visitor for the Southern States.¹

June 24, 1824, M. E. and M. W. Henry Fowle, Deputy General Grand Master of the G. G. Encampment of the United States of America, granted a Charter at Boston (S. C), countersigned by John G. Loring, G. G. Recorder, to Benjamin Thomas Elmore, and eleven others, to form, open, and hold *Columbia Encampment*, No. 2. Brother Elmore was appointed the first Grand Commander, E. H. Maxey, Generalissimo, and John Bryce, Captain General. The Charter is in the Archives of Richland Lodge, No. 39, A. F. M. at Columbia, S. C, with some "rough sketches of their meetings," which were held in the hall of that lodge.²

The number of members increased to thirty or more, their meetings continued about four years, and from some cause ceased to exist.³

There was at that time no Grand Encampment in South Carolina, as we find from the following:

"February 23d, 1825, the Encampment was informed that the three first officers had, in accordance with a previous resolution giving them discretionary power in the matter, recommended *Georgetown Encampment* to the G. G. Encampment for a charter."⁴

As an interesting incident in the history of this encampment, we make the following extract:

"LA FAYETTE.

"The members of South Carolina Encampment, No. 1, were summoned to meet at Sir H. G Street's, on the 16th of March, 1825, to wait on General La Fayette agreeably to a previous

¹ MS. Records of South Carolina Encampment, No. 1.

² Gourdin, p. 30.

³ Ibid.

⁴ Ibid., p. 31.

arrangement with him. The following Officers and Members attended precisely at half-past 2 o'clock."¹

In consequence of a gap in the minutes from this time until January 26, 1827, no further information could be obtained concerning this very interesting occasion.

September 18, 1826, the Grand Encampment of the State of South Carolina was represented in the G. G. Encampment at New York by Sir John Barker, proxy for M. E. Moses Holbrook, Grand Master, and Sir William H. Jones, proxy for the M. E. Sir William E. Lathrop, G. Capt. Gen'ls, and the Committee, to whom were "referred the proceedings of the Officers of the G. G. Encampment since the last Meeting" (September 16, 1819), reported. "That these have been established, with the approbation of the G. G. Officers, Grand Encampments in the following States; to wit: New Hampshire, Vermont, Virginia, North Carolina, South Carolina, and Georgia."²

During the year 1819, Beaufort Encampment of South Carolina, at Beaufort, was established, which continued about four or five years. The records were burned up.³

Jos. M'Cosh, who was afterward an Ins. Genl. of the thirty-third degree, resigned November 28, 1827. He was the Recorder, November 7, 1823. During the year 1828, Sir James Eyland was Grand Commander. Many resignations took place.

In 1829, Sir James Eyland, G. Master, represented the Grand Commandery in the G. G. Encampment. He was elected that year G. G. Capt. General, and in 1832 was elected G. G. Generalissimo.⁴

About this time the meetings of the S. C. Encampment were very poorly attended. May 12, 1830, there was not a quorum, nor in October 11, 1830. The encampment was adjourned to the stated meeting of December. The following note appears:

I certify that no quorum ever after assembled. I met one or two only after the above note of an attempted meeting. Sir J. W. Rouse handed me over the books and papers all for me to deliver up to this Encampment, some time in 1832, with a letter of resigna-

tion at the same time. The books and papers of Grand Encampment of S. C. and all were flooded when Sir John May's workshop was burned. I received the remains in 1840.

(Signed)

MOSES HOLBROOK,
P. Gr. Commander.

I. W. Rouse died 23 April, 1834 Past Gr. Master of Gr. Encampment of South Carolina. The record of the G. G. Encampment does not show any representation from the G. Encampment of South Carolina subsequent to 1829.¹

October 14, 1841, seven of the former members of South Carolina Encampment, among them the Grand Commander J. S. Burges, met at Rame's Hall, in Meeting Street, for the purpose of reviving it, after its long nap of eleven years and more.²

January 27, 1842, it was Resolved that the degree of Red Cross should be conferred upon Sr. Knight Benjamin Greer, on his paying \$5, with the condition of his becoming a member of this encampment, he having received the other degrees before in Europe.³

A dispensation was issued to the encampment by Sir Jos. K. Stapleton, D. G. G. Master, May 17, 1843, to continue their labors, the Warrant having been burned up. This dispensation was brought to the notice of the encampment only on October 19, 1843, by Rev. A. Case, the G. Chaplain. In 1844, the G. C, Sir A. Case, represented South Carolina Encampment in the G. G. Encampment, and during this session a charter was ordered to that encampment free of charge, *in consequence of the loss by fire of a former one*. This charter was reported to the meeting, March 15, 1845, as having been received.

February 9, 1853, Joseph Hunter, P. D. G. M. of Savannah, Ga., was made a K. R. C. and K. T., and *in token of respect* his fees were returned to him, and he was elected a life member.

In 1853, M.·E.·. A. G. Mackey represented the encampment in the G. G Encampment, and was elected G. G Warden.⁴

December 27, 1854, the encampment acted as an escort to the Grand Lodge of South Carolina at the celebration of the Centennial Anniversary of the formation of a Provisional Grand Lodge.⁵

¹ B. B. French.

² MS. Records of South Carolina Encampment, No. I. The last meeting held was March 9, 1830.

³ Ibid.

⁴ B. B. French.

⁵ MS. Records of South Carolina Encampment, No. 1.

In 1855, South Carolina Encampment was the only one in existence in the State.¹

Continuing the interesting history of this, one of the oldest organizations of Knights Templars, we refer to the Proceedings of the Grand Encampment of the United States for 1883:

The Grand Master states in his address that "on 8th of December, 1880, I issued a dispensation to South Carolina Commandery, No. 1, to appear in public in full Templar costume on the twenty-ninth day of December, 1880, for the purpose of celebrating the one hundredth anniversary of its organization. I also issued dispensations for a like appearance in public, to join in the celebration to Columbia Commandery, No. 2, Georgia Commandery, No. 1, and Palestine Commandery, No. 7."²

As the question of when the first encampment in the United States was regularly organized is of great interest, we continue our notice of the introduction of the Templar Order of Knighthood into South Carolina, and show what Brother A. G. Mackey says of it in his *History of Freemasonry in South Carolina*.³ He quotes from Gourdin what we have already copied, and then continues: "I have been unable to find any reference in the cotemporary journals of the day to the existence of South Carolina Encampment, No. 1, at that early period. I have, however, been more successful in obtaining indisputable evidence that the degrees of Knight of the Red Cross and Knight Templar were conferred in Charleston, in a regularly organized body, as far back as the year 1783, and I have no doubt that the seal with the date 1780, to which Gourdin refers, belonged to that body and afterward came into the possession of South Carolina Encampment."⁴

"The proofs of what I have stated is contained in a small compass but the testimony is irrefutable. I have in my possession a diploma, written in a very neat chirography on parchment, with two seals in wax attached, one in red, of the Royal Arch, and the other in black, of the Knights Templar. The upper part of the diploma contains four devices within four circles, all skillfully executed with the pen. The first device, beginning on the left hand, is a star of seven points, with the ineffable name in the

¹ Gourdin, p. 33.

² Proceedings of the Grand Encampment of the United States, 1883, p. 58.

³ *Ibid.*, p. 58.

⁴ *Ibid.*, p. 59.

center, and the motto, '*Memento Mori*;' the second is an arch on two pillars, the all-seeing eye on the Key-stone, and a sun beneath the arch, and '*Holiness to the Lord*' for the motto; the third is the cross and brazen serpent, erected on a bridge, and '*Jesus Salvator Hominum*' for the motto; and the fourth is the skull and cross-bones, surmounted by a cross, with the motto, '*In hoc signo vinces.*' The reference of the three last devices is evidently to the Royal Arch, the Red Cross, and Templar degrees. The first is certainly a symbol of the Lodge of Perfection, and hence, connectedly, they show the dependence of the Order of Templarism in the State at that time upon the Ancient and Accepted Rite." In the Proceedings is a heliotyped copy of the diploma, which is here shown. The original was placed in the possession of the Grand Master, Benjamin Dean, by the son of Bro. A. G. Mackey, the Hon. Edw. Mackey, to be presented, in his name, to the Grand Encampment of the United States. The 'expense of this and other plates in the volume was paid for by the Grand Master. As a matter of considerable interest, we subjoin further remarks of the Grand Master in connection with the subject.

"On the 6th of May, 1881, Sir Knight W. J. Pollard, because of a conversation with him in Boston, wrote me a long and interesting letter on the history of Freemasonry in South Carolina and Georgia, in which he says: 'I find in Charleston, from the South Carolina Gazette, that at some period, not clearly defined, there was a Lodge established in West Florida called St. Andrew's Lodge, No. 40, and that it was moved to Charleston about 1783, and was Chartered as a York Lodge in the city of Charleston July, 1783, by the Grand Lodge of Pennsylvania.' "

"He also called my attention to the recovery by Sir Knight Jennison of valuable papers relating to the Encampment. Sir Knight Jennison also sent me copies of the papers. . . . A careful examination of the old diploma discovered on the Seal the words 'Lodge No. 40.' These words and figures were not so prominent as the other legends on the Seal, and seemed to have escaped the attention of Brother Albert G. Mackey.

"A careful examination disclosed the remains of two ribbons, under those in sight, showing that there were originally four seals attached to the diploma; one of these ribbons is quite rotten."

From an address delivered December 10, 1878, before the Grand

John W. Mason

We the High Priest, Cap^m Commandant
of the Red Cross and Cap^m General of that Most Holy and in-
vulnerable Order of Knights Templars of St. Andrews Lodge
No. 1 Ancient Masons, held in Charlestown South Carolina
Under Charter from the Grand Lodge of the Southern District of North Ame-
rica Do hereby Certify that the Braver our trusty and Well Beloved Brother
Sir Henry Beaumont hath passed the Chair been raised to
the Sublime Degree of an excellent super Excellent Royal Arch
Mason, Knight of the Red Cross and a Knight of that
Most Holy, Invincible and Magnanimous Order of Knights Tem-
plars, Knight Hospitaller, Knight of Rhodes and of
Malta, which several Orders are above delineated, and he has
Conducted himself like a true and faithfull Brother, we affectionately
recommend him to all the Fraternity of Ancient Masons
round the Globe wherever assembled.

Given under our hands, and seals of our Lodge this

1 day of August 1791 thousand seven hundred and eighty three, and of
Malta 3517

No. 1st King
W. M. Nisbett, 2nd King

R. W. Mason, Recorder

Lodge of South Carolina by M. W. Wilmot G. De Saussure, P. G. M. of South Carolina, we quote "that the Warrant for No. 40 was granted to Brethren formerly of St. Andrew's Lodge No. 1, West Florida, and then of Charleston, on the 12th of July, 1783."

Brother Frederick Speed says:

In summing up the evidence, this writer is compelled to regret the conclusions of *Fratres* Dean and Mackey, that there is "Indisputable evidence that the degrees of Knight of the Red Cross and Knight Templar were conferred in Charleston in a regularly organized body as far back as the year 1783." He then continues: "St. Andrew's Lodge No. 1 was not a Templar body at any time in its history. Like St. Andrew's Lodge of Boston, it was a Master's Lodge and the degrees were conferred, as evidenced from the diploma, under the sanction of its warrant as a Blue Lodge; but it seems to be established beyond a reasonable doubt, by the resolution relating to the membership of Francis Sylvester Curtis, that South Carolina Encampment No. 1 was a regularly organized Templar body as far back as the year 1804, and probably earlier. It was, like all older encampments, self-created, and worked without a charter, until the year 1823, when it was "reopened in conformity with the Constitution" of the General Grand Encampment of the United States, at which time, it appears from the petition—and resolution of the encampment embraced therein—

"That on diligent search being made in the archives, it clearly appears that this encampment was in full operation under the sanction of a warrant of 'Blue' Lodge, No. 40, upwards of thirty years ago, and continued in operation many years subsequent; and has, time out of mind, caused to be made and used a common seal. It also further appears that the said encampment has lain dormant for several years past. . . .

"*Resolved*, That the M. E. Sir James C. Winters, together with the Recorder, be authorized to forward the necessary documents to prove the existence of this encampment prior to the year 1816, and obtain the desired recognition."

Extract from the minutes.

(Signed) JOSEPH McCOSH,

*Recorder pro tem.*¹

The question of "Regularity" here presents itself as to the "Validity" of the Templar organizations as it does as to the "Validity" of the Capitular degrees, not only in the United States, but originally in Europe.

From the very first organization of the Grand Lodge of England in 1717, all Masons agree that no single individual has any prescriptive right or prerogative to communicate any knowledge of a "Rite" or any part of its *ritual*, unless so authorized by the "Con-

¹ Grand Encampment Proceedings, 1883, p. 172.

stitution "under which said *ritual* is promulgated. The Altar obligations, of all the Rites, provide against any such violation of the "Constitution." In the Section VIII. of the New Regulations of 1738 we find the following as an amendment to the Section VIII. of 1723, viz.:

"VIII. Every Brother concerned in Making Masons clandestinely shall not be allowed to visit any Lodge till he has made due submission, even though the Brother so admitted may be allowed.

"None who make a stated Lodge without the Grand-Master's Warrant shall be admitted into regular Lodges, till they make due submission and obtain Grace.

"If any Brethren form a Lodge without leave, and shall irregularly make Brothers, they shall not be admitted into any regular Lodge, no not as Visitors, till they render a good Reason or make due submission.

"Seeing that some extraneous Brothers have been lately made in a clandestine manner; that is, in no regular Lodge, or by any authority or Dispensation from the Grand Master, and upon small and unworthy considerations to the Dishonour of the Craft:

"The Grand Lodge decreed, that no person so made, nor any concerned in making him, shall be a Grand Officer, nor an officer of any particular Lodge; nor shall any such partake of the General Charity, if they should come to want."

We have here the general principles upon which to base a judgment as to all legitimacy of Masonic work. The *innocent* parties, upon whom Masonic work has been commenced, are to be held blameless, and are to be admitted to fellowship, and those only are to be punished who were guilty of the irregular and *clandestine* work.

In the matter of the various parties, who without competent authority attempted to confer the degrees of the Commandery upon innocent Brethren, it appears, from all that we can learn from recent writers, that the several degrees of Red Cross, Knight Templar, and Knight of Malta were conferred, whatever may have been the several rituals, at that early period, and they were assumed to be correct. These germs, however obtained, came in time to be the veritable means for establishing the bodies, by which finally, and however irregularly conducted, the several State Grand Commanderies were organized. We have seen that from these have grown up, in the United States, a system of Masonic Templarism which is the most exten-

sive and influential body of men anywhere in the world, as we shall be able to demonstrate in the conclusion of this sketch.

We have carefully read and pondered over nearly all, if not quite all, the writings of reliable authors who have, as far as possible, culled from authentic documents and every source of legitimate information every item which could add to our knowledge of the introduction of the Templar and appendant orders into the United States; and we must deal with the subject as we have found it. It is barely possible that the fountain was impure at the beginning; but taking the system, as it is at the very close of the 19th century, where else in the world can we find such a body of United Praters, Masons, distinguished gentlemen, of all the useful professions, arts, sciences, and trades, as compose the Officers, Constituencies, and Members, scattered as they are, in all the States, Territories, cities, towns, and hamlets of this vast country? What is now the true status of Masonic Templary in the United States—with its total membership of 114,540 at the close of 1898?

In the admirable history of the Order by Lieutenant-Colonel W. J. B. MacLeod Moore, he is very persistent in challenging the Masonic Templary of the United States. He says: "I may appear to have frequently indulged in fault-finding with the system of *purely Masonic* Templary practiced in the United States of America, and am fully alive to the fact that the popularity of the degrees there among its most enlightened members is an argument stronger than all the criticism that can be brought against it; but in order to explain my objections, it was necessary to refer to the glaring discrepancies and inconsistencies existing, which prove the system to be not only false, but a perversion of the principles of the true Templar Order, from which it derives its name—merely an imitation Military *Masonic* degree—a parody upon the pure doctrines of the Ancient Templars."

Several pages are devoted to his view of these inconsistencies and discrepancies—too lengthy for our columns—and hence must refer our readers to his sketch.¹

In many things we must, of course, concur with him; but suppose we apply his method of criticism to our Modern Masonry, beginning with the early rituals of 1725 by Anderson and Desaguliers, all the

¹ "History of Masonry and Concordant Orders," p. 742 *et seq.*

way through the various Modifications of Martin Clare, Hutchinson, Dunckerley, and Preston, to the very last formed by the union in 1813 of the Modern and Ancient work of Hemmingway, which is the present ritual of the United Grand Lodge of England,—and compare all of the various forms with well-known *facts* as we have them in the sacred writings and history—and where will the ritualism of the three degrees of the Blue Lodge stand? where the ritualism of the Mark degree, where that of the R. A. Chapter?

We say, let the question, as to Orthodoxy of American Templarism, settle itself; all in good time; very, *very* few Templars in the United States know anything whatever of this controversy and

Where ignorance is bliss, 'twere folly to be wise

We have among our Members distinguished Clergymen of all our Christian denominations, but we are not aware of a single descendant of Jacob who is a Knight Templar. Our ceremonies all conduce to the idea of a pure Christianity. Let us therefore be content to let matters remain as they are; that each individual Member shall for himself interpret the ceremonies, and apply himself to the consideration of Christianity as his instructions in Christianity have dictated, according to his "FAITH."

It appears from all accounts of the introduction of the Order of Knights Templars into the United States, prior to the period of the War of Independence, that where there was any attempt to confer the Order, the same was mingled with the "Excellent, Superexcellent, and Royal Arch," the Templar degree following the Royal Arch. We have concluded that the Templar Order with appendant degrees of Red Cross, St. John's of Jerusalem, and Knights of Malta, were as legitimately conferred, and by the same authority, as were the degrees now constituting "Capitular" Masonry,

We will endeavor, in our list of Commanderies, which were subsequently organized as such in the different jurisdictions, to give authentically the first efforts to establish the Encampment degrees chronologically, until the firm establishment of State Grand Commanderies (Encampments) and the General Grand Encampment in 1816. We may make some errors, but trust that in the main we shall be found quite accurate in dates. In the pre-

ceding pages of this chapter, we have quoted various writers as to the workings of the Order in the different States; but there have been vagueness and uncertainty as to the dates given.

M. E. William B. Hubbard, General Grand Master of the General Grand Encampment of the United States, said:

"It is to be regretted that we have no authentic and reliable history of the first formation of the first Encampments, with the governmental rituals, as we now have them. For these, if I may be allowed the expression, are somewhat *Americanized*. I suppose that we owe the origin of the introduction of Templar Masonry into the United States to a distinguished Sov..Ins.. of the Scottish Rite."¹

The first notice of the Templar degree being conferred is found in the history of St. Andrew's Chapter of Boston, and the dates given are August 28th and September 17th, 1769, by the Grand Master of the Grand Lodge of Massachusetts, Wm. Sewall Gardner, in his oration at the centennial celebration of that chapter, September 29th, A. L. 5869.

We will now give the dates referred to in the preceding pages, in Chapters LI. and LII., and the States wherein the Templar degree was conferred.

CHAPTER LIII

THE GENERAL GRAND ENCAMPMENT OF KNIGHTS TEMPLARS IN THE UNITED STATES

THE true origin of the Grand Encampment of Knights Templars of the United States is involved in some uncertainty. In the first volume of the "Proceedings" of the Grand Encampment of the United States, from the Preface we learn that from its formation in 1816 the proceedings, and also those of the Second Conclave in 1819, were not printed until 1859; and at that session the Grand Recorder, Sir Knight Benj. B. French, presented the following paper:

"I have found it impossible to obtain a single set of the printed proceedings of this Grand Body from its origin. By the aid of our respected and distinguished former General Grand Recorder, Sir Charles Gilman, I succeeded in obtaining *two printed copies* of the proceedings of 1826, and more or less of these of each year up to 1847. By writing out from the original records the proceedings of 1816 and 1819, I succeeded in making two perfect copies of the proceedings up to and including those of 1856. One of these I sent to our M. E. Grand Master and the other I retained myself. These are, probably, the only perfect copies of our proceedings in existence, except the original written records in the office of the Grand Recorder. I respectfully suggest the propriety of having the proceedings up to and including 1856 reprinted. There are now no copies of the proceedings in my office anterior to 1847; only two of 1847, twenty-six copies of 1850, one hundred and four copies of 1853, and one hundred and thirty copies of 1856."

In pursuance of instructions given to the General Grand Re-

order, "What purport to be the Minutes of the 'Formation of the General Grand Encampment of Knights Templars of the United States,' was printed and distributed among the members of the Grand Body." The statements published were accepted as authentic, until within very recent years, when great doubts arose as to the correctness of the statements made as to those who constituted the membership of the Convention in 1816.

At the conclave in 1889, Past Grand Master James H. Hopkins presented a paper, showing the result of his examination as to the origin of the General Grand Encampment. This paper was ordered to be printed in the "Proceedings," and that, in a reprint of the older "Proceedings," the history of the formation should be corrected, in accordance with his statement. The committee, however, who had charge of the reprint, deemed it advisable to print the "Formation," as it was first printed, and as it appears in manuscript in the Minute Book of the General Grand Recorder, and to publish in the Preface the facts as discovered in the paper referred to. This report was signed by James PL Hopkins, W. P. Innis, and Wm. B. Isaacs, names well known and highly honored, as worthy of all credence, by every true and valiant Knight Templar.

We subjoin a few extracts from Knight Hopkins's paper, for a better understanding of the "Formation of the General Grand Encampment." That record states that "at a convention holden at Mason's Hall in the City of New York on the 20th and 21st June, 1816, consisting of Delegates or Knights Companions from eight Councils and Encampments of Knights Templars and Appendant Orders, viz.:¹

"Boston Encampment, Boston; St. John's Encampment, Providence; Ancient Encampment, New York; Temple Encampment, Albany; Montgomery Encampment, Newport; Darius Council, Portland, the following Constitution was formed, adopted, and ratified."

"Anyone investigating the history of the Order in this country, without any other information than this, would be bound to believe that this official record was entirely accurate and to be accepted as absolute verity. It can scarcely be doubted that those who, in

¹ Proceedings of the General Grand Encampment of the United States, 1891, Preface, pp. 3, 4.

1859, caused the first 'proceeding' to be disseminated, had implicit faith in the correctness of the statements." . . .

"I have recently had occasion to look more fully and deeply into the facts connected with the early history of the Order in this country, and with the formation of the Grand Encampment, and I submit some of the results of that investigation. None but the weak, or worse, will hesitate to make a frank admission of error of opinion, when discovered, rather than obstinately adhere to a position proved to be untenable."

"The Minutes of the Convention which formed this Grand Encampment, as first published in 1859, are a correct transcript from the manuscript on file in the Office of our Grand Recorder. How or why this entry was made, no living man can tell. That it is wholly inaccurate is perfectly demonstrable.

"The Official Minutes declare that the delegates from eight different Councils and Encampments, therein specified, met in New York on June 20 and 21, 1816, and formed the Grand Encampment.

"I have caused diligent search to be made for the records of the different subordinates mentioned. Some of them can not be found of a date early enough to throw any light on the subject; and of those still preserved there is no mention of any appointment of any delegates for the purpose named, nor any action indicating that the Council or Encampment had any part in the Work. The absence of any positive, affirmative Minute in matter of such importance is strong evidence that no such participation was had. But there exists not only negative proof that the subordinate sent no delegates to the Convention, but direct evidence that they did not.

"The Minutes of the Boston Encampment (Commandery), show that on May 28, 1816, the Treasurer was authorized to lend to the Grand Encampment (Commandery), the money in his hands to pay the expenses of the delegates from said Grand Encampment (Commandery) to the Convention referred to. Saint John's Encampment (Commandery), of Providence, by a vote, declined to make a loan to the Grand Encampment for the same purpose. Here is evidence on the records of two of the Commanderies that they did not, but that the Grand Commandery of that jurisdiction

did, send delegates to the Convention. Of the other Subordinates of Massachusetts and Rhode Island mentioned as participating, the Minutes of the one at Newburyport can not be found; those of Newport and Portland are silent.

"Then we have the positive testimony of the Minutes of the Grand Commandery of Massachusetts and Rhode Island, wherein it appears that on May 15, 1816, three delegates were appointed to confer with delegates from other Grand Encampments (Commanderies) upon the subject of a general Union of all under one head. On June 25, 1816, there is the report of these delegates and the action of the Grand Encampment (Commandery) of Massachusetts and Rhode Island approving of their action and changing the local Constitution so as to bring it into harmony with that of the General Grand Body.

"Although this official record is of no greater weight than that of our Grand Encampment, the corroborating and circumstantial evidence renders it conclusive that our record is wrong and that of Massachusetts and Rhode Island is correct.

"In addition to the Minutes referred to, more conclusive evidence has been discovered amongst the papers of Thomas Smith Webb. These papers were examined by our late Grand Master, W. Sewell Gardner, and by him vouched for as authentic and in Webb's handwriting. They consist of the Credentials of the delegates appointed by the Grand Bodies of Massachusetts and Rhode Island, New York and Pennsylvania, to represent them at a Convention in Philadelphia, a Minute of adjournment to New York with a copy of the Constitution there adopted.

"The Encampments (Commanderies) of New York which are reported to have had representatives in the Convention which formed this Grand Encampment were Ancient Encampment, New York; Temple Encampment, Albany; Montgomery Encampment, Stillwater.

"None of the early records of these bodies can be found, and the history of two of them is mainly traditional. It is quite certain, however, that neither of them belonged to the Grand Commandery of New York in 1816."

The truth of history requires of us to mention some things which may prove of interest, yet it will be found not to be very agreeable; yet like very much of the Ancient history of Masonry

in all its branches, we will find great irregularities, according to our present ideas of how Masonic bodies should be organized.

"In 1802, Boston Encampment was organized by ten Knights of the Red Cross without a Warrant from any competent power.

"In the same year St. John's Encampment, of Providence, was formed without authority from any source by six Sir Knights.

"Darius Council of Portland was organized by three Knights of the Red Cross in 1805, when after admitting two more members, they applied to Massachusetts for recognition."

In 1795 at Newburyport an Encampment was organized without any authority. In Newport, several Royal Arch Masons deputed Companion Shaw to visit New York, where the Orders of Knighthood with other degrees were conferred upon him. The Consistory there gave him a Warrant authorizing him to confer the Orders. Joseph Cerneau presided over the Consistory which he had organized in 1807, without any authority whatever. The only authority ever produced to show that he was more than a Master Mason is the following well-authenticated patent from Mathew Dupotet, which, it will be perceived, emanated from an Inspector-General of the A.·A.·A.·R.·. on the Island of Cuba, viz.:

[TRANSLATION.]

TO THE GLORY OF THE GR: ARCH: OF THE UNIV:

Lux ex Tenebris.

From the Orient of the Very Great and Very Puissant Council of the Sublime Princes (of the Royal Secret), Chiefs of Masonry, under the C: C: of the Zenith (which responds) to the 20° 25' N: Lat:

To our Ill: and Very Valiant Knights and Princes, Masons of all the Degrees, over the surface of the two Hemispheres:

HEALTH!

We, Antoine Mathieu Dupotet, Grand Master of all the Lodges, Colleges, Chapters, Councils, Chapters and Consistories, of the higher degrees of Masonry, Deputy Grand Master of the Grand Orient of Pennsylvania, in the United States of America; and of the Grand Lodge and Sovereign Provincial Grand Chapter of Heredom of Kilwinning, of Edinburgh, for America, under the distinctive title of the Holy Ghost, Grand Provincial of San Domingo in the Ancient

Rite, Grand Commander or Sovereign President of the Th: Puissant Grand Council of the Sublime Princes of the Royal Secret, established at Port au Prince, Island of San Domingo, by constitutive patent of 16 January and 19 April, 1801, under the distinctive title of The Triple Unity; transferred to Baracoa, Island of Cuba, on account of the events of war,

Do declare, in the name of the Sublime and Th: Puissant Grand Council, do certify and attest, that the Very Resp: Gr: Elect Knight of the White and Black Eagle, Joseph Cerneau, Ancient Dignitary of the Lodge No. 47, Orient of Port au Prince Grand Warden of the Provincial Lodge, same Orient, Venerable founder of the Lodge of the Ancient Constitution of York, No. 103, under the distinctive title of the Theological Virtues, Orient of the Habana, Island of Cuba, has been regularly initiated in all the Degrees of the Sublime Masonry, from that of Secret Master to, and including that of Grand Elect Knight of the White and Black Eagle; and wishing to give the strongest proofs of our sincere friendship for our said Very Dear Bro: Joseph Cerneau, in recognition of the services which he has rendered to the Royal Art, and which he is rendering daily, we have initiated him in the highest, in the most eminent and final Degree of Masonry; we create him our Deputy Grand Inspector, for the Northern part of the Island of Cuba, with all the powers that are attached thereto, giving him full and entire power to initiate the Bros: Masons, whom he may judge (Worthy?), to promote them to the Sublime Degrees, from the 4th up to and including the 24th; provided however, that these Masons shall have been officers of a Lodge regularly constituted and recognized, and in place only, where there may not be found Sacred and Sublime and regularly constituted Asyla; from which Bros: he will receive the obligation required and the authentic submission to the Degrees of the Sublime Princes; consulting, however, and calling to his aid the B: B: whom he shall know to be decorated with the Sublime Degrees; we give him full and entire power to confer in the name of our aforesaid Grand Council, the highest Degree of Masonry on a Kt: Prince Mason, one only each year, whose virtues he shall recognize, and the qualities required to deserve this favor; and to the end that our dear Bro: Joseph Cerneau, so decorated, may enjoy, in this quality, the honours, rights and prerogatives, which he has justly deserved, by his arduous labors in the Royal Art, we have delivered to him these presents, in the margin whereof he has placed his signature, that it may avail him everywhere, and be useful to him alone.

We pray our Resp: BB: regularly constituted, spread over the two Hemispheres, with whatever Degree they may be decorated, whether in Lodge, Ch:, Col:, Sovereign Council Sublime, to recognize and receive our dear Bro:, the Very Illustrious Sov: and Subi: Prince, Joseph Cerneau, in all the Degrees above mentioned; promising to pay the same attention to those who, in our Orients shall present themselves at the doors of our Sacred Asyla, furnished with like authentic titles.

Given by us, S: Sublime Princes, G: C: G: I: G'al: of our aforesaid Grand and Perfect Council, under our Mysterious Seal, and the Grand Seal of the Princes of Masonry, in a place where are deposited the greatest treasures, the sight whereof fills us with consolation, joy and gratitude for all that is great and good.

At Baracoa, Island of Cuba anno 5806, under the sign of the Lion, the 15th day of the 5th month called Ab, 7806, of the Creation 5566, and according to the Common Style the 15th July, 1806.

ALBERT PIKE.

March 20, 1882.

The Grand Commandery of New York was organized in the following manner, as ascertained from the Official Proceedings. On January 22, 1814, the Sovereign Grand Consistory, Joseph Cerneau's body, decreed the establishment of a Grand Encampment of Sir Knights Templars and appendant Orders for the State of New York, and immediately proceeded to its formation by choosing the Grand Officers thereof¹ who were all members of said Consistory. This was done solely by the action of the Consistory, without the concurrence of any Commandery, nor of any Knights Templars. This body, which it has often since been proved to have had no legal Masonic authority for its existence, as a Consistory, having been established by Joseph Cerneau alone, in 1807, a few months only after his patent from Mathieu Dupotet had been issued to him which gave him permission to confer one degree, the 25th of the A. . A. . A. . R. . upon one person only each year, who was qualified by having received all the lower degrees of that Rite, in Cuba only, made his appearance in New York, and finding a total ignorance on the part of all Masons in New York as to the "Rite of Perfection," induced a large number to receive, at his hands, degrees which he had no authority to give. From this beginning, he organized his

¹ Proceedings of the Grand Commandery of New York, 1860, pp. 5, 6, from the paper by Sir Knight James H. Hopkins.

Consistory. In 1816, Columbian Commandery in New York received a Warrant; and a Warrant on the same day was issued to a new commandery in New Orleans. These two were the only Commanderies who recognized the Grand Encampment of New York. All the other encampments in the State refused to recognize the Grand Body, and remained independent for many years.

It is not certain that any of those members, who formed this Grand Commandery of New York, had ever received the degrees of the Commandery in a regular body of Knights Templars, but that they assumed the degrees of the Consistory as being the same as those in the Commandery. There is no evidence whatever that Cerneau, who went from Port Republican in San Domingo to Cuba, and from Cuba to New York, in 1807, ever saw a regular Knight Templar Mason, or ever was anywhere in the vicinity of a Commandery; hence we draw a fair inference, that the Knight of the Red Cross, and also of the Temple, were derived from the rituals of the 15th and 16th and 24th degrees of the A. . A. . R. . The ritual of the Templar degree in the United States differs so essentially from the old ritual of England of 1801, now in the possession of the writer, and also from the present English one, that we can presume that it was invented in the United States by those who took the degree from the possession of the Lodges and constituted the semblance of Commanderies (Encampments).

A Grand Convention of Knights Templars was held in the Masonic Hall in the city of Philadelphia, Tuesday, February 15, 1814, for the purpose of forming a Grand Encampment of Knights Templars in Pennsylvania, with jurisdiction belonging thereto, and also over all such Encampments in other States as may agree to come under the jurisdiction of the same. Sir Knight John Sellers, of Wilmington, Del., was called to the Chair, and Sir Knight Henry G. Keatinge, of Baltimore, Md., was appointed Secretary.

It was "*Resolved*, That the Delegates and Proxies from the Several Encampments to be represented in the Convention from the respective States be called over. The following named Sir Knights produced their Credentials under Seals of their respective Encampments as Delegates and Proxies, and were admitted to take their seats in the Convention: Encampment No. 1, Philadelphia.

Delegates, Sir William M. Coxkill, Sir Alphonso C. Ireland, Sir Nathaniel Dilhorn.

"Encampment, City of New York, Proxies, Sir Thomas Black, Sir James Humes.

"Rising-Sun Encampment, City of New York, Delegate, Sir James M'Donald; Proxies from same, Sir Thomas Armstrong, Sir Anthony Fannen.

"Encampment No. 1, Wilmington, Del., Delegates, Sir John Sellers, Sir Archibald Hamilton, Sir John Patterson.

"Encampment No. 1, Baltimore, Md., Delegate, Sir Henry G. Keatinge. The Grand Convention being duly organized, proceeded to form a Constitution which was agreed to February 16, 1814, and signed by the Delegates and Proxies as above named. Also the Grand Officers were elected and installed.

"The Most Eminent Sir William McCorkle, of Philadelphia, *General Grand Master*.

"Most Eminent Sir Archibald Hamilton, of Wilmington, Del., *Grand Generalissimo*.

"Most Eminent Sir Peter Dobb, of New York, *Grand Captain-General*. Right Eminent George A., Baker, of Philadelphia, *Grand Recorder*."

The foregoing account of the formation of this *Freemasons* Grand Encampment in Philadelphia is taken from *The Freemason's Library and General Ahiman Rezon*, by Samuel Cole, P.M., Edition of 1826, and we do not find any notice whatever of the Convention held in June, 1816, by those celebrities, viz.: Thomas Smith Webb, Henry Fowle, and John Snowe, who went to Philadelphia to confer with the above-mentioned Grand Encampment of Pennsylvania, "upon the subject of a general Union of all the Encampments in the United States under one head and general form of government," pursuant to the resolution of the "Grand Encampment of the United States," Massachusetts and Rhode Island Encampment being known as such. Having failed in their mission to Philadelphia, they repaired to New York and being there joined by Thomas Lowndes, who had been appointed by the Grand Encampment of New York as its delegate to represent that body at a Convention of Knights Templars from different States of the Union, to be held in the City of Philadelphia, on Tuesday, June nth, on the 20th and 21st of June, at Masons' Hall, held "a Convention."

The records of this quartette's proceedings describe them as "delegates from eight Councils and Encampments," all of which we have mentioned on page 1386 of this chapter.

CHAPTER LIV

HISTORY OF THE INTRODUCTION OF FREEMASONRY INTO EACH STATE AND TERRITORY OF THE UNITED STATES

The First Lodges and the Grand Lodges.

THE Institution, in its modern system of Speculative Masonry, having been established in Great Britain first, and then upon the Continent of Europe, early in the 18th century, we may well assume that among the various colonists from Europe who made their homes in the Western Hemisphere, there must have been many Operative Masons who had been initiated prior to their emigration.

From the various writers on this subject which we have consulted, we learn it is recorded that as early as 1680 there came to South Carolina one John Moore, a native of England, who before the close of the century removed to Philadelphia and in 1703 was commissioned by the King as Collector of the Port. In a letter written by him in 1715 he mentions having spent "a few evenings in festivity with my Masonic Brethren." This is perhaps the earliest mention we have of there being members of the Craft residing in Pennsylvania or elsewhere in the Colonies.

We must bear in mind that this was several years prior to the organization of the Mother Grand Lodge of Speculative Masonry, which occurred June 24, 1717.

Roger Lacy's deputation of 1735, given by Lord Weymouth, Grand Master of the Grand Lodge of England, was the second American lodge on the English Roll.

Gould's *History of Freemasonry*¹ says of this lodge: "The Charity of the Society was solicited in the Grand Lodge of England, December 31, 1733, to enable the trustees of the new Colony to send Distressed Brethren to Georgia, where they may be comfortably provided for." In 1735 a Deputation to Mr. Roger Lacy

for constituting a lodge (No. 139) at Savannah was granted by Lord Weymouth. It was doubtless the body referred to by Whitfield in his diary, where he records, "June 24, 1738 (Savannah), was enabled to read prayer and preach with power before the Freemasons, with whom I afterwards dined."

Brother Wm. S. Rockwell, of Georgia, has said that a lodge organized by Roger Lacy existed earlier than 1735, possibly 1730. No certain evidence has been discovered confirming this statement

Hayden, in his *Washington and His Masonic Compeers*, says: "King Solomon's Lodge at Savannah, which had commenced its work under an old oak tree in 1733, when the first settlement in Georgia began, had belonged to the branch of Masons denominated Moderns, but in February, 1785, it was proposed by Major Jackson, who was then one of its members, that they form themselves into a Lodge of Ancients. The proposition was referred to a Committee, and was subsequently agreed to, and the brethren were duly constituted, by the usual ceremonies, a Lodge of Ancient York Masons."¹ The Grand Lodge of the "Ancients" never warranted any lodges in the State of Georgia.

There was a tradition that this old lodge was instituted by General James E. Oglethorpe.

With this short introduction we shall now proceed to present the histories of the first Lodges and of the Grand Lodges in the several States and Territories of the United States. We commence with Pennsylvania for the reason that the evidence is conclusive that St. John's Lodge in Philadelphia was the first lodge duly organized of which there is any record, and we may, with some degree of assurance, say that Masonry in an organized form existed in Pennsylvania some time prior to 1730, because, as shown in the plate opposite this page, the fac-simile copy of "Liber B" indicates very conclusively that there must have been a prior Liber A.

Pennsylvania.

Up to the discovery of "Liber B," by Bro. Clifford P. McCalla, in 1884, of this original lodge, dated June, 1731, everyone had accepted as a fact that Henry Price, of Boston, was the first commissioned officer in charge of Freemasonry in the Colonies, and that St. John's Lodge, in Boston, was the first regularly constituted lodge

¹ Hayden, p. 348.

in any of the Colonies. Our Brethren of Massachusetts yet contend that the lodge in Boston was the first *duly* constituted lodge by the authority of the deputation to Henry Price (and they refer with much force to the correspondence which occurred between Benjamin Franklin and Henry Price).

Bro. John Dove, in his reprint of the proceedings of the Grand Lodge of Virginia, in his "Introduction" claims the first lodge "derived directly from the Mother Grand Lodge of England, was No. 172, the Royal Exchange in the Borough of Norfolk, Virginia, Dec. 1733." He also says:

"During the above period, dating from 1733 and extending to 1792, the Masons of Massachusetts worked under the authority of Provincial Grand Masters appointed by, and deriving their authority from, the Grand Lodges of England and Scotland in 1733, at which period Henry Price was first appointed, by the Grand Lodge of England, Grand Master of the St. John's Grand Lodge of Massachusetts, in 1734, and upon petition, his authority was extended to all North America, and under his power, thus extended, Benj. Franklin applied for and obtained a Charter for a Lodge at Philadelphia, Pennsylvania."

From all that we can gather in the various sketches of this formation period in the history of Freemasonry in the Colonies, it appears to us that the weight of testimony is in favor of the working of Masonry, first in Philadelphia, secondly in Massachusetts by secondary constituted authority, and thirdly in Norfolk, Va., by direct charter, emanating from the Grand Lodge itself.

At the period of the working of St. John's Lodge in Philadelphia, the Brethren exercised their prescriptive privilege to open a lodge without a charter, because there was no Grand Lodge to issue one so far as they knew. The lodge may have existed some considerable time prior to 1731, which latter date, it must be remembered, was only eight years after the publication of the *Anderson Book of Constitutions*, and eight years was a short period in which to fill up a "Liber A."

From all the historical data now available our conclusion is that we must give Pennsylvania the preference, by placing that colony foremost, as having started Freemasonry in an original prescriptive, organic form; followed by Massachusetts, as second, in a lodge, chartered by constituted authority of a Provincial Grand Master;

and thirdly, by giving to Virginia the first lodge chartered by the Grand Lodge itself; each of these being authoritative, according to the circumstances governing those who instituted the proceedings.

Thus, in Pennsylvania, Freemasonry is presented as having been organized in an original prescriptive lodge, with proper officers, working for some indefinite time prior to June, 1731, as shown by their ledger.

The present records of the Grand Lodge commence July 29, 1779, and have continued up to the present time. It is thought that during the Revolutionary War, as Philadelphia was a great center of the troubles during that war, all the records and papers of the Grand Lodge were either lost or destroyed, and tradition only gives any idea of the transactions up to the above date. The oldest minute-book now known is of Lodge No. 3, which goes back to November 19, 1767, and comes up to the present time; and it refers to an older book.

December 28, 1778, the Grand Lodge, with the Brethren, about three hundred, celebrated St. John's Day, and Brother William Smith, D.D., preached a sermon. General Washington was present on that occasion. Bro. Rev. Wm. Smith, having abridged and digested the Ahiman Rezon, it was adopted by the Grand Lodge, November 22, 1781. At the quarterly Communication of Grand Lodge, September 25, 1786, steps were taken to sever the official relations between the Grand Lodge and the Grand Lodge of England, by the following:

Resolved, That this Grand Lodge is and ought to be, a Grand Lodge independent of Great Britain or any other authority whatever, and that they are not under any ties to any Grand Lodge except those of brotherly love and affection, which they will always be happy to cultivate and preserve with all lodges throughout the globe.

The Grand Lodge having, up to this time, been under a Warrant from the Grand Lodge of England, was closed finally. A convention was held the next day, September 26, 1786. Thirteen different lodges under warrants of the preceding Grand Lodge of Pennsylvania having full power from their constituent members, therefor:

Resolved, That the Lodges under the jurisdiction of the Grand Lodge of Pennsylvania, lately held under the authority of the Grand Lodge of England,

Will, and do now, form themselves into a Grand Lodge, to be called the Grand Lodge of Pennsylvania and Masonic jurisdiction thereunto belonging, to be held in Philadelphia; and that the late Grand Officers continue to be the Grand Officers of Pennsylvania, invested with all the powers, jurisdictions, preëminence, and authority thereunto belonging, till the usual time of the next election; and that the Grand Lodge and particular Lodges govern themselves by the Rules and Regulations heretofore established, till other rules and regulations shall be Adopted.

June 24, 1834, the Grand Lodge celebrated "the Centennial anniversary of the establishment of the first lodge in Pennsylvania, of which Lodge Brother Benjamin Franklin was the first Master." This antedated the claim made by Massachusetts of the first lodge having been established by Price in 1733. The date was evidently mistaken, as the "Liber B," since having been discovered, shows the date of June, 1731.

On June 24, 1734, Franklin was elected Grand Master, and it was in November of that year his letter to Price was written, asking for a copy of his deputation as Provincial Grand Master, etc.

December 4, 1843, the change was permanently made whereby all the business of the lodge, also the opening and closing of the lodge, must be in the Master's degree. It was at this time also that under the lodge Warrant, those possessing the higher degrees could confer them. Several of the lodges, as many as four, worked the Royal Arch degree. In 1849, Franklin Lodge, No. 134, was authorized to loan its Warrant to confer the Order of the Temple on Encampment No. 2, in Philadelphia. Also Union Lodge, No. 121, was authorized to loan its Warrant to organize Union Encampment, No. 6. This resolution of the Grand Lodge was rescinded on February 15, 1857.

Massachusetts.

In consequence of an application from several Brethren, residing in New England, Free and Accepted Masons, to the Right Honorable and Most Worshipful Anthony, Lord Viscount Montague, Grand Master of Masons in England, he was pleased, in the year 1733, to constitute and appoint Right Worshipful Henry Price Provincial Grand Master of New England aforesaid.

Upon the receipt of this commission, the Brethren assembled July 30th; and the Charter of Constitution being read, and the Right Worshipful Grand Master duly invested and congratulated, a

Grand Lodge was formed under the title and designation of "St. John's Grand Lodge," and the following officers chosen and installed:

Right Worshipful Andrew Belcher, Deputy Grand Master; Right Worshipful Thomas Kennelly, Senior Grand Warden; Right Worshipful John Quann, Junior Grand Warden pro tempore.

A petition was then presented by several worthy Brethren residing in Boston, praying to be constituted into a regular lodge, and it was voted that the same be granted.

Thus was Masonry founded in Massachusetts.

The anniversary of St. John the Baptist was celebrated June 24, 1734, in ample form.

A petition being presented from Benjamin Franklin and several Brethren residing in Philadelphia for a constitution holding a lodge there, the Right Worshipful Grand Master, having this year received orders from the Grand Lodge in England to establish Masonry in all North America, was pleased to grant the prayer of the petitioners, and to send them a deputation appointing the Right Worshipful Benj. Franklin their first Master.

A petition from the Brethren resident in Portsmouth, in New Hampshire, for the erection of a lodge there was also granted.

At the usual celebration of the festival of St John the Evangelist, December 27, 1735, the Right Worshipful Grand Master appointed the Right Worshipful James Gordon his Deputy.

About this time sundry Brethren going hence to South Carolina, and meeting with Masons there, formed a lodge at Charleston; from whence sprung Masonry in those parts, December 27, 1736. At the celebration usual on this day, the Right Worshipful Robert Tomlinson was appointed Deputy Grand Master; all the other officers were continued in their respective trusts.¹

The Right Worshipful Robert Tomlinson having received a commission from the Right Honorable and Right Worshipful John Earl of Loudon, Grand Master of England, appointing him Provincial Grand Master of North America in the stead of the Right Worshipful Grand Master Henry Price, resigned, he was properly installed and invested, and duly congratulated, April 20, 1737.

At the usual celebration, on June 24th following, he was pleased

¹ "Constitutions, History, and General Regulations of Massachusetts," by Rev. T. Mason Harris, 1798.

to nominate and appoint the Right Worshipful Hugh McDaniel his Deputy. On the next December festival, the Right Worshipful James Gordon was re-chosen Deputy Grand Master.

In the year 1738 the Right Worshipful Grand Master went to England via Antigua, where, finding some old Boston Masons, he formed them into a lodge, giving them a Charter of incorporation; and initiated the Governor, and several gentlemen of distinction there, into the Society.

The Right Worshipful Lodge of Masters, in Boston, was founded January 2, 1739. In the year 1740, the Right Worshipful Grand Master granted a deputation, at the petition of several Brethren, for holding a lodge at Annapolis in Nova Scotia; and appointed the Right Worshipful Erasmus James Phillips Deputy Grand Master there, who afterward erected a lodge at Halifax, and appointed his Excellency Edward Cornwallis their first Master.

The Right Worshipful Thomas Oxnard having received a deputation dated London, September 23, 1743, from the Right Honorable and Most Worshipful John, Lord Ward, Baron of Birmingham in the County of Warwick, and Grand Master of Masons in England, appointing him Provincial Grand Master in the room of the Right Worshipful Grand Master Tomlinson, deceased; which being communicated March 6, 1744, he was properly acknowledged, invested, installed, and congratulated. He then proceeded to nominate and appoint:

The Right Worshipful Hugh McDaniel, Deputy Grand Master; Right Worshipful Thomas Kelby, Senior Grand Warden; Right Worshipful John Box, Junior Grand Warden; Charles Pelham, Grand Secretary.

The following Grand Officers were chosen and installed at the festival of St. John the Evangelist, holden December 27, 1744:

Right Worshipful Hugh McDaniel, Deputy Grand Master; Right Worshipful Benj. Hallowell, Senior Grand Warden; Right Worshipful John Box, Junior Grand Warden; Charles Pelham, Grand Secretary.

The petition of several Brethren in Newfoundland, for constituting a lodge there, was granted December 24, 1746, and a Charter transmitted.

December 27, 1749, a Charter was granted to a lodge in Newport, R. I. The Right Worshipful Grand Master, assisted by his

Grand Officers, February 15, 1750, constituted and consecrated "A Second Lodge" in Boston; March 7th following, he also constituted and consecrated "The Third Lodge in Boston."

At the Quarterly Communication in August, 1750, he granted a Charter for a lodge at Annapolis, Md., and also a Charter for "Hiram Lodge" at New Haven, Conn.

At the festival of St. John the Evangelist, December 27, 1750, the Brethren attended divine service in Christ's Church, Boston, where Rev. Brother Charles Brockwell delivered a sermon, which was afterward printed in Boston and reprinted and passed through several editions in England, and was added to the *Pocket Companion and History of Freemasonry*, London, 1754.

Lord Colvill having been appointed Deputy Grand Master, summoned the Brethren to attend him at the Grey Hound Tavern in Roxbury, January 24, 1752, where he held a Grand Lodge in due form, and the day was celebrated as usual, and Grand Officers were duly chosen.¹

Lord Colvill having returned to England, October 30th, R. W. Hugh McDaniel was again appointed Deputy Grand Master.

A dispensation was granted to erect a lodge at New London, in Connecticut, January 12, 1753.

A Grand Lodge was held at Graton's, in Roxbury, June 26, 1754, "but by reason of the death of Worshipful Grand Master Thomas Oxnard, this morning at 11 o'clock, the celebration was rather sorrowful than joyous."

"In honor of their Right Worshipful Grand Master, whose loss was sincerely lamented by all who had the pleasure and honor of his acquaintance, and more especially by the Society over which he had for eleven years presided with dignity, they voted to attend his funeral, in mourning, with the honors of Masonry; and to invite the several Lodges in Boston to assist on this mournful occasion."

October 11, 1754, at the Quarterly Communication, the Brethren petitioned the Right Honorable and Right Worshipful Grand

¹ A year or two since, a clergyman of the Church of England, who is probably more conversant with that church in America than any other individual living, politely furnished us with a document wherein it appeared that the first *regular* Lodge of Freemasons in America was holden in King's Chapel, Boston, by a dispensation from the Grand Lodge of England, somewhere about the year 1720. It produced great excitement at the time, and the Brethren considered it prudent to discontinue these meetings.—"Masonic Mirror and Mechanics' Intelligencer," by Bro. Chas. W. Moore, January 27, 1827.

Master of Masons in England, for a new deputation to fill King Solomon's Chair, vacant by the death of their late Grand Master; and recommended the Right Worshipful Jeremy Gridley to him for that important and honorable trust.

June 24, 1755, the Right Worshipful Deputy Grand Master summoned the Brethren to attend him at Graton's Tavern, in Roxbury, to observe the Festival of St. John the Baptist. The Grand Officers were chosen and present August 21st. At a special meeting the Right Worshipful Jeremy Gridley informed the Brethren that the Right Honorable and Right Worshipful Grand Master James Brydges, Marquis of Caernavon, Grand Master of Masons in England, had sent a deputation appointing him Provincial Grand Master of North America, where no Grand Master is appointed.

In 1767, Jeremy Gridley, the Provincial Grand Master of North America, died on September 10th; his funeral took place on the 12th, and the members of St. Andrew's Lodge, sixty-four in number (Joseph Warren being the Senior Warden), walked in the procession. After this, however, when every generous effort on the part of St. Andrew's had completely failed, and when it became evident that no "Union of Love and Friendship could be effected," the members of that lodge changed their ground. Men like Warren, Revere, Hancock, and others of illustrious name, felt their patience exhausted, and determined not to quietly submit to be any longer denounced as clandestine Masons and imposters. The early proceedings of St. Andrew's were indeed as irregular as it is possible to conceive. Originating in the Association of Nine Masons who had been made clandestinely, it was chartered by the Grand Lodge of Scotland in 1756, and then numbered twenty-one members, exclusive of the original nine, who had left Boston in the interval. Its Charter did not arrive until 1760, at which time the lodge had been increased by eighteen additional members, so that in all thirty-one candidates were initiated before the lodge received its Charter.

At a conference held April 28, 1766, between committees of St. John's Grand Lodge and St. Andrew's Lodge (Richard Gridley being a member of one and Joseph Warren of the other), the representatives of the latter fully admitted the illegality of their early proceedings, but contended that it was in the power of the Grand Lodge of Scotland to "make irregular Masons regular." Against

this the other committee formulated their belief "that the language of the Constitution for irregularities was submission."

We have quoted this circumstance to show the fallacy of those who refer to the facts connected with the irregularity of the formation of St. Andrew's Lodge.

We have brought the history of Masonry in Massachusetts from its commencement in 1733 to the beginning of the political troubles which finally ended in the independence of the Colonies. Soon thereafter Masonry resumed its wonted character, and after some years of struggle the various warring interests of the Brethren of the different constitutions on March 5, 1792, were united by the organization of but one Grand Lodge, which has continued with prosperity and wonderful success until the present time.

The following copies of two letters from Benjamin Franklin to Henry Price, in which we find acknowledgments of the relative Masonic positions of Massachusetts and Pennsylvania, will be found interesting.

Right Worshipful Grand Master and Most Worthy and Dear Brethren,
We acknowledge your favor of the 23d of October past, and rejoice that the Grand Master (whom God bless) hath so happily recovered from his late indisposition; and we now, glass in hand, drink to the establishment of his health, and the prosperity of your whole Lodge.

We have seen in the Boston prints an article of news from London importing that at a Grand Lodge held there in August last, Mr. Price's deputation and power was extended over all America, which advice we hope is true, and we heartily congratulate him thereupon, and though this has not been as yet regularly signified to us by you yet, giving credit thereto, we think it our duty to lay before your Lodge what we apprehend needful to be done for us, in order to promote and strengthen the interest of Masonry in this Province (which seems to want the sanction of some authority derived from home, to give the proceedings and determinations of our Lodge their due weight), to wit, a Deputation or Charter granted by the Right Worshipful Mr. Price, by virtue of his Commission from Britain, confirming the Brethren of Pennsylvania in the privileges they at present enjoy of holding annually their Grand Lodge, choosing their Grand Master, Wardens and other officers, who may manage all affairs relating to the Brethren here with full power and authority, according to the customs and usages of Masons, the said Grand Master of Pennsylvania only yielding his chair when the Grand Master of all America shall be in place. This, if it seems good and reasonable to you to grant, will not only be extremely agreeable to us, but will also, we are confident, conduce much to the welfare, establishment, and reputation of Masonry in these parts. We therefore submit it for your consideration, and we hope our request will be complied with; we desire

that it may be done as soon as possible, and also accompanied with a copy of the Right Worshipful Grand Master's first Deputation, and of the instrument by which it appears to be enlarged as above mentioned, witnessed by your Wardens and signed by the Secretary; for which favors this Lodge doubt not of being able to behave as not to be thought ungrateful.

We are, Right Worshipful Grand Master and Most Worthy Brethren,
Your affectionate Brethren and obliged humble Serv'ts,
Signed at the request of the Lodge,

B. FRANKLIN, G. M.

Philadelphia, Nov. 28, 1734.

DEAR BROTHER PRICE: I am glad to hear of your recovery. I hoped to have seen you this fall, agreeable to the expectation you were so good as to give me; but since sickness has prevented your coming, while the weather was moderate, I have no room to flatter myself with a visit from you before the spring, when a deputation of the Brethren here will have an opportunity of showing how much they esteem you. I beg leave to recommend their request to you, and to inform you that some false and rebel Brethren, who are foreigners, being about to set up a distinct Lodge in opposition to the old and true Brethren here, pretending to make Masons for a bowl of punch, and the Craft is like to come into disesteem among us, unless the true Brethren are countenanced and distinguished by some such special authority as herein desired. I entreat, therefore, that whatever you shall think proper to do therein may be sent by the next post, if possible, or the next following.

I am Your Affectionate Brother & humble Serv't,

B. FRANKLIN, G. M.

Philadelphia, Nov. 28, 1734.

Pennsylvania.

P. S. If more of the Constitutions are wanted among you, please hint it to me.

These letters were addressed as follows:

To Mr. HENRY PRICE,

At the Brazen Head, Boston, N. E.

Georgia,

Solomon's Lodge, No. 1, received a Warrant for Savannah in 1735; a Warrant for Unity Lodge, No. 2, was issued in 1774, and a Warrant was issued for Grenadier's, No. 386, in 1775. All of these were granted by the Grand Lodge of England.

Roger Lacy's deputation of 1735, given by Lord Weymouth, Grand Master of the Grand Lodge of England, was the second lodge on the English Roll for America. On October 29, 1784, a lodge was chartered by the Grand Lodge of Pennsylvania for Savannah.

On December 16, 1786, the Grand Lodge of Georgia was organized in that city, when the permanent appointments made by the

Grand Master of England were solemnly relinquished by the Right Worshipful Samuel Elbert, Grand Master, and the other officers of the Grand Lodge; and regulations were adopted by which the Grand Officers were to be elected annually. Then the last Provincial Grand Master resigned his position, and William Stephens was elected the first Grand Master under the new and present formation. A notable event occurred March 21, 1824. The cornerstone of the monuments to Greene and Pulaski were laid, General Lafayette acting as Grand Master for the occasion.

As there are those still interested in the search for the origin of Masonry in Georgia, and who believe that a lodge existed there prior to 1735, the date of the Warrant of Solomon's Lodge, which has been lost, it is well to note the following, for reference, as coming from the records: In England a Grand Lodge was holden "by virtue and in pursuance of the right of succession legally derived from the most noble and Most Worshipful Thomas Thyne. Lord Viscount Weymouth, Grand Master of England, 1735, by his Warrant directed to the Right Worshipful Roger Lacy; and by the renewal of the said power by Sholto Charles Douglas, Lord Aberdour, Grand Master of Scotland for the year 1755-56 and Grand Master of England for the years 1757-58; as will appear in his Warrant directed to the Right Worshipful Grey Elliot."¹

Masonry was somewhat prosperous in Savannah, yet in the county outside of the city generally, Masonry had nearly disappeared by the year 1820. The Grand Lodge in that year adopted a new constitution; and the quarterly meetings of March and June were to be held in Savannah, and those of September and December were to be held at Milledgeville, the State Capital. This change was designed to accommodate the wishes of the conflicting parties of the two parts of the State, North and South.

In December, 1826, a convention was held which adopted a new constitution dispensing with the quarterly meetings, and made Milledgeville the permanent place of meeting. The Grand Lodge

¹The lodges which formed the Grand Lodge were Solomon's, No. 139 (1735), at Savannah; Unity, No. 2 (1774), Savannah (371, English Register); Grenadier's, No. 386, (English Register), (1775), Savannah. Solomon's Lodge was reorganized October 29 1784, Savannah.

Grenadier's Lodge and Solomon's Lodge ceased working, leaving no record.

however, which met at Savannah at the usual time, March, 1827, refused to concur with the alteration and chose their Grand Officers.

The Milledgeville body met on December 3, 1827, and elected their Grand Officers. As this was a very interesting period in the history of Masonry in Georgia, we must give the final result of this division. The New Grand Lodge appointed committees to possess themselves of the property of the Savannah or old body, and they declared the election held in March of no effect; and all the members of the lodges adhering to the Old Grand Lodge were expelled. Lodge No. 8, one of the Savannah lodges, held to the Milledgeville body; all the others in Savannah held to that body. Union No. 3 of these lodges was the first lodge which adopted Royal Arch Masonry. In the hall of this lodge, the Grand Lodge of Savannah met. Finally, all the lodges in Savannah left the Grand Lodge except Solomon's Lodge, and united with the new body at Milledgeville. January 5, 1837, efforts were made for a reconciliation, which ended at the Grand Communication held November 6, 1839. Solomon's Lodge was admitted to the Grand Lodge by her representatives, and Masonry resumed a united front.

Prosperity followed, which was only checked by the Civil War from 1861 to 1865. Since 1866 prosperity has again visited that jurisdiction, and no Grand Lodge in the country can boast of a greater increase proportionally than Georgia.

New Hampshire.

On February 5, 1736, a petition (the original of which has been preserved) was addressed by six Brethren at Portsmouth, N. H., to Henry Price, whom they styled "Grand Master of Free and Accepted Masons held in Boston." The petitioners described themselves as "of the holy and exquisite Lodge of St. John," and for power to form a lodge "According to order as is and has been granted to faithful Brothers in all parts of the World," and they declared that they had their "Constitution both in print and Manuscript as good and ancient as any that England can afford." The favor was asked because they had heard there is a "Superiour Lodge held in Boston." Be it noted this was early in 1736, when no lodge had been warranted in Portsmouth; and as the Brethren stated they possessed "Constitutions" in manuscript—which it is hardly possible could have been anything else than a copy of the

"Old Charges"—as well as in print, the evidence is consistent with the supposition that, while at the date named the lodge must have been some years in existence, its origin may have reached back even to the 17th century.

I am anxious not to lay too much stress on the precise meaning attached by me to the mention of manuscript constitution; nevertheless, I think the petition may be taken as fair evidence that in 1736 there were Brethren in New Hampshire (meeting as Masons in a lodge) who possessed a copy (or print) of the English Constitutions published in 1723, as well as a version of an older set of laws in MS., thus pointing to the possible existence of the lodge at even an earlier period than the Grand Lodge era of 1716-17.

The granting of the authority, which was a written instrument, was, in connection with that granted to Philadelphia, the first written Masonic authority known to have been issued by a Provincial Grand Lodge.¹

It will be observed that, in like manner, as Grand Master, Henry Price issued authority to warrant a lodge to the eighteen Masons in Boston who petitioned in behalf of themselves and "other Brethren;" therefore the Brethren had been meeting as a lodge anterior thereto and discharging Masonic duties: convening and working as Masons without other authority than that of ancient immemorial right, which the Craft had many decades before exercised, of meeting when and where circumstances permitted or required, and choosing their own temporary Master; it is probable that thus many of the old Masons in America had been admitted to the Mystic Rites.

Portsmouth was the first settlement by Europeans in New Hampshire (1623). Several lodges were many years afterward constituted within that territory by authority of the Grand Lodge of Massachusetts.

In a letter from Joseph Webb, Grand Master of the Grand Lodge of Massachusetts, in reply to one received from William Smith, Grand Secretary of the Grand Lodge of Pennsylvania, dated Boston, September 4, 1780, occurs this paragraph:

"I have granted a dispensation to New Hampshire, till they shall appoint a Grand Master of their own, which I suppose will not be very soon, as there is but one Lodge in that State."

¹ C. McCIenachan.

A "convention" of delegates from two or more lodges was called at Dartmouth in 1787, but the Grand Lodge of New Hampshire was not organized until July 8, 1789. It was in the last of the three years' service of General John Sullivan as Governor of the State that he was elected the first Grand Master of the independent Grand Lodge. It is true there were but five lodges in the State, and but one, St. John's of Portsmouth, that antedated the Revolution; of this General Sullivan was the Master. In October, 1790, the Grand Master, from ill health, was compelled to decline re-election, and Dr. Hall Jackson was elected Grand Master in his stead.

The title assumed by the Grand Body is "The Most Worshipful Grand Lodge of the Ancient and Honorable Fraternity of Free and Accepted Masons of the State of New Hampshire."

South Carolina.

A Warrant was granted in 1735 by Lord Weymouth, Grand Master of England, for the establishment of a lodge in the city of Charleston, which was organized on October 28, 1736, by the name of Solomon's Lodge.

Brother Sidney Hayden, in *Washington and his Masonic Compeers*,¹ states that Grand Master Henry Price of Massachusetts, having received an extension of his authority in 1734, from the Grand Master of England, giving him jurisdiction over all North America, granted a Warrant on December 27, 1735, for a lodge at Charleston, S. C.

The St. John's Grand Lodge of Boston, Mass., warranted a lodge in Charleston, S. C., in 1738; this was followed by a grant from the Grand Lodge of England establishing Prince George's Lodge at Winyaw, in 1743; and Union Lodge, by the same authority, at Charleston, May 3, 1755, and, again, a "Master's Lodge" at the same place, on March 22, 1756, and a lodge at Beaufort on September 15th of the same year.

The Grand Lodge of Scotland then appeared in the Province, and warranted Union Lodge, No. 98, in 1760.

St. Mark's Lodge was warranted by the Grand Lodge of England in 1763.

With regard to powers delegated to Provincial Grand Masters,

¹ Hayden, p. 240.

we have first of record, John Hammerton, appointed by the Earl of Loudoun in 1736.

A second Provincial Grand Lodge was established by a deputation of the Marquis of Carnarvon to Chief Justice Leigh in 1754. Dr. Mackey, in his Encyclopædia, says upon this subject that, in 1777, this Grand Lodge, deputed by the Marquis of Carnarvon, assumed independence and became the "Grand Lodge of Free and Accepted Masons," Barnard Elliott being the first Grand Master. As early as 1783 the Athol or "Ancient" Masons invaded the jurisdiction of South Carolina, and in 1787 there being then five lodges of the Ancients in the State, they held a convention, and on March 24th organized the "Grand Lodge of Ancient York Masons." Between the Moderns and the Ancient Grand Lodges there was always a very hostile feeling until the year 1808, when a union was effected, which was but temporary, for a disruption took place in the following year. However, the Union was permanently established in 1817, when the two Grand Lodges were merged into one, under the name of the "Grand Lodge of Ancient Freemasons."

New York.

From the quotations of authorities herein following, it will be evident that Freemasonry must have existed in the Province of New York prior to the year 1737. The advertising notices and newspaper squibs are convincing that secret communications were being held either among the residents or the sojourning soldiery. By what authority these assemblies were held we are not yet able to disclose; whether under powers granted by Daniel Coxe, by reason of the deputation held by him from June 5, 1730, until the expiration of his personal investment, to wit, until June 24, 1732, or those of his successors, who were to be elected every other year on the feast of St. John the Baptist, when the Provincial Grand Master was to be installed. No testimony has been found of the exercise by Bro. Daniel Coxe of his delegated powers; perhaps no action was had by him; yet "it was a rare thing for any reports to be made by the Provincial Grand Masters abroad of their doings." We incline to the belief that no power was exercised by Brother Coxe pending the period during which he was deputed.

It is not impossible that warranted power existed among the soldiery who were or had been stationed in the Province; nor is it

an impossibility that there was an immemorial Charter, or even an inherent or self-born power of constitution the exercise of which would not have been masonically illegal when we consider the condition of the Society, the period, the locality, and Masonic custom, or at least in following the precedent in other lands and of former days.

THE FIVE MASONIC DEPUTATIONS GRANTED TO PROVINCIAL GRAND MASTERS
FOR NEW YORK BY THE GRAND LODGE OF ENGLAND.

1. Colonel Daniel Coxe,	June 5, 1730.	Time of service, 2 years.
2. Captain Richard Riggs,	November 15, 1737.	" 14 "
3. Francis Goelet,	1751.	" 2 "
4. George Harrison,	June 9, 1753.	" 18 "
5. Sir John Johnson,	1781.	" 10 "

The date of transition of the Grand Lodge from a Provincial to an independent State Masonic organization might be a subject of difference of opinion: herein the date of the summary retirement of the Grand Master and most of the other Grand Officers with the King's troops is assured as a data, to wit, September 19 and October 1, 1783. It might be urged with considerable force that as a definite date, June 6, 1787, should be given, inasmuch as on that date the Grand Lodge accepted and confirmed the Athol Warrant, and declared its establishment under it.

RATIFICATION OF THE GRAND WARRANT, SEPTEMBER 5, 1781.

The Grand Lodge "Resolved, that next Grand Lodge be appointed for all the Lodges in the State to give in their Respective Warrants or Constitutions, or copies of them properly authenticated, that the Rank and Precedency of the whole may be then determined."

A more direct resolution from St. John's Lodge, No. 2, proceeded further to question the Grand Warrant under which the Grand Lodge existed. This was referred to next Grand Lodge.

Accordingly, on March 7, 1787, "The Resolution of St. John's Lodge, No. 2, referred for consideration to this evening, was read, and debates arising, it was resolved, on motion of Worshipful Brother Malcom, that a Committee be appointed to consider the propriety of holding the Grand Lodge under the present Warrant;

and the proper measures to effect a change if it should be thought constitutional and expedient, and report their opinion, with the reasons on which it is founded, to the Grand Lodge, at their next Quarterly Communication."

The committee on June 6, 1787, reported their consideration of the propriety of holding the Grand Lodge under the present Warrant. The report was read, accepted, and confirmed.

The subject of the Grand Warrant being disposed of, the Grand Lodge, on the following September 5, 1787, adopted this recommendation:

"That as soon as the Committee appointed to establish the precedence of Rank of the Lodges of this City do report, that then all the Lodges in the State be required to take out new warrants and deliver up the old ones, the dues to the Grand Lodge being previously paid."

The report on lodge precedence and the determination of this subject was finally made June 3, 1789.¹

Rhode Island.

In Rhode Island, as in other localities, we find traces of a pre-historic age of Freemasonry. The earliest date when, according to tradition, the Masonic system was known and practiced within the limits of Rhode Island and Providence plantations goes far back of authentic records. There are hints and intimations, with plenty of unverified legends, pointing to a 17th century expression of Freemasonry in Newport, R. I.; but the documents and records which ardent explorers have searched for, to support the theory that Freemasonry was planted in Rhode Island before the Institution was known either in Philadelphia or Boston, have not been found. As the case now stands, there is only a supposition that such may have been the fact.²

The organic life of Freemasonry in Rhode Island, as we trace its existence by historic records, goes back to the warranting of St. John's Lodge, Newport, December 27, 1749. This lodge was authorized by St. John's Provincial Grand Lodge of Boston, Mass.,

¹ At the meeting of the Grand Lodge, held June 3, 1789, this subject was duly taken up and the several lodges presented their warrants, and were duly assigned their numbers, according to dates of charters. St. John's Lodge (1757), No. 2, was given No. 1.

² Memorial, by Henry W. Rugg, D.D.

Thomas Oxnard, Grand Master. Caleb Phillips was the first Master of the lodge thus authorized. Some unpleasantness having been caused by the Master's withholding from the lodge the dispensation thus granted, a second Warrant was issued dated May 14, 1753. Under these warrants the Newport Brethren were only authorized to confer the first two degrees of Masonry. They did not recognize the limitation, however, and proceeded to confer the Master's degree as supplementing the degrees of Entered Apprentice and Fellow-craft. On being called to account for thus extending the authority granted them, they made so good an explanation of the causes that had led them to transcend their powers, that the Grand Lodge confirmed them in the exercise of such powers by granting them a Charter to hold a Master's Lodge.

This lodge—the first organized in Rhode Island—was given additional powers, and we may assume that the ordinary lodge, having control over the degrees of Entered Apprentice and Fellow-craft, was united with or merged into the Master's Lodge, so that two separate organizations were not maintained.

As throwing some light upon the misapprehension pertaining to the conferring of degrees by St. John's Lodge of Newport, during this first period of its history, it is important to keep in mind the fact that the third degree was not then, as now, closely united with and expected to follow the two preceding degrees. Candidates for Freemasonry often went no further than the degree of Fellow-craft; those who did advance to the Master's grade were required to pay an additional fee.

A little more than two years before the granting of the confirmation Charter to the Brethren of Newport, a Masonic lodge had been organized in Providence, also taking the name of St. John's. A Warrant for this lodge was issued by the same authority that created the body established at Newport.

By the terms of this Charter the Providence Brethren were required to observe the constitution, make returns to the Grand Lodge, and annually keep or cause to be kept the feast of St. John the Baptist, and to dine together on that day, or as near that day as shall be most convenient, and that they send to the Grand Lodge in Boston contributions for poor Brethren.

The Charter of St. John's Lodge in Providence was one of sixteen similar authorizations which, up to that time, had been granted

by the Provincial Grand Lodge of Massachusetts to sixteen lodges in eleven different provinces or colonies.

The Charter was issued by the direct authority of the eminent and patriotic Jeremy Gridley, then Provincial Grand Master of North America. He was a lawyer of excellent reputation and a devoted member of the Masonic Fraternity.

Freemasonry in Rhode Island at the close of the War of the Revolution was represented by St. John's Lodge in Providence and King David's Lodge in Newport. The first lodge (St. John's) in Newport was inactive, as it had been for a long time. The lodge in Providence, after its revival, had greatly prospered under the efficient leadership of Bro. Jabez Bowen, its Worshipful Master from 1778 to 1790, and had received among its new members a large accession of influential citizens. One of these, William Barton, initiated in 1779, is deservedly remembered and honored for his heroic exploit in making a prisoner of the British General, William Prescott, on the island of Rhode Island, and for other patriotic services. Another, John Carlile, initiated in 1783, served the Craft with exceptional skill in many important offices for a long term of years.

On Monday, June 27, 1791, "being the day affixed on for the celebration of the Feast of St. John the Baptist" (St. John's Day having occurred on the previous Friday), a number of Brethren representing the two lodges met in the State House at Newport and proceeded to organize a Grand Lodge in accordance with the plan that had been approved. The Right Worshipful Moses Seixas presided and installed the officers who had been previously designated for the several stations. When the organization had been completed, the newly installed officers, with members of Grand Lodge and visiting Brethren, marched in procession to Trinity Church, where a discourse, having appropriateness to the occasion, was delivered by the Rector, Rev. Wm. Smith, and a collection was taken amounting to £11 9s. 4d. which sum it was ordered "should be invested in wood and distributed to the poor of this town during the ensuing winter."

By attending as a body on divine service, and making their offering in the house of worship for a benevolent purpose, the Brethren who formed the Grand Lodge of this State, and those masonically associated with them at that time, plainly signified their respect for religion and for that practical charity so much emphasized by the teachings of Freemasonry.

Maryland.

Masonry was introduced into Maryland, during the Colonial period, from three sources, viz.: by the Grand Lodge (Moderns) of Massachusetts, Grand Lodge (Moderns) of England, and the Grand Lodge (Ancients) of Pennsylvania. Traditions indicate that it was also introduced here from Scotland and Germany.

The earliest lodge of which we have any reliable evidence in Maryland, was held at Annapolis. It was chartered by Thomas Oxnard, Provincial Grand Master of the St. John's Grand Lodge of Massachusetts, and Provincial Grand Master of North America. There are no records of this lodge known to be in existence, and the only reference to it, on the records of the Grand Lodge of Massachusetts, is the following, courteously furnished by Brother Sereno D. Nickerson, Grand Secretary:¹

"1750, Aug. 12. At the Petition of sundry Brethren at Annapolis in Maryland, Our Rt. Wors'l Grand Master, Bro. Thos. Oxnard, Esqr. Granted a Constitution for a Lodge to be held there, and appointed The Rt. Wors'l — first Mas'r.

"Fryday, July the 13th, 1750. For the Lodge at Maryland, Bro. McDaniel, D. G M. app'd & pd. for their Constit'n £13.9.

"In the lists, the Lodge is sometimes described as 'Maryland Lodge' and sometimes as 'the Lodge at Annapolis.' "

Among the archives of the Grand Lodge of Maryland, fortunately preserved, are the books of three of the old Colonial lodges, viz.: one located at "Leonardtown, St. Mary's County," in 1759; one at "Joppa, Harford, then Baltimore County," in 1765, and at "Queenstown, Queen Anne's County."

The records of the Leonardtown Lodge extend over a period of three years, and although they appear to be the full and complete minutes of the lodge for that period, there is not the slightest mention by which can be discovered the authority under which it was held, or from whence it emanated.

Upon one of the calendars of the "Modern" Grand Lodge of England, there is the following entry: "Lodge No. 198, Chartered in foreign parts, June 6th, 1759." As this date corresponds exactly

¹From History of Maryland, by E. T. Schultz. We are indebted to Bro. Schultz for all the information we have in that jurisdiction.

with the date of the first meeting of the Leonardtown Lodge, it is probable that the entry refers to it. It may, however, have been a branch of the lodge at Annapolis. It was not an unusual thing in this country in the early days for one lodge to have branch lodges in other towns or districts. Forty years subsequently a branch lodge was held at this same town.

The records of the Leonardtown Lodge, with one exception, those of the St. John's Lodge, Boston, are the oldest original lodge proceedings discovered in this country, the old ledger of St. John's Lodge, Philadelphia, recently discovered, being simply the secretary's account with the members.

On June 17, 1783, two months after Congress had issued the peace proclamation, we find the lodges on the "Eastern Shore" convened at Talbot Court-house, for the purpose of organizing a Grand Lodge of Free and Accepted Masons for the State of Maryland. There were five lodges represented by deputies, one lodge more than participated in the formation of the Grand Lodge of England in 1717.

There were present at this convention, as a deputy from Lodge No. 7, of Chestertown, the Rev. William Smith, who was at the time Grand Secretary of the Grand Lodge of Pennsylvania, although residing in this State; and Bro. Dr. John Coates, Past Deputy Grand Master of Pennsylvania, a member of Lodge No. 3 of Philadelphia, but then a resident of the Eastern Shore of Maryland. It was unanimously Resolved, "That the several Lodges on the Eastern Shore of Maryland consider it is a matter of right, and that they ought to form a Grand Lodge independent of the Grand Lodge of Philadelphia." When the convention prepared to go into an election of officers for a Grand Lodge, Bro. Smith, Deputy from No. 7, stated that "he was not authorized to elect such officers." Whereupon the convention adjourned until the 31st day of July following. "The Rev. Bro. Smith was asked and promised to prepare a sermon against their next meeting."

It was determined to petition the Grand Lodge in Philadelphia for a Warrant for a Grand Lodge to be held on the Eastern Shore of Maryland.

The convention re-assembled at Talbot Court-house on July 31, 1783, agreeably to adjournment, the Rev. Dr. Smith, being a Grand Officer, took the Chair. The same lodges were in attendance as at

the former session, with the exception of No. 37 of Somerset County, which was not represented, but No. 6 of Georgetown (Eastern Shore) was in attendance, and was represented, as were all the other lodges, by their Masters and Wardens, and not by deputies, as at the former session.

The resolution adopted at the previous session, regarding the right to form a Grand Lodge, independent of the Grand Lodge of Pennsylvania, was unanimously reaffirmed. It was further determined that the Grand Lodge should be a moving lodge: "that is to say, it shall sit at different places at different times; also that said Grand Lodge shall have quarterly communications."

A vote of thanks was then given to Bro. Dr. Smith "for the Sermon preached this day," and a copy asked for publication. They then proceeded to ballot for Grand Officers, when Bro. Coates was elected Grand Master, and Charles Gardner, Grand Secretary, Other officers were elected, and the convention adjourned, to assemble again at Chestertown, on December 18th following, (1783).

The Grand Lodge assembled according to adjournment, December 18th, but on account of the severe weather a number of the Brethren were prevented from attending, and the meeting was not organized until next day.

"From accident and other causes" there was no meeting on that day, nor was there any meeting held, as far as the records show, until nearly three years subsequent. The subordinate lodges, however, maintained their organization, and doubtless considered their allegiance to the Grand Lodge of Pennsylvania severed, as they were not thenceforth represented in that body.

Connecticut.

Masonry in Connecticut derived its organic life from the Grand Lodge in Massachusetts, the St. John's of which Paul Revere was subsequently Grand Master, but also Massachusetts Grand Lodge.

The charters granted by St John's were:

August 12, 1750, Hiram, at New Haven, David Wooster as Master,

January 12, 1753, at New London, ceased before 1789.

February 4, 1754, St. John's, Middletown.

April 28, 1762, St. John's, Hartford.

April 28 1709, Compass, Wallingford.

July 10, 1771, St. Alban's, Guilford; became dormant in 1776: revived May 17, 1787.

March 23, 1780, Union, Danbury.

Provincial Grand Master of New York (Geo.) Harrison, under Grand Lodge of England, granted a Charter to "St. John's," in Fairfield, and afterward Bridgeport, in 1762; "St. John's," in Norwalk, May 23, 1765; "Union," at Greenwich, November 18, 1764; and "St. John's," at Stratford, April 22, 1766.

The Massachusetts Grand Lodge (Scotland) granted a Charter to "Wooster," in Colchester, January 12, 1781; "St. Paul's," at Litchfield, May 27, 1781; the Charter dated June 21, 1781; "King Hiram," at Derby, January 3, 1781; "Montgomery," at Salisbury, March 5, 1783 (no record of the Charter to this lodge being granted).

"Columbia," at Norwich, June 24, 1785; and "Frelleich," at Farmington, September 18, 1787—seventeen lodges.

The Army Lodge, "American Union," chartered by St. John's Grand Lodge at Boston, February 13, 1776, and attached to a Connecticut regiment, frequently met in the State.

It is said that these lodges, chartered by different Grand Lodges, continued to be harmonious as far as was possible.

A convention of lodges met April 29, 1783, in pursuance to the action of a convention held March 13th preceding; thirteen lodges were represented; the formation of a Grand Lodge was duly discussed, and on January 14, 1784, a Grand Master and other officers were chosen, but no progress was made until May 14, 1789, when another convention was called, and this adjourned until July 8, 1789; a constitution was then adopted, officers elected, and the present Grand Lodge of Connecticut was duly organized.

Twelve lodges were then represented, which are all existing at the present date and were at the centennial of the Grand Lodge. 1889.

When the Grand Lodge was organized, Stamford, Norwalk, Derby, New London, Guilford, and Waterbury were not represented; Norwalk, Derby, and Stamford, however, were subsequently connected with the Grand Lodge.

The new Grand Lodge chartered the first lodge at Windham, viz.: Norwich, No. 13, October 18, 1790, which is at work at the present time.

The growth of the Fraternity and its popularity are shown in the fact that to the year 1800 the lodges had increased to forty-four, with three thousand members. About this time one Joash Hall established clandestine lodges, one in Middletown, one in New London, and one in Wallingford. These, however, soon died out.

When the proposition to establish a Supreme Grand Lodge was started among the various Grand Lodges, Connecticut deemed the project inexpedient.

This Grand Lodge granted two charters to form new lodges in Ohio, viz.: "Erie," No. 47, now "Old Erie," No. 3, at Warren; the other "New England," No. 45, afterward New England, No. 4, at Worthington, and now belonging to the spurious and clandestine body calling itself a Grand Lodge in Ohio, and the names of all the bodies which constituted that affair have been published by the Grand Lodge of Ohio in 1898. The above two lodges, with "American Union," the Army Lodge, mentioned above, assisted in forming the Grand Lodge of Ohio in 1808. Jeremy L. Cross was appointed Grand Lecturer in 1816 for the State of Connecticut.

In 1821 an act of incorporation was passed by the Legislature. In 1823 the Grand Lodge refused to divide the State into Masonic districts. The Grand Lodge made an appropriation, in 1826, of \$500 for a monument to Brother George Washington.

At this period the anti-Masonic movements had reached Connecticut, the Brethren generally neglected to attend their lodges, and many charters were surrendered and revoked; and such was the condition of the Craft at the annual session of 1831, that all the officers of the Grand Lodge, except the Grand Treasurer, resigned their offices, and new officers, except the Grand Treasurer, were chosen. Yet at the next annual session only the Grand Master and Grand Treasurer were present; at that time they adopted the "Declaration of Masonic Principles," and this, in some measure, allayed the anti-Masonic sentiments. Twenty-five lodges were represented at the session in 1841. There was an improvement up to 1845, and to the present time Masonry, in that jurisdiction, has kept even pace with all the other States in New England.

The Civil War was the cause of several applications for army lodges. June 6, 1861, a dispensation was issued to twelve Brethren of the 4th Connecticut Regiment for a lodge to be named "Connecticut Union," No. 90.

Another dispensation was asked for "Ensign" Lodge, No. 91, in the 5th Connecticut Regiment, but was refused.

Several years since (1887) quite a difficulty occurred between Hiram Lodge, No. 1, and the Grand Lodge, in consequence of the Grand Lodge having by statute changed the mode of giving the due-guard of the third degree, which resulted in the arrest of the Charter of the lodge and expulsion of several of the officers. After some time better counsel prevailed, and the members, being satisfied that they were wrong in their action, they made all proper acknowledgments, and matters were duly arranged and the Charter was restored, and the utmost harmony has prevailed ever since.

Virginia.

From the *Freemason's Pocket Companion*, by Auld and Smellie, published in Edinburgh, Scotland, in 1765, appears "An Exact List of Regular English Lodges;" therein we find "No. 172, The Royal Exchange in the Borough of Norfolk, in Virginia; 1st Thursday Dec, 1733;" "No. 204 in York-Town, Virginia; 1st and 3d Wednesday, Aug. 1, 1755." This is corroborated by the *Pocket Companion* published in London, England, in 1759, by John Scott, under the head of "Lodges in Foreign Parts;" "Norfolk, in Virginia, 1st Thursday; York-Town, Virginia, 1st and 3d Wednesday."¹

The date of 1733 is challenged by several of our recent writers as being a misprint, and they say it should have been 1753. We have seen no cogent reason for this correction, but must submit to the weight of authority as we have no corroborative evidence to sustain the earlier date of Bro. John Dove, the Grand Secretary of the Grand Lodge of Virginia, who was very sure that it was correct, and in the first volume of his *History of the Grand Lodge of Virginia* says: "Thus it will be seen from reliable data, that Masonry was practised in Virginia under chartered privileges in 1733, derived from the Mother Grand Lodge of England." Very soon after these two lodges were chartered, eight other charters were applied for and obtained from the several Grand Lodges existing in Great Britain in the following localities: Norfolk Lodge, No. 1, in the Borough of Norfolk; Port Royal, No. 2, in Caroline County; Blandford, No. 3, Petersburg; Fredericksburg, No. 4, Fredericks

¹ John Dove's "History of the Grand Lodge of Virginia."

burg; St. Tammany, No. 5, Hampton; Williamsburg, No. 6, Williamsburg; Botetourt, No. 7, Gloucester Court-house; Cabin Point, No. 8, Prince George Court-house; York Town, No. 9, York Town.

The work of these lodges was continued legally and masonically under their independent charters, until the course of time and the eventful period of the Revolutionary War caused them to organize a convention, which was called to meet at the request of Williamsburg Lodge, No. 6, at Williamsburg, May 6, 1777, and which resulted in the establishment of the Grand Lodge of Virginia, October 13, 1778, at Williamsburg, by the election of John Blair as the first Most Worshipful Grand Master of Ancient York Masons in America. He was at that time Past Master of Williamsburg Lodge, No. 6. This Grand Lodge was held in Williamsburg until 1784, when it was removed to Richmond.¹

Charters were continuously granted to new lodges, until their numerical denomination, being derived from various sources, had become too complicated for discrimination; at the meeting in October, 1786, a resolution was adopted that a committee be appointed to regulate the rank of the several lodges then under the jurisdiction of the Grand Lodge of Virginia. We make the following table for future reference:

No.	Name of Lodge.	Constitution under which Chartered.	Date of Charter.	
1	Royal Exchange 172	England .	5733	Norfolk.
2	Norfolk (old number 142) }		{ June 1, 5741 }

¹ Removed from Port Republican, Island of San Domingo, when insurrection of blacks occurred.

¹ The capital of the State having been changed from Williamsburg to Richmond.

By reference to the *Pocket Companion* before mentioned, it will be seen that York Lodge, No. 204, was chartered for York Town, Va., August 1, 1755. The conclusion is that it became dormant (and was revived in 1780), as was probably the case with Royal Exchange, No. 172 of date December, 1733, which became No. 1 of June, 1741. Although it is evident from authentic history that the Masons of Virginia had the right to open and hold a Provincial Grand Lodge under and by authority of Cornelius Harnett as Provincial Grand Master by right of his deputation as such, yet it was deemed by them more in accordance with Masonic law to obtain their charters from the Grand Lodge itself. The Masons of Norfolk petitioned for and obtained the Charter for the Royal Exchange, as we firmly believe with Brother Dove, in 1733. The records of Virginia show that a second lodge was chartered for the same place as Norfolk Lodge June 1, 1741, and held their meetings the same night every month; we therefore think that Royal Exchange had ceased to exist, and Norfolk Lodge took its place and was represented in Williamsburg at the conventions held May 6, 1777, and October 13, 1778.

In the autumn of 1784, Lafayette came to America, and visited Washington at Mount Vernon. Of all the generals of the Revolution he had been the most beloved by Washington; and both to him and to his wife in France had the hospitalities of Mount Vernon been often tendered by Mr. and Mrs. Washington. Madame Lafayette had wrought with her own hands in France a beautiful Masonic apron of white satin groundwork, with the emblems of Masonry delicately delineated with needle-work of colored silk; and this, with some other Masonic ornaments, was placed in a highly finished rosewood box, also beautified with Masonic emblems, and brought to Washington on this occasion as a present by Lafayette. It was a compliment to Washington and to Masonry delicately paid, and remained among the treasures of Mount Vernon till long after its recipient's death, when the apron was presented by his legatees to the Washington Benevolent Society, and by them to the Grand Lodge of Pennsylvania, in whose possession the apron now is, while the box that contained it is in possession of the lodge at Alexandria. The apron presented to Washington by Messrs. Watson & Cassoul two years before, and which is still in possession of Lodge No. 22 at Alexandria, has been often mistaken

for this; but the two aprons may be easily identified, by the Watson & Cassoul apron being wrought with gold and silver tissue, with the American and French flags combined upon it, while the Lafayette apron is wrought with silk, and has for its design on the frontlet the Mark Master's circle, and mystic letters, with a beehive as its mark in the center. The same device is beautifully inlaid on the lid of the box in which it was originally presented to Washington; and as this box is also in possession of Lodge No. 22 at Alexandria, and kept with the Watson & Cassoul apron, it has by many been supposed that this was the apron presented in 1784 by Lafayette. This mistake has also, perhaps, been perpetuated by a statement, that when Lafayette visited this lodge during his visit to America in 1824, he was furnished with the apron now in possession of Lodge No. 22, and in the box in which he had in 1784 presented one to Washington, to wear on the occasion; and that he there alluded to it as the one he had in former years presented to his distinguished American Brother. Even were this statement true, a lapse of forty years might have misled him in the identity of the apron, particularly as it was handed to him for the occasion in the well-remembered box in which he had, in his early Masonic life, presented one to Washington. The historic descriptions of the aprons leave no doubt as to the identity of each, and both are among the valued memorials of Washington's Masonic history. The Watson & Cassoul sash and apron, and also the Masonic box in which the Lafayette apron was presented to Washington, were presented to Lodge No. 22 at Alexandria, June 3, 1812, by Major Lawrence Lewis, a nephew of Washington, in behalf of his son, Master Lorenzo Lewis.¹

North Carolina.

The first organization of Masons in this colony was a lodge warranted by the Grand Lodge of England (Moderns) "at Wilmington, in Cape Fear River, in the Province of North Carolina, March, 1754 (Calendar says 1755); but was not Listed until 1756, although the Constitution was paid for June 27, 1754."²

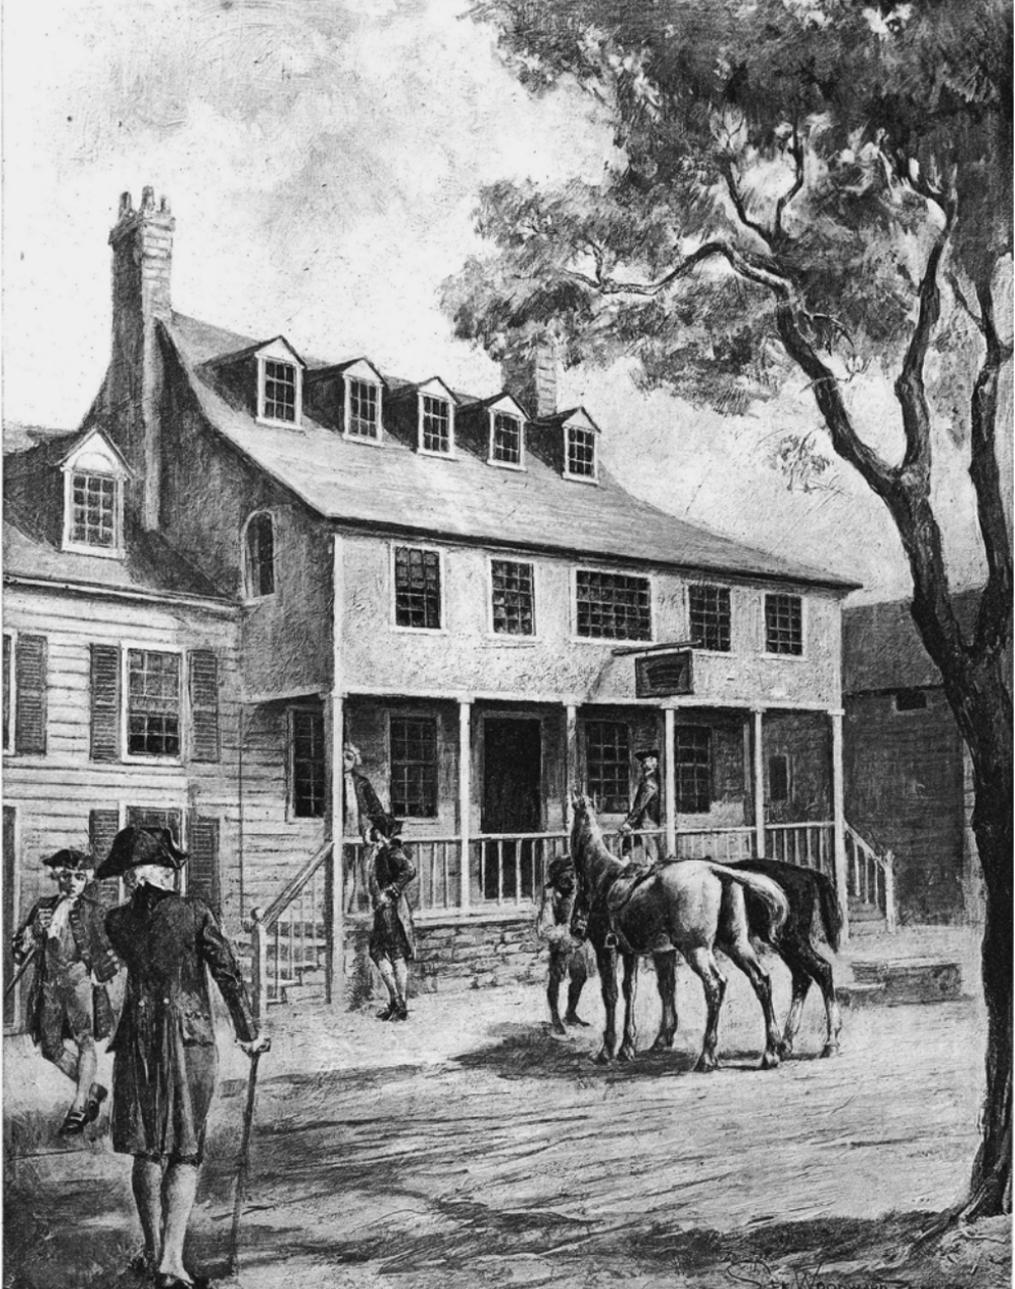

The Royal White Hart Lodge, No. 338, English Register, was warranted for Halifax, N. C, August 21, 1767. It was retained

¹ Hayden's Washington, etc.

THE OLD TUN TAVERN, PHILADELPHIA

The earliest known meeting place of Freemasons in Pennsylvania

on the register until 1813. The first is known as St. John's, No. 1, and the second retains its original name of Royal White Hart Lodge, No. 2.¹

In the transaction of the St. John's Grand Lodge of Massachusetts a record states that on October 2, 1767, that body granted a deputation to Thomas Cooper, Master of Pitt County Lodge, as Deputy Grand Master of the Province.

In 1771, a lodge now known as St. John's, No. 3, was established at New Berne.

Judge Martin, in a discourse delivered on June 24, 1789, says that Joseph Montford was appointed, toward the year 1769, as Provincial Grand Master by the Duke of Beaufort, and in 1771 he constituted St John's Lodge, above mentioned as No. 3; that this was probably the true date of the Provincial Grand Lodge of North Carolina, for on December 16, 1787, we find nine lodges in the territory; and that a convention was held at Tarborough and organized "The Most Worshipful Grand Lodge of Ancient Free and Accepted Masons of North Carolina."²

In 1771, a Grand Lodge was organized, which met at Newbern and Edenton. The records were destroyed by the English during the War of the Revolution.

December 9, 1787, an effort was made to reorganize the Grand Lodge by the representatives of the following lodges: Unanimity; St. John's, No. 2; Royal Edwin, No. 4; Royal White Hart, No. 403; Royal William, No. 8; Union at Fayetteville, Blandford, Bute, and Old Cone.

At a meeting of the Grand Lodge held June 25, 1791, the lodges were all renumbered and new charters were issued to them.

The General Assembly of North Carolina incorporated the Grand Lodge in 1797. Some of the lodges were also incorporated.

In 1856, St John's College was established at Oxford, the present writer having furnished a design for the building. During the war, from 1861 to 1865, the college was vacated by the students. After the war the Grand Lodge converted the building and grounds into an orphans' home, and with varied success it has at last become permanently one of the best orphans' homes in the country. Several additions have been made to the original buildings. This Grand

Lodge stands among the first of the Southern States for its prosperity in all essential features.

Maine.

The first Masonic lodge organized in Maine was located at Falmouth, which was subsequently called Portland.

Jeremy Gridley, Provincial Grand Master for Massachusetts (St. John's Grand Lodge), granted authority to Alexander Ross to constitute this lodge. We learn that this "Constitution" was not acted upon. Ross died November 24, 1768, and a petition was signed by eleven Brethren, and sent to John Rowe, who succeeded Gridley, and on March 30, 1769, he granted a new Charter, deputizing William Tyng to act as Master. The first meeting was held May 8th of that year. It seems that the two rituals, viz., the "Modern" and "Ancient," were in conflict in this lodge, and in 1772 the lodge resolved for harmony's sake to use these rituals on alternate evenings.

June 5, 1778, an application, which did not have a sufficient number of signers, was made to the Grand Lodge of Massachusetts (acting under the Grand Lodge of Scotland), to be called Warren Lodge, to be located at Machias. This petition was returned, and when properly signed, September 4, 1778, the Grand Lodge granted a Warrant, September 10, 1778.

A lodge was warranted by the United Grand Lodge of Massachusetts, June 1, 1792, to be named Lincoln Lodge. The same Grand Lodge issued a Warrant for another lodge in Portland in 1806.

Maine was admitted into the Union of the States in 1819, whereupon Simon Greenleaf issued a call for a convention to be held October 14, 1819, for the purpose of organizing a Grand Lodge for that State. There were then thirty-one lodges in that State all warranted by Grand Lodges in Massachusetts. Twenty-nine of these unanimously agreed to constitute a Grand Lodge in Maine.

The committee appointed by this convention, in consequence of the determination of the late "Massachusetts Grand Lodge, in 1781, "that all charters granted without the limits of this (Massachusetts) State shall be understood to remain in force until a Grand Lodge is formed in the government where such lodges are held;" requested that the connection with the Grand Lodge of Massa-

chusetts should be dissolved, etc., which was finally granted, donating \$1,000 as a foundation for a charity fund, and the District Deputy Grand Masters in Maine were directed to pay what funds they might have in hand belonging to the Grand Lodge of Massachusetts to the new Grand Lodge.

What a commentary this is upon the conduct of very many Grand Lodges, who fought frightfully against the organization of new Grand Lodges in territory where they held lodges under their obedience. The generosity and Masonic bearing of this grand old Commonwealth commend the Brethren thereof to our praise and admiration. We have had occasion in another place to mention this historical circumstance.

June 1, 1820, twenty-four bodies were represented and chose their Grand Officers. William King, the Governor of the State, was elected the first Grand Master.

The Grand Lodge, through the Grand Officers, was incorporated by the Legislature of Maine, June 24, 1824. The Grand Officers were installed, at the meeting-house of Rev. Mr. Payson, by the Grand Master of New Hampshire.

Simon Greenleaf succeeded William King as Grand Master.

At a meeting of the Grand Lodge, July 10, 1820, the following was proposed:

"To consider whether a person, who is conscientiously scrupulous against taking an oath, can be admitted to the benefits of Masonry by solemn affirmation."

This was fully considered, and on January 8, 1824, the following report of the committee was received and adopted by the Grand Lodge:

"Your committee deem this a question of no little importance as it bears on the interests of the Craft. On the one hand, if decided in the negative, there will be necessarily excluded from a participation of all the Mysteries, and very many of the benefits and advantages of Masonry a large class of Men, among the most respectable of our citizens, on account of their integrity, their conscientious regard for all those great moral principles which dignify human nature, and certainly not among the most backward in deeds of mercy and charity. On the other hand, if decided in the affirmative, it would seem at last to sanction a departure from what, for ages, has been deemed a form of sacred words, and what has

not hitherto failed to bind the consciences of otherwise the most hardened offenders. It is impossible that your committee should not examine with mistrust a principle which should shut out from the Masonic Fraternity such men as Clarkson; and they can not close their eyes to the bad effect which sanctioning such principles must have on the moral sense of the Community. On the whole, your Committee conceive that no Masonic principle is violated in adapting the form of the Obligations to consciences of Men equally good and true, but on the contrary, that serious hurt would grow to the Institution of Masonry, by an adherence to the technical form of words, heretofore used, for the purpose of securing that fidelity on the Crafts Men which have never yet been violated, even when all other principles have been wrecked, in the vortex of unhallowed appetites, or the whirlwind of ungoverned passions."

The Grand Lodges of the United States commented upon this action. Missouri, Tennessee, Kentucky, Delaware, Virginia, and Pennsylvania protested, and the last passed the following resolutions:

"That the Grand Lodge of Maine be respectfully requested to reconsider the resolution adopted by them on the 8th January, 1834, proposing a new mode in which the degrees of Masonry can be conferred.

"That this Grand Lodge feel themselves bound to refuse to recognize any person, as a Mason, known to be initiated in the Mode proposed by the Grand Lodge of Maine."

Soon after this the so-called "Morgan excitement" prevailed to such an extent over all the Northeastern States, that it had the same depressing effect as in New York and Pennsylvania.

In 1829 there were fifty-eight lodges. A large number of these suspended their labors.

At the annual meeting of the Grand Lodge in 1837, the oldest lodge at Portland was the only one represented. In 1844, sixteen lodges were represented. In 1849, Mount Hope was organized, the only one in twenty years. In 1860, there were ninety-six lodges, having four thousand three hundred and nineteen members. In ten years (1870) there were one hundred and fifty-four lodges with fourteen thousand seven hundred and twenty-six members.

New Jersey.

This colony was the home of the first Provincial Grand Master appointed by the Grand Lodge of England for any Province in America, to wit, that of Daniel Coxe, who received a deputation in 1729. Anderson mentions the issuing of this Masonic instrument in his *History of Masonry*. It was dated contemporaneously with one to Lower Saxony, and one to Bengal, India. Daniel Coxe appears never to have exercised any Masonic power in New Jersey. He was a resident of Burlington, and represented Gloucester County, N. J., in the Assembly of 1716, at which he was elected Speaker.

On May 13, 1761, a constitutional number of Master Masons in and about the town of Newark petitioned for and received from the hands of George Harrison, Provincial Grand Master of the Province of New York, a Warrant of Dispensation, Directed to William Tukey as Master, and others as officers, to meet and operate as a lodge, the first meeting-place being Rising Sun Tavern; after that the communications were held at the residences of the respective members. The lodge was called St. John's Lodge, No. 1, and preserves its original minutes to the present day.

"This Lodge observed Washington's Birthday as a Masonic Festival as early as 1792; and that venerable Lodge has, from that time to the present, yearly convened on that festive day to commemorate the Masonic Virtues of Washington."¹

On June 24, 1762, Jeremy Gridley, Grand Master of Masons of the Province of Massachusetts, granted a deputation to Jonathan Hampton, Esq., to constitute a lodge by the name of Temple Lodge, No. 1, to be located in Elizabethtown, N. J.

On June 20, 1764, as set forth in an original document in the Archives of the Grand Lodge of Pennsylvania, the Grand Lodge of London (Ancients), Thomas Erskine, Grand Master, appointed Wm. Ball, Esq., Grand Master of Masons for the Province of Pennsylvania and the territories thereunto belonging: by virtue of this authority, three lodges were instituted in New Jersey, in the years 1767, 1779, and 1781.

In 1779 the headquarters of General George Washington were at Morristown, N. J. Numerous military lodges were organized in the American Army; and on December 27th of that year a festival

¹ Sidney Hayden's "Washington," etc.

was held by the "American Union Lodge" at Morristown, at which Bro. George Washington was present. The Minutes of the Proceedings of American Union Lodge are at the present time in the possession of the Grand Lodge of Connecticut.

On February 7, 1780, a convention lodge held at Morristown, in accordance with a previous understanding, December 27, 1779, favored a Grand Lodge of America. This movement, Pennsylvania also endorsed in 1780. New Jersey subsequently withdrew its assent.

A convention of Master Masons was held on December, 18, 1786, for the preparatory consideration of, and to mark out the course to be adopted for, the formation of a Grand Lodge for the State. This resulted in the adoption of the constitution on April 2, 1787, from which period the Grand Lodge dates.

Michigan.

No written history of Masonic events prior to 1826 have as yet been discovered. From the "Historical Sketch," by Brother Foster Pratt, M.D., Past Grand Secretary of the Grand Lodge, Free and Accepted Masons, of Michigan, we are enabled to glean all the well-established facts as to the early introduction of Masonry into that State: "From 1764 to 1844, historical material accumulated around our Mystic Temple, not in consecutive records, nor in permanent forms, but in fragmentary papers, and varying traditions; and it has required no little research and labor to dig up from 'the rubbish' and to establish beyond question, exact dates, historical landmarks, and the true order of Masonic events."

There has been no written history of Masonry in Michigan prior to 1844. Three Grand Lodges have been organized in that State. The first was in 1826. The first lodge, "named Zion," was formed by a Warrant from Provincial Grand Master George Harrison, of New York, under the date of April 27, A.D. 1764, which was No. 448 Register of England, and No. 1 of Detroit. It is most likely that the military and citizens of Detroit were combined in this lodge.

When the British troops at a later date were serving in Michigan, there were probably three military lodges—which were noticed in an English Masonic Register as No. 289 at Detroit in 1773; No. 320 at Detroit in 1783; and St. John's Lodge, No. 373, at

Mackinaw in 1785. These were undoubtedly military lodges. The registry shows that their warrants came direct from England.

These lodges left no trace in Michigan, but they all went with their respective regiments, in 1796, when Michigan was surrendered to the United States.

The SECOND MASONIC PERIOD commenced in 1794. From the peculiar conditions of the country and the times it seems no records were preserved; yet there was some evidence that during a portion of that time, for thirty years, Zion Lodge maintained life and performed some labor. So long as Great Britain claimed Michigan as a part of Upper Canada, which was until 1796, the Masonic jurisdiction was therefore in the Grand Lodge of Canada, which had already been organized. On September 7, 1794, a Warrant was issued to Brethren in Detroit from the Provincial Grand Lodge of Canada, called Zion Lodge, No. 10. This lodge was instituted December 19, 1794, James Donaldson, Worshipful Master. In 1796 American troops planted the flag and institutions of the United States at Detroit.

The THIRD MASONIC PERIOD, A.D. 1806, New York jurisdiction.—The records of the Grand Lodge of New York show that September 3, 1806, a Charter was granted by DeWitt Clinton, Grand Master, to the Brethren of Detroit, by which Zion Lodge was reformed and recorded as "No. 1 at Detroit." With their petition they surrendered to the Grand Lodge of New York the original Warrant of 1764. This lodge was "installed" July 6, 1807. We find no other records of interest.

The FOURTH MASONIC PERIOD, A.D. 1812-20, second war with England.—Until October 5, 1813, when the battle of the Thames occurred, there were no meetings, as the country was occupied by the British forces. In October, General Lewis Cass became Governor, and the American flag again waved at Detroit, the lodge having forfeited its Charter by the events of the war. Upon petition of its members the Grand Lodge of New York, March 14, 1816, granted a Charter to Zion Lodge, No. 62, instead of former No. I. By a new arrangement of numbers in 1819, according to the original charters, this lodge became No. 3.

The FIFTH MASONIC PERIOD, First Grand Lodge.—A dispensation was granted by the Grand Lodge of New York in 1821, and instituted December 26, 1821, by the name of Detroit Lodge, No. 337.

March 7, 1822, in the town of Pontiac, County of Oakland, by the name and style of Oakland Lodge, No. 343, which had been previously organized under dispensation.

A Warrant was issued September 1, 1824, a dispensation having been issued on June 12, 1824, to form a lodge in Green Bay, in the county of Brown, by the name of Minomanie, No. 374, which is in Wisconsin at this time, as then it was in the territory of Michigan. December 1, 1824, at the town of Monroe, in the county of Monroe, territory of Michigan, by the name of Monroe Lodge, No. 375.

The *Grand Lodge was Organized in 1826.*—The convention met June 24, 1826. Were present by their representatives Lodges No. 3, No. 337, No. 374, and No. 375, all chartered by the Grand Lodge of New York. No. 343 of Pontiac was not present at this meeting, but appeared later and joined in its action. June 28th a constitution was adopted. July 31st Grand Officers were elected and installed. This new Grand Lodge was duly recognized by the Mother Grand Lodge of New York by suitable and fraternal resolutions, June 11, 1827. At the Institution of the Grand Lodge, General Lewis Cass was installed Grand Master. Four lodges were soon thereafter organized, viz.: Stony Creek, Western Star, St. Cloud, and Friendship. These made nine lodges in its jurisdiction. The meager official records of its proceedings have been published, yet all that the Grand Lodge accomplished soon came to naught.

The principal importance that attaches to the matter arises from the fact that it became the cause of four years of Masonic confusion, after eleven years of silence. The exact date of the suspension of life is not known, and the manner of it was unique; "and when dead it did not rest in peace."

As a Masonic curiosity, the dispensation granted by Grand Master Lewis Cass to Stony Creek Lodge, January 9, 1828, is yet in existence, which is the only lodge which maintained its existence during the dark days of the anti-Masonic excitement.

The SIXTH MASONIC PERIOD, A.D. 1840-44, Reconstruction.—Michigan attained to Statehood in 1837. The population increased from 1829, when Masonic labor ceased, with only about 30,000, to nearly 250,000 in 1840. The increase of population being mainly from States where Masonry had resumed its labors after the recent anti-Masonic crusade, the Institution began to revive

in 1840, and on November 15th of that year a convention was held at Mt. Clemens. Nothing definite was accomplished and it adjourned to May 5, 1841. The history of the proceedings of the Brethren during the four years between 1840 and 1844 is very interesting but entirely too lengthy for our limits, and we refer our leaders to the local history of the Grand Lodges of Michigan.¹

On September 17, 1844, the Grand Lodge of Michigan was constitutionally organized and elected the Grand Officers—which Grand Lodge continues to the present time and has grown and prospered and is among the leading Grand Lodges of the United States.

Delaware.

There appears to be some uncertainty concerning the first lodge instituted in Delaware. It is said that the Grand Lodge of Scotland in 1764 warranted Union Lodge No. 121, at Middletown, for General Majoribank's Regiment. The Grand Lodge of Pennsylvania granted warrants to Lodge No. 5, at Cantwell's Bridge on June 24, 1765, and renewed March 5, 1798, and was surrendered, January 30, 1815, in order to unite in forming the Grand Lodge of Delaware. Hyneman's *World's Masonic Register* says: "The Grand Lodge of Delaware was organized June 6, 1806." Here is a difference of ten years in the date of organization of the Grand Lodge.

A Charter to Lodge No. 13, at Christiana Ferry, afterward Wilmington, was granted, December 27, 1769; surrendered and renewed, January 22, 1789; was vacated, September 15, 1806, for un-Masonic proceedings in the establishment of the pretended Grand Lodge of Delaware (Hyneman, *ante*); to Lodge No. 18 at Dover, Kent County, granted, August 26, 1775; surrendered and renewed, May 31, 1787; to Lodge No. 33, at New Castle and at Christiana Bridge, one year at one place and the ensuing year at the other, granted, April 3, 1780; surrendered and renewed, March 1, 1790; vacated, September 15, 1806, for un-Masonic conduct in the formation of the pretended Grand Lodge of Maryland; to Lodge No. 44, at Duck Creek Cross Roads; granted, June 24, 1785; surrendered and renewed, September 6, 1790; has ceased long since; to Lodge No. 63, at Lewistown; granted, May

¹ "Historical Sketch of Early Masonry in Michigan," by Foster Pratt, p. 42 *et seq.*

28, 1794; vacated, April 7, 1806; to Lodge No. 96, the Delaware Hiram Lodge at Newark; granted, December 6, 1802; vacated, September 15, 1806, for un-Masonic conduct in the formation of the Grand Lodge of Delaware.

The Grand Lodge of Maryland granted a Warrant to St. John's Lodge in Laureltown, Sussex County, on September 18, 1792. It became delinquent to the Grand Lodge and its Warrant was forfeited, June 13, 1800. June 6, 1806, it petitioned to be revised but was refused. Grand Lodge warranted a new lodge named "Hope" at the same time and place. Nine Brethren, said to represent Lodge No. 31, Grand Lodge of Maryland, Nos. 33, 96, and 14, Grand Lodge of Pennsylvania, met at the town hall in Wilmington, and resolved that, as a matter of right, and for the general benefit of Masonry, they ought to form a Grand Lodge within said State, and did then proceed to form the Grand Lodge of Delaware. A committee of five was appointed to prepare a set of regulations. The meeting adjourned to June 7, 1806, when twelve Brethren were present. They proceeded to the appointment of Grand Officers, *pro tempore*, and thereupon, without any previous installation, opened the Grand Lodge of Delaware. Warrants were granted without any charge except the secretary's fees for executing them, etc. The Grand Lodge of Pennsylvania, to whom the proceedings had been referred, refused to recognize them, that five lodges at least were indispensably necessary to form a Grand Lodge (there were only five lodges at the formation of the pretended Grand Lodge), and that three of the lodges were indebted to the Grand Lodge of Pennsylvania for fees and dues. Accordingly, these warrants were vacated. The Grand Lodge of Maryland also refused to recognize the new Grand Lodge, and in 1808, the Charter of Hope was annulled. The action taken by Pennsylvania and Maryland did not seem to affect the new Grand Lodge, and in 1816 the Lodge No. 5, Cantwell's Bridge, under the Grand Lodge of Pennsylvania, joined the new Grand Lodge by permission of the Grand Lodge of Pennsylvania, thus making five.

Vermont.

In 1778, some of the towns in New Hampshire, near the Connecticut River, put themselves under the control of Vermont. The attention of the citizens was directed to this circumstance, and

a petition from sixteen towns, including Hanover and some others, east of Connecticut River, was presented to the Legislature of Vermont, at the first session in March, 1778, with the request to receive them into Union and Confederation. At the next session of the Legislature an act was passed to authorize these towns to elect and send members to the Legislature at their next session. At the session of the General Assembly, in October, 1778, delegates from at least eight towns of New Hampshire took their seats in the Assembly.¹

We have stated this much of the political history of that early period, to account for circumstances in the Masonic history, which would not be otherwise understood, viz.: that the original petition for a Charter for a Vermont lodge was dated at "Cornish, Vermont," and why the lodge met at Charlestown, N. H., in place of Springfield, Vt., which town was named in the Charter. Again: Ira Allen's History says that, "On the meeting of the Legislature of Vermont at Windsor, February 12, 1779, to get rid of a connection which had occasioned so much trouble and danger, the Assembly passed an Act dissolving the Union of the sixteen towns in New Hampshire."²

For a period of four years ending February, 1782, both sides of the Connecticut River were to some extent common territory.³

November 8, 1781, a petition from Cornish, Vt., was presented to St. Andrew's Grand Lodge of Massachusetts, and a Charter was ordered to be issued November 10, 1781, the lodge to be located at Springfield, Vt.

This lodge, instead of meeting at Springfield, Vt., held the meetings in Charlestown, N. H. May 17, 1787, the lodge was in some doubt as to the propriety of their meeting in Charlestown, N. H.

A Charter was applied for, to St. Andrew's Grand Lodge, for a lodge at Charlestown, named Faithful, which was granted, February 2, 1788. The Vermont lodge was removed to its proper place at Springfield. On May 14, 1795, upon petition to the Grand Lodge, the said lodge was moved to Windsor, Vt., and the lodge met there until September 19, 1831, when it suspended its meetings, in consequence of the anti-Masonic or Morgan excitement. On January 10, 1850,

¹ Ira Allen's History, in George F. Koon's "Freemasonry in Vermont."

² Ibid.

³ Ibid.

upon petition, the present Charter was granted by the Grand Lodge of Vermont. The second lodge established in Vermont was chartered by St. Andrew's Grand Lodge of Massachusetts, January 20, 1785, and was named North Star, in Manchester, Bennington County, and was constituted, February 3, 1785.

Dorchester Lodge was the third lodge constituted in Vermont previous to the formation of a Grand Lodge in Vermont. This lodge was chartered by Sir John Johnson, May 5, 1791, Grand Master of the Province of Quebec.

Temple Lodge, at Bennington, was chartered by the Grand Lodge of Connecticut, May 18, 1793.

Union Lodge, at Middlebury, was the last lodge chartered prior to the organization of the Grand Lodge of Vermont. The Charter was issued by the Grand Lodge of Connecticut, May 15, 1794.

A convention was held at Manchester, August 5, 1794, and the following lodges were represented, viz.: North Star, Dorchester, and Temple. After appointing committees for several purposes, preliminary to a permanent establishment of a Grand Lodge, the convention adjourned, to meet at Rutland, October 14, 1794, at which time the Grand Lodge adopted the constitution. There were present, by representatives, the following lodges, viz.: North Star, Vermont Lodge, Dorchester, Temple, and Union. The Grand Officers were elected, Brother Noah Smith being Grand Master.

The Grand Lodge continued to hold the annual communications until during the anti-Masonic excitement in 1826. From 1828 to 1836 many of the lodges failed to be represented, and to pay their annual dues to the Grand Lodge. At the Annual Communication, October 11, 1831, a resolution, recommending an unqualified surrender by the Grand Lodge of the charters of the several secular lodges was dismissed by a vote of ayes 99 to noes 19.

Without dwelling upon the history of that time, which tried the souls and patience of all good Masons, we extract from the proceedings of the Grand Lodge held October 7, 1834.

At the session of October 7, 1834, the following transaction took place:

On motion of Bro. Joel Winch, a committee of three was appointed to examine the communications received from secular lodges and present the views of the Grand Lodge at this time. N.

B. Haswell, Joel Winch, and Solomon Mason were appointed, who made the following report:

Whereas, The Grand Lodge of the State of Vermont has witnessed with regrets the assembling in different counties of the State of Masons called together by a notice or authority new and unknown to the usages of the craft and in opposition to the constitution of the order; therefore

Resolved, That the Grand Lodge deem the assemblage of Masons in the manner above alluded to to be unmasonic and unconstitutional.

Resolved, That the resolution adopted by the Grand Lodge at its last session (whereby permission was given to the secular Lodges to surrender their charters and records, giving to said Lodges authority to retain and dispose of their property and funds as they see fit) was a measure calculated to relieve [all] who wished to retire from Masonry.

Resolved, That the Grand Lodge do hereby receive, and they instruct their Secretary to receive hereafter, such charters and records as may be surrendered by virtue of the resolution aforesaid, and they order the same whenever surrendered to be deposited among its archives.

Resolved, That this Grand Lodge feel it a duty they owe themselves as well as the whole Masonic fraternity to declare, that while its individual members are left to the free and unmolested enjoyment of their sentiments upon the various subjects connected with religion and politics, and the right to judge of men and their actions, they hereby most solemnly declare that Masonic bodies have not the right to connect the institution with the sectarian or party views of either; that any attempt thereat is a gross innovation upon those principles which among good and correct Masons are universally acknowledged, and should be universally practised upon.

Resolved, That the Grand Lodge do at this time as they have hitherto done, declare to the world that the object of their association, and motives for continuing therein, are founded upon the principles of brotherly love, relief, and truth. They disclaim the right of Masons to inflict corporeal punishment and acknowledge no other right to enforce obedience from its members but reprimand, suspension and expulsion.

Resolved, That the Grand Lodge recommend to those brethren who incline still to adhere to the institution of Masonry, to continue to cultivate a spirit of good will towards those who may differ from them respecting the origin and continuance of Free Masonry; and while we are ready to forgive those whose fidelity has been shaken by one of those popular commotions incident to our free institutions, we are also ready to judge with candor the motives by which they have been governed.

In presenting the foregoing resolutions, your committee will close their report in the language of one of the late officers of this Grand Lodge whose labors on earth are finished; we ask you to gaze with us upon the ominous gathering, which to no eye can be viewless; we ask you to contemplate its swelling aspect, its various phases, and its multiform ramifications; listen to its busy notes of preparation and anticipate its maturity of strength, and then imagine its con-

summation to have taken place; then cast your eye around and see how many have quaked and quailed, how many have failed, how many have surrendered at discretion, and how many have renounced their faith and armed to batter us down; then complete the picture, and when you find the smoke and din of the conflict is passed, and the light streaming in upon us once more, not a heart flinching, not a hand palsied, but each and every one still invincible in defence of the mighty truth.

If Free Masonry falls, her monument will not crumble, nor her epitaph fade. It is erected upon the everlasting hills, it is firmly planted in the deepest vallies. The widow's prayer of joy, the orphan's tear of gratitude as they ascend, like the dew before the solar influence, bear with them its eulogy and its praise. So long as there remains a fragment of the temples of antiquity; so long as one stone of the edifices it has consecrated shall rest upon another; so long as brotherly love, relief, and truth obtain among men, so long will its mausoleum endure. The waves of popular prejudice may beat against it, the shouts of popular clamor may be thrown back in echoes from its base, the winds and weathers of time may press upon it, but still it will endure, glory will encircle it, honor will be yielded to it, and veneration will be felt for the hallowed recollections it quickens into action; and hereafter when he casts his eyes over the galaxy of social institutions among men, the philanthropist will involuntarily associate with his subject that other and celestial galaxy, and realize as now from the fiat that has effected the one, so then from the economy that controlled the other, that he will soon have to mourn for a lost Pleiad which can never more be visible in the moral constellation.

NATHAN B. HASWELL,

For Committee.

NOTE.—When we see the present status of Masonry at the end of the 19th century, how true a prophet was Brother Haswell!

The few faithful Brethren in Vermont never surrendered their Masonry, but continued to hold their communications of the Grand Lodge, and adjourned from year to year, until all the excitement had died out, when the politicians discovered that they could no longer impose upon the people.

Many of the Brethren wished again to resume the work of Masonry in Vermont, and thought it desirable that it should be done under the old organization, as they had made provision for keeping it up to the then present date. Bro. Grand Master Nathan B. Haswell, who had held the Grand Lodge together for so many years (blessed be his memory), called a meeting of the Officers of the Grand Lodge, to be held at Mason's Hall, in Burlington, January 14, 1846, at which time and place the Grand Officers met and the Grand Lodge of Vermont resumed its legitimate

functions and prestige, and has continued to do so ever since; and, notwithstanding the great trials and persecutions inflicted upon Masonry as an institution, and upon individuals, the Grand Lodge of Vermont stands to-day upon a higher pinnacle than ever before.

The "Green Mountain Boys" will ever maintain the honor and glory of their great antecedents.

Florida.

Originally, after the discovery by Ponce de Leon in 1513, Florida belonged to the Kingdom of Spain. The country was settled by Huguenots in 1562, and permanently occupied by Spaniards in 1565, at St. Augustine. It was ceded to Great Britain in 1763, again to Spain in 1783, and finally to the United States in 1819, and admitted to the Union in 1845.

The origin of Masonry in Florida is somewhat vague, and the writers on the history of Masonry do not agree as to when it was first introduced into that country. In 1768, the Grand Lodge of Scotland erected a lodge, No. 143, at East Florida and appointed Governor James Grant Prov. G. M. for North America, southern district.¹

A "memorial from the Brethren of St. Andrew's Lodge, No. 1, late of West Florida, now of Charlestown, South Carolina, with sundry papers relative thereto," was presented to the Grand Lodge of Pennsylvania, July 8, 1783. Of this lodge nothing more is known. When the Grand Lodge of Pennsylvania responded to the memorial and a Charter was issued, it was forwarded to the W. Master of another lodge with instructions to ascertain if the W. Master and members of the said lodge were of the Ancient and Honorable Fraternity, and consented to be under that jurisdiction. In 1768, the Grand Lodge of Scotland granted a Charter to a lodge in East Florida.

There is no trace whatever of such a lodge.

Brother Mackey indicates that Lodge No. 30, chartered by the Grand Lodge of South Carolina (Ancients), at St. Augustine, East Florida, became "extinct in consequence of a decree of the King of Spain." No. 56, at Pensacola, was chartered by the Grand

¹ Gould, vol. vi., p. 403.

Lodge of South Carolina (date is unknown). It also became extinct. The same Grand Lodge, June 30, 1820, chartered Floridian Virtues Lodge, at St. Augustine, in place of No. 30, and which also ceased to work in 1827. June 29, 1821, that Grand Lodge revived No. 56 at Pensacola, by the name of Good Intention Lodge, No. 17, which became extinct in 1825. January 3, 1824, that Grand Lodge issued a Charter to La Esperanza Lodge, No. 47, at St. Augustine, which is supposed to be a revival of No. 30.

From the reprint of the Proceedings of the Grand Lodge of Florida, the committee on the reprint say that the first lodge in East Florida was St. Fernando, at St. Augustine, warranted by the Grand Lodge of Georgia, about 1806. As South Carolina had issued a Charter as early as 1804, consequently this one could not have been the first.

Jackson Lodge, at Tallahassee, was chartered by the Grand Lodge of Alabama, December 19, 1825. On December 15, 1827, it was suspended and the Charter was forfeited, December 8, 1829; it was, however, placed in good standing on the payment of its arrearages of dues.

Washington Lodge, at Quincy, was chartered by the Grand Lodge of Georgia, December 2, 1828; also the same Grand Lodge chartered Harmony Lodge, at Marianna, December 8, 1829. July 5, 1830, these three lodges met and framed and adopted a constitution, July 6th, and the Grand Officers were elected and installed. With the exception of the Territory of Michigan, this was the first Territorial Grand Lodge; and as the first one in Michigan did not continue very long, Florida Grand Lodge, now existing, may claim to be the first formed in a Territory.

Kentucky.

Kentucky being originally a part of Virginia, up to 1792, jurisdiction over it was exercised by that State.

November 17, 1788, Lexington Lodge was chartered by the Grand Lodge of Virginia. The following lodges also derived their authority from the same Grand Lodge, viz.: November 25, 1791. Paris Lodge was chartered; Georgetown Lodge received a dispensation, January 9, 1796, and a Charter, November 29, 1796; a dispensation was issued to Hiram Lodge, September 20, 1799, and a

Charter was granted, December 11, 1799; a dispensation was issued to Abraham's Lodge, at Shelbyville, in the latter part of 1799 or commencement of 1800.

Representatives from these five lodges met September 8, 1800, at Lexington, and determined that it was expedient, necessary, and agreeable to Masonic constitution, that a Grand Lodge should be established for that State. The convention then issued a call for a second convention for October 16, 1800.

This convention, composed of the above five lodges by their representatives, met, and after organization, elected their Grand Officers, who were then installed.

District of Columbia.

This district, containing originally one hundred square miles, was set apart by Act of Congress, approved July 16, 1790, for the capital of the United States: being partly in the State of Maryland, on the north and east side of the Potomac River, and on the south and west side of that river, in the State of Virginia.

Prior to that date a lodge had been organized by the Grand Lodge of Maryland, in the town of Georgetown, situated on the west bank of Rock Creek, April 12, 1789, by the name of Potomac Lodge, No. 9. For some reasons, now unknown, this lodge ceased to work. October 23, 1795, the Grand Lodge of Maryland granted a Warrant to another body of Masons (probably many of them had been members of No. 9), which was named Columbia, No. 19. This lodge also ceased its labors, and another lodge was warranted by the Grand Lodge of Maryland, by the name of Potomac Lodge, No. 43, which last lodge continued with the name and number as stated, until the Grand Lodge of the District of Columbia was constituted, February 11, 1811, when the same name being continued, the number was changed to 5, and is the same at the present time.

Federal Lodge, No. 15, was chartered by the Grand Lodge of Maryland, September 12, 1793. By Act of Congress, the District of Columbia having been laid out and the public buildings for the several departments being under construction, especially the Capitol of the United States, the city of Washington having also been laid out, many private residences were being constructed, and the population was greatly increased.

EPISODE.

The corner-stone of the Capitol was laid September 18, 1793, with Masonic ceremonies, conducted by the President, Brother George Washington, who came up from Alexandria, accompanied by Alexandria Lodge, No. 39, and was joined by Potomac Lodge, No. 9. Federal Lodge, No. 15, although its Warrant had been issued a few days previous to this occasion, and in consequence of its not having been duly instituted, could not join in the ceremonies, although the Brethren were present as spectators. The gavel used on that occasion, made by one of the workmen, of a piece of marble similar to that used in the building, was presented to General Washington; after the ceremonies it was given by him to the Worshipful Master of Potomac Lodge, No. 9, and is in the possession of that lodge at the present time.

Brooke Lodge, No. 47, being located in Alexandria, Va., after the formation of the Federal District, was chartered by the Grand Lodge of Virginia.

Alexandria Lodge, No. 29, also located in the city of Alexandria, was originally chartered by the Grand Lodge of Pennsylvania, February 23, 1783, but soon after the institution of the Grand Lodge of Virginia, October 13, 1778, this lodge withdrew from her allegiance to the Mother Grand Lodge of Pennsylvania, by her consent, and received a Warrant from the Grand Lodge of Virginia, under the name of Alexandria Lodge, No. 22, dated April 28, 1788, with George Washington, Esquire, late Commander-in-Chief of the forces of the United States of America, as Worshipful Master.

Columbia Lodge, No. 35, in Washington City, was chartered by the Grand Lodge of Maryland, November 8, 1803; Washington Naval Lodge, No. 40, also in Washington City, was also chartered by the Grand Lodge of Maryland, May 14, 1805.

December 11, 1810, a convention was held by the five lodges above mentioned, viz.: Federal, No. 15; Brooke, No. 47; Columbia, No. 35; Washington Naval, No. 40; and Potomac, No. 43. Alexandria Lodge, No. 22, declined to join in this movement and was sustained by the Grand Lodge of Virginia, and quietly acquiesced in by the Brethren in the District of Columbia. This convention adjourned to January 8th, and again to February 11, 1811, when the organiza-

FREEMASONRY IN THE UNITED STATES 1441

tion of the Grand Lodge of the District of Columbia was fully completed. The several lodges surrendered their charters to their Mother Grand Lodges, and charters were issued to them by their own Grand Lodge, their numbers being changed to 1, 2, 3, 4, and 5, according to original dates. Of these five lodges, all are in existence and are in a flourishing condition, except Brooke Lodge, No. 2, of Alexandria, which returned to the Grand Lodge of Virginia when that part of the District of Columbia was retroceded to the State of Virginia, and soon thereafter ceased to labor.

CHAPTER LV

HISTORY OF THE INTRODUCTION OF FREEMASONRY INTO EACH STATE AND TERRITORY OF THE UNITED STATES

The First Lodges and the Grand Lodges (Continued).

Ohio.

HE introduction of Masonry into Ohio is due to the fact that soon after the close of the War of the Revolution, the Master, Jonathan Heart, and some of the members of American Union Lodge settled near Marietta. The Charter of that lodge, which had been granted by the St. John's Grand Lodge of Massachusetts, February 15, 1776, by John Rowe, Grand Master (in the Connecticut Line of the Army),¹ was held by the Master, and he claimed that it was a lodge at large and not under the jurisdiction of any Grand Lodge, and in fact "it was invested with every power necessary to constitute, rule, and govern" Masonry in the Territories. It had been recognized "by the Grand Lodge of Massachusetts, Pennsylvania, and New York, as a constituent of the Grand Lodge of Massachusetts." This lodge worked for several years until its Charter was burned; a revival of it was asked for from the Grand Lodge of Pennsylvania, which was declined, "except as one of its constituent." Application to the Grand Lodge of Massachusetts was made, which authorized the lodge to resume work under a copy of the original Charter, "with the express provision that the charter should be of force only until a Grand Lodge should be formed in the territory in which it was located."

The Grand Lodge of Ohio was organized January 7, 1808.

¹ Shortly after, the lodge having removed to New York, asked for a Confirmation of their Charter, from the D. G. M., Dr. Middleton; but a new Warrant was granted under the name of Military Union, No. I.—Gould's "History," vol. vi., p. 415.

The lodges represented were American Union, No. 1, at Marietta; Cincinnati, No. 13, warranted by the Grand Lodge of New Jersey as Nova Cesaræa, No. 10, now known as N. C. Harmony, No. 21; Sciota, No. 2, and Chillicothe, warranted by the Grand Lodge of Massachusetts in 1805, now known as No. 6; Erie, No. 47, at Warren, warranted by the Grand Lodge of Connecticut, March 16, 1804, now known as Old Erie, No. 3; and Amity, No. 105, at Zanesville, warranted by the Grand Lodge of Pennsylvania in 1804, now No. 5.

January 4, 1808, a preliminary convention of the delegates from all the lodges then in Ohio—six in number—was held in Chillicothe to deliberate upon the propriety of forming a Grand Lodge, and to inaugurate measures for the organization of such a body. The convention continued its deliberations four consecutive days, which resulted in the unanimous adoption of a resolution proposed by Brother Lewis Cass, viz.: "that it is expedient to form a Grand Lodge of the State of Ohio."¹

A few rules, couched as resolutions, were adopted for the formation of a Grand Lodge, and appointed the first Monday in January, 1809, as the time, and Chillicothe as the place for holding the first Grand Communication of said Grand Lodge. The Grand Lodge met at Chillicothe, January 2, 1809, and duly organized with representatives from four lodges.

In consequence of the absence of the representatives of American Union Lodge, No. 1, there being but four lodges represented, it was thought that a Grand Lodge could not be legally organized. The Grand Lodge adjourned from day to day, and, finally, on January 5th, it adopted *pro tempore* the Constitution of the Grand Lodge of Kentucky, having decided that under their peculiar circumstances it would be right and proper to organize a Grand Lodge with only four lodges represented.

Brother Rufus Putnam, who had been chosen Grand Master at the convention held in 1808, wrote a letter to the Grand Lodge declining the office, on account of his great age, which was accepted, and Bro. Samuel Huntington was duly elected Grand Master.

Previous to the reception of this letter all the other Grand Officers elected the last year had been installed, and upon the election of the Grand Master he also was immediately installed, and all the

¹ Proceedings of the Grand Lodge of Ohio.

other Grand Officers who had just been elected at the same time with the Grand Master.

The Grand Lodge closed its sessions on January 7, 1709, having completed all things necessary to its proper work in Masonry.

Louisiana.

The introduction of Freemasonry in the Territory of Louisiana is principally due to the political condition of that Territory and the circumstances connected with the affairs in San Domingo, both countries at that period being somewhat, if not exclusively, settled by the Latin race and their negro slaves. Masonry had been introduced upon the Island of San Domingo from the Grand Orient of France, also by charters from the Grand Lodge of Pennsylvania. When the insurrection occurred in San Domingo, in 1791, the white refugees spread themselves in many of the cities in the United States; a very large number settled in New Orleans, and among them were many Masons, and in 1793 several of these residing in New Orleans organized into a lodge and received a Charter from the Grand Lodge of South Carolina by the name of "Parfaite Union, No. 29," the officers being installed in the York Rite on March 30, 1794. In the same year several Brethren of the French, or Modern Rite, formed themselves into a lodge called "Etoile Polaire" (Polar Star), and applied for a Charter from the Grand Orient of France. The Grand Orient having suspended its labors, in consequence of the political condition of France, could not issue a Charter. The Brethren, however, obtained a provisional Charter or dispensation from the Provincial Lodge *La Parfaite Sincerite* at Marseilles in 1796, and intrusted the same to Dominique Mayronne, with authority to constitute the new lodge and install the officers, which was done under the French Rite, December 27, 1798.

When the Grand Orient resumed labor in 1803, a Charter was issued to Polar Star Lodge, No. 4263, in 1804, and Ch. Tessier was deputed to deliver the Charter and heal their work, which was done, and officers were installed, November 11, 1804, by A. Pinard and A. Marmillion.

The early records of "Perfect Union" and "Polar Star" can not be found, but the above information has been obtained by Brother James H. Scot, the historian of the Grand Lodge of Louisiana, from the "Manuel Maçonique," a very rare work, published in

New Orleans in 1828. It is very probable that these lodges were formed about the same time, "but in the absence of the original records it is impossible to decide the question."¹

It is thought that the Brethren who formed these two lodges were from the Island of Guadaloupe, which was involved in the horrors of the negro insurrection of 1791. In consequence of political differences among the French inhabitants in Louisiana, growing out of the French Revolution, difficulties arose which resulted in the refusal of the members of these two lodges to hold any Masonic intercourse with each other.

Some of the former members of "Candor Lodge, No. 12," in Charleston, S. C., which was extinct, having settled in New Orleans, applied to the Grand Lodge of Pennsylvania and obtained a Charter, dated May 18, 1801, as Candor Lodge, No. 90. It is possible that this lodge did not survive very long, if it ever was duly constituted, as on March 1, 1802, the Grand Lodge of Pennsylvania granted a Charter to Charity Lodge, No. 93, having the name of N. Definieto, W. M., who was the W. M. of Candor, No. 90. This Charter was not received until 1804, and on May 13th of that year the lodge was duly constituted and the officers were installed in the York Rite. On October 1, 1800, by treaty, Spain retroceded the whole of the territory of Louisiana to France, which held an actual possession of only twenty days, as on December 20, 1803, the United States flag was raised in New Orleans, France having sold the whole territory to the United States. This change in the political condition made equally a change in Masonic affairs, and from that date on, viz., 1804, Masonry assumed quite a different attitude in Louisiana.

A change also in the Island of San Domingo caused a very large number of the refugees of 1791 to return to their old homes, and the French contingent among the Masons in New Orleans was greatly reduced. The American element, which had in Masonic matters been much in the minority, began to increase and soon prevailed.

A duplicate Charter from the Grand Orient of France was received, July 20, 1807, bearing date of February 17, 1806, by the Lodge "La Union Desirée," No. 3013, which had been under the auspices of the Grand Orient of France, at Port au Prince, April 16, 1783. During the revolution of 1791 the Charter,

¹ James H. Scot, "History of Masonry in Louisiana."

archives, etc., had been destroyed. The members who had fled to New Orleans in 1791, and had returned to San Domingo in 1802, had been again compelled to flee to New Orleans the second time. In 1806 Masons from the Northern part of the United States applied for and obtained a Charter from the Grand Lodge of New York, on September 2, 1807, now Louisiana Lodge, No. 2. In the "Manuel Maçonique" it is No. 101, which is an error of the author. This was the first lodge in New Orleans that worked in the English language, and its first W. M. was the celebrated jurist Edward Livingstone.

Polar Star Lodge, No. 4263, applied to the Grand Orient of France and obtained a Charter to hold a Chapter of Rose Croix, which was constituted and officers installed, May 24, 1807, as "La Vertu Récompensée, No. 5001."

On September 15, 1808, a York Rite Charter was issued to some of the members of Lodge La Réunion Desirée, No. 3829, by the same name but numbered 112, by the Grand Lodge of Pennsylvania. This lodge dissolved March 23, 1812.

This much of the early history in Louisiana must suffice, as to continue a specific notice of all the lodges chartered and the various contests which grew out of the various rites in use, and the "Cumulation" thereof, would utilize our entire remaining pages of this chapter, hence must proceed to the organization of the Grand Lodge.

It appears from the records that twelve lodges had received charters in New Orleans prior to the organization of a Grand Lodge, as will appear in the following table:

NAME OF LODGE.	No.	BY WHOM CHARTERED.	DATE OF CHARTER.
Perfect Union	29	Grand Lodge of South Carolina	March 30, 1794.
Polar Star.....	4263	Pro. Lodge Sincérité	December 27, 1798.
Candor.....	90	Reconstructed by Grand Oriental of France.....	November 11, 1804.
Charity	93	Grand Lodge of Pennsylvania	May 18, 1801.
Réunion Desirée.....	3829	Grand lode of Pennsylvania.....	March 1, 1802.
Louisiana.....	1	Grand Lodge of France	February 17, 1807.
Réunion Desirée	112	Grand Lodge of New York	September 2, 1807.
Concord	117	Grand Lodge of Pennsylvania	September 15, 1808.
Perseverance.....	118	Grand Lodge of Pennsylvania	October 7, 1810.
Harmony	122	Grand Lodge of Pennsylvania	October 7, 1810.
Polar Star.....	129	Grand Lodge of Pennsylvania	November 19, 1810.
Bienfaisance	1	Grand Lodge of Pennsylvania	June 3, 1811.
		Grand Consistory of Jamaica	June 22, 1811.

Of these lodges, Candor, No. 90, York Rite, was perhaps never organized; Réunion Desirée, No. 3829, French Rite, ceased to work, November 27, 1808; Polar Star, No. 4293, French Rite, adjourned *sine die*, October 13, 1811; Réunion Desirée, No. 112, York Rite, dissolved, March 23, 1812; and Bienfaisance, No. 1, Scottish Rite, affiliated with Concord, No. 117, May 27, 1812, leaving seven lodges in full activity and all working the York Rite, viz.: Numbers 1, 4, 6, 8, 9, 10, 11, and 12, in the above table.

Louisiana was admitted as a State by Act of Congress, April 8, 1812, to take effect after April 30th. This change politically had a corresponding result masonically.

Perfect Union Lodge, No. 29, had the honor of taking initiatory steps toward the organization of a Grand Lodge, which resulted in a meeting, April 18, 1812, of the delegates of Perfect Union Lodge, No. 29; Charity Lodge, No. 93; Louisiana Lodge, No. 1; Concord Lodge, No. 117; Perseverance Lodge, No. 118; Harmony Lodge, No. 122; and Polar Star Lodge, No. 129. These delegates organized themselves into a "General Committee of the State of Louisiana to provide for the establishment of a Grand Lodge in the City of New Orleans." P. F. Dubourg was the first President.

On May 16th following a second meeting was held, Charity Lodge, No. 93, not being represented; and a communication was received from Louisiana Lodge, No. 1, saying that in their opinion "it would be inexpedient at present" to join in the proposed formation of a Grand Lodge; whereupon a resolution was passed requesting the W. Master of the Senior of the regular lodges in the State, Perfect Union, No. 29, to issue his summons¹ to the Masters, Past Masters, and Officers of the several Ancient and regularly constituted lodges in the State to meet in convention to take into consideration the interests of the true Craft, and to deliberate on the necessity of establishing a Grand Lodge in the State, which was accordingly done, and the convention met June 13, 1812, and the following representatives were present, viz.: Perfect Union, No. 29; Charity, No. 93; Concord, No. 117; Perseverance, No. 118; Polar Star, No. 129. As soon as the convention was organized the President, Brother Dubourg, stated that he had received a communication from Harmony Lodge, No. 122, which had withdrawn from the convention. The convention adjourned to meet June 20th next. June 20, 1812, the Grand Convention then met and elected the Grand Officers; P. F. Dubourg being elected Grand Master, who was duly installed after the election of the Grand Officers, and by a resolution adopted, the Grand Master installed all the other Grand Officers on July nth following.

At a communication held August 15, 1812, the committee appointed for that purpose reported a draft of a Constitution which was adopted.

¹ Ancient term for *Notification*.

At a quarterly communication held March 27, 1813, the Grand Master announced that a Grand Royal Arch Chapter had been organized and attached to the Grand Lodge of Louisiana. The Grand Chapter had been organized, March 8, 1813, by Concord and Perseverance R. A. Chapter, working under charters from the Grand Chapter of Pennsylvania and attached to the lodges of the same name. On March 13th the Grand Officers were elected and installed.

To follow the history of the Grand Lodge of Louisiana would require more space than can be permitted; here we must close with the date of March, 1813.

Tennessee.

Warrants to organize lodges had been issued from the Grand Lodge of North Carolina as early as 1796 and one from Kentucky.

These lodges held a convention at Knoxville in December, 1811, and adopted the following:

Resolved, That in the opinion of this Convention the number of Ancient York Masons in this State as well as the state of society, require the formation of a Grand Lodge within the same for the better regulation and extension of the Craft.

Resolved, That a Committee be appointed for the purpose of drawing up an address to the Grand Lodge of North Carolina, soliciting their assent to the establishment of a Grand Lodge in the State of Tennessee."

The Grand Lodge of North Carolina granted this request; and the convention again met October 14, 1813, and the Grand Lodge was constitutionally established and the Grand Officers were elected and installed.

Mississippi.

The first lodge in Mississippi which received a Warrant from the Grand Lodge of Kentucky was Harmony, No. 33; originally No. 7, by a Charter October 16, 1801. Two other lodges, viz.: Andrew Jackson, No. 15, and Washington, No. 17, received their warrants from the Grand Lodge of Tennessee July 27, 1818. A convention was held in the city of Natchez, when it was resolved that it was necessary and expedient to form a Grand Lodge for the State of Mississippi. On August 25th following, the convention

again met, and the Grand Lodge was regularly constituted. Henry Toohey was elected Grand Master.

Illinois.

The Grand Master of Pennsylvania, Israel Israel, issued a dispensation for six months to Western Star Lodge, No. 107, to be located at Kaskaskia, situated near the mouth of the Okaw (now Kaskaskia) River, where it empties into the Mississippi River, September 24, 1805. At that period Illinois was in the Indian Territory. This lodge received its Charter, which was granted June 2, 1806, and on September 13th following, the lodge was regularly constituted. This lodge was doubtless the first one established in that Territory—now comprising the States of Wisconsin and Illinois and a part of Minnesota.

The Grand Lodge of Kentucky issued a Charter, August 28, 1815, to Lawrence Lodge, to be located at Shawneetown; the Grand Lodge of Tennessee issued a Charter, October 6, 1819, to Libanus Lodge, at Edwardsville; June 20, 1820, the Grand Master of Tennessee issued a dispensation to Temple Lodge, at Belleville, St. Clair County, which was surrendered in 1821.

From the Grand Lodge of Missouri at various dates in 1822 the following warrants were granted: October 3, 1822, Olive Branch, No. 5, at Alton, 111.; October 8, 1822, Vandalia, No. 8, at Vandalia; October 9, 1822, Sangamon, No. 9, at Springfield; October 24, 1822, Union, No. 10, at Jonesborough; October 8, 1822, Eden, No. 11, at Covington.

The Grand Master of Indiana issued a dispensation, March 12, 1822, to Albion Lodge, at Albion.

All the above lodges except Sangamon sent delegates to a convention at Vandalia which met December 9, 1822. They adopted a constitution, which was sent to the lodges for their consideration. Eight of these lodges were represented at a convention held December 1, 1823, and a Grand Lodge was duly organized. The Grand Master was installed by Dr. Hardage Lane, of St. Louis, Mo., the Deputy Grand Master of the Grand Lodge of Missouri.

In 1827 the Grand Lodge of Illinois went out of existence, and after June 24, 1827, "every Lodge in the State was so effectually blotted out that no trace of any of them has been found."

It is supposed that as the anti-Masonic excitement had, about

that time, begun to work its way to the West, the Masons were more or less lukewarm in the cause, and politics being somewhat mixed up in the affair, the Brethren let the matter drop for a while.

The Grand Lodge of Kentucky issued a dispensation to Bodley Lodge, No. 97, at Quincy, Ill., there being at that time no working lodge in the State. That lodge was warranted August 30, 1838. That Grand Lodge likewise warranted Equality Lodge, No. 102, at Equality, in Gallatin County, August 29, 1837; and Ottawa, No. 114, at Ottawa County, of Lasalle, September 1, 1740. The Grand Master of Kentucky issued a dispensation to Friendship Lodge at Dixon in 1840.

The Grand Lodge of Missouri warranted:

Franklin Lodge, at Alton, in.....	1827
Harmony Lodge, at Jacksonville, in	1838
Springfield Lodge, at Springfield, in	1839
Temperance Lodge, at Vandalia, in	1839
Far West Lodge, at Galena, in	1839
Mount Moriah Lodge, at Hillsboro, in	1840
Clinton Lodge, at Carlisle, in.....	1840

A dispensation to Columbus Lodge, No. 20, at Columbus, in 1839.

Delegates from several of the subordinate lodges on January 30, 1840, held a convention in Jacksonville, when it was resolved to form a Grand Lodge. A committee was appointed to correspond with the lodges in the State and ask their assistance, and to send delegates to a convention to be held at Jacksonville, April 6, 1840, which convention was held on that date and six of the eight chartered lodges and one under dispensation were represented, and the Grand Lodge was then organized.

At the meeting held April 28th, the Grand Master, Abraham Jonas, was installed by proxy.¹ Warrants were issued to the lodges represented and numbered according to their dates of constitution—

¹The "Reprint of the Proceedings for 1840 to 1860," published 1874, shows: April 6, 1840, at Jacksonville, "M. W. Abraham Jonas was elected G. M." April 28th, "called from refreshment to labor." The name of Abraham Jonas does not appear as being present. James Adams, D. G. M., presided. The minutes say: "On motion all but Past Masters having retired a convocation of Past Masters was declared open, and the M. W. Grand Master was installed by proxy, and the grand honors paid him agreeable to ancient form and usage."

some of them, however, did not get their new warrants until some« time in 1844.

In consequence of the business relations existing between many of the towns in Illinois and the city of St. Louis in Missouri, some of the lodges in those towns much preferred to hold their warrants from Missouri Grand Lodge, as the representatives could attend the Grand Lodge of Missouri in St. Louis, and at the same time transact their commercial business in that city. The writer was an officer of the Grand Lodge of Missouri in 1841-42-43 and well remembers that those Brethren from Illinois were urged to withdraw from our Grand Lodge and unite with the Grand Lodge in their own State. They, however, declined for the reason above stated. We can bear witness to this as a justification of the conduct of the Grand Lodge of Missouri, for they could not drive away their Brethren of Illinois.

Finally, however, those lodges did withdraw and unite with the Grand Lodge of Illinois, as also did several of the lodges in Iowa, about that time, which had been chartered by the Grand Lodge of Missouri, and they formed the Grand Lodge of Iowa.

On February 10, 1850, a fire occurred in Peoria by which was destroyed, in the office of the Grand Secretary, all the books, papers, and records of the Grand Lodge of Illinois. To remedy the loss as far as possible, the Grand Lodge was convened in Springfield, April 8, 1850.

Of the lodges aiding in the organization of the second Grand Lodge, four are now alive, viz.: Bodley, No. 1; Equality, No. 2; Harmony, No. 3; and Springfield, No. 4.

In 1889, October 1st and 2d, the fiftieth anniversary was celebrated.

The Grand Lodge of Illinois, in her growth since its organization in 1839, has kept even pace with the increase of population, and now stands in membership among the first in the United States, in 1897 the membership number being 53,452, number of lodges, 722. In her influence for good and the reputation of her personnel she is *primus inter pares* (first among her equals).

Missouri.

The first settlers of Upper Louisiana, as the now State of Missouri was originally called, were French, who came by the way of Canada, and were companions of Cartier, La Salle, and Father Hennepin, who traversed the vast wilderness that extended between the boundaries of Canada and the settlements of the French on the Lower Mississippi.

In November, 1763, Pierre Liguiste Laclède arrived at St. Genevieve, and finding no place suitable for the storage of his goods, he proceeded up the Mississippi River; and on February 15, 1764, he and his party landed where the city of St. Louis now stands, which he named in honor of Louis XV. of France.

In that early day the merchants who were in St. Louis and St. Genevieve procured their goods in Philadelphia, where they went once every year. Many of these merchants became Masons and were made in the French Lodge, No. 73, in Philadelphia.

As the Masons in the Territory increased in numbers, they resolved to organize a lodge, and in 1807-8 having applied for, they received a Warrant of Constitution from the Grand Lodge of Pennsylvania for a lodge in the town of St. Genevieve, as Louisiana Lodge, No. 109. Otho Strader was the first Master. Among its members were many of those who afterward became prominent merchants of St. Louis, as Pierre Chouteau and Bartholomew Berthold, who became the founders of the great Fur Company.¹

This was the first lodge established in Missouri.

In 1811-12 Gen. H. Dodge presided over this lodge as W. Master, but owing to the unsettled condition of the Territory in consequence of the late war with Great Britain, the lodge ceased to work about 1825.

In 1809-10 the Grand Lodge of Pennsylvania granted a Warrant to a lodge in St. Louis as No. 111. There is no record whatever of this lodge remaining. A dispensation was issued by the Grand Lodge of Indiana in 1820 for a lodge in Jackson, now in Cape Gerardeau County. This lodge was subsequently chartered by the Grand Lodge of Missouri.

October 18, 1816, the Grand Lodge of Tennessee granted a

¹ Geo. F. Gouley, "History of Grand Lodge of Missouri."

Charter to a lodge in St. Louis as Missouri Lodge, No. 12, which is still in existence as No. 1.

That Grand Lodge also granted charters to the following lodges, viz.: October 6, 1819, to Joachim Lodge, No. 25, at Herculanum, and on same date to St. Charles Lodge, No. 28, at St. Charles on the Missouri River.

February 23, 1821, by an invitation sent by Missouri Lodge, No. 12, to the several lodges in the State, the following lodges, by their representatives, met in St. Louis, and a committee having been appointed to draft a constitution and code of by-laws, they adjourned until April 23d following, to meet at the same place to organize a Grand Lodge.

Prior to this date (April 23, 1821), a convention of Masons met, pursuant to previous notice given by the convention of delegates, at the lodge-room of Missouri Lodge, No. 12, April 23d, Anno Lucis, Year of Light, 5821, for the purpose of organizing the Grand Lodge of the State of Missouri.

Opened in the third degree in due form, with Wor. Edward Bates,¹ Master, and others. After reading the proceedings of the convention held February 22d last, adjourned until 24th inst.

April 24, A. L. 5821. Present as before. An election for the officers for the ensuing year was held and resulted as follows:

Brother Thos. F. Riddick, M. W. G. M.

" James Kennerly, S. G. W.

" William Bates, J. G. W.

" Archibald Gamble, G. Treasurer.

" William Renshaw, G. Secretary.

Adjourned to May 4th next.

May 4th A. L. 5821, Semi-Annual Convocation was held, a procession was formed and proceeded to the Baptist Church, where the solemn ceremony of consecration and installation was performed, in conformity with the ancient landmarks and customs of the Fraternity. The Grand Lodge then returned to the lodge-room and adjourned until next day.²

The first annual communication was held October 1, 1821.

¹ Hon. Edward Bates was Attorney-General in Mr. Lincoln's Cabinet, 1861-64. Nearly every member of this Grand Lodge was personally known to the present writer in 1837.

² Geo. F. Gouley, "History of Grand Lodge of Missouri."

At this communication Brother Frederick Bates was elected Grand Master, who, not being present, was notified by a committee, but declined accepting the office. Grand Lodge adjourned until October 10, 1821, at which time the Grand Lodge resumed labor and elected Brother N. B. Tucker M. W. Grand Master, and Edward Bates G S. W.

The Grand Lodge then adjourned until 7 P.M., when at the request of Bro. Thos. F. Riddick, Brother Douglass took the Chair and installed Brother Nathaniel B. Tucker Most Worshipful Grand Master of the Grand Lodge of Missouri in ample form, and the Past Master's Lodge was closed, and the other Grand Officers were duly installed into their respective offices.

Thus the Grand Lodge of Missouri was constituted and has continued to the present day, and the writer, who the commencement of his own Masonic career, January 18, 1840, could personally testify to the character and standing, in the community of the State of Missouri, to nearly every member of that distinguished body of men and Masons, upon whose shoulders the interests of our noble institution, at that time, were placed by the Grand Lodge. In the year 1841 the writer was appointed the Senior Grand Deacon of the Grand Lodge by Hon. Priestly H. McBride, Grand Master, and was reappointed in 1842 and 1843. A very large proportion of those who organized the first Grand Lodge continued as members and officers of the Grand Lodge up to the year 1844, when by accessions of lodges which had been chartered from 1821 to 1840, the number had increased from four to twenty-five, which was Naphtali, and in which we received the three degrees. In 1841-42 several lodges had been chartered in Iowa, and among them was Iowa Lodge, No. 42, of which our very distinguished Brother Theodore S. Parvin was Wor. Master, and we mention this circumstance to state that he and the writer are the only surviving members of that Grand Lodge of 1841 to 1844.

Indiana.

As early as 1795 members of the Fraternity who had been connected with lodges in the army on the northwest frontier, introduced Free Masonry into the Territory. The first lodge, however, was organized by a dispensation from the Grand Lodge of

Kentucky, August 31, 1808, at Vincennes, by the name of Vincennes Lodge, No. 15.

The following lodges were also granted warrants by the Grand Lodge of Kentucky: At Madison, Union Lodge, No. 29, August 31, 1815; at Charlestown, Blazing Star, No. 36, August 25, 1816; at Salem, Melchizedeck, No. 43; Lawrenceburg, Lawrenceburg, No. 44; and at Corydon, Pisgah, No. 45, all August 25, 1817.

The Grand Master of Kentucky, after the annual meeting of the Grand Lodge, issued a dispensation for the Lodge at Switzerland, and one for Rising Sun Lodge, at Rising Sun.

A dispensation for lodge Brookville Harmony, No. 41, at Brookville, was issued by the Grand Master of Ohio in 1816 or 1817.

A general convention of the representatives of the following lodges of Ancient York Masons of the State of Indiana was held at Corydon on December 3, 1817, viz.:

Name of Lodge.	No.	Location.	Representative.
Vincennes	15	Vincennes	G. W. Johnston.
Lawrenceburg	44	Lawrenceburg.....	James Dill.
Switzerland.....	U. D. of Ky.....	Vevay	Hezekiah B. Hull.
Rising Sun	U.D. of Ky.....	Rising Sun	A. C. Pepper.
Madison Union	29	Madison	H. P. Thornton.
Blazing Star.....	36	Charlestown{	Jos. Bartholomew.
Brookville Harmony.....	41 U. D. Ohio.....	Brookville	John Miller.
Salem.....	43	Salem	Stephen C. Stevens.
Pisgah	45	Corydon	Christ. Harrison.
			Davis Floyd.

Brother Alexander Buckner was unanimously chosen President, and Davis Floyd unanimously elected Secretary.

The convention then adopted the following:

"Resolved, That it is expected and advisable that a Grand Lodge should be at this time formed in the State of Indiana."

All the above representatives voted in the affirmative except those of Harmony and Pisgah.

The convention then adopted the following:

"Resolved, That a committee of four members be appointed to inform the M. W. Grand Masters of Kentucky and Ohio that

a constitutional number of chartered lodges have determined in general convention to form a Grand Lodge in this State, and consequently will secede from their Mother Lodge so soon as a Grand Lodge is organized."

The convention also

"*Resolved*, That the several subordinate lodges here represented do appoint one or more delegates to meet at Madison on the second Monday in January next, for the purpose of opening a Grand Lodge for the State of Indiana; and that a Communication be forwarded to the rest of the lodges in this State unrepresented in this convention, of the above determination."

This resolution was adopted:

Harmony, No. 41; Lawrenceburg, No. 44; Switzerland, U. D.; Rising Sun, U. D.; and Madison, No. 29, voted in the affirmative, five. Vincennes, No. 15; Salem, No. 43; Pisgah, No. 45; and Blazing Star, No. 36, voted in the negative, four.

A Grand Communication of the subordinate lodges of the State of Indiana was held Monday, January 12, A.L. 5818. Representatives of the following lodges were present: Rising Sun, U. D.; Union, No. 29; Switzerland, U. D.; Blazing Star, No. 36. Delegates were reported by the Committee on Credentials, and admitted as being duly appointed by their respective lodges, viz.: Harmony Lodge, Brookville, U. D., from Grand Lodge of Ohio; Lawrenceburg, No. 44; Vincennes, No. 15; Melchizedeck, No. 43; Pisgah, No. 45.

The following resolution was adopted: "*Resolved*, That the chartered lodges here represented do now separate for a time from the lodges under dispensation, and proceed immediately to organize a Grand Lodge for the State of Indiana."

Brother Alexander A. Meek, being the oldest Past Master present, was called to the Chair. Melchizedeck Lodge surrendered her Charter but declined having a new one.

January 13th the Grand Officers were duly elected, M. W. Alexander Buckner, Grand Master.

The representatives from lodges Nos. 15, 29, 36, 43, 44, 45, holding charters from the Grand Lodge of Kentucky, surrendered the same, and asked to have charters granted to their respective lodges by the Grand Lodge of Indiana, which was accordingly done on the 14th, viz.:

Vincennes Lodge, No. 1, Vincennes; Union Lodge, No. 2,

Madison; Blazing Star Lodge, No. 3, Charlestown; Lawrenceburg Lodge, No. 4, Lawrenceburg; Melchizedeck Lodge, No. 5; Pisgah Lodge, No. 6, Corydon; which lodges received their charters at this communication.

The Grand Constitution was adopted January 15th. The illustrations of Masonry of Thomas Smith Webb were adopted for the government of the Grand Lodge, and were recommended to be adopted by all the subordinate lodges of the State for the government of the same.

Charlestown was selected as the site for the meeting of the Grand Lodge for the present.

The Junior Grand Warden being a member of Melchizedeck Lodge, which declined a Charter, the office became vacant and an election was held to fill the same, and Brother Benjamin V. Becks was duly elected.

The Grand Lodge met in various towns and cities until 1828, when it removed to Indianapolis, and has continued to do so ever since.

Alabama.

The first lodge in Alabama was Madison, No. 21, at Huntsville, which was chartered by the Grand Lodge of Kentucky, August 28, 1812. The Grand Lodge of Tennessee granted a Charter to Alabama Lodge, No. 21, at Huntsville, October 6, 1818. The Grand Lodge of South Carolina granted a Charter to Alabama Lodge, No. 51, at Clairborne, in 1819; the Grand Lodge of Tennessee granted a Warrant to Rising Virtue Lodge, No. , at Tuscaloosa, October 5, 1818; and the Grand Master of Tennessee issued a dispensation to Halo Lodge, at Cahawba, April 4, 1820, and which continued until October, 1821; but the Grand Lodge of Georgia issued a Warrant to Halo Lodge, No. 21, January 24, 1821; the Grand Lodge of Tennessee issued a Charter to Moulton Lodge, at Moulton, October 3, 1820; the Grand Lodge of Tennessee granted a dispensation to Russellville Lodge, October 3, 1820; a dispensation from the Grand Master of Tennessee was issued to Farrar Lodge, at Elyton, March 5, 1821; the Grand Lodge of North Carolina granted a Charter to St. Stephen's Lodge, at St. Stephen's, December 14, 1816; Washington Lodge and Tuscumbia Lodge were granted charters by the Grand Lodge of Tennessee. Tuscumbia had never reported

its work, and soon went out of existence. Washington very soon gave up her Charter. The name of Madison Lodge, No. 21, was changed to Helion; Alabama Lodge, No. 21, at Huntsville, was changed to Bethsaida; soon afterward a consolidation took place and these two and Helion and Bethsaida became Helion, No. 1. Of all the above lodges there only remain at the present time Rising Virtue, No. 4; Moulton, No. 6; and Farrar, No. 8.

The Grand Lodge was organized by the above-mentioned lodges and a constitution was adopted and signed June 15, 1821.

December 6, 1836, a quorum was not present; and after waiting for three days, those who were present declared the Grand Lodge extinct.

The representatives of the lodges present reorganized a Grand Lodge, a new constitution was adopted, new Grand Officers were elected, and the old warrants were re-granted.

Arkansas.

November 29, 1819, a dispensation for Arkansas Lodge, located at the Port of Arkansas, was issued by the Grand Lodge of Kentucky. A Charter was granted, August 29, 1820, Robert Johnson being W. Master. This lodge surrendered her Charter, August 28, 1822.

A dispensation to organize Washington Lodge at Fayetteville was issued by the Grand Master of the Grand Lodge of Tennessee, December 24, 1835; and it was renewed, November 12, 1836. October 3, 1837, a Charter was granted, and the lodge received as a present a set of jewels. A dispensation was granted from the same Grand Lodge for a lodge at Clarksville, October 5, 1838, to which a Charter was issued, October 12, 1839. The dispensation of Clarksville Lodge was received prior to the organization of the Grand Lodge of Arkansas, but the Charter was issued after that event. This lodge continued under the constitution of the Grand Lodge of Tennessee until 1843, when it came under the Grand Lodge of Arkansas as No. 5. In 1845 it ceased to work and surrendered the Charter.

January 6, 1837, the Grand Lodge of Louisiana issued warrants to two lodges in Arkansas, viz.: Morning Star, at Arkansas Post, and Western Star, at Little Rock. The seat of State Government

having been changed to Little Rock, Morning Star Lodge gave up the Charter.

A dispensation was issued by the Grand Master of Alabama in 1838 to Mount Horeb Lodge in Washington.

November 21, 1838, a convention was held and representatives from Washington, Morning Star, Western Star, and Mount Horeb, U. D., were present at which a constitution was adopted and officers were elected and the Grand Lodge was duly constituted.

Wisconsin.

The history of Freemasonry in the territory now embraced in the State of Wisconsin dates from December 27, 1823.

The only known record of the first lodge in what is now Wisconsin is founded in an address delivered at Green Bay, December 17, 1854, by P. G. M. Henry S. Baird. He says:

The first action had with a view to organize a lodge of Masons at Green Bay is found in proceedings of a meeting of the members of the Fraternity, held on the evening of the 27th day of December, A.D. 1823.

A committee was appointed to draft a petition to the Grand Lodge of the State of New York, praying for a dispensation to open and hold a Lodge of Free and Accepted Masons at Green Bay, then in the Territory of Michigan. In due time the prayer of the petitioners was responded to, and a dispensation granted.

On September 2, 1824, the first regular Lodge of Free and Accepted Masons was opened and organized at Fort Howard, directly opposite to the city, under a dispensation from the M. W. Grand Master of the Grand Lodge of the State of New York.

The officers named in the dispensation were:

Robert Irwin, Sr., W. Master.
Benjamin Watson, S. Warden.
W. V. Wheaton, J. Warden.

On December 3, 1824, a regular Charter was granted by the M. W. Grand Lodge of New York.

Mineral Point Lodge, No. 1, was organized July 27, 1841, from the Grand Lodge of Missouri, under dispensation dated October 8,

1840, named "Melody" (for Bro. George H. C. Melody, P. Dep. Grand Master of Missouri) Lodge, No. 65 (now No. 2).

A dispensation was issued by Brother Joab¹ T. Bernard, Dep. Grand Master, January 10, 1843.

A Charter was granted by the Grand Lodge of Missouri, October 13, 1843.²

A preliminary meeting, having in contemplation the formation of a Masonic lodge, was held at the house of John Beavans, in the town of Platteville, in the month of January, A.D. 1843.

MILWAUKEE LODGE, NO. 2 2 (NOW KILBOURN LODGE, NO. 3).

The first meeting of this lodge was held July 5, A. L. 5843, A.D. 1843.

Bro. Normand Hawley, representing the Grand Master of Illinois, presented the dispensation which he had been deputed to bring to them.

The exact date of the Charter of this lodge does not appear from the minutes. In the proceedings of the Grand Lodge of Illinois, October 2, 1843, the committee on Returns and Work recommended granting a Charter to Milwaukee Lodge, No. 22, "when dues are paid;" and on the first day of November, 1843, the election of officers was held under the Charter, 1843.

ACTION RELATIVE TO THE FORMATION OF A GRAND LODGE, NOVEMBER 22, 1843.

The worshipful Master, Bro. Abram D. Smith, presented a communication from Melody Lodge, at Platteville, upon the subject of establishing a Grand Lodge in the Territory of Wisconsin, which was read, and the Master and Wardens were appointed a committee to correspond with Platteville and Mineral Point lodges upon the subject.

The Charter of Milwaukee Lodge, No. 3, is dated January 17, 1844.

¹ Incorrectly called in the record John.

² The present writer was S. G. D. of the Grand Lodge of Missouri at that time.

MASONIC CONVENTION HELD AT MADISON ON THE 18TH DAY OF
DECEMBER, A.D. 1843.

The following lodges were represented:

Milwaukee Lodge, at Milwaukee.
Mineral Lodge, at Mineral Point.
Melody Lodge, at Platteville.

Bro. Moses Meeker was called to the Chair, and Bro. Geo. W. Lakin was appointed Secretary.

On motion of Bro. Ben. C. Eastman, it was

Ordered, That a committee consisting of two be appointed to receive and examine the credentials of the members of the convention.

The committee appointed to receive and examine the credentials of the members of the convention, being the legal representatives of the regularly constituted lodges of the Territory of Wisconsin, to take into consideration and determine upon the expediency of forming a Grand Lodge within the said Territory, have attended to the duty assigned them, and submit the following:

Your committee find that there are seven members of said convention representatives of the lodges aforesaid, to wit:

From Milwaukee, Mineral Point, and Melody lodges.

On motion of Bro. Ben. C. Eastman, it was

Ordered, That a committee of three be appointed to take into consideration the expediency of forming a Grand Lodge in the Territory of Wisconsin.

The Chair appointed Bros. Ben. C. Eastman, Dwight F. Lawton, and Geo. H. Walker said committee.

Bro. Ben. C. Eastman, from said committee, submitted the following

REPORT.

The committee appointed to take into consideration the expediency of forming a Grand Lodge in the Territory, have attended to their duty, and ask leave to report the following preamble and resolutions:

Whereas, There are now, within the Territory of Wisconsin, three chartered lodges, all of which are in a prosperous and happy condition; and

Whereas, It is competent for that number of lodges to emerge from a state of dependency, become legally organized, and be hereafter established and known as a separate, distinct, and independent body, having its own jurisdiction; and

Whereas, In the rapidly increasing population of our Territory, it is believed many more lodges will immediately spring into existence whereby the great principles of Masonry will be promulgated, if the facilities for obtaining dispensations and charters are increased as they will be by the organization of a Grand Lodge in Wisconsin; and

Whereas, The Great Lights of Masonry should not be hidden under a bushel, but should shine in the fullness of their strength, that none may want a guide for their faith and practice, and that their acts be squared by the precepts of the Great Architect of the Universe, and their desire be circumscribed by the principles of morality and their passions restrained in due bounds. Therefore, be it

Resolved, That it is expedient to form a Grand Lodge in the Territory of Wisconsin.

On motion of Bro. John H. Rountree, the report of the committee was accepted, the preamble and resolutions adopted, and the committee discharged.

On motion of Bro. Dwight F. Lawton, it was

Ordered, That a committee of three be appointed to draft a constitution for a Grand Lodge, and that said committee be instructed to report at as early an hour as possible.

The Chair appointed Bros. Lawton, Meeker, and Lakin said committee. The convention adjourned till 6 P.M.

Evening at 6 P.M. convention met.

Bro. Lawton, from the committee appointed to draft a constitution for a Grand Lodge, reported the draft of a constitution, which report was accepted and committee discharged.

On motion, the convention adjourned sine die.

The M. W. Grand Lodge of Free and Accepted Masons met in annual communication in the city of Madison, on Monday, December 18, A.D. 1843, A.L. 5843.

The Grand Lodge was opened in the third degree, in due and ancient form.

On motion of Bro. Meeker, the constitution reported in the convention was taken up, read, and adopted.

Bro. Merrill, from said committee, made the following

REPORT.

The committee appointed to nominate officers for the Grand Lodge have attended to the duty assigned them, and report that they have nominated the following:

Benjamin T. Kavanaugh, G. Master.
 Abram D. Smith, D. G. Master.
 Moses Meeker, S. G. Warden.
 David Merrilly, J. G. Warden.
 Thomas P. Burnett, Grand Treasurer.
 Ben. C. Eastman, Grand Secretary.
 Dwight F. Lawton, Grand Lecturer.

Which report was accepted, and the committee discharged.

On motion of Bro. Rountree, it was

Resolved, That the Grand Lodge do now proceed to the election of officers, and all the above-named Brethren were elected and installed.

Texas.

During the very first effort to establish a lodge in Texas, that country was a dependency of Mexico, and the Roman Catholic priesthood controlled the most of the population and were the open enemies of Freemasonry, and the American settlers were objects of suspicion.

In the winter of 1834-35 five Master Masons having made themselves known to each other as such, after many conferences and much deliberation, concluded to establish a lodge in Texas. These were John H. Wharton, Asa Brigham, James A. E. Phelps, Alexander Russell, and Anson Jones; they fixed upon time and locality for their meeting to accomplish their desire. Brother J. P. Caldwell subsequently joined them. The town of Brazoria was selected for their meeting, and in a small grove of wild peach and laurel in a family burial-ground of General John Austin.

Here in a day of March, 1835, 10 A.M., "was held the first formal meeting of Masons in Texas." These six Brethren made arrangements to apply to the Grand Lodge of Louisiana for a dispensation to form and open a lodge to be called Holland Lodge. A petition was drawn up and another Master Mason, Brother W. D. C. Hall, having signed it with the other six, it was

forwarded to New Orleans. The officers named were: Anson Jones, W. Master; Asa Brigham, Senior Warden, and J. P. Caldwell, Junior Warden. This dispensation was granted, and Holland Lodge, No. 36, was started at Brazoria on December 27, 1835. In the second story of the old court-house was where the Communications were held.

In consequence of the difficulties with Mexico, which finally resulted in open hostilities, the succeeding war, and independence of the Republic of Texas, the lodge struggled on until February, 1836, the last communication being held that month. In March Brazoria was abandoned, and the dispensation was captured by Urrea, and with records, books, jewels, etc., was destroyed.

In October, 1837, the lodge was reopened in the city of Houston, a Warrant for it having been granted in the meantime, and the lodge is yet in existence.

Two other lodges, viz.: Milam, No. 40, at Nacogdoches, and McFarland, No. 41, at San Augustine, were warranted by the Grand Lodge of Louisiana.

These lodges, as also Holland Lodge, No. 36, sent delegates to a convention which met in Houston, and the Grand Lodge of the Republic at Texas was organized, December 20, 1837. Brother Anson Jones was elected Grand Master.

The three lodges surrendered their charters to the Grand Lodge of Louisiana, and received new charters from their own Grand Lodge.

Iowa.

The first dispensation for the organization of a lodge in the Territory of Iowa was issued November 20, 1840, to Des Moines Lodge, at Burlington, which was chartered October 20, 1841. The second dispensation for a lodge was issued February 4, 1841, to Iowa Lodge, at Bloomington, Muscatine County, constituted February 4, 1841, and chartered October 20, 1841, as No. 42. The third dispensation was dated October 10, 1842, to Dubuque Lodge, at Dubuque, and was chartered October 10, 1843. The fourth was Iowa City Lodge, at Iowa City, County of Johnson, which was constituted October 10, 1842, by dispensation, and chartered October 10, 1843.

These lodges all derived their warrants from the Grand Lodge

of Missouri, and the present writer, as an officer in that Grand Lodge, voted for all but the first one, but was a visitor in the Grand Lodge when the first one was chartered. He made the personal acquaintance of Brother Theodore S. Parvin and the other representatives of those lodges at that time, and Brother Parvin and the writer are the only surviving members of that Grand Lodge since October, 1897.

These four lodges, by agreement, at a preliminary convention of their delegates, held at the communication of the Grand Lodge of Missouri, at St. Louis, October 11, 1843, met in convention at Iowa City, in Iowa Territory, January 2, 1844, and then and there organized the Grand Lodge of Iowa.

Delegates were present from the following other lodges in Iowa working under authority of the Grand Lodge of Illinois, viz.: Rising Sun, No. 12, at Montrose, Keokuk Lodge, at Keokuk, and Clinton Lodge, at Davenport. The first under a Charter and the other two under dispensations. These lodges were finally admitted to the Grand Lodge of Iowa.

January 3, 1844, the Grand Officers were elected. Brother Oliver Cock was unanimously elected on the second ballot the Grand Master, and Brother Theodore Sutton Parvin unanimously elected Grand Secretary, which office he has filled, except when he was chosen Grand Master, ever since, now fifty-five years. No Mason has a more extended reputation for abilities, so essential in the management of Masonic affairs, than has our illustrious Brother, who is so favorably known throughout the world of Masonry.

Oregon.

After the organization of Multnomah Lodge at Oregon City, a little more than two years elapsed before any additional lodges were established in Oregon. Following the planting of this lodge, the Grand Lodge of California, on November 27, 1850, granted a Charter to Willamette Lodge, No. 11, at Portland. This lodge was opened and constituted January 4, 1851. The Grand Lodge of California granted a Charter to Lafayette Lodge, of Oregon. This lodge was constituted and began work July 30, 1851. The establishment of this lodge gave to the Territory of Oregon the requisite number of lodges, under the common law of Masonry, to organize

an independent Grand Lodge for the jurisdiction. The opportunity was at once improved.

"The important question," says a distinguished Brother, recently deceased, "of having a Grand Lodge was agitated. Consequently, on the 16th of August, A.L. 5851, A.D. 1851, a convention of F. & A. Masons of the Territory of Oregon was held at Oregon City to form a Grand Lodge. Brother Berryman Jennings was elected Chairman and Bro. Benjamin Stark Secretary." The convention, after due consideration, resolved upon the wisdom and expediency of the "formation of a Grand Lodge." In pursuance of this action an address, giving official notice of the purpose in view, was prepared and sent out to the several lodges, requesting them to meet again in convention on the second Saturday in September following, to perfect the Grand Lodge organization.

In pursuance of this call, delegates from the several lodges assembled at Oregon City on September 13, 1851, and proceeded to the work in hand by the election of Bro. John Elliott Chairman, and Bro. W. S. Caldwell Secretary. The three lodges, viz.: Multonomah, Willamette, and La Fayette, were duly represented. Among the delegates present were those who were otherwise admitted to seats in the convention, viz.: Bros. J. C. Ainsworth, R. R. Thompson, Forbes Barclay, John Elliott, Lewis May, Benj. Stark, Wm. M. Berry, D. D. Garrett, G. B. Coudy, B. Jennings, Robert Thompson, Amory Holbrook, and W. S. Caldwell. On Monday, September 15th following, a constitution, through a committee, was reported and adopted, and the Grand Lodge of Oregon duly organized. Bro. Berryman Jennings was elected and installed Grand Master, and Bro. Benj. Stark Grand Secretary.

The first lodge established under authority of the Grand Lodge of Oregon was organized at Salem, under the name of Salem Lodge, No. 4. The dispensation of this lodge was issued by the Deputy Grand Master, R. W. Bro. John Elliott, on October 4, 1851.

California.

The Grand Lodge of California was organized in the city of Sacramento, April 18, 1850. The constituent lodges were California Lodge, No. 13, chartered by the Grand Lodge of the District of Columbia, located in San Francisco, November 9, 1848; Con-

necticut Lodge, No. 75, Sacramento City, chartered by the Grand Lodge of Connecticut, January 31, 1849; and Western Star Lodge, No. 98, from the Grand Lodge of Missouri, May 10, 1848; Benton City, Upper California.

Delegates were present from New Jersey Lodge, under dispensation from the Deputy Grand Master of the Grand Lodge of New Jersey, dated March 1, 1849. This lodge was opened in Sacramento City, December 4, 1849.

Credentials were presented by B. D. Hyam, from Benicia Lodge, at Benicia, but there being no dispensation or Charter or any other information of the existence of such a lodge, it was not recognized.

A constitution was adopted April 19th, and the Grand Officers were elected and duly installed.

Minnesota.

The first lodge organized in Minnesota was St. Paul's, No. 1, constituted by the Grand Lodge of Ohio, August 4, 1849; the second lodge was St. John's, No. 1, warranted October 12, 1850, by the Grand Lodge of Wisconsin; and the third was Cataract Lodge, No. 168, founded by the Grand Lodge of Illinois, 1852.

These three lodges, by delegates, met in convention at the city of St. Paul, February 23, 1853, and constituted the Grand Lodge of the State of Minnesota.

New Mexico.

The Grand Lodge of Missouri issued warrants to the following lodges in New Mexico, viz.: Aztec Lodge, No. 108; Chapman Lodge, No. 95; and Montezuma Lodge, No. 109.

These lodges met in convention, August 6, 1877, at Santa Fé, for the purpose of discussing the question of forming a Grand Lodge. Brother Simon B. Newcomb presided. The committee on credentials found the representatives of the three above-mentioned lodges to be present.

The next day a constitution and by-laws were adopted, the Grand Officers were elected and installed, Brother Wm. W. Griffin being M. W. Grand Master, and David J. Miller R. W. Grand Secretary.

Washington.

The first steps of initiatory efforts toward Masonic organization and the formation of a Masonic lodge on the Pacific Coast, so far as any record has been shown or it is believed to exist, were taken jointly by three brother Master Masons, namely: Bros. Joseph Hull, William P. Dougherty, and Peter G. Stewart.

A petition was prepared and addressed to the Grand Lodge of Missouri praying that a Charter be granted to the petitioners, under the name of Multnomah Lodge.

The record of the Grand Lodge of Missouri reads as follows: "A charter was granted to Multnomah Lodge, No. 84, on the 19th day of October, 1846, locating the Lodge at Oregon City, Oregon Territory."

In his annual address to the Grand Lodge of Oregon, held June 13, 1853, M. W. Bro. Berryman Jennings, Grand Master, says:

"On the 25th day of November (1852) last, I granted a dispensation to sundry brethren residing at Olympia, Puget Sound, to open a Lodge under the name of Olympia Lodge, returnable at this Grand Communication, which return has been promptly made, through their Worshipful Master, Brother T. F. McElroy." Washington Territory was not organized until after this dispensation was issued and the lodge began work.

On Saturday evening, December 11, 1852, Olympia Lodge, U. D., held its first communication by virtue of Grand Lodge authority, and was thereunder duly organized, the following officers, members and Brethren being present, viz.: Bros. Thornton F. McElroy, W. M., James W. Wiley, S. W., and Michael T. Simmons, S. W.; also Bros. Smith Hays and Nicholas Delin of the original petitioners (Bros. Ira Ward and A. K. Skidmore of said petitioners being absent); Bros. Fred A. Clark and Calvin H. Hale, visitors, were also present.

The Charter was granted to Olympia Lodge of Oregon, June 13th, and bears date June 15, 1853, and was designated as Olympia Lodge of Oregon, No. 5, of that grand jurisdiction. The first meeting under the Charter was held on Saturday evening, July 24, 1853, at which time we may infer the lodge was regularly constituted, although the record is silent in this particular. An election, however, was held that evening for new officers under the Charter,

with the following result: Bros. T. F. McElroy, W. M.; B. F. Yantis, S. W.; M. T. Simmons, J. W.; B. Close, Sec.; Ira Ward, Treas., and Smith Hays, Tyler.

This was the first lodge established and constituted north of the Columbia River and west of the Rocky Mountains.

The records of Multnomah Lodge from its institution until 1868 were destroyed by fire, and the oldest record is the ledger dating from the year 1854.

Steilacoom Lodge, the second lodge established within the present jurisdictional limits of Washington, was organized U. D. in the year 1854. Since it first began work it has passed through several trying ordeals, some of which were of so serious a nature that its existence might well have been regarded as hopeless but for the pluck and Masonic energy of its membership.

The records of the Grand Lodge of Oregon, session of June, 1854, show that R. W. Dep. Grand Master J. C. Ainsworth, acting Grand Master, "granted a Dispensation to Brother W. H. Wallace and others to open a Lodge at Steilacoom, Washington Territory, under the name of Steilacoom Lodge."

The dispensation must have been granted during the latter part of January or some time in February, 1855.

During the summer or fall of 1857, probably about September 1st, M. W. Bro. Ben. J. Stark, G. M. of Masons of Oregon, issued a dispensation for a new lodge at Grand Mound, Thurston County, Washington, named Grand Mound Lodge.

This lodge was chartered by the Grand Lodge of Oregon, July 12, or 15, 1858, under the name of Grand Mound Lodge, No. 21. On August 21, 1858, at its hall on Grand Mound Prairie, the lodge was duly constituted and its officers installed.

On September 19, 1868, after eleven years of hard struggling, in earnest and zealous efforts to build up and sustain the lodge, the Brethren reluctantly felt it a duty to themselves and the Fraternity to surrender the Charter to the Grand Lodge.

In the annual address of M. W. Grand Master Benjamin J. Stark to the Grand Lodge of Oregon, July 13, 1858, among the seven dispensations he reported having granted during the year for the formation of new lodges is one "for Washington Territory."

On July 13, 1858, a Charter was granted by the Grand Lodge of

Oregon to Washington Lodge, No. 22. The Charter bears date the same as that of Grand Mound Lodge, namely, July 15, 1858.

In the foregoing references to the organization, severally, of Olympia, Steilacoom, Grand Mound, and Washington lodges, we find that they were the first organized Masonic bodies north of Columbia River.

On Monday, December 6, 1858, a little band of Freemasons, about one dozen in number, met at the Masonic hall, in the city of Olympia, Washington Territory. Their declaration of purpose was to consider "the propriety of establishing a Grand Lodge of Free and Accepted Masons for said Territory."

This little band of Brethren in convention assembled resolved to proceed to the formation and organization of a Grand Lodge of Free and Accepted Masons for the Territory of Washington.

The convention was composed of delegates representing the four existing lodges in the Territory, viz.: Olympia Lodge, No. 5; Steilacoom Lodge, No. 8; Grand Mound Lodge, No. 21, and Washington Lodge, No. 22, together with all Past Masters by service, who were members of these lodges, and present during the sessions of the convention.

On the evening of December 8, 1858, a constitution, having been prepared by a committee appointed for that purpose, was submitted, duly considered and adopted, after which the Grand Officers were elected.

The convention, having completed its labors, was adjourned, *sine die*, on the morning of December 9th, whereupon the Most Worshipful Grand Lodge of Free and Accepted Masons of the Territory of Washington was opened in ample form, and was thus launched upon the sea of its sovereign existence.

The business transacted at this first session, though comparatively brief, was most important to the future interest and zeal of the Grand Lodge. It related chiefly to formulating plans and adopting methods for placing the "machinery of Grand Lodge in Order," in furtherance of the important work before it.

We are indebted to the history of the Grand Lodge of Washington, by Bro. Grand Secretary Thomas M. Read, for the above sketch.

Kansas.

By reference to the proceedings of the Grand Lodge of Missouri the record will be found of the organization of the first three lodges in Kansas.

Dispensations for the formation of new lodges were issued:

August 4, 1854, to John W. Chivington and others, to open a lodge at the house of Mathew R. Walker, in Wyandotte Territory, to be called Kansas Lodge, by order of Most Worshipful Grand Master L. S. Cornwell.

October 6, 1854, to John W. Smith and others, to open a lodge at the town of Smithfield, Kansas Territory, to be called Smithfield Lodge, by order of R. W. N. B. Giddings, D. D. G. Master First Masonic District of Missouri.

December 30, 1854, to Richard R. Rees and others, to open a lodge at the town of Leavenworth, Kansas Territory, by order of R. W. D. P. Wallingford, D. G. Master of Missouri.¹

At a meeting of delegates from several Masonic lodges in the Territory of Kansas, at the city of Leavenworth, on November 14, A.D. 1855, A.L. 5855. Present: Bro. William P. Richardson of Smithton Lodge, No. 140, as proxy for W. M. Richard R. Rees, W. M. of Leavenworth Lodge, No. 150, and Bro. A. Payney, S. W. of Leavenworth Lodge, No. 150.

On motion of Bro. Rees, Bro. William P. Richardson was called to the Chair, and on motion, Bro. R. R. Rees acted as Secretary.

Bro. Rees moved, that as Wyandotte Lodge was not represented in this convention, that the convention adjourn until December 27th next, with a request that all the chartered lodges be represented; which motion was carried, and the convention adjourned.

The convention met in the office of A. and R. R. Rees, in the city of Leavenworth, pursuant to adjournment, December 27, 1855.

Present: Bro. John W. Smith, W. M. of Smithton Lodge, No. 140; Bro. R. R. Rees, W. M. of Leavenworth Lodge, No. 150; and Bros. C. T. Harrison, L. J. Eastin, J. J. Clarkson, G. W. Perkins, I. B. Donaldson, and Brother Kohn, Master Masons.

Bro. J. W. Smith was called to the Chair, Bro. Rees acting as Secretary.

¹ Proceedings of Grand Lodge of Missouri, 1855, pp. 64, 65.

Bro. Rees offered the following resolution, which was unani-
mously adopted:

Resolved, That we do proceed to organize a Grand Lodge for the Territory of Kansas, and that a copy of the proceedings of this convention be forwarded to Wyandotte Lodge with a request that they co-operate with us, and approve the proceedings of this convention; and that so soon as Wyandotte shall inform the Grand Master elect of their approval, and co-operation in the proceedings of this convention, that then, the Grand Master elect shall be installed as Grand Master and immediately issue a proclamation declaring this Grand Lodge fully organized.

On motion of Bro. Rees, the Chair appointed a committee of three to report a constitution and by-laws for the government of this Grand Lodge, which committee consisted of Bros. Rees, Eastin, and Harrison.

The committee appointed to report a constitution and code of by-laws made their report, which was adopted.

On motion of Bro. Rees, the convention adjourned, to meet at Masonic hall at early candle-light.

On motion of Bro. Rees, the constitution and by-laws adopted in convention are unanimously adopted as the constitution and by-laws of this Grand Lodge.

The Grand Lodge thereupon proceeded to the election of Grand Officers, which resulted in the election of Bro. Richard R. Rees as M. W. G M.

On motion of Bro. Vanderslice, a committee consisting of Bros. Vanderslice, Walker, and Smith was appointed to report a constitution and code of by-laws for the government of this Grand Lodge.

The Grand Lodge was called from labor to refreshments until 7.30 P.M.

A committee appointed by the Grand Lodge of Kansas, at their convention held at Leavenworth City, on Monday, March 17, 1856, reported a constitution and by-laws for the government of said Grand Lodge which was adopted.

The Grand Lodge then proceeded to the election of Grand Officers for the ensuing year, which resulted in the election of Bro. Richard R. Rees, Grand Master, who was then installed and who then installed all the other officers.

Nebraska.

The first lodge in the State of Nebraska was Nebraska Lodge, No. 184, at Belleville, Sarpy County, chartered by the Grand Lodge of Illinois, October 3, 1855.

The second lodge was Giddings Lodge, No. 156, at Nebraska City, Otoe County, chartered by the Grand Lodge of Missouri, May 28, 1856. The third lodge was Capitol Lodge, No. 101, at Omaha City, Douglas County, chartered by the Grand Lodge of Iowa, June 3, 1857.

These three lodges, by their delegates, held a convention at Omaha City, September 23, 1857, and resolved to organize a Grand Lodge for the Territory of Nebraska.

The Grand Officers were elected, Bro. Robert C. Jordan being chosen Grand Master, who held that station until 1860. We regret to record here that this "father of Nebraska Masonry" died January 9, 1899, aged seventy-four years.

Before closing this history of Nebraska, intelligence was received of the sad ending of the life of another distinguished brother, William R. Bowen, the Grand Secretary of the Grand Lodge, Grand Chapter, and Grand Recorder of the Grand Commandery, who, like Brother Jordan, had been called the father of Nebraska Masonry. These remarks are due, because of the writer's personal knowledge of, and intimate association with, both of these Brethren, not only in the above grand bodies, but also in the Supreme Council of the A. . A. . A. . S. . Rite, of which Bro. Jordan was the Active Member for Nebraska up to the date of his death, and Bro. Bowen was an *Emeritus*, having retired from the Active list several years since.

Indian Territory.

The first lodge organized in the Indian Territory was Flint Lodge, in the "Cherokee Nation," which received a Charter from the Grand Lodge of Arkansas, dated November 9, 1853. The second lodge was called Muskogee, and subsequently named Eufala, in the "Creek Nation," and received a dispensation, supposedly, from the Grand Master of Arkansas in 1855; and a Charter was granted, November 7, 1855. During the war of 1861-65 it ceased its labors, and its Charter was arrested Novem-

ber 6, 1867. Early in 1874 the Grand Master of Arkansas revived the lodge; it remained on the registry of that Grand Lodge nearly two years, until that Grand Lodge recognized the Grand Lodge of Indian Territory. Doaksville Lodge received a dispensation from the Grand Lodge of Arkansas, December 23, 1870, and was chartered November 8, 1871. Caddo Lodge received a dispensation, August 26, 1873, from the Grand Lodge of Arkansas, and was chartered October 14, 1873. These two were in the "Choctaw Nation."

Muskogee, Doaksville, and Caddo lodges met in convention, by their delegates, October 5, 1874, and decided to form a Grand Lodge for the Indian Territory. A constitution was adopted, Grand Officers were chosen and installed, and the Grand Lodge was constituted, October 6, 1874.

Three other lodges were in existence when the Grand Lodge was constituted, viz.: Oklahoma, in the "Choctaw Nation," which had been chartered by the Grand Lodge of Arkansas, November 18, 1868. This lodge, as soon as the Grand Lodge was started, sent in her Charter and had it endorsed; it then came under that constitution. Flint Lodge, already described, and Alpha Lodge, also in the "Cherokee Nation," which had received a dispensation from Kansas, May 18, 1872, and a Charter, October 17, 1872, declined joining the New Grand Lodge, and adhered to the Grand Lodges from which they had received their warrants. The Grand Lodges of Arkansas and Kansas for some time refused to recognize the Grand Lodge of Indian Territory. In 1876 the latter Grand Lodge arrested the charters of the two delinquent lodges. The Grand Lodge of Kansas sustained her daughter lodge and still refused to acknowledge the New Grand Lodge. The issue continued until the Grand Lodge of Indian Territory rescinded her action of 1876. Soon thereafter Flint Lodge surrendered, and Alpha Lodge followed her in October, 1878, after the desired action of the Grand Lodge of Kansas had been obtained.

Other lodges subsequently had been chartered by the New Grand Lodge—two in the Cherokee, two in the Choctaw, and two in the Chickasaw nations.

Colorado.

The first lodges in Colorado were Golden City Lodge, at Golden City, chartered by the Grand Lodge of Kansas, October 17, 1860; Summit Lodge, at Parkville, chartered by the Grand Lodge of Nebraska, June 5, 1861; and Rocky Mountain Lodge, at Gold Hill, June 5, 1861, by the same Grand Lodge.

August 2, 1861, the above-mentioned lodges met, by their delegates, in convention at Golden City. They elected and installed their Grand Officers and constituted the Grand Lodge of Colorado, and declared it to be regularly organized. A constitution was adopted. The Grand Lodge of Kansas, October 15, 1867, chartered Nevada Lodge, in Colorado, it seems without the knowledge of the formation of the Grand Lodge of Colorado. (How this could have occurred we can scarcely conceive, as six years had elapsed.) This lodge, not having done any Masonic work under the Charter, was permitted to surrender the Charter and take a new one from the Grand Lodge of Colorado.

Nevada.

Carson Lodge, at Carson City, was chartered May 15, 1862; Washoe Lodge, at Washoe City, and Virginia City Lodge, at Virginia City, both chartered May 14, 1863; Silver City Lodge, changed afterward to Amity, at Silver City, chartered May 15, 1863; Silver Star Lodge, at Gold Hill, Esmeralda Lodge, at Aurora, and Escorial Lodge, at Virginia, all three chartered October 13, 1864; and Lander Lodge, at Austin, chartered October 14, 1864. All of these eight lodges received their charters from the Grand Lodge of California.

A convention was called to meet January 16, 1865, which was accordingly done and six lodges were represented the first day; the next day another lodge was represented. Lander Lodge, of the above list, was the only lodge which did not appear in the convention.

A constitution was adopted. The Grand Officers were elected and installed January 17, 1865. The old charters were endorsed for present use. Lander Lodge, although unrepresented in the convention and organization, presumed herself to be a part of the Grand

Lodge, and under its jurisdiction made the returns to the Grand Lodge with the other lodges.

The first annual grand communication was held October 10, 1865.

Dakota.

The first lodge organized in Dakota was St. John's Lodge, at Yankton, which received from the Grand Lodge of Iowa, December 5, 1862, a dispensation, and afterward a Charter, dated June 3, 1863; Incense Lodge, at Vermillion, received a dispensation, January 14, 1869, and a Charter, June 2, 1869; Elk Point Lodge, at Elk Point, received a dispensation, March 23, 1870, and a Charter, June 8, 1871; Minnehaha Lodge, at Sioux Falls, received a dispensation, July 13, 1873, and a Charter, June 3, 1874; Silver Star Lodge, at Canton, received a dispensation, February 6, 1875, and a Charter, June 2, 1875; and Mount Zion Lodge, at Springfield, received a dispensation, February 16, 1875, and a Charter, June 2, 1875. All of the above warrants were granted by authority of the Grand Lodge of Iowa. A dispensation was issued by the Grand Master of Minnesota, November 22, 1872, for Shiloh Lodge, at Fargo, and a Charter was issued January 14, 1874. He also issued a dispensation to Bismarck Lodge in 1874, and again in 1875, and on January 12, 1876, the lodge received a Charter.

June 21, 1875, a convention was held of the representatives of St. John's, Incense, Elk Point, Minnehaha, and Silver Star lodges. Those of Mt. Zion Lodge, U. D., were present but did not participate in the proceedings, the lodge not having a Charter. A constitution was adopted and they elected their Grand Officers.

July 21, 1875, convention met again and the Grand Officers were installed in public, by Illustrious Brother Theodore S. Parvin, P. G. Master and Grand Secretary of the Grand Lodge of Iowa.

This Grand Lodge continued until the session of June 11-13, 1889, when by Act of Congress, approved February 22, 1889, the division of the Territory of Dakota into North and South Dakota was likely to be accomplished within a few months. The report of a committee on division of the Grand Lodge was adopted, and certain lodges located in North Dakota were permitted to organize a Grand Lodge of North Dakota, which will be stated under that designation.

The name of "Dakota" was changed to "South Dakota" at the sixteenth communication of the Grand Lodge, held June 10, 1890, in Madison.

South Dakota is the designation of the original Grand Lodge of Dakota.

North Dakota.

So soon as it was determined by the Grand Lodge of Dakota, at its session, held June 11-13, 1889, that there should be a division of the Grand Lodge of Dakota to correspond with the political division of the Territory into North and South Dakota, a convention was held, June 12, 1889, at the city of Mitchell, where the Grand Lodge was in session, and the following lodges of North Dakota were represented, viz.:

Shiloh, No. 8; Pembina, No. 10; Casselton, No. 12; Acacia, No. 15; Bismarck, No. 16; Jamestown, No. 19; Valley City, No. 21; Mandan, No. 23; Cereal, No. 29; Hillsboro, No. 32; Crescent, No. 36; Cheyenne Valley, No. 41; Ellendale, No. 49; Sanborn, No. 51; Wahpeton, No. 58; North Star, No. 59; Minto, No. 60; Mackey, No. 63; Goase River, No. 64; Hiram, No. 74; Minnewaukan, No. 75; Tongue River, No. 78; Bathgate, No. 80; Euclid, No. 84; Anchor, No. 88; Golden Valley, No. 90; Occidental, No. 99.

The convention resolved that it was expedient to organize a Grand Lodge for North Dakota. A constitution and by-laws were adopted.

June 13th, the first session of the Grand Lodge was held in the city of Mitchell. The elected and appointed officers were present and representatives of the above twenty lodges.

The Grand Lodge of North Dakota has continued to keep pace with the other Western Grand Lodges.

Idaho.

In 1863 a meeting of Masons was held in Idaho City, Boise County, and it was resolved to apply to the Grand Master of Oregon for a dispensation to organize a lodge, which was granted July 7, 1863, and on June 21, 1864, a Charter was granted to Idaho Lodge, No. 35. The next lodge was in Boise City, No. 37, April 1, 1865,

under dispensation from the Grand Lodge of Oregon. At a communication held in June, 1865, it was resolved to apply for a Charter, which was granted to Boise City Lodge, No. 37, June 20, 1865. Placer Lodge, No. 38, was the third lodge organized under Warrant from the Grand Lodge of Oregon, June 20, 1865. Pioneer Lodge, No. 12, received her Warrant from the Grand Lodge of the Territory of Washington, June 7, 1867. Owyhee Lodge received a dispensation from the Grand Lodge of Oregon, July 21, 1866.

The above four chartered lodges held a Convention in Idaho City, December 16, 1867. Owyhee Lodge, U. D., from courtesy, was admitted and permitted to vote. The convention decided to organize a Grand Lodge.

December 17, 1867, a full corps of Grand Officers was elected and installed. Constitution of Grand Lodge of Oregon was adopted temporarily.

December 17th, Grand Lodge was opened in ample form and so has continued to present time.¹

Montana.

At the burial of a Mason in the Territory of Montana was the first gathering of Masons, which led to an effort to organize a lodge by an application to the Grand Master of Nebraska, who issued a dispensation, April 27, 1863, to form a lodge at Bannock, which was in Dakota, but supposed to be in Idaho. This dispensation was renewed on June 24, 1863, and authorized again on June 24, 1864, and finally, when it arrived at the place, the members had been dispersed by removal of residence and no lodge was ever opened.

The lodge Virginia City, No. 43, received a Charter dated December 26, 1864, from the Grand Lodge of Kansas. A dispensation was received from the Grand Lodge of Colorado dated April 4, 1865, for Montana Lodge, No. 9, at Virginia City. Helena Lodge, No. 10, received a dispensation from the same Grand Lodge and was organized August 17, 1865. Both of these lodges received charters granted November 7, 1865, from the Grand Lodge of Colorado.

A convention of the representatives of the above lodges was held January 24, 1866. After proper investigation as to the mem-

¹ From proceedings of Grand Lodge of Idaho, September, 1883.

bership of the convention, it was decided to form a Grand Lodge and the convention closed.

The officers of the three lodges then opened a Grand Lodge in due form. A constitution was adopted and the Grand Officers were elected. January 26, 1866, the Grand Officers were regularly installed and at the same time charters were issued to the lodges and returns were made of one hundred and five members.

West Virginia.

In consequence of the Civil War, from 1861 to 1865 the affairs of Masonry, in common with all civil matters in Virginia and West Virginia, which latter had been separated from the parent State, were in utter confusion. Many of the lodges in West Virginia had ceased to meet, some had lost their charters and other properties. After due consideration of the condition of things, in response to a circular from Fairmont Lodge, No. 9, which had been sent throughout the State, a convention was held, December 28, 1863, at Grafton, which was held during a period of great excitement, in consequence of some of the delegates having been prevented from attending, by the movements of the war having again disturbed the condition of the State. After two adjournments the convention finally met, June 24, 1864, in Fairmont. Eight of the working lodges out of thirteen in the State were represented. Grand Officers were elected and a day selected for their installation, but as the convention adjourned *sine die* the Grand Officers decided that no further action could be had under a misapprehension of an informality in their proceedings.

A new convention was called to meet April 12, 1865. The lodges represented were those at the prior convention, and were as follows, viz.: Wellsburg, No. 108; Wheeling, No. 128; Ohio, No. 101; Marshall Union, No. 37; Cameron, No. 180; Morgantown, No. 93; Fairmont, No. 9; Fetterman, No. 170. Grand Officers were again elected, and May 10th¹ selected for their installation. The convention met on that day. One other lodge, Mt. Olivet, No. 113, in addition to the eight, was represented. The convention closed and a Grand Lodge was opened. The Grand Officers were installed. The old charters were ordered to be en-

¹ The record, page 13, says 11th, which is an error.

dorsed under the seal of the Grand Lodge, and to be retained until new ones could be prepared and issued.

Utah.

"Through much tribulation ye shall enter into" — Masonry. A dispensation was issued, February 4, 1866, by the Grand Master of Nevada for the organization of Mt. Moriah Lodge at Salt Lake City. The lodge duly organized, but very soon the treatment by one of the lodges of Masons of the Mormon faith became an issue, which was submitted to the Grand Master of Nevada, who accordingly issued an edict forbidding the admission, as visitors and the affiliation, of Mormons claiming to be Masons; and also the reception of their petitions for the degrees. The lodge demurred to this decree, but submitted to the order of the Grand Master. A petition, however, was sent to the Grand Master to modify the decree, so that Mormons not polygamists would be exempted from the decree. The dispensation of the lodge was returned, and a Charter asked for. The Grand Lodge approved of the edict of the Grand Master, and, declining to grant a Charter, renewed the dispensation. The lodge, although "worse than sorrow-stricken," still continued to work for another year. The lodge then petitioned for a Charter, with the condition that if they could not have a Charter unrestricted by the edict, they declined having a Charter. The surrender of the dispensation was promptly accepted by the Grand Lodge. The members then presented their petition to the Grand Lodge of Montana, October 8, 1887, with a statement of the circumstances of their relation with the Grand Lodge of Nevada. The Grand Lodge of Montana declared, that the assumption of the petitions that the Grand Lodge of Nevada did not possess the power to decide who are not proper persons to be admitted into its subordinate lodges, was "subversive of the principles of Masonry." The petition for a Charter was rejected, and they were referred to the Grand Lodge of Nevada for a redress of their alleged grievances. The lodge applied then to the Grand Master of the Grand Lodge of Kansas, who issued a dispensation, November 25, 1867, and on October 21, 1868, a Charter was granted by the Grand Lodge.

A convention was held at Salt Lake City, January 16, 1872, by the representatives of the three lodges located in that city, viz.:

Wasatch Lodge, chartered by the Grand Lodge of Montana, October 7, 1867; Mount Moriah Lodge, chartered by the Grand Lodge of Kansas, October 21, 1868; Argenta Lodge, chartered by the Grand Lodge of Colorado, September 26, 1871.

It was decided, by unanimous vote, to organize a Grand Lodge for Utah. The Grand Officers were chosen and installed, and the Grand Lodge was duly constituted.

In consequence of the Mormon Church being in their midst, difficulties at once arose in one of the lodges. A member joined the Mormons, and upon trial by regular process he was expelled, and the Grand Lodge affirmed the expulsion. This matter drew the attention of other Grand Lodges, who took formal action upon it; and the course of the Grand Lodge of Utah was nearly, if not unanimously, sustained.

Arizona.

Aztlan Lodge, at Prescott, was chartered by the Grand Lodge of California, October 11, 1866; which also chartered Arizona Lodge, No. 257, at Phoenix, October 16, 1879, and Tucson Lodge, No. 263, at Tucson, October 15, 1881. A dispensation was issued to Solomon Lodge, at Tombstone, June 4, 1881, which was continued at the next communication of the Grand Lodge of California, October 1, 1882. White Mountain Lodge, No. 5, at Globe, received a Charter from the Grand Lodge of New Mexico dated January 18, 1881.

The representatives of Arizona Lodge, No. 257, Tucson Lodge, No. 263, and White Mountain Lodge, No. 5, held a convention, March 23, 1882, at Tucson, and the representatives of Solomon Lodge, U. D., were invited "to take part in the deliberations of the Convention." The convention adopted a constitution. A lodge of Master Masons was then opened, and the Grand Officers were elected. On March 25th the Grand Officers were installed and the convention closed, and the Grand Lodge was duly opened. The charters of the lodges were properly endorsed and returned to them as the authority under which they continued their existence. Solomon Lodge, U. D., received her Charter under the name of King Solomon, No. 5. Aztlan Lodge had her Charter endorsed, and she made her returns. These five lodges had a membership of two hundred and seventy-four.

Wyoming.

Cheyenne Lodge, No. 16, at Cheyenne, was chartered by the Grand Lodge of Colorado, October 7, 1868.

Laramie Lodge, No. 18, at Laramie City, received a dispensation from the same Grand Lodge, January 31, 1870, and a Charter, September 28, 1870.

Evanston Lodge, No. 24, at Evanston, received a dispensation from the same Grand Lodge, September 8, 1873, and a Charter, September 30, 1874.

Wyoming Lodge, No. 28, at South Pass City, had a dispensation issued to her by the Grand Lodge of Nebraska, November 20, 1869, and a Charter, June 23, 1870.

The representatives of these four lodges met in convention December 15, 1874, at Laramie City, and proceeded to organize a Grand Lodge for Wyoming by adopting a constitution, electing and installing their Grand Officers on the 16th. The four lodges then had a membership of two hundred and fifty.

The first annual communication was held October 12, 1875, and the Grand Lodge has continued to hold its annual communications, and from the tabular statement at the conclusion of this chapter will be found the number of members.

Oklahoma.

At the eighteenth annual communication of the Grand Lodge of Indian Territory, under which Grand Lodge all the then existing lodges in Oklahoma Territory held their lodge warrants, a paper was presented to the Grand Lodge from the "members and representatives of the various Lodges of Masons in the Territory of Oklahoma organized and being within the jurisdiction of the Grand Lodge of Indian Territory, respectfully ask your consent and the consent of said Grand Lodge to the formation and organization by the said Oklahoma Lodges of a separate and independent Grand Lodge within and for said Oklahoma Territory to be known as the 'Grand Lodge of Oklahoma' and to have and possess hereafter exclusive Masonic jurisdiction and authority as the Grand Lodge within and for the said Territory of Oklahoma.

"Dated at Tahlequah, I. T., August 16, 1892."

This was signed by the representatives of the following lodges: Guthrie Lodge, No. 35; North Canadian Lodge, No. 36; Edmond Lodge, No. 37.

This was referred to a committee, and upon a favorable report, the petition was granted and suitable arrangements were made for holding a convention of all the lodges in the new Territory, at which the Grand Master of the Grand Lodge was to preside and install the newly elected Grand Officers and formally proclaim by authority of that Grand Lodge "that the Grand Lodge of Oklahoma is legally organized," etc.

On motion of Rev. Bro. R. W. Hill the Grand Lodge unanimously voted a set of Grand Lodge jewels to the new Grand Lodge. We have not been able to get a copy of the proceedings of the convention which was held November 10, 1892, but have before us the proceedings of the first annual communication held at El Reno, Oklahoma Territory, February 14, 1893, when there were represented the following lodges, viz.:

Anadarko, No. 1, at Oklahoma City; Guthrie, No. 2, at Guthrie; Oklahoma, No. 3, at Oklahoma City; Edmond No. 4, at Edmond; Norman, No. 5, at Norman; Frontier, No. 6, at Stillwater; El Reno, No. 7, at El Reno; Kingfisher, No. 8, at Kingfisher; Coronado, No. 9, at Hennessy; Chandler, No. 10, at Chandler; Crescent, No. 11, at Crescent City; Mulhall, U. D., at Mulhall.

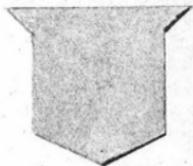

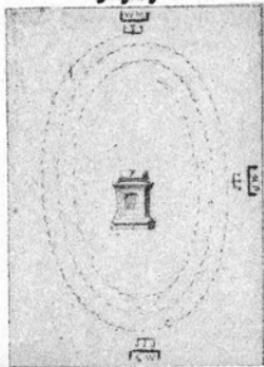

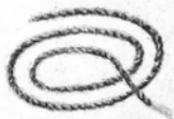

Alaska.

We have received the information that the Grand Master of Washington Territory issued a dispensation for a lodge to be organized in Sitka, Alaska, April 14, 1868. This dispensation was continued September 17, 1868, and finally revoked October 18, 1872. We have no further information as to any lodges since that time. There is no doubt that very soon lodges will be formed in several of the new towns which have sprung up in the gold regions, so soon as the population shall have become more stable and permanently settled.

TABLE SHOWING THE NUMBER OF GRAND LODGES IN THE UNITED STATES; AND
NUMBER OF MEMBERS IN EACH, FOR THE YEAR 1908.

No.	Names of Grand Lodges.	Date of Formation.	Member-ship.

CHAPTER LVI

HISTORY OF THE INTRODUCTION OF FREEMASONRY INTO EACH STATE AND TERRITORY OF THE UNITED STATES

Royal Arch Masonry.

N Chapter XLIX., Dr. A. G. Mackey, having, in a very elaborate and satisfactory manner, given the history of the introduction of Royal Arch Masonry into America; and in Chapter L., the organization of the General Grand Chapter in the United States, it is quite unnecessary for the present writer to make any preface to the details of the organization of the particular Chapters and the Grand Chapters in the several Grand Jurisdictions. We shall, therefore, proceed at once to that work, and in an alphabetical arrangement, for a better reference to any special jurisdiction when required.

Alabama.

Prior to May, 1823, there were four chapters in Alabama having been chartered by the General Grand Chapter. A convention of the delegates of these chapters was held in Mobile in May and June, 1823, and it was decided to form a Grand Chapter for the State. The Junior Chapter, Monroe, having taken exceptions, referred the matter to the General Grand Chapter at its session, September 16, 1826, when the following was adopted:

"*Resolved*, That the formation of a Grand Chapter for the State of Alabama, in May, 1823," prior to the expiration of one year from the establishment of the junior chapter in such State, "was prohibited by the 11th section of the 2d Article of the General Grand Constitution, and that therefore this General Grand Chapter cannot ratify or approve of the proceedings of the convention held at Mobile on the third Monday of May, 1823, or recognize the body claiming to be considered the Grand Chapter of Alabama."

A recommendation was, however, made to the four chapters to proceed to form a Grand Chapter. On June 2, 1827, the Grand Chapter was reorganized, and met in December following, and annually until 1830, when it ceased to meet.

December, 1837, the delegates from the several chapters met and reorganized the Grand Chapter, and it has continued as a constituent of the General Grand Chapter.

Arizona.

Pursuant to an invitation from Companion Past High-Priest George J. Roskruge of Tucson Chapter, No. 3, a convention of Royal Arch Masons met in the hall of Tucson Lodge, No. 4, F. & A. M., in Tucson, County of Pima, for the purpose of taking steps to organize a Grand Chapter of Royal Arch Masons for the Territory of Arizona, November 13, 1889.

The convention was called to order by Companion Past High-Priest Martin W. Kales of Arizona Chapter, No. 1. Companion George J. Roskruge of Tucson Chapter 3 was chosen Chairman of the convention and Companion Frank Baxter was elected Secretary.

A committee on credentials was appointed and reported the following chapters as being represented, viz.:

Date of Charter

August 24, 1880.	Arizona Chapter, No. 1, located at Phoenix, Maricopa County.		
August 15, 1883	<ul style="list-style-type: none"> Prescott Chapter, No. 2, located at Prescott, Yavapai County. Tucson Chapter, No. 3, located at Tucson, Pima County. Cochise Chapter, No. 4, located at Tombstone, Cochise County. 		
		Nov. 22, 1889.	Flagstaff Chapter, No. 5, located at Flagstaff, Coconino County.

A committee was appointed on Constitution and By-Laws, and the convention took a recess; and on resuming labor the committee reported a Constitution and By-Laws, which were adopted. The convention then elected their officers; Martin W. Kales was chosen Grand High-Priest, and George J. Roskruge Grand Secretary.

The convention then adjourned subject to a call from the Grand Secretary.

November 12, 1890, the convention met and Companion George J. Roskruge presided. The same chapters, as before, were represented, and there were also present a number of Past High-Priests and Past Grand High-Priests, and Companion Titus of California, all of whom were invited to seats (without votes).

The President stated the object of the convention and read his Warrant as Deputy of the General Grand High-Priest of the General Grand Chapter of the United States, dated November 1, 1890. On motion, the constitution, as adopted at the former convention, was amended, to conform to the recommendation of the General Grand High-Priest.

The convention then adjourned, that the Grand Chapter of Royal Arch Masons of Arizona might be opened in ample form.

The first annual convocation was then opened (November 12, 1890) at 8 P.M., George J. Roskruge, Grand High-Priest, presiding, and Morris Goldwater, Grand Secretary. The convention then proceeded to elect the Grand Officers, and Martin W. Kales was elected Grand High-Priest, and George James Roskruge was elected Grand Secretary.

Companion Roskruge acting as Deputy General Grand High-Priest of the United States constituted the Grand Chapter of Arizona and installed the officers in accordance with the dispensation granted by the General Grand High-Priest, David F. Day.

On the following day (November 13, 1890) a convention of Anointed High-Priests was organized and officers were elected. Eight Past High-Priests were anointed.

Arkansas.

Charters were granted by the General Grand Chapter of the United States to three chapters in Arkansas, the first being under date of September 17, 1841.

The Grand Chapter was organized at a convention held April 28, 1851, and Companion Elbert H. English was the first Grand High-Priest. When the General Grand Chapter of the United States held its convocation at Nashville, Tenn., on November 24, 1874, Companion English was elected General Grand High-Priest. His death occurred September 1, 1884.

In the years 1853 and 1854, Companion Albert Pike was the Grand High-Priest.

California.

The first dispensation to organize a chapter of Royal Arch Masons in California was issued May 9, 1850, to San Francisco Chapter, No. 1, and a Charter was granted September 13th. Charters were issued to Sonora, No. 2, and Sacramento, No. 3, September 17, 1853.

These three chapters sent delegates to a convention held May 6, 1854, at Sacramento, where measures were taken to organize a Grand Chapter, and after three days' session adjourned to meet at San Francisco, July 18, 1854, where the organization and constitution were fully completed by the installation of the Grand Officers.

Colorado.

Central City Chapter, No. 1, in Central City, was the first chapter to which a dispensation, dated March 23, 1863, was issued in Colorado, which was granted by the General Grand King. The Deputy General Grand High-Priest granted a dispensation to Denver Chapter, No. 2, April, 1863. These two chapters had their charters granted at the following session of the General Grand Chapter, September, 1865. A dispensation was issued to organize Pueblo Chapter, No. , at Pueblo, May 24, 1871, and a Charter for the same was issued September 20, 1871. November 25, 1874, charters were issued to Georgetown, No. 4, and Golden, No. 5.

A convention was held at Denver City by the authority of Elbert H. English, M. E. General Grand High-Priest, May 11, 1875, and the Grand Chapter of Colorado was regularly constituted.

Connecticut.

Six members of Saint John's Lodge, No. 2, located in the town of Middletown, Conn., having received and been "duly initiated into the most sublime degree of an Excellent, Superexcellent, and Royal Arch Mason in regular constituted Royal Arch Chapters," and proving each other, they "duly opened and held the first regular Grand Royal Arch Chapter."¹ They elected their officers. Their first meeting was held September 12, 1783.

The "Mother-Chapter," or Washington Chapter of Royal Arch Masons of the City of New York, granted the following charters in Connecticut: Hiram, No. 1, in Newtown, April 29, 1791; Franklin, No. 2, New Haven, May 20, 1795; Franklin, No. 4, Norwich, March 15, 1796, and Solomon, No. 5, Derby, March 15, 1796. Van den Broeck, also No. 5, received its Charter from the Grand Chapter of New York, dated April 6, 1796; it is said, however, that the first record was dated December 24, 1795.

¹ At that day the word "Grand" was taken from the A. A. A. R., where *all* the bodies were termed Grand.—EDITOR.

A convention was held by the delegates of these six chapters, in Hartford, May 17, 1798, which organized the Grand Chapter of Connecticut. Half-yearly convocations were held until May, 1819, when the constitution was changed to annual convocations, and specials when required.

When the convention to form a Grand Chapter met in Hartford, Conn., January 24, A. L. 5798, "agreeable to the recommendation of a Convention of Committees assembled at Boston, in the State of Massachusetts, in October, 1797," there were present: from Connecticut, representatives of Solomon Chapter of Derby, instituted 5794; Franklin Chapter, No. 4, Norwich, and Franklin Chapter, No. 5, New Haven.¹ Ephraim Kirby, of Litchfield, was chosen the first General Grand High-Priest. In examining the records of the first chapters prior to the organization of the General Grand Chapter of 1797, we notice the designation of the officers as being somewhat different from the same officers at a more recent date. In Hiram Chapter of Connecticut the officers were "High-Priest, King, Scribe, Zerubbabel, a Royal Arch Captain, three Grand Masters, a Treasurer, a Secretary, an Architect, a Clothier, and a Tyler." It was required that the "High-Priest should preside, direct the business, and occasionally to give a lecture." Now it is "to read and expound the law." The Scribe's duty was to "cause the Secretary to enter, in a fair and regular manner, the proceedings of the chapter," and "to summons the members for attendance at every regular and special meeting, . . . and also to administer the obligation." It was the duty of Zerubbabel "to superintend the arrangements of the Chapter"; of the Royal Arch Captain, "to keep watch at the Sanctuary"; of the three Grand Masters, "to watch the Veils"; of the Clothier, "to provide and take care of the Clothing"; of the Architect, "to provide and take care of the furniture."²

In the English Royal Arch, Zerubbabel is the first Principal; and in the present American Royal Arch, Zerubbabel is the Second Principal, and designated King, which designation, in our judgment, is a misnomer, as he never was a King, but was called "Tirshatha," which was an office of Governor under the King of Persia, and was, in reality, in the construction of the second Temple, subordinate to the High-Priest, who had entire management of that work,

¹ Compendium, Genl. Gr. Ch., p. 8.

² Capitular Degrees, "Hist. Masonry and Con. Orders," p. 606.

Zerubbabel soon retired and returned to Babylon, and the Temple was finally completed by a High-Priest.

Dakota.

In 1883 eight chapters had, at different times, been chartered by the General Grand Chapter of the United States, viz.:

Yankton, No. 1, at Yankton; dispensation, April 15, 1876; chartered, August 24, 1880.

Sioux Falls, No. 2, at Sioux Falls; chartered, August 27, 1880.

Dakota, No. 3, at Deadwood; chartered, August 27, 1880.

Siroc, No. 4, at Canton; chartered, August 15, 1883.

Pembina, No. 5, at Pembina.

Missouri, No. 6, at Bismarck.

Casselton, No. 7, at Casselton.

Corinthian, No. 8, at Grand Forks.

A convention was held at Aberdeen, June 10, 1884, at which the following chapters were represented: Nos. 1, 2, 3, 4, 6, and 7 of the above list. When it was agreed to petition the General Grand High-Priest to grant a Warrant to organize a Grand Chapter for Dakota, five chapters voted for it and No. 7 against, and finally agreed, as also did Keystone chapter, No. 11, under dispensation.

A convention met February 25, 1885, pursuant to a call made January 8, 1885, at Sioux Falls. Companion William Blatt was chosen Chairman, and the following chapters were reported as being duly represented, viz.: Nos. 1, 2, 3, 4, and 7 of the above list, and Cheyenne, No. 9, U. D., at Valley City; Huron, No. 10, U. D., at Huron; Keystone, No. 11, U. D., at Fargo; Watertown, No. 12, U. D., at Watertown; Jamestown, No. 13, U. D., at Jamestown; Aberdeen, No. 14, U. D., at Aberdeen.

The first annual convocation was held June 8, 1885. Charters were granted to Corinthian, No. 8; Huron, No. 10; Watertown, No. 12; Jamestown, No. 13; Aberdeen, No. 14; Millbank, No. 15; and dispensations were issued to Denver, Brookings; Flandreau; Redfield. Chapters which were not represented were: Pembina, No. 5, at Pembina; Missouri, No. 6, at Bismarck, and Millbank, U. D., at Millbank.

The Grand Chapter of Dakota continued to prosper until the division of the State, by Act of Congress, February 22, 1889, into North and South Dakota.

When, on January 6, 1890, a convention was held in Yankton, S. D., and the representatives of the chapters located in South Dakota held a convention, and by the consent of the Grand Chapter of Dakota they organized the Grand Chapter of South Dakota, January 6, 1890, under the constitution of the General Grand Chapter.

Delaware.

The early history of the introduction of Royal Arch Masonry into the State of Delaware is very uncertain. We have no records to refer to. It is said that a Grand Chapter was formed on June 19, 1818. By what authority we can not ascertain; the "compendium" is silent upon Delaware. In the Proceedings of the General Grand Chapter of the Twenty-first Triennial Convocation, held in Baltimore, September 19, 1871, we find the General Grand High-Priest's reference to the State of Delaware,¹ as follows:

"Among the first to demand my attention was to examine into the condition of the Grand Chapter of Delaware, and if found to be a legal Grand Chapter, to have the same enrolled under the jurisdiction of the General Grand Chapter, as requested by the companions in Delaware. Having been solicited to visit Wilmington, for the purpose of instituting St. John's Chapter, which had been chartered by this Body at its last convocation (1868), I did so on the 19th of October, 1868, and having instituted said chapter, embraced that opportunity to fully investigate the condition of Royal Arch Masonry in the State, and for that purpose I held interviews with some of the most prominent Royal Arch Masons in the jurisdiction. From those companions, and from the records, I ascertained that there had existed in Delaware no regular Grand Chapter since the year 1856, at which time the original Grand Chapter ceased to meet and elect Grand Officers. I ascertained that there had been a 'Convocation of Royal Arch Masons' at Dover in 1859, at which meeting but one chapter, of the three then existing in that State, was legally represented. At that irregular 'Convocation' an election was had, Companion GEO. W. CHAYTOR being elected Grand High-Priest.

"No other convocation of the (so-called) Grand Chapter was held until January, 1868, a period of nine years. During this time, Companion Chaytor claimed to be the Grand High-Priest, but he

¹ Proceedings Genl. Gr. Ch. U. S., 1871, p. 10.

refused persistently to assemble the Craft in Grand Convocation. Some three or four years subsequent to the meeting of 1859, a difficulty having arisen between Companion Chaytor and the other members of Washington and Lafayette Chapter, No. 1, of which he was then High-Priest, he, in his capacity of Grand High-Priest, declared the said chapter suspended, thereby placing himself in the anomalous position of a self-suspended Royal Arch Mason; that is, provided he possessed any powers as Grand High-Priest.

"At the meeting in January, 1868, there was simply an assemblage of Royal Arch Masons, no one of whom claimed to act in a representative capacity. Companion Chaytor was present, but he refused to open a Grand Chapter, giving as a reason, that his chapter was under a suspension, and therefore there were but two chapters left in the State. Thereupon the assemblage resolved itself into a 'Royal Arch Convention,' and proceeded to elect Grand Officers and to adopt a constitution. And this was the body which made application to the last Convocation of the General Grand Chapter, to be recognized as the Grand Chapter of the State of Delaware.

"With these facts before me, there was but one conclusion to which I could legitimately arrive. Accordingly, on the 20th of October, 1868, I issued an edict, declaring that any legal existence heretofore attaching to a Grand Royal Arch Chapter of the State of Delaware had ceased; that said State Grand Chapter no longer existed; and that the several chapters heretofore holding under it had become dormant for non-use and for other reasons. And that, by the fact of the cessation of the Grand Chapter of the State of Delaware, all semblance of lawful governmental authority in that State had ceased, and the territory had become masonically vacant; and therefore the authority of the General Grand Chapter of the United States did, of right, obtain, and was in full force and effect, in said State of Delaware. Thereupon, I did order and direct, that the three Chapters which had formerly held under the Grand Chapter of Delaware, should be received and recognized as lawful Royal Arch Chapters, under the jurisdiction of the General Grand Chapter, and with authority to resume and continue work under the warrants then held by them, until the pleasure of the General Grand Chapter was made known, or a State Grand Chapter was formed.

"On the 9th day of January, 1869, upon application duly made, and under the power and authority vested in me by the Constitu-

tion of the General Grand Chapter, I issued an edict granting permission for the formation of a Grand Chapter of Royal Arch Masons of the State of Delaware."

January 20, 1869, the legal representatives of four chapters in Delaware met in convention at Dover and organized a Grand Chapter for the State and adopted their constitution. The General Grand High-Priest, Dr. James M. Austin, was present and installed the Grand Officers; and he officially received and welcomed the said Grand Body into the family of Grand Chapters; and on January 30, 1869, by special edict, he ordered and directed that Grand Chapter to be enrolled under the jurisdiction of the General Grand Chapter of the United States.

District of Columbia.

The very first intimation we have of the Royal Arch degree in the District of Columbia, we find in the old record-book of the "Excellent, Superexcellent, Royal Arch Encampment," under the Charter of Federal Lodge, No. 15, F. A. A. M., under the jurisdiction of the Grand Lodge of Maryland, which is referred to in Chapter LII., page 1369.

We make the following extracts from that first "Encampment ":

"At a meeting of the Royal Arch Encampment, held in the Lodge, No. 15 (Federal Lodge), on Monday, December 14th, A. L. 5795. Present:

Rev. George Ralph,	Dennis Dulaney,
John Bradford,	Thomas Wilson,
Robert Brown,	David Cummings,
C. Worthy Stephenson,	James Sweeney.

"Whereas, It appears to be the desire of several Brethren of this Lodge that a Royal Arch Encampment should be established in this city, therefore,

"Resolved, That a committee be appointed of the following Brethren, viz.: Brothers Ralph, Wilson, and Dulaney, to procure every necessary apparatus, and to adjust the necessary fees and expenses of admission to this Degree.¹

"Resolved, That the Brethren who wish to join this Encampment be requested to subscribe to a paper instrument, handed to them by

¹ It will be observed that there was but one degree.—EDITOR.

Bro. Sweeney previous to the foregoing Committee proceeding in the calculation in the expenses of our Robes, Veils,¹ Furniture, &c. The Committee to meet on Wednesday evening, at 4 o'clock P.M. and general meeting of the Royal Arch Masons to meet at 6 o'clock previously the same evening." The meeting then adjourned.

December 16, 1795. Present as at last meeting except Bro. Stephenson. The Committee appointed at the last meeting made their report: which was that twenty-three pounds and one shilling is indispensably necessary to provide the materials to prepare them and to arrange the Lodge room previous to the formation of a Royal Arch Encampment, &c., &c, which was agreed to.

At a meeting held June 17, 1797, it was announced by a letter from Comp. Sweeney that a Royal Arch Grand Lodge is about to be formed for the State of Maryland to meet at Baltimore June 24th. A circular letter was received from George L. Gray, No. 5 Market St., Baltimore, giving information of the establishment of a Grand Chapter in the city of Baltimore.

This chapter or encampment held its meetings until February, 1799, when it "resolved that the Royal Arch Encampment be broke up," and a committee was appointed to settle up its affairs and everyone to receive his dividend.

To show who were the officers and their titles we give the following list:

M. W. James Hoban, High-Priest.
 R. W. John Carter, Captain-General.
 R. W. Robert Brown, 1st Grand Master.
 R. W. Redmond Purcell, 2d Grand Master.
 R. W. Peter Lenox, 3d Grand Master.
 John Hanley, Treasurer.
 Patrick H early, Secretary.
 John Lenox, Tyler.

The second record-book begins as follows:

At a meeting of the Royal Arch Chapter at their Lodge room on Saturday evening, December 1, 1804, the following Companions present:

Phil P. Eckel, High-Priest, p. t.²
 Charles Jones, Captain-General.

¹ Robes and Veils are here specified for the first time, we believe.—EDITOR.

² Philip P. Eckel was a distinguished member of a chapter in Baltimore.—EDITOR.

Benj. King, 1st Grand Master.
 C. M. Laughlan, 2d Grand Master.
 Bern'd Doland, 3d Grand Master.
 John Davis, Grand Scribe.¹
 Visitors, John Scott, John Carter.

The degree of Excellent, Superexcellent, Royal Arch was conferred upon several Brethren, ten dollars being the fee.

On Sunday, December 14, 1806, a meeting is recorded, and they adopted the following:

"Resolved, That this Chapter concur with the resolution passed by Concordia R. A. Chapter as far as respects a Grand Royal Arch Chapter and that a Committee be appointed to meet in Grand Convention at the City of Washington on the third Wednesday in January next (1807) any Committees which may be appointed for the purpose aforesaid.

"February 14, 1807. Ordered that this Chapter be represented at the next Royal Arch Chapter to be held at Baltimore, in the State of Maryland, on the second Thursday of May next, by the Officers fixed on by the Constitution of the Grand Chapter.

"Resolved, That that part of the Constitution which states that the High-Priest and King are the proper representatives be altered so as to add, 'unless ordered by the Chapter.'

"Resolved, That the Treasurer do pay into the hands of the Treasurer of the Grand R. A. Chapter \$10, for the purpose of obtaining our Warrant² and also other Contingent expenses relative thereto."

February 7, 1807, was adopted the following:

"Resolved, That in future the following sums shall be paid by Candidates for the following degrees, namely, for Past Master \$2, for Mark Master \$3, and for the degree of Excellent, Superexcellent, Royal Arch \$10."

At this time it was

"Resolved, That this Chapter shall hereafter be entitled and known by the name of the Royal Arch Union Chapter."

This record-book terminates August 20, 1808, giving no intimation of any cause whatever why the chapter should not have con-

¹ Title of Grand Scribe unknown in the first Encampment.—EDITOR.

² This seems to indicate that there was no Warrant prior to this date.

tinued its sessions. At the meeting previous to the above date all the officers had been elected and installed.

A dispensation had been issued by the General Grand High-Priest to the several chapters in the District of Columbia to organize a Grand Chapter August 30, 1822, and the report of the committee was adopted recommending the adoption of the resolution above quoted.¹

This Grand Chapter continued in existence from February 10, 1824, to January 8th, 1833, being composed of the following chapters, viz.: Federal Chapter, No. 3; Union Chapter, No. 4; Potomac Chapter, No. 8.

Several conventions were held from time to time, however, between May 11, 1822, and February 10, 1824, at which latter date the delegates of the several chapters of Royal Arch Masons of the District of Columbia met in General Convention and the following chapters were properly represented: Federal Chapter, No. 3; Union Chapter, No. 4; Brooke Chapter, No. 6, of Alexandria, Va., and Potomac Chapter, No. 8, of Georgetown.

The convention was duly organized, and the Grand Officers were elected and a constitution which had been regularly formulated and adopted at a former convention was adopted. In the evening of the same day (Tuesday, February 10, 1824) the Grand Royal Arch Chapter for the District of Columbia was opened in ample form, and the convention was accordingly dissolved.

The Grand Officers were duly installed by Comp'n John B. Hammett, a Past Grand High-Priest.

At a meeting of the Grand Chapter held March 9, 1824, the following communication was received and read and laid on the table:

"GEORGETOWN, February 11, 1824,
POTOMAC ROYAL ARCH CHAPTER, NO. 8.

"Resolved Unanimously, That we deem it inexpedient to separate from the Grand Chapter of the State of Maryland and District of Columbia and that we will *not* avail ourselves of the permission and authority granted by a resolution *past* said Grand Chapter at their last Communication. (Extracts from the Minute.)

EDW. DEEBLE, *Scribe.*"

¹ Pro. Gen. Gr. Ch., 1826, p. 77.

Previous to the closing of the convention the numbers of the chapters were arranged as follows: Federal, No. 1; Union, No. 2; Brooke, No. 3; Potomac, No. 4, and that charters to these should be made accordingly.

At the semi-annual meeting we find No. 1 to be designated as "*Washington* Royal Arch Chapter, No. 1." This change was made by that chapter at a meeting held February 23, 1824.

The Grand Chapter continued to exist until its annual communication, held January 8, 1833, which is the last record in the book.

Potomac Chapter, No. 4, never united with this Grand Chapter, but held under her old Charter.

At the annual meeting of the Grand Chapter, held January 9, 1827, a petition was received from Comp. P. Mauro, on behalf of himself and thirteen other Companions requesting a dispensation or Charter be granted to them for a chapter under the title of Temple Chapter, No. 4, which was unanimously granted.

At an adjourned convocation, held March 14, 1827, after installation of the Grand Officers, the officers elect of Temple Chapter, No. 4, were installed by the Grand High-Priest.

This Grand Chapter closed its existence after the annual convocation January 8, 1833, as no meeting was recorded in the old book after that date, if any were held at all. We must now refer to the proceedings of the General Grand Chapter and at the eleventh meeting, held September 14, 1841, we find that a resolution was adopted authorizing the Deputy General Grand High-Priest to take the necessary steps to place all chapters of Royal Arch Masons in that part of the District of Columbia, formerly belonging to the State of Maryland, under the jurisdiction of the Grand Chapter of Maryland.¹ At the next meeting, held September 10, 1844, that officer reported that the resolution above referred to had been duly enforced and confirmed by the Grand Chapter of the State of Maryland; and that Grand Chapter has assumed and now holds jurisdiction over that portion of the District of Columbia lying within the limits of the State, that at present Maryland has two chapters at work therein.² These two chapters were, Columbia No. 15, and Washington No. 16.

The chapters in the District of Columbia remained attached to and under the Grand Chapter of Maryland which on September 10,

¹ 1841, p. 165.

² 1844, p. 181.

1844, was changed to Maryland and District of Columbia, until the year 1867, when steps were taken by the four chapters in the District of Columbia to reorganize a Grand Chapter. These were: Columbia, No. 15; Washington, No. 16; Mount Vernon, No. 20; and Potomac, No. 8. After many preliminary conventions, and surmounting technical difficulties and bitter hostilities to their efforts, the General Grand High-Priest, John L. Lewis, gave his consent by telegram first, which was followed by his official letter. Companion Albert G. Mackey, Past General Grand High-Priest, was invited to come from Charleston, S. C., to constitute the Grand Chapter and install the Grand Officers, which ceremonies took place in Washington at the Opera-house, May 23, 1867. The Grand Chapter was successfully launched, but soon encountered quicksand and shoals. The enemies of the Grand Chapter did not hesitate to take the most un-masonic measures to stop the progress of Royal Arch Masonry in the District of Columbia; a self-constituted committee of four visited the General Grand High-Priest at his home in New York and by a tissue of falsehoods and a well-concocted false statement, induced that officer to recall his permission, long after the Grand Chapter had successfully entered upon a very prosperous course. Two constituent chapters had been chartered to take the place of Potomac Chapter, which withdrew from the Grand Chapter and, as in 1824, decided to remain with the Grand Chapter in Maryland. The General Grand High-Priest issued his edict, requiring the chapters in the District of Columbia to disband the new Grand Chapter, and return to their allegiance to the Grand Chapter of Maryland and District of Columbia. This not being complied with, he at once issued another edict, and expelled every Royal Mason belonging to the chapters in the District except those *four* and the members of Potomac Chapter. Thus matters remained. The Companions in Washington went along about their business of Masonry and a wonderful prosperity followed them. When the General Grand Chapter met in St. Louis in 1868, the Grand Chapter of the District was sustained in her action and admitted to the General Grand Chapter.

We have kindly omitted all personalities in this veritable history, because nearly every prominent Companion in this contest has gone to his reward, and we say, as all interested should, *Pax Vobiscum*. The General Grand Chapter permitted Potomac Chap-

ter, No. 8, to retain her place under the Grand Chapter of Maryland, but decided that the whole territory of the District was in the jurisdiction of the Grand Chapter of the District of Columbia, and she could not receive any petitions for the degrees. This continued for a few months, when Potomac finally asked to be admitted among the faithful, which was readily granted, and since that time there has been no more faithful members of the Grand Chapter than the Companions of Old Potomac, No. 8, and universally esteemed and beloved.

The Grand Chapter of the District of Columbia has increased since May 7, 1867, from three chapters with 498 members, to eleven chapters and 2,204 members in 1898.

Florida.

In the "Compendium" giving the proceedings of the General Grand Chapter for the sixth meeting of that body, September 14, 1826, the General Grand High-Priest, DeWitt Clinton, reported that he had granted dispensations for a Mark Lodge in St. Augustine and also one in St. Francisville in Florida.¹

The Grand Chapter of Virginia had chartered two chapters in Florida, viz.: Magnolia, No. 16, at Appalachicola, and Florida, No. 32, at Tallahassee. There was a chapter at St. Augustine chartered by the Grand Chapter of South Carolina.

We find in the "Compendium" in the proceedings for the thirteenth meeting of the General Grand Chapter, held September 14, 1847, the following in the report of the General Grand Secretary:²

"On the 11th day of January last (1847), three chapters of Royal Arch Masons in the State of Florida, by their delegates, met in Convention and resolved to form a Grand Chapter for that State. They therefore proceeded to frame a Constitution and enact by-laws; and on the 21st of the same month they elected officers and organized a Grand Chapter; and among their proceedings it will be found that they desire to place their Grand Chapter under your jurisdiction. On receipt of the copy of their Constitution and letter accompanying it, I immediately acknowledged the same, and requested their Grand Secretary to inform me from what Grand

¹ "Compendium," 1826, p. 73.

² *Ibid.*, 1847, p. 140.

Chapter the several Chapters in the State received their respective charters, and the time when each was issued. To this letter, as yet, I have received no answer."

The next notice of Florida we find in the proceedings of the same meeting,¹ where a committee on General Grand Secretary's report say:

"That it appears from documents referred to your committee, a Convention of delegates from the Royal Arch Chapters in the State of Florida, assembled in Tallahassee, in the month of January, 1847, at which time the following preamble and resolutions were adopted" (which we omit). The committee say:

"In the published proceedings of said Grand Chapter we find the adopted Constitution, and the following resolutions:

"Resolved, That the Grand Chapter of Florida, duly appreciating the advantages of a Masonic head and paramount authority, are disposed to come under the jurisdiction of the General Grand Chapter of the United States.

"Resolved, That the Grand Secretary communicate the same to the General Grand Secretary of the General Grand Chapter."

Among the comments of the committee they say: "It is to be regretted that the Grand Secretary did not furnish that precise information of the origin of the several chapters which composed the convention as would have enabled your committee to report in such a manner as to recommend to this General Grand Chapter the incorporation of that Grand Chapter under your jurisdiction at the present time," etc. Some objections were also made to several sections of their constitution; they recommended certain resolutions aiming to overcome the objections, and thereby to admit the Grand Chapter to her proper place as a constituent of this General Grand Chapter. The Grand Chapter of Florida did not understand the motive of the action of the General Grand Chapter and did not comply with the request for explanations. At the sixteenth meeting of the General Grand Chapter held in 1856 the General Grand High-Priest was authorized to recognize the Grand Chapter of Florida and place it in the same position as the other Grand Chapters, at its request.

The war period of 1861 to 1865 prevented the accomplishment

¹ "Compendium," pp. 158, 159, 161, 171.

of this arrangement until January 13, 1869, when the Grand Chapter of Florida accepted the invitation by passing the following:

"*Resolved*, That this Grand Chapter accept such invitation in a true Masonic spirit and will hereafter bear allegiance and support to the said General Grand Chapter."

Georgia.

The office of the Grand Secretary of the Grand Chapter of Georgia can not furnish any information as to when Royal Arch Masonry was introduced into that jurisdiction.

The first notice of Georgia in the proceedings of the General Grand Chapter is at the third septennial meeting, January 9, 1806, and is a Warrant to Georgia Chapter at Savannah. At the fourth meeting, held June 6, 1816 (special), Union Chapter, at Louisville, received a Warrant. At the fifth regular meeting, Augusta Chapter received a Warrant.¹ At the tenth meeting, held September 11, 1838, a dispensation was granted to a chapter at Macon.²

The next notice of Georgia in the proceedings of the General Grand Chapter is at the sixth meeting, in 1826. "That charters have been granted to Mechanic's Chapter, at Lexington, Georgia, on the 10th June, 1820; to Webb Chapter, at Sparta, Georgia, on 16th November, 1821; by the Deputy General Grand High-Priest, Henry Fowle."³ At the same meeting we find the following: "That Grand Royal Arch Chapters have been legally and constitutionally formed, since the last meeting of this Body, within and for the States of Maine, New Hampshire, New Jersey, *Georgia*, and Tennessee, with the consent of one of the General Grand Officers."⁴

At the thirteenth meeting of the General Grand Chapter, held September 14, 1847, the General Grand Secretary reports as follows:⁵

"Within the last few days, however, on examination of the old files of papers, I found a printed paper, to which the name of one of the General Grand Secretaries is affixed, giving a list of the Grand Chapters under the jurisdiction of the General Grand Chapter, and therein appears the name of the Grand Chapter of Georgia.

"It would seem that this is a good evidence of that Grand

¹ "Compendium," pp. 36, 46, 56.

³ *Ibid.*, p. 72.

⁴ *Ibid.*, p. 76.

² *Ibid.*, pp. 103, 106.

⁵ *Ibid.*, pp. 140, 141.

Chapter having been recognized, and that if so, it should be, in some way, made to appear upon the record."

The report of the committee on the last item as found at the same meeting, was that they did find documentary evidence in the hands of the General Grand Secretary sufficient to prove that the Grand Chapter of Georgia was a constituent of the General Grand Chapter, although said Grand Chapter had not been represented, or made returns to that body since 1822.

The above statement of facts is not very flattering to the officers of the General Grand Chapter, whose duty it evidently was to know from the *records* and *registers* who were the constituents of that Grand Body. Such remissness and want of knowledge in regard to the very vital affairs show gross neglect of duty and want of care in the management of so important a body of Masons as the General Grand Chapter.

Idaho.

The Grand Chapter of Oregon granted a Charter to Idaho Chapter, in Idaho City, June 18, 1867, being under the impression that the General Grand Chapter had ceased to exist. This chapter was constituted August 18, 1867. At the twentieth session of the General Grand Chapter, held September 18, 1868, the General Grand Chapter adopted a report, which included "good faith" of the petitioners, healing all those who had been exalted in the chapter, and granting a Charter to Idaho Chapter, No. 1, Idaho City, on September 18, 1868. The General Grand Chapter issued warrants to other chapters in Idaho, viz.: February 14, 1870, a dispensation to Cyrus, No. 2, at Silver City, then in Dakota; March 30, 1870, a dispensation to Boise, No. 3, at Boise City; charters were issued to these two September 20, 1871.¹

In the proceedings of the General Grand Chapter for August 25, 1880, on petition of Comp. G P. Coburn and others of Lewiston, Nez Perce County, Idaho, a Charter was granted, August 27, 1880, to Lewiston Chapter, No. 4.²

At the twenty-sixth triennial, held October 1, 1886, Alturas Chapter, No. 5, at Harley, Dak., was granted a Charter.³

Pocatello, No. 6, at Pocatello, received a dispensation dated May

¹ "Pro. Gen. Gr. Ch. for 1871," p. 33.

² *Ibid.*, p. 81.

³ *Ibid.*, p. 125.

28, 1889, and a Charter November 22, 1889; Moscow Chapter, at Moscow, received a Charter July 23, 1891; Fayette Chapter, No. 8, at Fayette, received a Charter August 24, 1894.

Illinois.

The Deputy General Grand High-Priest, Joseph K. Stapleton, gave a dispensation to Springfield Chapter, in Springfield, July 19, 1841;¹ and at the eleventh triennial meeting of the General Grand Chapter, held September 14, 1841, a Charter was granted on the 17th.²

At the twelfth triennial session, September 10, 1844, the Deputy General Grand High-Priest reported having issued a dispensation for Lafayette Chapter, in Chicago, dated July 2, 1844.³

At the thirteenth triennial session, September 14, 1847, he reported having issued dispensations to Jacksonville Chapter, No. 3, at Jacksonville, and Shawneetown Chapter, No. 6, at Shawneetown, since the session of 1844, and a Charter to Lafayette Chapter, in Chicago.⁴

The General Grand Scribe Ezra S. Barnum reported having issued dispensations on March 10, 1846, to open Horeb Chapter, No. 4, at Henderson, and April 1, 1846, to open Quincy Chapter, No. 5, at Quincy.

At the fourteenth triennial session, September 10, 1850, several of the chapters working under dispensations having applied for charters were refused because they had failed to send up the records of their proceedings, and therefore the committee was unable to say whether their doings had been regular or not. Among these were the chapters Reynolds, Stapleton, Springfield, and Quincy, and recommended that their dispensations be continued in force until next triennial meeting.⁵

At the same session (fourteenth) the Deputy General Grand High-Priest reported having issued dispensations for the formation of Howard Chapter, on July 28, 1848, and Stapleton Chapter, June 28, 1849. The General Grand King reported that since the last triennial he had granted a dispensation to a chapter to be held in Cambridge in the County of Henry, Ill., to be called Reynolds

¹ "Compendium," p. no.

³ *Ibid.*, p. in.

³ *Ibid.*, p. 122.

⁴ *Ibid.*, p. 145.

⁵ *Ibid.*, p. 201.

Chapter, No.—,¹ dated March 2, 1850. The General Grand Scribe reported that since the last triennial he had granted a dispensation to open a chapter of Royal Arch Masons at Rock Island, Ill., August 1, 1849,² to be called Barrett.

At the thirteenth triennial meeting the General Grand King reported that he had granted authority to seven chapters in Illinois to organize a Grand Chapter.

April 10, 1850, a convention of the representatives of six of these chapters was held, and having the authority of the General Grand King, a Grand Chapter for the State of Illinois was organized.³

Indian Territory.

A convention of three chartered chapters, Indian, No. 1; Oklahoma, No. 2, and Muskogee, No. 3, was held by their representatives, October 15, 1889; organized and made application to the General Grand High-Priest for authority to constitute a Grand Chapter for Indian Territory, which was refused. Subsequently the succeeding General Grand High-Priest, David F. Day, at the general grand convocation, held at Atlanta, Ga., November 22, 1889, granted their request, and on February 15, 1890, the Grand Chapter was constitutionally instituted. At the second annual convocation, held at Oklahoma, August 20, 1891, seven chapters were represented.

Indiana.

The first record evidence of the establishment of Royal Arch Masonry in the State of Indiana is found in the proceedings of the General Grand Chapter at the sixth meeting, held September 14, 1826, where under the report of a committee on the papers and proceedings of the General Grand Officers they say: "That a Charter had been granted to Vincennes Chapter, at Vincennes, State of Indiana, on 13th May, 1820; to Jennings Mark Lodge, at Vevay, Indiana, on 4th May, 1821, by the General Grand King, John Snow."⁴

September 14, 1838, the committee on the doings of General Grand Officers reported a dispensation having been granted by M. E. Companion Stapleton for a chapter at Richmond, Ind., and recommended a Charter for that chapter (September 14, 1838). This

¹ "Compendium," p. 182.

² *Ibid.*, p. 184.

³ *Ibid.*, p. 183.

⁴ *Ibid.*, p. 73.

chapter was named King Solomon. At the eleventh meeting, held September 14, 1841, the Committee on Warrants recommended a Charter to be issued to Logan Chapter, Logansport; the dispensation of this chapter was dated March 12, 1839.

At the twelfth meeting, held September 10, 1844, the following statements were made by the General Grand Secretary:¹ "By the records of the proceedings of the General Grand Chapter in 1819, it appears that the Committee to whom was referred the subject matter of dispensations granted by the General Grand Officers during the previous recess *had heard* that the then late Deputy General" Grand High-Priest had granted dispensations for charters at Madison, and at Brookville, in Indiana; but there being no further evidence of their existence before the General Grand Chapter, no ratification of these acts was passed, nor were their charters ordered; although several charters were at that time ordered for other chapters holding dispensations under authority of other General Grand Officers. Consequently, Madison and Brookville Chapters ceased to exist as legally constituted Masonic Bodies at that time. It appears, however, from the herewith accompanying papers, that Madison Chapter continued its labors for many years; and there having been another chapter established at Vincennes, in that State, in 1823, it is said a Grand Chapter was organized with the approbation of M. E. Comp. John Snow, General Grand King. No documentary evidence of that authority, however, or even records of the proceedings of that Grand Chapter are known to exist. Nor does it appear of record that the General Grand Chapter was ever advised of the existence of such an institution. . . ."

On the true position of these things being made known to the Companions at Madison, in the proper spirit of Masonry they immediately suspended all work, closed their chapter, and determined to lay their case before the General Grand Chapter, which was done by their High-Priest, M. E. Joseph G. Norwood, in a very frank, perspicuous, and able manner, presented amongst the documents, accompanied by their dispensation, their return for 1842 to the present time (September 10, 1844), and the payment of such dues as have accrued within that time. No return had been made from 1819 to 1842. Their irregularities were evidently the result of mistakes as to the extent of power given by their dispensation, and

¹ "Compendium," p. 116.

they asked that their acts may be made lawful by the General Grand Chapter and that all dues up to 1842 be remitted, and asked for a Charter.¹ This was duly granted, September 12, 1844,² and all dues remitted up to 1842. The past work was pronounced illegal, and authority was given to heal all who had received degrees in it. At the twelfth meeting above mentioned (1844), the Deputy General Grand High-Priest reported having issued a dispensation to Lafayette Chapter, No. 3, at Lafayette, August 17, 1843;³ a Charter was granted to this chapter, September 11, 1844; at this meeting permission was granted by the General Grand Chapter for a convention to assemble, dated November 18, 1845, and the Grand Chapter of Indiana was duly constituted December 25, 1845.

Iowa.

At the thirteenth meeting of the General Grand Chapter, held September 14, 1847, the Deputy General Grand High-Priest reported that since the triennial session, in 1844, he had authorized the consecration, by proxy, of Iowa Chapter, at Burlington, Ia., and also Iowa City Chapter, at Iowa City. He had also issued a dispensation to form Dubuque Chapter, No. 3, at Dubuque, Ia.⁴ Charter to the same was dated September 17, 1847.

Dispensation to Iowa Chapter, No. 1, was dated August 24, 1843.⁵ Charter to the same was dated September 11, 1844.

Dispensation to Iowa City Chapter, No. 2, was dated March 19, 1844.⁶ Charter to the same was dated September 17, 1847.

At the fifteenth meeting of the General Grand Chapter, held September 17, 1853, Washington Chapter, No. 4, at Muscatine, Ia., was chartered, dated September 17, 1853.⁷

A dispensation had been issued to McCord Chapter, No. 5, at Fairfield, probably in March, 1853. The Deputy General Grand High-Priest, Joseph K. Stapleton, having died very soon thereafter, no report was made.⁸ That chapter received a Charter from the Grand Chapter of Iowa after it was constituted, dated June 14, 1854.

A convention of the above-named chapters, by their delegates,

⁷ *Ibid.*, p. 259.

⁸ Proceedings, 1856, p. 361.

was held at Mount Pleasant, June 8, 1854, by the authority of the General Grand Scribe, A. V. Rowe.¹

The history of Capitular Masonry in Iowa would not be completed were we to omit one of those peculiar episodes which, with cyclonic force, carries away before it all the valuable works of the good and great Masonic Architects, who have labored so hard, and industriously, in the erection of Masonic temples, and which we quote from Companion A. F. Chapman's history of Capitular Masonry in the *History of Masonry and Concordant Orders*:

"Within about two years after being organized, the usefulness of the General Grand Chapter came under discussion. The Grand High Priests early gave emphasis to this negative feeling. In 1857 the delegates to the next session of the General Grand Chapter were instructed to vote for its dissolution. This was re-enforced in 1858. The Grand Chapter asserted its sovereignty and independent right to organize chapters in Nebraska or elsewhere, where no Grand Chapter existed, and finally, on August 16, 1860, the resolution declaring the

"'Grand Chapter sovereign and independent, and in no manner whatever subject to the General Grand Chapter of the United States, and this Grand Chapter is forever absolved from all connection therewith,'

was passed by a vote of twenty-eight ayes to fifteen nays.

"This condition continued for nine years, when, at the triennial convocation, September, 1871, the General Grand High Priest reported that, under date of October 26, 1869, he had 'received official notice that the Grand Chapter of Iowa had rescinded the act of secession passed in 1860, and had directed that the C..B.. of allegiance should be administered to all the members of chapters in that jurisdiction, and that hereafter it would be administered to candidates receiving the Royal Arch degree.'²

"This Grand Chapter has been represented in the General Grand Chapter since 1871.

"Robert Farmer Bower of Iowa Grand Chapter was chosen General Grand High Priest in 1880, and died before his term was out."

¹ Proceedings, 1856, p. 376.

² "History of Masonry," p. 613.

Kansas.

The first dispensation was issued to Leavenworth Chapter, No. I, at Leavenworth, January 24, 1857; to Washington Chapter, at Atchison, May 18, 1859. These two dispensations were reported by the General Grand High-Priest at the seventeenth meeting of the General Grand Chapter, held September, 1859, and at this meeting a Charter was granted to Washington Chapter, No. 2, September 14, 1859. In the proceedings of the special convocation of the General Grand Chapter called by Comp. Albert G. Mackey, General Grand High-Priest, which assembled in Columbus, O., September 7, 1865, Washington Chapter, No. 1, of Kansas, is reported present by Jacob Saqui, H. P.¹ At the triennial communication held next day, September 8th, at the same place, the Deputy General Grand High-Priest reported that he had renewed the dispensation of Leavenworth Chapter in May, 1863.² On September 8, 1865, a Charter was granted,³ and also a Charter was granted to Fort Scott Chapter, the General Grand Secretary having reported that a dispensation had been issued to the chapter.⁴

By permission of the Deputy General Grand High-Priest a convention of the delegates of the several chapters was held January, 1866, and on February 23, 1866, a Grand Royal Arch Chapter was duly organized and constituted.

Kentucky.

In the proceedings of the General Grand Chapter at the fifth regular meeting, September 9, 1819, the proceedings of the Grand Chapter of Kentucky were presented and read, and a resolution was passed, viz.: "*Whereas*, It has been communicated to the General Grand Chapter that several Warrants of Constitution were granted since the last communication authorizing the opening and holding of Royal Arch Chapters in Lexington, Frankfort, and Shelbyville, in the State of Kentucky, by our late Most Excellent Companion, Thomas Smith Webb, and that said Chapters having been constitutionally in operation for the space of more than one year, did form themselves into a Grand Chapter for said State

¹ Proceedings of the General Grand Chapter, 1862-65, p. 7.

² *Ibid.*, p. 23.

³ *Ibid.*, p. 31.

⁴ *Ibid.*, p. 27.

under the jurisdiction of this body, and have been regularly organized as such, by M. E. Companions De Witt Clinton, General Grand High Priest, and Thomas Smith Webb, late Deputy General Grand High Priest.

"*Resolved*, Therefore, that this General Grand Chapter approves and recognizes the formation of said Grand Chapter for said State of Kentucky."¹

The dispensations for the above-mentioned three chapters had been issued by Companion Thomas Smith Webb, Deputy General Grand High-Priest, October 16, 1816.

In the proceedings of the Grand Chapter of Kentucky will be found the correspondence in reference to the formation and constituting of the Grand Chapter, and also the recognition by the Deputy General Grand High-Priest, dated December 12, 1817, at Worthington, O., and by DeWitt Clinton, M. Ex. General Grand High-Priest, December 30, 1817.

At the annual convocation of the Grand Chapter, held in Lexington, September 5, 1825, the Grand Chapter adopted certain resolutions, to petition the General Grand Chapter, and to address letters to the other Grand Chapters on the propriety of dissolving the General Grand Chapter.² The memorial was issued, and it is found in the proceedings of the General Grand Chapter for the sixth meeting, September 4, A. L. 5826.³ This memorial was referred to an appropriate committee, which reported, giving a statement as to how the several Grand Chapters had acted upon the question showing, that "as a majority of the Grand Chapters of the Several States dissented from the resolution of the Grand Chapter of Kentucky, it is not expedient for the General Grand Chapter to take any further measures on the subject." This was after some consideration referred to a committee of the whole. That committee after having deliberately considered and discussed the report, it was agreed to report the same without amendment to the General Grand Chapter, which body decided by a vote of yeas 47, noes 2, to agree to the report of the committee.⁴

Very properly, the Grand Chapter of Kentucky appeared to be contented with this decision.

The report of the General Grand Secretary at the triennial ses-

¹ "Compendium," p. 52.

² *Ibid.*, p. 62.

³ *Ibid.*, pp. 52-69.

⁴ *Ibid.*, p. 71. Proceedings, 1874, p. 17.

sion, September, 1859, shows that the Grand Chapter of Kentucky had adopted resolutions of withdrawal from the General Grand Body.

At the twenty-second triennial convocation, held November 24, 1874, the General Grand High-Priest, in his address, stated "That the Grand Chapter of Kentucky has rescinded her resolutions of withdrawal and has renewed her allegiance. Her representatives are here with us," etc. She has remained in true allegiance ever since.

Louisiana.

The first reference we find in the proceedings of the General Grand Chapter to Royal Arch Masonry in Louisiana, is at the twelfth meeting, held September 10, 1844, wherein is a report on the appeal of C. D. Lehman, of New Orleans, from a judgment of the so-called Grand Chapter of Louisiana. Difficulties had occurred between the officers and members of Holland chapter, No. 9, in New Orleans. From the documents presented the committee learned "that a Grand Chapter of Louisiana was organized in 1813, by the 'Royal Lodges' Concordia and Perseverance, and such Officers and Members of the Grand Lodge of the State as were Royal Arch Masons." Note, these lodges were originally organized in the Island of San Domingo, under charters from the Grand Lodge of Pennsylvania, with powers to confer all the degrees from Entered Apprentice to Royal Arch inclusive. When the revolution occurred in San Domingo, many of the members of these lodges made their escape and stopped for a while in Cuba, but finally settled in New Orleans, and having retained their charters, resumed labor in that city.¹

The Grand Chapter formed in the manner above stated was attached to, and made dependent on, the Grand Lodge of Louisiana, and the M. W. Grand Master of that body was *ex officio* and by "inherent right" Grand High-Priest of the new Grand Chapter.

The question as to the legality of these proceedings had been foreclosed in 1829, by the admission of a representative from the Grand Chapter of Louisiana, in the person of Companion McConnell, on whose return to New Orleans the Grand High-Priest, Companion John Holland, convened the officers and members of the

¹ Reprint of Proceedings of the General Grand Chapter from 1798 to 1856, p. 194.

Grand Chapter, who, by an official act, in regular assembly, enrolled themselves under the jurisdiction of the General Grand Chapter, in the manner prescribed by the 13th Section of the 4th Article of the General Grand Constitution; of which act it notified all the subordinate chapters under its jurisdiction, and directed similar action on their part, and enjoined a strict observance of the provisions of the General Constitution.

From 1829 to 1831 the Grand Chapter of Louisiana conducted all of her proceedings in good faith and true allegiance to the General Grand Chapter. From 1831 to April, 1839, there was no meeting. The subordinate chapters had ceased to exist, except Holland, No. 9, which kept up its work until the revocation of its Charter in 1841. In that year, the Grand Secretary of the Grand Lodge of Louisiana, by direction of the Grand Master, issued notices to certain Royal Arch Masons in New Orleans, to assemble and elect Grand Officers, with the intention of a reorganization of the State Grand Chapter. This meeting did not occur; but another was soon thereafter called, and the High-Priest and three other officers of Holland Chapter were notified. The usual Grand Officers were elected at this meeting, and the so-styled Grand Chapter of Louisiana was organized. From the testimony submitted to the committee, it appeared that the High-Priest of Holland Chapter, Compn. Henry, was not present at this election; nor could the committee ascertain that there was any Companion present who was entitled to vote in an election of Grand Officers.

Shortly after this, Compn. Henry was officially notified by the Grand Secretary of the Grand Chapter of Louisiana of the organization of the Grand Chapter, and requiring of Holland Chapter her dues and returns from 1832 to 1838 inclusive. Holland Chapter protested against this demand and asked for evidence of the legality of the organization of the Grand Body, which was refused, and Holland Chapter declined to recognize its authority. The body, assuming to be the Grand Chapter, proceeded to revoke the Charter, and to expel the High-Priest and Secretary of Holland Chapter. The Secretary, Compn. C. D. Lehman, made his appeal to the General Grand Chapter. On July 24, 1843, he served the reputed Grand Chapter with a notice of his intention, and it was shown when this notice was served, the Grand High-Priest of the Grand Chapter, in his place, and in open chapter declared "that he did not acknowledge

any other body, and was independent of the General Grand Royal Arch Chapter of the United States."

From the above statement it would appear that the Grand Royal Arch Chapter, organized in 1813, voluntarily surrendered its independent jurisdiction and enrolled itself under the General Grand Chapter, which body continued until 1831, and having ceased her operations by not meeting and electing officers, as required by the General Grand Constitution, it ceased to exist. All the existing subordinate chapters came immediately under the jurisdiction of the General Grand Chapter, which alone had legal authority over the jurisdiction thus vacated, as by Article 2, Section 2, of the General Grand Constitution. The deceased Grand Chapter could only be revived by Article 2. Section 9.

The committee recommended and which was unanimously adopted: That Holland Chapter, No. 9, be directed to resume its labors under the direction of its former officers and members, with power to fill existing vacancies, and that it be required to make its annual returns, and settle its dues with the General Grand Secretary.¹

In the proceedings of the General Grand Chapter for 1847 we find in a report on Holland Chapter, No. 9, "that the Charter of said Chapter has been either lost or stolen; and that the dispensation under which it has been working for the past year expires by the terms of its own limitation with the present session of this General Grand Chapter. They therefore respectfully recommend that the General Grand Secretary be authorized to execute a new Charter, to take the place of that which has been lost, etc., which was accepted."²

The General Grand Chapter at this session "*Resolved*, That there is not at this time any constitutional and legally authorized Grand Royal Arch Chapter in the State of Louisiana.

"*Resolved*, That the Association holding its meetings in the City of New Orleans, and assuming to exercise the functions and authority of a Grand Chapter of Royal Arch Masons is an irregular and unauthorized Masonic body; and it is hereby disowned, and repudiated as spurious, clandestine, and illegal."

Masonic intercourse, public and private, was interdicted, and

¹ Proceedings of the General Grand Chapter from 1798 to 1856, pp. 193-195.

² *Ibid.*, pp. 218, 219.

due notice of these resolutions was to be forwarded to the acting Secretary of said body by the General Grand Secretary.¹

The Deputy General Grand High-Priest reported at this session, September 14, 1847, that since the session of 1844 he had issued dispensations to the following bodies in Louisiana: New Era, No. 2; Red River, No. 3; East Feliciana,² No. 4. No dates given. He had also issued a dispensation to Holland Chapter, No. 1, at New Orleans, to continue work until the present session,³ April 7, 1845, and a new Charter recommended, which was done as above stated. When the Charter to East Feliciana, No. 4, was granted, by request of the chapter the name and place were changed to Clinton, to be located at Clinton.⁴ At the same time charters were granted to New Era, No. 2, at New Orleans; Red River, No. 3, at Shreveport; viz.: September 15, 1847.

At the fourteenth meeting of the General Grand Chapter, September 10, 1850, a committee reported that "on the personal knowledge of one of their own members who represents that State (Louisiana) in this Body, that those difficulties are now adjusted, and that the different Grand Bodies of that State, in all degrees of Masonry, are now united as one in that harmony without which our Order can not exist."⁵

At this session (1850) the General Grand King reported "that he had authorized Holland Chapter, No. 1; New Era Chapter, No. 2; Red River Chapter, No. 3, and Clinton Chapter, No. 4, in the State of Louisiana, to organize and establish a Grand Chapter for that State; which they did in the City of New Orleans, on 1st day of May, 1848."⁶

Maine.

As the territory occupied by Maine was a part of Massachusetts until it was made a State in 1820, the Grand Chapter of Massachusetts granted a Warrant of Constitution to organize a chapter in Portland, Me., February 13, 1805. The same Grand Chapter issued dispensations, December 17, 1819, to Montgomery, at Bath, and to New Jerusalem, at Wiscasset; on December 29, 1819, to Jerusalem Chapter, in Hollo well. Henry Fowle, Deputy Grand High-Priest, constituted these three chapters, respectively, July 18,

¹ Proceedings of the General Grand Chapter from 1798 to 1856, p. 128.

² *Ibid.*, p. 209.

³ *Ibid.*, 209.

⁴ *Ibid.*, 225.

⁵ *Ibid.*, p. 248.

⁶ *Ibid.*, p. 253.

19, and 21, 1820, which was reported by him to James Prescott, Grand High-Priest.

These three chapters, with Mt. Vernon Chapter, of Portland, met in convention in Portland, 1820, and adopted the constitution of the Grand Chapter of Massachusetts provisionally, and the Grand Chapter Officers were chosen and organized and constituted the Grand Chapter of Maine.¹

The first reference to Royal Masonry in Maine by the General Grand Chapter is found in the proceedings for the triennial meeting, September 15, 1826,² when the committee reported the legal constitution of the Grand Chapter, and by resolution adopted, that Grand Chapter was recognized and received under the authority and sanction of the General Grand Chapter.

This Grand Chapter had the honor of having two of her Members selected as General Grand Officers in the General Grand Chapter of the United States, viz.: Robert P. Dunlap, General Grand High-Priest for three terms, in 1847, 1850, and 1853, and Josiah H. Drummond, General Grand High-Priest in 1871.

Maryland.

A circular letter from Concordia Chapter in Baltimore was issued to all the chapters in Baltimore and the "Encampment of Excellent, Superexcellent, Royal Arch" (in the District of Columbia), inviting them to send representatives to a convention to be held in the city of Washington, January 21, 1807, to take into consideration the propriety of forming a Grand Chapter for the State of Maryland and the District of Columbia.

Those chapters in Baltimore which met in this convention were Washington, Concordia, and St. John's.

We find from Compn. Edward T. Schultz's *History of Capitular Masonry in Maryland* that "Undoubtedly [Washington Chapter] was the Royal Arch Chapter of Jerusalem, instituted in 1787 by virtue of the dispensation or warrant of Lodge No. 7, Royal Arch Chapter of Jerusalem, at Chestertown, and was attached to Lodge No. 15, now Washington Lodge, No. 3." This chapter finally was merged with Concordia in 1822.

¹ "History of Masonry and Concordant Orders," p. 616.

² Proceedings of General Grand Chapter, 1826, p. 82.

Companion Schultz informs us:¹ "It is probable that Royal Arch Chapters were attached to most of the active Lodges in the State. Hiram Lodge, No. 27, at Port Tobacco, as we have seen, resolved to open a 'Royal Arch Chapter.' There is evidence to show that *more* than one dispensation was granted in the year 1797. Brother David Kerr was at the time Grand Master, and by virtue of the power and control of the Royal Arch Degree, believed to be inherent in Grand Masters, issued his dispensations for the formation of these *several Chapters* which then, in connection with the Chapter attached to Washington Lodge, formed, June 24, 1897, the first Independent Grand Chapter in the United States. The Grand Chapter claimed to have been organized in 1796 in Pennsylvania, was an appendage to the Grand Lodge of that State, and did not become independent until the year 1824."

In the above statement of Companion Schultz we heartily concur. The Grand Chapter of 1797 in Maryland became dormant in 1803, and was revived in 1807, according to documents shown in Companion Schultz's history.²

A Grand Royal Arch Convention was held by the H. Royal Arch Chapters in the State of Maryland and District of Columbia in the city of Washington on January 21, 1807. Washington, Concordia, and St. John's chapters of Baltimore, Federal and Washington Naval of Washington City and Potomac Chapter of Georgetown of the District of Columbia were present by their representatives. This Convention resolved unanimously to organize a Grand Chapter for the State of Maryland and the District of Columbia. They elected the Grand Officers, and opened the Grand Chapter in ample form. A committee was appointed to frame a constitution, which reported, and their report was unanimously adopted.

The degrees recognized by this Grand Chapter were Mark Master, Past Master, Most Excellent Master, and Royal Arch.

We make the following extract from Companion Schultz's *Freemasonry in Maryland*.³

"Since the finding of these books (old Records), documents have been brought to light, which in connection with them throw much light upon the early history of the Grand R. A. Chapter of Maryland, and the District of Columbia, which as it will be seen

¹ "History of Capitular Masonry in Maryland," pp. 321, 322, 323.

² Ibid.

³ Vol. i., pp. 317, 318.

was the title of the body subsequently formed by the representatives of the chapters in Baltimore and Washington."

The great care, diligence, and indefatigable zeal of Companion Schultz manifested in his history, deserve especial mention by all succeeding historians of Masonry, for his valuable additions to the ancient history of Masonry in Maryland in all the branches—and we continue our extracts:

"Some months since we learned that the Masonic papers of Philip P. Eckel, which were supposed to have been lost or entirely destroyed, were in the possession of his granddaughter, Mrs. David J. Bishop, living in this city (Baltimore), and who has since most kindly placed them at our disposal. These papers were found to be of great interest as they disclosed the existence of Masonic bodies held in Baltimore prior to the year 1800, that were not previously known or mentioned by any Masonic writer."

Brother Eckel was perhaps the most active and zealous Mason that ever lived in this jurisdiction; there is scarcely a record or document existing in this State, from about 1792 to 1828, that does not mention his name in some capacity. Mackey says: "He was one of the most distinguished and enlightened Masons of his day;" and we add to this that he was evidently an "Inspector General" of the A. . A. . S. . Rite. Companion Schultz furnishes *facsimile* copies of several of the documents referred to, and to prove that a Grand Chapter existed in Baltimore is such a copy of a "dispensation" from David Kerr, Grand High-Priest, to Philip P. Eckel as High-Priest, to assemble a sufficient number of Companions to open and hold a chapter of Royal Arch Masons, etc., in Baltimore, which was to continue in force until June 20, 1797. This dispensation is dated May 8, 1797.

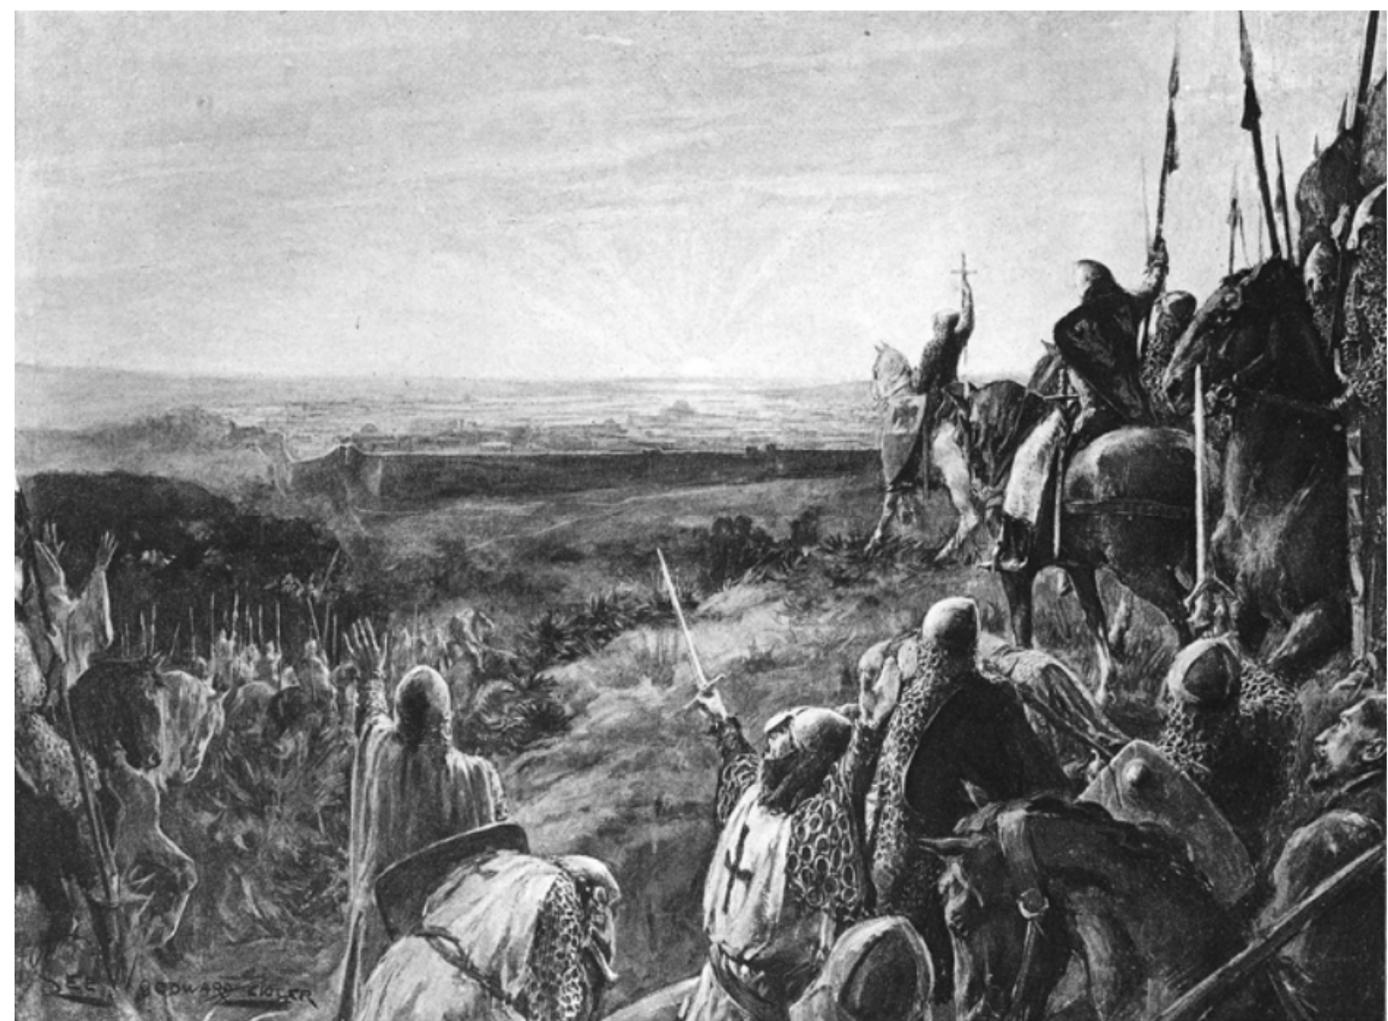

No further records or documents of any description have been discovered in reference to the Grand Chapter organized in 1807, and the reorganization which occurred in the year 1814. On May 9th of that year delegates from Chapters Nos. 1, 2, and 3 met in the city of Baltimore, when a constitution for the Grand Royal Arch Chapter of the State of Maryland and District of Columbia was adopted and Grand Officers elected.¹

This Grand Chapter continued with above title until the withdrawal of the chapters located in the District of Columbia, except

¹Schultz's "History of Maryland," vol. i., p. 325.

***FIRST VIEW OF JERUSALEM BY THE CRUSADERS FROM THE
HILL OF EMMAUS, JUNE 10, 1099***

Jerusalem!! Jerusalem!! It is the Will of God!!! It is the Will of God!!!

Potomac, No. 8, at Georgetown, which elected to remain under the jurisdiction of Maryland. This severance was done by the authority of the General Grand Chapter, August 30, 1822.¹

After this the Grand Chapter of the District of Columbia ceased to exist, the chapters in Washington City and Alexandria had no Grand Head until 1841, when steps were taken to place the chapters in the District of Columbia under the jurisdiction of the Grand Chapter of Maryland.² This condition continued until May 7, 1867, when the three chapters in the District of Columbia which were under the jurisdiction of Maryland and District of Columbia, viz.: Columbia, Washington, and Mount Vernon, were duly organized, and constituted the Grand Chapter of the District of Columbia.

That this was regularly and lawfully accomplished, we refer to the proceedings of the General Grand Chapter for 1865. The following was referred to a committee:

"Resolved, That the Royal Arch Chapters in the District of Columbia or any three of them, are hereby authorized to establish a Grand Chapter for the District of Columbia; and whenever such Grand Chapter shall be organized, the jurisdiction now exercised over the chapters taking part in the same, by the Grand Chapter of Maryland, shall cease."³ That committee reported in 1868, and the Grand Chapter of the District of Columbia was sustained.

Massachusetts.

The Royal Arch Chapter of St. Andrew's was one of the three original chapters which met in convention in Boston, October 24, 1797, and issued the "Circular," which invited the assembling of a convention in Hartford, Ct., January 24, 1798, "to form and open a Grand Chapter of Royal Arch Masons, and to establish a Constitution for the government and regulation of all the chapters that now are or may be hereafter erected within the said States."⁴

The first notice of conferring the Royal Arch degree which we find was August 28, 1769, in St. Andrew's Chapter, called "Royal Arch Lodge," under the sanction of St. Andrew's Lodge Charter, No. 82, under the Registry of Scotland.

From August 12, 1769, until 1788, the title "Royal Arch Master" was employed.

¹ Proceedings General Grand Chapter, 1826, p. 77.

⁴ "Compendium," p. 7,

Michigan.

At the fifth regular meeting of the General Grand Chapter, held September 9, 1819, the committee reported that the General Grand High-Priest had granted a dispensation to Monroe Chapter, No. 1, at Detroit, December 3, 1818.¹

At the twelfth meeting of the General Grand Chapter a dispensation was reported as having been granted, by the Dep. General Grand High-Priest, May 16, 1844, to St. Joseph's Valley Chapter, No. 2, at Niles.² Also the same officer reported, at the thirteenth meeting, held September 14, 1847, that a dispensation had been granted (without date) to Jackson Chapter, No. 3, in Jackson.³

A Charter was granted to Monroe Chapter, No. 1, September 11, 1819;⁴ and at the session of September 14, 1847, a Charter was granted to St. Joseph's Valley, No. 2;⁵ and September 16, 1847, to Jackson Chapter, No. 3,⁶ by vote of the General Grand Chapter. The General Grand Scribe, in January, 1848,⁷ authorized the chapters in Michigan to meet and organize a Grand Chapter for the State.

Minnesota,

The first notice of Royal Arch Masonry, in the proceedings of the General Grand Chapter, we find at the fifteenth meeting, held September 17, 1853, when the committee reported that "a number of companions at St. Paul, Minn., have petitioned the General Grand King for a dispensation," and recommended a dispensation to be issued by the present Deputy General Grand High-Priest.⁸

At the triennial session, September 11, 1856, a Charter was granted.⁹ Dispensations were issued by the General Grand High-Priest to the following chapters: Vermillion, No. 2, in Hastings, June 20, 1857; St. Anthony Falls, No. 3, in St. Anthony, January 5, 1858. On September 14, 1859, charters were granted to these.

A convention was held, by authority of Compn. Albert G. Mackey, General Grand High-Priest, dated December 1, 1859, in St. Paul. December 17, 1859, a constitution was adopted and the Grand Chapter of Minnesota was regularly organized.

Mississippi.

At the sixth meeting of the General Grand Chapter, held September 14, 1826, the General Grand High-Priest reported having issued a dispensation to a chapter at Port Gibson, Miss. On the 15th, at the same meeting, a Charter was granted.¹

September 14, 1841, it was reported that a dispensation was issued to Vicksburg Chapter, June 17, 1840; and a Charter was granted September 17, 1841. At the twelfth session, September 10, 1844,² the Deputy General Grand High-Priest reported having issued dispensations to chapters in Mississippi as follows, viz.: to Columbus Chapter, February 7, 1842; and to Jackson, August 28, 1843. The General Grand High-Priest reported having issued a dispensation to a chapter at Holly Springs, October 30, 1841.³ At the thirteenth session, September 14, 1847, the General Deputy Grand High-Priest reported that he had authorized the consecration of three chapters in Mississippi since the session of 1844, for which charters had been ordered at that time, viz.: Columbus Chapter, at Columbus; Jackson Chapter, at Jackson; and Wilson Chapter, at Holly Springs.⁴ He also reported having issued two dispensations to organize chapters: Carrollton Chapter, No. 7, at Carrollton; and Yazoo Chapter, No. 8, in Yazoo County.⁵

In compliance with a petition from the chapters in Mississippi, the General Deputy Grand High-Priest reported that, March 12 1846, he had granted permission for those chapters to form a Grand Chapter for that State; and he had been officially notified that the Grand Chapter had been duly organized, May 18, 1846.⁶

Missouri.

At the regular meeting of the General Grand Chapter (September 11, 1819) it was reported that the Grand High-Priest had granted a dispensation to form a chapter in Missouri Territory, at St. Louis, on April 3, 1819,⁷ and a Warrant was granted, September 16, 1826,⁸ at the sixth meeting.

³ *Ibid.*, p. 78.

⁴ *Ibid.*, p. 210.

² *Ibid.*, p. 209.

⁷ *Ibid.*, p. 56.

² *Ibid.*, p. 163.

⁵ *Ibid.*, p. 209.

⁸ *Ibid.*, p. 83.

At the tenth meeting, September 14, 1838, the General Grand Scribe reported that a dispensation had been issued for a Charter to Palmyra Chapter, No. 2¹ (no date given). The committee recommended a Charter to be issued whenever the provisions of the constitution should have been complied with. A Charter, however, was not given by the General Grand Chapter, but after the formation of the Grand Chapter of Missouri, it was given October 16, 1847.

At the twelfth meeting of the General Grand Chapter, held September 10, 1844,² the Deputy General Grand High-Priest reported having issued dispensations to Liberty Chapter, No. 3, at Liberty, February 7, 1842; one to Weston Chapter, No. 4, at Weston, January 17, 1843; and one to Booneville Chapter, No. 6, at Booneville, March 3, 1843; one to La Fayette Chapter, No. 5, September 11, 1844. Charters were ordered to all chapters reported by the committee, viz.: Nos. 3, 4, 5, and 6.³

At the thirteenth meeting, held September 14, 1847, it was reported by the Deputy General Grand High-Priest that since the session of 1844 he had issued a dispensation to consecrate Booneville Chapter, No. 6, and he had issued dispensations to organize St. Louis Chapter, No. 8, at St. Louis, and Hannibal Chapter, No. 7, at Hannibal, Mo. On September 17, 1847, charters were ordered to be issued to Hannibal, No. 7, and St. Louis, No. 8.⁴

The convention to organize a Grand Chapter for the State of Missouri met in St. Louis, October 16, 1846, and the delegates of Chapters Nos. 1, 2, 5, and 6 were present, and did organize the Grand Chapter.

In the report of the General Grand Secretary of the General Grand Chapter, at the thirteenth meeting, held September 14, 1847, he states:

"In the month of November, 1846, I received notice of the formation of a Grand Chapter for the State of Missouri, purporting to be by authority from the General Grand Officers. This, however, was an error; and on being informed by me that there had been no such authority given, it is believed no further proceedings have been had in the matter."⁵

¹ Proceedings General Grand Chapter, 1798-1856, p. 153.

³ Ibid., p. 185.

⁴ Ibid., p. 232.

² Ibid., p. 181.

⁵ Ibid., p. 206.

We find the following minute in the proceedings of that day:

"To the General Grand Chapter:

"The Committee to whom was referred the action of the Grand Chapter of Missouri, have had the same under consideration, and respectfully report

"That the Grand Chapter of Missouri was formed, as we think, by the Chapters thereof in good faith, believing that they were fully authorized to do so, from conversations and correspondence with the Comp. General Grand Secretary. Your Committee, however, believe that this organization was not strictly in conformity with the Constitution of this General Grand Chapter; therefore,

"*Resolved*, That all irregularities be removed, and that said Grand Chapter of Missouri be fully recognized, and that its representatives be invited to seats in this General Grand Chapter."¹

Compn. J. W. S. Mitchell, of the Grand Chapter of Missouri, offered the following:

"*Resolved*, That the Chapters working by dispensation under this jurisdiction in Missouri be, and they are, required to pay dues to this General Grand Chapter up to the period when a Grand Chapter was organized in the said State of Missouri, viz.: October, 1846,"² which was adopted.

Montana.

The organization of the Grand Chapter of Montana, at Helena, June 25, 1891, was consummated in accordance with a call of the chapters and a Warrant which had been issued by the General Grand High-Priest, Companion David F. Day.

The chapters constituting the Grand Chapter were:

	Dispensation.	Charter.
Virginia City, No. 1, at Virginia City,	July 14, 1866,	December 18, 1868.
Helena, No. 2, at Helena,	December, 1867,	December 18, 1868.
Deer Lodge, No. 3, at Butte City,	October 10, 1874,	November 25, 1874.
Valley, No. 4, at Deer City,	July 22, 1880,	August 27, 1880.
Yellow Stone, No. 5, at Miles City,	January 2, 1886,	October 1, 1886.
Billings, No. 6, at Billings,	May 6, 1886,	October 1, 1886.
Livingston, No. 7, at Livingston,	July 15, 1886,	October 1, 1886.
Dillon, No. 8, at Dillon,	January 15, 1887,	November 22, 1889.
Great Falls, No. 9, at Great Falls,	March 13, 1889,	November 22, 1889.

¹ Proceedings General Grand Chapter, 1798-1856, p. 219.

² *Ibid.*, p. 231.

Nebraska.

At the triennial communication of the General Grand Chapter, held September 8, 1865, the General Grand King reported:

"On the 21st day of November, 1859, I granted to sundry-Companions at the City of Omaha, in Nebraska Territory, a dispensation to form and open a Chapter of Royal Arch Masons at that place, to be called Omaha Chapter, No. 1." He also reported having issued a dispensation, January 25, 1860, to Keystone Chapter, No. 2, at Nebraska City. Also that on July 13, 1864, a dispensation had been granted to Nebraska Chapter, No. 3, at Plattsmouth.¹ On the same day (September 8, 1865) charters were granted to all three of the above chapters.²

By permission of the Deputy General Grand High-Priest a convention was held, March 19, 1867, and the Grand Chapter of Nebraska was regularly organized.

Nevada.

At the triennial of the General Grand Chapter, held September 8, 1865, the General Grand High-Priest reported having issued a dispensation, in May, 1863, to "Lewis Chapter," at Carson City, Nevada, which name was a compliment to himself³ (John L. Lewis). This chapter received the Charter, dated September 8, 1865.⁴ A dispensation was issued to Virginia Chapter, at Virginia City.⁵ From the report, in the proceedings, it is very uncertain when the dispensation was issued. The Charter was ordered September 18, 1868. A dispensation was granted to Austin Chapter, at Austin, October, 1866, and a Charter, September 18, 1868. A dispensation was issued to White Pine Chapter, at Hamilton, January 10, 1871; and a Charter, September 20, 1871.⁶

A convention of these four chapters was held by authority of the General Grand High-Priest, November 18, 1873.

From the proceedings of the General Grand Chapter for November 21, 1874, we see in the report of the General Grand Secretary that a dispensation had been issued to St. John's Chapter, at Eureka, April 26, 1873; and also to Keystone Chapter, at Pioche,

¹ Proceedings General Grand Chapter, 1865, p. 25.

⁴ *Ibid.*, p. 31.

⁵ *Ibid.*, p. 23.

⁶ *Ibid.*, 1871, p. 33.

June 12, 1873.¹ The General Grand Secretary says: "The Chapters organized U. D. in Nevada, made returns and paid dues to date of the organization of the Grand Chapter of Nevada, of which they became components, in accordance with a custom hitherto approved by the General Grand Chapter."²

New Hampshire.

In the session of the General Grand Chapter of the United States, held June 6, 1816, we find that the General Grand King reported that he had granted warrants or charters for St. Andrew's Chapter at Hanover, January 27, 1817; Trinity Chapel, at Hopkinton, February 16, 1807; Washington Chapter, in Portsmouth, November, 1815; Cheshire Chapter, at Keene, May 4, 1816;³ and at this session the warrants were confirmed June 7, 1816.⁴

The Grand Chapter of New Hampshire was organized on June 10, 1819, and the General Grand Chapter was duly notified by John Harris, of New Hampshire, August 21, 1819, and the Grand Chapter was recognized by the General Grand Chapter at the session held September 9, 1819.⁵ The General Grand High-Priest issued a Warrant to Union Mark Lodge, No. 1, in Claremont, July 3, 1818,⁶ which subsequently passed under the jurisdiction of the Grand Chapter of New Hampshire.

New Jersey.

The first official notice we find of the introduction of capitular Masonry in New Jersey, is in the proceedings of the General Grand Chapter for June 6, 1816. The General Grand Scribe had granted a Warrant or Charter to Washington Chapter, Newark, May 26, 1813; to Cincinnati Mark Lodge, No. 1, Hanover, April, 1811; and to Union Mark Lodge, No. 2, Orange.⁷

At the triennial meeting, held September 16, 1826, the report of the General Grand High-Priest stated that a dispensation had been granted by him to Franklin Chapter, No. 3, and a Charter was granted.⁸

¹ Proceedings of General Grand Chapter, 1874, p. 41.

² *Ibid.*, p. 41.

³ There were no meetings of General Grand Chapter between 1806 and 1816.

⁴ "Compendium," fifth meeting of General Grand Chapter of United States, p. 56.

⁵ *Ibid.*, p. 55.

⁶ *Ibid.*, p. 60.

⁷ Proceedings of General Grand Chapter for 1797 to 1856, p. 45. ⁸ *Ibid.*, p. 78.

A special committee reported September 10th that a Charter had been granted to the State of New Jersey, enabling the respective chapters therein to form and hold a Grand Chapter in the said State, by the Most Excellent General Grand High-Priest.¹

At the triennial session, September 10, 1819, a communication from a Companion from the State of New Jersey on the subject of forming a Grand Chapter being referred to a committee, they reported, that it appears that there are two chapters in the State of New Jersey under the jurisdiction of the General Grand Chapter, and one under the authority of the State of Pennsylvania, which does not acknowledge the jurisdiction of the General Grand Chapter. The committee were of the opinion that a Grand Chapter could not be formed until there were three chapters acknowledging the jurisdiction of the General Grand Chapter, which was accepted by that body.²

A dispensation was granted, September 23, 1854, to Enterprise Chapter, No. 2, at Jersey City,³ and which was reported at the triennial meeting, September 9, 1856, and February 23, 1856, a dispensation was issued by the General Grand High-Priest to Boudinot Chapter, No. 5, at Burlington.

It was reported by the committee:

"Union Chapter, No. 1, Newark, is the only regularly Chartered Chapter now immediately subordinate to this General Grand Chapter.⁴ The following chapters have been working under dispensations from the General Grand Officers from the dates of their dispensations to this time, viz.: Enterprise, No. 2, Jersey City; and Boudinot, No. 5, Burlington.⁵ Hiram Chapter, No. 4, Eatontown, having been recognized by the General Grand High-Priest as heretofore stated, now stands a regular subordinate on the register of this General Grand Chapter."⁶

We find nothing said subsequently of the Grand Chapter of New Jersey. A resolution was adopted in the General Grand Chapter at its session, September 17, 1841, that Hiram Chapter at Trenton be advised to place itself under the jurisdiction of the Grand Chapter of the State of New York, and that said Grand Chapter be advised to legalize the proceedings of Hiram Chapter subsequent to the dissolution of the Grand Chapter of New Jersey.⁷

¹ Proceedings of General Grand Chapter, 1797-1856, pp. 77, 82. ² *Ibid.*, p. 54.

³ *Ibid.*, p. 364. ⁴ *Ibid.*, p. 365. ⁵ *Ibid.*, p. 365. ⁶ *Ibid.*, p. 365. ⁷ *Ibid.*, p. 168.

The Deputy General Grand High-Priest issued a dispensation to Union Chapter, No. 1, for Newark, March 13, 1848, and reported the same at the triennial held September 10, 1850, and also to Newark Chapter, No. 2, March 20, 1848;¹ both of these had charters granted September 12, 1850.²

The General Grand Secretary reported at the session held September 13, 1853, viz.: "On the 23d of december I received from the Deputy General Grand High-Priest a letter from the High-Priest of Newark Chapter, stating the loss of the Charter of said Chapter; which letter was endorsed by Comp. Stapleton, advising the issuing of a dispensation enabling the Chapter to continue its work; which dispensation was issued by the General Grand High-Priest."³

It appears, however, that subsequently, September 17, 1853, Newark, No. 2 was merged into Union Chapter.

The peculiar condition of Royal Arch Masonry in New Jersey continued for some considerable length of time, and was not satisfactorily settled until the organization of the Grand Chapter, February 13, 1857.

Hiram Chapter, which, as above shown, was transferred to the jurisdiction of New York Grand Chapter, by the resolution of the General Grand Chapter, September 17, 1841, again desired to be under the jurisdiction of the General Grand Chapter; and in July, 1853, requested of the Grand Chapter of New York to be transferred thereto. At the triennial of the General Grand Chapter, the report of the General Grand Secretary shows: "Upon examining the papers which came into my possession at our last triennial meeting, after the adjournment, I found among them a petition from the officers and members of Hiram Chapter, No. 4, Eatontown, New Jersey, directed to the General Grand Chapter, dated February 3, 1852, setting forth that, that Chapter was, many years before, chartered by the Grand Chapter of New Jersey, and continued to work under said Charter, so long as that Grand Chapter was in existence. That it was then 'taken under the fostering care of the Grand Chapter of New York, to which it had ever since been subservient,' and praying to be acknowledged and registered as one of the subordinates of this General Grand Chapter. To the

¹ Proceedings of General Grand Chapter, 1797-1856, p. 250.

² Ibid., p. 257.

³ Ibid., p. 293.

petition was appended full power from the Grand Chapter of New York to the petitioner to transfer their allegiance from the Grand Chapter of New York to this General Grand Chapter. That petition seems, from the endorsement upon it, in the hand writing of Compn. Swigert, who acted as my assistant, to have been referred to the Committee on Chapters and Dispensations. It is not mentioned in the proceedings."¹ A correspondence ensued between the High-Priest of Hiram Chapter and the General Grand High-Priest Hon. R. P. Dunlap, who finally directed the General Grand Secretary to register Hiram Chapter on the roll of chapters subordinate to the General Grand Chapter, which was done November 14, 1854, and the High-Priest George Finch was duly notified thereof, and thereafter the returns were regularly made as a subordinate chapter to the General Grand Body.² A Charter was ordered for Hiram Chapter, September 11, 1856.³

The following chapters applied to the General Grand High-Priest for his consent to organize a Grand Chapter, viz.: Newark Chapter, No. 2; Hiram Chapter, No. 4, and Boudinot Chapter, No. 5. This approval was dated January 24, 1857, and the Grand Chapter was regularly organized February 13, 1857.

New York.

It is very well settled that the Royal Arch degree was conferred in that jurisdiction under lodge charters, as it was elsewhere in the colonies, and prior to the formation of the Grand Chapter for the New England States and New York in 1798.

A Warrant was issued by the Duke of Athol, September 5, 1781, making Rev. William Walter the Provincial Grand Master, authorizing him to form a Provincial Grand Lodge in the city of New York. The first meeting of this provincial body was held December 5, 1782. At that date nine lodges existed in the city, and there were six military lodges of the British Army. It is supposed by some writers, and probably it was correct, that Washington Chapter, of New York, styled the "Mother Chapter," originated in the above-mentioned Provincial Grand Lodge. The early records of Washington Chapter were destroyed by fire in New York, con-

¹ Proceedings of General Grand Chapter for 1797 to 1856, p. 361.

² *Ibid.*, 1856, p. 361.

³ *Ibid.*, 1856, p. 373.

sequently its origin is unknown. It, however, granted warrants for other chapters through a number of years, Hiram Chapter in Newtown, Ct., dated April 29, 1791, being the first one now known.

The following chapters assembled in convention in Albany, March 14, 1798, and organized and established a Deputy Grand Chapter subordinate to the Grand Chapter of the Northern States for the State of New York, viz.: Hudson, of Hudson, instituted in 1796; Temple, of Albany, instituted February 14, 1799; Horeb, of Whitestown; Hibernian, of New York City; and Montgomery, of Stillwater; dates of these three not known. Comp. Thomas Frothingham was elected Chairman and Comp. Sebastian Vischer, Secretary. The constitution was read by Compn. Thomas Smith Webb, and Compn. De Witt Clinton was elected Deputy Grand High-Priest; John Hammer, Dep. Grand Secretary.

From the first, warrants were issued to organize Mark lodges and chapters, and prosperity attended the Royal Craft. Thirty-three chapters and three Mark lodges were represented in the Grand Chapter in 1820. The chapters increased to fifty-three in 1829, and sixty-one were represented in 1853; while in 1839 and 1840, following the Morgan affair, about thirteen only were reported.

As New York is the most populous State in the Union, so also does Masonry take the lead as to numbers in all the branches in Masonry.

The General Grand Chapter met in the city of New York in 1816, 1819, 1826, 1829, and 1841. De Witt Clinton served as General Grand High-Priest from 1816 to 1826; Edward Livingston, 1829 to 1835; John L. Lewis in 1865, and James M. Austin in 1868.

At the meeting of the Grand Chapter of the Northern States, held January 10, 1799, Section 1 of Article I. of the Constitution was changed, and that body assumed the title of General Grand Chapter of Royal Arch Masons for the six Northern States of America enumerated in the preamble.¹ The State organizations were, by Article II, Section 1, required to drop the prefix "Deputy," and were designated as "Grand Chapters."

¹ Proceedings of General Grand Chapter, 1797 to 1856, p. 19, and at p. 10 at session, January 26, 1798. The six are enumerated in the preamble and New York is also added.

North Carolina.

At the thirteenth meeting of the General Grand Chapter of the United States, held September 14, 1847, in the city of Columbus, O., we find the following report of the General Grand Secretary, viz.:

"In the State of North Carolina there is no Grand Chapter. The time was when such an institution existed there as a constituent of the General Grand Chapter; but it is believed that it ceased to exist about twenty years ago. There are said to be Chapters at Halifax, Tarborough, Fayetteville, and Wilmington; but they are not in correspondence with the General Grand Chapter, although some of them, if not all, were instituted under its immediate jurisdiction."

"*Note.*—Since the foregoing was written I have received a printed copy of the Minutes of a Convention of delegates from the several chapters, by which it appears a Grand Chapter has been re-organized for the State of North Carolina. Whether this organization be in strict compliance with the Constitution or not, there can be no doubt it was the intention of the chapters so to do, as the whole proceeding seems to be with a view of regaining their former position in the Confederation."

We have carefully referred to the proceedings of the General Grand Chapter, from the thirteenth meeting in 1847 back to the commencement of 1797, and find that the first notice of a chapter in North Carolina was at the fourth meeting, June 6, 1816, being a special in consequence of a lapse in 1813, reported when a Charter was to have been issued to Concord Chapter, at Wilmington, May 4, 1815, by the General Grand King. He had also issued a Charter to Phoenix Chapter, at Fayetteville, September 1, 1815.¹

We found also that at the sixth meeting, held September 14, 1826,² the Deputy General Grand High-Priest, Compn. Fowle, had granted a Warrant to Wadesborough Chapter, at Wadesborough, in 1822 (no date given). At this meeting there was no delegate present from North Carolina. When the "Memorial" of the Grand Chapter of Kentucky was presented to the General Grand Chapter

¹ "Compendium," p. 46.

² *Ibid.*, p. 72.

at its sixth meeting, September 14, 1826, asking for a dissolution of the latter body, it was referred to a committee, and at the same meeting the committee reported the answers of all the Grand Chapters, and North Carolina is stated as concurring with the Kentucky Grand Chapter's resolution.¹ At the meeting of the General Grand Chapter (September 14, 1847) above referred to, the matter concerning a Grand Chapter in North Carolina being referred to a committee, the following report was made:

"That they have had the same under consideration and find their proceedings to be regular. They assembled as appears by their printed proceedings, on the 28th of June, 1847; three chapters were represented; they proceeded to elect Officers and adopt a Constitution; in which, however, your committee would remark there appear to be several unconstitutional articles or sections, and we would respectfully recommend that the Grand Chapter of North Carolina be recognized as a legal Grand Chapter on their altering and amending their constitution to conform to that of this General Grand Chapter in the following particulars noted by your committee² (omitted). Which recommendation was adopted." So that the Grand Chapter of North Carolina was legally authorized September 16, 1847.

At the fourteenth triennial session, September 15, 1850, Companion L. L. Stephenson was present as proxy for the Grand High-Priest.³

North Dakota.

After the chapters located in South Dakota, by consent of the Grand Chapter of Dakota, on January 6, 1890, had organized their Grand Chapter, on January 9th following, the representatives of Missouri, No. 6, at Bismarck; Casselton, No. 7, at Casselton; Cheyenne, No. 9, at Valley City; Keystone, No. 11, at Fargo; Jamestown, No. 13, at Jamestown; Lisbon, No. 29, at Lisbon, met in convention, and were constituted, by Companion Theodore S. Parvin, by authority of a dispensation from the General Grand High-Priest, Noble D. Larner, and the Grand Chapter of North Dakota was organized in ample form with the following constituent chapters: Missouri, No. 1, at Bismarck; Casselton, No. 2, at

¹ "Compendium," p. 70.

² *Ibid.*, p. 155.

³ *Ibid.*, p. 175.

Casselton; Corinthian, No. 3, at Grand Forks; Cheyenne, No. 4, at Valley City; Keystone, No. 5, at Fargo; Jamestown, No. 6, at Jamestown; Lisbon, No. 7, at Lisbon.

The first annual convocation was held at Grand Forks, June 18, 1890. The membership reported of the seven chapters was three hundred and fifty-five.

Ohio.

The very first notice of Royal Arch Masonry in Ohio is found in the proceedings of the fourth meeting of the General Grand Chapter, held June 6, 1816, where it is reported that the General Grand Scribe had granted a Warrant or dispensation to Washington Chapter at Chillicothe, O., September 20, 1815,¹ which was confirmed on June 7, 1816.² The Committee on Examination of Credentials reported:

"On examination it appears that American Union Chapter, of Marietta, originated in the year 1792; that Cincinnati Chapter existed prior to the 27th of January, 1798; that Horeb Chapter had authority from the Deputy Grand High-Priest of the State of Maryland and District of Columbia dated 8th March, 1815, which Grand Chapter is in connection with the General Grand Chapter of the United States."³

Cincinnati Chapter started the effort to form a Grand Chapter by sending an invitation to the other chapters to meet at Worthington, October 21, 1816; and on the 24th of that month the Grand Chapter was regularly organized. The chapters constituting the Grand Chapter were: American Union, No. 1; Cincinnati, No. 2; Horeb, No. 3; Washington, No. 4.

At the fifth meeting of the General Grand Chapter, held September 9, 1819, it was "*Voted*, That the Grand Chapter of Ohio be now received into the Union of the State Grand Chapters, under the jurisdiction of this General Grand Chapter."⁴

¹ Proceedings of General Grand Chapter, 1797-1856, p. 45.

² *Ibid.*, p. 45.

³ "History of Masonry and Concordant Orders," p. 626. The above quotation is taken from the history of the "Capitular degrees," by Comp. Alfred F. Chapman, who stated: "On the second day of the Meeting a Committee was appointed to examine the Credentials and reported as follows:" viz., the above quotation.

⁴ Proceedings of General Grand Chapter, 1797-1856, p. 52.

Pennsylvania.

Grand H. R. A. Chapter.—The first chapter of R. A. Masons formed in Pennsylvania was that working under the Warrant of Lodge No. 3, and its date was anterior to 1758. From that period until the fall of the year 1795 all Royal Arch chapters were attached to subordinate lodges under the jurisdiction of the Grand Lodge. At an Extra Grand Lodge of the Commonwealth of Pennsylvania, held November 17, 1795, "A letter was received and read, signed by Brother Matthias Sadler, as Grand High-Priest of a Grand Royal Arch Chapter, by him said to be established under the several warrants of Lodges No. 19, 52, and 67, held in the city of Philadelphia, and, on motion, the Grand Lodge considering such action irregular, suspended the warrants of the three lodges named until the next Grand Communication. At an adjourned meeting of the Grand Lodge, held November 23, 1795, the committee appointed on the 17th of same month to take into consideration the action of Lodge 52, etc., reported fully on the matter and offered the following resolutions, which were adopted:

"*Whereas*, The supreme Masonic jurisdiction over all Lodges of Ancient York Masons, held in Pennsylvania, has uniformly been and is duly and legally vested in the Grand Lodge of Pennsylvania;

"*And whereas*, The number of Royal Arch Masons is greatly increased, insomuch that other Chapters are established in this city and in other parts of Pennsylvania;

"*And whereas*. It was always contemplated that such Chapters, regularly held, should be under the protection of this Grand Lodge;

"*And whereas*. It is the prevailing wish of the Royal Arch Masons within this jurisdiction that a Royal Arch Grand Chapter should be opened under the authority of this Grand Lodge. Be it therefore, and it is hereby resolved, that a Grand Royal Arch Chapter be opened under the immediate sanction of the Grand Lodge of Pennsylvania.' "

At a meeting of the Grand Lodge, held March 5, 1798, "Rules and Regulations for the government of the Grand Holy Royal Arch Chapter, held under the protection of, and supported by the Grand Lodge of Pennsylvania, unanimously agreed to and established a Grand Chapter, held in Philadelphia, February 24, 1798," were confirmed.

In the declaration, preceding these rules and regulations, was the following:

"Ancient Masonry consists of four degrees, the three first of which are that of the Apprentice, the Fellow Craft, and the sublime degree of Master; and a brother being well versed in these degrees, and having discharged the offices of his lodge, particularly that of Master, and fulfilled the duties thereof with the approbation of the brethren of his lodge, is eligible, on due trial and examination by the Chiefs of the Chapter to whom he shall have applied, and by them found worthy of being admitted to the fourth degree, The Holy Royal Arch."

The first of the rules declared:

"That no Chapter of Holy Royal Arch shall be held or convened within the commonwealth of Pennsylvania or Masonic jurisdiction thereunto belonging, but under the authority and sanction of a regular subsisting warrant granted by the Grand Lodge according to the old institutions, and by the consent of said lodge first signified to the Grand Chapter."

Subsequently the degrees of Mark Master and Most Excellent Master were permitted to be conferred (so as to enable Companions of Pennsylvania to enter chapters in other States), but the conferring of them was not to be considered as a recognition of them as degrees of Ancient York Masonry.

This state of affairs continued until May 17, 1824, when the dependent Grand Chapter to the Grand Lodge was closed *sine die*. and on the same day, "At a meeting of the Companions of the Holy Royal Arch, convened at the Masonic Hall," it was "*Resolved*, That the Companions now present do organize themselves into a Grand Holy Royal Arch Chapter," and on the 24th of the same month officers were elected, Companion Michael Nisbet being the first Grand High-Priest of the Independent Grand Chapter. and which now controls all the degrees of its sister Grand Chapters, with the exception of that of Past Master, which the Grand Lodge still controls.

The Grand Chapter of Pennsylvania is not a constituent of the General Grand Chapter of the United States.

Rhode Island.

Washington Chapter, "Mother," of New York, gave a Charter to Providence Royal Arch Chapter, September 3, 1793, and was with the other chapters in the organization of the Grand Chapter of Rhode Island, March 12, 1798. This Grand Chapter took part in the organization of the General Grand Chapter¹ and continued therewith until the war period (1861-65), and as the General Grand Chapter's sessions were thereby interrupted, this Grand Chapter, as well as some others, held that in consequence of the non-attendance at the regular sessions, the General Grand Chapter had been dissolved, and the Grand Body remained out of the Union until the session held October 12, 1897, when she again sent her representatives and rejoined the Union.

This action was resolved upon at the ninety-ninth annual convocation of the Grand Chapter of Rhode Island, held March 9, 1897.²

South Carolina.

A Warrant was granted by the Grand Chapter of New York, February 1, 1803, to Carolina Chapter, in Charleston.³ At the third regular meeting of the General Grand Chapter, January 9, 1806, the General Grand Officers reported having granted a Warrant for a chapter at Beaufort, S. C., by the name of Unity Chapter, which was then confirmed.⁴ The dispensation for this chapter had been issued March 1, 1805.

In consequence of the war with Great Britain there was no meeting of the General Grand Chapter until 1816, which was the fourth, being a special. At the meeting of 1806 a petition for a chapter in Charleston, by Bryan Sweeny and others, was presented and refused, because it was not recommended by any adjacent chapter.⁵

The Grand Chapter for the State of South Carolina was instituted May 29, 1812. We can not find any reference to the organization of the Grand Chapter of South Carolina in the proceedings of the General Grand Chapter; but at the fourth meeting, held

¹ "Compendium of Proceedings General Grand Chapter of United States," p. 8.

³ Proceedings Grand Chapter of New York in "History of Masonry and Concordant Orders," p. 629.

⁴ Proceedings General Grand Chapter, 1806, p. 30.

⁵ *Ibid.*, p. 31.

June 6, 1816, Thos. Smith Webb is reported as *proxy* for Wm. Young, the Grand High-Priest, and Foster Burnet as *proxy* for Benj. Phillips, Grand Scribe; therefore, that Grand Chapter was duly recognized as a constituent of the General Grand Chapter. We must presume that during the war period, as was reported to the General Grand Chapter, "the situation of the country was such at that time as to render it highly inconvenient for the General Grand Chapter to convene."¹ This Grand Chapter was also represented at the meetings held in 1826 and 1829, and not again until 1844, and then not until 1859.

During the years 1861 to 1865 that Grand Chapter refused to withdraw its allegiance: "And, by a resolution adopted in 1861, the oaths of office and of initiation have included allegiance to the General Grand Chapter," was stated with pride, in the sessions of 1862-65 by Albert G. Mackey, General Grand High-Priest and Past Grand High-Priest of the Grand Chapter of South Carolina.²

South Dakota.

When it was decided by the chapters of Dakota Grand Chapter to organize two Grand Chapters, viz., for North and South Dakota, a convention was held by all the chapters located in South Dakota.

There were present the representatives of the following chapters, viz.: Yankton, No. 1, at Yankton; Aberdeen, No. 14, at Aberdeen; Mitchell, No. 16, at Mitchell; Brookings, No. 18, at Brookings; Orient, No. 19, at Flandreau; Rabboni, No. 23, at Webster. Companion Theodore S. Parvin was present, and by authority of a dispensation issued to him, as Deputy, by General Grand High-Priest Noble D. Lerner, which was confirmed by the then General Grand High-Priest David F. Day, he constituted the Grand Chapter of South Dakota in ample form.

Tennessee.

March 2, 1818, the General Grand High-Priest issued a dispensation to Cumberland Chapter, in Nashville, Tenn.,³ which received a Charter at the session of the General Grand Chapter, September 11, 1819.⁴

¹ Proceedings General Grand Chapter, 1816, p. 41.

² *Ibid.*, 1865, p. 11.

³ *Ibid.*, 1819, p. 60.

⁴ *Ibid.*, p. 60.

At the meeting held September 15, 1826, it was reported that dispensations had been issued to the following chapters, viz.: Franklin Chapter, at Franklin, March 25, 1824; Clarksville Chapter, at Clarksville, December 11, 1824; LaFayette, at Columbia, January 5, 1825. At the same session charters were ordered to be issued.¹ At the session September 16, 1826, the Grand Chapter of Tennessee was regularly recognized as having been duly organized and constituted,² and became a constituent of the General Grand Chapter.

Texas.

At the meeting of the General Grand Chapter, held December 8, 1835, an application was made by Comps. Samuel M. Williams, James H. C. Miller, and others associated with them, for a Charter to constitute a chapter of Royal Arch Masons in Texas.³ The committee, to whom this was referred, recommended, December 9th, that a Warrant or Charter be issued to them by the name of San Filipe de Austin, Royal Arch Chapter, No. 1.⁴

At the meeting held in 1850, Austin Chapter, No. 6, petitioned to have the name changed to Lone Star, No. 6.

At the meeting of General Grand Chapter, September 14, 1850, the following chapters received charters, the General Grand King having reported that dispensations had been issued to them by him, viz.:

Name.	Dispensation Issued.	Charter Granted.	Place.
Washington Chapter, No. 2.	May 5, 1848	September 12, 1850 ...	Houston.
Jerusalem Chapter, No. 3....	March 10, 1849.....	Dispensation continued	Anderson.
Trinity Chapter, No. 4	March 14, 1848.....	Dispensation continued	Crockett.
Brenham Chapter, No. 5....	April 14, 1849	September 12, 1850 ...	Brenham.
Austin changed to Lone Star } Chapter, No. 6.	April 14, 1849	September 12, 1850 ...	Austin.
San Jacinto Chapter, No. 7..	January 22, 1850..	Dispensation continued	Huntsville.
Washington } changed to } Brazos } Chapter, No.8.	No date, 1850	September 13, 1850 ...	Washington.
Rising Star Chapter, No. 9..	February, 1850	September 14, 1850 ...	San Augustine. ⁵

Those chapters in the above table having their dispensations continued were recommended and authorized to surrender them,

¹ Proceedings General Grand Chapter, 1826, p. 78.

² Ibid., p. 82.

³ Ibid., 1835, p. 129.

⁴ Ibid., p. 133.

⁵ Ibid., 1850, pp. 252, 257, 258, 268, 272.

and receive charters from the Grand Chapter of that State, if one be organized previous to the next meeting of the General Grand Chapter.

"The First Grand Chapter of the Republic of Texas was formed by a convention of Royal Arch Masons, delegates from San Filipe de Austin Chapter, of Galveston; Cyrus Chapter, of Matagorda; Lone Star Chapter, of Austin, and Rising Star Chapter, of San Augustine. The Convention met in the city of Austin on the 14th of December, 1841."¹

The Grand Chapter was organized and the constitution adopted. San Filipe de Austin Chapter declined to sign the constitution and withdrew from the convention. The constitution was adopted and ratified on December 21, 1841. It was signed by B. Gillespie, Grand High-Priest, and attested by H. W. Raglin, Grand Secretary. Compn. George Lopas, the Grand Secretary of the Grand Chapter of Texas, in 1895, was instructed to prepare a reprint of the proceedings of the Grand Chapter, which he accomplished, and the valuable results of his labors appear in two beautiful volumes» from which we are enabled to gain all the information as to the condition of capitular Masonry in the State of Texas.

It is probable that no convocation was held in 1842. The proceedings of 1844 to 1849 included, as also the original constitution, were printed and given *verbatim* in the reprint. The Grand Chapter met in 1848, but the proceedings were not printed.

When, "for the sake of peace and harmony among the Craft," this Grand Chapter was dissolved, there were nine chapters, viz.: Cyrus, No. 1, at Matagorda; Lone Star, No. 3, at Austin; Rising Star, No. 4, at San Augustine; Washington, No. 5, at Washington; De Witt Clinton, No. 6, at Clarksville; Jerusalem, No. 7, at Alta Mira (Fanthorp's); Houston, No. 8, at Houston; Brenham, No. 12, at Brenham, and Trinity, No. 13, at Crockett. The compiler, Compn. Lopas, was unable to account for the missing Nos. 2, 9, 10, 11, and was unable to learn of their names or locations.²

The chapter San Filipe de Austin, No. 1, to be located at San Filipe de Austin, in consequence of unforeseen events was never opened at that place, but was opened at Galveston, June 2, 1840, four years and a half later. This was reported to the General Grand

¹ "Historical Sketch," by George Lopas, Grand Secretary, 1897, p. 3.

² *Ibid.*, p. 3.

Chapter in 1844, and, on September 12th, by a resolution adopted, the removal was approved.¹

A certain Scotchman, Dugald McFarlane, organized a chapter in Matagorda, in 1837, and named it Cyrus Chapter, having neither Warrant or Charter. Doubts having arisen as to its legality, in 1841, they petitioned the Grand Lodge of the Republic of Texas for a dispensation to open a chapter. A dispensation was issued to them December 10, 1841. At the same time dispensations were also issued to Rising Star Chapter, at San Augustine, and Lone Star Chapter, at Austin.²

After the organization of the Grand Chapter they addressed a memorial to the Grand Lodge of Texas, and after setting forth certain reasons therefor, respectfully asked the Grand Lodge "to relinquish and surrender all jurisdiction and control over the Royal Arch Chapters and Royal Arch Masons in the Republic of Texas upon the surrender of the dispensations heretofore granted by your worshipful body."³

This was granted by the Grand Lodge of Texas.

All the irregularities of these chapters in Texas in the early years were respectively cured by the action of the General Grand Chapter in the one case of San Filipe de Austin Chapter, and the Grand Lodge of the Republic of Texas as to the other chapters.

The General Grand Chapter, however, did not recognize the Grand Chapter of Texas as having been regularly constituted, as they had not asked permission to organize from that body, and the General Grand Chapter decided to suppress it by mild means. In 1847 they passed a resolution forbidding Royal Arch Masons under that jurisdiction from holding Masonic intercourse with the Grand Chapter of Texas, its subordinates, and those acknowledging its authority.

"At the formation of the Grand Chapter of Texas in the city of Galveston, December 30, 1850, the following chapters were represented: San Filipe de Austin, No. 1, chartered by the General Grand Chapter, December 9, 1835; Washington, No. 2, Brenham, No. 5, and Brazos, No. 8.

"Of the Chapters organized by authority of the General Grand Chapter, all but San Filipe de Austin, No. 1, surrendered their au-

¹ Proceedings General Grand Chapter, p. 191.

² "Ruthven's Reprint," p. 101.

³ *Ibid.*, vol. i., p. 112.

thority from the General Grand Chapter to the Grand Chapter of Texas, and received their charters, dated June 25, 1851, and signed by the Grand Officers elected at the second annual convocation in the town of Huntsville, June 24, 1851."

"San Filipe de Austin, No. 1, never received a charter from the Grand Chapter of Texas until June 22, 1860."

"Many of the Companions who belonged to Chapters under the First Grand Chapter of the Republic of Texas, believing the action of the General Grand Chapter in regard to Royal Arch Masonry in Texas unwarranted and unjust, refused to be 'healed' under the new organization, and were thereby debarred from enjoying the privileges for which they had worked so earnestly and long. Others accepted the situation until such time as they should be able to sever an alliance that was unsought and always distasteful."

"The time came in 1861, when, on the 17th of June, the Grand Chapter adopted the following resolution:

"Resolved, That all connection between this Grand Chapter and the General Grand Chapter of the United States is dissolved and forever annihilated by the separation of our State from that government."¹

The Grand Chapter of Texas has steadily refused all overtures from the General Grand Chapter to return to the fold from which she withdrew in 1861. "*Tempus aliiit omnia*" (Time cures all things), and we feel assured that, with the passing away of the present generation, with its prejudices, so will pass away that feeling in the Grand Chapter of Texas which now keeps her out of the fold, especially as some of her best members never left the General Grand Body.

Utah.

December 13, 1872, Utah Chapter, No. 1, Salt Lake City, had a dispensation issued, and a Charter was granted November 25, 1874.² A dispensation was issued for Ogden Chapter, No. 2, at Ogden, March 11, 1881; and Ontario, No. 3, at Park City, October 26, 1882; and charters to these two were granted August 15, 1883.³ Utah has no Grand Chapter, and is under the control of the General Grand Chapter.

¹ "Historical Sketch," p. 7.

³ Proceedings General Grand Chapter, 1874, p. 56.

³ *Ibid.*, 1883, pp. 96, 97.

Vermont.

The first notice of Royal Arch Masonry we have is in the proceedings of the General Grand Chapter, at its third regular meeting, held January 9, 1806, where it is stated that a communication from Rutland in the State of Vermont, signed by Nicholas Goddard, Grand Secretary, was presented, informing the General Grand Chapter of the formation of the Grand Royal Arch Chapter in the State of Vermont, etc.¹ At this first day of the meeting the General Grand Chapter, by resolution, admitted the said Grand Chapter of Vermont into union with that body.²

From the records of the Grand Chapter of New York we learn that a Warrant for a Mark Master Mason's Lodge was granted at Bennington, January 30, 1799. Also that the Deputy Grand High-Priest issued a dispensation to Jerusalem Chapter, in Vergennes, March 25, 1805; and the Grand Chapter granted it a Charter, February 5, 1806.³

A Grand Chapter was organized in Vermont, December 20, 1804, but there is no record to be found when, nor by whom, Royal Arch Masonry was introduced into the State. From the proceedings of the Grand Chapter of New York we also learn that in February, 1805, the matter of the formation of a Grand Chapter in Vermont was under consideration, and it was the opinion that there ought to be at least three regular Royal Arch Chapters to form a Grand Chapter, and also they say that "your Committee have had authentic evidence from respectable sources, that there were but three members at the formation of the aforesaid Grand Chapter."⁴

A protest was made against the effort to form the Grand Chapter; nevertheless we find that the General Grand Chapter did recognize the organization of that Grand Chapter, as above stated.

The last annual convocation was held in 1832, six years after the great anti-Masonic excitement commenced, Compn. Nathan B. Haswell (Blessed be his memory) being then Grand High-Priest, who also was present at the triennial convocation of the General Grand Chapter in 1832. At the session of 1844 Compn. Haswell said:

"At the last triennial meeting of your body in New York I had

¹ Proceedings General Grand Chapter, 1806, p. 39.

² *Ibid.*, p. 29.

³ "History of Masonry and Concordant Orders," p. 633.

⁴ *Ibid.*, p. 633.

the honor to present a communication giving an account of the state of Masonry in Vermont. In accordance with a duty I owe the fraternity and in behalf of many good and true Masons in my State I have now further to report that nothing has occurred since that period to warrant the resuming of our Masonic labors.

"In no State of our Union has the anti-Masonic spirit gained so strong a foothold as in Vermont. Although she has been divested of the political power that for years worked her curse, still her old leaders continue restless and troublesome; and under the abolition excitement which now pervades the State they still exert a secret influence hostile to our institution, which time, patience, and perseverance can alone conquer.

"Mortifying and unpleasant as it is to be compelled by the continued force of circumstances to suspend our Masonic labors, prudence dictates a course so important to the well-being and future welfare of the whole fraternity.

"We look forward, however, to a period when we can peacefully resume them and when public opinion shall do us justice, and sanction a course thus adopted; then shall our obscure but not lost Pleiad again break forth, diffusing new light and heat, in the Masonic Constitution [Constellation perhaps].¹

"We now ask your fraternal advice in our difficult movements. And in behalf of the Companions and brethren in Vermont, whose fidelity has never been shaken, I submit this report.

"NATHAN B. HASWELL,
"High-Priest and Grand Master"

In February, 1848, Jerusalem Chapter, No. 2, was reopened by a dispensation from the General Grand Scribe. The Grand Lodge of Vermont was revived in 1847; and soon following this event the Companions of the Grand Chapter made a movement toward the revival of the Grand Chapter, and under the direction of Companion Haswell, who was the last Grand High-Priest, and sanctioned by the Deputy-General Grand High-Priest, the Grand Chapter was reorganized July 18, 1849.

There were three chapters which took part in the reorganization: Jerusalem, No. 2, at Vergennes; Burlington, No. 12, at Burlington; and LaFayette, No. 15, at East Berkshire.

¹ Proceedings of General Grand Chapter, 1844, pp. 183, 184.

In October, 1849, the Grand High-Priest granted a renewal of the Charter to Champlain Chapter, at St. Albans.

June 19, 1850, an attested copy of the original Charter of this chapter was shown in the Grand Chapter with proof of original Charter having been destroyed by fire. Champlain Chapter paid \$25, under the ruling, and was revived and represented at that grand convocation.¹

Since that period the Grand Chapter has continued to be represented in the General Grand Chapter.

Virginia.

The introduction of Royal Arch Masonry into Virginia in 1753 was no doubt similar to its introduction into Pennsylvania and other States north of it, by means of Royal Arch lodges, so-called, because the Royal Arch degree was permitted to be conferred under the lodge Charter, and we have recently seen the discovery by Bro. S. J. Quinn, of Fredericksburg, of the fact that in that ancient town there was such a lodge, in which the Royal Arch degree was conferred, earlier than in any other place in the colonies; and very soon after that degree had been introduced into the work of the lodges in England.

It has been said, by others, that the introduction of the Royal Arch degree into Virginia was by Bro. Joseph Myers, who was the successor of Da Costa, who had opened, under the authority of Bro. Michael Moses Hayes, a Sublime Grand Lodge of Perfection in 1783, at Charleston, S. C. Bro. Myers subsequently settled in Richmond, Va., and then and there introduced the Holy Royal Arch of the Ancient Accepted Scottish Rite, which was taught in Virginia until 1820, when the ritual of the English degree was adopted, whose officers consisted of High-Priest, King, and Scribe, while the former were High-Priest, Captain of the Host, and Captain General.

Bro. John Dove, in his history of the Grand Chapter of Virginia, uses the following language:

"Royal Arch Masonry was taught and practiced in this State during the latter part of the last century, under the authority of a Master's Warrant, until the want of some specific legislation seemed

¹ "History of Masonry and Concordant Orders," p. 633.

evidently indicated for the internal government of the Royal Arch Chapters, which were then growing in number and increasing in members."

This was in the early part of 1806, and from his acknowledged intellectual ability, in connection with the record of his constant attendance at every meeting of the Grand Chapter of Virginia from December 17, 1818, to December 17, 1868, he was well qualified to decide with authority. In discussing the matter of substitutes he said: "We have been in the constant use of them since 1792, and have as yet seen no evil result therefrom."

From the date above mentioned by Comp. Dove, viz., 1792, when the Royal Arch was conferred, we may be safe in our statement that as early as 1792 Royal Arch Masonry was practiced in Virginia. We also, from his statement, may be assured that in Virginia the degree of Past Master was in the chapter series and had been in Virginia since 1790, and whatever may have been the full ritual under lodge warrants, it was practiced until 1820.

At a convocation of the Grand Chapter of Virginia, held January 7, 1820, it was "*Resolved*, That our enlightened Companion, James Cushman, H.-P. of Franklin Chapter, No. 4, Connecticut, be requested to exemplify the mode of work at present adopted by the General Grand Chapter of the United States, it appearing from his credentials that he is fully competent."

On January 18, 1820, the degrees of Mark Master, Past Master, Most Excellent Master, and Royal Arch Mason were exemplified by him and after "most solemn deliberation" were adopted, "that harmony and unity should prevail throughout the Masonic world, and more especially the United States."

From 1820 until December 17, 1841, the council degrees of Royal and Select Masters were controlled by a Grand Council. At the latter date, by mutual agreement, these degrees were placed under the control of the Grand Chapter, and the following resolutions give the order of succession:

"*Resolved*, That hereafter the degrees in subordinate chapters be given in the following order, to wit: Mark Master, Past Master, Most Excellent Master, Royal Master, Select Master, and Royal Arch." May 1, 1808, the Grand Chapter of Royal Arch Masons of Virginia was established, in compliance with a proposition from a convention held in "Norfolk Borough," when it appeared that the

"Grand United Chapter of Excellent and Superexcellent Masons of Norfolk had proposed to the Royal Arch Chapters of Richmond, Staunton, and Dumfries to establish a Supreme Grand Royal Arch Chapter for the State of Virginia."

This movement was entirely independent of the General Grand Royal Arch Chapter of the United States, and that Grand Chapter has always held aloof from the General Grand Body.

The Supreme Grand Chapter established Magnolia Chapter, No. 16, at Appalachicola, and Florida Chapter, No. 32, at Tallahassee, Fla., which united with the other chapters in Florida in forming the Grand Chapter of that State.

Washington.

November 1, 1869, a dispensation was granted to Seattle Chapter, No. 1, in Seattle.¹ A dispensation was granted to Walla Walla Chapter, No. 2, in Walla Walla, February 13, 1871. Charters were granted at the meeting of General Grand Chapter, September 20, 1871.²

From difficulties encountered within the first chapter it did not succeed, and its Charter was suspended by the General Grand High-Priest, May 25, 1873, and reported by him at the meeting held November 24, 1874.³ The report of the committee to whom this action had been referred, as also a memorial from members of that chapter, recommended that the action of the General Grand High-Priest be approved; and that the memorial be referred to that officer with power to restore or arrest the Charter of said chapter, as in his judgment he may deem best for the interest of Royal Arch Masonry.⁴

On August 27, 1880, the Charter was declared forfeited and that number (1) of said chapter be assigned to Walla Walla Chapter.⁵

A dispensation was granted to Spokane Chapter, No. 2, at Spokane Falls, November 1, 1881; and one to Seattle, No. 3, at Seattle, January 2, 1883. At the meeting August 15, 1883, charters were granted to both of these chapters.⁶

A convention having been called to meet at Spokane Falls, June 6, 1884, the General Grand High-Priest decided that a letter of ap-

¹ Proceedings Grand Chapter, 1871, p. 33.

² Ibid., p. 33.

³ Ibid., 1874, p. 15. ⁴ Ibid., p. 55. ⁵ Ibid., 1880, p. 69. ⁶ Ibid., 1883, p. 97.

proval should first have been obtained before holding a convention, and gave his authority to hold a convention at Walla Walla October 2, 1884.¹ (May 10, 1884, the General Grand High-Priest had granted a dispensation to Tacoma Chapter, No. 4, which by order passed to the jurisdiction of the Grand Chapter.)

This convention was held at that date by the three chapters above mentioned.

West Virginia.

After the State of West Virginia was erected and the Grand Lodge of the new State had been regularly organized, May 11, 1865, the Companions of the various chapters, numbering nine, who were under the Constitution of the Grand Chapter of Virginia, deemed it proper to follow the example of the lodges, and organize a Grand Chapter for the new territory. This movement started in Wheeling Union Chapter, No. 19, Wheeling. A memorial was issued by Wheeling Union Chapter, which sought permission to organize a Grand Chapter for the State. The following chapters approved the memorial: Jerusalem Chapter, No. 55, in Parkersburg, November 17, 1870; Star of the West Chapter, No. 18, at Point Pleasant, November 21, 1870; and Nelson Chapter, No. 26, at Morgantown, November 30, 1870. The Grand Chapter of Virginia took action upon the memorial, December, 1870, and gave consent, "upon the same terms and conditions, and with the same limitations, as the consent of the Grand Lodge of Virginia was given to the formation of a Grand Lodge for the State of West Virginia."

A convention was held November 16, 1871, in Wheeling, and the four chapters above mentioned were represented by their delegates; in addition to these were delegates from Lebanon Chapter, No. 9, at Martinsburg. The Grand Chapter of West Virginia was duly and constitutionally instituted, the Grand Officers were chosen and installed by Most Excellent John P. Little, Grand High-Priest of the Grand Chapter of Virginia, who took occasion to warn the Companions against a union with the General Grand Chapter.² This warning, like that which oftentimes only excites the curiosity

¹ Proceedings Grand Chapter, 1886, p. 20.

² "Masonic History of Concordant Orders," p. 636.

of the *Warnee*, has had the effect of bringing the Grand Chapter of West Virginia into the fold, which we trust will be followed by the Mother of the Old Dominion.

Wisconsin.

The Deputy-General Grand High-Priest, at the triennial meeting of the General Grand Chapter held September 10, 1844, reported having granted a dispensation to two chapters in Wisconsin Territory, viz.: February 16, 1844, to Milwaukee, No. 1; and Washington, No. 2, in Platteville, July 2, 1844.¹ At the meeting September 14, 1847, the same officer reported having issued a dispensation to Southport Chapter, No. 3, in Southport (no date);² and also that his proxy had consecrated Washington Chapter, No. 2, at Platteville, a Charter having been granted to said chapter, September 11, 1844.³ A Charter was granted to Southport, No. 3, at the meeting held September 17, 1847.⁴

By authority of the Deputy-General Grand High-Priest under date of January 10, 1850, a convention was held in Madison of the delegates of the three chapters, and the Grand Chapter of Wisconsin was duly constituted, February 14, 1850.

The Deputy-General Grand High-Priest having received officially the printed proceedings and grand constitution under date of July 5, 1850, he authorized Argulus W. Stark to install the Grand Officers, which was done August 7, 1850.

Wyoming.

At the triennial meeting of the General Grand Chapter held September 19, 1871, the General Grand High-Priest reported that he had issued a dispensation to a constitutional number of Companions to form a chapter at Cheyenne, Wyoming Territory, under the name of Wyoming Chapter, No. 1,⁵ which was chartered, September 20, 1871.⁶

Evanston Chapter, No. 2, at Evanston, received a dispensation dated April 25, 1876;⁷ and Lebanon, No. 8, at Laramie City, had

¹ Proceedings of General Grand Chapter, 1844, p. 182.

³ *Ibid.*, 1844, p. 185, note.

⁴ *Ibid.*, 1847, p. 228.

⁵ *Ibid.*, 1871, p. 15.

⁶ *Ibid.*, p. 33.

⁷ *Ibid.*, 1877, p. 92.

a dispensation granted March 15, 1877; and these two had charters granted August 24, 1877.¹

Garfield Chapter, No. 4, at Rawlins, had a dispensation issued March 25, 1884; and a Charter granted October 1, 1886.² These chapters are under the immediate jurisdiction of the General Grand Chapter, never having organized a Grand Chapter.

CHRONOLOGICAL MEMORANDA OF IMPORTANT TRANSACTIONS OF THE GENERAL
GRAND CHAPTER.³

October 24, 1797.—Preliminary meeting of three chapters in Boston, Mass.

January 24, 1798.—Organization of the "Grand Royal Arch Chapter of the Northern States of America."

September, 1798.—First meeting after organization for the choice of Officers.

January 9, 1799.—Adjourned meeting; change of name to that of General Grand Royal Arch Chapter of the Northern States of America.

January 9, 1806.—Change of name to that of General Grand Chapter of Royal Arch Masons for the United States of America. September, 1812, was, by resolution, fixed as the time, and New York City as the place, for the next Septennial Session.

June 6, 1816.—Held in New York City, by reason of failure to meet in 1812. Constitution changed, so as to have a Deputy General Grand High-Priest.

September, 1819.—Held agreeably to adjournment.

February, 1823.—Adjournment was to Washington, District of Columbia, at this time, but not held.

September, 1826.—Met according to previous notice. Meetings made triennial.

November, 1832.—Held in this month on account of cholera in Baltimore during September.

September, 1862.—Appointed to meet at Memphis, Tenn., but not held on account of Civil War then prevailing.

September, 1871.—Constitution amended, admitting Past Grand High-Priests as permanent members.

November, 1874.—Constitution amended, making the first four Past General Grand Officers permanent members.

October 13, 1897.—Centennial Celebration at Baltimore, Md.

CHAPTER LVII

HISTORY OF THE INTRODUCTION OF FREEMASONRY INTO EACH STATE AND TERRITORY OF THE UNITED STATES

The Cryptic Degrees

IN the *Freemason's Library and General Ahiman Rezon*, by Samuel Cole, P. M., published in Baltimore in 1826, we find a list of forty-three degrees which was taken from a "late publication, 1816," which the author states are conferred in the Sublime Grand Lodges in Charleston, S. C, in the city of New York, and in Newport, R. I., which we have heretofore quoted.

"Besides those degrees, which are in regular succession, most of the Inspectors are in possession of a number of detached degrees, given in different parts of the world, and which they generally communicate, free of expense, to those brethren who are high enough to understand them. Such as Select Masons, of 27, and the Royal Arch, as given under the Constitution of Dublin, etc., etc."

In a description of the degree of Select Master, the writer says: "There is reason to believe that this degree was in use long before those of Most Excellent or Mark Master."¹

It is well enough to quote from the charge to a Select Master, to indicate its proper place in the "curriculum" of the degrees: "Companion—Having attained to this degree, you have passed the *circle of perfection* in Ancient Masonry."²

This indicates that the Select degree closed all the degrees appertaining to the "Secret Vault," as it really did, up to 1826 at least.

The edition of the above work of 1817 contains an article by Hezekiah Niles on the Select degree, in which he says: "Though this beautiful Degree is known to some persons in many parts of the

¹ "Freemason's Library," Cole, p. 220.

² *Ibid.*, p. 223.

United States, we are not informed that it is worked anywhere but in Baltimore. We have been told that a regular Chapter of Select was held at Charleston, S. C, many years ago, but believe it has declined."¹

Bro. John Dove, of Virginia, says: "This beautiful Degree is comparatively of Modern Origin, having been, with the Degree of Royal Master, in the possession of a distinguished Chief, in the State of Maryland, as a purely honorary Degree, elucidatory of, and appendent to Royal Arch Masonry, and by him conferred without fee; he delegated authority to others, to use them, in the same way, until the year 1824, when the Grand Chapter of Maryland, with his consent, took charge of the Degrees, and ordered them to be given before the Most Excellent Master; where all intelligent workers in the Royal Arch must at once perceive the propriety of their location."²

Brother A. G. Mackey says: "For many years there have been three distinct claims urged for jurisdiction over these degrees, in America—first, by the Supreme Council of the 33d Degree; next by some of the Grand Chapters; and lastly by the Grand Councils, composed of the subordinate Councils of each State."

"Connected with this question of jurisdiction is another in reference to the historical origin of the Degrees, and, as the person or persons, by whom they were first introduced into America. The Masons of Maryland and Virginia contend, that the Royal and Select Degrees were introduced by Philip R Eckel, of Baltimore, one of the most distinguished and enlightened Masons of his day, who, in 1817, communicated them to Jeremy L. Cross, and gave him authority to confer them in every Royal Arch Chapter which he might visit in his official character." This clearly shows that they were to be subsequent to the Royal Arch.

Dr. Robert Folger says: "The Masons of that day (1816) were divided in opinion concerning the proper place to which these degrees (Royal and Select) belonged. One party preferred that they should be kept separate, and left where they were—a separate system."

At the fourth meeting of the General Grand Chapter, June 6, 1816, a discussion took place upon the proposition for the admission of the Grand Chapter of Maryland and the District of Columbia,

¹ Schultz's "History of Masonry in Maryland," vol. i., p. 335.

² *Ibid.*, p. 336.

WILLIAM JAMES HUGHAN

Philip P. Eckel and Benj. Edes being the representatives of that Grand Chapter. We learn from the published minutes of that meeting, that a committee made the following report:

"The undersigned having been appointed a Committee for the purpose of conferring with M.·. E.·. Comps. Philip P. Eckel and Benjamin Edes, delegates of the Grand Royal Arch Chapter of the State of Maryland, beg leave to report that they have had an interview with the above named Companions, from whom they received the following proposition, to wit: The Grand Chapter of the State of Maryland and District of Columbia is willing to support the Constitution of this General Grand Chapter. It will not grant any warrants out of its District and will discountenance all chapters formed contrary to the General Grand Constitution; but requests that it shall not be forced to alter its mode of working, if any difference should exist, at present, and to be received on an equality with the other Grand Chapters.

"Under a consideration of all the above circumstances, your Committee recommend that the said Grand Chapter of the State of Maryland be admitted to an union with this General Grand Chapter.

"(Signed by the Committee).

"The Undersigned, delegates from the Grand Chapter of Maryland and District of Columbia, agree to the above report.

"Signed P. P. ECKEL, G.·. H.·. P.·.

"BENJ. EDES."

This report being read and accepted, it was thereupon voted to receive the said Grand Chapter of the State of Maryland and District of Columbia under the jurisdiction of the General Grand Chapter.¹ Folger, referring to this meeting of the General Grand Chapter, says: "The whole matter then came up for discussion, Mr. Eckel, of Maryland, taking a very prominent part in advocating the Union of these two degrees with the services of the Royal Arch Chapter. The discussion became warm and lasted the better part of two days, when the motion to unite them was rejected. Whereupon, immediately after adjournment, the State Grand Council of Royal Masters was formed, and the different Councils came under that governing power, and continued so up to 1828. It was this move

¹ Proceedings General Grand Chapter, 1816, p. 44.

on the part of the General Grand Chapter, in refusing a recognition of those degrees, that determined Mr. Cross in his future course.

"Mr. Eckel, the Baltimore delegate, then went home; and when Cross, who at that session of the General Grand Chapter had been appointed and confirmed as General Grand Lecturer, started on his lecturing tour, he stopped at Baltimore and purchased and received the privilege from Eckel and Niles to erect and establish councils of Royal and Select Masters throughout the Southern and Western States. This privilege he carried out pretty effectually, beginning with New Jersey; and all the councils in existence in those States, mentioned in his narrative, were established by himself, also the Eastern States, except Rhode Island." Bro. Edw. T. Schultz, in commenting upon what Folger had published as above, said:

"From the above quotations it will be perceived that it was the general belief that the control of the Royal and Select Degrees were vested in Eckel and Niles.

"But we think Bros. Dove, Mackey, and Folger, and others, make a great mistake in coupling the Royal Master's Degree with the Select, in connection with the names of Eckel and Niles; for there is no evidence whatever to show that these Brethren ever exercised or claimed control of the Royal Master's degree, or that they were even in possession of that degree, at the periods named by them."¹

From Bro. Josiah H. Drummond we learn that, on apparently good authority, Eckel did not get the Royal Master's degree until 1819; when he and Benj. Edes, of Baltimore, received it from Ebenezer Wadsworth, of New York. Bro. Schultz thinks "this is probably true, for there is no mention of that degree being worked in this jurisdiction (Maryland) in any document, or upon the records of the Grand Chapter or its subordinates earlier than 1850. Bro. Cole, in 1817, speaks of it incidentally, but not as among the degrees conferred."²

Cole's edition of 1826 (p. 319), says: "Royal Master and Ark Master or Noachite."

These are considered as merely preparatory, and are usually conferred immediately before the solemn ceremony of exaltation.³ It

³ Cole, p. 319.

To all whom it may concern:

Imprest with a perfect conviction that a knowledge of the misteries of the degree of Royal Arch are eminently promoted by a knowledge of those revealed in the Council of Select Masons; and Whereas, the said degree of Select is not so extensively known as its wants and the good of the Craft require.—Therefore Know Ye, That reposing especial confidence in my beloved and trusty Companion, Jeremy L. Cross, I do hereby, by the high powers in me vested, authorize and empower him to confer the said degree as follows (viz.): In any place where a regular chapter of Royal Arch Masons is established, the Officers or Members approving, he may confer said degree according to its rules & regulations, but only on Royal Arch Masons, who have taken all the preceding degrees, as is required by the General Grand Chapter. When a competent number of Select Masons are thus made, he may grant them a warrant to open a Council of Select and confer the degree and do all other business appertaining thereto.

Given under my hand and Seal at Baltimore, the 27th day of May, A. D. 1817, and in the year of the Dis. 2817.

Sigm Philip L. Eckel.

Thrice Illustrious & Grand Lussant in the Grand Council of Select at Baltimore & Approved as G. G. Scribe.

Approved and attested as Ill. in the Grand Council.

H. Wiles.

will be remembered that on page 220 of Cole we quoted him as saying that among those degrees communicated "to those brethren who are high enough to understand them, such as Select Masons of 27" and the Royal Arch, as given under the Constitution of Dublin, etc. This evidently shows that even as late as 1826 these two degrees of Royal and Select were not united; and also, that the Royal Master preceded the Royal Arch; and it was most likely that the Select degree followed the Royal Arch. We show herewith a facsimile copy of the original commission to Jeremy L. Cross, from Eckel and Niles.

The Select degree was recognized by the constitution of the Grand Chapter of Maryland adopted in 1824, but the Royal Master's degree is not mentioned.¹

Bro. Schultz continues: "Furthermore, the Warrant granted to Cross, by Eckel and Niles, a copy of which, taken from a photograph copy of the Original, in the possession of Bro. Wm. R. Singleton, of Washington, is here inserted, and from which it will be seen that the Select Degree alone is mentioned."

In the first warrants issued by Cross under this commission, the Companions were empowered "to form themselves into a regular Council of *Select Masters*" but in the warrants issued by him in 1819 and thereafter, the High Powers in him vested, by the Grand Council at Baltimore, were *enlarged* to include the Royal Master's degree.²

It is well to state that from the action subsequently taken by Grand Chapter of Maryland in 1827, from documents submitted, "upon the subject of the institution of the Select Degree independent of the Grand Royal Arch Chapter," which were referred to a committee, who recommended that a circular be sent to the several Grand Chapters, regarding the matter, and which was adopted. Cross was charged with having abused the "authority delegated or meant to be delegated" to him, and it had been asserted that he had been expelled by the Grand Chapter, but Bro. Schultz assures us that there is nothing in the records to warrant such an assertion.³ Moreover, Cross did not belong to any chapter under the jurisdiction of the Grand Chapter of Maryland.

Cross, it is said, established about thirty-three councils in various

¹ Schultz, p. 338.

² *Ibid.*

³ *Ibid.*

parts of the United States. He also delegated others, with power in like manner to issue warrants for councils of Royal and Select Masters.

"From all that has been stated, it is evident, not only that Eckel and Niles claimed to have had the supreme control and authority over the Select degree, but that this claim was generally regarded valid; and it is equally as evident, we think, that these Brethren never claimed the control of the Royal Master's degree." "It has always been a question of much interest with Masonic writers to know the source whence these Brethren received their authority, and the control of the Select degree. An old document, that most unexpectedly came to the knowledge of the writer about a year ago, settles that question beyond a doubt. It is as follows:

"Whereas, In the year of the Temple, 2792, our thrice illustrious Brother Henry Wilmans, Grand Elect, Select, Perfect Sublime Mason, Grand Inspector General, and Grand Master of Chapters of the Royal Arch, Grand Elect and Perfect Master's Lodges and Councils, Knight of the East, Prince of Jerusalem, Patriarch Noachite, Knight of the Sun, and Prince of the Royal Secret, did by and in Virtue of the powers in him legally vested, establish, ordain, erect and support a Grand Council of Select Masons in the City of Baltimore, and wrought therein, to the great benefit of the Craft, and to the profitable extension and elucidation of the Mysteries of Masonry:—and Whereas, we the subscribers to these presents are by regular succession possessors of all the rights, privileges and immunities and powers vested in any way whatsoever in the said Grand Council of Select Masons, considering the great advantages that would accrue to the Craft, in an extension of the knowledge of the Royal Secret, as introductory to, and necessary for, the better understanding of the Superior Degrees.

"Know all, whom it may concern, that we do hereby authorize and empower our trusty and beloved Companions K. S. . . . K. T. . . . H. A. . . . of the same, to open and to hold a Chapter of Select Masons in the City of Baltimore and under such By-Laws and regulations as may be enacted and established for the government of the same subject to the following general rules and regulations.'" (Which we omit.)

* * * *

From some cause the dispensation was not used, but the fact is fully and emphatically stated by Eckel and Niles, under their hand

and seal, that *they* were, "*by regular succession, possessors of all the rights, privileges, and immunities and powers vested in any way whatsoever in the said Grand Council of Select Masons*" which has been instituted in the city of Baltimore, in the year 1792, by Henry Wilmans, "Grand Inspector General."

"This document, in connection with the Rules and Regulations of the Lodge of Perfection (referred to above), leave no room for doubt that Wilmans was an Inspector of the Rite of Perfection, and that he exercised, in the City of Baltimore, in 1792, the powers claimed by such Inspectors. But from whom did Wilmans acquire his powers of 'Grand Inspector General,' and the authority 'to establish, ordain, erect and support a Chapter of Select Masons?'"

"We regret that we can not answer the question, nor could the learned Brethren in various parts of the country, to whom we applied. The name of Wilmans does not appear upon any register or document in the archives of the Supreme Council of the Southern Jurisdiction, or upon any other known document or record containing the names of the early Inspectors. From the fact that in both the documents he is styled 'Grand Inspector General,' while those deriving their powers from Morin are styled 'Deputy Inspectors,' led to the supposition that he might have derived his powers from Europe; acting upon which supposition, letters were addressed to the Grand Lodges at Berlin and Bremen. While the result of the correspondence, which ensued, was of an interesting nature, nothing in regard to his Masonic character could be learned.

"It has been ascertained that Wilmans was a native of Bremen, and that he emigrated to this country as early at least as the year 1790, and settled in Baltimore. The first mention of his name, on the records of the Grand Lodge, is in connection with Concordia Lodge, in 1793, of which he was appointed the first or Charter Master. In the same year he was elected Deputy Grand Master, and in the following year, Grand Master of Masons in Maryland. The register of the Old Zion Lutheran Church, of this city, shows that he died in 1795."

"In a MSS. book of Moses Holbrook, of South Carolina, written in 1829, it is stated that Joseph Myers, a Deputy Inspector General, deposited in the year 1788, in the archives of the Grand Council of Princes of Jerusalem at Charleston, 'a certified copy of the Royal and Select Master's degrees received from Berlin.'"

"This is evidently an error, so far as it relates to the Royal Master's degree. As intimated, the degree was first known in the Eastern States, and the earliest *reliable* mention of it there, is in the year 1809." "Bro. Holbrook wrote his book in 1829, at which time both degrees were conferred at Charleston, and naturally he connected the two in his statement, making a similar error that others do, when stating that Eckel and Niles claimed the control of the Royal Master's degree. The book referred to contains also the statement, that somewhere about the year 1788, Joseph Myers was for a time located at Baltimore."

"Did Wilmans receive the Select degree from Myers, or did Myers receive it from Wilmans?"

"If the degree came from Berlin, it is quite probable that Wilmans brought it with him, as he came from Germany, about the time mentioned for the deposit, in the MSS. of Holbrook."

"There is a tradition existing in the Eastern States, that Eckel received the degree from a Prussian, temporarily sojourning in Baltimore. The period of Wilmans' residence in Baltimore was perhaps not over eight years, and with some propriety, he might have been regarded as a sojourner—and a Prussian."

"It is stated, but upon what authority we know not, that the Royal and Select degrees were conferred by Andrew Franken at Albany in 1769, and that he conferred them upon Samuel Stringer, who afterwards removed to Maryland; but we have not been able to find this name upon any of the records of this jurisdiction."

"These statements or traditions, it will be seen, all point to Maryland as the source from whence the select degree, and (as the writers will have it) Royal Master's degree also, were subsequently introduced into other parts."¹

Folger says Eckel, at the session of the General Grand Chapter, advocated the Union of the degrees with the services of the Royal Arch Chapter."

"From 1824 to 1852, the Select degree only was worked in the chapters in Maryland and District of Columbia. After 1852, both degrees were worked in Councils specially convened for the purpose, after the Most Excellent and prior to the Royal Arch."²

The true history of the origin and progress of the Cryptic Rite

¹ Schultz, "History of Maryland," vol. i., pp. 335 to 344.

² *Ibid.*, p. 344.

in the several States, if it were possible to produce it, would prove of great interest to the Masonic student.

From the preceding pages, taken mostly from the labors of Companion Edw. T. Schultz in his valuable *History of Masonry in Maryland*, we learn that, while the degrees of Royal Master and Select of Twenty-seven may have been conferred in various places prior to 1792, yet we must concede that the organization of the Council of Select Masons in Baltimore by Philip P. Eckel and Hezekiah Niles, under the sanction of Henry Wilmans, was the very first organized effort to propagate the rite in this country. Companion Schultz has shown, very clearly, that we can not go beyond the date of that organization, so far as any ancient records have been discovered.

After Companion Jeremy L. Cross had been appointed the Grand Lecturer of the General Grand Chapter, at the session of 1816—we learn, from several sources, that Cross went to Baltimore in 1817—and there, no doubt, was initiated into the degree of Select Master and received the Warrant from Eckel and Niles which is referred to on the preceding page (1552) of this chapter. A photograph copy of the original is in the possession of the present writer. This photo copy was submitted to the daughter of Bro. Eckel, who was the wife of Brother, Hon. Elijah Stansbury, Ex-Mayor of Baltimore, and they both certified that they recognized his signature; and, moreover, sent the writer an original letter written by Bro. Eckel in 1819. These evidences were submitted to *experts* in handwriting, and the certificate to Cross was pronounced a forgery; because the real later signature was of so much better caligraphy than the signature in the suspected paper, as, according to the expert's idea, it should not have been better, being two years older!!! The writer has in his possession several other papers signed by Eckel, and in no two of them do his signatures correspond. Our duty as a historian requires this statement to be made. Our own opinion is yet, that the document shown by Cross was a veritable commission from Eckel and Niles to propagate the degree, and the Masonic World should be glad thereof; as by his means, the rite spread rapidly in the South and West. The writer was made a Royal and Select Master, in one of Cross's councils, in St. Louis, Mo., in 1841, about the time the Grand Council of the State was organized, as he then copied their records

into the record-book. The Grand Chapter of Maryland, having incorporated the Select degree into the chapter work in 1824, in 1828 that Grand Chapter sent communications to other Grand Chapters suggesting the propriety of the several Grand Chapters in the United States assuming jurisdiction over the degrees of Royal and Select Masters.

In the Grand Chapter of South Carolina, this matter was referred to a committee, who reported February 26, 1829, which report was unanimously adopted by the Grand Chapter:

"That Committee, after extensive and careful investigation, reported, that in February, 1783, Dr. Dalcho and many others received those degrees in Charleston in the sublime Grand Lodge of Perfection, then established in that city. That when the Grand Council of Princes of Jerusalem was established in Charleston, February 20, 1788, Joseph Myers, one of the Deputy-Inspectors who established it, deposited in the Archives certified Copies of the degrees of Royal and Select Masters from Berlin in Prussia, to serve for the future guidance and government of that new body. That from 1788, the Grand Officers and Supreme Council of Inspectors-General, at Charleston, had been steadily in the habit of conferring these degrees; and in 1828, numbers of councils of Select Masters were acting under their authority in the Southern and Western States.

"The Committee had seen and perused the first copy of those degrees that ever came to America, and old copies of Charters that had been returned by Councils, in States where Grand Councils had been formed, and Charters obtained from such Grand Councils. And the Committee reported, that these degrees had been under regular and independent Masonic protection and authority for more than forty-six years, and were so circumstanced in the United States, at a period long prior to the establishment of Grand or General Grand Royal Arch Chapters, or even of Chapters of Royal Arch Masons, in any part of the world; and that the Grand Chapter of South Carolina ought to avoid all collision with contemporary Masonic jurisdictions, regularly established, and much longer in existence than their own; and so reported a formal resolution (which the Grand Chapter unanimously adopted) that it was 'improper and inexpedient to assume a jurisdiction over the said degrees, and thus to interfere with the rights and privileges of our brethren in another and higher order of Freemasonry.'

"Of the Illustrious brothers Myers, Spitzer and Forst, that Committee said, 'the above named three respectable Brethren and Companions are, and steadily have been, Members and Officers of the said 'Council of Princes of Jerusalem. Their evidence therefore, must be conclusive upon these points.'

"The same Committee (Royal Arch Masons, be it observed, and a Committee of a Royal Arch Chapter, enquiring into its own jurisdiction) said of the Brothers and Companions, Dr. F. Dalcho, Dr. Isaac Auld, Dr. James Moultrie, Senior, and Moses C. Levy, Esq., who received these degrees in Charleston in 1783, from the sublime Grand Lodge of Perfection: 'Three of the above named Brothers are still living, venerable for their years and warm attachment to the glorious cause of Freemasonry, and highly respected and esteemed for their standing in the community where they have so long honorably sojourned, and they are still members of the same Sublime Body.' There is still further testimony to be adduced. The report to the Grand Chapter, which we have quoted, was made by Compn. Moses Holbrook, its Chairman, and unanimously adopted; the Grand Chapter thus affirming the veracity of the Masonic Witnesses, whose testimony was adduced. In 1830 the same Compn., Holbrook, was M. . P. . Grand Commander of the Supreme Council of Sovereign Grand Inspectors General of the 33° for the Southern Jurisdiction of the United States at Charleston.

"In February, A. I. 2383, the M. . E. . G. . High-Priest of the Grand Chapter of South Carolina, John H. Honour, who was then and still is (1853) M. . P. . W. . Commander of the Sup. . Council, S. . G. . I. . G. . of 33°, for the Southern Jurisdiction of the United States at Charleston, stated in his address to the Grand Chapter, that he had in his possession a manuscript copy of the degrees of the Royal and Select Masters, in which there was a note in the handwriting of Brother Holbrook dated March 15, 1830, in these words: 'In Brother Snell's book is written the following:

" 'Supreme Council Chamber, Charleston, S. C, 10th Feb., 1827.

" I hereby certify that the detached degrees, called Royal and Select Master, or Select Masters of 27, were regularly given by the Sublime Grand Lodge of Perfection (No. 2 in the U. S. A.), established by Brother Isaac Da Costa, in Charleston, in Feb., 1783, one of the original Members of which Most Illustrious Brother

Moses C. Levy, is still alive and a Member of it to this day, without ceasing to be so for a day; and further, that at the first establishment of a Grand Council of Princes of Jerusalem, in Charleston, February, 1788, by the Ill.. Dep.. Inspectors General, Joseph Myers, B. M. Spitzer, and A. Forst, Brother Myers (who succeeded Brother Da Costa after his decease) deposited a certified copy of the Degrees from Berlin, in Prussia, to be under the guidance and fostering protection of the government of the above Grand Council of Princes of Jerusalem.'

"Brother Myers shortly after this (Feb. 20, 1788,) resided some time in Norfolk, Richmond, and Baltimore, previous to his removal to Europe, and he communicated a knowledge of these degrees to a number of brethren in those cities. The original copy is still in my keeping, and agreeably to the obligations of the same, and the Grand Constitutions governing those degrees, viz.: Royal and Select Mason of 27, it is correct and lawful to give them either to Sublime Masons, who have arrived to the Knights of the Ninth Arch (13th) or to the Companions of the 3d Arch (Royal Arch Masons)."

From this statement, of those who held the control originally, it will be observed that it was the design, always, to confer, at least the Select degree, only on those who had a knowledge of the Royal Arch degree; hence to impart the *mysteries* of the Ninth Arch to anyone "beneath the dignity of the Royal Arch," was to invert the true order of *succession*, so essential in all Masonic degrees.

It has been asserted by some that the Cryptic degrees had been worked in this country earlier than 1783; as early perhaps as 1766 in the city of Albany, and that they were brought from France, and not from Prussia. Brother Pike said in his report:¹

"We can soon learn how it was that the Council degrees came about 1766 from France and not from Prussia. In 1761, the lodges and Councils of the superior degrees being extended throughout Europe, Frederic II. (or the Great), King of Prussia, as Grand Commander of the Order of Princes of the Royal Secret, or 32d degree, was by general consent acknowledged and recognized as Sovereign and Supreme Head of the Scotch Rite."

"On the 25th October, 1762, the Grand Masonic Constitutions

¹ "History of Masonry and Concordant Orders," p. 649.

were finally ratified in Berlin, and proclaimed for the government of all Masonic bodies working in the Scotch Rite over the two hemispheres; and in the same year they were transmitted to Stephen Morin, who had been appointed, in August, 1761, Inspector General for the New World by the Grand Consistory of Princes of the Royal Secret, convened at Paris, under the presidency of Chaillon de Joinville, representative of Frederic, and Substitute-General of the Order. It will be remembered that the 33° was not then created; and, under Frederic the Great, there was no rank higher than the 32°, nor any body superior to a Consistory. When Morin arrived in the West Indies, he, agreeably to his patent, appointed M. Hayes a Deputy Inspector General, with the power of appointing others when necessary. It was under this authority, coming, it is true, from the Consistory of Paris held by that consistory as the delegate and representative of Frederic the Great, that the Lodges of Perfection in Albany and Charleston were established, with authority to confer these detached degrees."

"Many rites flourished in Europe awhile and died. The French and Scotch Rites reduced the degrees practiced by their votaries, the former to seven, the Seventh being the Rose Croix, the latter to thirty-three and some auxiliary degrees. By common consent it became Masonic law that the first three degrees were the joint property of all, but the others, the peculiar property of the inventors. Royal Arch Masonry separated itself from 'Blue' Masonry, organized itself, invented three new degrees, and commenced an independent existence. The Royal and Select Masters formed themselves into councils, and after a time they, too, organized themselves into Grand Councils, and claimed an independent existence. The Supreme Council did not deny the right, but simply retained their original right to confer the degrees, and Charter councils in States where no Grand Councils have been organized."

The following is a copy of a decree issued by the Supreme Council A.:. A.:. A.:. S.:. Rite of the Northern Jurisdiction, the true copy of which was sent to the Southern Jurisdiction and was presented to the writer many years since by General Albert Pike.

"The Supreme Grand Council of Sov. Grand Inspectors General for the Northern Masonic District and Jurisdiction of the U. States of America duly, lawfully, and constitutionally assembled on the 10th day of June, 1850, at its Grand East, the City of

New York, in its Supreme Grand Council of Princes of Jerusalem do declare and make known as follows:

"That in addition to the regular series of degrees and order of the ancient and accepted rite, the said rite had, from time immemorial, been in possession of, and claims as its exclusive property, a number of detached degrees which are illustrative of, connected with, and necessarily appendant to certain degrees in said rite or departments thereof: and that the Supreme Grand Council, as the sole conservators of said rite, in said Northern Jurisdiction, is sacredly bound to preserve intact and free from any amalgamation with foreign rites or Masonic Bodies, not acknowledged by us or our said rite, all and every one of the detached degrees referred to.

"That two of such detached degrees, called 'Royal Master' and 'Select Master,' or 'Select Masons of 27,' having in various ways and at different times fallen into the hands of persons in no way connected with the sublime system of free Masonry, or the said 'ancient and accepted rite,' have been and are now cultivated in a garbled form, by bodies styling themselves Masonic, and working under self-assumed powers and authority in this regard, claiming the right to grant charters to confer them; and, moreover, that these degrees, in some places of this Jurisdiction, have become amalgamated with a Modern American rite, and are also claimed as the property of the American Royal Arch Chapters.

"This Supreme Grand Council therefore, as in duty bound, protests against this invasion of its rights and privileges, and further declares and makes known that the said degrees of Royal and Select Master, from their nature or character, and the history they develop, and circumstances upon which founded, can not, except in an anachronistic and improper manner be conferred disconnected from the ineffable degrees, and lodges of perfection (14th degree ancient and accepted rite) and that said degrees belong not only characteristically and historically, but legitimately, to 'Ineffable Masonry' and 'Lodges of Perfection,' and do not appertain and can not consistently and lawfully be made an appendage to any Masonic system except said 'Sublime System,' nor to any rite except said 'ancient and accepted rite.'

"And whereas, such assumed authority over the detached degrees aforesaid, may, as we have reason to believe in some instances, have been exercised in good faith, but without a due appreciation of

our rights and prerogative in regard to them, this Supreme Grand Council for the sake of harmony is willing to confer and advise with our illustrious Brethren, the Southern Supreme Grand Council at Charleston, S. Carolina, and act in concert with them in adopting such measures in reference to those degrees, as may be mutually adjudged most feasible and proper, without infringing in any way whatever upon our Supremacy over the said degrees.

" *'Deus meumque jus,'*

W. R. SINGLETON, 33^o.

The Supreme Council of the Southern Jurisdiction held to the same contention until at a meeting of the Supreme Council at Baltimore, May, 1870, they surrendered all claim to these degrees.

Dr. Olivar, in his *Historical Landmarks*,¹ gives an account of the legend of the Secret Vault as discovered in the construction of the Second Temple, as follows:

"The foundations of the Temple were opened, and cleared from the accumulation of the rubbish, that a level might be procured for the commencement of the building. While engaged in excavations for this purpose three fortunate sojourners are said to have discovered our ancient stone of foundation, which had been deposited in the secret crypt by Wisdom, Strength, and Beauty, to prevent the communication of ineffable secrets to profane or unworthy persons.

"The discovery having been communicated to the prince,²

¹ Vol. ii., p. 434.

² Zerubbabel was Tirshatha (Governor).

prophet, and priest of the Jews, the stone was adopted as the Chief Corner-Stone of the re-edified building, and thus became, in a new and more expressive sense, the type of a more excellent dispensation. An avenue was also accidentally discovered, supported by seven pairs of pillars, perfect and entire, which, from their situation, had escaped the fury of the flames that had consumed the Temple, and the desolation of war that had destroyed the city.

"The Secret Vault, which had been built by Solomon as a secure depository for certain secrets that would have inevitably been lost without some such expedient for their preservation, communicated by a subterranean avenue with the King's palace; but at the destruction of Jerusalem, the entrance having been closed by the rubbish of falling buildings, it had been discovered by the appearance of a keystone among the foundations of the Sanctum Sanctorum. A careful inspection was then made, and the invaluable secrets were placed in safe custody."

Brother Mackey says:¹

"To support this legend there is no historic evidence and no authority except that of the Talmudic writers. It is clearly a mythical symbol, and as such we must accept it. We can not altogether reject it, it is so intimately and so extensively connected with the symbolism of the Lost and recovered Word, that if we reject the theory of the Secret Vault we must abandon all of that symbolism, and with it the whole of the science of Masonic symbolism. Fortunately there is ample evidence in the present appearance of Jerusalem and its subterranean topography to remove from any tacit, and as it were, conventional assent to the theory, features of absurdity and impossibility.

"Considered simply as a historic question, there can be no doubt of the existence of immense vaults beneath the superstructure of the original Temple of Solomon. Prime, Robinson, and other writers, who in recent times have described the topography of Jerusalem, speak of the existence of these structures, which they visited, and, in some instances, carefully examined." Dr. Barclay (*City of the Great King*) describes in many places of his interesting topography of Jerusalem, the vaults and subterranean chambers which are to be found beneath the site of the Old Temple.

¹ "Encyclopædia of Freemasonry," p. 852.

"In the earliest ages the cave or vault was deemed sacred. The first worship was in cave-temples, which were either natural or formed by art to resemble the excavations of nature.

"The vault was, in the ancient mysteries, symbolic of the grave; for initiation was symbolic of death, where alone Divine Truth is to be found. The Masons have adopted the same idea. They teach that death is but the beginning of life; that if the first or evanescent temples of our transitory life be on the surface, we must descend into the *Secret Vault* of death before we can find that sacred deposit of truth which is to adorn our second temple of eternal life. It is in this sense an entrance through the grave into eternal life, that we are to view the symbolism of the Secret Vault. Like every other myth and allegory of Masonry, the historical relation may be true, or it may be false; it may be founded on fact, or be the invention of imagination, the lesson is still there, and the symbolism teaches it, exclusive of the history."

The above quotations have been made because the present writer had devoted many years to the study of the topography of Jerusalem and its immediate vicinity in connection with his studies in the various Masonic rites which locate their mysteries in that city and in and about the Temple area now called *Harem-esh Sheriff*. His conclusions are that not a single degree in Masonry can properly be located near the city of Jerusalem nor on or in the "Sacred Area" of the Temple.

So far as the caves or cisterns which are to be found under the surface of the "Area" at the present day did give a key to those who formulated the Cryptic degrees, he feels assured that the originators of those degrees did have some knowledge of their existence—but with accurate maps of that "Area" and the location of every vault or cistern before us, furnished by the accurate survey of Captain Chas. Warren in 1867, we could not for one moment entertain the belief that such a system of vaults or arches ever existed there, as described in our lectures of any of the Rituals—but we do believe that these rituals, being symbolic and allegorical, were founded upon the fact of vaults found in that locality. We can refer to the legend of Enoch and his vaults, erected to conceal the sacred delta, constructed by him and his son Methuselah, after the ineffable NAME of Deity had been revealed to him, and which name he had engraved upon the delta, which by the command of God,

he was to conceal and secure, for future generations to discover. These vaults, nine of them, were securely constructed, and two pillars were erected, and placed near, with inscriptions to indicate the locality of the vaults. It is possible that the pillars were destroyed and carried away by the flood. The fable further states that when King Solomon commenced the preparation of the ground on Mount Moriah for the temple, his workmen broke into these vaults and found certain mysterious things there; and upon reporting to King Solomon what they had found, he directed them to cease their labors, as he supposed the vault had been a secret place for the worship of the gods of the original inhabitants of Canaan. God, however, notified him in a dream that he should proceed; as he had designed that spot for the erection of the Temple for his worship, as it had been thrice dedicated, first by Enoch when he constructed the vaults and made the deposits of these mysterious emblems—second, on this spot Abraham erected the altar to sacrifice his son Isaac¹—and third, by his father David, where he erected the altar on the threshing floor of Arauna and sacrificed to stay the hand of the destroying Angel.²

There is no doubt whatever in the mind of the writer but that the inventors of the degrees above the three original degrees—such as the Royal Arch and Select, designed to demonstrate to the postulant the value of the great and now ineffable and mysterious name of Deity.

It is well known to all students of the ancient mysteries of the Orient that after the initiation of a candidate in the lower mysteries, and a certain period having elapsed, by many severe tests, lustrations by the four elements and trials, he was invested with the great WORD in a very solemn and mysterious manner, by the Arch-Magus, who alone could communicate this word to the postulant. In receiving this word, was conveyed to him by its interpretation, the meaning of all the preceding ceremonies.

Those who arranged the series of degrees as above mentioned, from the Entered Apprentice to the Select Master, designed that in the last degree there should be a full explanation of all that which was concealed in the various forms and ceremonies, and in our present lectures in that degree it is very evident that such was the de-

sign of closing the Ancient Craft Masonry with the Select of Twenty-seven, "to pass the Circle of Ancient Craft Masonry."

GENERAL GRAND COUNCIL.

In 1871 the Grand Council of Massachusetts undertook the task of bringing order out of the disordered condition of the Cryptic Rite in the United States, and having enlisted the valuable services of our most distinguished Companion, Hon. Josiah H. Drummond, of Maine,¹ who, in compliance with their request, called a convention, and fourteen Grand Councils were represented at the meeting in New York City, June 12, 1872, at which the following was adopted:

"*Whereas*, In some jurisdictions the question has been mooted of surrendering the Cryptic Degrees to the Chapters; and

"*Whereas*, There are many Companions who have received the degrees in Chapters or from Sovereign Inspectors of A.·A.·S.· Rite, therefore

"*Resolved*, That it is the sense of this Convention that the Cryptic degrees should be under the exclusive jurisdiction of Grand Councils, and that no one should be recognized as a regular Companion of the Rite who had not received the degrees in a lawfully constituted Council or by authority of the Supreme Council of the A.·A.·S.· Rite previous to the date, or has been lawfully healed."

The convention adopted a uniform system of nomenclature, which has since been generally adopted.

In June, 1873, another meeting of the Convention was held in New York and nineteen Grand Councils were represented. The following was adopted:

"That the order of the succession of the degrees be: First, Royal Master's; second, Select Master's; and that it be left optional with each Grand Council to confer the super-excellent Master's degree as an honorary degree."

The convention announced as its opinion that a General Grand Council of the United States should be formed. Subsequently meetings were held, December, 1874, in New Orleans; August, 1877, in Buffalo, N. Y.; at which latter meeting twenty-two Grand Councils were represented, and also Ontario, Canada. The con-

¹ Drummond, "History of Grand Council in United States," p. 89, in the Cryptic Rite.

vention met at Detroit, August 23, 1880, when a constitution was adopted which it was required should be adopted by not less than nine regular Grand Councils, and then should become operative. The General Grand Recorder, George W. Cooley, gave notice, February 23, 1881, that the Grand Councils of New York, Minnesota, Ohio, Indiana, Maryland, Tennessee, Massachusetts, Alabama, and Louisiana had ratified the constitution. On March 1, 1881, Hon. Josiah H. Drummond, General Grand Master, issued his circular to the officers, and also announced that the Grand Council of South Carolina had adopted the constitution.¹ The first session was held pursuant to this circular, at Denver, Col., August 14, 1883, and the following Grand Councils were represented: California, Florida, Indiana, Kansas, Louisiana, Maryland, Maine, Massachusetts, Minnesota, Missouri, New Hampshire, Ohio, New York, South Carolina, Tennessee, and Vermont. (Forever blessed be their memory.) Of those seventeen who originally acceded to the first formation of the provisional General Grand Council, in 1880, these were absent: Georgia and Alabama; and South Carolina had since given her adhesion. Alabama, having been with the seventeen Grand Councils to join in the formation of the provisional General Grand Council in 1880, was never represented at any subsequent assembly.

We will now, in a more regular manner, give the history of the formation of the General Grand Council. The General Grand Council of the United States was organized at a convention of delegates of seventeen Grand Councils which met at Detroit, Mich., August 23, 1880.

The action of this convention was at once approved by the following Grand Councils: New York, Minnesota, Ohio, Indiana, Maryland, Tennessee, Massachusetts, Alabama, and Louisiana.

South Carolina Grand Council soon thereafter organized, and ratified the constitution of the General Grand Council and resumed work. In the address of the General Grand Master, Josiah H. Drummond, at the first Triennial Assembly, held at Denver, Col., August 14, 1883, he states: "At the time of the formation of the provisional General Grand Council there were twenty-three Grand Councils, which had not adopted the 'Mississippi Plan.'"

¹ Proceedings, 1883. p. 20.

"Of these, seventeen, *viz.*, Alabama, California, Florida, Georgia, Indiana, Kansas, Louisiana, Maine, Maryland, Massachusetts, Minnesota, Missouri, New Hampshire, New York, Ohio, Tennessee, and Vermont, have become constituents of the General Grand Council.¹

"Of the other six, five continue to exist, but have not become constituents of this body, *viz.*, Connecticut, Michigan, New Jersey, Pennsylvania, and Rhode Island. Some of these, however, have the matter under consideration. It is understood why Connecticut has not given her adhesion is, the law of this body, that persons receiving the degrees in Chapters, or in Councils appurtenant to Chapters, can not be recognized.

"The remaining one of twenty-three, North Carolina, at its session held in June last undertook to dissolve and turn the degrees over to the Chapter. While this occasions regret, it is no matter of surprise, because Royal Arch Masonry is at an exceedingly low ebb in that State, and it sometimes seems a matter of doubt whether the Grand Chapter itself will be able to maintain its existence.

"Grand Councils at the advent of the 'Mississippi Plan' existed in other States, as follows: Arkansas, Illinois, Iowa, Kentucky, Mississippi, Nebraska, South Carolina, and Wisconsin. All of which accepted in some form the general features of the "Mississippi Plan."

"The Grand Councils of Arkansas, Illinois, and Kentucky have reorganized, but have not as yet ratified and adopted the General Grand Constitution. The Grand Council of Illinois never formally dissolved, but maintained its existence and undertook to surrender the degrees to the Grand Chapter; this action had been rescinded by both grand bodies, and the Grand Council now exists with all its powers, and I trust with its pristine vigor."²

We have followed thus far the history of the Cryptic Rite as given by Companion Josiah H. Drummond in his address to the General Grand Council at the first Triennial Assembly, three years after the inauguration of that body. He further stated the following Grand Councils had taken no definite action, *viz.*, Iowa and Nebraska. Mississippi had taken action in reference to the overwhelming sentiment of the Craft, which looks toward reorganizing the Grand Council System. The situation in Wisconsin is anomalous; the Grand Council surrendered the degrees to the Grand Chap-

¹ Proceedings General Grand Council, 1883, p. 7.

² *Ibid.*, General Grand Master's Address.

ter, which authorized the conferring of them in a council appurtenant to a chapter,¹ so that in theory, if not in practice, each chapter had a council appurtenant to it, the chapter officers being the officers of the council. But in 1881, in consequence, as I understand, of objections to the recognition of persons receiving the degrees in such councils, a convention of the delegates of *these councils* was called, and a Grand Council of Royal and Select Masters was organized.²

We have given the above very interesting information as to the several States wherein the Cryptic Rite was worked in this place rather than in the separate individual jurisdictions, as it greatly saves space and time, reserving both of these for the details properly belonging to each subordinate jurisdiction as to the organization of the constituent councils in each, as it will appear under the alphabetical arrangement.

Note.—Companion Drummond in the above sketch begins with Alabama, but that Grand Council never appears in any subsequent proceedings as a constituent of the General Council.

Alabama.

The information which we have been enabled to obtain concerning Cryptic Masonry in Alabama is somewhat vague. It is supposed that John Barker, of the A.: A.: S.: R.: Southern Jurisdiction, started the first councils of Royal and Select Masters, under his authority as Deputy Inspector-General. It is conceded that a Grand Council was organized in 1838 (December 13th).³ This Grand Council repudiated, very properly, the course of the Grand Chapter of Virginia, in capturing the degrees of the council, and incorporating them with the chapter work, in 1843. The council also, in 1849, protested against the Grand Consistory of Charleston granting (of) these degrees in its jurisdiction.⁴

This Grand Council met, with some omissions, as in 1840, 1861, 1862 or 1863, until in 1886 it was dissolved, when all branches of Masonry in that State were much depressed. Since then, however, matters have greatly improved. This Grand Council was never connected with the General Grand Council after 1881, although one of the first to join in the organization in 1880.

¹ Charters issued to chapters in 1848-49 provided for this usage—EDITOR.

² *Ibid.* ³ "History of Masonry and Concordant Orders," p. 661.

⁴ *Ibid.*

Arizona.

The proceedings of the Triennial Assembly of the General Grand Council of 1897 show that the following councils secured their warrants:

	Dispensation Granted.	Chartered.
Olive Council, No. 1.	At Prescott, July 1, 1893.	August 22, 1894.
Phoenix, U. D.....	At Phœnix, April 4, 1895.	Surrendered February 17, 1897.
Tucson, U. D.....	At Tucson, April 5, 1895.	Surrendered September 2, 1897.

Arkansas.

Four subordinate councils were, at an early date, chartered by the Supreme Council A. . A. . S. . R. . of the Southern Jurisdiction. These four councils were formed by the State Grand Council, November 6, 1860. In 1878 the Companions adopted the system of incorporation with the chapters; but in 1881 resumed the independent form; and in 1886 united with the General Grand Council, and is yet within that organization. On the 25th of April, 1899, they had the sad misfortune to lose their Grand Recorder Companion James A. Henry.

California.

The Grand Council of Alabama granted charters to organize two councils in California. One council was chartered by the Grand Council of Tennessee, and one by the Grand Council of Texas. These four councils organized a Grand Council, June 26, 1860. In 1880 this Grand Council united with the General Grand Council in its organization.

Colorado.

The following councils were organized in Colorado under the General Grand Council:

	Dispensation Granted.	Chartered.
Denver, No. 1.....	Denver, January 16, 1892.	August 21, 1894.
Rocky Mountain, No. 2.....	Trinidad, March 24, 1893.	August 21, 1894.
Durango, No. 3.....	Durango, May 16, 1893.	August 21, 1894.
Akron, No. 4.....	Akron, May 23, 1893.	August 21, 1894.
Canon City, No. 5.....	Canon City, June 5, 1893.	August 21, 1894.
Gunnison, U. D.	Gunnison.	
Pueblo, No. 7.....	Pueblo, April 10, 1894.	August 21, 1894.

All of these councils are reported as being in existence at the Triennial held in 1897. At that session the General Grand Master reported that he had issued dispensations as follows:

To Hiram Council, at Greely, with sixteen members, December 8, 1894; but no interest being taken, the dispensation was surrendered, December 9, 1896.

To Zabud Council, at Colorado Springs, with thirty-two members, May 27, 1895. This council made reports for 1895, 1896, and 1897; paid dues for 1895 only, and asked for a Charter; but does not appear in the list of councils whose dispensations were continued; nor was it chartered.

To Leadville Council, at Leadville, June 10, 1895, and dispensation was surrendered, November 10, 1896.

Hiram, U. D., Greely, December 8, 1894, and surrendered.

Zabud, U. D., Colorado Springs, May 27, 1895, and continued.

Leadville, U. D., Leadville, June 10, 1895, surrendered.

Connecticut.

In 1818 Companion Jeremy L. Cross was very industrious in propagating the Cryptic Rite, and succeeded in forming ten councils in Connecticut. The first Grand Council of Select Masters for the State was organized by that name as claimed. There are no records of this body up to 1830. In 1825 the two degrees of Royal and Select Masons were recognized. From 1826 to 1846, in consequence of the Morgan episode, very little if anything was done in this as well as other branches of Masonry.

Since the revival, in all the States where the anti-Masonic spirit had prevailed, Masonry has taken a "new and prolonged lease," and flourishes to a much greater degree than ever before in its history. The sons and grandsons of the bitterest anti-Masons of 1830 are now the most zealous in their efforts to spread abroad the "glad tidings of peace on earth and good-will toward men."

Connecticut Grand Council does not belong to the General Grand Council, which is much to be regretted. The benefits of her union with that body would be mutual.

Delaware.

It is said that Jeremy L. Cross, when on his lecturing tour in the early days, visited Delaware and conferred the degrees in Wilmington and Newcastle. We have no further information from that State.

District of Columbia.

The Cryptic degrees are first mentioned, in the history of Masonic degrees in the District of Columbia, in the records of the Grand Chapter which was organized in 1822. At the Semi-Annual Convocation held June 9, 1829, the report of the Committee on Correspondence refers to a circular letter which had been sent by the Grand Chapter of Maryland to each Grand Chapter in the United States; which is as follows:¹

"M. E. Sir and Companion:

"I am instructed by the Grand Chapter over which I have the honor to preside, to address you, and through you your Grand Chapter, upon the unsettled state of the degree of Select Mason, a subject deemed by us of sufficient importance to claim the particular attention of your Grand Chapter.

"This degree existed under the authority of a distinguished Chief in the State of Maryland, but without the recognizance of our Grand Chapter for many years; until, in the year 1824, upon the revision of our Constitution, it appearing evident that the Select Degree not only has an intimate connection with, but is in a measure necessary, as preparatory to and elucidatory of that of the Royal Arch; it was formally recognized by our Grand Chapter, and required to be given by our subordinate Chapters in its proper order immediately preceding that of the Royal Arch. Under this arrangement we have since progressed, much to our satisfaction; but it is with regret that we have learned that Councils or Chapters of Select Masons have been established in some of our sister States, *independent of Royal Arch Masonry*, avowedly in pursuance of, but, as we are satisfied, through a great mistake or actual abuse of any authority delegated, or meant to be delegated, in relation to the Select Degree. We would, therefore, beg leave respectfully to

¹ Proceedings of Grand Chapter of District of Columbia, 1822-1833, p. 108.

recommend to your Grand Chapter the consideration of this degree, and the circumstances under which it exists, within your jurisdiction; with the hope that you will see it to be for the general interest of the Craft to take the degree under your recognizance and control, to whom of right it belongs, and thereby do away with what is felt to be a grievance, by those distinguished Chiefs, whose authority, delegated to a limited extent, and for special reasons, has been perverted for sordid purposes, by the creation of an independent order, never contemplated by them; and which we believe to be inconsistent with the spirit and best interests of our institution.

"Respectfully and fraternally, &c."

This was never officially communicated to the Grand Chapter of the District of Columbia by the Grand Chapter of Maryland, but was taken from the printed proceedings of that body, pp. 15, 16, and 17.

That committee also reported: "The Grand Chapter of North Carolina had determined that the degree should come under the jurisdiction of State Grand Chapters, and recommended it to the favorable consideration of the General Grand Chapter. The Grand Chapter of Maine had referred the subject to a Committee. It remains for the Grand Chapter to take such orders in the premises as it shall seem proper."

The Grand Chapter of Ohio has passed a resolution of which the following is a copy, and which has officially been communicated to this Grand Chapter for its consideration. "At a regular communication of the Grand Chapter [of Ohio] in January, 1829, the following resolution was adopted:

"*Resolved*, That it is the opinion of this Grand Chapter that the General Grand Chapter of the United States ought to be dissolved.

"BELA LATHAM,

"Grand Secretary."¹

A committee to whom the subject was referred reported:²

"That they are decidedly of the opinion that the Royal and Select Master's Degrees should be recognized by and conferred under the direction of the several Grand Chapters of the respective States and Territories of the Union. With regard to the proper time when

¹ Proceedings of Grand Chapter of District of Columbia, p. 109.

² *Ibid.*, 113,

these degrees should be conferred, whether before or after the Royal Arch Degree, they decline expressing an opinion, preferring that this point should be left to the determination of the General Grand Chapter; and they recommend that the representatives from this Grand Chapter to that body, at its Triennial meeting, in September, be instructed to conform in their proceedings on this subject, to the tenor of the foregoing." This was laid on the table for the present. When taken up again, it was "*Resolved*, That the further consideration thereof be postponed till the first Tuesday in August next; and that in the meantime the Grand Secretary be directed to forward a copy of the report this day made on that subject to the several Councils of Royal and Select Masters in the District of Columbia."¹

At the special convocation, held August 31, 1829, the following appears: Companion Baldwin, from a committee appointed by the Council of Royal and Select Masters of the City of Washington (which body had been addressed on the subject by the Grand Secretary, pursuant to order) presented to the Grand Chapter the following letter and report, viz.:²

"WASHINGTON, August 31, 1829.

"At a special meeting of the Council of Royal and Select Masters, held at the Central Masonic Hall, on Saturday, the 29th of August, instant, the written report having been presented and read, was, on motion, ordered to be transmitted to the Grand Chapter of the District of Columbia at their next meeting.

"JOHN CAROTHERS, *T. I. G. M.*

"W. W. BILLINGS, *Recorder.*"

Report.

"The Committee appointed by the Council of Royal and Select Masters of the City of Washington, to whom was referred the propriety of extending the jurisdiction of the General, Grand, and Subordinate Royal Arch Chapters so as to embrace the Degrees of Royal and Select Masters, have the honor to report:

"That they have had the subject under consideration, and are duly impressed with its vast importance. After the most mature deliberation they have come to the following conclusions: That Masonic light in its principles, and the order of its development, is fixed and unchangeable! That whatever power the Fraternity may

¹ Proceedings of the Grand Chapter of the District of Columbia, p. 115. ² *Ibid.*, 119.

have over forms and ceremonies, yet no body of Masons, however exalted, neither have nor can assume the power of changing the original landmarks, or altering its elements. Your committee are confident, from an intimate acquaintance with all the degrees, that those of 'Royal and Select Master' are not only posterior in order to the 'Royal Arch,' but that in our opinion it would not be consistent with ancient Masonry to make them previous.

"Whether the interests of the Craft would be promoted by this extended jurisdiction, your Committee are unable to say; but should that course be thought advisable, by the General Grand Chapter, in its solemn deliberation, your Committee are decidedly of the opinion that it can only be done under the following restrictions:

"1st. That the Degrees of Royal and Select Masters can only be conferred on Royal Arch Masons.

"2d. No one can be an officer of any Chapter who is not both a Royal and Select Master.

"Without these restrictions your Committee can never consent to a change in the present established mode of proceeding.¹

"All of which is most respectfully submitted.

"E. BALDWIN,	} <i>Committee.</i> "
"W. W. BILLINGS,	
"J. A. KENNEDY,	

The report of a committee made in June last on the subject of the degree was taken up and read, and was passed by a majority of one vote only, and on motion it was

Resolved, That the Grand Secretary transmit to the General Grand Secretary copies of the two reports above stated, together with the proper credentials of the proxies appointed to represent this Grand Chapter in the General Grand Chapter of the United States, at its ensuing meeting in New York; and that the Grand Secretary do prepare the proper instructions."

At the meeting of the General Grand Chapter, September 11, 1829, this question came up for action on a communication from Comp. J. K. Stapleton, upon which a suitable committee made the following report, and it and the resolutions were adopted:

Whereas, It is satisfactorily proved to this General Grand Chapter, that the Constitution of the Councils of Royal and Select

¹ Proceedings of the Grand Chapter of District of Columbia, p. 120.

Master Mason, in different parts of the United States, by sundry persons, has been without any legitimate authority,

"And *Whereas*, Those degrees are conferred in some chapters, under the authority of the General Grand Chapter; and whereas it was proved that it was the only and sole intention of the Most Excellent Companions from whom these degrees emanated that they should be conferred under the authority of Royal Arch Chapters; therefore,

"*Resolved*, That this General Grand Chapter cordially recommend to the different Councils in the United States to adopt measures to place those degrees under the authority of the State Grand Chapters.

"*Resolved*, That authority be, and is hereby, granted to the several Grand Chapters, under the jurisdiction of the General Grand Chapter, to make such arrangements as shall be found necessary for conferring the degrees of Royal and Select Masters in Royal Arch Chapters; provided always that no Grand Chapter, within the limits of which is a Grand Council, shall authorize the Royal Arch Chapters under the jurisdiction to confer such degrees without the consent of such Grand Council."

We have no records or accounts whatever in the District of Columbia as to what became of the "Council," or Councils, if more than one, which is referred to above.

The chapters in the District continued to confer the Royal and Select degrees prior to the Royal Arch, until in 1833, when the Grand Chapter was dissolved. Several of the chapters again joined the Grand Chapter of Maryland, which body, thereafter, in 1844, added to its nomenclature "the District of Columbia," and the Council degrees were worked within the chapters prior to the Royal Arch, until May 23, 1867, when the Grand Chapter of the District of Columbia was again organized; and on that day, the new Grand Chapter, by resolution, unanimously dropped those degrees from the curriculum of the chapter work, being well satisfied that they did not properly belong to the chapters. Soon after the organization of the Grand Chapter in 1867, Companion Benjamin B. French, the Inspector-General of the Southern Jurisdiction for the A. . A. . S. . R. ., for the District of Columbia, issued three dispensations to form three new councils of Royal and Select Masters, for the District of Columbia.

Those who had received those degrees in regular organized councils refused to join in this movement. Soon after this, the question was agitated as to the legality and propriety of thus inaugurating a new method of propagating the Cryptic degrees, and the result was, these three councils went into "innocuous desuetude." When the time was deemed judicious, the present writer, with eight others, who had been regular Council Masons, prepared a petition to the Grand Council of Massachusetts for a dispensation to open LaFayette Council. This was granted August, 1870, with the writer as Most Illustrious Master. The Grand Officers of the Grand Council of that State came to Washington and opened LaFayette Council.

Inasmuch as the great body of Royal and Select Masons in the District had received the degrees of Royal and Select Masters in their several chapters prior to the Royal Arch, it was decided that all such Royal Arch Masons, as well as those who had never received the Council degrees, should be received at a nominal price (five dollars) for those degrees. Accordingly, in two nights sessions the Grand Officers conferred the Royal, Select, and Super-excellent degrees upon 158 R. A. Masons. A Charter was granted December 14, 1870, and the council started with flying colors and great success. This council continued with some measure of prosperity for several years, when from internal dissensions the members lost their interest and in a few years ceased to attend, and the council died out.

When the General Grand Council of the United States was organized in 1881, the present writer, after correspondence with Companion Josiah H. Drummond, the General Grand Master, and a few members of the defunct body, petitioned for another council to be called "Washington," with the principal officers of the deceased LaFayette Council at the head. A dispensation was granted, and started with good prospects. At the next meeting of the General Grand Council a Charter was granted. Since that time Washington Council, No. 1, has continued to grow, but not as rapidly as she should. Indeed, the District of Columbia should have several councils in prosperous operation, and that, too, under the constitution of a Grand Council for the District.

Florida.

The Southern Supreme Council, exercising its undoubted right of control at that time over the degrees of Royal and Select Masons, through some one of her inspectors, perhaps in South Carolina, had, previous to 1858, issued at different times warrants to form three councils in Florida. The present writer is personally aware of the one existing at Warrington, adjoining the navy-yard at that locality, as he reported for duty as Chief Constructing Engineer at that naval station February, 1857, and found a thriving lodge, chapter, and council in full operation, and it was his great pleasure to assist in the work in all of these bodies at that time.

January 13, 1858, these three councils organized a Grand Council, at the time of the agitation of who should control these degrees. After much discussion the Grand Chapter of Florida declined to act. The Grand Council became a member of the General Grand Body.

There have been no proceedings of the body issued since 1882, and there have been no meetings since 1884. In the proceedings of the General Grand Council for 1897 there is a broad black mark across the page opposite to Florida, where the Grand Recorder's name should have been, but in the tables of annual assemblies from 1894 to 1896 Florida appears with names of the Grand Officers.

Georgia.

We learn that one of the deputies of the Southern Supreme Council, Abram Jacobs, conferred the degree of Select of Twenty-seven in the State of Georgia. On May 2, 1826, a Grand Council was organized by the authority of the Inspector-General of the Supreme Council, which is noticed in the publications of that day. June 25, 1841, three councils met, and a Grand Council was established by the authority of the Supreme Grand Council of the 33°, in Charleston, S. C. They adopted the constitution of the former Grand Council of 1826. That body, having ceased to work, became dormant, and the records were lost. In the revised constitution of 1842 they claimed to be the highest source of legitimate Masonic authority in the State of Georgia, and of right ought to have the government and superintendence of all councils of Royal and Select

Masters within its jurisdiction.¹ This Grand Council belongs to the General Grand Council and is reported in the proceedings of 1897.

Idaho.

A council was organized in Idaho by a dispensation from the Officers of the General Grand Council, *viz.*, Idaho Council, No. 1, at Pocatillo, December 15, 1896—which was annulled afterward; also a dispensation for Adoniram Council, at Boise, January 30, 1896. Dispensation continued until next assembly.

Illinois.

The Grand Council of Kentucky having issued charters to several councils in the State of Illinois, a Grand Council was organized March 10, 1854. In 1877 the degrees were surrendered to the control of the Grand Chapter of Royal Arch Masons, notwithstanding that in 1854 it refused to heal Royal and Select Masters who had been made in the chapters. The Grand Council, however, continued its annual sessions, its constituents being composed of the mixture of regularly made Council Masters and those made in the chapters. This did not prove satisfactory, and in 1882 the Grand Council and Grand Chapter agreed to resume their old condition. Illinois Grand Council is an independent Grand Body.

Indiana.

In the State of Indiana the Council degrees were given in the chapter work. After the General Grand Chapter's decision, councils were chartered by the Grand Councils of Kentucky and Ohio. Chapter Royal and Select Masons were "healed" and the Grand Council of Indiana was organized December 20, 1855.

Iowa.

When Royal Arch Masonry was first planted in Iowa, the Council degrees were part of the chapter work. After the decision of the General Grand Chapter, in regard to these degrees, Companions were "healed" by the authority of the Grand Master of the

¹ "History of Masonry and Concordant Orders," p. 662.

Grand Council of Illinois. Charters were issued by that Grand Council to councils in Iowa, which subsequently organized the Grand Council of Iowa, January 2, 1857. In 1878 the Grand Council merged itself into the Grand Chapter of Iowa, nineteen councils having been duly organized prior to that time. To the present day those degrees are merged into the chapter of Royal Arch

Kansas.

Three councils of Royal and Select Masters were chartered by the Grand Council of Missouri, in the State of Kansas, and December 2, 1867, these three councils organized a Grand Council of Royal, Select, and Super-excellent Masons.

Kentucky.

The Select degree was carried into the State of Kentucky by J. L. Cross, when in 1817 he made his official tour through the Western States as General Grand Lecturer of the General Grand Chapter. December 10, 1827, six councils met by their delegates and organized a Grand Council of the State, which is said to be the result of John Barker's efforts in behalf of the Supreme Council of the Southern Jurisdiction, A. A. S. R. This jurisdiction felt the effects of the Morgan anti-Masonic period from 1830 to 1840, when the Grand Council met only once. The degrees were merged into the chapter from 1878 to 1881. After the organization of the General Grand Council the Grand Council of Kentucky was re-organized. Companion H. B. Grant, M. Ill. Gr. Master, in his annals mentions the case of a Thrice Illustrious Master of a council who *communicated* the degrees outside of a council, and who construed his obligation to mean that he could not *confer* the degrees except in a council, but could communicate the degrees, and so directed the record to be made as if conferred in a council. This was declared by the Grand Master to be irregular, and required recognition to be refused until they were "healed" in open council. The Grand Council of Kentucky is an independent body.

Louisiana.

It is stated that John Barker in 1827 organized Holland Council, No. 1, in New Orleans, and in the "tableau" of the Grand

Chapter of Louisiana in 1828 it is referred to. When in or about 1850 Capitular Masonry was re-organized, Cryptic Masonry was also revived. Four councils formed a Grand Council February 10, 1856. One of these was Holland, No. 1. The others had been chartered by the Grand Councils of Kentucky and Alabama.

Maine.

At an early period a council had been organized in Maine, working under the General Grand Chapter. The Grand Council of Massachusetts organized three councils, and these, by their delegates, formed the Grand Council, May 3, 1855.

Maryland.

In the introduction of this history of the Cryptic Rite, the connection of Eckel and Niles, as leaders at an early date, was noticed.¹ The Select degree was then only recognized as an appendant to the regular curriculum of degrees of the A.·. A.·. S.·. R.·. which was controlled by the Deputy Inspectors of that rite. This was prior to 1800, and perhaps extended into the present century, as late as the date of the certificate, or dispensation, given to Cross. We have seen, under District of Columbia, the steps which were taken, as early as 1824, to incorporate these degrees with the chapter work and to precede the Most Excellent Master's degree. This union of the Cryptic with the Capitular system continued until 1872, when, by law, the Grand Chapter separated them. Six councils after this (May 12, 1874) organized the present Grand Council of the State, which became a member of the General Grand Council and so continues.

Massachusetts.

In 1817 a voluntary council of Royal Masters was organized by Benjamin Gleason and others, and subsequently obtained the sanction of Columbian Council of New York. A Select council was formed at Springfield, May 28, 1818, by J. L. Cross. Six councils, at different times, having been organized, their delegates met February 8, 1826, and on June 15, 1826, completed the formation of a Grand Council. The records of this body having been lost during

1 See pp. 1549, 1550.

A .: A .: SCOTTISH RITE

the anti-Masonic period, nothing is known concerning these degrees until the re-organization in 1847. From the year 1853 the Grand Council has met regularly and great prosperity has followed. It is asserted that Hiram Council, at Worcester, with 1,070 members in 1897, is the largest council of Royal and Select Masters in the world.

Michigan.

The Grand Council of Connecticut had chartered three councils in the State of Michigan, and these, by their delegates, met in convention on January 13, 1858, and organized a Grand Council for the State. In 1856 that Grand Council granted a Charter for a council at Detroit. This Grand Council is independent, and chapter-made Royal and Select Masons are not in favor.

Minnesota.

The Grand Council of Iowa having chartered three councils in Minnesota, December 12, 1870, these three by their delegates organized a Grand Council. The council which had been chartered by the Grand Council of New York in 1855 soon became dormant. This Grand Council is a member of the General Grand Council.

Mississippi.

From our careful examination into the early history of Cryptic Masonry in the State of Mississippi, we find that John Barker, before mentioned as agent for the Southern Supreme Council, established at Natchez, Miss., a Grand Council of Princes of Jerusalem in 1829, which assumed the control of the Royal and Select Master's degrees, and under the auspices of the Council of Princes of Jerusalem seven councils were organized, and these by their delegates organized a Grand Council January 19, 1856. After the close of the war, in 1865, a number of the councils having surrendered their charters, and others having become dormant, the Grand Council, which had assembled annually, in 1877 adopted a plan which became widely known as the "Mississippi Plan," which provided:

"Each Royal Arch Chapter shall hereafter open within its bosom, under its charter, as a Chapter of Royal Arch Masons, a Council of

Royal and Select Masters; the officers of the Chapter corresponding in rank to those of the Council.

"All the Royal Arch Masons who have not received the degrees of Royal Master and Select Master shall be entitled to have the same conferred or communicated on their request and without charge; but candidates who shall hereafter receive the Royal Arch degree shall, immediately thereafter, and in connection with the Royal Arch degree, receive the degrees of Royal and Select Master without additional charge."

The Grand Council was dissolved, and this plan was adopted in many jurisdictions, the General Grand Chapter having placed on record at Lexington, Ky., at the meeting September 16, 1853, the following resolution:

"Resolved, That this General Grand Chapter and the governing bodies of Royal Arch Masonry affiliated with, and holding jurisdiction under it, have no rightful jurisdiction or control over the degrees of Royal and Select Master."

"Resolved, That this General Grand Chapter will hereafter entertain no question or matter growing out of the government or working of these degrees while in their present position."¹

All of the independent jurisdiction except Iowa, which adopted the "Mississippi Plan," have rescinded the same and returned to the council organization. In 1888 the Grand Council of Mississippi at its session that year adopted the following:

"Resolved, That the Grand Royal Arch Chapter hereby releases control of the Cryptic Degrees and recommends that the Grand Council of Royal and Select Masters resume its former jurisdiction of the degrees.

"That Chapters are hereby prohibited from communicating and conferring the Cryptic Degrees, recognizing the authority of the Grand Council in all matters pertaining to said degrees." In February, 1888, the Grand Council of Mississippi met, six of the officers being of those elected in 1877. Six councils were represented.

At the sixth triennial assembly of the General Grand Chapter, which met in Baltimore, Md., October 11, 1897, the following paper was unanimously adopted:

"Whereas, The report of Companion Josiah H. Drummond as

¹ Proceedings of the General Grand Chapter, 1856, p. 317.

chairman of the Committee on Correspondence of the Grand Council of Maine for the year 1894, and the Address of Companion Frederic Speed, Grand Master of the Grand Council of Mississippi for the year 1895, present facts that conclusively show that a misunderstanding has existed in the minds of our Companions in Mississippi for some years past, as to the attitude of General Grand Council towards the Grand Council of Mississippi; therefore be it

"Resolved, That the General Grand Council, through its Grand Master, extend to the Companions of the Grand Council of Mississippi its fraternal greetings and its best wishes for the prosperity of the Cryptic Rite in Mississippi."¹

Also this minute appeared: "Most Illustrious Frederic Speed, Grand Master of the Grand Council of Mississippi, was announced and received with the Grand Honors, escorted to the East, and greeted by the Most Puissant Grand Master in a happy and felicitous manner.

"Companion Speed thereupon addressed the General Grand Council in very eloquent language; thanking the Puissant Grand Master for the cordiality of his reception, etc. The above preamble and resolution was then read and Companion Speed spoke feelingly as follows:

"Most Illustrious Sir and Companions:

"When I say that the reading of the resolution, which I have just heard, affords me the most sincere satisfaction and pleasure, I but feebly voice the emotions of my heart. If I know myself or the great-hearted men who comprise the Cryptic Masons of Mississippi, I can honestly say that we have taken no pleasure in the long estrangement which has unfortunately divided us, and I am sure they will receive with no less happiness than I now do, the message of peace and good will which come to us, through the action of this most illustrious Body. Receive then, Sir, this right hand as a pledge, in their name, of reconciliation and peace, given with a determination to forget the past, and to strive in the bonds of friendship and brotherly love, with you, for the upbuilding of the temple of the Lord, letting the past bury its dead, and acting in the living present, heart within and God overhead. Whom God hath joined together, let no man put asunder."²

¹ Proceedings General Grand Council, 1897, p. 79.

² Ibid., p. 82.

Missouri,

It is said by very good authority that Cross, in his tour through the West, conferred the Select degree in Missouri; in what year is uncertain. Also it is said that the Royal degree was introduced as early as 1828. In 1841 there were three councils in the State: one in St. Louis, one at Palmyra, and where the other was located the present writer can not recollect. At that time, 1841-42, he was in St. Louis and received the Royal and Select degrees in Missouri Council, No. 1, at St. Louis, about the time the Grand Council met. Immediately after the Grand Council closed he wrote up and recorded the transactions of the Grand Council.

These bodies became extinct, as well as some councils which had been chartered by the Grand Council of Kentucky. May 21, 1864, the Grand Council was organized.

In 1848, the writer having gone to Independence to construct a local railroad, found the Council degrees incorporated in the chapter by the Charter, to be worked subsequent to the Royal Arch.

Montana.

The following councils in Montana received dispensations from the General Grand Council, *viz.*:

Glendive, at Glendive.....	{ April 22, 1896. Dispensation. October 12, 1897. Chartered.
Custer, at Miles City.....	{ October 24, 1897. Dispensation. Annulled.
Adoniram, at Livingston	{ May 13, 1897. Continued.
Mystic, at Bozeman	{ May 20, 1897. Continued.
Zabud, No. 2, at Butte	{ May 22, 1897. October 12, 1897.
Montana, at Dillon	{ October 24, 1897. Annulled.
Deer Lodge, at Deer Lodge	{ June 10, 1897. Annulled.
Anaconda, at Anaconda	{ June 11, 1897. Annulled.
Hellgate, at Missoula	{ September 1, 1897 Continued.
Hiram, at Kalispell	{ September 2, 1897 Annulled.

These councils were all reported at the triennial of the Supreme Council in 1897.

Nevada.

The following councils were organized by dispensations issued by the Grand Officers of the General Grand Council for Nevada.

	Dispensation.
Carson, at Carson	{ September 3, 1896. Continued.
Mountain, at Virginia City	{ September 4, 1896. Continued.
Reno, at Reno	{ September, 1896. Continued.
Eureka, at Eureka	{ September 21, 1896. Continued.

These were reported to the triennial of the General Grand Council in 1897.

New Mexico.

The following councils were granted dispensations, by the Officers of the General Grand Council, for New Mexico, viz.:

Deming, No. 1, at Deming	{ April 8, 1887. November 19, 1889.
Las Vegas, at Las Vegas	{ March 16, 1895. Annulled.
Santa Fé, at Santa Fé	{ May 1, 1895. Continued.
Hiram, at Albuguerque	{ May 7, 1895. Annulled.
Alpha, at Raton	{ May 11, 1895. Annulled.

Nebraska.

Omaha Council was organized July 8, 1867, by a Charter from the Supreme Council of the Southern Jurisdiction. Two other councils were chartered by the Grand Council of Kansas. The Grand Council was formed by the delegates of the above-mentioned three councils, November 20, 1872. In 1878 the councils adopted the "Mississippi Plan." In 1886 the Grand Council was revived, and then afterward joined the General Grand Council, where she is now.

New Hampshire.

August 5, 1815, four Companions organized a council of Royal Masters at Hopkinton, N. H. J. L. Cross, in 1819, instituted another council of Select Masons, at Hopkinton; these two were united in 1822. On July 9, 1823, a Grand Council was formed. During the period from 1835 to 1855 the councils were dormant. The above two councils, Orphan and Columbian, after 1855 were revived, and Adoniram Council, which had been chartered by the Grand Council of Connecticut, united and formed a Grand Council, June 11, 1862.

New Jersey.

Kane Council, No. 11, was chartered by the Grand Council of New York; and two other councils, *viz.*, Scott, No. 13, at New Brunswick, and Gebal, No. 14, at Trenton, were chartered by the Grand Council of Pennsylvania. These three councils organized the Grand Council, November 26, 1860. It has always been an independent Grand Council.

New York.

The earliest time when we find any organization in the State of New York of the Council degrees is September 10, 1810; at which time a meeting of Royal Masters was held in St. John's Hall, in New York City, and a council of Royal Masters was opened, with Companion Thomas Lowndes presiding; and it was determined to organize a Grand Council to be called Columbian Council of Royal Master Masons for the City of New York. Thomas Lowndes was elected and installed Thrice Illustrious Grand Royal Master. Nineteen members, Royal Master Masons, were present. It is thought, and no doubt correctly so, that this was the very first council formed, and was regarded as authority, as on the evening of December 6, 1817, a petition was received from a council organized in Boston, asking the sanction of Columbian Council for its formation. This was granted, and Benjamin Gleason was recognized as T. I. G. M. of the said new council.

From the records of Columbian Council it appears that a council of Knights of the Round Table was convened, as also a Chapter of

Illustrious Knights of the Holy Order of the Garter, wherein Companions were installed Knights of the Illustrious and Invincible Order of St. George of Cappadocia, by which latter title the Order was sometimes known.

Thomas Lowndes was annually elected T. I. G. R. M. from the organization, September 2, 1810, to July 9, 1820, and presided at every meeting. Five Companions received the degree of Super-excellent Master December 22, 1817. There is no record of the Select Master's degree earlier than November 25, 1821. In January, 1823, it was "*Resolved*, That it is expedient to form a Grand Council of Royal Master Masons and Select Masons for the State of New York, and that T. I. G. R. M. Thomas Lowndes be requested to call a convention of all the present and past Grand Royal Masters and Deputy Grand Royal Masters and Grand Wardens in this city, in order to carry into effect the formation of said Grand Council." A convention was held January 25, 1823, and a Grand Council of Royal and Select Masters was formed Thomas Lowndes being elected M. I. R. G. M., which council continued until June 4, 1860, when it united with a Grand Council which had been organized in the city of New York, May 27, 1854, by delegates from councils of Royal and Select Masons working under the authority of the Grand Council of Connecticut. In the formation of the General Grand Council the New York Companions took a very active part.

North Carolina.

At a very early date Masonry was introduced into North Carolina. A Warrant for a lodge, called "Royal White Hart Lodge," at Halifax, was granted August 21, 1767, and the first Grand Council was formed at Fayetteville, June 21, 1822. At the convention for the organization of this body five councils were represented, they having all been chartered by the Supreme Council of the Southern Jurisdiction. The effort to incorporate the degrees with the chapter did not succeed. The Grand Chapter had endeavored to control the degrees, but in 1859 "*Resolved*, That this Grand Chapter, after due consideration, hereby disclaims for itself and subordinates any and all control over the Royal and Select Master's degrees." The Supreme Council of Southern Jurisdiction chartered, by Dr. A. G. Mackey, as agent, three councils, and a Grand

Council was organized June 6, 1860. In consequence of the War no meeting was held until 1868. This body was dissolved in 1883, and the degrees were turned over to the Grand Chapter. In 1887 the Grand Council was re-organized. It is now an independent body.

Ohio.

John Barker, the agent of the Supreme Council Southern Jurisdiction, at a very early day organized five councils in Ohio. J. L. Cross had been in Ohio perhaps as early as 1817; some authors say 1816; we think not, as he had not received his commission as General Grand Lecturer until the session of the General Grand Chapter, June 8, 1816. Moreover, as the General Grand Chapter refused the proposition, at that session, to incorporate the degrees in the chapter work, and as it is asserted by Folger that Cross went to Baltimore, and the paper issued by Eckel and Niles is dated in 1817 (May 27th), the very fair presumption is that Cross did not attempt to confer the Select prior to the date of his authority, whether that "paper" was genuine or a forgery, as Companion Josiah H. Drummond has pronounced it to be. Companion Drummond has traced the "itinerary" of Cross through Western Pennsylvania, Ohio, Kentucky, Mississippi, and Louisiana, and thence to Baltimore, May, 1817. In 1827 a council was established at Cleveland by Charter from the Grand Council of New York. A Grand Council for the State was organized January 6, 1830, by the five councils organized by John Barker.

North Dakota.

The following councils received their dispensations from the Officers of the General Grand Council, *viz.*:

Dispensation.	Charter.
Casselton, No. 1, at Casselton, December 7, 1888.	November 10, 1889.
Hilkiah, No. 2, at Jamestown, September 1, 1893.	August 21, 1894.
	Dispensation.
Hiram Council, at Valley City	{ December 31, 1895. Continued.
Rae Council, at Grand Forks	
	{ January 2, 1896. Annulled.

	Dispensation.
Zabud Council, at Devil's Lake	{ January 3, 1896. Annulled.
Towner Council, at Towner	{ January 6, 1896. Continued.
Adoniram Council, at Fargo	{ February 15, 1896. Continued.
Damascus Council, at Wahpeton	{ February 18, 1896. Annulled.
Mizpah Council, at Park River	{ March 15, 1896. Annulled.
Tyrian Council, at Lisbon	{ April 6, 1896. Continued.
Bismarck Council, at Bismarck	{ April 20, 1896. Continued.

Oregon.

By authority of the General Grand Master of the General Grand Council, Companion A. H. Hodson was authorized to convene not less than five Royal and Select Masters, and to confer the degrees upon not exceeding nine Royal Arch Masons. A dispensation was issued to Pioneer Council, U. D., at McMinnville.

Three councils convened February 3, 1885, and formed a Grand Council for Oregon under the jurisdiction of the General Grand Council.

Pennsylvania.

October 26, 1847, two councils in Pennsylvania, and one in Texas, formed the Grand Council. This Grand Council disbanded and was re-organized in 1854. Papers of the meetings from 1847 to 1851 have been found, but it seems no regular records were ever kept. It was proposed in the Grand Council, in 1854, to turn the degrees over to the control of the Council of Princes of Jerusalem, which, however, was not accepted; and December 30, 1854, the Grand Council was re-organized. It is an independent jurisdiction, but does not recognize those who have received the degree in chapters.

Rhode Island.

A meeting of Royal Masters was convened in Providence, R. I., March 28, 1818, and May 19th "*Resolved*, That the degree of Select Master be attached to this Council." J. L. Cross gave that council

a Charter in 1819. For many years this council was dormant, and no meeting was held until 1841. The Grand Councils of Massachusetts and Connecticut issued charters to other councils, and the Supreme Council of Northern Jurisdiction A..A..S..R.. gave authority to confer the degrees of Royal and Select Master upon a Charter for a Lodge of Perfection at Newport, which in 1870 was revoked, a Grand Council having been organized on October 30, 1860, from which a Charter was obtained. This Grand Council is independent.

South Carolina.

In the preface to this chapter much of the early history of the Cryptic degrees has already been given in detail. The Supreme Council of the Southern Jurisdiction had great influence in the direction of the government of the Cryptic Rite in South Carolina. Nine councils of Royal and Select Masons were chartered in the years of 1858 and 1859. The Supreme Council in 1860 waived its rights, and a Grand Council was regularly formed, February 15, 1850. In 1880 the "Mississippi Plan" was adopted. However, in 1881, the Grand Council was re-organized and became a member of the General Grand Council.

South Dakota.

The following councils received dispensations from the Officers of the General Grand Council in South Dakota:

Alpha Council, No. 1, at Sioux Falls	{	D. April 11, 1891.
		C. July 21, 1891.
Lakota " " Deadwood	{	September 7, 1895.
		Annulled.
Black Hills Council " Hot Springs	{	September 9, 1895.
		Annulled.
Zabud " " Yankton	{	September 25, 1895.
		Annulled.
Scotland " " Scotland	{	October 1, 1895.
		Surrendered.
Omega " " Salem	{	October 10, 1895.
		Continued.
Hiram " " Canton	{	October 30, 1895.
		Annulled.
Koda " " Flandreau	{	October 31, 1895.
		Surrendered.

Brookings Council, No. 1, at Brookings	{	November 1, 1895. Annulled.
Aberdeen " " Aberdeen	{	November 4, 1895. Annulled.
Adoram " " Webster	{	November 6, 1895. Annulled.
Emanuel " " Millbank	{	November 14, 1865 Annulled.
Mitchell " " Mitchell	{	November 28, 1895. Annulled.
Oriental " " Pierre	{	December 12, 1895. Annulled.
Mystic " " Huron	{	December 30, 1895. Surrendered.
Faulk " " Faulkland	{	December 31, 1885. Annulled.

Tennessee.

Two councils derived their authority to organize councils in the State of Tennessee from the Supreme Council of the Southern Jurisdiction. Two other councils had obtained charters from the Grand Council of Kentucky, and one other had received a dispensation from the Grand Council of Alabama. These five councils by their delegates organized a Grand Council, October 13, 1847.

This Grand Council united with the General Grand Council.

Texas.

From the history of the Cryptic Rite in Pennsylvania we learn that a council of Texas united with two councils in Pennsylvania in the organization of a Grand Council in 1847; hence these degrees must have been worked in a council in Texas at that time. June 24, 1856, a Grand Council for Texas was organized, which was disbanded in 1864, and the degrees remanded to the chapters, which can be conferred upon Royal Arch Masons only.

Utah.

The following dispensations were issued by the Grand Officers of the General Grand Council to form councils in Utah, viz.:

Summit Council, at Park City, September 2, 1895, which was very soon surrendered.

Utah, No. 1, at Salt Lake City, dispensation granted February 13, 1892, and chartered August 21, 1894.

Vermont.

After J. L. Cross had made his tour in the South and West he was in Vermont in July, 1817. In a letter from Haverhill, N. H., he says: "I made no further tarry until I arrived at Windsor, Vermont, where I established a council of Select Masons. They, finding that the degree was full of information, and that it could not be given antecedent to that of the Royal Arch, wished for a warrant to empower them to confer it, upon which I granted them one in the words following." (Omitted.)

Cross was made a Royal Arch Mason in Champlain Chapter, No. 1, at St. Albans, Vt, July 11, 1815, while engaged as a lecturer to the lodges.

Companion Drummond claims that the first permanent body of Select Masters was the council formed by Cross at Windsor, Vermont, July 5, 1817. He founded a council at Bradford, also, in 1817.

By himself or by his deputy, John H. Cotton, Cross organized nine councils.

The Warrant of the council at Bennington having been preserved, we give it, as follows:

"To all whom these presents may come,

GREETING:

"Know ye, that by the high powers in me vested by the Thrice Illustrious and Grand Puissant in the Grand Council of Select Masters, held at the City of Baltimore, in the State of Maryland, North America, I do hereby constitute and empower the within named Companions to form themselves into a regular Council of Select Masters, and I do hereby appoint my worthy Companion Samuel S. Young to be first Thrice Illustrious Grand Master, Zacheus Hovey, to be first Illustrious Deputy Grand Master, and Oliver Abell to be the Principal Conductor, and I do grant them full power, with their constitutional number, to assemble, open, and confer the Degree of Select master, and do all other business appertaining to said degree, for which this shall be their warrant, until revoked by the Grand Puissant. And I do further direct said Council to hold its meetings at Bennington, Bennington County, and State of Vermont. Given under my hand at Bennington this twenty-third day of May, A.D. 1818, and of the Discovery 2818.

"Signed

JOHN H. COTTON,

"Acting Deputy Puissant in Grand Council"

These councils continued until 1826-1828. During the Morgan anti-Masonic period, like all other branches of Masonry, nothing was done. A re-organization took place in 1849, under their original warrants, until 1854. Four of these councils organized a Grand Council August 10, 1854. Vermont united with the General Grand Council.

Virginia.

In the previous history of the rite we have shown that Myers remained for some time in Virginia and was in Norfolk and in Richmond, where he communicated the degrees of Royal Master and Select of Twenty-seven, under his authority as Inspector of the A.·A.·S.·. Rite. Jeremy L. Cross, it is said, established a council of Select Masters in December, 1817, in Richmond, and soon thereafter in Portsmouth and other towns.

A Grand Council was formed in 1820 and often failed to meet, as in 1829 to 1839, and in 1847 was dissolved, and the degrees were remanded or rather turned over to the chapters, where they have remained to the present time.

These degrees are conferred in the chapter preceding the Royal Arch under the mistaken idea that the incidents therein related occurred at the building of the Temple, and those of the Royal Arch were laid at the rebuilding thereof, forgetting that, as allegorical representations, they should of necessity for proper instruction be, as they were originally designed, subsequent to the "Mason of the Royal Arch," or thirteenth of the A.·A.·A.·R.·.

Washington.

The General Grand Council by its Officers issued dispensations to Washington to organize councils as follows:

	Dispensation.	Chartered.
To Tacoma, No. 1, at Tacoma	February 9, 1891.	July 21, 1891.
To Colfax, No. 2, at Colfax	June 9, 1893.	August 21, 1894.
To Mt. Baker, No. 3, at New Whatcom.....	June 14, 1893.	August 22, 1894.
To Spokane, No. 4, at Spokane	July 8, 1893.	August 21, 1894.
To Pomeroy, No. 5, at Pomeroy	July 16, 1893.	August 22, 1894.
To Seattle, No. 6, at Seattle	May 9, 1894.	August 21, 1894.

These councils, by order of the General Grand Master, issued May 31, 1895, were assembled by their representatives, June 5, 1895, and the adoption of a constitution and the election of their Officers were duly and regularly constituted, and the Officers were installed by the Special Deputy, Elijah M. Beatty, and so reported to the General Grand Recorder.

Zabud Council, No. 7, at Walla Walla, had a dispensation granted December 8, 1874, and was reported for 1895. This council became a constituent, under a Charter, of the Grand Council of the State, chartered June 8, 1896.

Wisconsin.

The Grand Council of Ohio chartered three councils in Wisconsin, and a Grand Council was organized by the delegates of these three October 28, 1857. By arrangement and consent the degrees were turned over to the Grand Chapter in 1878. In 1881 a Grand Council was again organized by delegates from forty-nine councils.

Wisconsin is an independent Grand Council.

Wyoming.

The following dispensations were issued by the Grand Officers of the General Grand Chapter for Wyoming, viz.:

Cheyenne Council, at Cheyenne	{	June 24, 1895.
		Surrendered June 5, 1896.
Laramie " " Laramie	{	July 4, 1896.
		Annulled.
Zabud " " Evanston	{	September 2, 1895.
		Annulled.
Tyrus " " Green River	{	September 3, 1896.
		Surrendered.
Sheridan " " Sheridan	{	May 12, 1896.
		Annulled.

ABSTRACT OF RETURNS OF SUBORDINATE COUNCILS FOR THE YEAR 1896.

Name of Grand Lodge.	Held at.	Membership.
Washington, No. 1	Washington, D. C.	125.

CHAPTER LVIII

HISTORY OF THE GRAND AND SUBORDINATE COMMANDERIES IN THE SEVERAL STATES AND TERRITORIES OF THE UNITED STATES

Templar.

THE records of the early conclaves of the General Grand Encampment are the only sources of any definite information in regard to the introduction of the Templar Order into the several Masonic jurisdictions. Whoever, therefore, has gone over the pages of those early records for any *extended* information will say, that for want of order and exactness they will compare with any other *defective* records now extant. Discrepancies in dates continually occur, even within a few pages of each other, so that the compiler, after a diligent search and memoranda taken, will very soon have to alter the same. We can refer any reader, for example, to the statistical tables of the dates of organization of the several Grand Commanderies in the Proceedings of 1880 and of 1895, for comparison. In many cases in the reports of the General Grand Officers, as to the formation of the subordinate commanderies, it is said frequently: "Since the last conclave I have issued dispensations to the following subordinate Commanderies," without giving any dates whatever, leaving the compiler the difficult task of searching in the future pages for the definite years, months, and dates to find when these commanderies had their dispensations issued to them. This was a constant source of error in dates, and, frequently, was a great annoyance in the preparation of this sketch. We trust that should errors in dates be found hereafter the finder will consider the quandaries of the compiler, and especially if he should undertake to rectify our errors.

We have endeavored sedulously and faithfully, as historian, to gather all the facts upon record, to give a truthful narrative of the formation of the subordinate bodies, as well as the constitutions of them also; and the organization of the Grand Commanderies in the

several jurisdictions. While all this has been an arduous task, there has been mingled with the task quite a pleasurable sensation in traveling over the "sacred ground" of "Templarism"; and our "pilgrimage" has yielded much satisfaction in making the acquaintance of so many distinguished knights who wrought so hard in building up an institution, which from the small beginnings of the eighteenth century, at its end, has resulted, in the close of the nineteenth century, in one of the most magnificent "Orders" the world has ever witnessed.

The Knight Templar Order, as it is now constituted in the United States, has no rival in the world, and to emphasize its influences for good the Grand Encampment of the United States should, at its very next conclave, carry out the design of our most distinguished and lamented Knight, J. Q. A. Fellows, to make the city of Washington the permanent headquarters, and erect such a Temple as would be commensurate with the dignity and importance of the Magnanimous Order of Knights Templars of the United States of America.

Note.—Dates of all the blanks marked with an asterisk could not be ascertained.

Alabama.

The Grand Commandery of Knights Templars for the State of Alabama was organized December 1, 1860, by the representatives of five commanderies, *viz.*:

Washington (Marion), at Marion; chartered in 1844. (No history.)

Mobile, No. 2, at Mobile; formed April 7, 1848, and chartered May 8, 1851.

Tuscumbia, No. 3, at Tuscumbia; formed August 1, 1848; chartered October 12, 1850.

Montgomery, No. 4, at Montgomery; formed October 17, 1850; chartered September 19, 1853.

Selma, No. 5, at Selma; formed May 15, 1838; chartered September 16, 1859.

Arizona.

The Grand Commandery of Arizona was formed by Warrant from the Grand Encampment of the United States November 16, 1893.

The first commandery was Arizona, No. 1, at Tucson, February 22, 1883;¹ by dispensation, which was surrendered September 2, 1897. Then followed:

Ivanhoe, No. 2, at Prescott, by dispensation September 30, 1892, and chartered December 2, 1892.

Phoenix, No. 3, Phœnix, by dispensation October 7, 1892, and chartered November 14, 1892.

Arkansas.

The Grand Commandery of Arkansas was constituted May 25, 1872.

The first commandery organized was Hugh de Payens, No. 1, at Little Rock, December 20, 1853,² which received a Charter September 10, 1856.

Hugh de Payens, No. 3, at Fort Scott; dispensation granted April 13, 1867; chartered September 18, 1868; constituted October 11, 1868.³

Jacques De Molay, No. 3; dispensation granted December 30, 1868,⁴ and chartered September 21, 1871.⁵

Baldwin, No. 4, Fayetteville; dispensation April 28, 1871;⁶ chartered September 21, 1871.⁷

Bertrand de Guesclin, Camden; dispensation issued April 13, 1867;⁸ chartered September 10, 1868.⁹

California.

The Grand Commandery of Knights Templars for California was organized August 10, 1858, under the Warrant of the then Grand Master of the General Grand Encampment of the United States, Sir William B. Hubbard.

The first commandery formed in California was San Francisco, No. 1, at San Francisco, November 10, 1852, and chartered November 1, 1853.

The second was Sacramento, No. 2, at Sacramento, May 23, 1852, and chartered February 6, 1854.

The third was Pacific, No. 3, at Columbia, February 20, 1856, and chartered September 10, 1856.

¹ Proceedings General Grand Encampment, 1883, p. 19.

² *Ibid.*, 1865, p. 114.

³ *Ibid.*, 1868, p. 63.

⁴ *Ibid.*, p. 30.

⁵ *Ibid.*, 1871, p. 224.

⁶ *Ibid.* p. 31.

⁷ *Ibid.*

⁸ *Ibid.*, 1868, p. 13.

⁹ *Ibid.* p. 65.

Colorado.

The Grand Commandery was constituted March 14, 1876. The commanderies were:

Colorado, No. 1, at Denver; dispensation granted January 13, 1866, and chartered September 10, 1868;¹ constituted January 26, 1869.

Central City, No. 2, at Central City; dispensation granted November 8, 1866,² and chartered September 18, 1868.³

Pueblo, No. 3, at Pueblo; dispensation granted September 10, 1874, and chartered December 3, 1874.

Connecticut.

The Grand Commandery was constituted between 1829 and 1832, according to the list in the Proceedings of 1856, p. 358; but in the Proceedings of 1898 the date is given September 13, 1827. We assume the first date to be correct, as in the Proceedings of the Grand Encampment we find the Grand Encampment of Connecticut represented at the fifth meeting, held November 29, 1832, but not so represented at the fourth meeting, September 14, 1829, nor is any mention made of the formation of the Grand Body in the minutes of said meeting of 1829, which would have been if the Grand Commandery had been organized. The first commandery formed was Colchester, at Colchester; Charter dated September, 1819. The second was New Haven, at New Haven; dispensation issued November 5, 1825, and chartered September, 1826.

Note.—At the second meeting of the Grand Encampment, Proceedings of September 16, 1819, p. 6, say: "*Resolved*, That a charter of *recognition* be granted to the encampment of Colchester in Connecticut."

At the conclave held in Pittsburg, 1898, the tabular statement for that year shows eleven subordinate commanderies.

Note.—The report of the General Grand Recorder for 1880, in tabular statement, p. 136, under Grand Commandery of Connecticut, says: "Organized July, 1796."

¹ Proceedings General Grand Encampment, 1868, p. 65.

² *Ibid.*, p. 12.

³ *Ibid.*, 1871, p. 29.

Dakota Territory.

Dakota, No. 1, at Deadwood; constituted August 14, 1881. Cyrene, No. 2, at Sioux Falls; dispensation was granted August 14, 1881, and was formed November 22, 1881; chartered August 23, 1883.

February 25, 1882, dispensation was granted to De Molay, No. 3, at Yankton; formed March, 1882; chartered August 23, 1883.

March 23, 1883, dispensation granted to Tancred, No. 4, at Bismarck; formed April 12, 1883; chartered August 23, 1883.

Fargo, No. 5, at Fargo; dispensation issued June 24, 1883.

Delaware.

The first commandery formed in Delaware was St. John's, No. 1, at Wilmington; dispensation dated March 10, 1868; chartered September 18, 1868.

District of Columbia.

The first commandery organized in the District of Columbia was Washington, No. 1, in Washington City, December 31, 1824; chartered January 14, 1825.

Columbia, No. 2, received a dispensation January 18, 1863, and a Charter September 7, 1865.

Potomac, No. 3, in Georgetown, received a dispensation March 4, 1870, and a Charter September 22, 1871.

De Molay, in Washington City, received a dispensation February 19, 1872, and a Charter December 3, 1874. This commandery is mounted.

Orient Commandery, in East Washington, received a Charter August 29, 1895, and was constituted October 19, 1895.

Four of these commanderies, *viz.*: No. 1, No. 2, No. 4, and No. 5, met in convention January 14, 1896, and organized the Grand Commandery of the District of Columbia by authority of a Warrant of the Grand Encampment dated December 2, 1895.

Potomac, No. 3, united with the Grand Commandery at its Organization under the Warrant, January 4, 1896.

Florida.

The Grand Commandery was organized August 15, 1895, by a Warrant dated August 1, 1895. The following commanderies were organized:

Cœur de Lion, No. 1, at Warrington; dispensation June 20, 1868; Charter * 1868; renewed December 3, 1874.

Damascus, No. 2, Jacksonville; dispensation May 18, 1870; chartered September, 1871.

De Molay, No. 3; dispensation March 17, 1851.

Olivet, No. 4; dispensation * 1889.

Pulaski, No. 5; dispensation February 21, 1893.

Plant City, No. 6; dispensation March 10, 1895.

Georgia.

The Grand Commandery was organized April 25, 1860, by authority approved September 16, 1859.

Georgia Encampment, No. 1, at Augusta, received a dispensation dated in 1823, and chartered May 5, 1823.

St. Omar, No. 2, at Macon; dispensation granted July 26, 1848, and chartered September 11, 1850.

St. Aldemar, at Columbus; dispensation dated December 1, 1857.

Cœur de Lion, at Atlanta; dispensation dated May 14, 1859, and chartered September 17, 1859.

Idaho.

The following commanderies have been instituted in Idaho:

Idaho, No. 1, at Boise City; dispensation May 24, 1882; formed September 13, 1882; chartered August 23, 1883.

Lewiston, No. 2, at Lewiston; chartered August 11, 1892.

Moscow, No. 3, at Moscow; chartered August 11, 1892.

Gate City, No. 4, Pocatello; chartered August 29, 1895; instituted December 14, 1895.

Illinois.

The Grand Commandery was organized October 27, 1857, by authority of the Grand Encampment June 27, 1857, and duplicated September 15, 1857. The subordinate commanderies were:

Apollo, No. 1, at Chicago; by dispensation 1844 to 1847, and

chartered September 14, 1847. The tabular statement in Proceedings for 1856, p. 358, is indefinite.

Belvidere, No. 2, Alton; by dispensation March 25, 1853, and chartered November 1, 1853.

Central, or Centre, No. 3, at Decatur; by dispensation July 26, 1856; extended October 24, 1856; and by order of Grand Encampment continued until the ensuing session of the State Grand Commandery.

Peoria, No. 4, at Peoria; by dispensation July 25, 1853, and Charter September 19, 1853.

Freeport, No. 5, at Freeport; by dispensation June 10, 1857, and Charter September 16, 1859.

Indiana.

The Grand Commandery of Indiana was organized May 16, 1854, by authority of the Grand Encampment April 24, 1854. The commanderies in Indiana were:

Roper, No. 1, at Indianapolis; by dispensation May 14, 1848, and Charter October 16, 1860.

Greensburg, No. 2, at Greensburg; by dispensation January 25, 1851, and Charter September 19, 1853.

La Fayette, No. 3, La Fayette; by dispensation April 2, 1852, and Charter September 19, 1853.

Fort Wayne, No. 4, at Fort Wayne; by dispensation May 13, 1853, and Charter September 19, 1853.

Indian Territory.

The Grand Commandery was instituted by authority of the Grand Encampment December 17, 1895, the Warrant being issued November 28, 1895, at Muscogee. The subordinate commanderies were:

Muscogee, No. 1, at Muscogee; by dispensation dated December 6, 1892, and Charter *

Chickasaw, No. 2, at Purcell; by dispensation dated May 31, 1894, and Charter August 29, 1895, and constituted October 29, 1895.

McAllester, No. 3, at McAllester; by dispensation dated July 14, 1894, and Charter August 29, 1895, and constituted October 14, 1895.

Iowa.

The Grand Commandery of Iowa was organized June 6, 1864, by authority of the Grand Encampment September 19, 1859. The subordinate commanderies were:

De Molay, of Iowa, No. 1, at Muscatine; by dispensation March 14, 1855, and Charter September 10, 1856.

Palestine, No. 2, at Iowa City; by Charter at once, September 15, 1856.

Siloam, No. 3, at Dubuque; by dispensation February 9, 1857, and Charter September 16, 1859.

Des Moines, No. 4, at Des Moines; by dispensation July 10, 1857.

Kansas.

The Grand Commandery was constituted December 29, 1868, by Warrant from the General Grand Master, Sir William Sewall Gardner, December 2, 1868. The subordinate commanderies were:

Leavenworth, No. 1, at Leavenworth; dispensation issued February 10, 1864; chartered September 6, 1865.

Washington, No. 2, at Atchison; dispensation issued June 5, 1865; chartered September 6, 1865.

Hugh de Payen, No. 3, at Fort Scott; dispensation issued April 13, 1867; chartered September 18, 1868.

De Molay, No. 4, Lawrence; dispensation issued March 10, 1868; chartered September 18, 1868.

Kentucky.

The Grand Commandery was constituted October 15, 1847, by Warrant from the Grand Encampment. The subordinate commanderies were:

Webb, No. 1, at Lexington; by Charter at once, January 1, 1826.

Louisville, No. 2, at Louisville; by dispensation January 2, 1840, and by Charter September 17, 1851.

Versailles, No. 3, at Versailles; by dispensation April 26, 1842, and Charter * 1844.

Frankfort, No. 4, Frankfort; by Charter September 15, 1847.

Montgomery, No. 5, at Mt. Sterling; dispensation¹ some time between 1842 and 1847; by Charter September 15, 1847.

There is no note of a dispensation issued to Frankfort Encampment, but in the account current of the G. G. Recorder we find that Frankfort Encampment, Kentucky, paid for dispensation \$90, also that Montgomery Encampment did the same, and as in the latter case the tabular statement, p. 358, mentions that dispensation as between 1842 and 1847, Frankfort Encampment may have been in the "same boat." We have been forcibly impressed, in reading over these old records, how very careless the General Grand Officers and also the recorders and committees were in omitting important dates in their reports, which omissions have cost this writer many, many weary hours in hunting up such data as would enable him to supply these important dates for the benefit of the future student of Masonic history.

Louisiana.

The Grand Commandery of Louisiana was organized by the Warrant of the Grand Encampment February 12, 1864.

The Invincibles, at New Orleans, was organized between 1826 and 1829, and a Charter was issued some time in 1829.

Indivisible Friends, No. 1. This encampment was chartered by the Grand Encampment of New York in 1826. Jurisdiction was transferred to the General Grand Encampment in 1838 and accepted.²

Jacob de Molay, No. 2, New Orleans; dispensation April 15, 1850; continued by order September 12, 1850, and chartered April 25, 1851.

Maine.

The Grand Commandery was constituted May 5, 1852, for the State of Maine.

Portland Encampment, No. 2, is the first one on the printed list

¹ From Proceedings of Grand Encampment, 1847, we copy this:

"Resolved, That the Report of the Committee of Dispensations and New Encampments be so amended as to permit Frankfort and Montgomery Encampments to join in the petition for the formation of a Grand Encampment in the State of Kentucky." Which was rejected.

² Note at bottom of p. 358, Proceedings of General Grand Encampment, 1856.

of 1856 at Portland; dispensation issued between 1842 and 1847, and chartered September 14, 1847.

St. John's, No. 3, at Bangor; dispensation February 18, 1850, and chartered September 17, 1850.

We can not find any evidence in the body of the Proceedings of No. 1, but the "Register" at end of 1847 and 1850 Proceedings gives "Maine," No. 1, at Portland, * 1844, and chartered September 14, 1847.

Maryland.

The Grand Commandery was constituted January 23, 1871.

The first commandery instituted was Maryland, No. 1, at Baltimore. This encampment was first chartered by the Grand Encampment of Pennsylvania May 2, 1814, and it appears on the record of 1832 of the Grand Encampment of the United States. A resolution was passed admitting it under the jurisdiction of the General Grand Encampment, and directing that its Charter be endorsed by the General Grand Officers.¹

Baltimore, No. 2, Baltimore; by dispensation June 17, 1859, and Charter September 16, 1859.

We shall now follow the history of the Knight Templar Order in Maryland by Sir Knight Edward T. Schultz, to whom the whole world of Masonry is indebted for his four volumes of the history of Masonry in that State. The result of his labors to himself has been almost total blindness, brought about by his incessant application in search of the facts connected with Masonry in Maryland.

Sir Knight Schultz says:

"The writer has for many years given much time and attention to the investigation of the origin of Encampment No. 1 of this city, and while he has been fortunate in obtaining documents which clearly establish the date of its organization, and many interesting facts in reference to its early history, he has not, he regrets to state, anything but *theories* to offer in regard to the source whence it emanated."

He had been furnished by the Grand Recorder of the Grand Commandery of Pennsylvania, Bro. Creigh, with certified copies of several documents in his office, written in 1814 and 1815, by the

¹ Proceedings of General Grand Encampment, 1832, p. 32.

Officers of Encampment No. 1 of Maryland to the Grand Officers of the Grand Encampment of Pennsylvania, which had been recently formed and in which formation Encampment No. 1 had participated and was then a constituent. Here follow copies of several old documents under seal to prove the facts set forth.

In one of these documents is a Charter of "recognition" which allowed their claim to an original organization prior thereto—dated in 1790—as the letter from Archbishop Dobbin says: "I am induced to state that this Encampment insists in receiving its number and rank according to the date of its institution, the complete organization of which took place in the year 1790." Consequently we must class Maryland among the early jurisdictions where Templary had its origin. This Charter of "recognition," we must observe, was issued to "*Encampment of Knight Templars, No. 1, Maryland,*" thus showing that the demand made by the encampment, to have its rank and number agreeable to the date of its institution, was admitted to be a valid claim by the Grand Commandery of Pennsylvania, and thereby the year 1790 was fully recognized to be the date of the *complete organization* of Encampment No. 1, of Maryland.

Sir Knight Schultz shows by documents that this encampment has had a continued existence from 1790 to the present day, and is yet known by the same name. There is a *facsimile* of a Templar diploma shown and a copy of its text in print which shows that this Encampment No. 1 was in 1802 attached to Washington Lodge, No. 3, as Royal Arch Chapters and Encampments of Knights Templars in those early days were generally, if not wholly, held under warrants of Master Masons' Lodges.

In Webb's Monitors of 1802 and 1805 are shown three encampments in Maryland, *viz.*: Nos. 3, 13, and 24, and Sir Knight Schultz thinks they were Washington Lodge, No. 3; Concordia, No. 13; and Zion Lodge, No. 24; the first two located in Baltimore, and the last in Havre de Grace, Cecil County.

There is shown also another *facsimile* diploma issued by Encampment No. 1 to Philip P. Eckel, which Sir Knight Schultz thinks indicates that the encampment had severed its connection with Lodge No. 3 and had an independent organization, and says it must have been certainly as early as 1807, from a Masonic notice in the City Directory for that year, *viz.*: "Maryland Encampment

No. 1, Knights Templars, meets on the second Tuesday in every second month."

The copper-plate from which this diploma was printed is in the Archives of Maryland Commandery. It was designed by Philip P. Eckel and engraved by John Bannerman. An old lady named Elizabeth Sadds, living in Baltimore in 1881, aged ninety-four years, informed Sir Knight Schultz that she knew Bannerman well; that he came from Scotland in 1773 and was the first engraver who lived in Baltimore, and he died in 1809. The seal is the same on all the documents and was used until about 1814, when a new seal was made (which is shown). This latter seal was used until 1854, when the name was changed to its present title, "Maryland Commandery, No. 1." Sir Knight Schultz has only theories to suggest as to the source from which the encampment was originally formed. From traditions among the old members of the commandery it was supposed that the orders came from San Domingo with immigrants from that island. He says: "We for along time were inclined to believe that the encampment originated in the Rose Croix Chapter 'La Verite,' which was brought to Baltimore by the refugees from San Domingo; but the discovery of the 1802 diploma would indicate that, at that time at least, the Encampment was held under the authority of a Master Mason's Lodge."

Sir Knight Schultz refers to the list of degrees published by Cole and mentioned by us in Chapter LI.¹ In this list we enumerated the orders of the Red Cross, Knights Templar, and Knights of Malta, that were said to have been conferred by the Sublime Lodges, at Charleston, New York, and Newport in 1816.

Sir Knight William B. Hubbard, who was Grand Master of Templars, said: "I suppose that we owe the origin of Templar Masonry in the United States to a distinguished Sov.·Ins.· of the Scottish Rite."² Bro. A. G. Mackey thought that the Orders of Knighthood were introduced through the A.·A.·R.·, not the A.·A.·S.·R.·, for that system dates only from 1801, when it is well known that the Templar and Red Cross had both been worked as early as the South Carolina patent shows, in 1783. Bro. Robert Macoy, in his sketch of the Knights Templar of New York, says: "After a very careful examination of this important subject, we

¹ Ch. LI. of this work, p. 1310.

² Letter to T. S. Gourdin.

are impressed with the conviction that the introduction of the Order into this country was brought about somewhat in this wise: That a few Sir Knights, having received the Order in England, or Ireland, and having immigrated to this country, met together, as they became known to each other, by appointment, in a secluded place in New York and other parts of the country; and after testing each other by the best evidence in their possession, organized themselves into 'encampments' or 'conclaves,' and assumed control of 'territorial jurisdiction,' conferred the Orders, elected officers, issued diplomas, etc." "For the present, or something more reliable than any 'statement' yet presented can be accepted, we can offer nothing better as *authentic* history for the introduction of the Order of Knights Templar upon this Continent; nor do we deem it derogatory to the legitimacy of the 'transmission' or of the merits of the system of Templarism, to admit these conclusions. During the early period of the institution there was no organized body that possessed absolute authority to issue warrants, hence it was recognized as legal for any number of Sir Knights, having the *inherent right* to assemble in a secure place, apply the essential tests to each other, open an encampment, receive petitions and create Knights Templar."

Sir Knight Schultz concurs, somewhat, in the *theories* of Sir Knight Macoy, which he thinks "most worthy of acceptance," and says: "In every instance in which there is a mention of the Templar degree being conferred in this country prior to the year 1800, it is in connection with a Master Mason's Lodge. St. Andrew's, of Boston, and St. Andrew's Lodge, of Charleston, as has been stated, conferred the Order—the former in 1769 and the latter in 1783. The early encampments in Pennsylvania, Bro. Creigh says, were held under warrants of a Master's Lodge; and Encampment No. 1, of Maryland, as shown by the first diploma, was attached to Washington Lodge, No. 3."

After the organization of the Supreme Council of the A. A. S. R. at Charleston, in 1802, the Inspector-General took charge of all the degrees having no governing head, and as was stated by Cole, above referred to, "the Sublime Lodges at Charleston, Albany, and Providence conferred as many as fifty-five degrees."¹

¹ "Freemason's Library," 1826, p. 317.

Subsequent to 1800, "Encampments were formed by Knights who received the Orders from an Inspector, or *High Grade Mason*."

At the constitution of the Grand Encampment of New York, Elias Hicks, Orator of the day, said: "The numerous Encampments of Knights Templar now existing within this State being self-created bodies, are consequently governed by their own private and individual law, acknowledging no superior authority, because, in fact, none heretofore existed."¹

Sir Knight Schultz concludes, therefore, that Encampment No. 1 was organized in the same manner as those in New York were.

At the convention for the organization of the Grand Encampment in Pennsylvania, which met February 15, 1814, Sir Henry S. Keating was the delegate from Encampment No. 4, of Baltimore, Md.; who, on the election of Officers, which followed, was made G. St. B. Under the provision adopted therefor, a Charter of Recognition was granted to Encampment No. 1, of Baltimore, which has been referred to in this chapter.

After the organization of the General Grand Encampment of the United States, in New York City, June 20, 1816, Encampment No. 1, of Baltimore, came under its jurisdiction, but not until November 29, 1832, and an endorsement was made on the Charter of Recognition received from the Grand Encampment of Pennsylvania in 1814.

Sir Knight Schultz claims that Encampment No. 1 "is the oldest existing body of Knights Templar upon the American Continent."²

After Baltimore Commandery, No. 2, was chartered, there was no other commandery formed until Monumental, No. 3, of Baltimore, was organized by virtue of a dispensation issued by the Grand Master of Templars May 16, 1866. At the next triennial conclave, September, 1868, at St. Louis, a Charter was granted, and on November 6, 1868, the commandery was duly constituted.

July 12, 1870, resolutions were adopted to organize a Grand Commandery of the State. This occurred January 23, 1871.

Jacques De Molay, No. 4, of Frederick City, was organized by virtue of a dispensation issued November 23, 1867, by Sir Henry L.

MELROSE ABBEY

De Vries
ARCHITECT

Palmer, Grand Master of Templars, which occurred March 2, 1868. At the triennial conclave of the Grand Encampment of the United States, September, 1868, a Charter was ordered, and continued until the formation of the State Grand Commandery, when it came under its jurisdiction.

Grand Master William Sewall Gardner issued a dispensation March 29, 1869, to form Crusade Commandery, No. 5, of Baltimore, and April 26, 1869, the first meeting was held. The Officers were selected, all of whom were members of Maryland Commandery.

Three chartered commanderies met in convention by their representatives in Baltimore, Md., December 12, 1870, and elected Grand Officers. The Grand Master was duly notified and requested to grant his Warrant for the formation of the Grand Commandery of Maryland.

The three commanderies were: Maryland, No. 1, Baltimore; Baltimore, No. 2, Baltimore; Monumental, No. 3, Baltimore.

The Warrant of the Grand Master was dated January 3, 1871. January 23, 1871, the Grand Commandery was then dedicated in ancient form to St. John the Almoner. The first Grand Conclave of the New Grand Commandery was held January 23, 1871.

May 11, 1871, Crusade Commandery, No. 5, of Baltimore, was constituted, under Charter granted by the Grand Commandery May 10, 1871.

Antioch Commandery, No. 6, of Cumberland, by dispensation issued August 26, 1871, was organized August 27, 1871. A Charter was issued, and January 14, 1873, the commandery was duly constituted.

Palestine Commandery, No. 7, at Annapolis, was organized April 14, 1873, a dispensation having been issued by Grand Commander Mann. A Charter was granted May, 1873. June 2, 1873, this commandery was duly constituted.

Beauseant Commandery, No. 8, received a dispensation May 27, 1875, to form a commandery in Baltimore, and was organized June 15, 1875. A Charter was granted May 10, 1876, and the commandery was duly constituted May 11, 1876.¹

¹ Schultz, "History of Masonry in Maryland," vol. iv., p. 659.

Massachusetts and Rhode Island.

The Grand Encampment of Massachusetts and Rhode Island was formed May 6, 1805, which was the first Grand Encampment to be organized in the United States, according to the authorities in Massachusetts, which statement has been challenged by the Templars in Pennsylvania, who claim that the very first Grand Encampment was organized in Philadelphia May 12, 1797, as will be shown under that head. Sir William Sewall Gardner, M. E. Grand Master of the Grand Encampment of Massachusetts and Rhode Island, at the semi-annual meeting in Boston, May 5, 1865, in his address said: "This day completes the sixtieth year of our existence as a Grand Encampment, and marks an epoch in our history. . . ." "On the 6th of May, 1805, Sir Thomas Smith Webb, of Providence; Sir Henry Fowle, of Boston; Sir Jonathan Gage, of Newburyport, with other Templar Masons, assembled in the Masonic Hall at Providence and formed this Grand Encampment." "There they assembled and laid the foundation of Templar Masonry, as we recognize it to-day." "This Grand Encampment was the germ of Templar Masonry as now organized in the United States, and the *ritual as adopted here* has been taken as the true Templar Work throughout the jurisdiction of the Grand Encampment of the United States. I am aware that in Pennsylvania there was a Grand Encampment in the early part of this century, and that it professed to confer the Order of the Temple. It is impossible to tell now what its ritual was, but there is evidence tending to show that it was entirely different from that taught by this Grand Body." . . .

Perhaps no person in the United States had more to do with the formation and renovation of this ritual than Sir Henry Fowle. His judgment, therefore, upon the ritual as exemplified by the Grand Encampment of Pennsylvania in 1816 in his presence, is of great weight, and leads to the conclusion that the work as used by that Grand Body, whereon it originated, was entirely different from that in use in this jurisdiction.

"We have then for our gratification, not only the fact, which is now universally conceded, that this Grand Encampment is the oldest Grand Body of Masonic Knighthood upon this continent, but also that *it has furnished the ritual* which is now used in all the bodies, both Grand and Subordinate, within the United States.

"The English Order, *from which our fathers in this Grand Encampment derived the elements of our ritual*, is termed the 'Masonic Knights Templar's Conclave' in open and avowed confession of the dependence of the Order upon the Masonic institution. I need but allude to the ritual to convince you that it was built upon Masonry, and that the form and manner of our work are eminently Masonic. In its teachings and its ceremonials, this Order of the Temple which we confer is but Masonry Christianized; a complete acknowledgment of and a full belief in the divine Mission of the risen Messiah, engrafted upon the Masonic forms, precepts, and ritual."

"It is worthy of notice, *from the establishment of this Grand Encampment to the present time*, it has been one of the most conservative bodies of Knighthood in the United States."¹

Mexico.

A Warrant was issued to organize a commandery called "Popocatepetl," No. 1, for the Federal Districts of Mexico, dated September, 1893.

Michigan.

The Grand Commandery of Michigan was instituted by the Grand Master of the General Grand Encampment, in person, who installed the Grand Officers January 11, 1858. The first Warrant was issued February 13, 1857. The first commandery organized was Detroit, No. 1, at Detroit; by dispensation November 1, 1850, and Charter September 19, 1853. Then followed Pontiac, No. 2, at Pontiac; by dispensation March 25, 1852, and Charter October 27, 1853.

Eureka, No. 3, at Hillsdale; by dispensation February 13, 1854, and Charter September 10, 1856.

Peninsular, No. 4, at Kalamazoo; by dispensation March 3, 1856, and Charter September 10, 1856.

Monroe, No. 5, at Monroe; by dispensation March 29, 1856, and Charter September 12, 1856.

De Molay, No. 6, Grand Rapids; by dispensation May 9, 1856, and Charter September 12, 1856.

¹ Creigh, "History of Knight Templars," ch. v., pp. 501 and 502.

Peninsular, No. 4, it appears from the record,¹ declined to place herself under the Grand Commandery of the State and regularly sent her returns and dues to the General Grand Recorder, acknowledging no other superior than the Grand Encampment from which she received her Charter on September 10, 1856. The controversy was referred to the Committee on Jurisprudence, which thoroughly examined the whole matter and the principles of State-Sovereignty in a report and offered the following:

"Resolved, That the Grand Commandery of Michigan, from the date of its formation, has of right exercised sole and exclusive jurisdiction over all subordinates in that State.

"Resolved, That all dues paid by Peninsular Commandery, No. 4, to the Grand Recorder of this Grand Encampment, occurring since the formation of the Grand Commandery of Michigan, be paid to the Grand Recorder of that body."² Which resolutions were adopted. The following was then adopted:

"Resolved, That at the formation of a State Grand Commandery, it is the right as well as the duty of every subordinate in the State, whether Chartered or under Dispensation, to enroll itself under such State Grand Commandery, and respect and obey its laws and regulations."³

Minnesota.

The Grand Commandery of Minnesota was constituted October 23, 1865. The following were the subordinate commanderies:

Damascus, No. 1, at St. Paul by dispensation July 12, 1856, and Charter September 10, 1856.

Cœur de Leon, at Winona; dispensation issued May 13, 1864; chartered September 6, 1865.

Mankato, at Mankato; dispensation issued April 5, 1865; chartered September 6, 1865.

Zion, at Minneapolis; dispensation issued May 19, 1863; chartered September 6, 1865.

Mississippi.

The Grand Commandery of the State of Mississippi was constituted January 21, 1857. The order to establish the Grand Commandery

¹ Proceedings of General Grand Encampment, 1859, p. 39.

² *Ibid.*, p. 53.

³ *Ibid.*, p. 56.

was first issued December 5, 1856, and renewed December 22, 1856. The subordinate commanderies were:

Mississippi, No. 1, at Jackson; by dispensation July 5, 1844, and Charter September 12, 1844.

Magnolia, No. 2, at Vicksburg; by dispensation October 10, 1850, and Charter January 4, 1854.

Lexington, No. 3, at Lexington; by dispensation July 22, 1856, and Charter September 1, 1856.

Missouri.

The Grand Commandery for the State of Missouri was constituted May 22, 1860. Approved September 16, 1859.¹

St. Louis, No. 1, at St. Louis; no dispensation; chartered September 17, 1847.

Weston, No. 2; dispensation March 9, 1853, and chartered September 19, 1853.

Lexington, No. 3; dispensation September 30, 1853, and chartered September 10, 1856.

Montana.

The Grand Commandery of Montana was constituted May 14, 1888. Constituent commanderies:

Virginia City, No. 1, at Virginia City; dispensation August 27, 1860; chartered September 23, 1868.

Helena, No. 2, at Helena; dispensation January 21, 1869; chartered September 21, 1871.

Montana, No. 3, at Butte; by dispensation June 26, 1878, and chartered August 20, 1880; constituted June 24, 1881.

Damascus, No. 4, at Miles City; by dispensation March 8, 1886; formed March 16, 1886, and chartered September 23, 1886.

Nebraska.

The Grand Commandery of Nebraska was constituted December 27, 1871 (statement of 1895). (Statement of 1880 has 28th.)

The first commandery was Mount Calvary, No. 1; organized

¹ Proceedings General Grand Encampment, 1859, p. 50.

July 24, 1865; chartered September 6, 1865. The second was Mount Olivet, No. 2, at Nebraska City; organized January 25, 1867;¹ chartered September 18, 1868.¹ In the Proceedings of the nineteenth triennial of the General Grand Encampment for September 15, 1871,² it is recorded under "Proxies to constitute New Commanderies," "V. E. Sir George W. Belt constituted and installed the officers of Mount Olivet Commandery, No. 2, Nebraska City, January 25, 1868." In the Proceedings of 1868, September 18,³ it is recorded that a Charter was ordered to be issued to Mount Olivet, No. 2, Nebraska City (September 18, 1868). Here appears to be a discrepancy, as a Charter was granted after the commandery was constituted (January 25, 1868). The third commandery was Mount Carmel, No. 3, at Brownsville; organized July 22, 1870; chartered September 21, 1871. The fourth was Mount Moriah, No. 4, at Lincoln; organized February 17, 1871; chartered September 21, 1871.

Nevada.

The first commandery organized in Nevada was De Witt Clinton, No. 1, at Virginia, February 4, 1867, and chartered September 18, 1868; constituted and officers installed, January 8, 1869. The second was Eureka, No. 2, at Eureka; dispensation granted June 6, 1880; chartered August 18, 1880, and constituted October 15, 1880.

New Hampshire.

The Grand Commandery of New Hampshire was constituted September 28, 1897.⁴

The first subordinate encampment which was warranted was Trinity, No. 2, located at first at Hanover, March 24, 1824.⁵ It was dormant for some time, and was re-chartered September 19, 1853; and removed to Manchester.⁶

De Witt Clinton, No. 1, Portsmouth; Charter January, 1826.

¹ Proceedings General Grand Encampment, 1871, p. 28.

² *Ibid.*, p. 30.

³ *Ibid.*, p. 65.

⁴ The General Grand Encampment approved the formation of a State Grand Encampment for New Hampshire September 14, 1859 (see p. 50 of the Proceedings General Grand Encampment, 1859); but it was never formed until 1897.

⁵ Proceedings General Grand Encampment, 1826, p. 12.

⁶ *Ibid.*, 1853, p. 192.

Mount Horeb, No. 4, Hopkinton; Charter May 21, 1826; became dormant in 1856.

North Star, No. 3, Lancaster; dispensation May 2, 1857; chartered September 16, 1859.

St. Paul, No. 4, at Dover; dispensation November 7, 1857; chartered September 16, 1859.

Mount Horeb, No. 5, at Concord; dispensation May 31, 1859. As above shown the original Charter was issued May 21, 1826, and was restored September 16, 1859.¹

New Jersey.

The Grand Commandery of New Jersey was constituted February 14, 1860, by the approval of the General Grand Encampment dated September 16, 1859.

The first subordinate commandery was Hugh de Payens, No. 1, at Jersey City; by dispensation March 12, 1858, and Charter September 16, 1859; constituted November 25, 1859.

St. Bernard, No. 2, at Hightstown; by dispensation March 27, 1859, and Charter September 16, 1859; constituted October 12, 1859.

Helena, No. 3, at Burlington; by dispensation September 16, 1859, and chartered September 16, 1859;² constituted October 12, 1859.

New Mexico.

The first commandery organized in New Mexico was Santa Fé, No. 1, at Santa Fé; dispensation granted May 31, 1869; organized May 31, 1869, and Charter September 21, 1871.

The next was Las Vegas, No. 2, at Las Vegas; dispensation April 10, 1882; chartered August 23, 1883.

Pilgrim, No. 3, at Albuquerque; dispensation April 4, 1883; chartered August 23, 1883.

McGorty, No. 4, at Deming; dispensation July 13, 1886; chartered September 23, 1886.

¹ Proceedings General Grand Encampment, p. 358, in note to table (K).

² The record shows that the dispensation and Charter were issued on the same day—Proceedings, 1859, p. 358.

Aztec, No. 5, at Raton; dispensation November 16, 1892; chartered August 29, 1895, and constituted December 20, 1895.

Rio Hundo, No. 6, at Raswell; dispensation June 17, 1895; Charter August 29, 1895; constituted November 30, 1895.

New York.

The Grand Encampment of New York was formed *ab origine*, June 18, 1814.¹

There is no history of the regular formation of this Grand Encampment. In the history of the organization of the General Grand Encampment we have shown how the formation occurred. We are reminded of the remark of an old negro, who said: "Poor Marse Greely, he never had no father or mother, 'kase he said hisself that he was a 'self-made man.'" Nevertheless, he was the great editor of the great State of New York. Moreover, the Templars of that State can refer to another illustrious example, *viz.*, "Melchizedek, King of Salem, the Priest of the Most High God, who met Abraham returning from the slaughter of the kings and blessed him. Without father, and without mother, without *descent* (pedigree), having neither beginning of days, nor end of life."²

The commencement of the Templar Order in New York is involved in great obscurity; yet there were several bodies, having no authority whatever, which were organized at an early date. Sir Knight Robert Macoy bestowed great labor in endeavoring to arrive at the very first history of the Order in New York.

In the volume of *Proceedings of the Grand Commandery*, there is a history of the Templar Order in New York State, prepared by the Grand Recorder. In a subsequent report he states that "Several of the Grand Recorders, committees, and reporters have embodied valuable historical hints in their several papers, which throw light upon the origin of Templary, . . . but none thus far have satisfactorily supplied the link that separates the Templars of the Crusades from the modern Templars or Templarism as it exists in the United States, England, and Canada."

Sir Knight Macoy said that "Sir Knights anywhere in the United States could and probably did meet and increase their num-

¹ *Ante*, pp. 1390, 1391.

² Heb., ch. vii., vs. I, 3.

bers or dignify their worthy companions by the authority of inherent rights, keeping few and probably no records. We are certain that those who lived and labored in the days referred to have passed to their final rest and have left few traces behind."

Sir Knight Parvin, on commenting upon Sir Knight Macoy, says: "And yet the few traces they have left did not confirm the position assumed by Sir Knight Macoy, but rather go to prove that the Sir Knights made in those days were made in Lodges or Chapters working under Lodge Warrants, except possibly in a few instances, where the degree of Knight Templar was conferred by officers of some of the bodies of the Ancient and Accepted Scotch Rite."¹

In this we agree with Sir Knight Parvin.

Sir Knight Macoy, in his efforts to prove priority for New York in Templary, supports his statement as to the existence of the Order prior to 1785, quotes from old newspapers published in New York City, verified by reference to the reprint of the Grand Lodge Proceedings from 1781 to 1815, published in 1876, by authority of the Grand Lodge.²

This is shown in the order of procession on St. John's Day (December 27, 1785), providing that Knights Templars with drawn swords were to be in the procession. Also from the "Independent Journal," December 28, 1785, is a notice of "the proceedings of the anniversary of St. John the Evangelist," and that it gave the same programme or form of procession as was provided by the Grand Lodge; and then states, "that whilst the members of the fraternity celebrated the natal days of their patron saints, Sir Knights as a body seldom appeared in public."

Sir Knight Macoy says further: "We refer to what was known as Old Encampment, Grand Encampment, and sometimes as Morton's Encampment, of which General Jacob Morton was for many years Grand Master. The date and circumstances under which this Grand Encampment was established are not definitely known. The general belief is that it was the body of Knights Templars that participated in the celebrations of St. John's Day, December 27, 1785, June 24, 1789, and again in 1795. The first published list of this

¹ "History of Masonry," p. 539.

² Reprint of Proceedings of New York, December 21, 1785, p. 42.

Commandery appeared in 1796, when Jacob Morton was Grand Master. The body continued to hold stated meetings until 1810, when it disappeared. Gen'l Jacob Morton was admitted an honorary member of the Grand Encampment of the State in 1815."

Reference is also made in these transactions of the Grand Lodge to the attendance of the "Knights Templars in the form as directed by their presiding officer," etc., at the observance of "the solemn funeral rites in commemoration of our illustrious Brother, George Washington, with a procession," etc.

At the first conclave after the formation of the Grand Encampment of the State, in June, 1814, the Grand Orator "delivered a discourse in which he gave a historical sketch of the foundation of the Order of Knights Templars, in a style calculated to excite the liveliest interest, which was manifested by reiterated applause; and in order, at the same time, to perpetuate the motives that *led* to the establishment of this Grand Encampment as the ground-work of our future operations. He concluded by giving the following concise account of the proceedings and the ceremonial that took place at its formation by the Sov.. Grand Consistory of Chiefs of Exalted Masonry for the United States of America, its Territories and Dependencies, at their Asylum, held in the City of New York, on the 22d day of the month *Shebath*, of the Hebrew year, 7813, corresponding with the eleventh month, A.L. 5813; January A.D. 1814, and the foundation of our order the 694th year, and at which most, if not all, the members here present assisted.

"The numerous Encampments of Knights Templars now existing within this State, being self-created bodies, are consequently governed by their own private and individual laws, acknowledging no superior authority, because, in fact, none heretofore existed."¹

The consistory itself which authorized this Grand Encampment was a *self-constituted* body of the Cerneau creation without any authority, and pirated degrees which never belonged to the Ancient and Accepted Rite, and there is no evidence whatever that Cerneau or any of the members of *that* consistory had ever received the Templar or Red Cross degree. At this conclave De Witt Clinton was chosen Thrice Illustrious Grand Master, who was not present; and by reference to all the Proceedings from 1814 to 1826 we do

¹ The pot called the kettle *black!*

not find him as being present at a single conclave, although he was re-elected at every election until his death, which occurred in 1828.

At the conclave held May 22, 1815, Columbian Encampment, No. 5, was voted to have a Charter of Recognition, and it was also voted "that the numerical characteristics 1, 2, 3, 4, be kept in reserve for the several encampments already established within this State, and in the order which they now respectively stands should they or any of them apply for a renewal of their Charters under the Grand Encampment."¹

At the conclave held May 4, 1816, a Charter was granted upon the petition of "a collective body of Sir Knights Templars, Royal Arch Masons and Members of the Sov. Grand Council of Princes of the Royal Secret for the State of Louisiana, sitting at New Orleans, authorizing them to open and to hold, in a regular and authentic manner, an encampment of Sir Knights of the Red Cross, Most Holy and Illustrious Knights of Malta, Knights of the Mediterranean Pass and Invincible Knights Templars, to be under and subject to the jurisdiction of that Grand Encampment and who had formed themselves into a provisory association under the title of Louisiana Encampment, No. —, until the pleasure and sanction of the Supreme Body be known and obtained. This was known as No. 6.

At the conclave held June 9, 1816, a delegate was chosen to represent the Grand Encampment in the convention of representatives from the Grand Encampments of the several States in the Union, to be held at Philadelphia on Tuesday next, and Thomas Lowndes was selected.

The history of that convention has already been written in Chapter LIII.

At the annual conclave held June 29, 1816, Columbian Encampment, was the first encampment to be represented in any conclave. A Charter was also issued for an encampment of Knights Templars and Appendant Orders, sitting at New Orleans.

By a special conclave the Grand Recorder was instructed to "correspond with Sir Thomas Smith Webb, Deputy General Grand Master, requesting copies of the Constitution of the General Grand Encampment of the United States, for the purpose of so modifying

¹ Proceedings of Grand Encampment of New York, from 1814 to 1859, p. 14.

the Constitution of this Grand Encampment that it may conform thereto."

At the annual conclave a committee reported and submitted a form of new constitution and it was adopted.

The preamble sets forth:

"The Grand Encampment of the State of New York having by its representatives assisted to form the General Grand Encampment of the United States of America, and having acknowledged the supreme authority of the same, did, on the nth day of December, A.D. 1820, in full session, upon report of a committee appointed to revise the former constitution, adopt the former constitution for its future government."¹

From the minutes of the special conclave held on Trinity Sunday, June 17, 1821, for the purpose of installing the Grand Officers, after which a resolution was adopted to transmit certain copies of the constitution to different parties, the only subordinate encampments mentioned are Columbian, No. 5, in New York, and Indivisible Friends, No. 6, in New Orleans, which No. 6 was originally chartered as Louisiana Encampment. Copies were also sent to the encampments at Albany and Stillwater, in that State, which had not yet united with the Grand Encampment.²

At the special conclave held February 8, 1823, upon application therefor, a Warrant was issued to Utica Encampment, No. 7, at Utica.³ At a special conclave February 18, 1823, a Warrant was ordered to be issued, upon application therefor, to Temple Encampment, No. 2, at Albany.⁴

At the special conclave held August 16, 1823, upon application therefor, a Warrant was issued to form Morton Encampment, No. 4, in the city of New York. This encampment was regularly installed by the Grand Encampment August 18th following.

At the special conclave held September, 1824, upon application therefor, a Warrant was issued to LaFayette Encampment, No. 7, in the city of Hudson.

At the annual conclave there were present the representatives or proxies of Columbian, No. 1; Utica, No. 3; Morton, No. 4; and LaFayette, No. 7. At the annual conclave held December

¹ Proceedings Grand Encampment of New York, p. 28.

² Ibid., p. 34.

³ Ibid., p. 41.

⁴ Ibid., p. 42.

16, 1825, warrants were issued to Plattsburg Encampment, No. 8, at Plattsburg; to Cherry Valley, No. 9, at Cherry Valley, and Genesee, No. 10, at Le Roy.

At the annual conclave held June 9, 1826, a Warrant was issued to Watertown Encampment, No. 11, at Watertown, to which a dispensation had been granted previously (no date mentioned). At the special conclave held September 18, 1826, an order was passed to authorize a dispensation to be issued to form an encampment in the village of Rochester. At the annual conclave held June 8, 1827, there were represented: Columbus, No. 1; Temple, No. 2; Utica, No. 3; Morton, No. 4; LaFayette, No. 7; Plattsburg, No. 8; Cherry Valley, No. 9; Genesee, No. 10; Watertown, No. 11.

A Warrant was issued to New Jerusalem Encampment, No. 13, in Ithaca.

A Warrant was also issued to Monroe Encampment, No. 12, a dispensation having been granted to this encampment in Rochester, ordered September 16, 1826.

Genesee Encampment was authorized to change its location from Le Roy to Batavia.

At a special conclave held February 20, 1808, resolutions were adopted on the death of their distinguished Chief, De Witt Clinton.

At the annual conclave held June 6, 1828, a Warrant was ordered to be issued to Clinton Encampment, No. 14, in Brooklyn, a dispensation having been previously issued.

We have now brought the history of this important Grand Encampment down from its doubtful origin to the death of the distinguished Chief, who was also the Head and Mainstay of the General Grand Encampment until his death, and our limits in this chapter will not permit us to proceed any further, and we close by observing that no single Grand Commandery has exerted greater influence for good and the prosperity of Templar Masonry than the Grand Commandery of the Empire State.

"Esto perpetua."

North Carolina.

The Grand Commandery of North Carolina was constituted May 10, 1881.

The first official notice of Templarism is found in the Proceed-

ings of the Grand Encampment of the United States, September 19, 1826, where it is reported that a Charter had been granted, among many others, to Fayetteville Encampment, at Fayetteville, December 21, 1821.¹

In the report of the General Grand Recorder at the tenth meeting, held September 14, 1847,² he stated that a dispensation had been issued to that Encampment, but whether a Charter was granted he is unable to say. "Certain it is, the encampment is known to have ceased all operations many years ago, although it is said a Charter was known to have existed."

The General Grand Recorder also stated:³

"Some time in 1845 a Sir Knight from Richmond, Virginia, and another from another State, not now recollected, assisted by a most respectable Sir Knight of Wilmington, North Carolina, who, it is said, had seen the Charter which had there been consumed by fire, held a meeting and conferred the degrees of Knighthood upon so many Royal Arch Masons as seemed to them sufficient to form an Encampment; and, having done so, they proceeded to elect officers and to organize an encampment. This being done, the Recorder of that body so formed wrote to the undersigned, requesting that another Charter might be furnished them. Being informed that all their proceedings were irregular, it is believed they proceeded no further, but he can not assert with certainty that such is the fact."

Fayetteville Encampment, at Fayetteville, was originally chartered December 21, 1821; as before stated.

Wilmington Encampment, at Wilmington, was chartered originally at an early date, but there is no record in the Proceedings of the General Grand Encampment except in 1874, where it is said the dispensation was renewed March 18, 1872.

The following was adopted at the conclave of the General Grand Encampment September 16, 1850.

Resolved, That the letter of P. W. Fanning, dated Wilmington, North Carolina, September 8, 1850, with its enclosure, being referred to the General Grand Recorder, to reply to the same, and with the view of authorizing the Sir Knights of Wilmington and

¹ Proceedings of General Grand Encampment, 1826, p. 20.

² *Ibid.*, 1847, p. 114.

³ *Ibid.*, p. 147.

Fayetteville to resume their labors as Encampments subordinate to this General Grand Encampment; and that the Most Excellent General Grand Master is empowered, in his discretion and upon examination into the merits of the case, the authorizing of a charter in the place of the one lost, without other than the Recorder's fee as to him may appear just and expedient."¹

Charlotte, No. 2, at Charlotte; dispensation was issued June 14, 1875, and chartered August 30, 1877.²

Durham, No. 3, at Durham; was constituted October 14, 1880.

North Dakota.

The Grand Commandery of North Dakota was constituted June 16, 1890.

Ohio.

The Grand Encampment of the State of Ohio was constituted October 24, 1843. The General Grand Encampment voted for the constitution of the Grand Encampment September 17, 1841.³

The first subordinate encampment was established at Worthington by dispensation June * 1818, and chartered September 16, 1819.

The second was Miami, at Lebanon; by Charter May 14, 1826.

The third was Clinton, No. 1, at Mount Vernon; by dispensation 1826 and 1829, and was represented in the General Grand Encampment in 1829.

The fourth was Lancaster, No. 2, at Lancaster. There does not appear on record any dispensation, but a Charter was granted December 9, 1835.

The fifth was Cincinnati, No. 3; by dispensation December, 1839, and Charter September 17, 1841.

The sixth was Massillon, No. 4, at Massillon; by dispensation July 5, 1843, and Charter September 12, 1844.

The seventh was Mount Vernon, No. 5, at Mount Vernon; by dispensation July 22, 1843, and Charter September 12, 1844, which was originally Clinton, No. 1.

¹ Proceedings of General Grand Encampment, 1850, p. 150.

² *Ibid.*, p. 192.

³ *Ibid.*, 1841, p. 79.

Oklahoma.

The Grand Commandery of Oklahoma was constituted by authority of the Grand General Encampment February 10, 1896. Warrant to form Grand Commandery dated November 8, 1895.¹ The subordinate commanderies were:

Guthrie, No. 1, at Guthrie; by dispensation November 17, 1892, and Charter December 22, 1892.

Oklahoma, No. 2, at Oklahoma; by dispensation October 7, 1892, and Charter November 12, 1892.

Ascension, No. 3, at El Remo; by dispensation May 8, 1893, and Charter August 29, 1895, and was instituted December 3, 1895.

Oregon.

The Grand Commandery of Oregon was constituted April 13, 1887.

Ivanhoe, No. 2, at Eugene City; by dispensation April 6, 1883, and chartered August 23, 1883.

Temple, No. 3, at Albany; by dispensation June 5, 1886, formed July 8, 1886, and chartered September 24, 1886.

Pennsylvania.

The commencement of the Templar Order in Pennsylvania was at an early day, and a contest was vigorously prosecuted between the Templars of Massachusetts and Rhode Island and Pennsylvania as to when a Grand Commandery was formed and in which jurisdiction. We shall quote from Sir Alfred Creigh's work on *Templarism in Pennsylvania* to show what he has written on that point in his reply² to Sir Wm. S. Gardner, of Massachusetts, in his address at the semi-annual meeting in Boston, May 5, 1865.³

"The history of Templarism in Pennsylvania is one of peculiar interest to every Sir Knight of the Order, whether enrolled under *our* banner, or waging war in sister jurisdictions in defence of innocent maidens, helpless orphans, destitute widows, and the Christian religion. To Pennsylvania and *Pennsylvania* alone are we indebted

¹ Proceedings of General Grand Encampment, 1898, p. 62.

² "Templarism in Pennsylvania," 2d series, p. 504.

³ *Ibid.*, p. 502.

for the first Grand Encampment which was ever constituted in the United States. She therefore has no competitor for the honor, the glory, and the immortality which is emblazoned upon her Templar history; and the 12th day of May, 1797, when the Convention met in Philadelphia, composed of delegates from Nos. 1 and 2 of Philadelphia, No. 3 of Harrisburg, and No. 4 of Carlisle (whose respective organizations took place from 1793 to 1797),¹ should be held as sacred as the 4th of July, 1776—the one having given birth to the Orders of Christian Knighthood, and the other to our political existence. It required sober thought, sound judgment, mature reflection, discriminating mind, and far-seeing perception in the Sir Knights composing that convention as they were about to inaugurate a system of Christian Ethics which would have an influence for weal or for woe upon the dissemination of the principles of Christian Knighthood. The idea was happily conceived, and the Sir Knights who risked their Masonic and Templar representation upon its success have rendered the name of Pennsylvania eternal in the annals of Templarism."

Sir Knight Creigh then enters into a statement of some historical and other dates to show that the four subordinate encampments which organized the Grand Encampment were regularly constituted prior to the formation of the Grand Body. But, however, he finds that from the published By-Laws of Nos. 1 and 2, of Philadelphia, that on December 27, 1812, these two united as No. 1, and from this encampment and also No. 2, of Pittsburg, was formed a second Grand Encampment, on February 16, 1814, with the addition of delegates from Rising Sun Encampment, No. 1, of New York; Washington Encampment, No. 1, of Wilmington, Del.; and Baltimore Encampment, No. 1, Baltimore, Md. The style of the second Grand Encampment was the "Pennsylvania Grand Encampment with Masonic Jurisdiction thereunto belonging." The second Grand Encampment existed until June 10, 1824, or at least its Grand Master, Sir Anthony Fannen, exercised his authority as such, for on that day he issued a dispensation to the officers of St. John's Encampment, No. 4, which was instituted June 8, 1819, "to dub and make John E. Schwartz a Sir Knight of our most illustrious Order of Knights Templar." The original of No. 1, of 1794, kept

¹ It is very remarkable that in those ancient times the years never had any months or days.—EDITOR.

up a complete and unbroken organization until June 13, 1824, and No. 2 was merged into it December 27, 1812, as above noticed.

St. John's, No. 4, after the parent body had ceased in 1824, still existed and recognized as her superior the source of all Masonic authority within the State, the R. W. Grand Lodge of Pennsylvania. It was upon this Rock that the delegates of the Pennsylvania Grand Encampment of 1814, and the delegates of the New England States which assembled in convention on June 16, 1816, in Philadelphia, split, and the Pennsylvania Grand Encampment charged the other delegates with seceding from the convention, while the New England delegates (consisting of Sir Knights Webb, Fowle, and Snow) reported that the reason why Pennsylvania would not enter into the union for a General Grand Encampment were: 1st, "That the Encampments in Pennsylvania avow themselves as being in subordination to and under the Grand Lodge of Master Masons;" and 2d, "Their unwillingness to the arrangement or order of succession in conferring the degrees," as practised by the New England States, "especially to the Mark and the Excellent Master, as unnecessary and not belonging to the system of Masonry." The delegates of the New England States then adjourned to meet on June 25, 1816, in New York, and *there* formed the present General Grand Encampment of Knights Templars of the United States.

After 1824 all the subordinate encampments ceased to labor except St. John's, No. 4, and she, with views as above expressed, continued to be loyal to the Grand Lodge until February 12, 1857.

In May, 1852,¹ St. John's, No. 4; Philadelphia, No. 5; Union, No. 6; and De Molay, of Reading, established a Grand Encampment, under the authority of the Grand Lodge of Pennsylvania, but the Grand Lodge on February 16, 1857, resolved (very wisely, *if* very late) that they had no authority over the degrees of Knighthood, but that its legitimate sphere was the primitive degrees of Ancient Craft Masonry; a union was therefore effected, and both Grand Encampments of Pennsylvania since 1857 acknowledge as their legal head the Grand Encampment of Knights Templars of the United States.

Prior to April 12, 1854, the subordinate encampments had no

¹ We suppose again, May had no days then!

governing head. Their charters were derived either from the General Grand Encampment of the United States, or by the authority of the Grand Lodge of Pennsylvania.

Pittsburg Encampment, No. 1; Jacques De Molay (of Washington), No. 2; and St. Omer's (of Uniontown, but afterward of Brownsville), No. 3, all were chartered by the General Grand Encampment. Hubbard Commandery, of Waynesburg, was under *Dispensation* from the same body. St. John's Encampment, No. 4, derived her Charter from the Grand Encampment of 1814; Philadelphia Encampment, No. 5; Union Encampment (of Philadelphia), No. 6; and De Molay (of Reading), No. 7, were under the Grand Lodge of Pennsylvania.

It was firmly believed and maintained by the Brethren of Pennsylvania that the R. W. Grand Lodge of Pennsylvania was the source of all Masonic authority within her geographical limits, and they were sustained by reference to the fact that Templar Encampments were held under Blue Lodge Warrants; that in Ireland the Grand Encampment was formed as early as 1818, yet several encampments continued to work under their old lodge warrants, as was also the fact in Scotland and in Canada. All encampments thus constituted in Europe were considered legal.¹

A Warrant was issued by the General Grand Master of the General Grand Encampment, authorizing the formation of a Grand Encampment of Pennsylvania.² A convention met at Brownsville April 12, 1854, and organized the present Grand Commandery of Pennsylvania, subordinate to the Grand Encampment of the United States.³

The other encampments met in Philadelphia May 10, 1854, and organized a Grand Encampment, and after the adoption of a constitution and election and installation of officers, instructed the Grand Recorder to notify the Grand Lodge of their organization.⁴

After some time, committees of conferences having been appointed by both bodies⁵ and duly considered the condition of Templary with two contending rival bodies, good counsel prevailed. The supremacy of the General Grand Encampment was acknowledged⁶ and the union was finally accomplished, which was officially

proclaimed by R. E. Sir W. W. Wilson, Grand Commander of the Grand Commandery, June 1, 1857, and subsequently by M. E. Sir William B. Hubbard, Grand Master of the Grand Encampment of the United States.¹

South Carolina.

It is claimed for South Carolina that the Templar Order was first duly organized in that State as shown in the old patent which we have previously described in Chapter LI., pages 1377-78.

In the work by Theodore S. Gourdin, from which we have quoted, we derive the principal sources of our information, and also from the address of the Grand Master of Templars to the Grand Encampment August, 1883, as well as from Companion Albert G. Mackey's *History of Freemasonry in South Carolina*, are we indebted for what is now considered a very near approach to the period of the introduction of the Order of the Temple, and we may, with some degree of exactness, say that an encampment did exist prior to the date of the patent referred to, which was issued August 1, 1783. As this document has been fully described, we need not here dwell upon it, and rest the case.

The following are the commanderies now in that State, which are subordinate to the General Grand Encampment:

South Carolina, No. 1, whose original Warrant was destroyed by fire in 1843, and a dispensation was issued May 17, 1843.²

On September 29, 1823, a Charter of Recognition was issued, as the encampment had been working for many years prior to the organization of the General Grand Encampment.³

Columbia No. 2, at Columbia; dispensation June 11, 1875; chartered August 30, 1877.⁴ A previous Charter of Recognition had been issued January 24, 1824.⁵

Spartanburg, No. 3, at Spartanburg; dispensation granted October 1, 1891; chartered August 29, 1895.

Note.—There was an encampment named LaFayette at Georgetown chartered March, 1825,⁶ but there is no further notice of it in the Proceedings and it is not now in existence.

² Proceedings General Grand Encampment, 1844, p. 81.

³ *Ibid.*, p. 21.

⁴ *Ibid.*, 1877, p. 192.

⁵ *Ibid.*, p. 20.

⁶ *Ibid.*, p. 20.

South Dakota.

The Grand Commandery of South Dakota was constituted May 14, 1884; being within the boundaries of the State of South Dakota, it continues under the name and style of the Grand Commandery of South Dakota.¹

Tennessee.

The Grand Commandery of Tennessee was constituted October 12, 1859. Approved September 16, 1859.

The subordinate commanderies were:

	Dispensation.	Chartered.
Nashville, No. 1, at Nashville	Between 1844-47.	September 14, 1847.
Yorkville, No. 2, at Yorkville	July 10, 1857.	September 17, 1859.
De Molay, No. 3, at Columbia	December 20, 1859.	September 16, 1859.
Cyrene, No. 4, at Memphis	March 27, 1859.	September 16, 1859.

Texas.

The Grand Commandery of Texas was constituted January 18, 1855. A Warrant had been issued by the General Grand Master to form and establish this Grand Encampment December 31, 1853.²

The subordinate commanderies were San Filipe de Austin, No. 1, at Galveston, by Charter December 10, 1835.

Ruthven No. 2, Houston; by dispensation February 2, 1848, and Charter September 11, 1850.

Palestine, No 3, at Palestine; by dispensation May 16, 1853, and Charter September 19, 1853.

Utah.

The following subordinate commanderies were organized in Utah under warrants from the General Grand Encampment:

Utah, No. 1, at Salt Lake City; dispensation granted December 20, 1873, chartered December 3, 1874.

El Monte, No. 2, at Ogden; had a dispensation granted October 22, 1885, which was opened November 11, 1885; chartered September 23, 1886.

¹ Proceedings General Grand Encampment, 1892, p. 41.

² Ibid., 1856, p. 248.

Vermont.

The Grand Encampment of Vermont was constituted August 14, 1851.¹

December, 1850, consent was given to three encampments to form a Grand Commandery.

Vermont, at Windsor; chartered February 23, 1821.

Green Mountain, at Rutland; chartered March 12, 1823.

Mount Calvary, at Middlebury; chartered February 24, 1824.

Burlington, No. 2, at Burlington; dispensation June 28, 1849; chartered September 17, 1850.

LaFayette, No. 4, at Berkshire; dispensation November 9 1850; old Charter endorsed October 27, 1853.

Calvary, at Middlebury; old Charter of Mount Calvary renewed.

Virginia.

The Grand Encampment of Virginia was constituted November 27, 1823.

The history of the old encampments is very interesting, but is too lengthy for our pages. (See Proceedings of General Grand Encampment.) The subordinate encampments in the State were:

Richmond, at Richmond; chartered May 5, 1823.

Warren, at Harper's Ferry; chartered July 4, 1824.

Winchester, at Winchester; chartered July 4, 1824.

These three encampments were erased September 17, 1847.²

Wheeling, No. 1, at Wheeling; dispensation issued August 31, 1838, and afterward extended six months.

It appears from all that can be learned in the Proceedings of the General Grand Encampment from 1823, that the Grand Encampment of Virginia, which in the Proceedings is only recorded as having been organized "prior to 1826," did not continue very long. The encampments at Richmond, Harper's Ferry, and Winchester, two of which held charters of recognition, and one of constitution from the General Grand Encampment, the report of a committee in 1847³ says: "About 1826 these three Encampments

¹ The Table in Proceedings of General Grand Encampment for 1895 says June 27, 1824.

² Proceedings of General Grand Encampment, 1847, p. 110.

³ *Ibid.*, 1847, p. 119.

formed a Grand Encampment for the State, which, in that year, was represented in the General Grand Encampment (Sir James Cushman).¹

"Nothing further is known of this Grand Encampment, but it is presumed to have ceased to exist soon after its organization; for it appears that in 1858 a dispensation, and subsequently a Charter, was granted by this General Grand Encampment to a commandery to be located at Wheeling in that State. Matters continued in this condition until this nth of December, 1845, when delegates from sundry Encampments, including the three owing their allegiance to the General Grand Body, met at Richmond, and having resolved that it was impossible to revive the extinct Grand Encampment, proceeded to form a new one for the State.

"Such is a brief Statement of the facts. Your Committee are of the Opinion that when the original Grand Encampment of Virginia ceased to exist, jurisdiction over the State reverted to this body.

"And this seems to have been the view entertained in 1838, when this General Grand Encampment established an Encampment at Wheeling.

"They are also of the opinion that immediate jurisdiction over, at least, the three Subordinate Encampments, which derived their authority from this body, also reverted to its original source. This being true, there was no power vested in the Subordinate Encampments in Virginia to organize a Grand Encampment without the consent of the General Grand Encampment as provided by this Constitution. This consent or approval was never obtained or even asked for.

"It follows, therefore, that the body now existing, and styling itself the Grand Encampment of Virginia, is irregular and unauthorized. It refuses allegiance to this General Grand Encampment, and denies its authority in the State of Virginia."

In 1871, at the Triennial Encampment, a memorial from the Grand Commandery of Virginia was presented by Sir Knights W. B. Isaacs and R. E. Withers "Asking leave to withdraw from the jurisdiction of the Grand Encampment of the United States." The memorial is quite too lengthy for our pages. This was referred to a committee of three.²

¹ Proceedings of General Grand Encampment, 1826, p. 9.

² Proceedings, 1871, pp. 175 to 180.

This committee made a lengthy report, in which they answered the reasons for a separation as set forth in the memorial, and presented the following:

"*Resolved*, That the Grand Encampment entertaining for the Grand Commandery of Virginia the most courteous and friendly feeling of fraternal brotherhood, and being anxious to preserve intact the knightly array of the constituent Grand Commanderies and to continue to preserve the good, well-being, and perpetuation of 'Templar Masonry,' does decline and refuse to allow the Grand Commandery of Virginia, in peace, in honor, and in recognition, to withdraw from the jurisdiction of the Grand Encampment' as prayed for in its memorial.

"Respectfully submitted by the Committee,

"THEODORE S. PARVIN,

"CHARLES W. WOODRUFF,

"RICHARD F. KNOTT."

N. B.—Subsequently Sir Knight Isaacs was made the General Grand Recorder, and Sir Knight Withers the General Grand Master, of the General Grand Encampment.

Washington Territory.

The Grand Commandery was organized June 2, 1887.

Washington Commandery, No. 1, at Walla Walla; dispensation issued April 19, 1882, and a Charter was granted August 23, 1883.

Seattle, No. 2, had a dispensation issued February 22, 1883, and was chartered August 23, 1883.

Cataract, No. 3, at Spokane, had a dispensation issued to it July 30, 1885, and was organized August 14, 1885; and chartered September 23, 1886.

Ivanhoe, No. 4, at Tacoma; a dispensation was issued March 23, 1886, formed April 27, 1886, and chartered September 23, 1886.

West Virginia.

West Virginia was a part of the State of Virginia until June 20, 1863. As we have shown, under Virginia, the Grand Encampment was organized November 27, 1823, and from October, 1824, under various changes, and frequently being dormant for years, and

having no communion with the majority of Templars of the General Grand Body, that Grand Encampment, now Commandery, has existed as under and by virtue of the constitution of the Grand Encampment of the United States. It has exercised exclusive jurisdiction over the territory now included in the State of West Virginia, with a single exception under the constitution of the Grand Encampment of the United States. The Grand Commandery of Virginia continued to exercise jurisdiction over it the same as theretofore. In the list of its subordinate commanderies, the Grand Commandery of Virginia classed Wheeling, No. 1; Palestine, No. 9, at Martinsburg.; Star of the West, No. 12, at Morgantown, and in 1868 a dispensation was issued by the Grand Commander of Virginia for a new commandery at Monongahela,¹ all in West Virginia.

After the formation of West Virginia State the Grand Encampment did not claim the commanderies therein as its immediate subordinates, nor exercised any power in West Virginia hostile to the jurisdictional claim of the Grand Commandery of Virginia.² The Grand Commandery of West Virginia was organized by P. G. M. James H. Hopkins, February 25, 1874. In the history of the Grand Commandery of Virginia we have shown the subordinate commanderies which were located in the present State of West Virginia, viz., Warren, at Harper's Ferry; Winchester, at Winchester; and Wheeling, No. 1, at Wheeling.

Wisconsin.

The Grand Commandery of Wisconsin was organized October 20, 1859. Wisconsin, No. 1; dispensation, no date found, and Charter granted September 11, 1850.

Note.—We have been unable to find any reference in the Proceedings of the General Grand Encampment prior to 1859 of any other encampment in Wisconsin.

¹ Proceedings, 1871, p. 55.

² *Ibid.*, p. 56.

Wyoming.

The Grand Commandery of Wyoming was organized by authority of the General Grand Encampment September 23, 1886, and constituted March 8, 1888.

The constituent commanderies were:

	Place.	Dispensation.	Charter.
Wyoming, No. 1	Cheyenne.....	March 15, 1873.	December 3, 1874.
Ivanhoe, No. 2	Rawlins..... {	February 9, 1885.	September 23, 1886.
		February 16, 1885.	
Immanuel, No. 3	Laramie.. ... {	May 1, 1886.	September 23, 1886.
		May 18, 1886.	

CHAPTER LIX

HISTORY OF COLORED MASONRY IN THE UNITED STATES

THE action taken by the Grand Lodge of the State of Washington, wherein the legality of the organization of Prince Hall Lodge was duly recognized, renders it proper that, in the history of Masonry in the United States, some notice should be taken of that lodge and its successors in the present work. In our examination of this matter we have found the subject so well treated by the Grand Master of the Grand Lodge of Massachusetts, Brother William Sewell Gardner, in an address delivered before that Grand Lodge, in 1870, that we shall use the same as a foundation, and largely as the structure of this article, for the reason that he has fully and thoroughly covered the entire ground and answered all the arguments employed by the friends of that famous body of negro Masons, within the years 1898 and 1899 in almost every Grand Lodge in the United States, by the Grand Masters, and committees appointed, to respond to the action of the Grand Lodge of Washington in 1898, who have clearly set forth their views, in opposition to the recognition of negro Masonry in this country. The views set forth in this address have been referred to by most of those writers, and there is nothing new for the present writer to urge in opposition to recognition. In his own response in the report on correspondence in the "Annual Proceedings of the Grand Lodge of the District of Columbia," for the year 1898, one point insisted upon by him was, that the charters of the Grand Lodge of England issued to Military Lodges did not authorize said lodges to make Masons of citizens in any country where there were already duly constituted lodges under Grand Lodge jurisdiction. The argument used was, that a lodge could not go beyond the letter and terms of the Charter by whose authority it worked. We laid this down as a necessary and fundamental principle, and we have been pleased to notice very many of our correspondents agree

with us in that position; and, finding that Grand Master Gardner uses the same point, we have thought it best to follow out his address as being more comprehensive and more strictly adhering to the true history of the first introduction of this foul blot upon the escutcheon of our Masonry, all through its succeeding ramifications, and subsequent discoloring of our fair fame and otherwise pure record in the United States.

It is due to our Brethren in Washington to say, that when it became known to the Craft at large in that State that the movement, on the part of their leading men, thus to drag in the dust the proud banner of Masonry had aroused the ire of every Grand Lodge in the country, at the succeeding Communication in June, 1899, the obnoxious resolutions were annulled and former harmonious and cordial relations have been restored.

We now proceed to use Brother Gardner's admirable address to give a true history of Prince Hall Lodge:

Address.

BRETHREN: In the Grand Lodge of New Hampshire, at its session held at Manchester on the 18th of June, 1869, "the Committee on Foreign Correspondence offered their report, and, on motion, it was voted, That the reading of the report be dispensed with, and that it be published with the printed proceedings."

In this report the following statements are made:

"In Massachusetts there was no legal Grand Lodge till the Union in 1792."

"The American doctrine of Grand Lodge jurisdiction has grown up since" the establishment of the African Lodge at Boston, by authority of a Charter from the Grand Lodge of England, "and is not elsewhere fully received even now; besides, there was then no Grand Lodge of Massachusetts, or in that State, whose rights could be interfered with; for, notwithstanding the claim to antiquity of that Grand Lodge, it was not formed till 1792, and the two Provincial Grand Lodges, before existing in that Colony, both expired in 1775 by the death of their Provincial Grand Masters. The Massachusetts Grand Lodge did not pretend to meet after the death of Warren, and although St. John's Grand Lodge did have some sort of meetings, probably no law that ever existed in Masonry anywhere would hold such meetings regular."

If this report had been read to the Grand Lodge of New Hampshire, its venerable Past Grand Masters, Israel Hunt and Horace Chase, then present, could have informed the Committee on Foreign Correspondence that they were treading upon dangerous ground, and alluding to a delicate subject.

The Grand Lodge of New Hampshire was organized on the 8th of July, 1789, by four Deputies from St. John's Lodge of Portsmouth, chartered by the Massachusetts "St. John's Grand Lodge" June 24, 1734, and one Deputy from Rising Sun Lodge of Keene, chartered by the "Massachusetts Grand Lodge" March 5, 1784—five Deputies from two Lodges. All Masonic authorities claim that, to organize a legitimate Grand Lodge, there must be present the representatives of "not less than three Lodges holding Charters or Warrants from some legal Grand Lodge."

All the Lodges in New Hampshire existing prior to the year 1790, with the single exception of St. John's of Portsmouth, received their Charters from the "Massachusetts Grand Lodge."

St. Patrick's was chartered and established at Portsmouth, March 17, 1780. It continued in existence until the latter part of the year 1790, when it ceased working, most of its members joining St. John's Lodge, which was revived about that time. It never acknowledged the jurisdiction of the Grand Lodge of New Hampshire.

November 8, 1781, the "Massachusetts Grand Lodge" chartered a Lodge at Cornish, then claimed to be a part of Vermont, but now set off to New Hampshire. It met at Cornish a few times, and when Cornish was decided to be in New Hampshire, it moved to Windsor, Vt., on the opposite side of the Connecticut River, and took the name of Vermont Lodge, No. 1.

Rising Sun, of Keene, well known as the Lodge which gave Masonic light to Thomas Smith Webb, was chartered by the "Massachusetts Grand Lodge" March 5, 1784. It surrendered its Charter to the Grand Lodge of New Hampshire August 3, 1792, and received a new one with the same name, and rank No. 3.

The "Massachusetts Grand Lodge" granted a Charter for a Lodge at Charlestown by the name of "Faithful Lodge, No. 27," February 22, 1788. This Charter was surrendered to the Grand Lodge of New Hampshire April 30, 1800, and a new one given, by which it was styled "Faithful Lodge, No. 12."

Dartmouth Lodge, of Hanover, received a Charter from "the Massachusetts Grand Lodge" December 18, 1788, and was the last Lodge chartered by this Grand Lodge in New Hampshire. Its dissolution took place before it acknowledged the jurisdiction of the Grand Lodge of that State.

The Grand Secretary, Horace Chase, says, that when the Grand Lodge of New Hampshire was formed, July 8, 1789, "as appears from the record there were but three Lodges in the State, *viz.*, St. John's and St. Patrick's at Portsmouth, and Rising Sun at Keene."

However irregularly organized the -Grand Lodge of New Hampshire may have been, the "Massachusetts Grand Lodge" disclaimed jurisdiction in that State thereafter. It is unnecessary to state that this Grand Lodge, since 1789 to the present time, has been on the most friendly and fraternal relations with our sister Grand Lodge of New Hampshire, and that it will require something more than unauthorized and unconfirmed statements of a Committee on Foreign Correspondence to unsettle these pleasant relations.

Nevertheless, when it is pretended before a body of such great respectability as the Grand Lodge of New Hampshire, that, in 1784, when it is said the "African Lodge" in Boston obtained its Charter in England, there was no existing Grand Lodge in Massachusetts, for the purpose of proving the then and present legitimacy of the African Lodge, and of adding the weight and influence of the Grand Lodge of New Hampshire to this pretense, it is due to ourselves, and to the Craft universal, that the truth should be fully known and fearlessly spoken.

The time is propitious to meet this false pretense, and I need but resume the history of the "Massachusetts Grand Lodge" where it was left at its Centennial on the recent Feast of St. John the Evangelist.

The system of Provincial Grand Lodges originated in the Grand Lodge of England in 1726, and arose from the necessity of having, in the distant colonies of Great Britain where Masonry has extended, some authority and power, not only to control and govern the Craft, but also to establish new Lodges in the Provinces. The Provincial Grand Master was appointed by commission of the Grand Master, wherein the extent of his powers was set forth, and by virtue of which he convened his Grand Body. In the language

of early days, this commission was styled a Deputation, and this word conveys the true idea of the Provincials' position. It was a Deputy Grand Lodge, with its various Deputy Grand Officers, convened by the power and authority of the Provincial Grand Master as the Deputy of the Grand Master. It possessed no sovereign power. The Lodges under the jurisdiction of the Provincial Grand Master were not necessarily registered in his Grand Lodge. They were returned to England, registered in the Grand Lodge there, and classified as we do our Lodges at the present day, as belonging to a certain District or Province. The Provincial Grand Master had power to appoint a Deputy and commission him, who in the absence, sickness, and disability of his chief, assumed his functions. The Grand Wardens and other officers he also had the exclusive right to appoint, although sometimes he nominated brethren to these offices and permitted the Grand Lodge to elect them.

Each Lodge in the Province had the right of representation in the Provincial Grand Lodge, by its Master and Wardens or by a regularly appointed representative, and the expenses of the Grand Body were assessed upon the various subordinates. The right of appeal existed from every act and decision of the Provincial Grand Master or Grand Lodge, to the Grand Master of England, thus making the Provincial and his Grand Lodge subordinate to the power by which they were created.

The allegiance of the Lodges and of the Craft was to the Grand Lodge of England, and to the Provincial Grand Lodge and Grand Master, through the parent Body. There was no direct allegiance to the Provincial from the Craft. It was a temporary power which he held *ex gratia*, and of which he could be deprived at the pleasure of the Grand Master by whom he was appointed.

Thus it will be seen that the Provincial Grand Master was appointed for the convenience of the administration of the affairs of the Grand Lodge of England in distant parts, in the same manner that our District Deputies are appointed at the present time. The powers, however, in the one case, were more extended than they are in the other. The means of communication with London were not so easy and rapid as now, and the distance from the Grand East required that some officer should be stationed here, who should be invested with authority for sudden emergencies and instant action.

The Provincial Grand Master having been regularly commissioned and installed, could not resign his trust to his Provincial Grand Lodge. That Body had no power to accept it. His resignation must be made to the Grand Master from whom he received his commission. The Provincial Grand Lodge was the creation of the Provincial Grand Master, and was wholly under his direction and control. He appointed its officers, and summoned the representatives of the Lodges to assemble in Grand Lodge. In this Grand Lodge there was no inherent power, save what it derived from the Provincial Grand Master, by virtue of his delegated authority, thus making it the very reverse of a Sovereign Grand Lodge, the Grand Master of which derives his authority from the Sovereign Body by whose votes he is elected to office, and over which he presides.

The Grand Master appointing his Provincial, could annul the commission at his will and pleasure. The officer being created by the pleasure of the Grand Master of England, all the adjuncts, appointees, and creations of the office depended upon the same pleasure, and existed during the will of the appointing power. If a Provincial Grand Master was removed, and his commission recalled, and the Grand Master declined to appoint his successor, it is clear that the Provincial Grand Lodge established by virtue of such commission would cease to exist. Such a Grand Lodge never possessed any vitality which would survive the life of the commission appointing the Provincial Grand Master.

The death of the Provincial would also lead to the same result. The commission to him from the Grand Master would lose all its force upon his decease. Whatever act the Provincial performed, he did by virtue of the commission to him. His Deputy Grand Master and Grand Wardens, appointed by him, and not by the Grand Master of England, nor by his confirmation, derived their power and character as Grand Officers from the Provincial, and when the Provincial expired, their tenure of office expired also.

To show that these conclusions are correct, I will refer to the authorities.

The office of Provincial Grand Master was established by the Grand Lodge of England, as has already been stated, in 1726, and the first Deputation was granted May 10, 1727. Preston says of the office, at this date: "A Provincial Grand Master in that district

DEWTTT CLINTON

over which he is limited to preside, and being invested with the power and honor of a Deputy Grand Master in his Province, may constitute Lodges therein, if the consent of the Masters and Wardens of three Lodges already constituted within his District have been obtained, and the Grand Lodge in London has not disapproved thereof. He wears the clothing of a Grand Officer, and ranks, in all public assemblies, immediately after Past Deputy Grand Master. He must, in person or by deputy, attend the quarterly meetings of the Masters and Wardens of the Lodges in his District, and transmit to the Grand Lodge, once in every year, the proceedings of those meetings, with a regular statement of the Lodges under his jurisdiction."

Speaking of the year 1737, he says: "The authority granted by patent to a Provincial Grand Master was limited to one year from his first public appearance in that character within his Province; and if at the expiration of that period, a new election of the Lodges under his jurisdiction did not take place, subject to the approbation of the Grand Master, the patent was no longer valid. Hence we find, within the course of a few years, different appointments to the same station; but the office is now permanent, and the sole appointment of the Grand Master."

In Entick's Constitutions of 1756 there is a section entitled "Of Provincial Grand Masters," which is as follows:

"Art. 1. The office of Provincial Grand Master was found particularly necessary in the year 1726; when the extraordinary increase of the Craftsmen, and their traveling into distant parts, and convening themselves into Lodges, required an immediate Head, to whom they might apply in all Cases, where it was not possible to wait the Decision or Opinion of the Grand Lodge.

"Art. 2. The appointment of this Grand Officer is a Prerogative of the Grand Master: who grants his Deputation to such Brother of Eminence and Ability in the Craft, as he shall think proper: not for life, but during his good Pleasure.

"Art. 3. The Provincial thus deputed, is invested with the Power and Honor of a Deputy Grand Master; and during the continuance of his Provincialship, is entitled to wear the Clothing, to take rank as the Grand Officers, in all publick Assemblies, immediately after the past Deputy Grand Masters: and to constitute Lodges within his own Province.

"Art. 4. He is enjoined to correspond with the Grand Lodge, and to transmit a circumstantial Account of his Proceedings, at least once in every Year. At which Times, the Provincial is required to send a List of those Lodges he has constituted for the general Fund of Charity: and the usual demand, as specified in his Deputation, for every Lodge he has constituted by the Grand Master's Authority."

The Constitutions of the United Grand Lodge of England have been more particular in specifying the powers, duties, and prerogatives of the Provincial Grand Master and Grand Lodge. I will refer to a single Section of these Constitutions:

"The Provincial Grand Lodge emanates from the authority vested in the Provincial Grand Master, and possesses no other powers than those specified. It therefore follows that no Provincial Grand Lodge can meet but by the sanction of the Provincial Grand Master or his Deputy; and that it ceases to exist on the death, resignation, suspension, or removal of the Provincial Grand Master, until some Brother is duly appointed or empowered to perform the functions of Provincial Grand Master, by whose authority the Provincial Grand Lodge may be again established."

In Scotland this office was created in 1738, and the first nomination made abroad in 1747. In November, 1757, R. W. Col. John Young was appointed Provincial Grand Master over all the Lodges in America holding of the Grand Lodge of Scotland, and in 1768 James Grant, Governor of the Province of East Florida, was appointed Provincial Grand Master of North America, Southern District.

The commissions were issued "to continue in force until recalled." In 1800 a series of regulations for the government of these officers were sanctioned by the Grand Lodge, previous to which time it is presumed that they were governed by the same rules and regulations as in England.

More recently, the "Laws and Constitutions of the Grand Lodge" have provided that the "meeting of the Provincial Grand Lodges shall not be interrupted by the death or retirement of the Provincial Grand Master, unless the Grand Lodge shall not deem it expedient within the space of one year to appoint another. A Provincial Grand Lodge not assembling for the space of two years, also becomes dormant, and has no power again to call meetings,

unless empowered by the Provincial Grand Master, or by the order of the Grand Lodge or Grand Committee." "When a Provincial Grand Lodge becomes dormant, the Lodges in the District come under the immediate supervision of the Grand Lodge and Grand Committee."

These new rules and regulations were made to prevent the disruption of the Provincial Grand Lodges, which was inevitable upon the decease of the Provincial Grand Master.

In Ireland the same system has existed as in England and Scotland. The present Constitutions provided that, "if the Provincial Grand Master die, resign, or be removed, the authority of the Provincial Deputy Grand Master shall continue for six months after, or until a successor to the Provincial Grand Master be appointed, but such authority of the Provincial Deputy Grand Master shall not continue longer, unless he be re-appointed."

If these authorities support the position taken, and if the conclusions arrived at are correct, it follows beyond all controversy that when Provincial Grand Master Joseph Warren expired on Bunker Hill, June 17, 1775, the Provincial Grand Lodge, of which he was the essence and life, expired also, and with it all the offices of which it was composed. The Lodges established by him, and by the Grand Lodge of Scotland, were not affected thereby, as has already appeared. They were, or should have been, registered in Edinburgh, and owed their allegiance to the Grand Lodge there.

The conclusion of the Eulogy pronounced by Br. Perez Morton at the re-interment of Joseph Warren, April 8, 1776, was devoted to the subject of independence, which was then agitating the Colonies. Some of the language made use of by him upon this occasion seems to foreshadow the Masonic independence of Massachusetts, which was soon to follow. "Now is the happy time," said he, "to seize again those rights which, as men, we are by nature entitled to, and which by contract we never have, and never could have, surrendered."

On the 4th of July following, "The Declaration of Independence" was, by order of Congress, engrossed and signed, by which the United Colonies declared themselves to be free and independent States. The effect of this declaration upon the Colonies I need not allude to; Massachusetts, by virtue of its claim, became a free, independent, sovereign State, and the spirit of freedom and independ-

ence of Great Britain became infused into every organization and society which before this were bound and dependent. It was an absolute revolution, by which a dependent colony became revolutionized into an independent State. The idea of a permanent union of the States had then hardly been broached. They had united for defence against a common foe, and had set themselves up as independent States, not only independent of Great Britain, but independent of each other. Isolated from all the world, they each stood forth free, independent, sovereign States.

The Institution of Freemasonry, which numbered among its firmest adherents such revolutionists as Webb, Revere, Morton, and a host of others who followed in the footsteps of Warren, could not long withstand the influence of freedom, and Massachusetts set the example of a revolution in Masonic government, which has been followed successfully by every State in the Union. It has become the American system, or, as the committee of New Hampshire call it, "The American Doctrine of Grand Lodge Jurisdiction," respected and recognized by the Masonic Fraternity the world over. It had its birth on Bunker Hill, when the patriot Warren poured out his life's blood:

"The Patriot Grand Master, who fell in his might—
The second of three—in defence of the right!"

"The American Doctrine of Grand Lodge Jurisdiction," briefly stated, is this: "Three regularly-chartered Lodges existing in any State or Territory have the right to establish a Grand Lodge therein. Such Grand Lodge, when lawfully organized, has sole, absolute, and exclusive jurisdiction over the three degrees of Craft Masonry; over the Lodges and their Members; and over all Masons, unaffiliated as well as affiliated, in such State or Territory. No other Grand Lodge whatever can lawfully interfere with this jurisdiction, and can neither establish Lodges in such State, nor continue any authority over Bodies which it might properly have exercised prior to the organization of such Grand Lodge therein."

By the erection of a Grand Lodge in such State, all Masonic powers over what is popularly called Blue Masonry are merged in it, and henceforth it exists therein supreme and sovereign over a jurisdiction which it can neither divide nor share with any other Masonic Grand Body in the world.

The several States of the United States of America, the Territories, when legally organized as such by Congress, and the District of Columbia, are each recognized as separate and independent jurisdictions in which Grand Lodges may be established. This is the American doctrine, most religiously and masonically adhered to by the Craftsmen of the United States, and which our brethren upon the other side of the Atlantic must accede to, recognize, and support. After the Declaration hereinafter referred to, made by the Massachusetts Grand Lodge, December 6, 1782, treaty stipulations were entered into by the several Grand Lodges then in existence, in confirmation of the action of Massachusetts.

The following preamble and resolutions were adopted by the Grand Lodge of New York:

"Whereas, The Grand Lodge of the State of Massachusetts have by a communication, dated the 4th of January last, suggested to this Grand Lodge the propriety of adopting a resolution declaring that no Charter or Dispensation for holding a Lodge be issued by any Grand Lodge to any number of Masons residing out of the State wherein the Grand Lodge is established, be it therefore

"Resolved and declared by this Grand Lodge, that no Charter or Dispensation for holding a Lodge of Masons shall be granted to any person or persons whatever, residing out of this State and within the jurisdiction of any other Grand Lodge."

The Grand Lodges of the United States have uniformly resisted every encroachment upon the jurisdiction of the several Grand Lodges.

The Feast of St. John the Evangelist, in 1776, was celebrated, and the record shows that a Grand Lodge was held by thirty-three brethren, Joseph Webb presiding as Deputy Grand Master. A Grand Lodge was called by the Deputy of Warren, February 14, 1777, to hear the petition for a Charter at Stockbridge, of brethren in Berkshire County. This proposition aroused the brethren to a realizing sense of their status and condition as a Grand Lodge. They were doubtful of its power, as then organized, to grant the Charter prayed for. The petition was accordingly laid over to Friday evening, March the 7th next, and it was *"Voted*, That the Deputy Grand Master should send a summons to all the Masters and Wardens under the jurisdiction to assemble on the 7th March,

in order to consult upon, and to elect, a Grand Master for this State, in the room of our late worthy Grand Master Warren, deceased."

On the 7th of March the brethren met, and adjourned until the following evening. March 8, 1777, the following brethren assembled, representing St. Andrew's Lodge, of Boston, Tyrian Lodge, of Gloucester, and St. Peter's Lodge, of Newburyport:

R. W. Joseph Webb, D. G. M., of St. Andrew's Lodge, Boston.
 Paul Revere, S. G. W., of St. Andrew's Lodge, Boston.
 Thomas Crafts, J. G. W., of St. Andrew's Lodge, Boston.
 John Lowell, G. Treas., of St. Andrew's Lodge, Boston.
 Nat. Peirce, G. Sec. pro tern., of St. Andrew's Lodge, Boston.
 Thomas Urann, S. G. D., of St. Andrew's Lodge, Boston.
 Edward Proctor, J. G. D., of St. Andrew's Lodge, Boston.
 Moses Deshon, P. M., of Tyrian Lodge, Gloucester.
 Philip Marett, } G. St'ds' { of Tynan Lodge, Gloucester.
 Winthrop Grey, } S. W., of St. Andrew's Lodge, Boston.
 Wm. Greenough, M., of St. Peter's Lodge, Newburyport.

The brethren then unanimously elected a Grand Master, Grand Wardens, and other Grand Officers. Joseph Webb was chosen Grand Master.

The Grand Lodge then acted upon the petition for a new Lodge at Stockbridge, and granted the same; this being the first act of the Independent Grand Lodge.

Massachusetts Lodge, of Boston, was not represented at this meeting; but, on the 18th of December, 1778, it petitioned the Grand Lodge, "setting forth that the exigency of the times would not admit of their assembling sooner, and praying said Lodge may retain the rank they formerly held under the Grand Lodge," which was granted. All the Lodges under the old Provincial Grand Lodge of Warren, with the exception of Massachusetts, united in forming the independent Grand Lodge, and they forthwith yielded allegiance to it. However, but few of the Lodges in Massachusetts at this time, were in a condition to hold meetings, by reason of "the exigency of the times."

The record of the meeting setting up the Independent Grand Lodge contains no account of the motives and incentives which gave rise to this action.

Grand Master Joseph Webb sent the following letter to the

Grand Lodge of Georgia, which has recently been discovered by R. W. Br. I. E. Blackshear, Grand Secretary of that State:

"BOSTON, March 2, 1787.

"To the Right Worshipful, the Grand Master, Dep. G. M., G. Wardens, and Brethren of the Grand Lodge of Savannah in Georgia, greeting.

"GENTLEMEN AND BRETHREN: Having lately seen the Southern papers, that you had at last assumed to your selves the undoubted right of Forming a Grand Lodge in your State, I Congratulate you on so Important an acquisition, and wish you all the success imaginable: we, in this Common Wealth, assumed the same so early as 1777, since w'ch I find Pennsylvania and N. York have adopted; but how they have proceeded at Charleston or Virginia I have not as yet heard. I hold a correspondence with those 2 Lodges, and should be glad of the same with you, and all in the Union at least. Since our adopting, we have had 25 Lodges under the jurisdiction (tho' some of them Charters of Dispensation, in Connecticut, Vermont, N. Hampshire), until they appoint a G. Lodge of their own. Inclosed, I have taken the freedom to send you the Regulations of our G. Lodge, w'ch you'l please to accept as a small token of my Respect. So, wishing the Grand Lodge in particular, and those under your jurisdiction in general, all that Universal Benevolence, Brotherly Love, and Truth: Adieu! I remain with sincerity, your unknown tho' affectionate Brother and H'ble Serv.

"Jos. WEBB,

"*G. M. Com. Wealth Massachusetts.*"

(Received 27th April.)

Josiah Bartlett, afterward Grand Master, in an address before the Grand Lodge, said:

"How to assemble the Grand Lodge with regularity, was now made a serious question, as the commission of the Grand Master had died with him, and the Deputy had no power independent of his nomination and appointment.

"Communications for the consideration of this subject were held at different times, till the 8th of March, 1777, when, experiencing the necessity of preserving the intercourse of the brethren, and the want of a proper establishment to soften the rigors of an active and distressing war, they proceeded to the formation of an

Independent Grand Lodge, with 'powers and prerogatives to be exercised on principles consistent with and subordinate to the regulations pointed out in the Constitutions of Ancient Masonry,' and our late worthy and Most Worshipful Brother, Joseph Webb, Esquire, whose amiable deportment and fidelity in the duties of his important office now claim our grateful remembrance, was duly elected Grand Master, and proceeded to install his officers, and organize the Grand Lodge."

Thaddeus M. Harris, who compiled the Constitutions in 1792, referring to this act of independence, quotes the above extract from Bartlett's address, and, in a foot-note, says that "the general regulations from Entick's Constitutions were adopted and practiced; except that the Grand Master and Wardens were elected by a ballot at large. The other officers were appointed by the Grand Master."

The record itself, of December 6, 1782, recites the facts:

"Charters were not only granted for establishing Lodges in Massachusetts, but also in other States. But anticipating that the independent government organized in this State would be followed by the Craft elsewhere, it was determined that all Charters granted without the limits of Massachusetts should be in force only until a Grand Lodge was formed in such State or Country where such Lodges were held. Upon these conditions Lodges were established in New Hampshire, Vermont, Connecticut, and New York, prior to December, 1782."

"In October, 1778, it was voted that a Charter be granted to a traveling Lodge in the American army, to make Masons, pass, and raise, in this State, or any of the United States of America, where no other Grand Master presides. But in any other State where there is a Grand Master constituted by the brethren of these United States, they are to inform him, and receive his sanction."

In September, 1780, the Grand Master "laid before the Grand Lodge a letter dated Philadelphia, August 19, 1780, signed William Smith, Grand Secretary, inclosing a printed list of the several Lodges in Pennsylvania, under that jurisdiction, and advising that they had, in that Grand Lodge, thought it expedient to make choice of a Grand Master General, for the thirteen United American States; that they had nominated His Excellency General George Washington, and requesting the opinion and approbation of this Grand Lodge thereon."

"Circular letters were sent to the several Lodges under the jurisdiction requesting the attendance of the Masters and Wardens at the Grand Lodge, for the purpose of considering this proposition. Brother Perez Morton was strongly in favor of the project, but the Grand Lodge *Voted*, That any determination upon the subject cannot, with the propriety and justice due to the Craft at large, be made by this Grand Lodge, until a general peace shall happily take place through the continent, inasmuch as the sentiments of the various Grand Lodges in the United States upon this question could not be made known under the peculiar circumstances of public affairs."

On the 10th of July, 1782, it was "*Voted*, That a committee be appointed to draw resolutions explanatory of the powers and authority of this Grand Lodge, respecting the extent and meaning of its jurisdiction, and of the exercise of any other masonic authorities within its jurisdiction." Brothers Perez Morton, Paul Revere, John Warren, James Avery, and John Juteau were appointed upon the committee.

A special meeting of the Grand Lodge was called to receive the report, September 30, 1782, when it was read and referred to the next meeting. December 6, 1782, in a full Grand Lodge, it was considered.

This interesting report, omitting the formal introduction, is as follows:

"The Commission from the Grand Lodge of Scotland granted to our late Grand Master, Joseph Warren, Esquire, having died with him, and of course his deputy, whose appointment was derived from his nomination, being no longer in existence, they saw themselves without a head, and without a single Grand Officer, and of course it was evident that not only the Grand Lodge, but all the particular Lodges under its jurisdiction, must cease to assemble, the brethren be dispersed, the penniless go unassisted, the Craft languish, and ancient Masonry be extinct in this part of the world.

"That in consequence of a summons from the former Grand Wardens to the Masters and Wardens of all the regular constituted Lodges, a Grand Communication was held to consult and advise on some means to preserve the intercourse of the brethren.

"That the Political Head of this country, having destroyed all

connection and correspondence between the subjects of these States and the country from which the Grand Lodge originally derived its commissioned authority, and the principles of the Craft, inculcating on its professors submission to the commands of the civil authority of the country they reside in, the brethren did assume an elective supremacy, and under it chose a Grand Master and Grand Officers, and erected a Grand Lodge with independent powers and prerogatives, to be exercised, however, on principles consistent with and subordinate to the regulations pointed out in the Constitution of Ancient Masonry.

"That the reputation and utility of the Craft, under their jurisdiction, has been most extensively diffused, by the flourishing state of fourteen Lodges constituted by their authority within a shorter period than that in which three only received Dispensations under the former Grand Lodge.

"That in the history of our Craft we find that in England there are two Grand Lodges, independent of each other; in Scotland the same, and in Ireland their Grand Lodge and Grand Master are independent either of England or Scotland. It is clear that the authority of some of their Grand Lodges originated in assumption, or otherwise they would acknowledge the head from whence they derived.

"Your committee are therefore of opinion that the doings of the present Grand Lodge were dictated by principles of the clearest necessity, founded in the highest reason, and warranted by precedents of the most approved authority.

"And they beg leave to recommend the following resolutions, to be adopted by the Grand Lodge and engrafted into its Constitutions:

"I. That the brethren of the Grand Lodge, in assuming the powers and prerogatives of an independent Grand Lodge, acted from the most laudable motives and consistently with the principles which ought forever to govern Masons, *viz.*, the benefit of the Craft and the good of mankind, and are warranted in their proceedings by the practice of Ancient Masons in all parts of the world.¹

"II. That this Grand Lodge be hereafter known and called by the name of 'The Massachusetts Grand Lodge of Ancient Masons,'

¹ See Calcot, p. 107; "Masons' Pocket Companion," p. 92, London edition.

and that it is free and independent in its government and official authority of any other Grand Lodge or Grand Master in the universe.

"III. That the power and authority of the said Grand Lodge be construed to extend throughout the Commonwealth of Massachusetts and to any of the United States, where none other is erected, over such Lodges only as this Grand Lodge has constituted or shall constitute.

"IV. That the Grand Master for the time being be desired to call in all Charters which were held under the jurisdiction of the late Grand Master, Joseph Warren, Esquire, and return the same with an endorsement thereon, expressive of their recognition of the power and authority of this Grand Lodge.

"V. That no person ought or can, consistently with the rules of Ancient Masonry, use or exercise the powers or prerogatives of an Ancient Grand Master or Grand Lodge, to wit: To give power to erect Lodges of ancient Masonry, make Masons, appoint superior or Grand Officers, receive dues, or do anything which belongs to the powers or prerogatives of an ancient Grand Lodge within any part of the Commonwealth of Massachusetts, the rightful and appropriated limits to which the authority of this Grand Lodge forever hereafter extends."

The foregoing report was signed by Perez Morton, Paul Revere, John Warren, and James Avery. It "was read paragraph by paragraph, and, after mature deliberation thereon, the same was accepted and ordered to be recorded in the proceedings of the Grand Lodge," where it now appears, signed by "Jos. Webb, Grand Master." A majority of the members of St. Andrew's Lodge objected to this report, although, at a Grand Lodge held March 1, 1782, a petition from its Master, Wardens, and members was presented, "praying that the Grand Lodge would grant them a Charter by the 'name of Saint Andrew,' they retaining their rank and precedence as heretofore in said Grand Lodge," which was unanimously granted.

"In 1768 John Rowe was appointed Provincial Grand Master of the St. John's Grand Lodge." He held the office until August 4, 1787, when he died. After 1775 this Grand Lodge held no meeting until called together to attend the funeral of Grand Master Rowe. In July, 1790, the Grand Officers assembled and voted to

elect new officers, but no higher officer than a Senior Grand Warden was chosen. The Massachusetts Grand Lodge, as early as 1787, had taken action upon the question of a union, and had appointed a committee to consider it. "It is evident that the St. John's Lodge preserved its organization as such for the purpose of completing the contemplated union. It granted no Charters, nor did it assume any of the powers of a Charter to St. John's Lodge, Boston, for the purpose of uniting the first and second Lodges into one. The Grand Lodge record contains no reference to it, nor was there any record kept of the Grand Lodge doings for that year."

"Thus by the record, and by contemporaneous history, it is fixed beyond all question and doubt that the 'Massachusetts Grand Lodge,' on the 8th of March, 1777, by a revolution and by assumption of the powers, duties, and responsibilities of a Grand Lodge, became a free, independent, sovereign Grand Lodge, with a jurisdiction absolute, exclusive, and entire throughout the Commonwealth of Massachusetts, and a provisional jurisdiction in other States and countries. By this revolution and assumption, from that day to this, the Grand Lodge of Massachusetts, without interruption, has exercised all the plenary powers of a Grand Lodge. It has held Regular and Special Meetings, elected and installed its Grand Masters and other Grand Officers, kept full and complete records of its doings, granted Warrants for new Lodges, erected and erased Lodges, compelled and received the allegiance of its subordinates and their members, and has been in correspondence with and recognized by the other Grand Lodges of the world. From the 8th of March, 1777, to the day of this Quarterly meeting, the full and just-complete term of ninety-three years, there has never been any successful opposition to its claim of sovereignty. From time to time it has gathered into self every opposing element possessing even a colorable title to legitimacy which it found within the borders of its jurisdiction."

"In the State of Massachusetts there have been three Lodges chartered by Grand Lodges of foreign jurisdictions, and but three—St. Andrew's, chartered in 1756, by the Grand Lodge of Scotland, and now one of our subordinates; Ancient York Lodge, No. 169, of Boston, chartered prior to 1772, by the Atholl Grand Lodge of England, and had but a brief existence; and the African Lodge, of Boston.

"It is claimed that in 1775 the persons named in the Charter of the African Lodge were made Masons in a traveling Lodge attached to one of the British regiments then stationed at Boston, and that they 'were soon after organized as, and dispensed into a Lodge,' before the death of Warren, to whom they applied for a Charter. That they were made Masons may be true. That they received a Dispensation for a Lodge there is not the least proof of, nor the slightest shadow of pretence for. Dispensations for Lodges, as preliminary to granting a Charter, were not made use of in those days. But more than all, there was no authorized power here to grant such Dispensation save Provincial Grand Masters Rowe and Warren. A traveling Lodge, although attached to a British regiment, could not authorize these persons to assemble as a Lodge. Nor was it ever pretended that such Dispensation existed until recently. This claim is nowhere stated directly, and contains so little foundation that it is not worth considering."

The Massachusetts Grand Lodge, at its Session October 1, 1773, after mature deliberation, decided that neither the Lodge at Castle William, nor any other traveling Lodge, "has any right to make Masons of any citizen."

There is no doubt that, on the 6th of March, 1775, the day after Warren delivered his celebrated oration in the Old South Church, where he was menaced by British troops, Prince Hall and thirteen others received the three degrees in a traveling Lodge attached to one of the British regiments in the army of General Gage, by whom Boston was then garrisoned; that Prince Hall and his associates met as a Lodge thereafter in Boston, without any warrant or authority, until May, 1787.

Application was sent to England for a Charter in 1784. The letter of Prince Hall, dated March 1, 1784, accompanying the petition to the Grand Lodge of England for the Charter of the African Lodge, says "I would inform you that this Lodge hath been founded almost eight years." "We have had no opportunity to apply for a Warrant before now, though we have been importuned to send to France for one, yet we thought it best to send to the fountain head, from whence we received the light, for a Warrant."

A Charter was granted September 29, 1784. It did not arrive at Boston for nearly three years, and was received April 29, 1787, and, on the 6th of May following, Prince Hall organized the "Afri-

can Lodge," at Boston, ten years after the Massachusetts Grand Lodge had asserted its freedom and independence; ten years after the American doctrine of Grand Lodge jurisdiction had been established.

"Without any other authority than that contained in the Warrant for said Lodge, Prince Hall, the Master thereof, it is said, on the 22d of March, 1797, granted a Dispensation, preliminary to a Warrant, to certain persons in Philadelphia. Soon afterwards Prince Hall established a Lodge at Providence, R. I. African Lodge, of Boston, continued to act as a subordinate Lodge until 1808, when, with the assistance of the Lodges at Philadelphia and Providence, established as above stated, it organized a Grand Lodge at Boston, which Body granted Charters to several subordinates, not only in Massachusetts, but in several other States."

The African Lodge declared its independence in June, 1827, and published its Declaration in a newspaper printed at Boston.

"It is unnecessary to argue the masonic and legitimate effect of this Declaration. It was a surrender of their Charter, and a public declaration that from thenceforth they ceased to act under it, or to recognize its validity or the authority from whence it was derived. If the 'African Lodge' had any existence at this time, by force of this Declaration its existence came to an end."

A National Grand Lodge was formed in 1847; and, says the petition of Lewis Hayden and others to the Grand Lodge of Massachusetts, set out on page 132 of the Proceedings for 1869: "The African Lodge of Boston, becoming a part of that Body, surrendered its Charter, and received its present Charter, dated December 11, 1847, under the title of Prince Hall Grand Lodge of Free and Accepted Masons for the Commonwealth of Massachusetts, and by which authority we this day exist as a Masonic Body."

The Lodge prospered, but after the death of Prince Hall, December 4, 1807, æt. 72, it became dormant, and ceased. Upon the union of the Grand Lodges of England, in 1813, African Lodge, which had been registered as No. 459 and as 370, "was removed from the list," and was never after recognized by the United Grand Lodge. The Declaration of 1827 complains "that the members of African Lodge could open no correspondence with the Grand Lodge of England, and that their communications and advances were treated with the most studied neglect."

"Boyer Lodge, No. 1, was organized at New York City by the African Lodge or the Prince Hall Grand Lodge. The members of this Lodge applied to the Grand Lodge of New York for recognition in 1812, 1829, and again in 1845. Grand Secretary James Herring made a report in 1846 which contains a letter from Brother Charles W. Moore, Grand Secretary of the Grand Lodge of Massachusetts, which throws some light upon the condition of the African Lodge in Boston at this time.

"Why this Charter was granted without the consent of the Lodges in Massachusetts, and without any correspondence concerning the propriety of the step, is a question which can be answered by every American who remembers the bitter hostility existing in England at that date towards the successful rebels against the crown of Great Britain. This Charter, in common form, conferring no extraordinary powers upon the petitioners, authorizing them to hold a Lodge, enter, pass, and raise Masons, and no more, was undoubtedly granted by the Grand Master of England, and under it the petitioners commenced Work. The successors of the persons named in that Charter have magnified the powers granted by it, have construed it to confer upon them Grand Lodge powers, have set up by virtue of it Grand Lodges, and finally a national Grand Lodge, with subordinate Stations and Lodges, and have established an 'American doctrine of Grand Lodge jurisdiction' peculiar to themselves, distinct and separate from any other Grand Lodge government known to man. Their National Grand Body 'claims and exercises masonic authority over these United States, with full power and authority to settle all masonic difficulties that may arise among the Grand Lodges of these States.' "

The original Charter, granted September 29, 1784, under which the successors of the persons named have claimed to act from April, 1787, to the year 1847, and which was the only plausible authority by which they hope to be justified in their proceedings, was not only surrendered by operation of masonic law, June 18, 1827, by reason of the Declaration then made, but on the 11th of December, 1847, was actually in set form of words, and with premeditation, abandoned and surrendered, and if they now possess the parchment upon which it was written, it is kept only as a curious relic of the past, emasculated of its virility.

The first difficulty has been complicated with a National Grand

Lodge, State Grand Lodges, and subordinate Lodges, so that it will not be easy to escape from the triple bonds with which they have been bound.

This is purely a question of Grand Lodge jurisdiction, which was settled and determined, September 17, 1797, by Massachusetts Grand Lodge, when it incorporated into its Constitution this Section:

"The Grand Lodge will not hold communication with, or admit as visitors, any Masons, residing in this State, who hold authority under, and acknowledge the supremacy of, any foreign Grand Lodge."

In some form of language the same feature has existed in their Constitutions from 1797 to this day, and is as follows:

"No Lodge of Ancient, Free and Accepted Masons can legally assemble in this Commonwealth under a Warrant granted by any foreign masonic power." Which is a question of Grand Lodge jurisdiction.

"The Institution of Freemasonry is universal. It stretches from East to West, from North to South, and embraces within itself the representatives of every branch of the human family. Its carefully-tyled doors swing open, not at the knock of every man, but at the demand of every true and worthy man, duly accepted, whatever his religion, his race, or his country may be. This Grand Lodge stands upon the high vantage ground of this catholic society, and recognizes the great principles which must necessarily underlie an Institution which has a home on the continents and on the islands of the seas."

"When that celebrated play of Terence, styled the 'Self-Tormentor,' was first introduced upon the Roman Stage, before the great amphitheatre crowded with Senators, knights, citizens, and men of rank, some of whom had been found worthy of a Roman triumph, and Chremes, in his reply to Menedemus, repeated these words,

'Homo sum; humani nihil a me alienum puto'

(I am a man; nothing which relates to man is alien to me),

the vast assemblage rose up, impelled by a common sentiment, and rent the air with reiterated plaudits. The memory of that scene has not yet faded away. The words of Chremes have not yet ceased to

reverberate. We bear upon the Masons' arms of Massachusetts, and have inscribed upon our Grand Lodge banner, the motto,

'Humani nihil alienum' "
 (Man everywhere our brother.)

True Copy of the Charter of the African Lodge.

"Effingham, A. G. M. To all and every Right Worshipful and loving Brethren, we, Thomas Howard, &c, &c, &c, Earl of Effingham, Lord Howard, Acting Grand Master under the authority of His Royal Highness Henry Frederick, Duke of Cumberland, &c, &c, &c, Grand Master of the Most Ancient and Honorable Society of Free and Accepted Masons, sends Greeting:

"Know ye, that we, at the humble petition of our right trusty and well beloved brethren, Prince Hall, Boston Smith, Thomas Sanderson, and several other brethren residing in Boston, New England, in North America, do hereby constitute the said brethren into a regular Lodge of Free and accepted Masons, under the title or denomination of the African Lodge, to be opened in Boston, aforesaid; and do further, at their said petition, hereby appoint the said Prince Hall to be Master, Boston Smith, Senior Warden, and Thomas Sanderson, Junior Warden, for opening the said Lodge, and for such further time only as shall be thought proper by the brethren thereof, it being any future election of officers of the Lodge, but that such election shall be regulated agreeably to such By-Laws of the said Lodge as shall be consistent with the general laws of the society, contained in the Book of Constitutions; and we hereby will and require you, the said Prince Hall, to take special care that all and every the said brethren are, or have been, regularly made Masons, and that they do observe, perform, and keep all the rules and orders contained in the Books of Constitutions; and further, that you do, from time to time, cause to be entered in a book kept for that purpose an account of your proceedings in the Lodges, together with all such rules, orders, and regulations as shall be made for the good government of the same; that in no wise you omit once in every year to send to us, our successors Grand Masters or to Rowland Holt, Esq., our Deputy Grand Master, for the time being, an account in writing of your proceedings, and copies of all such rules,

orders, and regulations as shall be made as aforesaid, together with a list of the members of the Lodge, and such a sum of money as may suit the circumstances of the Lodge and reasonably be expected towards the Grand Charity. Moreover, we hereby will and require you, the said Prince Hall, as soon as conveniently may be, to send an account in writing of what may be done by virtue of these presents.

"Given at London, under our hand and seal of Masonry, this 29th day September, A.L. 5784, A.D. 1784.

"By the Grand Master's Command.

"ROWLAND HOLT, *D. G. M.*,

"Witness

WILLIAM WHITE,

"Grand Secretary."

The "Massachusetts Centinal," printed at Boston, in its issue of May 2, 1787, has the following document:

"AFRICAN LODGE,

"BOSTON, May 2, 1787.

"By Captain Scott, from London, came the Charter, &c., which his Royal Highness the Duke of Cumberland, and the Grand Lodge, have been graciously pleased to grant to the African Lodge, in Boston. As the brethren have a desire to acknowledge all favors shown them, they, in this public manner, return particular thanks to a certain member of the Fraternity who offered the so generous reward in this paper, some time since, for the Charter, supposed to be lost; and to assure him, though they doubt of his friendship, that he has made them many good friends."

"(Signed)

PRINCE HALL."

Extract from an Address of John V. De Grasse, before the "Prince Hall Grand Lodge," June 30, 1858: "Although, brethren, our Charter was granted in London, September 17, 1784, we did not receive it until April 29, 1787, through the neglect and almost culpable carelessness of Brother Gregory, who did not take it from the Office of the Grand Secretary, where it had remained over two years." "On the 29th of April the Charter and a beautiful bound book of the Constitutions were delivered to Prince Hall."

*Declaration of Independence Published in a Newspaper at Boston,
June, 1827.*

"AFRICAN LODGE, No. 459.

"GREETING:

"Be it known to all whom it may concern, That we, the Master, Wardens, Members of the African Lodge, No. 459, City of Boston (Mass.), U. S. of America, hold in our possession a certain unlimited Charter, granted September 29, A.L. 5784, A.D. 1784, by Thomas Howard, Earl of Effingham, Acting Grand Master under the authority of his Royal Highness Henry Frederick, Duke of Cumberland, &c, &c, &c., Grand Master of the Most Ancient and Honorable society of Free and Accepted Masons. Be it further known, that the Charter alluded to bears the seal of the Most Worshipful Grand Lodge at London, England, and was presented to our much esteemed and worthy brethren and predecessors, Prince Hall, Boston Smith, Thomas Sanderson, and several others, agreeably to a humble petition of theirs, sent in form to the above Grand Lodge. Be it remembered that, according to correct information as regards this instrument and the manner in which it was given, it appears to have been confined exclusively to the Africans, and to certain conditions. Whether the conditions have been complied with by our ancestors, we are unable to say; but we can add that, in consequence of the decease of the above-named Brother, the institution was for years unable to proceed, for the want of one to conduct its affairs agreeably to what is required in every regular and well-educated Lodge of Masons. It is now, however, with great pleasure we state that the present age has arrived to that degree of proficiency in the art, that we can at any time select from among us many whose capacity to govern enables them to preside with as much good order, dignity, and propriety as any other Lodge within our knowledge. This fact can be proved by gentlemen of respectability, whose knowledge of Masonry would not be questioned by any one well acquainted with the art. Since the rise of the Lodge to this degree of proficiency, we concluded it was best and proper to make it known to the Most Worshipful Grand Lodge from whence we derive our charter, by sending written documents and monies, to fulfil the agreements of our ancestors, giving information of the low state to which it had fallen, its cause, &c., with its

rise and progress; and also soliciting favors, whereby we might be placed on a different and better standing than we had heretofore. And notwithstanding this has long since been done, and more than sufficient time has elapsed for returns, yet we have never received a single line or reply from that Hon. Society. In consequence of that neglect, we have been at a stand what course to pursue. Our remote situation prevents us from making any verbal communication whatever. Taking all these things into consideration, we have come to the conclusion that with what knowledge we possess of Masonry, and as people of color by ourselves, we are, and ought by rights, to be free and independent of other Lodges. We do, therefore, with this belief, publicly declare ourselves free and independent of any Lodge from this day, and that we will not be tributary, or be governed by any lodge than that of our own. We agree solemnly to abide by all proper rules and regulations which govern the like Fraternity, discountenancing all imposition to injure the Order, and to use all fair and honorable means to promote its prosperity, resting in full hope that this will enable us to transmit it in its purity to our posterity for their enjoyment.

"Done at the Lodge, this the 18th June, A.L. 5727, A.D. 1827.

"In full testimony of what has been written, we affix our names:

"JOHN T. HILTON, *R. M. W.*,

"THOMAS DALTON, *Sen. Ward.*,

"LEWIS YORK, *Jun. Ward.*,

"J. H. PURRON, *Secretary.*"

Letter from John Hervey, Grand Secretary of the United Grand Lodge of England.

"FREEMASONS' HALL, LONDON, W. C.,

"11th November, 1868.

"DEAR SIR AND R. W. BROTHER: I am in receipt of your favor of the 20th ult, making enquiries respecting a Warrant granted in 1784 to a certain Prince Hall. I have caused a most diligent search to be made in our books here, and the only reference I can find is in the Calendar for 1785, when a Lodge appears to have been working under the English Constitution, at Boston, under the No. 459, and called the 'African Lodge.' It afterwards became 370, and, I

presume, had ceased working, as at the Union, in 1813, it was removed from the list.

"To reply to your questions categorically:

"1st. I can find no record in 1775 of any Dispensation; but as the G. L. Books were not then kept, as they are now, with accuracy, such may, nevertheless, have existed.

"2d. It was struck off the list in 1813, but I can find no trace of any return having been made, and consequently imagine it must have ceased working long before, although retained on the list.

"3d. I should say most decidedly, that the said 'Prince Hall' was never appointed D. G. M., or had power to grant warrants for the establishment of Lodges in your country. Henry Price, of Boston, was P. G. M. for America from 1775 to 1804, after which year his name disappears from the lists.

"It is quite clear that the Lodge referred to is not working under the English Constitutions, and that the parties holding the Warrant can have no right to it, and are not a regular Lodge, unless empowered to meet under your Constitutions.

"I am, dear Sir and Brother, yours, truly and fraternally,

"JOHN HERVEY,

"*Grand Secretary*"

CHARLES W. MOORE,

Deputy Grand Master, Grand Lodge of Massachusetts.

Extract from the Report of James Herring, Grand Secretary, to the Grand Lodge of New York, June 2, 1846.

"The undersigned, having requested the R. W. Charles W. Moore, Grand Secretary of the Grand Lodge of Massachusetts, to endeavor to see the Charter of the so-called African Lodge, of Boston, and, if possible, obtain a copy thereof, begs leave to incorporate the following extract from Br. Moore's letter, dated July 26, 1845:

I called, agreeably to your request, on Mr. Hilton—who, I believe, is the Master of the African Lodge in this city—stated to him the object of my visit, and asked permission to see the Charter of his Lodge. He informed me that there was a difficulty between his and Boyer Lodge, of long standing, that they had nothing to do with that Lodge, nor would they have, until the difference re-

ferred to was settled. He further stated, that they were entirely independent of the white Lodges; asked no favors of them; and would have nothing to do with them; nor would they admit a white Mason, if he should present himself as a visitor. In the course of his conversation he distinctly said that he had been 'told by them people' (meaning Boyer Lodge) to have no communication with anybody on the subject of their recognition by the Grand Lodge of New York. He also positively and repeatedly refused to allow me to see the Charter of his Lodge, or to give me any information in relation to its history or present existence. It is proper for me to add, that my conversation with him was kind and gentle. I explicitly stated to him that I did not call officially, but as a friend, and at your request, with a view to ascertain whether Boyer Lodge was a regular constituted Lodge, such as the Grand Lodge of New York could recognize. . . .

"The African Lodge has never been recognized by the Grand Lodge of this Commonwealth. Applications have several times been made by its members for admission to our Lodges, but they have generally, if not always, been refused. Mr. Hilton stated to me that he had once, through the influence of a friend, gained admission into one of our out-of-town Lodges. If so, the Brother who introduced him laid himself open to censure, and would have been dealt with, had the circumstance come to the knowledge of the Grand Lodge. That the course of our Grand Lodge, in reference to the African Lodge, is not the result of prejudice, it is only necessary for me to say, that, within the last month, a colored Brother from England has visited, and been kindly received, in one of our city Lodges.

"Such is the state of the case, so far as I am able to communicate it. The argument does not belong to me; but you will permit me to inquire, whether your Grand Lodge is prepared to recognize any real or pretended Lodge, existing within another jurisdiction, before it had been recognized by the Grand Lodge of that jurisdiction? Again, does your Grand Lodge allow other Grand Lodges to establish Lodges within its jurisdiction? and is it ready to recognize Lodges so established?

"These three questions have been, by repeated decisions of this Grand Lodge, answered in the negative; and, according to the treaty stipulations entered into by the Grand Lodges of this

continent, soon after the revolution, and the uniform resistance of any encroachment upon the sole jurisdiction of the several Grand Lodges down to the present time, these questions can be answered only in the negative.

"The undersigned would further state, that the legality of the Body, called Boyer Lodge, No. 1, has been already twice reported on by Committees of this Grand Lodge on the 3d of March, 1812, and on the 4th of March, 1829. In the latter report, the main facts were correctly stated and able arguments sustained, and the conclusion drawn that Boyer Lodge, No. 1, can be regarded only as a clandestine Lodge. The undersigned can arrive only at the same conclusion, it being established beyond doubt that the African Lodge, at Boston, was illegally established by the Grand Lodge of England within the jurisdiction of the Grand Lodge of Massachusetts; that its name has been long stricken from the roll of the Grand Lodge of England; that its assumed authority to grant Warrants was un-masonic and fraudulent; and further, that the statement contained in the memorial of said Boyer Lodge, that it had been 'regularly and legally constituted and installed as a Master Mason's Lodge, with a legal Warrant or Charter,' is totally unfounded.

"All of which is respectfully submitted,

"JAMES HERRING,

"*Grand Secretary*"

NEW YORK, June 2, 1846.

In June, 1855, one Peter G Smith, of Montpelier, Vt, visited Boston, and "joined a Lodge of Masons." Upon returning to Montpelier, he attempted to visit a regular Lodge, but was refused admission. Mr. Smith then wrote to Boston, and received the following reply:

"No. 60 SOUTHAC STREET, BOSTON,

"September 6, 1855.

"PETER G. SMITH, ESQ.

"MY DEAR SIR AND BROTHER: Yours, bearing date August 14, came duly to hand. You say that the Grand Master of Vermont says that the colored Masons had their Charter taken from them, and that they are now working without a Charter. We reply that the charge is no doubt innocent, but it is nevertheless false from beginning to end. The original Charter is now in our possession, and always has been, and we worked under it until some time after

the war between this country and Great Britain, when the colored Masons held a Convention and declared themselves independent, the same as the white had already done before. This was done on account of the difficulties of making the returns to the mother country. There has always been the best feelings, and our brethren all visit the Lodges, not only in England, but in all parts of the world.

"If the Grand Master of Vermont wishes any more light, we are prepared to give it to him; or, if he has a curiosity, he can see the original Charter. Yours fraternally,

"J. S. ROCK,

"Corresponding Grand Secretary of Prince Hall Grand Lodge."

To this letter Philip C. Tucker, Grand Master of Vermont, replied in a communication to Peter G. Smith as follows:

"VERGENNES, September 22, 1855.

"MR. PETER G. SMITH, Montpelier.

"SIR: I received yours of yesterday, enclosing a letter to you from Mr. J. S. Rock, of Boston, this morning.

"As to the Lodge of colored men existing in Boston, calling itself 'Prince Hall Grand Lodge,' and such Lodges as acknowledge its jurisdiction, I have to say that my understanding on the subject is this:

"I suppose it to be true that on the 20th day of September, 1784, a Charter for a Masters' Lodge was granted to Prince Hall and others, under the authority of the Grand Lodge of England, and that the Lodge then chartered bore the name of 'African Lodge, No. 459,' and was located at Boston. If any other Charter was ever granted, at any other time, by the Grand Lodge of England, or any other Grand Lodge, to the colored persons of that city, it has never come to my knowledge.

"I suppose it to be also true that African Lodge, No. 459, did not continue its connection for many years with the Grand Lodge of England, and that its registration was stricken from the rolls of that Grand more than fifty years ago.

"I suppose it further to be true that this Lodge, No. 459, and all others which have originated from it, have always held them-

selves aloof, and have always refused to acknowledge any allegiance to the Grand Lodge of the Commonwealth of Massachusetts.

"I also suppose it to be true that, on the 18th day of June, 1827, this same Lodge, No. 459, issued a Declaration, and had it published in some of the Boston papers, signed by John T. Hilton, Thomas Dalton, Lewis York, jr., and J. H. Purron (claiming to be Master Wardens, and Secretary thereof), which Declaration contained the following language: 'We publicly declare ourselves free and independent of any Lodge from this day, and we will not be tributary, or governed by any Lodge than that of our own.'

"And I still further suppose it to be true that, in the month of July, 1845, R. W. Charles W. Moore, the Grand Secretary of the Grand Lodge of Massachusetts, had a personal interview with Mr. Hilton, then Master of this said Lodge, No. 459, in which interview Mr. Hilton said, that they (the members of said Lodge) were 'entirely independent of all white Bodies, asked no favors of them, and would have nothing to do with them; nor would they admit a white Mason, if he should present himself as a visitor.'

"All these things are of record, and cannot, I think, be denied in any quarter. From them I form the following opinions:

"First. Even if a Charter for a subordinate Lodge, to be located within the United States, could be lawfully granted by the Grand Lodge of England, after the close of the American Lodges, its vitality would necessarily expire when the grantor substantially revoked the grant by striking it from its records, and thus disavowing all connection with the grantee.

"Second. That the mere retention of a Charter, after its legal revocation, cannot preserve or retain any right, power, or authority in the original grantees or their successors, where the right to revoke is reserved, as it always is in all Grand Lodges, in the grantor.

"Third. Even if African Lodge, No. 459, had a lawful masonic existence June 18, 1827, the Declaration of that date was both unmasonic and revolutionary, and placed that Body as effectually beyond recognition by either the Grand Lodge of Massachusetts or any other Grand Lodge in the United States, as was the French Lodge of Virginia, or the German Lodges of New York.

"Fourth. Had African Lodge, No. 459, been in all things a lawful Lodge, after the Declaration of its first officer, of July, 1845, that 'it would not admit a white Mason if he should present himself

as a visitor,' it would have been both humiliating and degrading to have allowed the doors of the white Lodges to stand open for a reciprocity of courtesies which were thus gratuitously and roughly declared inadmissible, in advance of any request, offer, or wish to establish them.

"I have the highest masonic authority in Massachusetts for denying 'the brethren' of the Lodge in question 'all visit the Lodges,' so far as the Lodges of Massachusetts are concerned. A Past Grand Master of the Lodge of the Commonwealth, writing at Boston, in 1848, says: 'There are no Lodges of colored Masons in this city or any other part of the United States that are recognized and acknowledged by the Grand Lodge of Massachusetts, or to our knowledge, by any other regularly-constituted Grand Lodge in this country. It (the African Lodge) was never recognized by the Grand Lodge of this State, nor has there been any masonic intercourse between the two Bodies.'

"The same Brother, writing at the same place, in 1846, says, in referring to that Lodge: 'Applications have several times been made by its members for admission to our Lodges, but they have generally, if not always, been refused.' Again he says, 'That the course of our Grand Lodge in reference to African Lodge is not the result of prejudice, it is only necessary for me to say that, within the last month, a colored Brother from England has visited, and been kindly received in one of our city Lodges.'

"I believe I am correct in stating that the two following propositions are recognized as sound masonic law in this country:

"First. That no Grand Lodge of any State can regularly recognize a subordinate Lodge existing in another State, or its members, until such subordinate Lodge is recognized by the Grand Lodge of the State in which it exists.

"Second. That no Grand Lodge, either in these United States, or any other country, can legally establish a subordinate Lodge in any other State where a regularly-constituted Grand Lodge exists.

"From these views you will readily perceive why the Masonry of the United States does not and cannot either recognize 'Prince Hall Grand Lodge,' or its subordinates, or their members, as regular. To our understanding, the whole of these organizations are irregular and unmasonic, and exist adverse to masonic regulations and law. If, as Mr. Rock asserts, members of these Bodies are

admitted to 'visit Lodges in England and all parts of the world,' that admission probably arises from the fact that the history and masonic positions of these Bodies are not so well understood elsewhere as they are in the United States.

"Mr. Rock expresses an inclination to 'give the Grand Master of Vermont more light' on this subject. As he signed himself 'Corresponding Secretary of Prince Hall Grand Lodge,' I suppose him to possess all the 'light' which the subject has in it; and whatever that light may be able to reflect upon me of the truth of the past or the present, will always receive the respectful attention it may deserve from

"Your Humble Serv't,
 "PHILIP C. TUCKER,
 "*Grand Master of the Grand Lodge of Vermont*"

*Communication from the Grand Secretary of the United Grand
 Lodge of England.*

"FREEMASONS' HALL, LONDON, W. C,
 "May 5, 1870.

"WILLIAM SEWALL GARDNER, ESQ., Most Worshipful Grand Master of Massachusetts.

"M. W. SIR AND BROTHER: I would have replied earlier to your esteemed letter of the 12th March, had not the information you required necessitated a longer search than could be prosecuted at the moment. I regret that I can afford so little information, as our records, excepting as to the proceedings of our own Grand Lodge, were not kept in the accurate manner as is now the general practice.

"As you are already aware, the Warrant for the African Lodge was granted in 1784, and was numbered 459; but the fee for the Warrant, £4 4s., does not appear in our Grand Lodge accounts until the 4th April, 1787. The following remittances were received for the Charity Fund from the African Lodge, viz.:

"November 25, 1789	£2 2s. 11d.
"April 18, 1792	1 1 0
"November 27, 1793	1 5 6
"November 22, 1797	1 5 0

"In 1793 its number was altered to 370, and continued so numbered in our Calendar until 1812, when, on the re-numbering consequent on the union of the two Grand Lodges, the African Lodge was omitted.

"I send you enclosed a *verbatim* copy of all the documents I can discover relating to the Lodge; but the petition for the Lodge is not forthcoming. Should any other documents present themselves, which is somewhat unlikely, I will send you copies, and have the honor to remain, M. W. Sir and Brother,

"Yours fraternally,

"JOHN HERVEY,

"*Grand Secretary*"

Copies referred to in the above letter:

"RIGHT WORSHIPFUL SIR: We now send you an account of the Lodges proceeding since we sent our last, which was in August last, together with ten dollars for the Fund of the Grand Charity, by Captain Scot, which he saith he hath delivered to the Grand Secretary, but he hath no receipt with him for the money. We have initiated into the Lodge this year Samovel Beean, a black man, and the Reverend Mr. John Merrand, a black Minister from home, but last from Beech Town in Nova Scotia. We shall make a colletchen on St. John's Day next, which we shall send by the first carefull hand; the Lodge in general behaves veriwell in there Station, so that there no just complantes made against them. I hope I may allways have the plesevr of sending a good account of the African Lodge. After whiching all Happyness to our Royal Grand Master, and all the Officers and Members of the Grand Lodge, I beg leve to subscribe myself your most obedient humble servent and Brother,

PRINCE HALL."

BOSTON, JUNE 4, 1789.

"BOSTON, November 9, 1789.

"To the Most Worshipful WILLIAM WHITE, ESQ., G. S.

"DEAR SIR: These comes to acquaint you that we have sent sundrey letters to our Right Worshipful Rowland Holt, Esq., and to your Worship according to my order in the Charter; and with those we sent you datted August 2, 1788, we sent Ten Dollars for the Grand Charity but have not had a anser wether you had receved them or not, and the Lodge is uneasey with me on that account, as

I paid the money to Mr. Bengmen Greene, Jun., one of Captain James Scotts Merchants, and received his receipt for the money to be sent to him with the Letters for you, as I did not now were to direct them to you, and if you received them that must be the Reason; therefore, Sir, be so good when you send an answer to this you would send me some word were to direct them, that you may have them, which we hope will be by the Bearer hereof. I have sent you a sermon, preached on St. Johns Day by our Brother John Marrant, for our Grand Master, and another for you, which I hope you will receive. Our Brother Sanderson is Dead. All the rest of our Br are in health. So no at present. But must beg leave to subscribe myself your very humble servant and Br.,

"PRINCE HALL."

"To the Right Worshipful, the Grand Master, Wardens, and Members of the Grand Lodge of England.

"We your petitioners, Sampson H. Moody, Peter Howard, Abraham C. Derendemed, John I. Hilton, James Jackson, Zadock Low, Samuel G. Gardner, Richard Potter, Lewis Walker, and other Companions Who have been regularly Exalted to the Sublime Degree of Royal Arch Masons.

"Our worthy and well beloved Brethren Prince Hall, Boston Smith, Thomas Sanderson, and several Brethren having obtained a Warrant from your Honourable Body, on September 29, 1784, A. D., A. L. 5784, when, under the Government of Thomas Howard, Earl of Effingham, Lord Howard, &c, &c., &c., acting Grand Master Under the authority of his Royal Highness Henry Frederick, Duke of Cumberland, Grand Master of the Most Ancient and Honourable Society of Free and Accepted Masons.

"This Warrant allowing us to confer but the three Degrees, and finding it injurious for the benefit of our Body by having no legal authority to confer the other four degrees. And understanding that the seven degrees is given under the Warrants from the Grand Lodge, we, therefore, humbly solicit the Renewal of our Charter to ourtherise us Legally to confer the same, as we are now getting in a flourishing condition. It is with regret we communicated to you that, from the Decease of our Well Beloved Brethren who obtain'd the Warrant we have not been able for several years to transmit Monies and hold a regular Communication; but, as we are now

permanently established to work conformable to our Warrant and Book of Constitutions. We will send the Monies as far as circumstances will admit, together with the money, for a new Warrant. Should your Honourable Body think us worthy to receive the same. We remain, Right Worshipful and Most Worshipful Brethren,
"With all Due Respect, Yours fraternally,

"(Signed)

SAMSON H. MOODY, *W. M.*,

"PETER HOWARD, *S. W.*,

"C. A. DERANDAMIE, *J. W.*

"Given under our hands at Boston, in the year of our Lord 1824, January 5th (5824).

"WILLIAM J. CHAMPNEY,

"Secretary."

CHAPTER LX

THE ANTI-MASONIC EXCITEMENT

GENERAL history of Masonry in the United States would be incomplete if a notice of the anti-Masonic episode were left out; we shall, therefore, devote a few pages to this subject. There have been, generally diffused among the people, very erroneous ideas in regard to the sudden disappearance of one William Morgan, of whom it was said, that in consequence of a threatened publication of an exposure of the secret work of Freemasonry, he was either murdered or kidnaped and conveyed surreptitiously out of the country, and was never heard of afterward. It was an undeniable fact that he suddenly disappeared from the State of New York, and there is no satisfactory evidence that he was ever seen by anyone again.

Volumes have been published, both by anti-Masons and Masons, in, apparently, a vain effort to establish the charge on one side, that he was either murdered or transported out of the country, and, on the other side, that he came to no harm from the Masons, who were accused of his "sudden taking off."

The latest publication was prepared by Past Grand Master Jesse B. Anthony, 33°, of New York,¹ who availed himself of the excellent account by Hon. Josiah H. Drummond, Past Grand Master of the Grand Lodge of Maine, and the pamphlets published, several years since, by Past Grand Master Rob. Morris, of Kentucky, who spent much time and money in the State of New York, and other writers who had investigated all the circumstances connected with the affair. Our limits in this work do not admit of so extended an examination as that of Brother Anthony; nevertheless, it will be necessary, for a proper understanding of the case, to devote consid-

¹ "History of Masonry and Concordant Orders," p. 514.

erable space to a clear statement of all the ascertainable facts, and leave all speculations and conjectures to our readers.

William Morgan, it is said, was from Virginia;¹ born in 1775 or 1776; was a stone mason by trade. In 1821 he resided near York in Upper Canada and was engaged as a brewer.² His brewery being destroyed by fire, from thence he found his way to Rochester, N. Y., and worked at his trade as a stone mason, and in 1823 went to Batavia.³

In the "Letters to John Quincy Adams" it is related that "he was a hard drinker, and his nights, and sometimes his days also, were spent in tippling-houses, while occasionally, to the still greater neglect of his family, he joined in the drinking carousals of the vilest and most worthless men; and his disposition was envious, malicious, and vindictive."

Some persons doubt if he ever was regularly made a Mason; but it is nevertheless true that, after reaching Batavia, he was admitted as a visitor in Wells Lodge of that place. After this he was made a Royal Arch Mason in Western Star Chapter, at Le Roy, N. Y., May 23, 1825. His name was on the first petition for the establishment of a Royal Arch Chapter in Batavia. Some others seeing his name on the petition, declined signing it, and a new one was gotten up, leaving his name off. After the chapter was organized, upon his application for membership he was rejected.⁴

There was at that time a weekly newspaper, the "Republican Advocate," conducted by one David C. Miller. It is said he had been initiated in a lodge in Albany, N. Y., but owing to his noted character, ascertained thereafter, he had been refused advancement.⁵

These two worthies, and companions in dissipation, both impecunious and greatly in financial difficulties, concocted the scheme to divulge what they knew of Masonry.⁶ Morgan having advanced further in the degrees, was to furnish the information, and Miller was to do the editing, printing, and publishing.

This scheme, by some means, became known to the Masons. No doubt, in the drunken orgies of Morgan he had boasted of his contemplated revenge. Articles also crept into the paper;⁷ one of which was publicly read in a bar-room in 1826, which stated: "There

UNITY, PEACE AND PLENTY

SEE WOODWARD EIGLER

will be issued from the press in this place, in a short time, a work of rare interest to the uninitiated, being an exposition of Ancient Craft Masonry, by one who has been a member of the institution for years."

"Morgan having had some transaction in Canandaigua with the tavern-keeper—we think it was simply borrowing some clothing, and having failed to return the articles, a warrant was taken out for larceny, upon which his arrest followed, and he was carried to Canandaigua by a posse; among them were several conspicuous Masons. He was acquitted of the charge, because he had borrowed the clothing, and had not stolen them. He was again arrested for a debt to another tavern-keeper, and upon confession of judgment he was sent to jail. Miller was also arrested, September 12, 1826, and carried to Le Roy;¹ he was discharged, as the plaintiff did not appear in time.²

A few days previous to Miller's arrest, a warrant in behalf of the plaintiff (Johns) was issued by a Justice of the Peace residing in Le Roy against Miller and John Davids, his partner in the printing office, for the purpose of collecting money before then advanced by Johns in the prosecution of their undertaking. The officer in whose hands the warrant was placed for execution was a constable of the town of Stafford, who, having learned that the office of Miller was strictly guarded, and that he was fully determined to resist all attempts to serve any process upon him, engaged a number of assistants. On September 12th he and his posse, who were followed by a large number of people, went to Batavia to make the arrest. So many strangers, without any ostensible business, making their appearance in Batavia, aroused the most fearful apprehension among the citizens. Miller received a note early in the morning from some unknown "person that an effort would be made to take by force the papers intended for publication. He showed this note to a few of the citizens of the town, some of whom were Masons, and asked their opinion. They advised him to look upon the matter as idle rumor, as to attempt such a measure was impracticable and foolish. So many unknown persons, however, suddenly making their presence known, and as if by concert, those who had advised him to take no notice of the warning received by Miller be-

¹ H. Brown's "Narrative, Batavia, New York, 1829," p. 54.

² *Ibid.*, p. 56.

gan to fear that it was indeed a preconcerted plan to carry out the intention of obtaining, by violence if necessary, the aforesaid papers. The magistrates were all absent from the village, and this also increased the suspicions. Very soon a number of the citizens, Masons as well as others, offered their services to prevent any violence. Morgan had gone from Batavia the day before this in the charge of an officer, but no news of him had yet been received. Consternation and apprehension pervaded that small community, but as nothing further transpired, order and quietness soon prevailed. Soon after this the constable, with a single individual accompanying him, went to the office to arrest Miller and Davids with a civil process. The office was fortified by "two swivels," fifteen or more guns, and six pistols, all being loaded, but was at that time undefended, except by Miller, Davids, and a son of Miller.

The assistant arrested Davids, who called for a pistol; the constable arrested Miller. Both of them submitted and were carried through an armed crowd of their friends to a tavern across the street. A very large number of persons, nearly fifty, were there assembled. They gave no sign of any hostility whatever, and in conversation with others showed that no intention on their part existed of any violence or wrong. Subsequent disclosures, however, clearly showed that in the minds at least of a few an intention had existed of obtaining possession of the "papers" by force if necessary. Those Masons in Batavia to whom this design had been communicated severely condemned such intention, which was conceived in folly and would be fraught with mischief and ruinous in consequences. These views having been communicated to the leaders, the whole scheme was abandoned. The absence of the justices was caused by their being subpoenaed as witnesses in a trial at Bethany on that day.¹

From the evidence produced it was clearly shown that certain indiscreet and overzealous Masons did inaugurate a scheme to get rid of Morgan and prevent the publication of his pretended "exposure." He was conveyed out of the State, by his own consent, from a fear that someone would murder him. A promise was made to take care of his wife and children, and with \$500 in hand he was taken into Canada. There were a great many incidents connected

¹ The above account is condensed from Brown's "Narrative," pp. 51-55.

with the expedition to transport him out of the State, which we deem it unnecessary to mention in detail.

This affair created wonderful excitement in all the New England States and in New York and Pennsylvania, among the Masons particularly; it extended, in a milder form, southwardly, and reached as far as the District of Columbia, but its effects, morally and politically, south of the famous historical "line of Mason and Dixon," was very slight indeed. In New York, Pennsylvania, and Vermont, however, the loyal members of the Craft sustained their integrity against political, religious, and social persecutions. A new political party was organized, and that party made a national issue at the next presidential canvass in 1832, and William Wirt was their candidate for the office of Chief Magistrate, and the canvass resulted in his receiving the electoral vote of Vermont, the only State to cast their votes for him. We are glad to announce that when Masonry again revived and came forth from that terrible time of persecution, under the leadership of that grand and magnanimous MAN, Philip C. Tucker, as we have shown in preceding chapters, he brought order out of confusion and re-established Masonry in all its branches. At the present day there can not be found more enthusiastic Masons in any State of our Union, than now exist in the Green Mountain State.

The official examinations of parties who were directly or remotely connected with the abduction of Morgan, aroused and continued to excite the sentiments of hostility to the Masonic Institution; it was once well said that the "fice-dog always barks at what he does not understand," so with that *similar class* in every community, they are always ready and constantly seeking opportunities to oppose what is beyond their limited comprehension. Charges were constantly found against those Masons who were suspected of any complicity in those affairs, and suits were brought against them for several years. Among those who were arrested and imprisoned was Eli Bruce. From 1827 to 1831 there was always some one or more confined in the jail at Canandaigua.

Eli Bruce was charged with the abduction of Morgan, and was acquitted, for it was *not* proved that anyone had been abducted. De Witt Clinton was then Governor of New York, as well as one of the most prominent and distinguished Masons in the United States, and was of course eminently desirous of ascertaining the truth in all

these matters. He formulated certain questions to Eli Bruce, who was the High Sheriff of the County, as to his agency in these matters: Bruce declined to answer them and he was promptly removed from his office. Governor Clinton, it is well known, both in his private and public utterances, condemned the whole transaction of the removal of Morgan. The official account of Bruce's trial shows that complaint was made to the Governor, and Bruce was summoned to Albany in answer to the charges and show cause why he should not be removed. The reply by his counsel did not satisfy the Governor, and he was tried in the court at Canandaigua, in August, 1828. He was convicted and sentenced to twenty-eight months in jail. The execution of the sentence was postponed until May 13, 1829, upon his appeal, but on May 20, 1829, he was imprisoned until September 23, 1831. The evidence at the trial showed that Bruce understood that Morgan voluntarily consented to his removal and that a cell at Lockport was prepared for him until he could be carried to Canada. He at first declined to have anything to do with the affair, but at last gave in, and, with the others, conveyed Morgan over the river to Canada. Matters having been delayed for Morgan's removal, he was reconveyed to the State and concealed in the old magazine at Fort Niagara, until the time was suitable for his conveyance to the farm provided for him in Canada. From that time Morgan, it appears, was never seen by anyone, and Bruce testified that he did not know when or how he disappeared.

Other parties were implicated, and upon trial of each, they were punished by imprisonment.

The anti-Masonic spirit was not satisfied with the punishment of those immediately concerned in this nefarious transaction. Many conventions were held, and self-constituted Missionaries sprang up, like *toad-stools* in a night, and scattered their venomous seed broadcast, and found favorable soil, in the debased condition of many polluted minds, in which to foster these seeds of opposition to an Institution which, in all its principles and daily practices, had demonstrated its utter abhorrence to any such transactions as the Morgan affair, and also as being subversive of public order, private human rights, and the clearly enunciated precepts of Masonry—whose Theological virtues are Faith, Hope, and Charity, whose cardinal virtues are Temperance, Prudence, Fortitude, and Justice, whose principal Tenets are Brotherly Love, Relief, and Truth.

A convention of delegates from several Baptist churches was held at Le Roy, N. Y., January, 1827, and

"*Resolved*, That all such members as belong to Baptist churches and who also belong to the Society of Freemasons, be requested to renounce publicly all communication with that order, and if the request is not complied with in a reasonable time, to excommunicate all those who neglect to do so." If the present writer be permitted to publicly express his *private* opinion, it would be, that all such loyal members who refused to comply with so outrageous a resolution would, after the "excommunication," be immediately received into the church of an all merciful Savior, and welcomed out of so bigoted and benighted a congregation; as time has subsequently proved they were.

At the famous Lewiston Convention they published the following discoveries:

1. That the unhappy Morgan was taken to Newark, Upper Canada, gagged, bound, and blindfolded.

2. That he was then offered to the British Masons of that place, with the request that they should get him on board a British Man-of-War or turn him over to Brandt, the Indian Chief and a Mason, to be executed with savage cruelty.

3. That the Newark Lodge assembled on this proposition, and sent for Brandt, who came accordingly.

4. Brandt proved himself too noble of nature to have anything to do with so cowardly, inhuman, and wicked a transaction. The Savage hero disdained to do that which cowardly white monsters urged him to do.

5. The Newark Masons, thus rebuked by savage justice and magnanimity, likewise finally declined to take charge of the miserable victim.

6. The diabolical wretches, who had him in custody, brought him back as far as Fort Niagara, and then murdered him in cold blood, cutting his throat from ear to ear, cutting out his tongue, and burying him in the sand, and concluding the hellish rites by sinking the body in the lake.

Brandt denied the charge so far as it related to him, "*false in one, false in all.*" The 6th is a clincher for mendacity—the whole statement is contrary to all the legal testimony in the case, and does not tally with a subsequent account of finding Morgan's body in

the Niagara River, but was put forth by the political party of the day; and when Thurlow Weed was told that it did not prove to be Morgan's body, he said very pertinently, "It's good enough Morgan till after election."

September 11, 1830, a convention was held in Philadelphia. A committee reported an address, stating that Morgan was murdered, notwithstanding that in all the legal proceedings there was not a single witness to prove that Morgan was murdered. This address, however, demanded the suppression of the Institution of Masonry.

The following extract will show the spirit which prevailed:

"To this government Freemasonry is wholly opposed. It requires submission to its own authority in contempt of public opinion, the claim of conscience, and the rights of private judgment. It would dam up the majestic currents of improving thought, among all its subjects throughout the earth, by restricting beneficial communication. In attempting to do this it has stained our country with a brother's blood, tempted many of our influential citizens into the most degraded forms of falsehood, and burst away with its powers undiminished, its vengeance provoked, and its pollution manifest, from the strong arm of retributive justice. The means of overthrowing Masonry cannot be found in any, or in all our executive authorities. They cannot be found in our judicial establishment.

"The only adequate corrective of Freemasonry—that prolific source of the worst abuses is to be found in the right of election, and to this we must resort.

"There is therefore no impropriety in resorting to the elective franchise to correct the evils of Freemasonry.

"It, Freemasonry, ought to be abolished; it should certainly be so abolished as to prevent its restoration. No means of doing this can be conceived so competent as those furnished by the ballot boxes." We here see what prejudice, ignorance of the subject, and a spirit of persecution can effect upon the minds of men, when prompted by ambition for public office. The first paragraph is a long tissue of falsehoods, as time proved those utterances to have been; not a sentence was predicated upon a single fact which had been or could be proven. Every Mason will at once declare that every charge made in that address was maliciously false and misleading.

In 1836 a National Convention of anti-Masons was held in Philadelphia and nominated William H. Harrison for President, and Francis Granger for Vice-President, and this ended the political influence of that party.

The writer of this article was old enough to remember that contest and the prominent actors therein. Their failure at that time did not dishearten most of the leaders, as very soon thereafter they became prominent leaders of the newly organized Anti-Slavery party, a subject with which we have nothing to do whatever.

All the Grand Lodges within the States affected by this untoward anti-Masonic persecution, passed such resolutions as to, and did, satisfy most people, that Masonry as an institution had nothing to do with the Morgan affair, but condemned the injudicious and unauthorized individuals who were participants, nor made any efforts to screen them from merited justice; nevertheless, the persecution of individuals continued, and many who were socially so situated as to render their lives unbearable, surrendered their memberships and withdrew from the Institution. At length, in some of these States, particularly in Vermont, the lodges and other bodies ceased to hold their meetings, as has been shown in our different histories of those bodies.

In 1840 there were signs of renewal of activities in Masonic affairs; thirteen years of persecution had passed and there came a revival.

We learn from the authorities in New York that the lodge at Le Roy, Olive Branch, No. 39, never ceased its meetings, although located in the immediate neighborhood of the place where the whole difficulty originated, and is considered as the preserver of Masonry in Western New York during all those years of persecution and excitement.

Governor Clinton wrote to the Governors of Upper and Lower Canada asking that inquiry be made in regard to Morgan, and said in his letters:

"During the last year he (Morgan) put a manuscript into the hands of a printer at Batavia, purporting to be a promulgation of the secrets of Freemasonry. This was passed over by the great body of the Fraternity without notice and silent contempt; but a few desperate fanatics engaged in a plan of carrying him off, and on the 12th of September last (1826) they took him from Canan-

daigua by force, as it is understood,¹ and conveyed him to the Niagara River, from which it is supposed that he was taken to his Britannic Majesty's dominions. Some of the offenders have been apprehended and punished; but no intelligence has been obtained respecting Morgan since his abduction."

In response to this request of Governor Clinton, the Lieutenant-Governor of Upper Canada issued his proclamation:

"£50 Reward.—His Excellency the Lieutenant-Governor having received a communication from His Excellency the Governor of the State of New York, by which it appears that William Morgan, who some years ago exercised the calling of a brewer in this place, and who has recently resided in Canandaigua, in the State of New York, was some time in the last year conveyed by force from that place, and is supposed to be forcibly detained in some part of this Province; any person who may be able to offer any information respecting the said William Morgan, shall, upon communicating the same to the Private Secretary of His Excellency the Lieutenant-Governor, receive the reward above offered.

"Government House, January 31, 1827."²

The Grand Lodge of New York adopted the following:

"Whereas, It is alleged that an outrage has been committed on the body of William Morgan, and

"Whereas, Proceedings in consequence of such allegations have been made in Courts of Justice in relation to the subject, and

"Whereas, By reason of foul misrepresentation an effort has been made to impress the public mind with an opinion that the Grand Lodge and the Fraternity in general have attempted to screen, if not to protect, the perpetrators of this alleged outrage; therefore be it

"Resolved, That the Grand Secretary be instructed to ascertain from the public record a statement of the facts in relation to the persons said to have been Masons, charged and convicted of the abduction of Morgan,³ and report to this Grand Lodge at its next annual communication."

A supplemental report was adopted (June 2, 1832):⁴

"That participating with the members of this Grand Lodge, and the Great Body of the Masonic Fraternity, in a feeling of deep

¹ The weight of evidence was that he went voluntarily.—EDITOR.

⁴ Ibid.

abhorrence of the outrage, which was a violation alike of Masonic obligation and the law of the land, they (the Committee) have examined the papers submitted thereto with that attention which the importance of the subject demands.

"The voluminous nature of the papers presented and the shortness of the time have, however, prevented them from investigating the subject as fully as they would desire, and further time was asked in which to formulate a report."

At the communication of the Grand Lodge of New York held March 7, 1832, Mordecai Meyers presiding, twelve experienced and capable members of the Grand Lodge, together with the Grand Officers, were appointed to visit all the Lodges in the City of New York, Brooklyn, and Staten Island, to arouse them to a sense of their duty, instruct the officers of said lodges in their work, to advise and encourage them to a strict adherence to the Constitution, and Regulation of this Grand Lodge, and to inspect their books.

EXTRACTS from the "Proceedings of the Triennial Session of the Grand Encampment of Knights Templars for the United States of America assembled at the Asylum in Masonic Temple, in the City of Baltimore, in the State of Maryland, on Tuesday, the 19th of September, A.D. 1871 A.O. 753."

"Grand Master Gardner then read the following Address:

"Knights, Companions: On Thursday, the 29th of November, 1832, fourteen bold and valiant Knights assembled in the Masonic Temple in this city, and proceeded to open the General Grand Encampment of the United States. The Rev. Sir Jonathan Nye, of New Hampshire, presided over the deliberations, and welcomed his associates by an affectionate and fraternal address. The illustrious Sir James Herring, of New York, recorded the proceedings; while the venerable Prelate, Rev. Sir Paul Dean, of Massachusetts, implored the blessings of heaven upon the brave Knights and their doings. Of these fourteen good men, and true, two were from New Hampshire, five from the jurisdiction of Massachusetts and Rhode Island, one from Connecticut, two from New York, one from Maryland, and three from the District of Columbia.

"The General Grand Chapter met at the same time in Baltimore, that distinguished man and Mason, Edward Livingston, of Louisiana, being its presiding officer. He was re-elected to the high office which he had so honorably filled for the preceding three years.

"No session of the National Grand Bodies, held before or since that time, has so attracted public attention as did this of 1832. John Quincy Adams, ex-President of the United States, did not consider this meeting of a mere handful of men in Baltimore beneath his notice, or unworthy the abuse of his caustic pen; and page after page of his letters, then published in the newspapers of the day, since collected into a volume, attest the interest which that meeting occasioned.

"The period was indeed a peculiar one. For six years the excitement and frenzy of anti-Masonry had been gathering strength and fury, until at last, in a national convention of anti-Masons held here in the City of Baltimore, candidates were nominated for the two highest offices of the Republic. The election took place in 1832, and William Wirt, of Maryland, and Amos Ellmaker, of Pennsylvania, the nominees of the anti-Masonic, political party for President and Vice-President, received the seven electoral votes of Vermont, and no more. The power of anti-Masonry culminated in 1832; and when the General Grand Encampment assembled here, in the waning days of autumn, and found the fires around which the national Council of anti-Masons had been held, and read by their uncertain and unsteady light the strength and weakness of Anti-masonry in the Union, they knew that the battle had been fought, and that the night of agony was over. The hate and bitterness and fiendish hostility they knew would still remain—powerful in localities to infinite harm—but the Nation had repudiated anti-Masonry, and had elected, as President, Andrew Jackson, an acknowledged, out-spoken, well-known Freemason; so well known that on the 23d of May, 1833, John Quincy Adams, in a published letter to Edward Livingston, then Secretary of State, paid a merited compliment to the Past Grand Master of Tennessee, in words intended to be severe and censurable.

" 'The President of the United States,' said Adams, 'is a Brother of the Craft, bound by its oaths, obligations, and penalties, to the exclusive favors, be they more or less, of which they give the

mutual pledge. That in the troubles and difficulties which, within the last seven years, have befallen the craft, they have availed themselves of his name, and authority, and influence, to sustain their drooping fortunes, as far as it has been in their power, has been matter of public notoriety. A sense of justice has restrained him from joining in their processions, as he has been importunately urged by invitations to do, but he has not withheld from them his support.' "

Almost forty years have passed away since the National Grand Bodies assembled in Triennial Session in the City of Baltimore. Behold the change! Those fourteen brave Knights have gone to their reward — not one of them now lives to rejoice at this triumphant return to Baltimore. They sleep peacefully and serenely the last great sleep: peace to their ashes; honor to their names. The railroad and telegraph now traverse populous States, then scarcely known. The Union stretches from ocean to ocean, and holds in its fast embrace great States, whose territory was then unexplored.

From all parts of this wide extended country—from the Atlantic and the Pacific—from the great rivers, with their fertile valleys—from the mountain ranges, with their verdant slopes — from the rugged North and the sunny South — from the great West, whither the star of empire is taking its course, and from the sea-girt populous East — come up here to Baltimore to this Eighteenth Triennial Session of the Grand Encampment of the United States, in companies, in battalions, in regiments, thousands of true Knights, bearing the banners of the Cross, living witnesses of the truth of the resolutions passed by the General Grand Encampment in 1832, that "Political Parties, in assailing the orders of Knighthood, aim a blow at all the free institutions of the country."

The institution which, in 1832, was abused and maligned, its members insulted and degraded, and which could then gather in its National Convention but fourteen tried souls, has survived the abuse, the malignity, the insults, and degradation, and stands before you to-day in its wisdom, strength, and beauty.

In 1832 those fourteen Knights did not disturb the usual tranquillity of Baltimore, and their presence here was unrecognized. Quiet in demeanor, unobtrusive in manner, they came with a firm determination to fully perform their devoirs to Temple Masonry.

In 1871 the authorities of Baltimore, with a liberality of sentiment and a heartiness of greeting which will be gratefully appreciated by every Templar of the United States, welcome us as guests of their municipality. The Templar Knights throng the city—its houses, streets, and squares, and are received by brethren and citizens with a warmth of fraternal, generous hospitality, unbounded and catholic as the principles of Freemasonry.

PART FOUR
SYMBOLISM OF FREEMASONRY

CHAPTER I

SYMBOLISM OF FREEMASONRY

Introduction.

THE study of Symbols is so closely interwoven with Language that it is essentially necessary, in a treatise on Symbology, that we should begin with an examination into the Origin of language itself; for it is to be presumed that language, or rather speech, was the very first effort of man to make his wishes known to his fellow-man. The habitual use of certain words, applied to the same objects, produced the primitive language.

We shall not attempt to follow those who have supposed that language was derived from certain inorganic sounds predicated upon the "utterances of Animals," called "Bow-Wow" theory by Max Müller and others. Now we must remember that it has been clearly proven by distinguished philologists that "the whole of what we call the human mind is realized in language, and in language only. Our next task would be to try to discover the constituent elements of language, and watch, in their development, the true historical development of the human mind."¹ It becomes requisite in order fully to understand "symbolisms," as applied to the Ancient Mysteries, the Religions of the World, and also to Speculative Masonry, that we should be more particular in tracing the genealogy of language, from its very commencement, so far as it is possible to do so, by consulting the works of those distinguished writers of the present century, and more particularly within the last quarter of the century now about to close; and inasmuch as on this particular subject of language there is intimately associated that of the mind, which means "thought" and which, again, means "combination," no better work can possibly be referred to than the *Science of Thought*, by

¹ Max Müller, "Science of Thought," vol. i., p. 176.

Max Müller in his recent two volumes, which we may constantly quote from wherever in that work we find that his authority will confirm our own ideas.

Müller is strictly a "scientist" in whatever line of thought he enters for examination, and upon this very subject he has shown the manner in which we may attain the truth, *viz.*, by the "Constituent Elements of Thought," "Thought and Language," "Constituent Elements of Language," the "Origin of Concepts and Roots."

In the proper examination of any individual subject-matter the only true method of examination is by analysis; hence Müller does analyze, so as to show each and every element which enters into the composition of language. He says:

"Few words have been used in so many different senses as Thought. I mean by Thought the act of thinking, and by thinking I mean no more than combining. I do not pretend that others have not the right of using Thought in any sense which they prefer, provided only that they will clearly define it. I only wish to explain what is the meaning in which I intend to use the word, and in which I hold it ought to be used. 'I think' means to me the same as the Latin *Cogito*, namely *Co-agito*, 'I bring together,' only with the proviso, that bringing together or combining implies separating, for we cannot combine two or many things without at the same time separating them from all the rest. Hobbes expressed the same truth long ago when he said 'that all our thinking consisted in addition and subtraction.' "

"Humiliating as this may at first sight appear, it is really not more so than that the most subtle and complicated mathematical processes, which to the uninitiated seem beyond all comprehension, can be reduced in the end to addition and subtraction.

"Thinking may not seem so marvellous an achievement as we formerly imagined when we look up with vague admiration to the Mathematical Calculations of Newton, or to the Metaphysical Speculations of Kant; yet if what these thinkers achieved has been achieved by such simple processes as addition and subtraction, combining and separating, their work to the mind becomes in reality far more marvellous than it appeared at first. Much, however, depends on what we combine and separate, and we have therefore to consider what corresponds in thinking to the numbers with which the mathematician operates, what are, in fact, the known quantities

that constitute the material of our thoughts, what are the elements which we bring together or co-agitate."

Müller then proceeds to distinguish in our knowledge four things: "Sensations, Percepts, Concepts, and Names, and, while we can distinguish these, we must not suppose that they ever exist as separate entities; for no words are possible without concepts, nor can there be concepts without percepts, nor percepts without sensations. If we postulate sensations as the causes of percepts, percepts as the causes of concepts, and concepts as the causes of names, it would seem a very natural conclusion that sensations could exist previous to and therefore independent of percepts, percepts of concepts, concepts of words. And yet we have only to try the experiment in order to convince ourselves that, as a matter of fact, thought, in the usual sense of the word, is utterly impossible without the simultaneous working of sensations, percepts, concepts, and names, and that in reality the four are inseparable."

With these fundamental principles thus clearly laid down by Müller, we may discover how, at the earliest period in man's history, he very soon found a name for every fact which was presented to his observation. We shall follow the Author in his most interesting and conclusive arguments to prove the position which he has taken. The service of language is to convey our thoughts to one another.

There are various ways in which men can communicate with one another—by *gestures*, *cries*, *words*; make pictures to represent their ideas, characters or letters. These are signs, and in order to understand in what manner they operate we must commence with such signs as are the most natural and simple. When parties meet who speak different languages they endeavor to make themselves understood by gestures which would most naturally indicate the idea wished to be conveyed:

"This is the *gesture-language*, as we all know how to use it. But to see what a full and exact means of Communication it may be worked up to, it should be watched in use among the deaf and dumb, who have to depend so much upon it. To give an idea how far gestures can be made to do the work of spoken words, the signs may be described in which a deaf-and-dumb man once told a child's story in presence of the writer. He began by moving his hand, palm down, about a yard from the ground, as we do to show the height of a child—this meant it was a child he was thinking of,

Then he tied an imaginary pair of bonnet-strings under his chin (his usual sign for female) to make it understood that the child was a girl. The child's mother was then brought on the scene in a similar way. She beckons to the child and gives her two-pence, these being indicated by pretending to drop two coins from one hand into the other; if there had been any doubt as to whether they were copper or silver coins this would have been settled by pointing to something brown or even by one's contemptuous way of handling coppers which at once distinguishes them from silver. The mother also gives the child a jar, shown by sketching its shape with the forefingers in the air, and going through the act of handing it over. Then by imitating the unmistakable kind of twist with which one turns a treacle-spoon, it is made known that it is treacle the child is to buy. Next, a wave of the hand shows the child being sent off on her errand, the usual sign of walking being added, which is made by two fingers walking on the table. The turning of an imaginary door-handle now takes us into the shop, where the counter is shown by passing the flat hands as it were over it. Behind this counter a figure is pointed out; he is shown to be a man by the usual sign of putting a hand to one's chin and drawing it down where the beard is or would be; then the sign of tying an apron around the waist adds the information that the man is the shopman. To him the child gives the jar, dropping the money into his hand, and moving her forefinger as if taking up treacle, to show what she wants. Then we see the jar put into an imaginary pair of scales which go up and down; the great treacle-jar is brought from the shelf and the little jar filled with the proper twist to take up the last trickling thread; the grocer puts the two coins in the till, and the girl sets off with the jar; she sees a drop of treacle on the rim, wipes it off with her finger, and puts her finger in her mouth, how she was tempted to take more, how her mother found her out by the spot of treacle on her pinafore, etc."

The student anxious to master the principles of language will find this gesture-talk so instructive that it will be well to explain its workings more closely. "The signs used are of two kinds. In the first kind, things actually present are shown. Thus, if the deaf-mute wants to mention 'hand,' or 'shoe,' he touches his own hand or shoe. Where a speaking man would say 'I,' 'thou,' 'he,' the deaf-mute simply points to himself and the other persons. To ex-

press 'red,' or 'blue,' he touches the inside of his own lip or points to the sky. In the second kind of signs ideas are conveyed by imitations. Thus, pretending to drink may mean 'water,' or 'to drink,' or 'thirsty.' Laying the cheek on the hand expresses 'sleep' or 'bed-time.' A significant jerk of the whip-hand suggests either 'whip' or 'coachman,' or 'to drive,' as the case may be. A 'lucifer' is indicated by pretending to strike a match, and 'candle' by the act of holding up the forefinger and pretending to blow it out. Also in the gesture-language the symptoms of the temper one is in may be imitated, and so become signs of the same temper in others. Thus the act of shivering becomes an expressive sign for 'cold'; smiles show 'joy,' 'approval,' 'goodness,' while frowns show 'anger,' 'disapproval,' 'badness.' It might seem that such various meanings to one sign would be confusing, but there is a way of correcting this, for when a single sign does not make the meaning clear, others are brought in to supplement it. Thus, if one wants to express 'a pen,' it may not be sufficient to pretend to write with one, as that might be intended for 'writing' or 'letter'; but if one then pretends to write and holds up a pen, this will make it plain that the pen itself is meant."

"It has to be noticed that the gesture-language by no means matches sign for word with spoken language. One reason is that it has so little power of expressing abstract ideas. The deaf-mute can show particular ways of making things, such as building a wall, or cutting out a coat, but it is quite beyond him to make one sign include what is common to all these, as we use the abstract term to 'make.' Even 'in' and 'out' must be expressed in some such clumsy way as by pretending to put the thing talked of in, and then to take it out. Next let us compare an English sentence with the sign by which the same meaning would be expressed among the deaf and dumb. It will at once be seen that many words we use have no sign at all corresponding to them. Thus, when we should say in words, *'The hat which I left on the table is black,'* this statement can be practically conveyed in gestures, and there will be signs for what we may call 'real' words, such as *hat, leave, black.* But for what may be called the 'grammatical' words, *the, which, is,* there will be no signs, for the gesture-language has none. Again, grammars lay down distinctions between substantives, adjectives, and verbs. But these distinctions are not to be found in gesture-lan-

guage, where pointing to a grass-plot may mean 'grass' or 'green,' and pretending to warm one's hands may suggest 'warm' or to warm one's self, or even 'fire-place.' Nor (unless where artificial signs have been brought in by teachers) is there anything in the gesture-language to correspond with the inflection of words, such as distinguish *goest* from *go*, *him* from *he*, *domum* from *domus*. What is done is to call up a picture in the minds of the spectators by first setting up something to be thought about, and then adding to or acting on it, till the whole story is told. If the signs do not follow in such order as to carry meanings as they go, the looker-on will be perplexed. Thus, in conveying to a deaf-and-dumb child the thought of a green box, one must make a sign for 'box' first, and then show as by pointing to grass outside, that its color is 'green.'

"This account of the gesture-language will have made it clear to the reader by what easy and reasonable means man can express his thoughts invisible signs."¹ So we may conclude that from these fundamentals, by which men formulated their special gestures, soon they became enabled to produce visible signs to represent "things," and, gradually, to sketch the same upon any plain surface, so that the ideas became permanently fixed to be understood by others for any given time, by which they were reminded of separate facts, or continuous narratives.

In due time, when religious rites were adopted, these written or engraved signs became symbols, and emblems, and were perpetuated from fathers to sons, along the track of time, and their engravings upon stone, either as monuments, tombs, obelisks, or temples, have existed from time immemorial to our day.

We may thus trace from the original elements of symbols the great variety of combinations which we find, in the representations of the various Deities, in all the ancient religions of the world, in which, did our limits permit, we might with great profit trace the gradual development from the simplest forms to the most abstruse and recondite representations of Deity.

"Wherefore, from hence it plainly appears that these Platonic and Egyptian pagans, who thus reduced their multiplicity of Gods to the divine ideas, did not therefore make them to be so many minds or spirits, really distinct from the Supreme God (though

¹ "Anthropology," by Tylor.

dependent on him, too), but indeed only so many partial considerations of one God, as being all things, that is, containing within himself the causes of all things. And accordingly we find that the Egyptian Theologers called their religious Animals symbols of the eternal ideas; so did they also call them symbols of God.

"Celsus applauds the Egyptian Theologers talking so magnificently and mysteriously of those brute animals worshipped by them, and affirming them to be certain symbols of God.

"But lastly, as God was supposed by these pagans not only to pervade all things, and to fill all things, but also he being the cause of all things, to be himself in a manner all things, so was he called also by the name of everything, or everything called by his name; that is, the several things of nature and parts of the world were themselves verbally deified by these pagans, and called gods and goddesses. Not that they really accounted them such in themselves, but that they thought fit in this manner to acknowledge God in them, as the author of them all."¹ So Paul said of the Athenians, that he perceived they were too religious (superstitious).

Symbols were the means used from the remotest antiquity to transmit ideas—the objective form for the subject-matter in the mind.

That the investigation, or study, of symbolism is worthy of the attention of the greatest minds, we have the evidence in the great number of volumes which have been written on this subject, in every age, to demonstrate the value placed by learned men upon the study of symbols, emblems, and allegories, which have formed the foundation of every religious belief known to Man, the remains of which are to be found, not only in the existing monuments of Antiquity, but are to be traced in the present religions, manners, customs, and habits of thought, and even modes of expression, in every nation, tribe, kindred, and people at present living upon this globe.

This would appear to be a rash assertion, but every successive step in this inquiry reveals the fact that symbols, known and applied to religious purposes, before the days of Abraham, are now used in the same manner, and the fundamental principles taught in the Christian Church, and which constitute its peculiar dogmas, were

¹ Cudworth.

well known and imparted to the initiates into the Mysteries of India, Persia, and Egypt, long centuries before Christ.

In fact, there is strong presumptive evidence that when the great Aryan wave of emigration passed from Arya Varta to the South Eastward, and, crossing the Indus, swept before it to the Southward, the great Turanian Races, who had preceded them and had long been inhabitants of the Peninsula of Hindoostan, they carried these principles with them and engrafted them upon the superstitions which they found prevailing over the races thus subdued. Many of these superstitions, united with the Christian dogmas, are to be found in several branches of the Christian Church.

Simple, individual devotion requires no outward manifestation; Concurrent Religious observances, systematized, demanded a common method in which the many should Co-operate; the idea inwardly suggested must be objectively represented; this was the impelling motive for public worship—which was originally performed in adoration of the Heavenly Bodies, more particularly of the Sun, the greatest benefactor of Man, then of the Moon and the principal Stars, or as they were called the Planets (moving stars).

The Mustarion Sacramentum, the "inward feeling" illustrated by some symbol, was not adopted, but the originators of Rituals substituted Secret Ceremonies, taking the mysteries in a more literal sense, to conceal certain facts and peculiar doctrines from the people, and yet we find from Tertullian¹ that in the Orgies of Mithras there was a remarkable rite, a kind of Sacrament, which was administered to the initiate by the Hierophant.

In adopting Symbols the simplest forms were selected which would express the idea to be conveyed.

The words now in use for certain substantives were, in the Original language, Selected to express, Metaphorically, certain ideas.

In that Country, from whence was partly derived our own language, we find that the people, our great Ancestors, living mostly under the broad Canopy of Heaven, directed their religious or devotional thoughts to the glorious Light, which, upon its daily return, was the source of all earthly desire. The fire (Agni), the early Dawn (Ushas), the full daylight (Mitra),² the Rising Sun,

¹ Tertullian, "De Prescriptio," ch. xl.

² Mitra, Morning Star; Jupiter. Agni, Ushas, Mitra; these initials, A. U. M., constituted the Mystic NAME of the Hindus.

the Meridian Sun, and declining and Setting Sun, all had their appropriate names. The Clouds of morning and evening, the Winds which gathered or dispersed them, also had their peculiar designations, and so every object of nature which added to their pleasure and comfort, or in any manner interfered with these, so as to interrupt their daily duties and militate against their happiness, received corresponding names.

These, in succeeding generations, became the representatives of fictitious personages and Supreme objects of worship, until in the classic days of Greece, which succeeded the Allegorical age of Indian and Egyptian Mysticism, the Pantheon was a complete personification of the powers of Nature, which man had deified, and made his tyrants to control every emotion of the heart and every act of his life, thus placing the whole race of Man under the dominion and power of the Priesthood of that Pantheon, who also exercised their Authority in such a manner as to enslave the Souls, as well as the bodies, of the Worshipers at their Shrines.¹

Max Müller, in his *Treatise on Words*, clearly shows from whence are derived certain words which, in our language, have become so common as to have lost their original technical sense.

Light.

The great object of Aryan desire derived through the Latin Lux, from the Greek Luknos, was nearly the same in Sanskrit, and the Moon, Lukina. So the seven Stars in the North, being the Seven "Shiners," became the "Great Bear," because the same word was used for shining, and a bear, whose hair was shining. We have the Greek Lukabos, a year, a revolution of Luc; Lukeios, an epithet of Apollo; Lukos, a Wolf with shining hair, from leukos, white or shining, and sacred to Apollo; Lucus, a grove, because planted around the high places of Luc; the English word *Luck*, because it indicates prosperity, is represented by Light.²

The Seven Stars, or Seven Rishis, were derived from Rishi, itinerant, from Ri, and Rish, to go. Arktos—Bear, Riksha—Bear.

The Worship of Light passed to the causes of Light; first of the Sun, Moon, and Stars, then of Fire; then into more solid forms,

¹ And this continues to the present day, even in nations called civilized.

² Faber, "Mysteries Caberi," vol. i., p. 29.

to represent the flame, upright Stones, of Conical and pyramidal form, rough Stone or unhewn, as in Gaul and in Britain.

The Worship of individuals, either real or mythical, was transferred to animals, which were made to represent them; as, from the doctrine of transmigration, the Soul of Osiris had passed into a *Bull*, that animal became the Supreme object of Worship; as the Cat was for Diana, and the Cow for Isis. Now, writing Hieroglyphically contributes greatly to this Species of idolatry, and the Priests did then, as they have done ever since, in every form of worship, hold the power and the method of interpretation from all but those whom they chose to initiate into those mysteries, and concealed by this veil, so artfully thrown over their system, from all others.

Thus, the Hieroglyph for God was a Star, and the symbol of a Star was a Serpent, from whence proceeded the Universal Serpent Worship which extended over the whole World.

It would not be an unprofitable task to follow out to its legitimate conclusion the subject of the Serpent Symbol, but we shall only allude to some of the symbols in our further illustrations of this subject. It has been well settled that the serpent symbol was legitimately derived from the traditions of Paradise, so familiarly known and represented by all the Nations of Antiquity, and in their religious rites, it may be said, "The trace of the Serpent was over them all."

From this meager sketch it may be seen how religion, which was first pure, and an earnest outpouring of the heart to the Great and beneficent Creator, degenerated into gross idolatry.

We now pass from the general subject to the more special one of Hieroglyphical writings.

It is assumed that alphabetical Characters in their first condition were substantive emblems or simple representations of language.

From Shuckford, in his *Connections of Sacred and Profane History*, we learn that "the first language had but one part of speech, and consisted chiefly of a few names for creatures and things Mankind had to do with." Others do not concur in this, and say, "The art of thinking, which is the arrangement of our ideas from the perceptions of natural objects, cannot exist without some degree of reason; and the various and abstruse combinations of reason will scarcely be produced without the use of words expressing *qualities*,

action, or passion, as well as connectives to draw consequences or blend ideas which are relative, uniform, and rational."

Original names have invariably represented innate qualities as understood universally among those using a common language; whence the origin no man can determine, although it is attempted to show that animals received names which in their utterance would indicate some distinguishing trait or characteristic. It is, however, quite certain that the Oldest Alphabets, in their elements, represented substantive objects, as in Hebrew and Cognate Alphabets, viz., Aleph א, the Ox; Beth ב, a House or enclosure; Gammel ג, a Camel. Spineto¹ says: "The Original mode of Writing was the exact figure of the object, which, for the Sake of diminishing labor, became first simple drawing of the Outline, and ultimately an arbitrary Mark, which produced the three different modes of Writing among the Egyptians, generally designated by the appellations of hieroglyphic, demotic, and hieratic."

A great cause which advanced the Conventional system of Written signs or Characters was the imagery of primitive language.

One Author says: "Rhetoric, which springs naturally out of language, became a Science when reduced to a system; natural figures, untrammelled by the restriction of rules, became more expressive: Cain's inquisitive reply to the stern demand was, 'Am I my brother's Keeper?' Lamech says to his wives: 'Hear my voice, ye Wives of Lamech, and hearken unto my speech, for I have slain a Man to my wounding and a young man to my hurt. If Cain shall be avenged Seven fold, truly Lamech Seventy and Seven fold.' "

In the Nabathean Alphabet, reputed to have been Antediluvian, if they wished to state in what manner a man died by a violent death, they used one of these characters, viz.:

1st, By lightning. 2d, Guillotine. 3d, Serpent. 4th, Hatchet. 5th, Poison. 6th, Dagger. 7th, Cord. To express firmness of mind, personal strength and courage, some stately or majestic production of Nature was employed, as the *Oak* and *Lion*. A warrior was termed a Lion, or an Oak; on the contrary, an irresolute or weak man by a reed; insincerity by a Serpent, and fidelity by a dog.

¹ Spineto, "Hieroglyphs," ix., 297.

"Let us, for example, suppose that the letter B was called Bai and such a term primarily imported *being* or *existing*. We are told *Bai* was the Egyptian denomination for a branch of the Palm-tree, which tree was anciently regarded as an emblem of being, existence, or immortality; again, Horapollo says, *Bai* signifies a Hawk. the soul and the Wind, wherefore the Egyptians used the Hawk as a symbol for the soul.

"The Greeks called the palm-branch Baion, Bais, and Beta or Baita, the letter B, preserves the sound of Hebrew Beth or Egyptian *Bat*, but the idea of the name, in Greek from Bei baiou, to confirm, establish or place in a permanent state of existence. The Latins called this letter Be, nearly the simple name of the Bai or symbolical palm-branch. And Be in the Celtic conveys the same leading idea of existence. Irish Be is the term for life; Cornish signifies Be, Am, Art, is, existent."¹

The Hebrew word for the Deity called the Tetragrammaton is also derived from the word "to be," "I am," "I will be," "I am all that exists." In Egyptian, the same word is used for the principal Deity.

The Origin of Hieroglyphics was simply picture-writing, and consisted in the representation of a drawing of any visible object connected with it. Improvements arose to obviate difficulties and meet the necessities of circumstances as they occurred, and in due season a regular system was ordained, and became conventional and determinate. Thus, certain symbols became known and established for certain characteristics; as, for instance, The Hawk, as an emblem of the Supreme Deity, because of its piercing sight and swiftness. The Asp also, not being subject to old age, and moving without limbs. The Crocodile, because it has no tongue, which organ God has no occasion for.

At the period of the greatest perfection of Egyptian writing there were three kinds, viz., Epistolic, Hieroglyphic, and Symbolic. The Priests had a fourth, which was termed Hierogrammatic, which was known only to their order. Modern writers subdivide the above into:

1, Pure Hieroglyphic, or picture; 2, Linear Hieroglyphic, or emblems; 3, Phonetic Hieroglyphic, or representations of sound;

¹ Davis, of "*Celt. Res.*," p. 339, in Oliver's Lecture V., p. 64.

and 4, Demotic, or Epistolographic, or Enchorial¹ writing, for the uses of common life.

Symbolic writing was subdivided into three parts, *viz.*, Curio-logic, speaking literally; Tropical, a figure; and Allegorical, description of one thing, under the image of another.

This was for greater secrecy, each admitting of a different method of interpretation, which was communicated only to a few.

In the Curio-logic style, the moon was pictured by a crescent; Tropically by a Cat; Allegorically by the figure of Isis or a veiled female; The Sun by a disk; Tropically by an Ox, and Allegorically by a figure of Osiris.

The word Symbol, derived from Sumbolon (Symbolum), means that which represents, or is a sign of something expressing to the initiate a doctrine, thought, or principle; Emblem, from Emblema, first signified work inlaid, or raised ornaments, or Mosaic work; now it is made to mean the same as symbol.

A.D. 363, Yamblichus² says that he considered the mode of teaching by symbols most necessary, and that nearly all the Greeks cultivated it, as the Most Ancient and transcendently honored by the Egyptians, and adopted by them in the most diversified Manner.

"The first requisite of a symbol is, that it shall really mean something; that it shall be in its nature a proper and adequate sign and token of something; and the second is, that this something shall be worth knowing and remembering."³

"The Origin of the science of Symbols is lost in the night of time, and seems to connect itself with the Cradle of Humanity; the most ancient Worship submitted to its law; the Arts of design, Architecture, Statuary, and Painting were born under its influence, and the primitive writing was also one of its applications."⁴

"Everything is Emblematic, everything is figurative, everything is more or less Hieroglyphic amongst the Ancients. They began in Chaldea by placing, or rather by giving to Some Constellations the name of the Ram, and of the Bull, either to signify the productions of these Animals during the Spring, or to pay a peculiar homage to

¹ Enchorios, place, country, popular, common, invented at a late period. They invented another system of Magical Communication which imbedded Cabalistic Secrets in comprehensive phrases, that were not only mysterious, but absolutely formidable to the ignorant. Soothsayers were Magic Alarm-posts; philters and dangerous compounds were treasure Chambers, etc.

² "Vita Pythagoras."

³ Albert Pike.

⁴ Portal, "Symbols des Egyptiens."

the Deity, as soon as they began to depart from the religion of Noah. Fire was the symbol of the Deity among the Persians. The rising of Sirius or Dog-Star informed the Egyptians of the inundation of the Nile. The Serpent, holding its tail in its mouth, became the image of eternity. The whole of nature was disguised and emblematically represented by the primitive inhabitants of our globe. If we place all the symbols and emblems which we have received from Antiquity under the inspection of a Man of sense, or even of a scholar who had never heard of them, he will not be able to explain any of them. It is a figurative and emblematic language which requires a particular study before it *can be understood*."¹

"One of the most beautiful of the Ancient figures is that of Timæus of Locri, who describes Deity to be "a Circle whose centre was everywhere and whose circumference nowhere."²

"The philosophy of the Egyptian Priests was abstruse and hidden; enveloped in fable, and allegory, and exhibiting only dark hints, and obscure resemblances to truth, and thus much even the priests themselves insinuate to us, in many instances, particularly in those sphinxes which they seem designedly to have placed before their Temples, as types of the enigmatical nature of their theology; of this nature was the inscription engraved upon the base of Minerva's statue at Sais, whom they look upon the same as Isis, viz.: I am everything that has been, that is, and that shall be; Nor has any Mortal ever yet been able to discover what is under my Veil."³

The name of AMUN-AMN is interpreted by Manetho to signify "Concealment," or something which is hidden. Osiris is designated under the hieroglyphs of an eye and a scepter, the former denoting his providential Wisdom, as the latter does his power, they being the two most distinguishing Characteristics of Deity. Also of symbols—"Under which the Mystics endeavored to lead their Votaries to the Knowledge of divine truth, and, though some of these are more clear and explicit than others, yet are they not any of them without hazard; for whilst some persons by wholly mistaking their Meaning and application, have thereby plunged themselves into superstition, others, that they might avoid so fatal a quagmire, have unawares dashed themselves upon the rock of Atheism."

¹ Spineto, "Lectures on Elements of Hieroglyphics."

² Albert Pike.

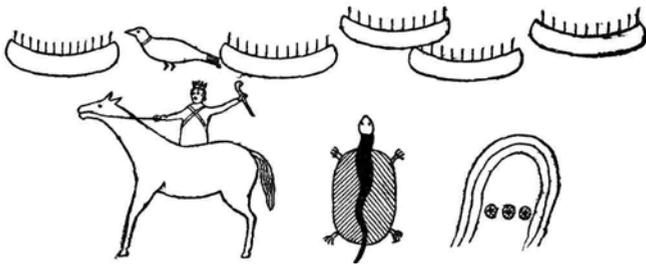

³ Plutarch, "De Isidi et Osiride," died A.D. 140.

It was principally among the East Indians, Egyptians, and Syrians that the most extraordinary emblems were consecrated to religion.

A South Sea Island Missionary tells how once being busy carpentering, and having forgotten his square, he wrote a message to his wife for it, with a piece of charcoal on a block, and sent it by a native, who, amazed to find that the block could talk without a mouth, for a long time afterward carried it hung around his neck by a string, and to his wondering countrymen told what he saw it do.

The art of writing, however strange and mysterious it seemed to the savage tribes of men, was developed from steps of invention. Uncivilized men took the first step in writing by making pictures of such natural or artificial objects known to them.

The following picture-writing, used by hunting tribes of American Indians, records an expedition across waters, led by a chief on horse-back, having a Magical drumstick in his hand.

PICTURE-WRITING, ROCK NEAR LAKE SUPERIOR (AFTER SCHOOLCRAFT).

There were fifty-one men in four canoes, the first being led by an ally of the chief whose name was Kishkemunazee (Kingfisher), as shown by the bird. The land tortoise, the emblem of land, shows that they reached the other side of the water, the picture of the three suns under the sky indicating three days in crossing.

When the tortoise is painted to represent land it is not a mere imitation, but has become an emblem or symbol. The bird does not represent a real kingfisher, but a man of that name; this becomes the first step toward phonetic writing or by sound, *i.e.*, to make a picture stand for the sound of the word to be spoken.

Tylor says (p. 169): "How men may have made the next move toward writing may be learnt from the common child's games of

rebus, i.e., writing words 'by things.' Like many other games, this one keeps up in child's sport what in earlier ages was man's earnest. Thus if one writes the word 'waterman' by a picture of a water-jug and a man, this is drawing the meaning of the word in a way hardly beyond the American Indian's picture of the kingfisher. But it is very different when in a child's book of puzzles one finds the drawing of a water-can, a man being shot, and a date fruit, this representing in rebus the word 'Can-di-date.'

"For now what the pictures have come to stand for is no longer their meaning, but their mere sound. This is true phonetic writing, though of a rude kind, and shows how the practical art of writing really came to be invented. This invention seems to have been made more than once, and in somewhat different ways. The old Mexicans, before the arrival of the Spaniards, had got so far as to spell the names of persons and places by pictures, rebus fashion.

PATER NOSTER ON MEXICAN PICTURE-WRITING (AFTER AUBIN).

Even when they began to be Christianized, they contrived to use their picture-writing for the Latin words of their new religion. Thus they painted a flag (*pan*), a stone (*te*), a prickly pear (*noch*)—which were together pronounced *pa-te-noch-te*

and served to spell *pater noster*, in a way that was totally exact for Mexicans who had no *r* in their language. In the same way they ended the prayer with the picture of water (*a*) and aloe (*me*) to express *amen*."

"This leads on to a more important system of writing. Looking at the ordinary Chinese characters on tea-chests or vases, one would hardly think they had to do with pictures of things. But there are fortunately preserved certain early Chinese characters, known as the 'ancient pictures,' which show how what were at first distinctly formed sketches of objects came to be dashed off in a few strokes of the rabbit's hair pencil, till they passed into the meaningless looking cursive forms now in use, as is seen in the following figure.

CHINESE ANCIENT PICTURES AND LATER CURSIVE FORMS.

"The Chinese did not stop short at making such mere pictures of objects, which goes but little way toward writing. The inventors of the present mode of Chinese writing wanted to represent the spoken sounds, but here they were put in a difficulty by their language consisting of monosyllables, so that one word has many different meanings. To meet this they devised an ingenious plan of making compound characters, or 'pictures and sounds,' in which one part gives the sound, while the other gives the sense. To give an idea of this, suppose it were agreed that a picture of a box should stand for the sound *box*. As, however, this sound has several meanings, some sign must be added to show which is intended. Thus a key might be drawn beside it, to show it is a *box* to put things in; or a leaf if it is to mean the plant called *box*; or a hand, if it is intended for *box* on the ear; or a whip would show it was to signify the *box* of a coach.

"This would be for us a clumsy proceeding, but it would be a great advance beyond mere picture-writing, as it would make sure at once of the sound and the meaning. Thus in Chinese, the sound *chow* has various meanings, as ship, fluff, flickering, basin, loquacity. Therefore, the character which represents a ship, *chow*, which is placed first in the figure as represented afterward with additional characters, to show which particular meaning of *chow* is intended.

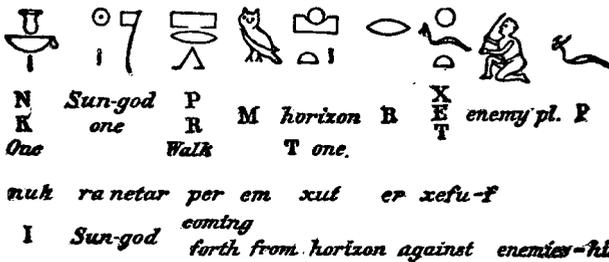

"These examples, though far from explaining the whole mystery of Chinese writing, give some idea of the principles of its sound, characters, and keys of determinative signs, and show why a Chinese has to master such an immensely complicated set of characters in order to write his own language.

"Next as to the cuneiform writing, such as is to be seen at the British Museum on the huge man-headed bulls of Nineveh, or on the flat baked bricks which were pages of books in the library of Sennacherib. The marks, like wedges or arrow-heads, arranged in groups or rows, do not look much like pictures of objects. Yet there is evidence that they came at first from picture-writing; for instance, the sun was represented by a rude figure of it by four strokes arranged round. Of the groups of characters in an inscription, some serve directly to represent objects, as man, woman, river, house, while other groups are read phonetically as standing for syllables.

"The inventors of this ancient system appear to have belonged to

the Akkadian group of Nations, the founders of early Babylonian civilization. In later ages the Assyrians and Persians learned to write their language by Cuneiform characters, in inscriptions which remain to this day as their oldest records. But the Cuneiform writing was cumbrous in the extreme, and had to give way when it came into competition with the alphabet. To understand the origin of that invention, it is necessary to go back to a plan of writing which dates from antiquity, probably even higher than the Cuneiform of Babylonia, namely, the hieroglyphics of Egypt.

"The earliest known hieroglyphic inscriptions of Egypt belong to a period approaching 3000 B.C. Even at this ancient time the plan of writing was so far developed that the scribes had the means of spelling any word phonetically, when they chose. But, though the Egyptians had thus come to writing by sound, they only trusted to it in part, combining it with signs which are evidently remains of earlier picture-writing. Thus the mere pictures of an ox, a star, a pair of sandals, may stand for ox, star, sandals. Even where they spelled words by their sounds they had a remarkable way of adding what are called determinatives, which are pictures to confirm or explain the meaning of the spelled word. One short sentence given as an example from Renoul's *Egyptian Grammar* shows all these devices. The meaning is: 'I (am) the Sun - God coming forth from the horizon against his enemies':

"Here part of the pictures of animals and things are letters to be read into Egyptian words, as shown underneath. But others are still real pictures, intended to stand for what they represent. The sun is shown by his picture, with a *one* mark below, and followed by the battle-axe, which is the symbol of divinity, while further on comes a picture of the horizon with the sun on it. Besides these, some of the figures are determinative pictures to explain the words,

FINAL DEFEAT OF THE CRUSADERS, AT ACRE

The Last Sortie

SEE WOODWARD ZEGLER

the verb to walk being followed by an explanatory pair of legs, and the word enemy having a picture of an enemy after it, and then three strokes, the sign of plurality. It seems that the Egyptians began with mere picture-writing, like that of the barbarous tribes of America, and though, in after ages, they came to use some figures as phonetic characters or letters, they never had the strength of mind to rely on them entirely, but went on using the old pictures as well. How they were led to make a picture to stand for a sound is not hard to see. In the figure a character may be noticed which is read R. This is an outline of an open mouth, and indeed is often used to represent a mouth, but the Egyptian word for mouth being R, O the sign came to be used as a character letter to spell the sound R O or R wherever it was wanted. So much of the history of the art of writing may thus be read in a single hieroglyphic sentence."¹

Firmly believing that the guiding hand of an all-wise and overruling Providence has conducted mankind from his earliest appearance on earth, commencing, as we have endeavored to show, with his primitive notions of things and his efforts to illustrate his first crude and imperfect ideas and clearly to demonstrate his gradual advancement in expressing those ideas, until he had accomplished the same by framing alphabetical writing—as shown in the earliest written languages—we will endeavor to demonstrate that it must have been by Divine Revelation that this was finally accomplished in the gradual development of man's inventive genius implanted by Divine Providence in the "Three Revelations."

It would seem evidently proper in the examination of symbolisms in connection with the ancient religions that we should also examine that religion which, commencing with Moses and the children of Israel, has gradually advanced and spread over the whole world.

¹ Tylor Anthropology, pp. 173, 174.

CHAPTER II

THREE REVELATIONS

THE Will of God as the Supreme rule of right is found expressed in the Moral Constitution of the world; of the Agent himself, and of Holy-Scripture."

It is generally admitted that these three forms of the revelation of the Divine Will do exist.

The light of nature, or moral teaching, from the moral constitution of the World and of Man are undervalued by some. Those who deny Christianity as a system, and simply believe in the existence of God only, place too high an estimate upon the Light of Nature, and reject the authority of the revelation of the Mind and Will of God in the Scriptures, known to us as the Old and New Testaments.

It is for the philosophical Mind to discover that "these three copies of the Will of God are from the same divine Mind," "That the same fundamental moral principles and tendencies are embodied in all of them."

Now we write for those who, as Masons, have, solemnly and in the presence of many witnesses, professed a firm belief in God, and that they put their "trust" in Him; therefore we must confidently expect that every Mason who may read this thesis will understand that he is under Moral obligations to obey the will of that God in whom we trust; and we shall proceed to show how the Will of God has been revealed to Man.

From the histories of all the Ancient Nations we learn this fact, that, commencing with the earliest form of religion down to the present Christian era, in the year of the creation of the world commonly known as Anno Mundi 4000, according to the recent chronology, every form of religious faith has been founded in a "Christos," "the Anointed," hence each was a form of "Christianity."

The "fall of man," or the loss of innocence, was well acknowledged in all the ancient theologies and philosophies, and that a "restoration" was to take place was also acknowledged; the effort in every mythology was to complete that restoration by means of a "divine savior."

In our Masonic system of the first era there is no question whatever in the minds of all impartial examiners that the authors of the system designed to teach the dogmas peculiar to Christianity. The revolution of 1717 divested Masonry of most of its Sectarian dogmas, and opened the way for the admission of all who would merely confess a belief and trust in a Deity. Nevertheless, in subsequent years, measurably between 1760 and 1800 A.D., the several lectures introduced, gradually, a more complete acknowledgment of the Christian elements than existed from the revolution in 1717 to the former date, 1760. The lectures, now used in every State of the Union, clearly teach those dogmas.

The use of the Sacred writings, holding as they do a position representing, par excellence, the "Great Light," evidently demonstrates the belief in their direct inspiration from God himself, or the whole matter is an imposition and should be removed from our ritual. To declare solemnly that the Bible "is the inestimable gift from God to man" is a "solemn Mockery" if it be not the acknowledged "Holy Writing."

It is, therefore, the conceded guide for all of our conduct, and if not inspired by that confession, then we are defrauding every candidate who receives the Entered Apprentice's degree.

Assuming that we are honest men in our declarations, we proceed with our argument.

First Subject.—Revelation in External Nature.

The Constitution of the World is but partially discerned by man, and the revelation of the Will of God is but dimly perceived therein. The light of conscience and direct revelation are necessary to assist him in understanding external Nature.

(a) External Nature may reveal to man somewhat of God's Will from its constitution, when in all its parts he may discover in the government of God therein that "there is a fixed connection between virtue and happiness and between vice and misery as the

result of cause and effect; and we may thus conclude that God has so constituted all Nature that he approves of Virtue and condemns Vice. "These Moral tendencies are universal, being everywhere observed in creation and providence, and in individual and social experience. They are inevitable:—vice, in the long run, producing misery; and virtue producing happiness, by a law as unchangeable as the law of gravitation." Plato said, by the Sophist Hippias: "Now, by Jove, I must here confess that I do perceive plain traces of a Divine Law; for that laws should bring along with them their own penalty when broken is a most rare device, to which no mere human legislator has even yet been able to attain."

There is, evidently, to every reflecting mind, in God's Universe "a Vast and Wondrous System of Moral compensations and Moral retributions embracing all the subjects of the Divine Government."

(b) *Not easily interpreted.* In this form it is very difficult to interpret the Will of God. That wonderful Man Paul said that the invisible things of God—his eternal power and Deity—may be made known by things that are seen, yet Man, limited as he is, bounded by the enslavement of the flesh, can see but dimly the record of the Moral attributes and Moral law by the results of causes in the Natural World. From these sources only those who have attained to the highest philosophy can even remotely see the rule of right from external Nature. Nevertheless, we may perceive, even if remotely, that God contemplated, in the Creation of the Universe, that all things should work together for a specific purpose, and in his infinite mind there could not be a separation of the Moral attribute from those essentially necessary in his character as the Supreme Governor and Creator of all things.

Second Subject.—Revelation in Man's Nature.

We presume that in the original creation of Man, the revelation of the Will of God, in Man's Moral Constitution, must have been clear and perfect. Is this the case now with Man? And may we well ask, How and when did the change take place? Observation and our own personal experience clearly demonstrate the fact "That it is now defective and dim," and the teaching of revelation also confirms the truth.

The following is the immediate and practical rule: "A rule of right, in order to be in the highest sense *practical*, must be *always at hand* and in *readable* form. For a being essentially and always active, emergencies of Moral action must be constant and often sudden and unexpected, so that time is not always given for consulting some outward rule to be comprehended by the processes of reasoning. The Author of Man's being has, therefore, placed a revelation of the rule of right in the soul, to be read intuitively, and so to furnish a practical guide suited to his circumstances."

For Mankind in general, experience teaches us that this rule is the chief practical guide for Moral conduct. Professor Haven says: "Within certain limits, the Moral nature of Man decides, without hesitation, as to the Character of given actions, and approves and condemns accordingly. It is seldom at a loss as to the great dividing lines which separate the Kingdom of right and wrong. It is the voice of nature, essentially the same in all climes and ages of the World, approving the right, condemning the wrong. It is the voice of God speaking through the Moral Nature and constitution which has been bestowed upon his creatures. Thus it is that they which have the law within are a law unto themselves."

This inner sense of Moral rectitude can not be the Ultimate guide, for it is well known that education, location, customs, and habits control our ideas of right and wrong in the abstract; and it is also true, that as we change from one Kingdom or Nation to others we do find the inner consciousness of Men differing—wherefore, we are forced to find the Ultimate principle, by which to decide between any two conflicting ideas of Moral rectitude; and we thus come to a direct revelation by "Scripture" which, when received as those of divine inspiration, we are of necessity to obey them, as the mind and will of God; and to which we must refer as standards for our government.

The Christian Theologians have, in all the past, written constantly in advocacy of the divine origin of the "Bible." It is not our province in so short an Article as this must be, to enter at all into a discussion of the validity or the "Authenticity" of the Text of Scripture. Volumes have been written, and but few have been convinced, save those already "believers"; hence we content our-

selves in this "dictum": As Masons, we receive it as the Ultimate Standard of our Morality, and by it, as our adopted "Constitution," we must inevitably be tried, and be acquitted or condemned. If it be but of human origin, it is nevertheless *the foundation* upon which every Moral principle in Masonry now stands; just as we are governed by the Constitutions, Rules, Regulations, and Edicts which are acknowledged as of human authority only, and do govern us in our common jurisprudence throughout the entire World of Masons, so do the Scriptures rule and govern our Ethics and Moral Conduct, whether they be human only, or of Divine origin. Those Moral principles, clearly enunciated in the Bible, appeal to the Moral consciousness of Mankind in general; and it is only in the Minds of those who have suffered their Moral principles to be *atrophied*, that there ever has been or ever will be anyone to deny this. Among all enlightened and good men it is "the most perfect expression of the law of human duty."

"In bringing to light new relations, as arising out of Man's sin, the ethical system of the Bible has vastly widened the sphere of duty." We must believe in the infinity of God; but the infinite God can not, by us, in the present limitation of our faculties, be comprehended, but only conceived. A Deity understood would be no Deity at all; and it is blasphemy to say that God only is as we are able to think Him to be. We know God according to the finitude of our faculties; but we believe much that we are incompetent properly to know. The infinite God is what, to use the words of Pascal, is infinitely inconceivable. Faith, Belief, is the organ by which we apprehend what is beyond our knowledge. In this, all Divines and Philosophers, worthy of the name, are found to coincide; and the few who assent to Man a knowledge of the infinite, do this on the daring, the extravagant, the paradoxical supposition, either that Human Reason is identical with the Divine, or that Man and the absolute are one.

In Man's condition, growing out of his imperfect Nature and the uncertainties of a correct understanding of duties, a revelation became a necessity, so soon as his change from a sinless to a sinful state occurred. We here encounter at once the Skeptical view which denies the present sinful state of Man. Let us then assume Man as sinless and take the following sketch of Cousin to illustrate the present condition of things—Good and Evil. You will agree

with me that Man is, 1st, sinful; or, 2d, Man is sinless. There is no middle term of this category.

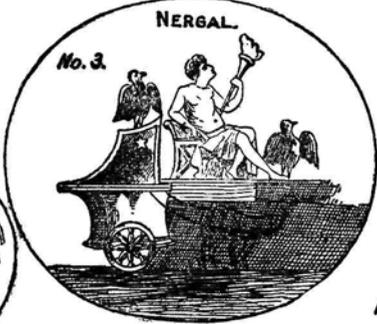

"Good and Evil."—Distinction.

"If we do not admit the essential distinction between good and evil, between virtue and crime, crime founded on interest, virtue founded on disinterestedness, then human language and the sentiments that it expresses are inexplicable.

"Disturb this distinction, and you disturb human life and entire society. Permit me to take an extreme, tragic, and terrible example. Here is a man that has just been judged. He has been condemned to death, and is about to be executed—to be deprived of life. And why? Place yourself in the system that does not admit the essential distinction between good and evil, and ponder on what is stupidly atrocious in this act of human justice. What has the condemned done? Evidently a thing indifferent in itself. For if there is no other outward distinction than that of pleasure and pain, I defy anyone to qualify any human action, whatever it may be, as criminal, without the most absurd inconsequence. But this thing, indifferent in itself, a certain number of men, called legislators, have declared to be a crime. This purely arbitrary declaration has found no echo in the heart of this Man. He has not been able to feel the justice of it, since there is nothing in itself just. He has therefore done, without remorse, what this declaration arbitrarily interdicted. The Court proceeds to prove to him that he has not succeeded, but not that he has done contrary to justice, for there is no justice. I maintain that every condemnation, be it to death, or to any punishment whatever, imperatively supposes, in order to be anything else than a repression of violence by Violence, the four following Points: 1st, That there is an essential distinction between good and evil, justice and injustice, and that to this distinction is attached, for every intelligent and free being, the obligation of conforming to good and justice. 2d, That man is an intelligent and free being, capable of comprehending this distinction, and the obligation that accompanies it, and of adhering to it naturally, independently of all convention, and every possible law, capable also of resisting the temptations that bear him towards evil and injustice, and of fulfilling the sacred law of natural justice. 3d, That every act contrary to justice deserves

to be repressed by force, and even punished in reparation of the fault committed, and independently too of all law and all convention. 4th, That Man naturally recognizes the distinction between the just and the unjust and knows that every penalty applied to an unjust act is itself most strictly just."¹

In the Scriptures we find all that is necessary for Man to do in his progress toward reinstatement to his original sinless condition. It is no argument against the Bible that Men differ in regard to the very language of it, and that such differences have created bigotry, fanaticism, hatred, persecution, and death; because all those results are the demonstrations, palpably true, of the sinfulness of Man, his selfishness, ambition, and lust for power, in utter opposition to those very teachings in the Bible by which they should be guided to a course of love, compassion, charity, and beneficence. In all ages Men have done precisely the same things to their fellow-Men before the Bible was written; and since then, when in utter ignorance of its existence, when there were no redeeming features in their savagery, inhumanity, and devilishness.

The influence of the Morality of the Bible has tended, continually, to change the fierceness of the Natural Man to those milder and heavenly virtues of Love, compassion, and Charity.

Third Subject.—The Written Revelation is the Perfect Form of the Supreme Rule; it is the clearest expression of the Divine Will.

Every intelligent Man will say that a Character modeled after the Morality of the Bible is a perfect Character: as was that of Jesus, the "*Christos*" of the Bible. Every departure from that perfect type detracts from a perfect Character. Let us refer to those Characters who were represented centuries before his advent and see if in their Conduct they were up to his standard. Were "*Chrishna*" of India, *Mithras* of Persia, *Osiris* of Egypt, *Dionysus*, *Bacchus*, *Orphaeus* and *Adonis*, of Classic days, such as to be examples for us to follow? Were they not all of them the mere creations of human imaginations? Who now believes that any one of them ever had a real existence?

They were all Characters of human origin in the Mythologic ages designed as the "Saviors" of Men, each one emphatically the representative "Christos," or Christ of his particular Nation; and the religious system designed to restore the lost and fallen race of Man. This idea was derived from the traditions of the fall of Man. by means of the Serpent, Kalinac. Chrishna, in the Ninth Avatar, is represented as the Good Black Shepherd stamping the head of the Serpent Kalinac with his heel, while he holds the serpent aloft by his tail.¹ In the Tenth Avatar, which is yet to come, Chrishna, the "Anointed," is to restore the race of Man to its pristine innocence and happiness. Hence, we assert, that since God promised to Adam that the "seed of the Woman should bruise the head of the Serpent," Christianity, in some form, has existed ever since. The Old Testament writings throughout foreshadow the "Savior, Christos," and the Jews are yet looking for him to come, to restore them as the Children of Abraham to their National greatness once existing. Christians say he has come already. Now as Masons we decide not between these, but take all in as our Brethren, and the One God as our Heavenly Father, revealed to us as such in the Great Light of Masonry.

"Aristotle has said that Man was a political animal—he certainly is a religious animal, as the history of Mankind shows from the earliest ages."

In the twofold nature of Man no one has a right to exalt either side of this nature at the expense of the other; also in the double nature of his intellectual faculties we have no right to atrophy either the reason, on the one side, or the sentiments, in the opposite direction; but it is the result of true wisdom to keep them in due equipoise, for the proper development of the intellect, for the wisest and best of purposes. Moreover, it has been shown that Man in his relation to his fellow-Man must also be held in the twofold relation of egoism and altruism. Every animal instinct prompts him to a pure selfishness, continued until that instinct be satisfied.

In the sentimental Nature of Man we find the promptings to social life, and altruism becomes a balancing force which brings the animal instincts to the equipoise, when controlled by reason. When the sentimental faculties preponderate, it is because the reasoning

¹ See plate, fig. 12.

force has become weakened; where sentiment is suppressed, the reasoning powers have been unduly stimulated.

From time immemorial Man has manifested the sentimental part of his nature, in worshipping something, by him considered his superior. As has been shown already, his worship, in the form of sacrifices offered, has been to appease an offended Deity.

How did he know of a Deity? and how know that the Deity was offended?

Self-consciousness of wrong done was the inner monitor, which taught Man what was right and what wrong, in regard to a Superior power. That men, among themselves, soon made laws for their Moral government we can readily understand; but how did Man first comprehend that above him was a power to which he was responsible? That of himself he should arrive at any such definite conclusion as to require him to appease an offended being, is incomprehensible to us; it is out of all human categories and can only be referred to a direct revelation of God himself to Man.

Its universality renders it certain; no mere accident could have communicated such ideas from nation to nation, and keep up the superstitious notions so prevalent among the most abject and deplorable savage tribes as are found in America and in Africa, where fetichism of the lowest, most grovelling kind, "keeps alive some memory of the old Truth in the human heart." To deny this is to deny everything concerning the Spirit history of Man, and closes our eyes to the broad daylight of facts, and challenges a logical proof of the shining of the Mid-day Sun itself; both, alike, self-evident propositions, requiring no proof, they are our axioms.

That God exists is as true as that the Sun Shines continuously, and spreads his light over the entire Solar System, interrupted only by partial clouds, as they screen the earth from his rays. As well might we deny the existence of the sun at Midnight, because we can not see him or any evidence of his light, as to deny God, because we can not see him directly or, in our estimation, any evidence of his overruling power; yet in all times and in every Nation Men have had faith in a Deity; they have put their trust in him; have worshiped him in some form or other; and have framed theories in regard to him, his nature and his attributes, and hence have arisen mythological systems, Philosophical hypotheses, and religious formularies by which Man can approach nigh unto that great August

Being, recognized as the great Force of the Universe; and however many diverse gods there may have been, and howsoever differently portrayed in the different Nations and separate Mythologies, yet they can all be traced to but one great Deity or Supreme God, of whom all the others were, originally, emanations, receiving names descriptive of their peculiar functions, which in time became humanized or personated and worshiped as distinct gods.

Again, in the Original Theocratic systems of India, Assyria, and Egypt.

Three persons are distinctly set forth in the Godhead, and their peculiar attributes, alike, each to each, as Creator, Preserver, and Destroyer, this last term evidently signifying the dissolution of animal form to reproduce a Spiritual regeneration and resurrection to immortality.

In the Indian system the Office of the second person of the Trimurti is that of the Preserver of Man, and in the Nine several Avatars or Incarnations he has indicated his office, and more particularly in the Ninth, where as the Good Black Shepherd, or Chrishna, "Anointed One," he treads upon and bruises the head of the Old Serpent Calinac, thus demonstrating the promise in Gen. iii., 15 verse. (See plate, figure 12.)

Now what do all these well-known Myths refer to if not to the enmity between God and Man? the necessity of reconciliation and the provision made by the Deity for such reconciliation? As far back as we are able to extend our examinations into the history of Man, we find him striving to become in perfect accord with God. Hence all of his sacrifices to appease an offended Deity. We have the best of opportunities to study the Paganism of the earliest civilizations of the Old World, compared with that of all the intermediate centuries and the present day. We know from the Old Testament precisely the Ceremonial law and Observances of the Mosaic economy and the subsequent history of the Israelites to the present day.

We have the Koran from the day it was first promulgated by Mahomet to its spread of the principles and practices of the Many Millions now governed by it, and yet, when all these come into the light of the Gospel of Christ they vanish like the Morning Mist before the glorious sun as it rises above the horizon.

We are not ignorant of the objections urged by all skeptical

writers as to the inaccuracies of the Old Testament as well as the New. Moses did not make so many mistakes as he is charged with by Volney, Voltaire, and Paine of the last century, and Colenso of this. They all forget that this is an age of inquiry and Theists are no longer afraid to read, study, and controvert infidel Authors. The discoveries made during the last twenty-five years or more, and which have been, in that time, before the reading World, in the very country over which Moses is said to have conducted his people, have demonstrated incontestably the truth of the entire narrative concerning the wanderings of the Children of Israel; and he who denies this, after reading those Official narratives in connection with the Mosaic account in Exodus and Numbers, must be set down to the account of "None so deaf as those who will not hear."

We are prepared to prove, analogically, geographically, topographically, and philologically, that the accounts in Exodus and Numbers must have been written on the spot, at the time, and by an active participant in the Scenes and places portrayed and described.

We are not now advocating any inspiration for the text, any more than we would for Gordon's "Annals of the Revolutionary War." He was a Cotemporary writer cognizant from day to day of the events of the times, and stated them as he saw or heard of them, liable to mistakes and receiving incorrect information. So with the books of the Pentateuch giving an account of the Exodus and Wanderings for the forty years between Egypt and the East banks of the Jordan. He who now should explore that country from Rameses through the Desert of Sinai, Et Tih, and old Moab, or should critically examine the Official reports of Scientific Men and Oriental Scholars combined, would be obstinately, willfully blind, if not convinced of the truthfulness of the Narrative, so far as the essential facts are at issue. It must be remembered, that all the books contained in the Old Testament have come down to us from the days of Ptolemy Philadelphus, almost pure and unaltered, save in some non-essential features, as the Septuagint, agreeing, not only with the Hebrew handed down to us from that people, but corroborated by Josephus, who wrote after our Christian era began. The differences between the Hebrew and the Septuagint are no greater than between any English translation and an original classic work.

Beyond the time of Alexander the Great, back to the return

from Babylonish captivity, we rely upon the Scribes, who professed to copy the sacred books precisely as given to them, from age to age, for the preservation of the text. Extreme care was observed and exactitude insisted upon, in every copy of the Law, the Prophets, Psalms, and Histories. To prove this conclusively, we have only to state the facts connected with the translation of the Hebrew Scriptures into Greek at Alexandria by order of Ptolemy Philadelphus, by the Seventy Jews (319 B.C.). A certified copy was furnished by the High-Priest at Jerusalem and it was forwarded to Alexandria, and the Seventy completed the translation into Greek. That version we have at the present day; it has been carefully compared with the Hebrew Scriptures handed down from Jerusalem and copies of which are in the hands of the Jewish people all over the world at this day.

It is found that no Material differences occur between the original and the Septuagint, than might be anticipated in a translation from an ancient to a more Modern tongue, and as between the periods of time, from 319 B.C. to A.D. 1610, when King James's translation in England was perfected and published, the most perfect translation of all times.

Every attempt, by Skeptical writers, to invalidate the historical argument has signally failed to overthrow the Authenticity of the Old Testament. It stands as the eternal Rock of Ages, against all the lashings of every element hurled against it for its overthrow, and it will continue to stand until time shall be no more, and all the enemies of the Truth shall have been overwhelmed with confusion, and either compelled to acknowledge the Truth, as thousands have already done, or to be cast aside with obloquy and shame.

No single work, which has had Man for its Author ever had the severe criticisms which have been urged against the Scriptures, both of the Old and New Testament; yet no other writings have been so triumphantly vindicated by the highest talent, learning, and genius as have been always displayed by the friends of Inspiration.

Yet, nevertheless, it must be admitted, that the claim made in behalf of the inspiration, by which the utterances were prompted, must challenge the freest investigation of all the evidences adduced, in support of that claim. Momentous consequences must follow the categorical decision. If the Bible be from God, dictated by his spirit, then its every mandate must be implicitly obeyed. A failure

to comply with its commands and directions, according to its own utterances, must involve eternal banishment from the presence of God. To follow its dictates, as far as imperfections of humanity will permit, faith in all its utterances, and implicit trust in the Divine Author, according to the text of Scripture, will secure the highest blessings on Earth and the promise of an eternity of bliss. It is then highly essential, nay, it is of the utmost, absolute consequence that every one should settle the question definitely whether he will exercise that saving faith in the "Word of promise," and accept the offered blessings, or, casting away every offer, he will utterly deny the authority of Scripture and look upon the "Book" as of human invention, and if so, then, bearing upon its pages the evidence of deception and fraud, and altogether unworthy of the attention of reasonable Men and to be itself cast out.

In pursuing our discussion upon this all-important subject, it is of the utmost consequence that we should, each one for himself, definitely settle the question of the Authority of the Word.

If the Bible be true and given by the inspiration of the Spirit of God, then its dictates are to be strictly obeyed; its utterances on all subjects to be carefully considered; and every thought, word, and deed referred to, commands and dictates therein as the very center of authority whereby we are to be governed.

If the Bible be not true, then it is to be no more considered, than any other book, which treats upon the conduct and affairs of Mankind.

The arguments, in favor of inspiration of Scripture have been fully examined by the highest order of minds that have ever graced our schools and colleges. They have impartially considered the whole subject and have given in their testimony and pronounced in favor of the claim to inspiration. Sceptics, like Lord Rochester, Lord Byron, Rousseau and many others, could not refrain from giving their testimony, as to the Value of the Bible as a Book of pure Morality. Bolingbroke declared that "the Gospel is, in all cases, one continued lesson of the strictest Morality, of justice, of benevolence, and of universal Charity."

Now consider the state of society in Palestine, and we may say all over the Roman Empire, when Christ came teaching the lessons in the Gospel, alluded to by Bolingbroke. Who was it that thus taught? Was it one from the eminent schools of that age, learned in Grecian and Roman philosophy, and prepared by a long course

of studies to become a teacher? Nay, but an unlearned Carpenter's Son, a denizen from that most depraved of all the abandoned villages of Galilee—the proverbial Nazareth—he came, astonishing the World, with a system of Morals, so vastly above all that had ever preceded it, that it was incomprehensible to the then whole World of Man, and they utterly rejected Christ and his teachings.

A simple reference to the profane histories of that day will clearly demonstrate, that long prior to the coming of Christ, during his life, and for a century following his death, the whole world, or what portion of it was known to and conquered by Rome, was in the most debased condition as to its state of Morals. The question must then very naturally arise in the mind of the impartial investigator as from whence Christ derived his ideas of a Morality, so pure and infinitely above the whole conception of his age, as to command the respect and admiration of the highest civilization in all ages since he gave utterance to those precepts, as we find them in the Gospels? He certainly did not get them from his people, or by education in Nazareth or in any other town of Galilee; for when he commenced his Mission among the Cities of that country, he astonished all, even those who had known him from his birth, when he had finished the famous discourse recorded in Matthew, chapters v., vi., and vii. It is written:

"And it came to pass, when Jesus had ended these sayings the people were astonished at his doctrine: For he taught them as having authority, and not as the scribes." And well they might be; for it was so different in all its principles from the practices of his day, that it was incomprehensible to them. Yet in so far as it referred to the conduct of Men toward each other, in the ordinary transaction of life, the lowest and poorest classes could see clearly a broad road for their elevation; so different from the treatment they were in the habit of receiving from those above them. We make no allusion to the account given of Miraculous cures wrought by him upon the poor, deceased, and stricken people; or his production of food for the hungry; or his reported power over the elements; it is the quite as Miraculous and undeniable fact of his anomalous teachings, that we now have to deal with. The Miracles may be denied, but the principles taught by him are undeniable; and that, it must be confessed, was quite above the natural tendencies of his times; and the Morals and principles of the whole World of

Man, from the lowest classes to the highest, most refined, and cultivated. It was the Augustan age in literature. In that age we find a Cicero, not only as Author, but as a leading Statesman; Virgil, Ovid, Sallust as poets, and Annalist; also the historian Tacitus; Pliny the elder and younger, and other Latin Authors, familiar to all scholars at the present day.

The World was utterly ignorant of the fundamental principles upon which the Morality taught by Christ was predicated, *viz.*, "To do unto others what you could justly wish should be done to yourself." This was the dictate as to our conduct to our fellow-Man. In relation to our duty to God. If the World of Man ever came up to the Standard, even of Socrates, Plato, or Aristotle, it had long lost a knowledge of any true principles of that duty since the Roman Empire had succeeded the Grecian; and during the period between the decline of the Alexandrian successors and the rise of Roman domination and the growth of that luxury which overwhelmed the City of Rome, spread its baneful influences wherever the Legions and cohorts were established as a permanence; even over the Jewish provinces in Palestine, so that the severe discipline of the Scribes and pharisees, and the strictest sect of Sadducees, became utterly abandoned to the Roman influence, brought about by the Herods and their courts, between the first conquest of Palestine and the period when Christ commenced his peregrinations.

What we have said in reference to Christ is well authenticated history; just as reliable as the history of the conquest of Caesar, the history of Tacitus, and the accounts by Pliny, and the writings of Cicero, Works which no one denies.

We think it is clearly shown that the Morality taught by Christ was of divine origin. It is a well-known method of demonstration in Geometry to prove a proposition by demonstrating that the negative of it can not be true. Thus I have shown that Christ's Morality could not possibly have been of human origin, hence it must have been divine.

We have been led into the discussion of the "Three Revelations" through the examination of the antiquity of signs, symbols, and emblems. The very remains of Antiquity, from which we derive our knowledge of the sign language, show, conclusively, the earliest religious instincts of Mankind. It is to be here remarked that the original religions were designed to teach a pure Morality; all writers

concur in this fact; and the gross idolatries, impure, and lascivious rites, came at a later day.

We copy the following testimony: A recent writer of no mean repute, a clergyman in the Church of England, says: "Christianity is, in fact, the reintegration of all scattered religious convictions, and this accounts for the adoption by the Church of so many usages belonging primarily to paganism, and for the doctrines of the creed resembling in so many points the traditions of heathenism."

"The use of the temple," says M. Gilliot, "of churches dedicated to saints, and adorned with branches of trees on certain occasions, incense, lamps, tapers, votive offerings made upon convalescence, holy water, asylum, festivals, and ember seasons, calendars, processions, the benediction of land, sacerdotal vestments, the tonsure, the marriage ring, turning to the East, devotion to images, even, maybe, the strains of the Church, the *kyrie eleison*, all of these customs and many others are of Oriental origin, sanctified by the adoption of the Church."¹

Thus much as to what has come down from Paganism to the Church. Now, it is well known that when Freemasonry revived under the influence of the Church it was a Church affair, and its rites, ceremonies, and symbols were controlled by the Churchmen. The vows were to make its members true to Mother Church. Then the ceremonial of baptism was an essential feature, and in the English rite it is still preserved. Now, let us examine that point, and we quote from the same author, *viz.*:

"Baptismal ceremonial includes all purifications. The idea that man is held back from perfect union with God by his imperfection, uncleanness, sin, is widely diffused, and manifests its existence by water, blood, and fire baptisms, by mutilation of the body and maceration of the flesh."

"Among the Greeks the mysteries of Cotys commenced with a purification, a sort of baptism, and the priests of the Thracian goddess derived from this their title of *Baptai*."²

Apollo, deriving his name from *Apolouo*, to purify, was the god of expiation by baptism.

A festival of "cleansing" was celebrated in Thessaly. "Musaeus" was a complete ritual of purifications, and divided the ceremonies into two orders, "*teletai*" and "*katkarmoi*," the latter being

¹ Gilliot, "L'Orient, l'occident," etc. ² Suidas, sub. voc. Juvenal, Satir., ii., 92.

purifications and expiations accomplished by special sacrifices, the former resembled the purifications performed in the mysteries.

The usual mode was dipping, or by aspersion. Immersion was called "loutron," the other "perirransis."¹ When Diogenes saw one baptized by aspersion, he said, "Poor wretch! do you not see that since these sprinklings cannot repair your grammatical errors, they cannot repair, either, the faults of your life."²

Lustral water was placed at the door of temples for the priests to purify the profane. The hands and feet were washed before entering the temple. The brazen laver of the Mosaic tabernacle was for that purpose. Blood was sprinkled by the peristiarth, who had slain the victim when the proedrai had opened the assembly. The herald, taking the peristiarth's place, continued the lustration by burning incense. Fumigations constituted another form of purification. Sand was used, and salt, in default of water, which was regarded as possessed of the virtue of purification, and a symbol of incorruption; every impure act whatever demanded purification.

The Romans practiced baptism, as we learn from Juvenal, Satir., vi., 522, where he satirizes those who dipped their heads thrice, in the morning, into the waters of Tiber.

At the feast of Pales, Goddess of Flocks, shepherds purified themselves by washing their hands in new fallen dew.³ A lustration was made by consecrated water shaken from a branch of laurel or olive; and Propertius, like David, prays, "*Spargite me lymphis*" "purge me with hyssop."⁴ The waters of Ganges have a purifying effect; children are bathed in it, the sick are sprinkled with its waters, the dead are plunged in it.

Drinking of the water washes away sin, and the Indians take it with them and use it in the ceremonies of their temples.

In Egypt it was held that the dead were washed from their sin by Osiris, and on the sarcophagi the departed is often represented kneeling before him, who pours over him water from a pitcher.

Purification with water and urine of cows and earth is the most prominent feature in the ceremonial of Zend. Among the Jews, was practiced the rite of baptism, to cleanse by immersion or aspersion with consecrated water. (Numb. viii. 7; xix. 9, 13-20; xxxi. 23; Ezek. xxxvi. 25, 26; Psl. li. 2-7.)

¹ Plat., "Craty," 47; Theophr., "Hist. Plaut.," ix., 12.

² Diog., "Laert.," Lib. VI. ³ Ovid, "Fasti," iv., 778. ⁴ Proper., vol. vi., 7.

Infant baptism was practiced in Scandinavia before the introduction of Christianity, and the child was then named.

The Druids practiced baptism by dipping or aspersion, also by fire, borrowed from the Phœnicians. This was "passing through the fire to Moloch." "Beltein" is still observed in Ireland. Cattle are driven through fires built on high hills, on May 1st.

Among the Mexicans, the new-born child was bathed, and these words spoken by the nurse: "Take this water, for the goddess Chalchiuhcueja is thy mother," etc.

The second baptism occurred later, and was by fire. A boy was passed four times through the flames.

This passing through the fire was customary with the Romans after their return from a funeral, to purify themselves. The same custom prevails in Syria. Throughout Europe, in the Middle Ages, was kept up the old custom of leaping through a fire, and driving cattle betwixt flames, and was condemned by the Councils of the Church. "Every purification," said Servius, "is made either with water, or fire, or air. In all sacred rites there are three purifications, for they are purified either with the torch and sulphur, or are washed with water, or are ventilated with air."¹

In Portal's work on Egyptian Symbols, compared with those of the Hebrews, we find this under

Water.

"In Egyptian Cosmogony, as in the first book of Moses, the world was created from the body of waters. This doctrine, says Champollion, was professed in Egypt in the most distant times. Water was the mother of the world, the matrix of all created beings, and the word MSCHBR signifies matrix and waves.

"Man was considered as an image of the world, the initiate was to be born again to a new life, and the baptism thenceforward symbolized the primeval waters. It was on this account that the initiate was called MSCHE, Moses, a word signifying in Egyptian, according to Josephus (*Antiq.*, II, 9, § 6), saved from the water, or by the water; designated in Hebrew by MSCHBEE, unction, and MSCHE, to save."

Water was the symbol of purity (according to Horapollo) and

¹In Aen., ii., 384; Ovid, "Metam.," via., 261; *Terque senem flamma, ter aqua, ter sulfure lustrat.*

designated the birth of the pure or initiates, as we shall show in the article *Dew*.

Under the article *Frog*, he says:

"Thus the profane is compared to primal matter, damp, and without form, over which the spirit has not yet moved, and which is born again from the waters of baptism."

Dew.

"The sign we give here is an abridgment of the scene representing Egyptian baptism, or shedding celestial dew on the head of the neophyte.

"Horus and Thoth-Lunus pour water on the head of the neophyte, which is transformed to divine life (ansated cross), and to purify (hoopoe-headed sceptre), and is thus translated: Horus, son of Isis, baptizes with water and fire (repeat four times).

"The baptism of water and fire, designated in the Zend by the characters that Leemans has explained, is identical in its exterior form with the baptism of water, the spirit, and of fire, in Luke iii. 16-17."

The name received by the baptized or anointed was given in the Bible to the chief of the Hebrews—*Moses*. This name exists on the Egyptian monuments; it is written by the sign of the *dew* or *baptism*, equal to Hebrew M, and the bent stalk, equal to Sheen, the group; in Hebrew SCH, M, or M-SCH-E is translated in Champollion's grammar by begotten; we give it the signification of regenerated or begotten again.

But why multiply examples from antiquity? Let it suffice that when Masonry adopted the symbolism of the ancients, how could the most important one be omitted?

Masonry is made up of symbolisms. The rite of consecration belongs to it, and by some form or other must take place; and we hold that every form whatever the "pious rite may bear," is "masonic," because that word expresses the original idea. The "genus," "York," "Scotch," "French," "modern," are the "species," or separate specific forms of ritualism; and we might go further, and class every "religion" that existed as specific forms of "masonry," for by that word we distinguish the true relation existing between the Creator and his creatures—that is, Masonry or Religion (*re-ligo*, to bind again).

CHAPTER III

SYMBOLISM OF NUMBERS

THE best way," says Lawrie in his preface, "of refuting the calumnies which have been brought against the fraternity of Freemasons is to lay before the public a correct and rational account of the nature, origin, and progress of the institution, that they may be enabled to determine whether or not its principles are, in any shape, connected with the principles of revolutionary anarchy, and whether or not the conduct of its members has ever been similar to the conduct of traitors." And from the publication of such sentiments it must be evident to every Brother's experience that the feeling against Freemasonry, which displayed itself so openly only a few years ago, has assumed a much milder form, if it be not entirely removed.

It will not, however, be difficult to account for the dearth of Masonic writers in a preceding age. Before the 18th century symbolical masonry, being limited to the simple ceremonial, needed few illustrations; because, as the science was chiefly operative, the most valuable secrets would be those which had a reference to building, to the scientific ornaments and decorations of each particular style of architecture as it flourished in its own exclusive period; and these mysteries were communicated gradually, as the candidate rose through the different stages of his order or profession.

There appears to have been one general principle, which extended itself over every style from the early English to the florid, decorated, and perpendicular, and constituted one of the most ineffable secrets of the Masonic lodges. It is now known to have been the hieroglyphical device styled *Vesica Piscis*; "which may be traced from the Church of St. John Lateran, and the old St. Peter's at Rome, to the Abbey Church at Bath, which is one of the latest Gothic buildings of any consequence in England. It was formed

by two equal circles cutting each other in the centers, and was held in high veneration, having been invariably adopted by Master Masons in all countries. In bas-reliefs, which are seen in the most ancient churches, over doorways, it usually circumscribes the figure of our Saviour. It was indeed a principle which pervaded every building dedicated to the Christian religion, and has been exclusively attributed to the scientific acquirements of Euclid."¹

Oliver, in *Pythagorean Triangle*, says: "The secret meetings of master masons, within any particular district, were confined to consultations with each other, which mainly tended to the communication of science, and of improvement in their art. An evident result was seen in the general uniformity of their designs in architecture, with respect both to plan and ornament, yet not without deviations. We may conclude that the craft or mystery of architects and operative masons was involved in secrecy, by which a knowledge of their practice was carefully excluded from the acquirement of all who were not enrolled in their fraternity. Still, it was absolutely necessary, that when they engaged in contracts with bishops or patrons of ecclesiastical buildings, a specification should be made of the component parts, and of the terms by which either contracting party should be rendered conversant with them. A certain nomenclature was then divulged by the master masons for such a purpose, and became in general acceptance in the middle ages."²

The abstruse calculations which accompanied the sciences of geometry and arithmetic are no longer necessary to Freemasonry as an institution purely speculative; and they were accordingly omitted in the revised system, as it was recommended to the notice of the Fraternity by the Grand Lodge in 1717, and we retain only the beautiful theory of these sciences, with their application to the practice of morality, founded on the power and goodness of T. G. A. O. T. U.

It would be an injustice to our Brethren of the last century to believe that they did not entertain a profound veneration for the principles of the Masonic order. But the customs and habits of the people of England, living in that day, differed materially from our own.

"There were times when conviviality and a love of social harmony prevailed over the more sedate pursuits and investigations of

¹ Kerrich in "Archæol.," vol. xvi., p. 292.

² Dallaway, "Archit.," p. 410.

science, in which such an astonishing progress distinguishes the present times. In the seventeenth and eighteenth centuries London was an atmosphere of clubs, and a society of this kind existed in every street for the peculiar use of its inhabitants, besides those which were exclusively frequented by persons possessing similar tastes or habits of amusement. And it will be no disparagement to masonry if we believe that its private Lodges did not sustain a much higher rank than some of these celebrated meetings, for the Kit-Cat, the Beefsteak, and other clubs were frequented by the nobility and most celebrated characters of that polished era.

"It was the organization of Freemasonry that gave it the distinctive character which elevated its pretensions above the common routine of club-life, and although it is admitted that the members of the latter entertained a strong attachment to their several institutions, yet none were so enthusiastic as those who had enlisted in the cause of masonry, as we may learn from the few testimonies which remain. A mason of high standing, more than a century ago, thus expresses his feelings respecting the order: 'Masonry is the daughter of heaven, and happy are those who embrace her. By it youth is passed over without agitation, the middle age without anxiety, and old age without remorse. Masonry teaches the way to content, a thing almost unknown to the greater part of mankind. In short, its ultimate resort is to enjoy in security the things that are, to reject all meddlers in state affairs or religion, or of a trifling nature; to embrace those of real moment and worthy tendency with fervency and zeal unfeigned, as sure of being unchangeable as ending in happiness. They are rich without riches, intrinsically possessing all desirable good, and have the less to wish for by enjoyment of what they have. Liberty, peace, and tranquillity are the only objects worthy of their diligence and trouble.'"¹

"But this, as well as almost all the testimonies of that period to its superior excellence, is confined exclusively to the practice and rewards of Christian morality.

"Modern revision has, however, extended the limits of scientific investigation in the order of Freemasonry beyond what was intended by those who decreed that 'the privileges of masonry should no longer be restricted to operative masons, but extend to men of

¹ "Pocket Companion," p. 296.

various professions, provided they were regularly approved and initiated into the order.' And Dr. Hemming and his associates, in the year 1814, thought it expedient to introduce some peculiar disquisitions from the system of Pythagoras on the combinations of the point, the line, the superficies, and the solid, to form rectangular, trilateral, quadrilateral, multilateral figures and the regular bodies, the latter of which, on account of their singularity and the mysterious nature usually ascribed to them, were formerly known by the name of the five Platonic bodies; and they were so highly regarded by the ancient Geometricians that Euclid is said to have composed his celebrated work on the Elements, chiefly for the purpose of displaying some of their most remarkable properties. These disquisitions usually conclude with an explanation of the forty-seventh problem of Euclid, which is called the Eureka of Pythagoras.

"That great philosopher, Pythagoras, who, by the superiority of his mind, infused a new spirit into the science and learning of Greece, and founded the Italic sect, taught his disciples Geometry that they might be able to deduce a reason for all their thoughts and actions, and to ascertain correctly the truth or falsehood of any proposition by the unerring process of mathematical demonstration. Thus being enabled to contemplate the reality of things and to detect imposture and deceit, they were pronounced to be on the road to perfect happiness. Such was the discipline and teaching of the Pythagorean Lodges. It is related that when Justin Martyr applied to a learned Pythagorean to be admitted as a candidate for the mysterious dogmata of his philosophy, he was asked whether, as a preliminary step, he had already studied the sciences of Arithmetic, Music, Astronomy, and Geometry, which were esteemed the four divisions of the mathematics; and he was told that it was impossible to understand the perfection of beatitude without them, because they alone are able to abstract the soul from sensibles, and to prepare it for intelligibles. He was further told that in the absence of these sciences no man is able to contemplate what is good. And because the candidate acknowledged his ignorance of them he was refused admission into the society.

"Above all other sciences or parts of the mathematics, however, the followers of Pythagoras esteemed the doctrine of Numbers, which they believe to have been revealed to man by the celestial deities. And they pronounced Arithmetic to be the most ancient

of all the sciences, because, being naturally first generated, it takes away the rest with itself, but it is not taken away with them. For instance, animal is first in nature before man; for by taking away animal we take away man; but by taking away man we do not take away animal. They considered numbers extending to the decad, to be the cause of the essence of all other things; and therefore esteemed the creation of the world as nothing more than the harmonious effect of a pure arrangement of number. This idea was adopted by Dryden:

'From harmony, from heavenly harmony,
This universal frame began;
From harmony to harmony,
Through all the compass of the notes it ran,
The diapason closing full in man.'

"Pythagoras had another idea, as we are informed by Censorinus, respecting the creation of the world, and taught that it was fashioned according to the principles of musical proportion; that the seven planets which govern the nativity of mortals have a harmonious motion, and intervals corresponding to musical diastemes, and render various sounds, according to their several distances, so perfectly consonant that they make the sweetest melody, but 'inaudible to us by reason of the greatness of the noise, which the narrow passage of our ears is incapable of receiving.'

"And further, he esteemed the monad to represent the great and good Creator, under the name of Dis, or Zeus, or Zau; and the duad he referred to as the evil and counteracting principle or daemon, 'surrounded,' as Plutarch expresses it, 'with a mass of matter.' And Porphyry adds, that the monad and duad of Pythagoras seem to have been the same with Plato's *peras* and *apeiron*, his *finite* and *infinite* in his *Philebus*; the former of which two only is substantial, that first most simple Being, the cause of unity and the measure of all things.

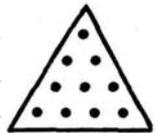

"According to the above doctrine, the monad was esteemed the father of Number, and the duad its mother; whence the universal prejudice in favour of odd numbers, the father being had in greater honour than the mother. Odd numbers being masculine, were considered perfect, and applicable to the celestial gods, while even numbers, being female, were considered imperfect, and given to the terrestrial and infernal deities. Virgil has recorded several instances

of this predilection in favour of odd numbers. In his eighth Eclogue, he says (thus translated by Dryden):

'Around his waxen image first I wind
 Three woollen fillets of three colours join'd;
 Thrice bind about his thrice-devoted head,
 Which round the sacred altar thrice is led.
 Unequal numbers please the gods.'

"The Eastern nations of the present day appear to reverse this principle. When two young persons are betrothed, the number of letters in each of their names is subtracted the one from the other, and if the remainder be an even number, it is considered a favourable omen, but if it be odd, the inference is that the marriage will be unfortunate.

"Every tyro knows that odd numbers are masonic; and if he be ignorant of the reason why 3, 5, 7, and 11, have been adopted as landmarks, let him apply to the Master of his Lodge for information, and he will then be satisfied of the wisdom of the appropriation, because number forms one of the pillars which contribute to the support of scientific masonry, and constitutes an elementary principle of Geometry. Thus, in the celebrated Pythagorean triangle, consisting of ten points, the upper single dot or jod is monad or unity, and represents a point, for Pythagoras considered a point to correspond in proportion to unity; a line to 2; a superficies to 3; a solid to 4; and he defined a point as a monad having position, and the beginning of all things; a line was thought to correspond with duality, because it was produced by the first motion from indivisible nature, and formed the junction of two points. A superficies was compared to the number three, because it is the first of all causes that are found in figures; for a circle, which is the principal of all round figures, comprises a triad, in' centre, space, circumference. But a triangle, which is the first of all rectilinear figures, is included in a ternary, and receives its form according to that number; and was considered by the Pythagoreans to be the author of all sub-lunary things. The four points at the base of the Pythagorean triangle correspond with a solid or cube, which combines the principles of length, breadth, and thickness, for no solid can have less than four extreme boundary points.

"Thus it appears that in applying number to physical things, the system of Pythagoras terminated in a tetrad, while that of Aristotle, by omitting the point, limited the doctrine of magnitude to a triad, *viz.*, line—surface—body. In divine things, however, the former philosopher profusely used the number three, because it represented the three principal attributes of the Deity. The first whereof, as we are informed by Cudworth, is infinite with fecundity; the second infinite knowledge and wisdom; and the last active and perceptive power. From which divine attributes the Pythagoreans and Platonists seem to have framed their trinity of archical hypotheses, such as have the nature of principles in the universe, and which, though they be apprehended as several distinct substances gradually subordinate to one another, yet they many times extend the to Theion so far as to comprehend them all within it.

"While employed in investigating the curious and unique properties which distinguish many of the digits, we no longer wonder that the inhabitants of the ancient world, in their ignorance of the mysterious secrets of science, and the abstruse doctrine of causes and effects, should have ascribed to the immediate interposition of the Deity those miraculous results which may be produced by an artful combination of particular numbers. Even philosophy was staggered; and the most refined theorists entertained singular fancies, which they were unable to solve without having recourse to supernatural agency. Hence the pseudo-science of Arithomancy, or divination by numbers, became very prevalent in the ancient world; and was used by Pythagoras as an actual emanation of the Deity. By this means, according to Tzetzes, he not only was able to foretell future events, but reduced the doctrine to a science, governed by specific rules, which he transmitted to posterity in his *Book of Prognostics*.

"The ancients had a kind of onomantic arithmetic, the invention of which was in like manner ascribed to Pythagoras, whether truly or not is of no importance here, in which the letters of the alphabet, the planets, the day of the week, and the twelve zodiacal signs, were assimilated with certain numbers; and thus, by the use of prescribed tables, constructed astrologically according to the aspects, qualities, dignities, and debilities of the planets relatively towards the twelve signs, etc., the adept would authoritatively pronounce an opinion on questions affecting life and death, good and evil fortune,

journeys, detection of theft, or the success of an enterprise. It must be confessed, however, that these predictions were not always correct; for the rules laid down in different systems varied so essentially that the wisest magician was frequently puzzled to select an appropriate interpretation. The numeral system has been introduced into the modern practice of astrology, and very important results appear to depend on the trine, quartile, and sextile aspect of the planets in the horoscope.

"Something of this sort was used by the Jewish cabalists; and hence one of the rules of their cabala was called gemetria, or numeration, which was chiefly confined to the interpretation of their sacred writings. The letters of the Hebrew language being numerals, and the whole Bible being composed of different combinations of those letters, it was supposed that the correct meaning of difficult passages could only be ascertained by resorting to their numerical value. The Talmudists entertained an opinion that the mystery of numbers was actually taught in their scriptures; because after the idolatrous priests of Baal had accepted the challenge of Elijah, that prophet constructed his altar of twelve stones, corresponding with the twelve tribes of Israel; but they say that when he took this number for the special purpose of conciliating the favor of Jehovah, it was not merely because the sons of Jacob were twelve in number, but because that particular number was supposed to contain a profound and unfathomable mystery.

"Divination by numbers was not confined to Jewish or heathen nations, but occupied much attention at different periods of Christianity; and superstitious properties, I am afraid, are still attached to particular numbers, as forming climacterics, or grand climacterics; for the days of a man's life are usually considered to be affected by the septenary year, which, as it is frequently believed, produces considerable changes in both body and mind. But the most remarkable change in a person's life is at the climacteric, or 7×7 , 49 years; or the grand climacteric, 7×9 , 63 years; or 9×9 , 81 years; each of which is conceived to be fraught with a peculiar fatality. And there are numbers of persons, even in the nineteenth century, who contemplate these periods with some degree of terror, and esteem it a relief when they have passed away.

"The exalted ideas which were entertained by the ancient poets and philosophers respecting the mysterious properties of numbers,

may be estimated from the superstitious uses to which they were made subservient in all countries, whether inhabitants were savages or refined. The former saw that the number of his fingers ended at ten; and this constituted the amount of his knowledge. It formed the standard of all his computations. When a savage, on his warpath, was asked the number of his enemies, if few, he would hold one or more of his fingers; if many, them all. And in whatever manner his ideas of units might be designated, the calculation would always end in ten. Thus, in Homer, Proteus counts his sea-calves by fives, or in other words by the number of fingers on his hand. Several nations in the wilds of America have to this day no other instruments of calculation. It is another strong presumption of the truth of what I now advance, that all civilized nations count by tens; tens of tens, or hundreds; tens of hundreds, or thousands; and so on, but always from ten to ten. We can discover no reason why this number should be chosen rather than any other for the term of numeration, except the primitive practice of counting by the fingers."¹

"Arithmetical operations," says the Abbé Pluche, "were facilitated and shortened first by the use of counters, and afterwards by figures or chalked letters. Thus the Romans, when they had a mind to express unity, either held up one finger or chalked the figure I. To express the succeeding numbers they drew II, III, IIII. For the number five they depressed the three middle fingers, and extended the thumb and little finger only, which formed the V. They signified ten by putting two V's, one upon the other, thus X, or by joining them together, which formed X. Then they combined the X, the V, and the I, till they came up to fifty, or five tens, which they expressed by laying the five upon its side thus, . The figure in this posture assumed the form of an L. A hundred was marked with two L's put one upon the other  which was subsequently rounded into a C. Five hundred was expressed by LC, and a thousand by . These figures were afterwards changed, the one into D, and the other into  or M. The Greeks and Hebrews employed the letters of the alphabet ranged in order, to express all imaginable numbers.

"Amongst these sages, the Monad represented the throne of

¹ Goguet, "Origin of Laws," vol. iv., p. 216.

the Omnipotent Deity, placed in the centre of the empyrean, to indicate T. G. A. O. T. U., by whom all things were made and preserved. This disposition was symbolised by the hierogram of a point within a circle or equilateral   triangle, to exemplify equally the unity of the divine essence, and His eternity, having neither beginning of years nor end of days. And this deduction appears perfectly reasonable, because the Monad or Point is the original and cause of the entire numeral system, as God is the cause of all things, being the only and great Creator on whom everything depends: for, if there were more all-powerful Beings than one, none would be independent, nor would all perfection be centred in one individual, 'neither formally by reason of their distinction, nor eminently and virtually, for then one should have power to produce the other, and that nature which is producible is not divine. But all acknowledge God to be absolutely and infinitely perfect, in whom all perfections imaginable, which are simply such, must be contained formally, and all others which imply any mixture of perfection, virtually.'"¹

Sthenidas the Locrian says, "The first god is conceived to be the father both of gods and men, because he is mild to everything which is in subjection to him, and never ceases to govern with providential regard. Nor is he alone satisfied with being the maker of all things, but he is the nourisher, the preceptor of everything beautiful, and the legislator to all things equally.

"The universal symbol by which this great Being was designated, *viz.*, the point within a circle, it may be necessary to explain with some degree of minuteness, because it constitutes one of the most important emblems of masonry. One of the earliest heathen philosophers of whom history gives any account was Hermes Trismegistus, and he describes the Maker of the universe as 'an intelligible sphere whose centre is everywhere, and whose circumference cannot be defined,' because the universe is boundless, and He existed from all eternity. David expressed a similar sentiment when he said, 'Thou art the same, and Thy years will have no end.' We are told that the Persians, when they wished to pay a high respect to the Deity, ascended to the top of a high mountain, and expanding both hands, they prayed to Him in the name of 'the circle of heaven.

¹ Pearson on the Creed, Art. I.

In like manner, the Jews entertained a belief that 'the heaven of heavens could not contain Him.' The Romans placed a circular target as a symbol of the Deity, because, as in the circumference there is but one point at its centre, and can be no more, so in the whole circumference of the universe there can be only one perfect and powerful God; nor is it possible there should be another.

"I have received a suggestion from a very intelligent brother respecting this symbol, which merits consideration. He says: When the W. M. elect enters into the obligation of an Installed Master, the brethren form a circle round him, he being in the centre; and in this situation he is said to be the representative of Solomon, the son of David. Now, as this is unquestionably a Christian degree, I understand this son David to be a figurative expression for the Redeemer of mankind. The W. M. is then specially intrusted with the Holy Scriptures and invested with a jewel which is emblematical thereof, and it then becomes his duty to exhort his brethren to search those Scriptures, because they contain the words of eternal life, and testify to the divinity of Christ. Searching implies something lost; and our ancient brethren, the early Christians, after they had lost, by an untimely death, their Lord and Master, remembered that while assembled together in Lodge here below, He promised, that when two or three were gathered together in His name, He would be in the midst of them; and cheered by the recollection, they were naturally led to hope that He would always be found in the centre of their circle, whenever regularly assembled together in a just and perfect Lodge dedicated to God and holy St. John. In like manner, we are reminded by that sacred symbol that He is always in the midst of us—that His all-seeing eye is always upon us, and therefore exhorted to discharge our duty towards Him and our fellow-creatures with freedom, fervency, and zeal.¹

"The Monad, amongst the Grecian philosophers, was a symbol of the hermaphrodite deity, or junction of the sexes, because it partakes of two natures. In a mysterious passage of the Yajur Veda, Brahma is spoken of, after his emanation from the golden egg, as experiencing fear at being alone in the universe; he therefore willed the existence of another, and instantly became masculo-

¹ This refers to the Ancient Method of installing a worshipful Master. (W.R.S.)

feminine. The two sexes thus existing in one god were immediately, by another act of volition, divided in twain, and became man and wife. This tradition seems to have found its way into Greece; for the Androgyne of Plato is but another version of this Oriental myth. If the Monad be added to an odd number, it makes it even, and if to an even number, it makes it odd. Hence it was called Jupiter, because it stands at the head of gods and men; and also Vesta or Fire, because like the point within a circle, it is seated in the midst of the world. It was also called the Throne of Jupiter, from the great power which the centre has in the universe being able to restrain its general circular motion, as if the custody of the Maker of all things were constituted therein.

"Plutarch tells us that Numa built a temple in an orbicular form for the preservation of the sacred fire; intending by the fashion of the edifice to shadow out, not so much the earth as the whole universe; in the centre of which the Pythagoreans placed Fire, which they called Vesta and Unity. The Persians worshipped the circumference, but it could only refer to the apparent course of the sun in the firmament, which is the boundary of common observation; for the real circumference is far beyond the comprehension of finite man. And the sun, under the symbol of a point within a circle, was the great object of worship amongst the Dionysian artists who built the Temple of Solomon.

"The Monad further signified Chaos, the father of life, substance, the cause of Truth, reason, and the receptacle of all things. Also in greater and lesser it signified equal; in intention and remission, middle; in multitude, mean; in time, now, the present, because it consists in one part of time which is always present.¹ The cabalists considered that the first eternal principle is magical, and like a hidden fire, is eternally known in its colours, in the figure, in the wisdom of God, as in a looking-glass. The magical centre of the first principle is fire, which is as a spirit, without palpable substance."

"The learned Aben Ezra, on the 11th chapter of Daniel, says that the number one is in a manner the cause of all numbers, and it is besides a complete number; it causes multiplication and remainder, but does not admit of either itself. And in another place he says,

¹ "Macrob. in somn.," l. i., s. 6.

THEODORE S. PARVIN

'Numbers are founded on the unit one.' The sage Latif observes the same. According to Euclid, in his second definition of the seventh book, numbers are formed of many units; but unity being indivisible, has no composition, nor is it a number, but the fountain and mother of all numbers. Being the cause of all numbers, they are formed by a plurality of units. Thus 2 is twice 1; 3 is three units, etc.; so that all numbers require the Monad, while it exists by itself without requiring any other. All which is to be considered of the first cause; for as one is no number, but the cause and beginning of number, so the First Cause has no affinity to creatures, but is the cause and beginning of them; they all stand in need of Him, and He requires assistance from none. He is all in all, and all are included in Him in the most simple unity. The Jewish Rabbins agree that He is One, and there is no unity like His in the universe; the nearest idea that we can form of Him is symbolized by the unit or figure one.¹

"The Pythagoreans say, 'the Monad is the principle of all things. From the Monad came the indeterminate duad, as matters subjected to the cause. Monad, from the Monad and indeterminate duad; Numbers, from numbers; Points, points; Lines, from lines; Superfices, from superficieses; Solids, from these solid Bodies, whose elements are four, Fire, Water, Air, Earth; of all which, transmuted, and totally changed, the World consists.'²

"But Freemasonry has a peculiar preference for the monad, which produces some very striking and remarkable coincidences in every nation under the sun. In an old ritual of the Fellow-Craft's degree, used about the middle of the last century, we find the following passage in reference equally to the first step of the winding staircase, the Point, and the letter G: 'God, the great Architect of the Universe, whom it is at all times our duty to worship and obey.' In a ritual still more ancient, the same meaning is rather differently expressed, *viz.*, 'the Grand Architect and Contriver of the Universe; or He that was taken up to the topmost pinnacle of the Holy Temple.'³

"This acknowledgment of the divine unity, or point within either a circle or a triangle, was common to all the systems of Spurious Freemasonry that ever existed, from India and Japan to the ex-

³ Oliver.

tremest West, including the Goths, the Celts, and the aborigines of America. All acknowledge the unity of T. G. A. O. T. U., whether involved in the deepest ignorance, or refined by civilization and a knowledge of philosophy and science. The sages of Greece, through a series of wire-drawn reasoning, came to the same conclusion as the uninformed savages of Britain, Scandinavia, Mexico, or Peru.¹

"Zoroaster is sublime in his description of the Deity; but he had enjoyed the advantage of associating with the learned Jews at Babylon, and from them, doubtless, he had acquired his knowledge. He taught that 'God is the first: incorruptible, eternal, unmade, indivisible, not like anything, the author of all good, the wisest of the wise, the father of justice, self-taught and absolutely perfect.' Anaximenes, the follower of Thaïes, like his master, was a bold and subtle reasoner, and called everything by its proper name. He denominated the one God Zeus, by which he intended to intimate that, like the air we breathe, He is infinite, omnipresent, and eternal. The Emperor Trajan, in a conversation with the Rabbi Joshua, hearing the latter say that 'God is everywhere present,' observed, 'I should like to see Him.' 'God's presence is indeed everywhere,' replied Joshua, 'but He cannot be seen; no mortal eye can behold His glory.' The Emperor insisted. 'Well,' said Joshua, 'suppose we try first to look at one of His ambassadors.' The Emperor consented. The Rabbi took him into the open at noonday, and bid him look at the sun in his meridian splendor. 'I cannot—the light dazzles me.' 'Thou art unable,' said Joshua, 'to endure the light of His creatures, and canst thou expect to behold the resplendent glory of the Creator? Would not such a sight annihilate you?'²

"Xenophanes, the principal leader of the Aleatic sect, entertained the same belief; and described that Great Being, whom they all admitted to be incomprehensible, as 'incorporeal, in substance, and figure globular; and in no respect similar to man. That He is all sight and hearing, but does not breathe. That He is all things; the mind and wisdom; not generate, but eternal, impassible, and immutable.' Parmenides held that 'the principle of all things is one; but that it is immovable.' Sophocles assures us that in his time, the belief in one God, who made heaven and earth, was prevalent among those who had been initiated into the Greater mysteries.

¹ Oliver.

² Goodhugh's "Lectures on Bibliographical Literature."

"Socrates and his pupil Plato maintained the same opinion. 'By the name of God,' said they, 'we mean the parent of the world; the builder of the soul; the maker of heaven and earth; whom it is difficult to know by reason of His incredible power; and if known, it is impossible to clothe our knowledge in words.' Anaxagoras contended for the supreme government of one God, but acknowledged that he was unable to comprehend his nature. His pupil, Euripides, however, was more fortunate, for he discovered the omnipresence of the Deity; and confessed it by asking whether it is possible to confine Him within the wall of a temple built with hands? Protagoras was banished by the Athenians for impiety in declaring that 'he knew nothing of the gods, because in so short a life it was impossible to acquire a knowledge of them.'

"Zeno taught the unity and eternity, of the Deity. Plutarch, learned in all the rites and doctrines of the Spurious Freemasonry of Egypt and Greece, expresses himself plainly on this point in his treatise of Isis and Osiris. Aristides believed and taught his disciples that 'Jove made all existing things, in the earth, the heavens, or the sea.' "

Thus was the doctrine of the Monad or unity, the first point in the *Pythagorean Triangle*, carried out in these early ages, and among an idolatrous people; for however they might worship an indefinite number of intelligences, they had discrimination enough to perceive that there could be only one Being of unbounded power, because a duplication of such beings would circumscribe the potency of each individual, and destroy his omnipotence and immutability. "It was idle," says Bryant, "in the ancients to make a disquisition about the identity of any god, as compared with another; and to adjudge him to Jupiter rather than to Mars, to Venus rather than Diana. According to Diodorus, some think that Osiris is Serapis; others that he is Dionysus; others still, that he is Pluto; many take him for Zeus or Jupiter, and not a few for Pan."

"The twofold reason of diversity and inequality, and of everything that is divisible in mutation, and exists sometimes one way, sometimes another, the Pythagoreans called Duad, for the nature of the Duad in particular things is such. These reasons were not confined to the Italic sect, but other philosophers also have left certain unitive powers which comprise all things in the universe; and amongst them there are certain reasons of quality, dissimilitude,

and diversity. Now these reasons, that the way of teaching might be more perspicuous, they called by the names of Monad and Duad; but it is all one amongst them if they be called biform, or equaliform, or diversiform."¹

"From such definitions and principles it will not be difficult to see that the Duad was sufficiently comprehensive to admit of a vast number of references; and therefore the prolific fancy of poets and philosophers assigned to it a variety of remarkable qualities. Being even it was esteemed an unlucky number, and dedicated to the malignant genii and the infernal deities, because it conveyed to the mind ideas of darkness, delusion, versatility, and unsteady conduct."² For this reason, the Pythagoreans spoke of two kinds of pleasure, "whereof that which indulgeth to the belly and to lasciviousness, by profusion of wealth, they compared to the murderous songs of the Syrens; the other, which consists in things honest and just, comprising all the necessary indulgences of life, is quite as attractive as the former, and does not bring repentance in its train."³ The Duad was considered indefinite and indeterminate, because no perfect figure can be made from two points only, which, if united, would merely become a right line; whence a notion was originated that it is defective in its principles, and superfluous in its application to the sciences. It signified also misfortune, from a general belief in its unpropitious qualities; and discord, because in music that which renders dissonances grating, is, that the sounds which form them, instead of uniting to produce harmony, are heard each by itself as two distinct sounds, though produced at one and the same time. Brand tells us⁴ that there is a little history extant of the unfortunate reigns of William II., Henry II., Edward II., Richard II., Charles II., and James II., entitled "Numerus Infaustus"; in the preface to which the author says, "Such of the kings of England as were the Second of any name, proved very unfortunate princes."

"The number two was referred to Juno, because she was the sister and wife of Jove;⁵ and hence the Duad became a symbol of marriage. On this subject Hierocles says two things are necessary to all men in order to pass through life in a becoming manner, *viz.*, the aid of kindred, and sympathetic benevolence. But we cannot

³ *Ibid.*, p. 25.

⁴ "Pop. Ant.," vol. iii., p. 145. ⁵ Mart. Capel., "Eulog. in somn. Scrip."

find anything more sympathetic than a wife, nor anything more kindred than children, both of which are afforded by marriage. And to produce these two beneficial effects, Callicratides gives the following excellent advice: 'Wedlock should be coadapted to the peculiar tone of the soul, so that the husband and wife may not only accord with each other in prosperous, but also in adverse, fortune. It is requisite, therefore, that the husband should be the regulator, master, and preceptor of his wife. The regulator, indeed, in paying diligent attention to her affairs; but the master, in governing and exercising authority over her; and the preceptor in teaching her such things as are fit for her to know.'

"But how unfortunate soever the Duad may have been esteemed as a general principle, it was not devoid of its share of beneficent properties to balance against those that were malignant or forbidding. 'The two principles,' said the *Paracelsic Lectures of Continental Masonry*, 'are not always at strife, but sometimes in league with each other, to produce good. Thus death and anguish are the cause of Fire, but fire is the cause of Life. To the abyss it gives sting and fierceness, else there would be no mobility. To the Light—world, essence, else there would be no production but an eternal Arcanum. To the world it gives both essence and springing, whence it becomes the cause of all things.' The Duad was defined by the Pythagoreans, 'the only principle of purity; yet not even, nor evenly even, nor unevenly even, nor evenly uneven.' It was an emblem of fortitude and courage, and taught that as a man ought to do no wrong, neither ought he to suffer any, without due sense and modest resentment of it; and therefore, according to Plutarch, the 'Ephori laid a mulct upon Sciraphidas, because he tamely submitted to many injuries and affronts, concluding him perfectly insensible to his own interest, as he did not boldly and honestly vindicate his reputation from the wrongs and aspersion which had been cast upon it; under the impression that he would be equally dull and listless in the defence of his country, if it should be attacked by a hostile invader.'

"The Duad was elevated by the ancient philosophers of the Italic sect into a symbol of Justice, because of its two equal parts. Hence Archytas, who was a follower of Pythagoras, says, 'The manners and pursuits of the citizens should be deeply tinged with justice; for this will cause them to be sufficient to themselves,

and will be the means of distributing to each of them that which is due to him according to his desert. For thus also the sun, moving in a circle through the zodiac, distributes to everything on the earth, generation, nutriment, and an appropriate portion of life: administering, as if it were a just and equitable legislation, the excellent temperature of the seasons.¹

"It signified also science, because the demonstration of an unknown number or fact is produced from syllogistic reasonings on some other number or fact which is known; and this is deducible by the aid of science. It was further considered as a symbol of the soul, which is said to be divided into two parts, the rational and the irrational; the latter being subdivided into the irascible and the appetitive. The rational part enables us to arrive at the truth by contemplation and judgment; while the irrational uniformly impels the soul to evil. And it signifies Opinion, which must be either true or false; and Harmony, whence the ancients introduced music at their banquets along with wine; that by its harmonious order and soothing effect it might prove an antidote to the latter, which being drank intemperately, renders both mind and body imbecile."

"The Pythagorean philosophy," says Reuchlin,² "taught that the Monad and Duad were a symbol of the principles of the universe; for when we make inquiry into the causes and origin of all things what sooner occurs than one or two? That which we first behold with our eyes is the same, and not another; that which we first conceive in our mind is Identity and Alterity—one and two. Alcmaeon affirmed two to be many, which, he said, were contraries, yet unconfined and indefinite, as white and black, sweet and bitter, good and evil, great and small. These multiplicitous diversities the Pythagoreans designed by the number Ten, as proceeding from the Duad; *viz.*, finite and infinite, even and odd, one and many, right and left, male and female, steadfast and moved, straight and crooked, light and darkness, square and oblong. These pairs are two, and therefore contrary; they are reduced all into ten, that being the most perfect number, as containing more kinds of numeration than the rest; even, odd; square, cube; long, plain; the first uncompounded, and first compounded, than which nothing is more ab-

¹ "Fragments" of Archytas, p. 16.

² "A. Cabal.," I., ii., p. 2.

solute, since in ten proportions four cubic numbers are consummated, of which all things consist."

"Categories, reducible in two, Substance and Accident, both springing from one essence; for ten so loves two, that from one it proceeds to two, and by it reverts into one. The first Ternary is of one and two, not compounded but consistent; one having no position, makes no composition; an unit, whilst an unit, hath no position, nor a point whilst a point. There being nothing before one, we rightly say, one is first; two is not compounded of numbers, but a co-ordination of units only. It is therefore the first number, being the first multitude; not commensurable by any number, but by a unit, the common measure of all number; for one, two, is nothing but two; so that the multitude which is called Triad, arithmeticians term the first number uncompounded, the Duad being not an uncompounded number, but rather not compounded."¹

"The Chinese philosophers entertained similar fancies about the color of blue, which is formed by a mixture of red and black. This color, they say, 'being the color of heaven, represents the active and passive principle reunited in one; the male and female, the obscure and brilliant. All corporeal beings are produced by inapprehensible nature, emanating from blue, which forms the origin of all subtile natures.' In the science of astrology, which was very prevalent half a century ago, the signs were invested with significant colors. Thus it was said that Taurus was designated by white mixed with citron; Aries and Gemini, by white and red; Cancer, green and russet; Leo, red and green; Virgo, black speckled with blue; Libra, black or dark crimson; Scorpio, brown; Sagittarius, yellow or green; Capricorn, black or russet; Aquarius, a sky color or blue; and Pisces by a brilliant white."

"Nor were the Jews destitute of a respect for the number two; which was indeed inculcated in the Mosaical writings. Thus while the clean beasts were admitted into the ark of Noah by sevens, the unclean ones were allowed to enter by pairs. The angels that were deputed to destroy Sodom were two; Lot had two daughters; the sons of Isaac and the daughters of Laban were each two in number, as were also the sons of Joseph. Moses was directed to make two

¹ Colebrook, "Philosophy of the Hindus," p. 21.

cherubim; the Onyx-stones of remembrance on the high-priest's shoulders were two, to symbolize the Sun and Moon, as Josephus says; but Beda thinks they were emblematical of the faith and practice of the patriarchs and prophets, while others suppose, with greater probability, that the high-priest bore them on his shoulders to prefigure the manner in which Christ was to bear the sins of His people. The Jewish offerings were frequently directed to be by pairs; as two lambs, two pigeons, two turtles, two kids, etc. The waive loaves were two; and the shewbread was placed on the table in two rows; the silver trumpets to direct the march of the Israelites in the wilderness were the same number."

"Again, Joshua erected two monuments on passing the river Jordan, one in the bed of the river, and the other on its banks; the temples of Solomon and of Gaza were each supported on two pillars; Jeroboam made two golden calves, and set them up at Dan and Bethel; there were two witnesses against Naboth, as the Mosaic law required in cases affecting human life; and two bears were sent to vindicate the character of Elisha. In the case of Naaman the Syrian, we find the use of this number fully exemplified in the two mules' burden of earth—two young men of the sons of the prophets—two talents—two changes of garments—two servants, etc. In the visions of Daniel the ram had two horns; and in Zachariah we have two olive-trees, two anointed ones, and two staves called Beauty and Bands, an emblem of brotherhood. Similar coincidences might be found in the Gospels, but the detail would be tedious, and the result without utility, as far as regards Freemasonry."¹

"In our system, the principle of the duad is plainly enunciated (although two is not esteemed a masonic number) in the two Pillars of the porch of Solomon's Temple, which were placed in that situation by the wise and judicious monarch, to commemorate the remarkable pillar of a cloud and of fire; the former of which proved a light and guide to the Israelites in their escape from their Egyptian oppression; the other represents the cloud which proved the destruction of Pharaoh and his host in their attempt to follow them through the depths of the Red Sea. Our noble and illustrious Grand Master placed them in this conspicuous situation, that

¹ Oliver.

the Jews might have that memorable event in their recollection, both in going in and coming out from divine worship."

In the spurious Freemasonry of some ancient nations, this principle of duality was extended to support the doctrine of a good and evil power, who possessed almost equal government in this lower world; and the prosperity or decadence of a nation was supposed to be produced by the superiority of one or other of these beings, which, however, was esteemed, in most cases, accidental. In Persia the doctrine attained its climax. Oromases was Light, and Ahri-man, Darkness.

Hyde says, "The Magi did not look upon the two principles as co-eternal, but believed that light was eternal, and that darkness was produced in time;¹ and the origin of this evil principle they account for in this manner: Light can produce nothing but light, and can never be the origin of evil; how then was evil produced? Light, they say, produced several beings, all of them spiritual, luminous, and powerful; but their chief, whose name was Ahriman, had an evil thought contrary to the light. He doubted, and by that doubting he became dark. From hence proceeded all evils, dissension, malice, and everything also of a contrary nature to the light. These two principles made war upon one another, till at last peace was concluded, upon condition that the lower world should be in subjection to Ahriman for seven thousand years; after which space of time, he is to surrender back the world to the Light."²

In countries where the two principles were represented by two serpents, the solstitial colures were described under these symbols. Thus in the Egyptian hieroglyphics, two serpents intersecting each other at right angles, upon a globe, denoted the earth. These rectangular intersections were at the solstitial points.³ The Teutonic Masonry of the last century thus explained the two principles of Light and Darkness: "From the eternal centre is made the eternal substantiality as a body or weakness, being a sinking down, and the spirit is a springing up, whence comes motion, penetration, and multiplication; and when the spirit created the substantiality into an image, breathing the spirit of the Trinity into it, the whole essences, even all forms of nature, the power of Light and Dark-

¹ Darkness is the *absence* of light, cold is the *absence* of heat.—EDITOR.

² Hyde, "Rel. Ant. Pers.," c. ix., p. 163.

³ Jablonski, "Panth. Eg.," I, i., c. 4, cited by Deane, p. 73.

ness, and the whole eternity, it instantly blossomed and became the paradise or angelical world. In the Darkness is the genetrix, in the Light is the wisdom: the first imaged by devils, the other by angels, as a similitude of the whole eternal being, to speak as a creature. And Lucifer, imaging beyond the meekness of the Trinity, kindled in himself the matrix of Fire, and that of nature becoming corporeal, then was the second form of the matrix, *viz.*, the meekness of the substantiality enkindled, whence water originated, out of which was made an heaven to captivate the fire, and of that Fire and Water came the Stars."

CHAPTER IV

LEGENDS AND SYMBOLS IN THE SEVERAL DEGREES OF MASONRY

MOST Masonic writers of recent date have assumed that Speculative Masonry was founded upon the legends and symbols of antiquity. Dr. A. G. Mackey, in the preface to his valuable work on *Symbolism of Freemasonry*, says: "Of the various modes of communicating instruction to the uninformed, the Masonic student is particularly interested in two; namely, the instruction by legends, and that by symbols. It is to these two, almost exclusively, that he is indebted for all that he knows, and for all that he can know, of the philosophic system which is taught in the institution. All its mysteries and its dogmas, which constitute its philosophy, are intrusted, for communication, to the neophyte, sometimes to one, sometimes to the other of these two methods of instruction, and sometimes to both of them combined. The Freemason has no way of reaching any of the esoteric teachings of the Order except through the medium of a legend or a symbol."

It is greatly to be regretted that the most important legends of Masonry are so communicated and represented, when the degrees are conferred, as to impress upon the minds of the candidates the realisms, rather than the "allegories," which were originally designed as "veils" to conceal the "moral principles" of the system, and which are also "illustrated by symbols."

Legends have no documentary evidence of the truthfulness of the narrative or any authenticity. Such are the legends in the Masonic degrees. There is no authenticity whatever for the statements or representations. In fact, strict adherence to authentic history as contained in the "Great Light" of Masonry itself, contradicts the details of all the Masonic legends; hence we arrive at the truthfulness of the allegorical system, which was originally designed to teach the morality contained in the Institution.

The first three degrees of Freemasonry are in themselves allegorical, representing certain important principles in their enumeration. First, the introduction into Masonic Life and Light. Secondly, the progress during life in instruction—the life-work—education in all branches of useful knowledge. Thirdly, the decadence, death, and final disposition of the body, its resurrection, and the immortality of the soul.

In each of these degrees symbolisms are introduced, teaching important truths, which are calculated to impress upon the mind the value of the great moral principles thus visibly represented. Step by step, as the candidate advances in each degree, he learns the value of the gradation in moral lessons, by which his future life is to be guided. All of these are primarily referable to his first declaration of "Faith in God," "Hope in Immortality," and "Charity or Love to all Mankind."

In these we recognize the several "duties" incumbent upon all men, which were inculcated in every system of morality taught by the ancient patriarchs and philosophers—our duty to God, our duty to ourselves, and our duty to all men. In these are found the realisms of Masonry, and not in our legends and allegories, by which they are veiled and concealed.

Of what value to us, at the present day, are the representations of the manner in which the Craftsmen and Apprentices were distributed when the Temple of Solomon was under construction? Or when and how they received their wages? Every step, from the first admission of a candidate to the ante-room of a regularly constituted lodge, until he has become an obligated Mason, has its moral lesson. His preparation, admission, and subsequent progress is marked by a lesson, which it is intended shall be carefully studied by the candidate for his future guidance in life. The following sections of that degree are lessons, explanatory and instructive, in the art of Masonry. The first section of the second and third degrees are similar to that of the first; and the following sections are strictly instructive and allegorical. The instructions in all three of these degrees is by symbols and emblematical representations. The science of symbolism is perhaps as old as any other science—the learning of the ancient world was originally conveyed by symbolism. At the present day philosophy treats only on abstract propositions. Freemasonry, however, retaining its traditions, continues the ancient

method as the best means of imparting its moral lessons—by symbols—which word, derived from the Greek, means to compare one thing by another. This method of instruction, or "object teaching," is employed in schools at the present day. It is the language of poetry. The "legend" is a spoken symbol and is employed in Masonic teaching, in some countries is an acted drama, in others it is merely recited or read; in both, it is designed to convey to the mind important moral truths. It is the province of the initiated candidate to investigate these symbols and allegories to draw out from them the philosophies and moral lesson concealed by them. It has been well said that "Freemasonry is the Science of Morality, veiled in Allegory, and illustrated by Symbols." We personally do not claim for Freemasonry the title of a science, but we do insist that it comprehends all true philosophy. Its fundamental principle is a belief in God, without which there can be neither morality or philosophy. The second principle taught in Masonry is the immortality of the soul; and the third principle is the resurrection of the body. These constitute the philosophy of Freemasonry. It is upon these principles that ail the ancient religions were founded. In the belief of all the ancients in a Deity, we find a multiplicity of gods; yet, in all of them, there was a chief god, who was so far above all the others as to constitute a distinct Deity. Most of these ancient religions contemplated a Triune God.

"The rites of that science which is now received under the appellation of Freemasonry, were exercised in the Antediluvian World; revived by Noah after the flood; practised by mankind at the building of Babel, conveniences for which were undoubtedly contrived in the interior of that celebrated edifice; and at the dispersion spread with every settlement, already deteriorated by the gradual innovations of the Cabiric Priests and modelled into a form, the great outlines of which are distinctly to be traced in the mysteries of every heathen Nation, exhibiting the shattered remains of one true system whence they were all derived.

"The rites of idolatry were indeed strikingly similar and generally deduced from parallel practices, previously used by the true Masons; for idolatry was an imitative system, and all its ceremonies and doctrines were founded on the general principles of the patriarchal religion. If the patriarch united in his own person the three offices of king, priest, and prophet, the secret assemblies of

idolatry were also governed by a Triad, consisting of three supreme offices; if primitive Masonry was a system of Light, the initiated heathen equally paid divine honors to the Sun, as the source of light, by circumambulating *in the course of that luminary*, during the ceremony of initiation."¹

Sammes, in his *Britannia*,² says: "The Mysteries of the Cabiric rites were accounted so sacred and powerful that whosoever was initiated in them, immediately secured, as they thought, some extraordinary gifts of holiness, and that in all their dangers they had a present remedy and expedient about them to deliver and rescue them; but that which most affected the Phoenicians was a confidence they had that those religious ceremonies preserved them from dangers by sea; therefore it is no wonder that, arriving in Britain, they taught the inhabitants that worship to which they held themselves most obliged for their safety."

In the above extract from Oliver reference is made to the rite of *circumambulation*. Every Mason will recognize that rite as an essential one in every degree of Masonry, both ancient and those degrees invented since 1717. Pythagoras required his initiates to pass *three* years in silence and darkness before admission to the mysteries. In all the ancient rites of the Orient the candidate was conducted by devious ways over many rough and rugged paths, and encountered various obstacles, and had to pass through the cold air, and water, the fire, and at last the earth, which four elements were symbols of purification, and lustrations by these were requisite before the postulant could receive the higher mysteries and become an *epopt*.

"The uniformity of practice which attended the progress of error in different nations is truly astonishing. They equally used the Ambrosia? Petræ as vehicles of regeneration; they shrouded their rites under the impenetrable mask of secrecy; they possessed the same mode of instruction by symbols, allegory, and fable; the same repugnance to committing their abstruse secrets to writing; the same system of morality; the same attachment to amulets, telesmans, and perhaps Magic; and equally inculcated the immortality of the soul, and a future state of rewards and punishments, which were alike pantomimically exhibited during the initiations."³

¹ Oliver's "Signs and Symbols," pp. 4, 5.

² *Ibid.*, p. 55.

³ *Ibid.*, p. 5.

"The old Asiatic style, so highly figurative, seems, by what we find of its remains in the prophetic language of the sacred writers, to have been evidently fashioned to the mode of the ancient hieroglyphics; for, as in hieroglyphic writing, the sun, moon, and stars were used to represent States and empires, kings, queens, and nobility, their eclipse and extinction, temporary disasters, or entire overthrow, fire and flood, desolation by war and famine, plants or animals, the qualities of particular persons, etc.; so, in like manner, the holy prophets call kings and empires by the names of the heavenly luminaries; their misfortunes and overthrow are represented by eclipses and extinction; stars falling from the firmament are employed to denote the destruction of the nobility; thunder and tempestuous winds, hostile invasions; lions, bears, leopards, goats, or high trees, leaders of armies, conquerors, and founders of empires; royal dignity is described by purple or a crown; iniquity by spotted garments; error and misery by an intoxicating draught; a warrior by a sword or bow; a powerful man by a gigantic stature; and a judge by balance, weights, and measures. In a word the prophetic style seems to be a speaking hieroglyphic."¹

Pythagoras expressed his mystical system by symbols which were explained to the initiated and were not comprehended by the rest of the world. His secrets were forbidden to be committed to writing and were communicated orally as ineffable mysteries. The Pythagoreans conversed with each other mostly by the sign language; instruction by symbols was found useful in impressing on the mind the most comprehensive truths, and it is said was adopted from Masonry into all the mystic associations: "The most ancient and such as were contemporary with, and disciples of Pythagoras, did not compose their writings intelligibly, in a common vulgar style, familiar to every one, as if they endeavored to dictate things readily perceptible by the hearer, but consonant to the silence decreed by Pythagoras, concerning divine mysteries, which it is not lawful to speak of before those who were not initiated; and therefore clouded both their mutual discourses and writings by symbols; which, if not expounded by those that proposed them, by a regular interpretation appear to the hearers like old wives' proverbs, trivial and foolish; but, being rightly explained, and instead

¹ Warburton's "Divine Legation," B. IV., s. iv.

of dark rendered lucid and conspicuous to the vulgar, they discovered an admirable sense, no less than the divine oracles of Pythian Apollo; and give a divine inspiration to the Philologists that understand them."¹

The Druids used hieroglyphics which, with much reluctance, were communicated even to their initiates themselves. These symbols were imitated from natural objects. Of a man of enlarged mind it was said, "*he is an oak*;" an irresolute and wavering person was an "*Aspen-leaf*;" one who was deceitful was a "*Reed*."² The Druids used geometrical figures as lines, angles, squares, and perpendiculars as symbols. They did not use enclosed temples, as being thought by them inconsistent with the dignity and majesty of the gods; they did not employ carved images to represent deities, but employed the rude undressed stones, such as they found in the hills or on sides of mountains, which were erected in their circles for worship, which were marked out by rude stone pillars surrounding an altar placed in the centre. They also constructed of similar stones long passages between two rows of such stones. Some of these passages were miles in extent.

In Egypt, in all probability, originated those passages, where we find the remains of them as sphinxes, obelisks, and catacombs, all of which no doubt were erected for the observance of their mystic rites. Clement of Alexandria says: "Sphynxes were erected in front of temples and places of initiation, to denote that all sacred truth is enfolded in enigmatical fables and allegories."³

In the Egyptian mysteries the candidate was instructed in this as an ineffable secret, that the mysteries were received from Adam, Seth, Enoch; and in the last degree the postulant, after the completion of his initiation, was called, from the name of the Deity, AL-OM-JAH; pronounced Allhawmiyah. In India, the completed initiate was instructed in the great word, A. U. M., pronounced OME (o long); we thus see that the same word was used in Egypt as the second word. It has been supposed by some that these were initials of three certain names of Deity, viz.: Agni, Fire; Ushas, Dawn; and Mitra, Mid-day Sun, all of them referring to "Light" in its different degrees of intensity. In the higher degrees in Freemasonry these letters appear, having a deep significance, which we

¹ Stanley's "Life of Pythagoras," B. IV., ch. i.

² Davis, "Celt. Res.," p. 247.

³ Clement of Alexandria, Lib. V., ch. iv.

are not at liberty here to say more of. We may here quote from Dr. Oliver: "It is an extraordinary fact that there is scarcely a single ceremony in Freemasonry but we find its corresponding rite in one or other of the idolatrous mysteries; and the coincidence can only be accounted for by supposing that these mysteries were derived from Masonry. Yet, however they might assimilate in ceremonial observances, an essential difference existed in the fundamental principles of the respective institutions. The primitive veneration for *Light* accompanied the career of Masonry from the creation to the present day, and will attend its course until time expires in eternity; but in the mysteries of idolatry this veneration soon yielded its empire over men's minds, and fell before the claims of darkness; for a false worship would naturally be productive of impure feelings and vicious propensities." It is true, indeed, that the first Egyptians worshipped ON (A. U. N. in Hebrew, but pronounced Own) as the chief deity, who was supposed to be the eternal Light; and hence he was referred to the Sun as its great source and emanation. Thus it was said that *God* dwelt in the Light, his *Virtue* in the Sun, and his *Wisdom* in the Moon. But this worship was soon debased by superstitious practices. The idolaters degenerated into an adoration of Serpents and Scorpions, and other representatives of the evil spirit; and, amidst the same *profession* of a profound reverence for Light, became most unaccountably enamoured of Darkness; and a Temple near Memphis was dedicated to *Hecate Scotia*,¹ which was styled the Lord of the Creation, and in some respects deemed oracular. The superstition of Egypt which gave divine honors to Darkness spread throughout the world of idolatry, upon the principle that Darkness of Night, which existed in Chaos before the Creation of Light, was of superior antiquity. They therefore gave precedence to Night; and hence to signify the revolving of the earth they said a night and a day. Even the Jews began their time with the evening or commencement of darkness, as in Genesis i. 2, 3. Moses said God created Light out of Darkness. (1 Kings viii. 12, 2; Chron. vi. 1; Psalms xviii. 9.) Darkness was considered the incomprehensible Veil of Deity.

In the Orphic Fragments Night is celebrated as the parent of

¹ "Diod. Sic," B. I., ch. vii.

gods and men and the origin of all things. In all the rites of initiation Darkness was saluted with three distinct acclamations; hence we may see that before the Aspirant could participate in the "higher mysteries" he was placed in a coffin, bed or *pastos*, or was subjected to confinement for a period of time, in seclusion and *darkness* for reflection, which custom is still employed in some secret societies. This was a representation of the symbolic death of the mysteries; when he was released from that ceremony, it was to indicate his deliverance, and represented the act of regeneration or being born again, or *being raised from the dead*.

We learn from Clement of Alexandria that in the formulary of one who had been initiated he was taught to say, "I have descended into the bed-chamber." Dr. Oliver says: "The ceremony here alluded to was, doubtless, the same as the descent into Hades; and I am inclined to think that when the Aspirant entered into the Mystic Cell, *he was directed to lay himself down -upon the bed, which shadowed out the tomb or coffin of the Great Father*. This process was equivalent to his entering into the infernal ship; and while stretched upon the holy couch, *in imitation of his figurative deceased prototype*, he was said to be wrapped in the deep sleep of death. *His resurrection from the bed was his restoration to life*, or his regeneration into a new world; and it was virtually the same as his return from Hades, or his emergence from the gloomy cavern, or his liberation from the womb of the ship-goddess."¹

The time required for this ceremony or imitation of death was generally for the space of three days and nights; but was varied in different localities. *Nine* days in Great Britain were required for the solitary confinement. In Greece three times nine days. In Persia it extended to fifty days and nights of darkness, want of rest and fasting. The remains in Great Britain of the places where the ceremonies were observed by the Ancient Druids are very numerous and well known at the present day, and have been referred to in a former part of this sketch. Among these are the remains of the celebrated Kit's Cotti House, near Maidstone. "This was a dark chamber of probation, for Kit is no other than Ked, or Ceridwen, the British Ceres; and Cotti or Cetti meant an Ark or Chest; and hence the compound word referred to the Ark of the diluvian god

¹ Fab. Pag. Idol in Oliver's "Signs and Symbols," p. 79.

Noah, whose mysterious Rites were celebrated in Britain; and Ceridwen was either the consort of Noah, or the Ark itself symbolically the great Mother of Mankind. The peculiar names which these monuments still retain throughout the kingdom, are a decisive proof that they were appropriated, almost exclusively, to this purpose."¹

Near a village in Somersetshire called Stanton Drew, or *Druid Stones*, there are the evidences of a rude structure which originally consisted of three circles of stones and an Adytune or a Pastos. There were various other similar structures in different parts of Britain, evidences of the prevalence of these ceremonies, religious in their character.

The initiation into the mysteries was a most important part of the religious worship; and all those who held any important place as priest or legislator, must pass through all their religious ceremonies, as indispensable preliminaries to their advancement, by *the solitary confinement in the darkened Pastos*. "The religionists of those days considered initiation as necessary as the Christians do baptism."²

We have referred, in a former page, to the several steps in the progress of initiation in the mysteries of the several degrees in Freemasonry, and that all of these were symbols by which the various principles sought to be inculcated were thus illustrated. Each individual item was emphasized as the candidate progressed; when he was prepared in the ante-room, *viz.*, his raiment, which should always be pure white, to represent that he was a *candidate*, from the Latin *candidus*, which means *white*. The peculiar arrangement of this raiment, in each degree, is explained in the lecture appertaining to each, as also the Zennaar³ which accompanies the raiment of each degree, which is in Freemasonry denominated a Cable-tow. The different degrees require a different disposal of this cable-tow; in each there is a distinct symbolism, known only to the initiated. The candidate thus prepared is in darkness as to what he is to encounter, ignorant of what will be revealed to him in his progress in

¹ Oliver, "Signs and Symbols," p. 80.

² Warburton, "Divine Legation," B. II., s. iv.

³ The Zennaar in Hindustan was a cord composed of nine threads twisted into a knot at the end, and hanging from the left shoulder to the right hip. The Masonic scarf takes the place of the Zennaar.

the various steps of his initiation; he is to be regenerated, *born again* into a new world of mysteries; as he was originally born into the world of physical light, so now he is to be born again into the moral and intellectual Light of Freemasonry. The following preliminary steps are purely ritualistic, and each Mason who has passed through them can for himself apply the symbols to their appropriate significations. It would be well for us just here to call to mind what has been said by others on this method of instruction in the Church. In the Explanation of the Symbolism of the *Mass*, Bishop England said that in every ceremony we must look for three meanings. "The first, the literal, natural, and it may be said, the original meaning; the second, the figurative or emblematic signification; and thirdly, the pious or religious meaning; frequently the last two will be found the same; sometimes all three will be found combined." Bro. A. G. Mackey, in quoting the above extract from the "Churchman," makes the following just comment: "The Roman Catholic Church is, perhaps, the only contemporaneous institution which continues to cultivate, in any degree, the beautiful system of symbolism. But that which, in the Catholic Church, is, in a great measure, incidental, and the fruit of development, is, in Freemasonry, the very life-blood and soul of the institution, born with it at its birth, or rather, the germ from which the tree has sprung, and still giving it support, nourishment, and even existence. Withdraw from Freemasonry its symbolism, and you take from the body its soul, leaving behind nothing but a lifeless mass of effete matter, fitted only for a rapid decay."¹

The candidate, after his admission to the lodge-room, follows the ancient custom of all the mysteries in a perambulation, which is a symbol of the Sun in his annual course through the twelve signs of the Zodiac, as also his diurnal course from east to west by way of the south. The candidates in the mysteries were said to "imitate the Sun and follow his beneficent example." This symbolism referred to the custom of Pythagoras, who required his candidates to pass *three* years in silence and in darkness. The various obstructions met with in this "circumambulation" were in imitation of those encountered in the Ancient Mysteries, but of quite a different character, as in the Ancient Mysteries these obstructions were

¹ Mackey, "Symbolism of Freemasonry," p. 74.

to severely test the courage and persistence of the candidate, and often resulted in the death of the individual; and in some of their underground passages which have been explored in modern times, evidences have been discovered that many persons thus lost their lives.

After the most solemn and impressive ceremonies, whereby the postulant becomes a Mason, he is brought to Light in Masonry by a symbolism, faint indeed, but highly significant of a great event in the history of creation. All that follows is instruction in the science and morals of Masonry. Each degree in Masonry is divided into "Sections"—the first section is always the Rite of Initiation. The other sections are for the instruction of the Neophyte, the second section being a rehearsal of the various steps in the first section, and exoteric reasons for these. The following sections contain the morals and dogmas in the several different degrees appertaining to each. In the Fellow-Craft's degree the second section is a pure allegorical representation; no intelligent Mason can for a moment accept it other than an Allegory. As such there is nothing more impressive than the important lessons in each part of the representations. The American Rite differs from all others in the arrangement and number of the steps, and in some particulars there are other differences along the whole line. That this legend of the second degree is an allegory we have simply to consult the only history of King Solomon's Temple as found in the "Great Light" and we will find that there was no possibility of adapting our Masonic ritual to that structure. In the sixth chapter of the First Book of Kings we read: "The door for the Middle Chamber was in the right side of the house; and they Went up with winding stairs into the Middle Chamber and out of the Middle Chamber into the third." Dr. Mackey, in commenting on this passage, says:¹ "Out of this slender Material has been constructed an Allegory, which if properly considered, in its symbolical relations, will be found to be of surpassing beauty. But it is only as a symbol that we can regard this whole tradition; for the historical facts alike forbid us for a moment to suppose that the legend as it is rehearsed in the second degree of Masonry is anything more than a magnificent philosophical myth."

¹ "Symbolism of Freemasonry," p. 215.

In addition to what Dr. Mackey has said, we would say that the middle and third chamber mentioned in the text referred to were the chambers on the north and south sides of the Temple mentioned in the same chapter of First Kings and fifth and sixth verses: Fifth, "And against the wall of the house, he built chambers round about, the walls of the house about, of the temple and the oracle;¹ and made chambers round about." Sixth, "The nethermost chamber five cubits broad, and the middle six cubits broad, and the third seven cubits broad: for without of the house he made narrowed rests round about that *the beams* should not be fastened in the walls of the house."

Then followed in the eighth verse, same chapter, as to where the door was to these three tiers of chambers, in the "right side of the house," viz., at the east end, inside of the porch or vestibule. We take occasion at this place to say that in all of our rituals our lodge-rooms are diametrically opposite in their "Orientation" to that of the Temple, which it is supposed we copy, viz.: the east of a Masonic lodge-room is at the end opposite to the "entrance." Now the entrance to the Temple was at the east end, and the "Oracle," or Holy of Holies, was at the west end, where we now place the presiding officer, and all Masonic bodies claim it to be the "East" or "Orient."

The situation of Solomon's Temple, on Mount Moriah, on the eastern side of the City of Jerusalem, now occupied by several mosques of the Mohammedan worship, the central building being the mosque of Omar; the topography of that part of the city militates against every legend and myth in our Masonic rituals in all the various rites, and thus is destroyed any attempt at realism in our degrees, which many very excellent Brethren still adhere to in their firm belief in the "Masonry of the Temple." We again refer to Dr. Mackey for his comments on this point: "Let us inquire into the true design of this legend and learn the lesson of symbolism which it is intended to teach. In the investigation of the true meaning of every Masonic symbol and allegory, we must be governed by the single principle that the whole design of Freemasonry as a speculative science, is the investigation of divine truth. To this great object everything is subsidiary. The Mason is from the mo-

¹ Sanctum Sanctorum.

ment of his initiation as an Entered Apprentice, to the time at which he receives the full fruition of Masonic light, an investigator—a laborer in the quarry and the temple—whose reward is the Truth. All the ceremonies and traditions of the order tend to this ultimate design. Is there light to be asked for? It is the intellectual light of wisdom and truth. Is there a word to be sought? That word is the symbol of Truth. Is there a loss of something that has been promised? That loss is typical of the failure of Man, in the infirmity of his nature, to discover divine truth. Is there a substitute to be appointed for that loss? It is an allegory, which teaches us that in this world, man can only approximate to the full conception of truth."¹

The proper lesson in the Allegory of the Fellow-Craft's degree is to teach the Seeker after Truth that the intellectual faculties must be cultivated and educated by a regular course of instruction in the liberal arts and sciences. In the Entered Apprentice degree the candidate has been instructed in the moral and fundamental principles so essentially necessary for the proper and due performance of his several duties in life, to God, his neighbor, and himself.

All Speculative Masonry must be philosophical. No man can become truly a Speculative Mason without a knowledge of the liberal arts and sciences. It is in the second degree that the postulant learns of Operative and Speculative Masonry, and these two divisions are simply described in the lecture. The candidate must apply himself diligently to those seven arts and sciences enumerated and symbolized by the seven steps in order to appreciate Speculative Freemasonry. Does anyone imagine that the eighty thousand craftsmen at the building of the Temple were instructed in those seven liberal arts and sciences? That there was among them all, or in that day anyone, who understood the mechanics of the heavens or who did believe that the Sun was the center of the solar system, and that the Earth was in annual revolution around the sun, and diurnal rotation on its own axis? And yet these two principles are the foundation of astronomy.

In our rituals of the United States, the winding stairs are divided into three sets of odd numbers. The ancient temples were all approached by steps, odd in number; and Vitruvius, the most an-

¹ Mackey, "Symbolism of Freemasonry," p. 216.

cient writer on architecture, assigns the reason to be that, commencing with the right foot at the bottom, the worshipper would find the same foot foremost when he entered the temple, which was considered a fortunate omen. Dr. Mackey thinks, however, that Masonry derives the use of odd numbers from Pythagoras, in whose system of philosophy it plays an important part, and in which odd numbers were considered as more perfect than even ones. Tracing boards of the 18th century show only five steps, delineated, and in some there are seven. The lectures used in England in the commencement of the present century, according to Preston, make as many as thirty-eight, in sums of one, three, five, seven, nine, and eleven.

After the union of the two Grand Lodges in 1813, Dr. Hemming, the Senior Grand Warden, in his new lectures corrected the error in having an even number (38), by striking out the eleven. In the United States these numbers were changed to three, five, and seven, making fifteen. Like all intellectual acquirements there must be a gradual increase in knowledge. The postulant at his approach to the ascending scale of knowledge is primarily instructed in the lessons of the three steps; having acquired these, he advances to the next ascent of five, wherein he is instructed in the human senses, so essentially necessary for the apprehension of all physical knowledge of the objective world. Now, inasmuch as the comfort and happiness of mankind is greatly added to in the best methods of construction of our dwellings, as also all public structures, the science of building is taught by showing the fundamental principles of architecture as illustrated in the five Orders derived from the three original Orders of the Greeks. In the next steps the candidate rises to the highest position of intellectual cultivation in the liberal arts and sciences. Having attained to this elevation, he is entitled to his reward, which is denominated "wages." Here is introduced another allegory, which is derived from a scriptural passage, and is designed to prove the value of a secret pass-word, in all of our Masonic degrees, which is to distinguish a friend from a foe, and by which is proved the right of a member to admission to the lodge, and should always be given before opening the lodge, and by every member or visitor before admission. This is often entirely neglected in some jurisdictions.

King Solomons Temple as a Masonic Symbol.

Prior to 1860—many writers on Masonry held to the opinion that Speculative Masonry dates its origin from the building of King Solomon's temple by Jewish and Tyrian artisans, and, no doubt, general assent was given to the proposition; but subsequent authorities in Masonic history do not now concur therein.

Speculative philosophy existed prior to the construction of the Temple, but we may conjecture that in the formation of the rituals of the three degrees of Symbolic Masonry, the authors took the Temple and its construction as symbols, whereby the instructions in the moral principles, which formed the foundation of Speculative Masonry, were conveyed to the initiates. The very spirit of all of our lectures proves conclusively that when they were formulated they were designed to teach pure trinitarian Christianity, and while the Jewish scriptures did forecast the intermediary of a *Christos*, as all the ancient heathen mysteries did also, yet Jesus Christ as shown and demonstrated in the writings of the New Testament, was not understood by the Jewish writers of the Old Testament, nor by but very few of that faith since. The first three degrees taken in connection with the Holy Royal Arch, as they have always been with our Brethren of England, certainly show pure Christianity, as taught throughout the writings of the New Testament scriptures. It is possible that the investigations which for many years have engaged the earnest and serious attention of students of the Quatuor Coronati Lodge of London, may result in determining the period when our Masonic lectures were definitely formulated. We know historically that, commencing with the formation of the Grand Lodge of England in 1717, the separation of Masonic "Work" into distinct degrees did not occur earlier than 1719.¹ From that date, those who aided in the progressive movement were, first, Dr. Anderson and Dr. Desaguliers; by whom, principally, the "work" was divided into the three degrees of Apprentice, Fellow of the Craft, and Master; second, Entick, by whom, perhaps, the lectures of the degrees were first clearly divided; the third one who made important and valuable improvements in the lectures was Hutchinson; and about the same period Dunckerly made many additions and subse-

¹ Chaps. xxxiii.-xxxvi., Part II. of this work.

quently united with Hutchinson, in the improvement of the work and lectures of the three degrees. The fourth attempt to improve the lectures was by William Preston. He entered the door of Masonry in a Lodge of the Ancients, but subsequently became a member of a Lodge of the Moderns. Preston's lectures recommended themselves at once to the more literary class of Masons, and toward the close of the 18th century were the prevailing lectures, and were introduced into all the English working lodges in the Colonies except in Pennsylvania, where we have understood the work and lectures of the ancients continued to prevail and are more or less the work and lectures of the present day.

When the two rival Grand Lodges of England united in 1813 and became the "United Grand Lodge," Dr. Hemming, the Senior Grand Warden of the new Grand Lodge, was intrusted with the work of preparing a new set of lectures and arranging the floor work of the three degrees and reconciling any discrepancies. This was the last change in the English work and lectures in England. About the close of the 18th century in the last decade Thomas Smith Webb, who became very conspicuous as a Masonic scholar in the northern part of the United States, made many changes in the work and lectures of all the several degrees in Masonry as far as they had been introduced into the country. Jeremy L. Cross, of Vermont, became his scholar, and about 1816 he too "took a hand " at the lectures and made changes in Webb's work; so that now, in all the States of the Union except, as before said, in Pennsylvania, the Webb-Preston work and lectures prevail.

The first section in all the degrees in Masonry is the initiatory rite. So soon as the candidate in any degree has been obligated he is essentially a Mason of that degree, and as such is entitled to all the secrets and mysteries appertaining to that degree; hence every following section in any degree comprises instructions and explanations of the several steps in the initiatory section of the degree.

In the third degree, the second section is a dramatical representation of the "Legend." To ordinary minds, unaccustomed to allegorical representations, it is received as a true representation of a real occurrence. Scholars who have critically examined and compared all the circumstances of the allegorical representation, are well satisfied that such an occurrence could not have happened in

the locality represented. The situation of the Temple and the surrounding topographical features all forbid any such circumstances as are related in the Legend. Hence we must assume that our authors of the legend intended it to be the culminating Symbol of Ancient Craft Masonry. In that legend is carried out to its ultimate extent the grand idea which prevailed and dominated every one of the Ancient Mysteries of the Oriental religious rites, and when we carefully "read between the lines" we learn how very near to the fundamental principles of "Christianity" all of those religious rites approached, even in their ignorance of what Dr. Oliver and Dr. Mackey have denominated "true Masonry." True Masonry, as originally designed, was intended to be strictly "Trinitarian Christianity," and every step taken in Masonry prior to the organization of the Grand Lodge of England, in 1717, was Christian, and no one could be a Mason who was not such, and was true to "Mother Church," as all the Ancient Manuscripts prove, and in some Grand Lodges in Europe this test is still required and a Jew or an infidel is excluded. Perhaps the change made in this direction, after 1717, admitting only those who professed a belief in God as being the only test of eligibility, has done good, by spreading abroad all the valuable principles involved in our several lectures, founded, as they all are, upon *Faith* in God, and having no other dogma. To this end was the legend of the third degree invented, and the secret *mysteries* of the whole of Masonry are concealed in the *substitute* when properly interpreted, as that should be, and not as now generally explained, which has no meaning whatever. When properly explained, it agrees *precisely* with *that* for which it *was* substituted.¹

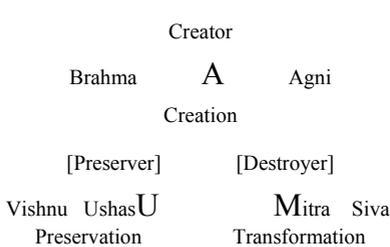

Notwithstanding the conclusion reached by Dr. Mackey in the Chapter XXXI. referred to, we do not fully agree with him, but believe that the origin of the Mysteries involved in the third degree were invented some time subsequent to the organization in 1717; and that, perhaps, Chevalier Ramsay *may* have been the author, or, with the priests in the College at Clermont, have concocted those secrets, and invented the Royal Arch degree, which he brought with him into England, and endeavored to introduce into the work of the Grand Lodge of England. We know that the degree was finally introduced into the work of the "Ancients" of

¹ See in this work ch. xxxi., p. 290 *et sequiter*.

Dermott, and subsequently, by Dunckerly, into the old Grand Lodge of England, of which he was a very conspicuous and distinguished member. Through him the third degree was so altered that to obtain the original essential secrets of that degree it became requisite to take the Royal Arch degree. Now, in the Ancient and Accepted Rite the degree of "Mason of the Royal Arch," which is essentially the same as the Ramsay degree, is so nearly like the English Royal Arch degree that we may say they are both from the same original source. Everyone who is familiar with these several degrees must confess there is a family likeness, and they all concur, in their essential features, in demonstrating that the religious elements are the same.¹

In reference to the occult science in India, we take the following extract from Louis Jacolliot, as translated by Willard L. Felt:

"Remember my Son, that there is only one God, the Sovereign Master and Principal of all things, and that the Brahmins should worship him in secret; but learn also that this is a mystery, which should never be revealed to the vulgar herd:—otherwise great

harm may befall you. [Words spoken by the Brahmins upon receiving a candidate for initiation according to Vrihaspati.]"

This triangular arrangement of the great name, AUM, recognized as the WORD in the higher Mysteries in India, as the One God referred to in the above extract, represents the Triune God of all the Ancient Mysteries of the Oriental religions.

Under the head of Freemasonry, Chapter II., page 484, Dr. Mackay says:

"Krause gives ample proof that the Colleges of Artificers made use of symbols derived from the implements and usages of their craft. We need not be surprised at this, for the symbolic idea was, as we know, largely cultivated by the ancients. Their mythology, which was their religion, was made up out of a great system of symbolism. Sabaism, their first worship, was altogether symbolic,

¹ See in this work ch. xxii., pp. 135 to 139; also ch. xxvi., p. 178.

and out of their primitive adoration of the simple forces of nature, by degrees and with the advancement of civilization, was developed a multiplicity of deities, every one of which could be traced for his origin to the impersonation of a symbol. It would, indeed, be strange if, with such an education, the various craftsmen had failed to have imbued their trades with that same symbolic spirit which was infused into all their religious rites and their public and private acts."

In plates 1 and 2 (pages 1718 and 1720) we have shown a very few of the symbols used by the Ancients in their mythologies, and which are copied from Calmet, and herewith is a short description of each.

Figure 1, plate 1, is an Indian representation of Vishnu, the second person of the Trimurti—the semblance of the God, is seated on a lotus-plant having four arms, and in each hand a peculiar emblem is displayed. The stem is supported by Vishnu, represented as an immense turtle. A huge serpent encircles the pillar; the gods hold the tail part and the *daityas* or demons hold the opposite end. By pulling the serpent alternately the sea was converted into milk, and then into butter, and from this was obtained the *Amrita* or water of life which was drank by the Immortals.

Figure 2 represents Brahma seated on a lotus flower after the deluge. Calmet supposes it to represent Noah and his three sons. The connection between numbers one and two may be seen in the conch shells shown in the hands, and the chains of pearls around the necks.

Figure 4 represents the Sun-God and Deus Lunus.

Figures 3, 5, and 6 are different forms of Nergal. The word *Ner-Gal* divides into two parts: *Ner* signifies light, or luminary, etc., and *gal* signifies to roll, revolve, a revolution, a circuit, the two together implies the revolving or returning light. If this be truly descriptive of Nergal, there is nothing improbable in considering the cock as allusive to it, since the vigilance of the cock is well known, and that he gives due notice of the very earliest reappearance of light morning after morning. There are different senses in which *light* may be taken, besides its reference to natural light.

"1st. Deliverance from any singular danger, or distress. Esth. viii. 16.

"2dly. Posterity; a son, or successor, 1 Kings xi. 36; 2 Chron. xxi. 7.

"3dly. Resurrection, or something very like it. Job xxxiii. 28, 30; Psalm xcvi. 11."

In the figures 3, 5, and 6 there is no allusion to the first of these principles, but they have a strong reference to the second, Posterity, and the idea of fecundity is expressed in the adaptation of the figure of a cock, which signifies the returning of light. In figure 5, which is taken from a gem in the Gallery at Florence, Italy, two cocks are yoked to the car of Cupid, and driven by one Cupid and led by another; and not merely as if harnessed to a common car, but as if they had been in a race and had come off victorious; as the driving Cupid carries a palm-branch, which is the reward of victory, obtained by these emblematical coursers.

In figure 3 we have a car with a cock standing in the attitude of crowing and flapping his wings; which is the custom of this bird on certain occasions. The star shown is the Star of Venus, and distinguishes this equipage as the consecrated vehicle of that supreme goddess of love and beauty. At a short distance in the background sits Hymen, the god of marriage and conjugality; his torch brightly blazing; at his feet is a cock crowing, etc., in a manner and attitude very like the other; and with precisely the same allusions. The indication of this allegory is the influence of Venus and Hymen, the genial powers of vitality, on the renovation of life, in human posterity.

As the extinction of lamps, or torches, indicated utter desolation, deprivation of children and misery, so on the contrary we are led to imply the joy of connubial engagements.

The figure 6 represents a cock holding in his bill two ears of corn; he is attended by Mercury, having a Caduceus in one hand, and a bag of money in the other. This gem has puzzled the learned. Montfaucon¹ says: "To see Mercury with a cock is common enough; but to see him walking before a cock larger than himself, is what I have never noticed, except in this representation. It may denote that the greatest of the qualities of Mercury is vigilance. The cock holding the corn in his bill, may, perhaps, mean

¹ Vol. i., pp. 123, 128.

that vigilance only can produce plenty of the productions necessary to the support of life." Ancient Mythology adopted various representations of the human form.

Figure 7 is an Abraxas, taken from Montfaucon. It represents a man with two faces having on his head the bushel or sacred *Calathus*; two wings are on his shoulders and two wings on his hips, and a scorpion's tail and a staff in each hand.

Figure 8 evidently represents Neptune.

Figure 9 represents Ashtaroth or Astarte, which is the same as Venus. She holds a long cross in her hand and has the sacred *Calathus* on her head. This is a Medal of Zidon, which was a city of great antiquity; St. Ambrose, in writing to Symmachus, implies that Venus is the Metrane of Persia, and though worshipped under different names yet is constantly the same power. In this connection we must enlarge somewhat upon the names of Ashtaroth, Astarte, and Venus, as in the description of several of the following figures the subject will be better understood.

Venus represented with a dove is referred to Askelon, and yet we know that Egypt had her Venus and dove, as shown in a medal when she stands with a staff in one hand and a dove supported by the other hand extended. This medal was struck in Tentyra, a city of Egypt. This shows that the worship of the dove was very prevalent in these countries. The etymology of Askelon is derived from weight, or balance, *shekel*. Another origin is suggested; *Ash* in Hebrew denotes fire; *Kel* denotes activity, briskness, and heat, even to wasting; *lun* denotes to reside, to stay, to remain. These ideas combined, mean, "the residence, or station, of fire, in activity or heating." To explain this the following Hindoo story is found in *Asiatic Researches*, vol. iv., p. 168, which agrees with this etymology." The Puranas relate that Sami Rami, in the shape of a dove, came and abode at Asc'halanorthan, which is obviously Askelon; here Samiramis was born, according to Diodorus Siculus, and here she was nursed by doves. She was, says he, the daughter of Derketos. Here, say the Indian Puranas, she made her first appearance. Now, by *doves*, we are to understand priestesses; by her birth, the institution or establishment of her worship, as daughter, *i.e.*, immediate successor or offspring of Derketas. *Sami* is the Hindoo word for fire, and *Rama* signifies the fir-tree; *'Sthan* is station, residence, dwelling. By uniting these ideas, we find they also

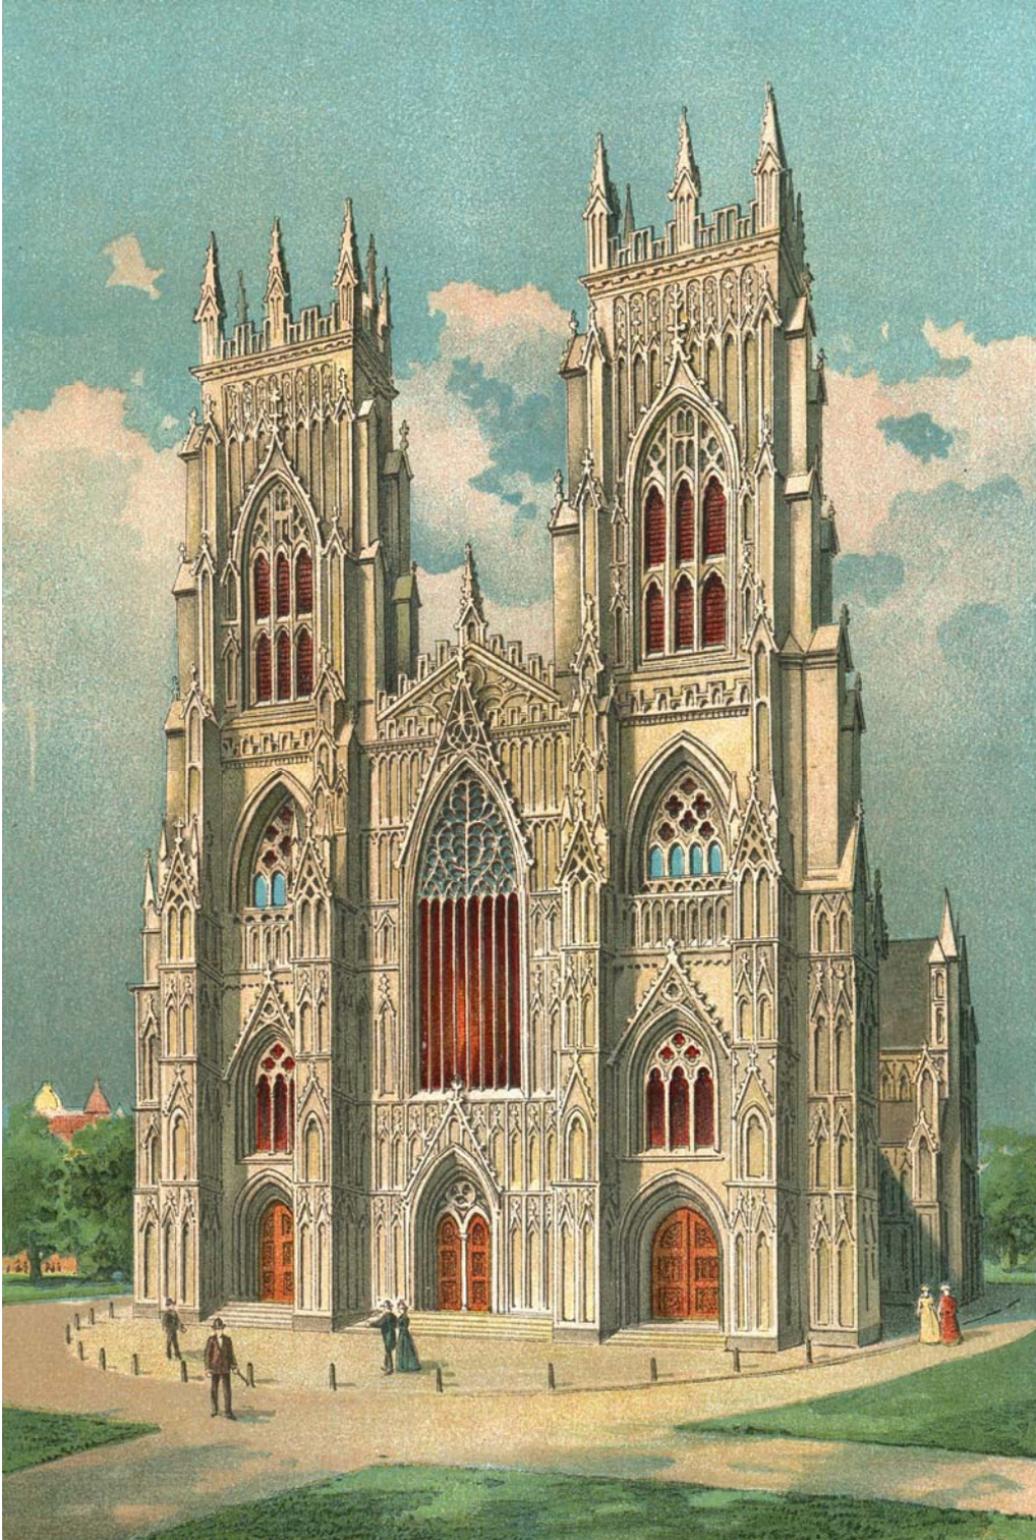

signify 'the residences,' *'Sthan*, of fire, *Samt*, in perfect conformity to the Hebrew name, as above explained."¹

Figure 10 represents Dagon, properly Dag-Aun. We must anticipate the description of this figure by reference to another figure, not shown, *vis.*: There is a gem in the Florentine Gallery which is probably of Grecian workmanship; it shows the progress of those variations by which in process of time Art relinquished the truly ancient representation of Dagon. This figure exhibits a union of the human and fishy parts; but this union is contrary to the original idea of the emblem, which was that of a person coming out of a *fish*, not making a part of the fish, *but issuing from it*. (As will be seen in figure 10.) Shall I be thought fanciful in referring the figures of this plate to traditional memorials of Noah, his wife, and three sons? All of them having human upper parts, but piscine lower parts; *i.e.*, all of them originally considered as having issued from a fish; though by lapse of time the import of that allegorical representation was forgot. N. B. The original *Merman* and *Mermaid* of our heraldry supporters.² In figure 10, instead of the male and female, and three children, all having piscine lower parts, there is one person allied to a fish; but this one person has four arms, or governing powers. Now I take the fact to be this: when the *male* personage was used as a type of the event commemorated in this emblem, then the original allusion was to Noah and his three sons; but when a female personage was used, as an emblem of the very same event, then the allusion was to the wife of Noah. On the same principle genealogies were reckoned, and are still in the East, only by the male sex; we have no genealogy by women in Scripture; but this rule was departed from, *speciali gratia*, when the universal mother of the second race of mankind was to be commemorated. *Vide* figure 2 for the picture of a man with four heads and four arms, that is, four governing powers, Mental and Corporal; or in this Indian emblem, the four states and conditions of life, or the four *castes* and distinctions among the inhabitants, which *castes* are, on the Indian system, equally attributable to Noah as the *father*, or to his wife as the mother of succeeding generations. The four bearded heads *may* be those of the four fathers of mankind united into one; signifying *legislative* govern-

¹ Calmet, Fragment 269, p. 373.

² *Ibid.*, p. 133.

YORK CATHEDRAL

ment, morals, etc. The four arms to the female figure, No. 10, *may* signify executive government. Still they represent government in some manner or other; and wherefore *four*? unless four persons had originally their respective departments in conducting the general welfare of the community, their descendants.

Figure 10, plate 2, is from Maurice's *History of India*.¹ It represents a female, crowned, having four arms, each holding its proper symbol, coming out of a great fish; as if this great fish was casting forth this personage, after the tempestuous ocean was calmed, the evil demon destroyed, and the verdant meadows were again clothed with cheerful herbage, as appears in the background of the original.

This emblem is called in Indian one of the appearances of Avartas of Vishnu.

There is an ancient fable that Oannes, who was said to be half a man and half a fish, came to Babylon *and taught several Arts; and afterward returned to the sea* . . . there were several of these Oannes . . . the name of one was Odacon, *i.e., ó Dagon* [the *Dagon*]. Berosus, speaking of Oannes, says he had the body and head of a fish; and *above the head of the fish he had a human head; and below the tail of the fish he had human feet*. This is the true figure of Dagon, who was the God of the Philistines, *i.e., the most of the inhabitants of Palestine, long prior to the time when Joshua led the children of Israel across the river Jordan and took possession of the whole country and divided it among the twelve tribes*. Etymologists say that Dagon was Saturn; others say he was Jupiter; others say Venus, whom the Egyptians worshipped under the form of a fish; because in Typhon's war against the gods, Venus concealed herself under this shape.² Diodorus Siculus says,³ that at Askelon the goddess Derceto, or Atagatis, was worshipped under the figure of a woman, with the lower parts of a fish (see figure 18, plate 2), and Lucian, *de Dea Syr:* describes that goddess, or Venus, as being adored under this form.

There is an ancient fable, that Oannes, a creature half man, half fish, rose out of the Red Sea, and came to Babylon, where he taught men several arts, and then returned again to the sea. Apollodorus reports that four such Oannes, in several ages, had arisen out of the Red Sea, and that the name of one of them was Odacon; whence the

¹ Plate VII., p. 507, per Calmet, vol. iii., p. 183.

² Ovid, "Met.," lib. v., fab. 5.

³ Lib. ii., p. 65.

learned Seiden derives Dagon.¹ The worship of Dagon continued in Palestine until the change in the mythology of early days to the Greek nomenclature, after the days of Alexander the Great. The temple of Dagon was pulled down by Sampson at Gaza. The Philistines deposited the ark in the temple of Dagon at Azoth.

Figure 11, plate 11, represents Succoth Benoth, and is a companion to the Deity Nergal; which the Babylonians selected as their favorite object of worship (2 Kings xvii. 30).

This representation is evidently Venus rising from the sea, attended by Tritons, who regard her with veneration and triumph united; but this is not the original Venus; it is the story poetically treated, varied by the looser imagination of the Greeks, from the ancient emblem; retaining the idea, but changing the figures, etc., as seen they did in Dagon, and as they were accustomed to do in all their Deities; from whence the Egyptians, etc., thought them impious; and indeed their images became hereby altogether *desecrated*. To this incident of Venus rising from the Sea ought to be referred all that the poets have written on the birth of the goddess of beauty from the briny wave, from the froth or foam of the sea, etc., of which enough may easily be met with among the classic writers, Greek or Latin.

The Hebrew word Succoth is usually rendered *booths*, *i.e.*, temporary residences, as tents, etc. The Rabbins translate it "tents of the young women": it is literally "*the tabernacles of the daughters, or young women*" that is, "if *benoth* be taken as the name of a female idol, from *Beneh* to build up, procreate children, then the words will express, *The tabernacles sacred to the productive powers feminine.*"

The dove, when used as an *insignia* or as a token, referred primarily to the dove at the deluge; and the double-faced Jason referred primarily to Noah; who looked backward on one world, ended, and forward on another, beginning. In the illustrations connected with Succoth Benoth the head of Venus on one side of a medal with a dove for its reverse, and a head of Janus with a dove also for its reverse, must originally have referred to the same event; and this event was what the figure of Derketos, who was the Syrian goddess, commemorated; in other words, Venus rising from the Sea.

¹ Calmet's Dictionary, Dagon.

Derketos issuing from a fish; 1st, Noah, as the great progenitor of mankind, restored to light and life; 2dly, the prolific powers again in exercise, to 3dly, the revival of human posterity, etc., after a temporary residence in that floating womb of mankind, the ark of preservation.¹

The composition of a woman with the form of a fish is seen in a medal of Marseilles representing Atergatis, Derketos, the Syrian goddess Venus. Marseilles was settled by a colony of Phoenicians from Syria. They, like the Men of Babylon, carried their country worship and gods with them to their distant settlement.²

In figure 12 is a representation of the eighth Avatar of Vishnu, in which he represents the Good Black Shepherd treading upon the head of the Serpent Calanach. The promise made to Adam and Eve when they were turned out of the garden of Eden, was that their seed should bruise the head of the Serpent. Now, this figure of Vishnu, the second person of the Indian Trimurti, was called Krishna—the Anointed one—and some have thought that this myth was to illustrate the promise made to Adam and Eve, as above stated.

Figure 13 is a representation of Ashtaroth, the same as Astarte or Venus. The horns are not united to form a crescent as in other pictures but are more natural; around the beautiful head are the Seven stars by three and four, and two figures of lightning to show her authority as regent of night.³

Figure 14 represents another form of Abraxas which has more emblems than figure 7. This figure has on its head the lotos; it has four wings; and connected with each wing an arm; and in each of its four hands different destructive emblems. It has on its feet what might be taken for a third pair of wings; but these are very imperfect, if they be wings.

Figure 15 is Dea Luna or Deus Lunus. This represents a man with a Phrygian bonnet on his head, clothed in a short dress, a sword in his right hand, in his left a man's head, which he has recently cut off from the body lying by him, whose flowing blood spurts upward. Macrobius says "the Moon was both *male* and *female*;" and adds one particular from Philocorus, that the male sex sacrificed to him in the female habit, and the female sex in the

¹ Calmet, vol. ii., p. 283.

² Ibid., p. 234.

³ Ibid., p. 375.

male habit. Though Spartian speaks of Carhœ as a place famous for the worship of Lunus, the reader must not think this worship was confined to that place and to Mesopotamia; for it was spread all over the East. This worship was established in Phœnicia long before the empire of Caracalla; a medal published by Vaillant hath Antoninus Pius on one side and the god Lunus on the other, with his Syrian cap on, and holding a spear with a great star on one side of him, and a crescent, which signifies the moon, on the other. The medal was struck at Gaba, near Cæsarea in Palestine, by the borders of Phœnicia.¹

Figure 16 represents the Egyptian Venus. This medal was struck in Tentyra, a city of Egypt, as appears by the legend upon it. Strabo mentions a temple of Venus at Tentyra. This is a reverse of a medal of Adrian; it represents Venus holding her dove in one hand, in the other a staff. On the whole, this has a strong similitude to medals of Askelon, and shows that the worship of the dove was very prevalent in these countries, and in their respective adjacencies.²

Figure 17 is a representation of a four-horned goat, which is said to be from Spain, with two upright and two lateral horns. This animal was alive in London about 1769. It is a symbol of the goat of Mendes.

Figure 18 represents the figure of a woman united to the form of a fish, and is similar in composition and shape of Atergatis-Derketos, the Syrian goddess.

Figures 19 and 20 represent two appearances of Baal. They are human heads with symbols of an ox added to them.

Observe in No. 19 the stars which accompany the head; if these stars, or if a single star, be referred to the Deity it accompanies, then we see how easily the Israelites might "take up the Star of their God" (Amos v. 26), *i.e.*, portrayed on medals, or small figures, whether images or coins, etc., carried about them; and secured from detection by their smallness and readiness of concealment. This figure has the bull's or cow's horns and ears on its head.

No. 20 has only the ears of a bull or cow; but has on its head a garland of vine-leaves and grapes, whereby it is allied to Bacchus; with two apples on the front of the head, whereby it is allied to

¹ Calmet, vol. ii., p. 375.

² *Ibid.*, p. 374.

Ceres, or to Pomona, *i.e.*, it indicates a fruit-bearing divinity, perhaps *Isis fructifera*.¹

We have selected the foregoing examples of the very earliest symbols employed by the Ancient Nations to express their ideas of the Deities whom they worshipped; these all coalesce at last in the Sun and Moon. What was Fortune? *Baal Gad*; the Luna Dea which presided over favorable times; where then is the wonder that the Israelites should be tempted to solicit favorable seasons from this goddess, instead of entreating them from the Lord? as he complains; or that they should offer propitiatory incense to the queen of heaven? (Jer. xlv. 17) or that the question be asked, Can any of the deities of the heathen *give rain?* which is so necessary to fertility; and an act of true divinity alone. We see, too, how Gad and Meni terminate in the Sun and Moon.²

We now revert to quite a different class of symbols, which we find prevailed in Egypt, Persia, Assyria, and was employed by the Almighty himself when he revealed his worship to the children of Israel. We allude to the Cherubim. The first authentic reference which we have in history we find in Genesis, ch. iii., v. 24, and in Exodus, ch. xxv., vs. 18, 19, and 20, which we quote, *viz.*: "And thou shalt make two Cherubims of gold, of beaten work shalt thou make them, on the two ends of the Mercy Seat. And make one Cherub on the one end, and the other Cherub on the other end; *even* of the Mercy Seat³ shall ye make the Cherubims on the two ends thereof. And the Cherubims shall stretch forth *their* wings on high, covering the Mercy Seat with their wings, and their faces *shall look* one to another; toward the Mercy Seat shall the faces of the Cherubim be."

It would seem from the directions here given by the Almighty to Moses, that the cherubic form was well known to him, from his familiarity with the Cherubim so common in Egypt. We must therefore look to the Cherubim of Egypt to understand the subject and appreciate the Cherubim of the first Ark of the Covenant carried by the children of Israel in their forty years of "Wanderings in the Wilderness," and into the "land of Promise" and the great Miracle wrought by it in the midst of the river Jordan. (Joshua, ch. iii., vs. 15, 16, 17.)

¹ Calmet, vol. ii., p. 122.

² *Ibid.*, p. 124.

³ Another rendering may be, "*of the matter of the Mercy Seat*"

In all the different nations, where the cherubic forms were employed, they were compound animals. The various authors on this subject have employed many articles. Mr. Parkhurst, in his Dictionary, uses no less than *sixty*; and M. Calmet has many pages and numerous illustrations, some of which we will use. In these articles Calmet proceeds by giving a description of the various parts, separately entering into the compound animal.

I. He first takes the Cherubim described in the Bible, of their *heads* or *countenances*. Each Cherub has four: 1st, that of a man; 2d, that of a lion; 3d, that of an ox; 4th, that of an eagle. In what manner were they placed? Were they four heads attached to four necks rising from the trunk of the body; or four faces attached to one head? He thinks they were four faces attached to one head.

II. Of their *bodies*, *i.e.*, from the neck downward. This was human; the "likeness of a man," which extended below the navel and to the lower rim of the stomach.

III. Of their *wings*. Ezekiel describes them as having *four* wings; Isaiah describes the Seraph as having *six* wings, *viz.*: two on the head, two on the shoulders, and two on the flanks.

IV. Of their *arms*. The translations say *hands*, but certainly imply arms at length; their number was *four*, one on each side.

V. The *lower part*. It must have been 1st, either human thighs, legs, and feet to which was appended at the posteriors the body and hind legs of an ox; or, rather, 2d, the body and four legs of an ox, out of which the human part seemed to rise, so that all below the rim of the belly was in the form of an ox, and all above that was human.

VI. Their *services*; or, what they appeared to do. The vision seen by Ezekiel, and also by Isaiah, was the resemblance of a movable throne or chariot, of prodigious dimensions, on which the sovereign was supposed to sit; that the wheels were annexed to it in much the same manner as to the royal traveling or military thrones of the Persian Kings; and that the four Cherubims occupied the places of four horses to draw this capacious machine.

Did our limits permit, we could extend this examination into the subject of the Cherubim with great profit; but our object will have been obtained if we can succeed in showing how almost universal was the idea of compounding different animals into one for the pur-

pose of illustrating the general ideas of the different attributes of their deities among all the nations of antiquity.

We copy from Calmet's Dictionary the following description of the Cherub.

CHERUB—derived from the Chaldee, signifies *as a child*; from the adverb *ki, as, and rabia, a young man, a child*; otherwise, *as multiplying, or as combating*; from *rahah, or abundance, or multitude of knowledge*; from *rab, a multitude, and Nacar, to know*; otherwise, in Hebrew, *rahar* signifies *to grow great, to nourish, to bring up*; in Syriac, *to labour*.

This term in Hebrew is sometimes taken for a calf or an ox. Ezekiel i. 10 mentions *the face of a Cherub*, as synonymous to *the face of an ox*. The word *Cherub* in Syriac and in Chaldee signifies to till or plough, which is the work of oxen. Cherub also signifies strong and powerful, possessing the strength of an ox. Grotius says the Cherubim were figures like a calf. Bochart thinks they were nearly the figure of an ox. So does Spencer. Josephus says they were extraordinary creatures of a figure unknown to mankind. Clemens of Alexandria believes that the Egyptians imitated the Cherubim of the Hebrews in their Sphinxes and hieroglyphical Animals.¹

The descriptions, in various parts of Scripture, of the Cherubim differ, but agree in a figure composed of various creatures except in the first description in Exodus. The others an ox, a lion, a man, and an eagle, as in Ezekiel i. 5, and x. 2. Those placed in the Temple by Solomon were probably similar to these. (1 Kings vi. 23.) We can readily see that those on the Original Ark could not have been like those in the Temple, for there evidently was but one head on each one from the expression "and their faces shall look one to another; toward the mercy seat shall the faces of the Cherubim be." (Ex. xxv. 20.) There could only be one head and face to each of the two Cherubim.

Calmet's own conclusion on this difficult question is as follows:

"So great obscurity has hitherto overwhelmed this figurative representation, notwithstanding it has been the theme of many very learned men, that I cannot flatter myself with succeeding at once in explaining it. I think, however, that this opens a new way for

¹ Calmet Dictionary, Cherub.

attaining some conception of its real forms; and I feel some satisfaction in the idea that these symbols were not unknown in kingdoms and countries independent of Judea."

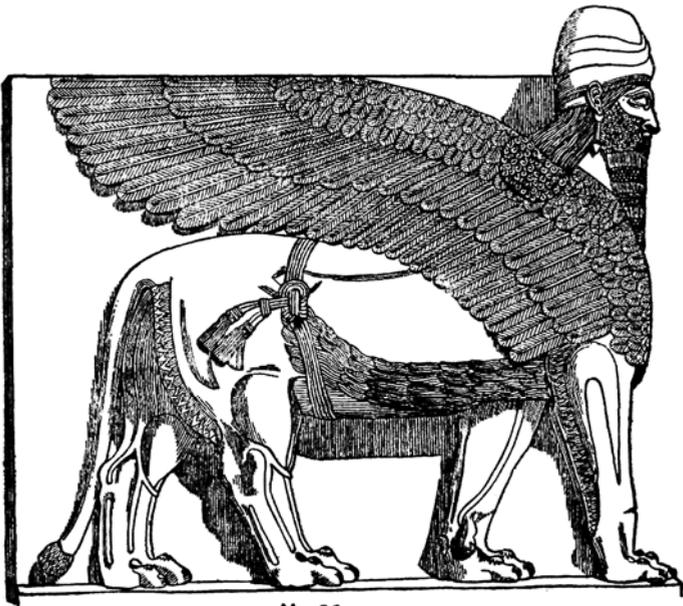

The Cherubic or compound form was common to most of the nations of the Orient. In Egypt, the sphynx and other examples are extant at the present day; in Assyria, all the Temples had such compound figures at their entrances, and we show some of these in figures 21, 22, 23, 24.

"In regard to these Cherubic forms, there were two extreme opinions: 1st. That it pleased God to compose the Jewish religious rites, ceremonies, and symbols, of materials as unlike as possible to those of the countries around them, especially of Egypt, in order to establish a total dissimilarity, and to exclude idolatry. 2d. That a close resemblance, especially to Egyptian manners, was established, in order to accommodate the services to the temper and habits of a people who had been used to such in Egypt. This was the hypothesis of the learned Spencer. The truth, I apprehend, lies between these opinions. . . .

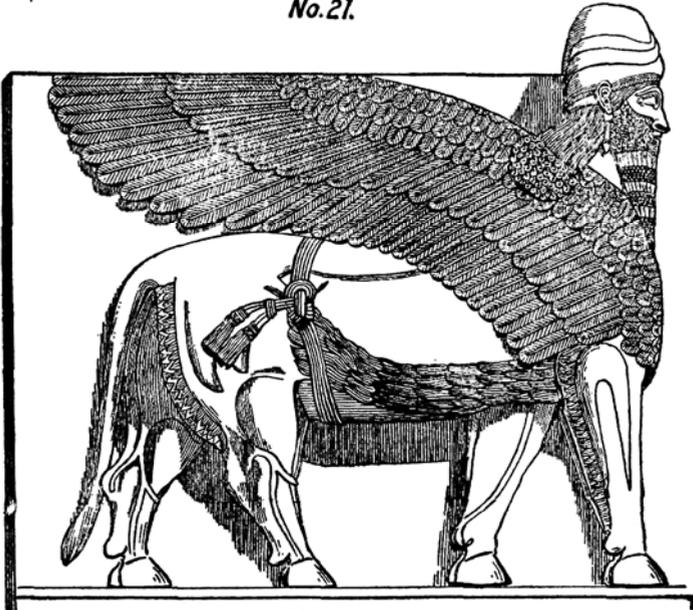

"The Jews considered the Cherubim as of the utmost importance under the Levitical priesthood; yet they have lost their true representation. If the flame placed to keep the way to the tree of life was a Cherub, then this emblem is extremely ancient. Mr. Parkhurst finds resemblance to this symbol in the West Indies; in the Temple of Elephanta, in the East Indies; in Diana; in Proserpine; in Rhadigust, an ancient German idol; in Mithras, a Persian Deity; in the gryphon, or griffion, of Cochin-China; in Yahuthana Nasr, Arabian idols resembling a lion and an eagle; and in many other parts of the world. The opinion of this writer seems to be sufficiently established to warrant the inference, that this emblem was not borrowed by the Jewish ritual from Egypt only, but was known among many other nations in its principle at least."¹

When we reflect that at the very earliest ages, when religious rites were new among all the nations of the earth, it does seem probable that they all derived their ideas from one original stock; and in time the varieties of manners and customs, and also following these, the methods of worshipping their gods with the same central and general ideas; the variations were like branches of an original

FIG. 25.—The Egyptian God, Thoth, Scribe of the Gods. FIG. 26.—An Indian Warrior of the Present Day, clothed and equipped similarly to the foregoing Assyrian figures. FIG. 27.—Osiris, Judge of the Dead, having in his right hand the Crux-Ansata, the symbol of eternal life, and in the left hand a rod having on its top the head of the Hopoe, the symbol of purity.

This is similar to the rod or spear in the right hand of Fig. 26, having an eagle's feather forming a cross with the rod. The warrior should have on his forehead the scalp and horns of a buffalo, which they frequently wear. He has also around his neck a necklace of bears' claws and teeth. In his left hand the same form of bag as in numbers 23, 24, and 28.

stock. The fact that in the vast number of cherubic forms, found in any part of the original heathen and idolatrous world, the common symbols have a great likeness to those symbols used by the Jewish people and described in the Jewish sacred books.

No.28.

FIG. 28.—Assur-nasir-pal, King of Assyria (B.C. 885-860), and winged attendants performing a ceremony before a sacred tree. Above is the emblem of the god Assur, who was the Arian God Ormuzd.

From a bas-relief on the walls of the palace of Assur-nasir-pal, discovered at Calah (Nimrūd), now in the British Museum. In the middle is the famous "Ashera" translated in English version "Grove" and "Groves," which were not growing trees but were as here drawn.

The Cross.

When the Cross became a symbol is lost in the remotest antiquity, and there is no mention of it, historically, at any period, or to the country, or the people who were the first to make use of it as a symbol; nevertheless, it is found at a very early period, by which certain forms have been recognized by certain names having specific meanings.

There are principal forms of the cross which are used as symbols, and others frequently employed in ornamentation having no special signification. There are a great many forms of the cross. Among these we call attention to  which is the usual form of the Swastika, or Svastika, a symbol which has recently excited very much attention among archaeologists. In 1894, the Smithsonian publication contained a very lengthy paper of 221 pages, giving the most complete history with full illustrations and examples of this

symbol by Professor Thomas Wilson, *Curator Department of Pre-historic Anthropology, U. S. National Museum*. He says: "The swastica has been called by different names in different countries, though nearly all countries have in later years accepted the ancient Sanskrit name of Swastika; and this name is recommended as the most definite and certain, being now the most general and, indeed, almost universal. It was formerly spelled s-v-a-s-t-i-c-a and s-u-a-s-t-i-k-a, but the later spelling, both English and French, is s-w-a-s-t-i-k-a. The definition and etymology of the word is thus given in Littré's French Dictionary:

"Svastica, or Swastika, a mystic figure used by several (East) Indian sects."

"It was equally well known to the Brahmans as to the Buddhists. Most of the rock inscriptions in the Buddhist caverns in the West of India are preceded or followed by the holy (*sacramentelle*) sign of the Swastika. (Eugene Burnouf, *Le Lotus de la bonne loi*; Paris, 1852, p. 625.) It was seen on the vases and pottery of Rhodes (Cyprus) and Etruria.

"Etymology: A Sanskrit word signifying happiness, pleasure, good luck. It is composed of *Su* (equivalent of Greek εὖ), 'good,' and *asti*, 'being,' 'good being,' with the suffix *ka* (Greek κα, Latin *co*)."

In the *Revue a'Ethnographie* (IV., 1885, p. 329), Mr. Dumoulin gives the following analysis of the Sanskrit *swastika*:

"*Su*, radical, signifying *good, well, excellent*, or *suvidas*, prosperity.

"*Asti*, third person, singular, indicative present of the verb *as*, to be, which is *sum* in Latin.

"*Ka*, suffix forming the substantive."

The Century Dictionary says, Swastika—[Sanskrit, lit, "of good fortune." Svasti (*su*, well, + *asti*, being), welfare]. Same as fylfot.

Compare *crux ansata* and gammadion.¹

In *Ilios* (p. 347), Max Müller says:

"Ethnologically, svastika is derived from *svasti* and *svasti* from *su*, 'well,' and *as*, 'to be.' *Svasti* occurs frequently in the Veda, both as a noun in a sense of happiness, and as an adverb in the sense of 'well' or 'hail!' It corresponds to the Greek εὖεστοῦ. The derivation *svasti-ka* is of later date, and it always means an auspicious sign, such as are found most frequently among Buddhists and Jinas."

¹ Smithsonian Report, 1894, p. 769.

M. Eugene Burnouf defines the Mark Swastika as follows:

"A monogrammatic sign of four branches, of which the ends are curved (or bent) at right angles, the name signifying, literally, the sign of benediction, or good augury."

The foregoing explanations relate only to the present accepted name "Swastika."

The *sign* Swastika must have existed long before the name was given to it. It must have been in existence long before the Buddhist religion or the Sanskrit language.

In Great Britain the common name given to the Swastika from Anglo-Saxon times by those who had no knowledge whence it came, or that it came from any other than their own country, was *Fylfot*, said to have been derived from the Anglo-Saxon *fower fot*, meaning four-footed, or many-footed.¹

"Many theories have been presented concerning the symbolism of the Swastika, its relation to ancient deities and its representation of certain qualities. In the estimation of certain writers it has been respectively the emblem of Zeus, of Baal, of the Sun, of the sun-god, of the sun-chariot, of Agni the fire-god, of Indra the rain-god, of the Sky, of the sky-god, and finally the deity of all deities, the Great God, the Maker and Ruler of the Universe. It has also been held to symbolize light or the god of light, of the forked lightning, and of water. It is believed by some to have been the oldest Aryan symbol. In the estimation of others it represents Brahma, Vishnu, and Siva, Creator, Preserver, Destroyer. It appears in the footprints of Buddha, engraved upon the solid rock on the Mountains of India. It stood for the Jupiter Tonans and Pluvius of the Latins, and the Thor of the Scandinavians. In the latter case it has been considered—erroneously, however—a variety of the Thor hammer. In the opinion of at least one author it had an intimate relation to the Lotus sign of Egypt and Persia. Some authors have attributed a phallic meaning to it; others have recognized it as representing the generative principle of mankind, making it the symbol of the female. Its appearance on the person of certain goddesses, Artemis, Hera, Demeter, Astarte, and the Chaldean Nana, the leaden goddess from Hissarlik, has caused it to be claimed as a sign of fecundity."²

¹ R. P. Greg per Smithsonian Report, 1894, p. 769.

² Smithsonian Report, 1894, p. 771.

Commenting upon the theories of the various writers quoted, Professor Wilson says:

"In forming the foregoing theories their authors have been largely controlled by the alleged fact of the substitution and permutation of the Swastika sign on various objects with recognized symbols of these different deities. The claims of these theorists are somewhat clouded in obscurity and lost in the antiquity of the subject. What seems to have been at all times an attribute of the Swastika is its character as a charm or amulet, as a sign of benediction, blessing, long life, good fortune, good luck. This character has continued into modern times, and while the Swastika is recognized as a holy and sacred symbol by at least one Buddhistic religious sect, it is still used by the common people of India China, and Japan as a sign of long life, good wishes, and good fortune."

Whatever else the sign Swastika may have stood for, and however many meanings it may have had, it was always ornamental. It may have been used with any or all of the above significations, but it was always ornamental as well.

"Dr. Schliemann found many specimens of Swastika in his excavation at the site of ancient Troy on the hill of Hissarlik. They were mostly on spindle whorls. . . . He appealed to Professor Max Müller for an explanation, who, in reply, wrote an elaborate description, which Dr. Schliemann published in *Ilios*."

He commences with a protest against the word Swastika being applied generally to the sign Swastika, because it may prejudice the reader or the public in favor of its Indian origin. He says:

"I do not like the use of the word *Svastika* outside of India. It is a word of Indian origin and has its history and definite meaning in India. . . . The occurrence of such crosses in different parts of the world may or may not point to a common origin, but if they are once called *Svastika* the *vulgus profanum* will at once jump to the conclusion that they all come from India, and it will take some time to weed out such prejudice.

"Very little is known of Indian art before the third century B.c., the period when the Buddhist sovereigns began their public buildings.

"The name *Svastika*, however, can be traced (in India) a little farther back. It occurs as the name of a particular sign in the old grammar of Pânani, about a century earlier. Certain compounds are mentioned there in which the last word is *karna*, 'ear.' One of the signs for marking cattle was the *Svastika*, and what Pânani teaches in his grammar is that when the compound is formed,

svastika-karna, i.e., having the ear marked with a sign of a Svastika, the final *a* of Svastika is not to be lengthened, while it is lengthened in other compounds, such as *datra-karna*, i.e., having the ear marked with the sign of a sickle."

"It (the Swastika) occurs often at the beginning of Buddhist inscriptions, on Buddhist coins, and in Buddhist manuscripts. Historically, the Svastika is first attested on a coin of Krananda, supposing Krananda to be the same king as Xandrames, the predecessor of Sandrokyptos, whose reign came to an end in 315 B.C. (See Thomas on the identity of Xandrames and Krananda.) The paleographic evidence, however, seems rather against so early a date.

"In the foot-prints of Buddha the Buddhists recognize no less than sixty-five auspicious signs, the first of them being the *Svastika*; the fourth is the *Suavastika*, or that with the arms turned to the left; the third, the *Nandyâvarta*, is a mere development of the *Svastika*. Among the Jainas the *Svastika* was the sign of their Seventh Jina, Supârsva."

"In the later Sanskrit literature, Svastika retains the meaning of an auspicious mark; thus we see in the Râmâyana, that Bharata selects a ship marked with the sign of the Svastika. Varapamihira in the Brihat-samhitâ mentions certain buildings called Savastika and Nandyâvarta, but their, outline does not correspond very exactly with the form of the sign. Some Sthupas, however, are said to have been built on the plan of the Svastika. Originally, Svastika may have been intended for no more than two lines crossing each other, or a cross. Thus we find it used in later times referring to a woman covering her breast with crossed arms, *Svahastasvastika-stani*, and likewise with reference to persons sitting cross-legged."¹

Max Müller continues:

"Quite another question is, why the sign  should have an auspicious meaning, and why in Sanscrit it should have been called Svastika. The similarity between the group of letters *sv* in the ancient Indian alphabet, and the sign of Svastika is not very striking, and seems purely accidental.

"A remark of yours [Schliemann] (*Troy*, p. 38) that the Svastika resembles a wheel in motion, the direction of the motion being indicated by the crampons, contains a useful hint, which has been confirmed by some important observations of Mr. Thomas, the distinguished Oriental numismatist, who has called attention to the fact that in the long list of the recognized devices of the twenty-four Jaina Tirthankaras the sun is absent, but that while the eighth Tirthankara has the sign of the half-moon, the seventh Tirthankara is marked with the

¹ Smithsonian Report, 1894, p. 772.

Svastika, *i.e.*, the sun. Here, then, we have clear indications that the Svastika, with the hands pointing in the right direction, was originally a symbol of the sun, perhaps of the vernal sun as opposed to the autumnal sun, *Suavastika*, and, therefore, a natural symbol of light, life, health, and wealth.

"But, while from these indications we are justified in supposing that among the Aryan nations the Svastika may have been an old emblem of the sun, there are other indications to show that in other parts of the world the same or a similar emblem was used to indicate the earth. Mr. Beal . . . has shown . . . that the simple (+) occurs as a sign for earth in certain ideographic groups. It was probably intended to indicate the four quarters—north, south, east, west—or, it may be, more generally, extension in length and breadth.

"That the cross is used as a sign for 'four' in the Bactro-Pali inscriptions (Max Müller, *Chips from a German Workshop*, Vol. II., p. 298) is well known; but the fact that the same sign has the same power elsewhere, as, for instance, in the Hieratic numerals, does not prove by any means that the one figure was derived from the other. We forget too easily that what was possible in one place was possible also in the other places; and the more we extend our researches, the more we shall learn that the chapter of accidents is larger than we imagine."¹

In the Smithsonian Report (Annual) for 1897 we find an article by Marquis De Nadaillac on the "Unity of the Human Species," who, in concluding one part of the subject, says:²

"The accumulated proof renders it incontestable that the funeral rite of cleaning the bones and coloring them red was practised in different countries widely separated by sea or desert. Thucydides says the history of a people is to be sought in their tombs. In the cases cited, the tomb has responded and has thrown a clear light on the earliest origin of the rite, and at the same time on the common origin of man. A question arising from these facts is, whether they relate to religious or funeral rites. But this is comparatively of small importance. It was surely a custom of the unknown ancestors of these peoples, transmitted from generation to generation. These facts do not allow us to say that primitive life was everywhere the same, nor that if the productions of men are everywhere the same, they are always to satisfy the same needs. In the strange rite that we have recounted, a rite which has required much thought and multiplied cares and which one can believe was strange to barbarous and nomadic races, it is not a question of similar needs growing out of similar creations. In order to find a solution it is necessary to

¹ Smithsonian Report, 1894, p. 773.

² *Ibid.*, 1898, pp. 563 to 569.

seek higher and farther; it is the identity of the genius of man in all times and in all regions that should be inquired of, and it is only there that it can be found.¹

"The mysterious Swastika sign born in undefined regions and rapidly extended over the entire world, goes to support this hypothesis. We will seek the lessons it teaches.

"For a long time the Swastika (the *croix gammee*, a Greek cross, with arms bent to the right at right angles) has been regarded as an Aryan sign, even the Aryan sign par excellence. From this, or from its apparent place of origin, the name Indian (East Indian) has been given it; a name difficult at present to maintain because of the daily discoveries of its diffusion or spread among absolute strangers to the Aryan race.²

"It appears from the researches made during late years that the origin even of the Swastika sign appears to be contested. Thus we read in the work of Count Goblet d'Alviella,³ one of those who has best studied the question:

"The *croix gammee* (Swastika) appears from prehistoric times among the peoples originating in the valley of the Danube, who have respectively colonized the Troad and the north of Italy. It extends with the products of this antique culture, on one side, among the Greeks, Etruscans, Latins, Gauls, Germans, British, and Scandinavians; on the other side, to Asia Minor, Persia, the Indies, and to China and Japan.'

"Such is also the opinion of M. Salomon Reinach.⁴ According to him the sign of the Swastika already represented in the city of Hissarlik, prior, according to all probabilities, to the thirteenth cen-

¹ J. McGuire, *Classification and Development of Primitive Implements*. "Amer. Anthrop.," July, 1896.

² The literature upon the Swastika has increased in late years until it has become a library. In 1889 Count Goblet d'Alviella made a communication to the Royal Academy of Belgium entitled "La *croix gammee*, or Swastika." It has since been enlarged and published under the title "La migration des Symboles," Paris, 1891. An English translation appeared with an introduction and note by Sir G. Birdwood. Among recent publications were those of Michael Zmigrodzki, "Zur Geschichte der Swastika," Brunswick, 1890, and Thomas Wilson, "The Swastika," Washington, 1896. Eminent savants in all countries have been occupied with the question of its origin and signification, but it appears, nevertheless, that it is not yet entirely cleared, for Dr. Brinton writes: "It is easy to read into barbaric scratches the thoughts of later times, and we must acknowledge that something more than the figure itself is needed to prove its symbolic sense."

³ *La migration des Symboles*. "Revue des deux Mondes," May 12, 1889.

⁴ *Le mirage oriental*. "L'Anthropologie," 1895.

tury B.C., did not penetrate the Indies until after that period.¹ He continues that one does not find the symbol in Egypt,² nor in Phœnicia, nor Assyria; while, on the other hand, it is frequent in northern Italy, in the valley of the Danube, in Thrace, in Greece, and on the western shores of Asia Minor. Thence comes his conclusions that we should seek in Europe for its origin.³

"I do not pretend to contradict this, but the first discovery of the Swastika on the hill of Hissarlik determines that this was not its place of origin. When came this mysterious sign which we see at Troy? To what rite does it belong? Where did it originate? These are questions we would like to have answered. In the present state of our knowledge, the question is insoluble. One point excites my interest, that is the long persistence of the Swastika and its rapid diffusion throughout such different regions. I see in this an important argument in favor of the unity of the human species. This argument should be further presented and such facts produced as justify it.

"An infant, the child of a savage, might amuse himself by tracing in the sand or on stone, or on the first object that came under his hand, squares and circles and crosses, and lines, making all imaginable angles; with progress the child can reproduce the images of his mind, the scenes that strike him most, even to bizarre figures which are due only to his imagination. He will not produce a sign as complicated as the Swastika unless he has it or has had it before his eye, or unless it shall have been transmitted to him by his ancestors. It is puerile to explain its presence in so many and such widely separated regions by the theory of the identity of the psychologic state among human races which have the same rudimentary culture.

¹ M. Reinach afterward recognized that the Swastika mentioned by Goblet d'Alviella on certain ingots of silver in the form of dominoes, serving as money, and also those with inscriptions in honor of Acoka, belonged to the third century B.C.—"L'Anthropologie," 1894, p. 248.

² Flinders Petrie has found at Naukratis certain vases ornamented with the Swastika (Third Memoir Egyptian Exploration Fund), but this pottery appears to have been imported from Caria or from Cyprus. Stuffs ornamented with the same sign have also been discovered at Panopolis, Upper Egypt, but these have been attributed to Greek workmen who were numerous at Coptos, a neighboring village where Clermont Ganneau has recently discovered a Greek inscription.—"Acad. des Inscriptions," March 5, 1897 (Forrer, "Die Graber und Textilfunde von Achmin Panopolis").

³ "As for India, everything induces the belief that the Swastika was there introduced from Greece, from the Caucasus, or from Asia Minor, by routes as yet unknown."—Goblet d'Alviella, "La migration des symboles," p. 107.

"The mysterious Swastika¹ figured on the idols and spindle whorls² of the ancient Dardania, on the diadem of the daughters of Priam, and on the numberless objects from the early cities on the hill of Hissarlik,³ in the sacred temples of India as on the bas relief of Ibriz, attributed to the Hittites,⁴ on Celtic funeral urns, and on the hut urns of Albano or Corneto, a curious imitation of the habitations of the living wherein they have piously deposited the ashes of the dead.⁵

"We see the Swastika on the balustrades of the porticos of the temple of Athena at Pergamos, on the sculptured ceiling of the Treasury at Orchomenos, on the vases of Milo and Athena, those of Bologna, the ancient Felsina of the Etruscans,⁶ of Caere (Cervetri),⁷ Cumes,⁸ Cyprus,⁹ and on the pottery gathered at Konigswalde on the Oder; on a golden fibula of the Museum of the Vatican, and a copper fibula of the Royal Museum of Copenhagen.

"It is encountered in the most ancient paintings of the catacombs of Rome, on the tunic of the Bon Pasteur,¹⁰ and on the archbishop's chair of St. Ambrose at Milan, where it is associated with

¹ Sometimes the arms of the Swastika turn to the left, to which Professor Max Müller says has been given the name Suavastika. (Mr. Virchand R. Gandhi reports that while studying an ancient Sanscrit philosophy, in the British Museum library, he found the word Suavastika in connection with Swastika.—T. W.)

² The number of these objects casts a doubt upon their use as spindle whorls only. They have been religious objects, a sort of ex-voto, for example.

Hindus paint it in red on their houses at the beginning of the New Year, and make it with flour or sacred rice upon a table or stand when entering a house or church as a sign of good luck or good wishes, or the occasion of a wedding or fête.¹

"The diffusion of a sign so complicated as the Swastika throughout all time and in all countries is something to be remarked, and of which we should recognize the importance. Our astonishment is doubled when we find the same symbol among the Ashantes on the western coast of Africa,² and see it figured in America among the most ancient civilization of which we have any knowledge. By what migration has it crossed the Atlantic, by what migrations has it penetrated such distant countries and appeared among races of men so different? And if, as we believe, all these representations are due to an indigenous art, either Indian or African, where did they obtain their model? Our ignorance on these points is complete, and the most we can do is to give a résumé of the principal known facts.

"The Swastika has been found engraved on a shell from a mound in Tennessee which contained thirty-two human burials,³ on plates (five) of copper from the mounds of Chillicothe, Ohio,⁴ a stone hatchet from Pemberton, N. J., on an Arkansas vase in the National Museum, on a silver ornament, the authenticity of which appears incontestable, and which was shown in 1887 at the reunion of the Association Française at Toulouse.⁵

"Nordenskiöld cites numerous examples of the Swastika, now engraved in straight lines, other times indicated by dots, among the

¹ It has been contended by some persons that the triskelion was an evolution from or to the Swastika—the triskelion of three human legs bent at the knee and joined at the thigh. It is found on the Lycian coins about 480 B.C., and thence was carried by Agathocles to Sicily. (Barclay Head, "Coins of the Ancients," Plate XXXV.) It is also found on a vase from Agrigentum. (Waring, "Ceramic Art in Remote Ages," Plate XLII.) Newton explains how the symbol (triskelion) is found on the arms of Sicily, and also those of the Isle of Man. ("Athenaeum," September, 1892.) The Duke of Athol, proprietary of the Isle of Man, sold in 1765 his right to the Crown of England, but because he had been its sovereign he kept the triskelion in his coat of arms.

² "It is not possible to admit," says Count Goblet d'Alviella ("Migration des symboles," p. 108), "that this has been spontaneously conceived and executed. Of all a priori hypotheses, this is certainly the most difficult to accept."

cave dwellers of Mesa Verde, and the same is done by Max Müller in Yucatan and Paraguay, while other savants have found it among the Huacas of Peru and among savage tribes of Brazil, where the triangular pieces of pottery, sometimes bearing the mysterious Swastika sign, often form the only dress of the women.¹

"We find it in the paintings of the Navajos² and on the ornaments of the Pueblo Indians, while the Sac Indians of the Southwest wear it on their collars and garters on occasion of their religious fêtes, although it is not possible that they should know the sense which is attached to it,³ and the Wolpis paint it on their dance rattles.⁴

"I have omitted to treat of numerous figurines ornamented with the Swastika in the hope to find an explanation of this mysterious symbol. We find it engraved on a figure of Buddha in the United States National Museum,⁵ on the base of a bronze Buddha from Japan, and on a vase in the Kunsthistorische Museum of Vienna where it figures on the breast of Apollo.⁶ Astarte bears it on her arms and shoulders,⁷ Adonis on his arms, a follower of Aphrodite, on her robe,⁸ a centaur from Cyprus on his right shoulder.⁹ In a rude representation of Apollo directing the car of the sun it is found on the wheels of the chariot.¹⁰ A female statue in lead found at Troy wears a triangular covering over the ulva, the center of which bears a Swastika.¹¹ Numerous cinctures or girdles worn by women bore this same Swastika sign. Does this not indicate that it may have been regarded as an emblem of the generative forces of nature?

"But we will not venture further in our researches for the signification of a sign so obscure as is the Swastika. Probably (and the figurines just mentioned give this hypothesis a semblance of

truth) it was a religious emblem, an amulet consecrated by the varied superstitions of man, as is the hand with the fingers raised a survival of an ancient Chaldean symbol which is worn to-day by the Italians, as is the little pig by the Parisians.¹ Was it dedicated to the living sun; to Zeus or Baal; to Astarte or to Aphrodite; to Agni, the god of fire; or to Indra, the god of rain; or, still further, to Vishnu or to Siva, the Hindu representatives of creation and destruction? All these hypotheses are possible; more than this, all of them are probable, for the signification of Swastika has singularly varied according to the time and to tradition.² Those persons who in the actual state of our knowledge pretend to formulate general conclusions are sadly in error.

"I approach the end of my task. By the side of the similarity of the anatomic structure of man in all times and of all races, I have sought to place the similarity of his genius, as proved by the identity of his conceptions. The ossuaries which contain the remains of his predecessors, the custom of coloring his bones red after they had been denuded of their flesh, the mysterious sign to which we have given the name Swastika, and other conceptions, other almost universal creations, which it would be easy to add, all tend toward the confirmation of the knowledge given to us by the earliest arms, the first tools and implements of flint, and the most ancient pottery. We believe it impossible to misapprehend or mistake the multiplied proofs that flow from modern researches, all of which affirm with an irrefutable eloquence the unity of the human species."

Among the very ancient symbols of the Orient we find the Pentalpha, or five-pointed star. In one of the illustrations in the *Iconographic Encyclopædia* of the late Professor Baird, President of the Smithsonian Institution, who succeeded Professor Henry, we observe that the Pentalpha occupies the most conspicuous place. That picture represents the universe, *viz.*, the great celestial serpent forms a circle having the tail in its mouth, at the top; diametrically opposite, at the bottom the serpent twists the body in a large coil; upon this coil is a huge tortoise; on the back of the tortoise stand

¹ W. W. Rockhill ("Diary of a Journey through Mongolia and Tibet," 1891-92) cites the Tibetan who had a Swastika tattooed on his hand.

² Sewell ("Indian Antiquary," July, 1881) presents innumerable hypotheses to which the Swastika has given rise. To cite but one: Mr. Cunningham, a distinguished savant, believes the Swastika to have been a monogram.

four elephants occupying the four cardinal points; on these elephants rests the earth, which is flat on the bottom and hemispherical on the top; above the earth are represented concentrically the seven heavenly spheres; immediately above the uppermost sphere, and suspended from the junction of the tail and mouth of the serpent, is the Pentalpha.

The Pentalpha has been so called, because the five (*pente*) points each represented the Greek letter Alpha (A). It was called Hygeia or symbol of health by Pythagoras.

We refer our readers to Book IV., Chapter IV., pages 1755 to 1783—and especially on pages 1781 to 1783—wherein we have shown the connection between some of the symbols now employed in our modern Masonic system, with those of the remotest antiquity, and have made frequent references to Dr. Mackey and to his predecessor, Dr. Oliver, from whose works on symbolism we have freely quoted such passages as would demonstrate our subject.

The writer of this treatise on Symbolism has endeavored to place before the reader the intimate relation between all the forms of language, as displayed by man, from the earliest ages, in the crudest efforts to convey his ideas to others, down to the perfected forms of animal life, as displayed in the unnatural compositions in the cherubim, which was shown first to Moses, and subsequently to the prophets Ezekiel and Isaiah, as described in the text.

We can give no further explanations than those taken from ancient writers, as, down to the present day, they are as mysterious as they have always been in every age of the world, like the image of the veiled Isis in her temple on the island Philæ in Egypt, with the following inscription: "I am that which was, which is, and which is to come, and no mortal hath lifted my veil" .

PART FIVE

ANCIENT AND ACCEPTED SCOTTISH RITE
ROYAL ORDER OF SCOTLAND

ANCIENT AND ACCEPTED SCOTTISH RITE

CHAPTER I

THE EARLY HISTORY OF THE SCOTTISH RITE

IN Chapter LI of this work will be found a "History of Christian Knighthood," and in the following chapter, LII, "Knight Templarism in America." In pages 1332 to 1336, Chapter LI, is given the history of the suppression of the "Templar Order," the death of the last Grand Master, Jacques De Molay, and the dispersion of the "Order."

There is no need to repeat in this place the account of the destruction of the greatest of the three great military orders, the "Poor Fellow-soldiers of Christ and Solomon's Temple" as they officially described themselves. On March 11, 1314, the Grand Master, Jacques de Molay, was burned to death in Paris, declaring with his last breath that the confessions wrung from him and other knights by torture were untrue, and that the order was innocent. The Papal Bull, issued by Clement V. the year before, had suppressed the order and transferred its estates to the Knights Hospitallers, or Knights of St. John of Jerusalem, for centuries the bitter foes of the Templars. The Templars who escaped the cruelty of the French King, Philip the Fair, fled to other countries.

From this period until the invention of printing there was a slow but gradual increase in learning, which was mostly confined to the priesthood; very few, even of the nobility, could read or write; hence they employed as chaplains the learned class of the clergy, who conducted all of their business affairs, and became domesticated in their families. After the invention of movable type and the increase of books, "learning" became more popular, and by the polit-

ical changes in the kingdoms of Europe there were important improvements in science and the arts brought about, so that from the close of the 14th century to the death of Charles II. of England, very important events had taken place and an entire revolution of society had occurred, growing out of the "Reformation" in religion. The great fire in London—although a local affair—had its effects upon other parts of Europe. The reconstruction of the city of London—and particularly of the religious edifices—produced a revolution in architecture under the supervision of Sir Christopher Wren, who was appointed by Charles II. as superintendent of all the public buildings after the great fire. Under the sanction of the King, Wren visited the continent and became familiar with the classic orders of architecture, of which there were few examples in England. There is no doubt that the great cathedral of St. Paul's in London, in its order of architecture, was a copy of St. Peter's in Rome.

Sir Christopher Wren has often been called by Masonic writers a Grand Master of Masons, but there is no evidence whatever that he was even an Apprentice Mason when he became the government architect or "Superintendent."

Lessing, the German critic, goes so far as to describe Wren as the inventor of Speculative Masonry, but later investigators affirm that while Inigo Jones, the great architect of so many noble buildings in England, is claimed to have held a place in the Masonic order, yet Sir Christopher Wren is only mentioned in a professional capacity. As the first code of Masonic laws and the first items of Masonic history were published by authority, it may justly be inferred that the triumvirate of compilers had no knowledge of his having ever been a member of the Society. The English Freemasons of the period of the so-called revival of 1717 seemed to have found no reason to believe in Wren's connection with the Society. Wren was one of the most eminent men of the time, "a prodigy of universal science," President of the Royal Society, the builder of the new cathedral of St. Paul's, London, and numerous colleges and other buildings, and, more than all, the rebuilder of London after the Great Fire, and it would be strange that the initiation or affiliation of such a distinguished man as the King's Architect should have been forgotten by the lodges of Masons subsisting when the revival of 1717 took place.

The invention of new degrees was continuous, in the countries of Europe, during the middle portion of the 18th century, but most of them were worked to a limited extent only and soon passed into oblivion. The three degrees of Entered Apprentice, Fellow Craft, and Master Mason were the source from whence this prolific development of degrees sprang, and these three degrees were selected, with twenty-two others, to compose a Rite which was destined to retain its vitality, and to spread its influence, throughout the world. This Rite was known as the "Ancient and Accepted Rite."

There have been various accounts of the manner in which these degrees were selected and arranged in the so-called "Rite of Perfection." The most reasonable statement is as follows:

The Chevalier de Bonneville established a chapter of twenty-five degrees of the so-called High Degrees in the College of Jesuits of Clermont, in Paris, in 1754. The adherents and followers of the House of the Stuarts had made the College of Clermont their asylum, they being mostly Scotchmen. One of these degrees being the "Scottish Master," the new Body organized in Charleston, S. C, in 1801, gave the name of "Scottish Rite" to these degrees, which name ever since that time has characterized the Rite all over the world, of which more anon. The name previously given to these degrees was the "Rite of Perfection," or the Ancient and Accepted Rite.

The Marquis de Lernaïs carried these degrees to Berlin in 1758 and they were introduced into and adopted by the Grand Lodge of the Three Globes. The Rite was revived in Paris that year under the authority of the "Council of Emperors of the East and West." In consequence of the interference of the Jesuits, who, finding that their former efforts had not succeeded in finally suppressing the Rite, again forced themselves into the Rite and "sowed seeds of dissension," the result was that a new organization was formed called the "Council of the Knights of the East; "and as a consequence a rivalry sprung up between these two bodies and the Grand Orient of France. In 1781, however, both of these bodies became incorporated with that Grand Body which held the Rite of Perfection within itself.

In 1762 it is asserted that Frederick the Great, who had taken under his patronage all of Masonry in Germany, formed and promulgated what have been known ever since then as the Grand Constitutions of 1762.

The "Rite of Perfection," which for a quarter of a century, with many struggles, had not fully accomplished the work proposed for it by its authors, was improved, it is said, by Frederick himself, by a reorganization and reconstruction which placed it on a higher standard in its philosophy and in its teachings; that eight other degrees were added to it, and the name was changed to "The Ancient and Accepted Scottish Rite of Freemasonry," and that the Grand Constitutions of 1786 were ratified and signed by Frederick in Berlin, in May of that year.

By these Constitutions of 1786, Frederick the Great resigned the authority he had held from 1762 as Grand Commander of the Order of Princes of the Royal Secret, and Supreme Chief of the Scottish Rite or of Perfection. His Masonic prerogatives were by the same document deposited with a council for each nation, to be composed of Sovereign Grand Inspectors-General of the Thirty-Third and last degree of legitimate Freemasonry, limited in numbers to that of the years of Christ on earth.

The Grand Constitutions formed in 1762 were ratified in Bordeaux, October 25th of that year, and were proclaimed as the governing laws for all the several Bodies of the "Rite of Perfection" over the two Hemispheres.

Prior to this, in 1761, Stephen Morin was invested with power by the Grand Consistory of Sublime Princes of the Royal Secret in Paris, on the 27th of August, 1761, to carry the "Rite of Perfection" to America. He received a Patent, as his credential, of which the following is a copy:

Morin's Patent.

To the glory of the G. A. O. T. U., etc., and by the good will of H. S. H. the very illustrious Brother Louis de Bourbon, Count de Clermont, Prince of the Blood Royal, Grand Master and Protector of all Lodges.

At the Orient of a most enlightened place where reign Peace, Silence, and Concord, Anno Lucis 5761, and according to the common style, 27th August, 1761.

Lux ex tenebris. Unitas, concordia fratrum.

We the undersigned, Substitutes General of the Royal Art, Grand Wardens and Officers of the Grand and Sovereign Lodge of

St. John of Jerusalem, established at the Orient of Paris; and We, Sovereign Grand Masters of the Grand Council of the Lodges of France, under the sacred and mysterious numbers, declare, certify, and decree to all the very dear Bros., Knights, and Princes scattered throughout the two hemispheres, that being assembled by order of the Substitute General, President of the Grand Council, a request was communicated to us by the worshipful Bro. Lacorne, Substitute of our very illustrious G. M., Knight and Prince Mason, and was read in due form.

Whereas our dear Bro. Stephen Morin, Grand Perfect Elect (G. elu parfait) and Past Sublime Master, Prince Mason, Knight and Sublime Prince of all orders of the Masonry of Perfection, member of the Royal Lodge of the "Trinity," etc., being about to depart for America, desires to be able to work with regularity for the advantage and aggrandisement of the Royal Art in all its perfection, may it please the Sovereign Grand Council and Grand Lodge to grant him letters of constitution. On the report which has been made to us, and knowing the eminent qualifications of Bro. S. Morin, we have, without hesitation, accorded him this slight gratification in return for the services which he has always rendered this Order, and the continuation of which is guaranteed to us by his zeal.

For this cause and for other good reasons, whilst approving and confirming the very dear Brother Morin in his designs, and wishing to confer on him some mark of our gratitude, we have, by consent, constituted and invested him, and do by these presents constitute and invest him, and give full and entire power to the said Bro. Stephen Morin, whose signature is in the margin of these presents, to form and establish a Lodge in order to admit to and multiply the Royal Order of Masons in all the perfect and sublime degrees; to take measures that the statutes and regulations of the Grand and Sovereign Lodge, general or special, be kept and observed, and to never admit therein any but true and legitimate brothers of sublime Masonry.

To rule and govern all the members who shall compose his said Lodge, which he may establish in the four quarters of the world wherever he may arrive or shall sojourn, under the title of Lodge of St. John, and surnamed "Perfect Harmony;" we give him power to choose such officers as he may please to aid him in ruling his

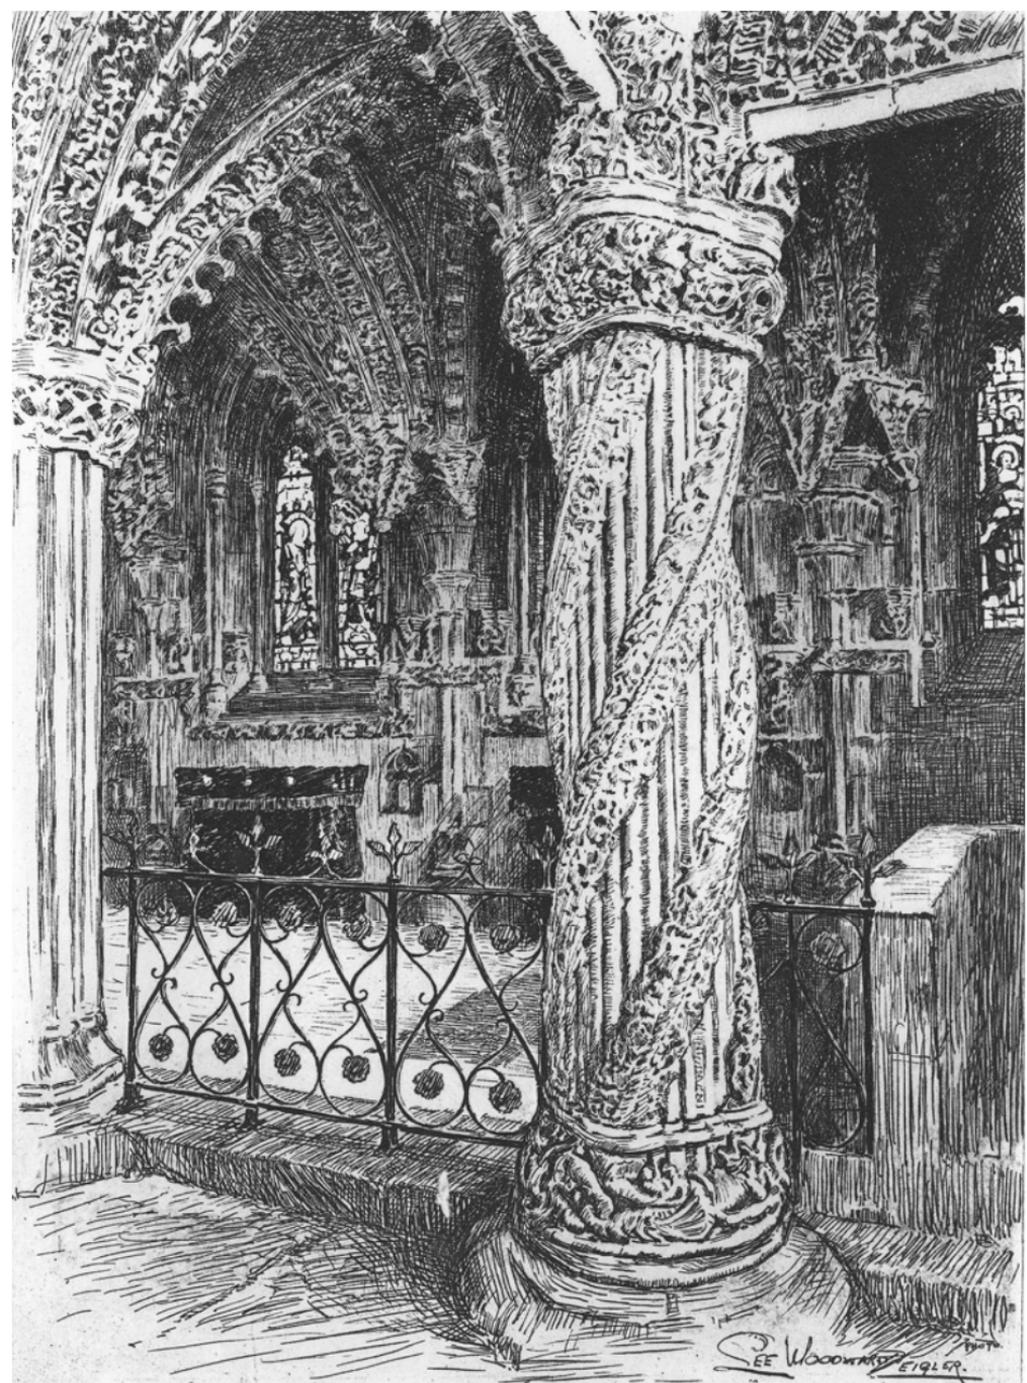

Lodge, whom we command and enjoin to obey and respect him; do ordain and command all Masters of regular Lodges of whatsoever dignity, scattered over the surface of land and sea, do pray and enjoin them in the name of the Royal Order, and in the presence of our very illustrious G. M., to acknowledge in like manner as we recognise our very dear Bro. Stephen Morin as Worshipful Master of the Lodge of Perfect Harmony, and we depute him in his quality of our Grand Inspector in all parts of the New World to reform the observance of our laws in general, etc., and by these presents do constitute our very dear Bro. Stephen Morin our G. M. Inspector, authorising and empowering him to establish perfect and sublime Masonry in all parts of the world, etc., etc.

We pray, consequently, all brothers in general to render to the said Stephen Morin such assistance and succour as may be in their power, requiring them to do the same to all the brothers who shall be members of his Lodge, and whom he has admitted and constituted, shall admit or constitute in future to the sublime degree of perfection which we grant him, with full and entire power to create Inspectors in all places where the sublime degrees shall not already be established, knowing well his great acquirement and capacity.

In witness whereof we have given him these presents, signed by the Substitute-General of the Order, Grand Commander of the Black and White Eagle, Sovereign Sublime Prince of the Royal Secret, and Chief of the Eminent Degree of the Royal Art, and by us, Grand Inspectors, Sublime Officers of the Grand Council and of the Grand Lodge established in this capital, and have sealed them with the Grand Seal of our illustrious G. M. His Serene Highness, and with that of our Grand Lodge and Sovereign Grand Council. Given at the G O. of Paris, in the year of light, 5761, or according to the Vulgar Era, 27th August, 1761. (Signed) Chaillon de Jonville, Substitute-General, W. M. of the first lodge in France called "St. Thomas," Chief of the Eminent Degrees, Commander and Sublime Prince of the Royal Secret. Bro. the Prince de Rohan, Master of the Grand Lodge "Intelligence," Sovereign Prince of Masonry. Lacorne, Substitute of the Grand Master, W. Dep. M. of Lodge "Trinity," Grand Perfect Elect, Knight and Prince Mason. Savalette de Bucheley, Grand Keeper of the Seals, Grand Elect, Grand Knight and Prince Mason. Taupin, etc., Prince Mason, Brest-de-la-Chaussée, etc., W. M. of the Lodge "Exactitude," Grand Elect

APPRENTICE'S PILLAR

Roslyn Chapel, near Edinburgh, Scotland

Perfect Master, Knight Prince Mason. Count de Choiseul, etc., Prince Mason Boucher de Lenoncourt, etc., W. M. of the Lodge "Virtue," Prince Mason.

By order of the Grand Lodge. Daubertin, Grand Elect Perfect Master and Knight Prince Mason, W. M. of the Lodge "Saint Alphonse," Grand Secretary of the Grand Lodge and of the Sublime Council of Prince Masons in France, etc.

The first soil which Morin touched on his mission to America was San Domingo, and afterward, on his arrival at Kingston, Jamaica, he appointed Henry Francken a Deputy Inspector-General.¹ Later on other appointments were made by him to this office, and these Deputies he supplied with copies of the Grand Constitutions, which had been adopted in 1762. Soon after his appointment Francken visited the North American Colonies, where he gave an appointment of Deputy Inspector-General to Moses M. Hayes, at Boston, Mass.

Francken established under his commission from Morin a lodge at Albany, N. Y. This was a Lodge of Perfection of the 14th Degree. On December 20, 1767, he conferred the degree of Sublime Prince of the Royal Secret, the 25th Degree of the Rite, on several Brethren of the order. This lodge seems not to have prospered, and was nearly forgotten when in 1822 Giles Fonda Gates, one of the most active Brethren of the Northern Masonic Jurisdiction, discovered the original Warrant, together with some patents of the Brethren of the body, and its books of record.

This was, no doubt, the very first body of the "Rite of Perfection" ever planted on the Continent of North America, and there were, doubtless, several such bodies in the Islands of the West Indies.

Those Masons who have progressed beyond the Blue Lodge degrees, and are familiar with the Capitular and Cryptic Rites, as also the degrees of the Commandery and those of the A.: A.: A.: S.: R.: can readily perceive how Thomas Smith Webb was able to manufacture the degrees attributed to him, after his residence in Albany, and his connection with the Masons of that city.

¹ The date is not known, but it must have been between 1762 and 1767.

Brother Da Costa was made Deputy Inspector-General for South Carolina by Hayes in 1781; he also appointed Solomon Bush Deputy for Pennsylvania, and B. M. Spitzer Deputy for Georgia.

Da Costa established in Charleston in 1783 a Sublime Grand Lodge of Perfection.

A Council of Princes of Jerusalem was duly constituted in Charleston, and Meyers, Spitzer, and Frost were present and installed the Officers. The Council of Knights Kadosh was organized in Philadelphia in 1796 by refugees from San Domingo. When France again assumed authority over San Domingo, these Brethren returned home and the council became dormant if not entirely extinct.

In New York City a chapter of Rose Croix (18th Degree) was established in 1797, the Grand Constitution of 1786 and the ritual of the eight added degrees having been received in Charleston at that time. The bodies already established in Charleston accepted the new *régime* and adopted the new degrees, and in 1801 a convention was held and preliminary steps inaugurated to form a Supreme Council of the 33d and Last Degree of the Ancient and Accepted Scottish Rite of Freemasonry.

The name of this new body was "The Supreme Council of Sovereign Grand Inspectors-General of the Thirty-third and Last Degree for the United States of America." It was formed and organized by John Mitchell and Frederic Dalcho, and during the year the full number of members, nine, was admitted.

This new body recognized the Constitutions of 1762, the Secret Constitutions, and the much-discussed Constitutions of 1786.

These latter constitutions are believed to have been approved and ratified by Frederick the Great of Prussia, as Supreme Head and Governor of the Rite, and, as already stated, provide for the government of the Rite, after his death, by a council in each nation. Although these constitutions claim to have been recognized as the Supreme Law of the Rite in 1786, they were not published till 1832, when a French version appeared. A Latin text was published two years afterward which, while agreeing with the French book in essentials, differs in many of the details. It may be broadly stated that the Latin version is more precise, more complete, more in legal form, and, hence, some students have arrived at the conclusion that the Latin constitutions, thus written in a language uni-

versally understood, were the original, while the French version was really an adaptation for the use of the Brethren in France.

But the question whether the French or Latin text is the original is a mere trifle of little importance compared with another vital one, namely: "Were the Constitutions of 1786 ever seen or sanctioned by Frederick the Great? Were they not forged in Charleston?" Those who asserted the falseness of the constitutions made no attempt to demonstrate the commission of forgery at Charleston, but confined themselves to denying that they were ever sanctioned by Frederick. The reasons alleged for this opinion were that in 1786 Frederick was mentally and physically incapacitated for business, and, furthermore, that the names subscribed to the Latin version were fictitious. The injurious suspicions as to the veracity of numerous Masonic statements, caused by the injudicious zeal and the uncritical methods of many Masonic writers, led to the general acceptance of the belief that the constitutions as contained in the Latin version were like many of the stories invented by the arch-impostor, Cagliostro, and others, simply stupid forgeries by men ignorant or careless of historical facts and historical probabilities. This belief, it may be repeated, was held not only by men not affiliated to any Masonic order, but by many Masons of good standing. It was reserved for an American Mason, of the highest degree, Brother Albert Pike, to refute this theory. That eminent Mason, in his *Historical Inquiry*, showed from documents of the period that in 1786 Frederick the Great, while undoubtedly suffering from physical ailments, was still in the habit of attending to business. Brother Pike likewise showed that the names appended to the Constitution of 1786 were those of men who were connected with the Court of Berlin. The result of his investigations, after an extensive and impartial study of all accessible sources of information, was to the effect that the aforesaid constitutions were drawn up at Berlin and duly ratified by Frederick in the year assigned to them. As such they were recognized by the Southern Supreme Council. This refers to the Latin version of the constitutions. Another student of the history of the Rite considers the French version the original, and this is the version which is recognized by the Northern Supreme Council.

Without quoting at length from Bro. Pike's *Historical Inquiry*, it may be advisable to give some of his conclusions. He shows that

when Francken in 1767 introduced the Rite into the American Colonies it was generally understood that the supreme governing power was in Berlin, and that in 1770 the Lodge of Perfection at Albany was directed to transmit reports to Berlin, while, still earlier, a tracing-board made by one of its members displays the double eagle of Prussia as a symbol of the head of the order. Moreover, in 1785, the Lodge of Perfection at Philadelphia drew up an address to be presented to Frederick as head of the order.

The Ancient and Accepted Scottish Rite of 33°, the title of which heads this chapter, like all the so-called Scottish Masonry, has nothing whatever to do with the Grand Lodge of Scotland. No portion of it, except perhaps the Royal Order of Scotland, ever originated in Scotland, nor were any of these so-called Scottish degrees at any time practiced in Scotland. Gould, in his history, applies the word Scots as distinguished from Scottish to show these additions to Freemasonry made on the Continent. These so-called Scottish or Scots degrees seem to have originated about the year 1740 in France. The statement that Irish chapters existed in Paris from 1739, holding their constitutions from the Grand Chapter of Dublin, cannot be accepted. There is no evidence to support it, and Masonic authorities reject it, holding that a much later date must be assigned to all these Irish degrees. Nor must we confuse the "Orient de Bouillon" with these so-called Scots Masons, for that was simply a Grand Lodge established in Luxemburg, years afterward.

What these Scots lodges taught nobody knows and nobody need care. Rituals exist in lamentable profusion, but unfortunately they do not agree. They are, however, all permeated with one notion, the absurdity of which will show the absurdity of the system. They state that some Scottish crusaders found in a vault the long-lost ineffable word, and that in their search they worked "with the sword in one hand and the trowel in the other." This expression is taken from the Hebrew account of the building of the Second Temple of Zerubbabel, and while natural enough as applied to builders, is quite out of place in the case of men rummaging in some subterranean passage. The story of the "long lost, ineffable word" we meet with in the *Arabian Nights*, where we learn that the knowledge of it made Solomon, the King of Genii, able to perform all kinds of marvels. The *Arabian Nights* is the fit place for the story. It

must be remembered, too, that the temple that the Crusaders saw was not Solomon's nor Zerubbabel's, but Herod's, erected a little before the birth of Christ.

At any rate, relying on this fable, the Scots Master claimed to be in possession of the true secrets of Freemasonry, the true history and the real designs of the order. He claimed also to be in every way superior to the Master Mason, and to hold various peculiar privileges.

In utter contempt for the great principle on which Freemasonry is founded, the perfect equality of all its members with a governing body elective and representative, the Scots Masters claimed to rank before the W. M. of any lodge even when they were only present as visitors. They claimed the right to wear a distinctive dress and to remain covered even in a Master's Lodge. They claimed to impart the secrets of the E. A., F. C., and W. M. degrees, personally and either with or without ceremony as the whim seized them. They would not, if they were members of a lodge, permit anyone but other Scots Masons to sit in judgment upon them. Matters became still worse when the Scots Lodges were "grafted on the ordinary Lodges," and increased in number and in arrogance. In these cases the W. M., instead of being elected by the lodge, was nominated by the Scots Lodge, and as was inevitable, he was almost always one of themselves. All questions of ritual and doctrine were decided by the Scots Lodge, all the finances were managed by the Scots Lodge, in fact all the governing powers were usurped by the Scots Lodge. Nay, the Scots Lodge went so far as to arrogate to itself all the powers of a Grand Lodge, and as such to issue Warrants of Constitution. From the exercise of these powers arose the so-called Scots Mother Lodges which became so numerous in France, each Mother Lodge claiming and exercising the right of granting constitutions and warrants to other lodges, and of developing systems of degrees peculiar to themselves, and worked in chapters all independent of each other. France, it has been said, was the inventor of all these novelties, and the most important of its Scots Mother Lodges was the one established in Marseilles in 1751 under the title of St. John of Scotland. To give it some ground for calling itself Scots, it professed to be founded by a traveling Scotsman, and proceeded to grant warrants to a large number of lodges in France and elsewhere. From it descended another so-called Mother Lodge, the Mother Lodge of the county of Venaissin, with its seat

at Avignon, which in turn became the mother of the Scottish Philosophic Rite. In all these new systems not only was the true original and beautiful simplicity of the Craft overlaid and disfigured by foolish legends and childish ceremonies, but to quote Br. Gould, "the governing power is autocratic and irresponsible, a hierarchy is formed, the highest class rules all the others, and directs the lower classes without appeal from those below it." France, we have seen, may be considered as the inventor of what a German historian of Masonry calls "the lying fictions" of the so-called High Degrees, and in the 18th century, as in the present, set the fashion to Europe. The arch impostor Balsamo, who called himself the Count Cagliostro, was in the height of his reputation, preaching the doctrines of his Egyptian Masonry, of which he made himself the Grand Cophta; his dupes were persons of the highest rank, and speedily a flood of imbecile mysticism overwhelmed most of the lodges on the Continent of Europe. From France it spread to Germany, and the name of its introducer into the Empire is given as a Count von Schmettau. In Berlin the members of the lodge entitled the Three Globes erected a Scots Lodge in 1741, Hamburg followed with a Scots Lodge or two in 1744, and the Saxon city of Leipzig in 1747, and the Free City of Frankfort followed suit in 1753. It is stated that between 1742 and 1764 no fewer than forty-seven such lodges were erected in Germany. These Scots Lodges, however, were soon absorbed by the Clermont system with its low chapter degrees, which system in its turn was absorbed by the Templar system of "Strict Observance." Even now, some of these Scots Lodges, according to Mr. Gould, form the basis of the German Grand Lodge Systems, styled the "Inner Orient."

To France and to the Scots Lodges in France must be assigned the manufacture of those new degrees which connected the Scots Masons with the Knights Templars and thus gave life to the whole system of Templarism. It was an age of disbelief and credulity, of sensuality and mysticism, of the hardest common-sense and the wildest tomfoolery. It was an age of unrest, of decay, and a longing for a new birth, and the teachings of history were scorned, and every fable—the more improbable the better—was eagerly accepted, till men really believed that there was some foundation for the legend that the Military and Religious Order of the Temple, in spite of its having perished in fire and blood, had in some unknown way,

preserved a germ of vitality for some four hundred years. In 1741 a degree called the Kadosh degree, representing the Vengeance of the Templars, was invented by the Masons of Lyons, and henceforth all the new rites of French origin contain Knightly and almost all Templar degrees, the connection being in all instances formed by some of the Scots degrees. The German Handbook enumerates over sixty-eight such degrees in various rites, and it is probable this list could be extended. The name Scottish, too, is assumed by many rites to designate the whole system, for instance the Scottish Philosophic Rite. The above-mentioned system of the chapters of Clermont was a Templar continuation of the Scots degrees, and grew into the so-called Emperors of the East and West, and finally developed into the "Ancient and Accepted Scottish Rite 33°."

It was on the Continent of Europe that these innovations on the simple ceremonies and beneficial doctrines of the Craft spread out most luxuriantly. Under the assumption that the Scots lodges could issue warrants of constitutions, whole swarms of irresponsible lodges were formed, in which the principles of the Craft were little considered. From this period may be dated the enmity of the Church and the Kings of Europe to any association that bore the name or claimed any affiliation with the Freemasons. There is no doubt that most of these lodges became political centers of social and political conspirators. In the hierarchy of these rites, each class is self-elected, and thus admits only those it pleases, while the lower classes have no voice in the management of their affairs or in the election of their rulers.

Our limits will not permit any very extended reference to the varied changes in these so-called "High Degrees" prior to the full establishment of the Ancient and Accepted Rite; but we must mention the most important events, that the reader may appreciate the subsequent and final establishment of the Ancient and Accepted Scottish Rite, which took its origin, as such, in Charleston, S. C, in 1801, and the formation of the very first "Supreme Council of Grand Inspectors General of the 33d degree, in South Carolina," with Colonel John Mitchell Sov. Grand Commander.

From all the authorities which have been examined, in respect to the Chapter of Clermont, the system of Masonry therein prac-

ticed gives no definite information. Thory, who wrote sixty years subsequently, states that Chevalier de Bonneville founded a chapter on November 24, 1754. Brother Gould, in his history of this chapter, denies the statement of Thory, that Von Hund took the Templar degrees in that chapter, as he had left France for the last time in 1743, or eleven years previously, and erected his first Templar Chapter in Unwurde in 1751.

Thory also says: "The Chapter was based on the three degrees of Freemasonry, and the Scots or St. Andrew degree, and worked three higher, 5°, the Knight of the Eagle or Select Master; 6°, the Illustrious Knight or Templar; 7°, the Sublime Illustrious Knight."

The Chevalier de Bonneville, mentioned above, is probably the same person as the Count de Bonneville who founded in 1760 a lodge in the Nouvelle France, near Paris, which is described as being brilliantly conducted and frequented by persons of high rank. The difference in the titles given to Bonneville can be explained by the old French system by which a younger son was styled Chevalier until by the death of older members of the family he attained the higher rank of Count, and such deaths may have occurred between the two dates of 1754 and 1760. Not much information can be found respecting the doings of this lodge created by M. de Bonneville, and it is probable that Kloss's opinion of it referring to the "Emperors of the East and West" is the nearest to the truth. As to the "Emperors of the East and West," an account will be given later. While the history of the Rite, as far as France is concerned, is obscure, its history in Germany is more important.

We will now briefly state the Masonic affairs of Germany in connection with this "Chapter of Clermont." In 1742 the members of the "Three Globes" erected the Scots Lodge "Union" to work the fourth or Scots degree. The Baron Von Printzen was, in 1750-54 and 1757-61, W. M. of the Mother-Lodge "Three Globes" of Berlin; *i.e.*, he was *ex-officio* Grand Master of all the lodges of "Three Globes." In 1757 the French Marquis Gabriel Tilly de Lernaïs came to Berlin as a prisoner of war, and in 1758, with Printzen, founded a chapter of the three Clermont degrees, grafted upon the Mother-Lodge of the "Three Globes," and the Scots Lodge "Union." On June 10, 1760, this chapter constituted the chapter "Sun" at Rostock; and on July 19, 1760, took

the title of "Premier Grand Chapter of Clermont in Germany." Philip Samuel Rosa was appointed to travel over the north of Germany, to bring the lodges under the control of the "Three Globes" and to institute chapters. A fourth chapter was constituted by Rosa at Stettin, March, 1762; he then, subsequently, instituted eight others, in different cities, until in June, 1763, his career was terminated by being expelled from the Craft; his successor, Schubarth, instituted the last and fifteenth German chapter of Clermont, at Magdeburg, November 27, 1763.

It has been thought by some writers that the name of Clermont was derived from the College of Jesuits of that name. Brother Gould, however, does not concur therewith, and says: "I am unable to believe that the Jesuits could have consented to glorify the Knights Templars, nor can I see anything new in these degrees, being, as they were, merely amplifications and rearrangements of previous ones. I prefer to consider the title a delicate compliment to the Duke of Clermont, Grand Master of French Masonry from 1743 to 1770."¹

Inasmuch as the "Knights of the East" was a body of "improved" Masonry about that period, it becomes proper to give some account of that organization, and we are again indebted to Brother Gould above all other authors for his very impartial examination into the history of not only this particular body, but also in that connection all of those systems which flooded the Continent about the middle of the 18th century and toward the close of it.

The only real attempt to arrive at the facts, in regard to this early system, was made by Dr. Kloss. Other writers had overlooked the separate existence of Masons, who were called "Sovereign Princes of Masonry," "either confusing them with certain special degrees of other systems, or treating them as an offshoot of the Emperors of the East and West." Even the usually diffuse *Handbuch* is excessively meager in the information which it supplies. Yet if Kloss's extensive and minute researches are to be given their just weight, it is to the rivalry between the Knights and the Emperors that must be attributed the sorrowful picture of discord presented by the Grand Lodge of France, 1760-80.

¹ Gould, vol. v., p. 95.

In 1754 the Grand Lodge of the members of the Chapter of Clermont had been founded, and in the following year the Grand Lodge of France acknowledged the privileges which were claimed to be possessed by the so-called Scottish Masons. This action may probably have been with a desire to counterbalance the influence of the Chapter of Clermont. This chapter seems to have been decidedly of an aristocratic order, and to have enrolled as its members only the high nobility, members of the Court circle, high officers in the military and other professions reserved to nobles, while all less favored individuals were refused admission to it. It was a period in French history when the lower noblesse, and the noblesse of the robe, as the highest lawyers or judges were entitled, as distinguished from the noblesse of the sword, the designation of the old feudal nobility, with its military traditions, were striving to obtain great influence and higher recognition in the social hierarchy. It was from this class of the lower nobility and less highly placed officials that the association of "Knights of the East, Princes and Sovereigns of Masonry" was formed in 1756. Its separate subdivision took the name of colleges, each of which bore the name of its president. The chief college was that of Valois of Paris. If this college followed the usage of its fellow colleges, Valois must have been a man who as yet remains undiscovered. Under these circumstances, it is more probable that the name is taken from the province of the Valois, adjoining the Isle of France, in which Paris is situated, and which gave its name to the royal family that sat on the throne of France from Francis I. to Henry III. Be this as it may, some names of these Knights of the East survive, and they clearly show that the association was recruited mainly from the lower nobility and the upper middle class. The occurrence of a name like Baron Tschadi is no objection to this view. In the first place, the name shows he was not a Frenchman, and in the second place the title baron was that reserved to the richer members of the mercantile or financial class.

The statutes of the Rite are elaborate; one article provides that the position of Sovereign shall be held for the space of one year by each member in turn. Another article, No. 7, decrees that the Knights of the East are the born princes of the complete order, just as the Scottish Masters are the Grand Superiors of the Masonic Order. The next article lays down the doctrine that if a Knight of

the East comes in his travels to a place where no lodge of the Rite exists, he may dispense the light of the first six degrees to a Master Mason. The term "first six degrees" implies that the degrees were more than that number, and that therefore there were at least seven degrees beyond that of Master, or ten degrees in all, thus working three degrees higher than the Chapter of Clermont.

The dominant position of the College of Valois in the Knights of the East was lost in 1762, as the result of an intestine quarrel. Its place was taken by a Sovereign Council of the Knights of the East, of which the following officers of the Grand Lodge of France were members: The Grand Keeper of the Seal, Brest de la Chaussée; the President, one of the Wardens; the Grand Orator, the Secretary General and the Grand Secretary. The prime mover of this resolution is said to have been a Parisian tailor named Poilet, but this is improbable, as in 1764 we find a Poilet acting as a leading member of the rival Emperors, and his humble profession would certainly have excluded a tailor from the aristocratic Emperors. There is reason, however, to believe that from this period the aristocratic Emperors of the East and West lost much of their influence in Grand Lodge, while the lower class Knights gained power. The old rivalry still went on and in 1766 the Knights sustained a defeat from the Emperors and many of their members were expelled. The Sovereign Council of the Knights of the East retaliated by a circular in which it requested all lodges to cease working Templar degrees. The Knights evidently did not do so. The Emperors of the East and West, as they were an offshoot and continuation of the Chapter of Clermont, certainly did so. The quarrels of the Emperors and the Knights continued and grew more bitter, till it became necessary in 1767 for the Government to issue an edict dissolving the Grand Lodge. From that the Knights of the East, as a body, sank into insignificance.

CHAPTER II

THE ORIGINAL SUPREME COUNCIL

THE very first Supreme Council of which we have any knowledge whatever, either by tradition or history, was the one organized by John Mitchell, Frederic Dalcho, Emanuel De La Motta, Abraham Alexander, Major T. B. Bowen, and Israel Delieben, at Charleston, S. C., May 31, 1801. This was a transformation of the former "Rite of Perfection," or Ancient and Accepted Rite.

The Brethren who constituted this new Rite were all members of the several Constituent Bodies, which derived their Masonic life, and *constituted* authority from Morin through his Deputies duly appointed by him to propagate the Rite on the American Continent, or more extensively the Western Hemisphere.

The pedigree is as follows: Morin commissioned Francken, and Francken commissioned Moses M. Hayes, Moses M. Hayes commissioned Barend M. Spitzer, and the latter, on April 2, 1795, commissioned John Mitchell as Deputy Inspector-General, reciting in his patent of commission that he does so by authority of the Convention of Inspectors held in Philadelphia, June 5, 1781. This new Rite, which came into the world apparently fully developed, was really a transformation of the Rite of Perfection.

To show conclusively as to when the Supreme Council of the 33d and last degree was organized, we are permitted to furnish herewith a *facsimile* copy of the "Register" of the several bodies of the A.: A.: A.: S.: R.: which met in the city of Charleston, S. C., in 1802. The original is in the Archives of the Supreme Council of the Southern Jurisdiction in Washington, D. C.

CHAPTER III

THE SCOTTISH RITE IN THE UNITED STATES

COUNCIL of Princes of Jerusalem was duly constituted in Charleston, February 20, 1788, and Brothers Joseph Meyers, Behrend M. Spitzer, and A. Forst installed the Officers.

Notwithstanding that in planting the Scottish Rite, or, as it was then known, the "Rite of Perfection," in many States, by the appointment of Inspectors, who had only received what was at that early date recognized as the 25th Degree or "Prince of the Royal Secret," the Rite was only worked in Charleston. In consequence of the zeal of the Brethren in that city and their devotion to the Rite, we owe the foundation of the first bodies, as shown in the fac-similes given, the last one being the "Supreme Council of the 33d and last degree of the Ancient and Accepted Scottish Rite, Mother-Supreme Council of the World." A council of Knights Kadosh was organized in Philadelphia in 1796, by Masons who were refugees from San Domingo, during the negro insurrection on that island. This body soon ceased to exist, in consequence of the return of the Brethren to that island very soon after its organization.

In New York, in 1797, a chapter of Rose Croix was instituted.

In 1792 it is said a Lodge of Perfection was formed at Baltimore, Md., by Henry Wilmans.¹ There is no certainty as to his authority for such establishment. Brother Edward T. Schultz gives a list of seventy-six members. There was also a Lodge of Perfection at Albany, N. Y., which was in accord with the symbolic lodge, and at one time had the same Brother for Master; and we notice also that the symbolic lodges in Philadelphia were in union with the Lodge of Perfection in that city.²

¹ "History of Masonry," by Edw. T. Schultz, vol. vi., p. 1555.

² There is an old volume in the archives of the Supreme Council of the Southern Jurisdiction, which contains the history of "Sublime Free-Masonry in the United States

A circular, which we give in part below, was issued by the Supreme Council at Charleston (adopted October 10, 1802), under date of December 4, 1802, and copies were sent to every Grand Lodge then in existence in the United States and also in other countries.

"Circular"

"As Society improved, and as discoveries of old records were made, the numbers of our degrees were increased, until, in progress of time, the system became complete.

"From such of our records as are authentic, we are informed of the establishment of the Sublime and Ineffable degrees of Masonry in Scotland, France, and Prussia, immediately after the crusades. But from some circumstances, which to us are unknown, after the year 4658 they fell into neglect until the year 5744, when a nobleman from Scotland visited France and re-established the Lodge of Perfection in Bordeaux.

"In 5761 the Lodges and Councils of the Supreme degrees being extended throughout the Continent of Europe, his Majesty the King of Prussia, as Grand Commander of the Order of Prince of the Royal Secret, was acknowledged by all the Craft as the head of the Sublime and Ineffable degrees of Masonry throughout the two hemispheres. His Royal Highness Charles, Hereditary Prince of the Swedes, Goths, and Vandals, Duke of Sudermania, Heir of Norway, was, and still continues the Grand Commander and protector of the Sublime Masons in Sweden; and his Royal Highness Louis of Bourbon, Prince of the Blood, Duke de Chartres, and the Cardinal Prince and Bishop of Rouen, were at the head of these degrees in France.

"On the 25th of October, 5762, the Grand Masonic Constitutions were finally ratified in Berlin and proclaimed for the government of all the Lodges of Sublime and Perfect Masons, Chapters, Councils, Colleges, and Consistories of the Royal and Military art of Free-Masonry, over the surface of the two hemispheres. There are Secret Constitutions, which have existed from time immemorial, and are alluded to in these instruments.

of America. Being a Collection of all the Official Documents which have appeared on both sides of the question with Notes and an Appendix. By Joseph McCosh, Charleston, S. C., 1823."

"In the same year the Constitutions were transmitted to our illustrious Brother, Stephen Morin, who had been Appointed¹ on the 27th of August, 1761, Inspector-General over all Lodges in the new World, by the Grand Consistory of Princes of the Royal Secret convened in Paris, at which presided the King of Prussia Deputy, 'Chaillon de Joinville, substitute General of the Order, Right Worshipful Master of the first Lodge in France, called St. Anthony's, Chief of the Eminent degrees, Commander and Sublime Prince of the Royal Secret,' etc.

"The following Illustrious Brethren were also present: The Brother Prince of Rouen, Master of the Grand Intelligence Lodge and Sovereign Prince of Masonry, etc.

"La Coine, substitute of the Grand Master, Right Worshipful Master of the Trinity Lodge, Grand Elect, Perfect, Knight and Prince of Masons.

"Maximillian de St. Simon, Senior Grand Warden, Grand Elect, Perfect and Knight and Prince of Masons.

"Savalette de Buchelay, Grand Keeper of the Seals, Grand Elect, Perfect Knight and Prince of Masons.

"Duke de Choiseuil, Right Worshipful Master of the Lodge of the Children of Glory, Grand, Elect, Perfect Master, Knight and Prince of Masons.

"Topin, Grand Ambassador from his Serene Highness, Grand, Elect, Perfect Master, Knight and Prince of Masons.

"Boucher de Lenoncour, Right Worshipful Master of the Lodge of Virtue, Grand, Elect, Perfect Master, Knight and Prince of Masons.

"Brest de la Chausee, Right Worshipful Master of the Exactitude Lodge, Grand, Elect, Perfect Master, Knight and Prince of Masons. The Seals of the Order were affixed and the Patent countersigned by

"Daubertiny, Grand, Elect, Perfect Master, Knight and Prince of Masons, Right Worshipful Master of the Lodge of St. Alphonso, Grand Secretary of the Grand Lodge and Sublime Council of Princes of Masons, etc.

"When Brother Morin arrived in St. Domingo, he, agreeably to his patent, appointed a Deputy Inspector General for North-

¹A copy of his commission is in the archives of the Supreme Council, Southern Jurisdiction, and is given in chapter i of A. A. S. R.

America. This high Honor was conferred on Brother M. M. Hayes, with the power of appointing others, where necessary. Brother Morin also appointed Brother Frankin Deputy Inspector-General of Jamaica and the British Leeward Islands, and Brother Colonel Provest for the Windward Islands and the British Army.

"Brother Hayes appointed Brother Isaac Da Costa Deputy Inspector General for the State of South Carolina, who, in the year 5783, established the Sublime Grand Lodge of Perfection in Charleston. After Brother Da Costa's death, Brother Joseph Myers was appointed Deputy Inspector-General for his State, by Bro. Hayes, who, also, had previously appointed Brother Colonel Solomon Bush Dep. Insp. Gen. for the State of Pennsylvania, and Bro. Barend M. Spitzer to the same rank for Georgia, which was confirmed by a Convention of Inspectors when convened in Philadelphia, on the 15th of June, 5781.

"On the 1st of May, 5786, the Grand Constitutions of the Thirty-Third Degree, called the Supreme Council of Sovereign Grand Inspectors General, was ratified by his Majesty the King of Prussia, who as Grand Commander of the Order of Prince of the Royal Secret, possessed the Sovereign Masonic power over all the Craft. In the New Constitution this Power was conferred on a Supreme Council of Nine Brethren in each nation, who possess all the Masonic prerogatives in their own district that his Majesty individually possessed, *and are Sovereigns of Masonry.*

"On the 20th of Feb., 5788, the Grand Council of Princes of Jerusalem was opened in this City (Charleston, S. C), at which were present Bros. J. Myers, D. I. G. for South Carolina, B. M. Spitzer, D. I. G. for Georgia, and A. Forst, D. I. G. for Virginia. Soon after the opening of the Council, a letter was addressed to his Royal Highness, the Duke of Orleans, on the subject, requesting certain records from the Archives of the Society in France, which in his answer through Col. Shee, his Secretary, he very politely promised to transmit, but which the commencement of the French Revolution most unfortunately prevented.

"On the 2d of Aug., 5795, Brother Colonel John Mitchell, late Dep. Quarter Master Genl. in the Armies of the United States, was made a Dep. Ins. Genl. for this State by Bro. Spitzer, who acted in consequence of Bro. Myers' removal out of the Country.

"Bro. Mitchell was restricted from acting until after Bro. Spitzer's death, which took place in the succeeding year.

"As many Brethren of eminent degrees had arrived from Foreign parts, consistories of Princes of the R. S. were occasionally held, for initiations and other purposes.

"On the 31st of May, 5801, the Supreme Council of the Thirty-third degree for the United States of America was opened with the high honors of Masonry, by Brothers John Mitchell and Frederick Dalcho, Sov: Gr: Insp: Genl.; and in the course of the present year the whole number of Grand Inspectors General was completed, agreeably to the Grand Constitutions.

"On the 21st of January, 5802, a Warrant of Constitution passed the Seal of the Grand Council of Princes of Jerusalem for the establishment of a Master Mark Mason's Lodge in this City (Charleston, S. C).

"On the 21st of February, 5802, Our Illustrious Brother, Count Alexandre Francois Auguste Degrasse, Deputy Inspector General, was appointed by the Supreme Council a Grand Inspector General, and Grand Commander of the French West-Indies; and our Illustrious Brother, Jean Baptiste Marie De La Hougue, Dep. Insp. Genl., was also received as an Insp. Genl. and appointed Lieut. Grand Commander of the same Islands.

"On the 4th of December, 5802, a Warrant of Constitution passed the seal of the Grand Council of Princes of Jerusalem, for the establishment of a Sublime Grand Lodge in Savannah, Georgia.

THE NAMES OF THE MASONIC DEGREES ARE AS FOLLOWS, VIZ.:

1st degree, called	Entered Apprentice.	}	Given in the Symbolic Lodges.
2d " "	Fellow Craft.		
3d " "	Master Mason.		
4th " "	Secret Master.	}	Given in the Sublime Grand Lodge.
5th " "	Perfect Master.		
6th " "	Intimate Secretary.		
7th " "	Provost and Judge.		
8th " "	Intendant of the Building.		
9th " "	Elected Knights of 9.		
10th " "	Illustrious Elected of 15.		
11th " "	Sublime Knight Elected.		
12th " "	Grand Master Architect.		
13th " "	Royal Arch.		
14th " "	Perfection.		

15th degree, called Knights of the East.	} Given by the Princes of Jerusalem, which is a governing Council.	
16th " " Prince of Jerusalem.		
17th " " Knight of the East and West.	}	
18th " " Sovereign Prince of Rose Croix de Heredom.		
19th " " Grand Pontiff.		
20th " " Grand Master of all Symbolic Lodges.		
21st " " Patriarch Noachite, or Chevalier Prussian.		
22d " " Prince of Libanus.		
23d " " Chief of the Tabernacle.		} Given by the Council of Grand Inspectors, who are Sovereigns of Masonry.
24th " " Prince of the Tabernacle.		
25th " " Prince of Mercy.		
26th " " Knight of the Brazen Serpent.		
27th " " Commander of the Temple.		
28th " " Knight of the Sun.		
29th " " Knight of St. Andrew.		
30th " " K-H.		
31st " " Grand Inquisitor Commander.		
32d " " Sublime Prince of the Royal Secret Prince of Masons.		
33d " " Sovereign Grand Inspectors General. Officers appointed for life.		

"Besides the degrees, which are in regular succession, most of the inspectors are in possession of a number of detached degrees, given in different parts of the world, and which they generally communicate, free of expense, to those brethren who are high enough to understand them. Such as Select Masons of 27 and the Royal Arch as given under the Constitution of Dublin. Six degrees of Maconnerie D'Adoption, Compagnon Ecosais, Le Maitre Ecosais and Le Grand Maitre Ecosais, making in the aggregate 52 degrees.

"The Committee respectfully submit to the consideration of the Council the above report on the principles and establishment of the Sublime degrees in South Carolina extracted from the Archives of the Society. They cannot, however, conclude without expressing their ardent wishes for the prosperity and dignity of the institution over which this Supreme Council preside; and they flatter themselves that if any unfavorable impressions have existed among the Brethern of the Blue degrees, from a want of a knowledge of the principles and practices of Sublime Masonry, it will be done away,

and that harmony and affection will be the happy cement of the Universal Society of Free and Accepted Masons. That as all aim at the improvement of the general condition of Man-kind by the practice of Virtue, and the exercise of benevolence, so they sincerely wish that any little differences which may have arisen, in unimportant ceremonies of *Ancient* and *Modern*, may be reconciled, and given away to the original principles of the order, those great bulwarks of Society, universal benevolence and brotherly love, and that the extensive fraternity of Free-Masons, throughout the two Hemispheres, may form but one band of Brotherhood. 'Behold how good and how pleasant it is for Brethren to dwell together in Unity.'

"They respectfully Salute your Supreme Council by the *Sacred Numbers*. Charleston, South Carolina, the 10th day of the 8th Month, called Chisleu 5553, A.L. 5802, and of the Christian Era, this 4th day of December, 1802.

"FREDERICK DALCHO.

"K-H.P.R.S., Sovereign Grand Inspector General of the 33d, and Lieutenant Grand Commander in the United States of America.

"ISAAC AULD.

"K-H.P.R.S., Sovereign Grand Inspector General of the 33d.

"E. DE LA MOTTA.

"K-H.P.R.S., Sovereign Grand Inspector General of the 33d, and Illustrious Treasurer General of the H. Empire.

"The above report was taken into consideration, and the Council was pleased to express the highest approbation of the same.

"Whereupon, *Resolved*, That the foregoing report be printed and transmitted to all the Sublime and Symbolic Grand Lodges, throughout the two Hemispheres.

"JNO. MITCHELL.

"K-H.P.R.S., Sovereign Grand Inspector General of the 33d. and Illustrious Secretary General of the H. Empire."

Deus Meumque Jus.

The major part of this circular recites the history of Masonry, as generally understood at that early day, and which we omit, confining our extracts to that part which refers only to the A:A:A:S:R.

The Supreme Council, having been thus established and made known to the whole world of Masonry, is the mother of all the other regular Supreme Councils which have since been organized either immediately or mediately by her authority.

The council in Charleston conferred the 33d Degree on Count de Grasse Tilley, Hacquet, and de la Hogue; and through these Brethren by the authority of letters patent dated February 21, 1802, were established the Supreme Councils of France and also of the French and English West India colonies. Illustrious de Grasse Tilley installed the Supreme Council of France on December 22, 1804, at Paris. This was the first and only Supreme Council established in France; many years subsequently it was divided into two branches, in consequence of the dissension heretofore mentioned; one was called the Supreme Council of France, and the other the Supreme Council of the Grand Orient of France. Both of these bodies are still in existence; the former only, however, is in relations of comity with the Mother Supreme Council, and all the other regular Supreme Councils of the world. The Supreme Council of the Grand Orient is not so.

The Supreme Councils of Italy, Naples, Spain, and the Netherlands were also established by de Grasse Tilley.

Only one Supreme Council of the 33d Degree can exist in each nation or kingdom (by Article V. of the Grand Constitution of 1786): two in the United States of America, as far as possible one from the other; one in the British Islands of America, and one also in the French colonies.

The first Supreme Council at Charleston, S. C, began its labors on May 31, 1801, as hereinbefore stated, and its jurisdiction covered all of the United States of America, until August 5, 1813, at which date the "Supreme Council of the Ancient and Accepted Scottish Rite of Freemasonry for the Northern Jurisdiction of the United States" was established by special Deputy Emmanuel de la Motta at New York. This Supreme Council was substituted for the Grand Consistory of Sublime Princes of the Royal Secret, 32d Degree. Brother D. D. Tompkins, Vice-President of the United States of America, was M. P. S. Grand Commander.

At a later period the seat of the Northern Supreme Council was changed to Boston. The jurisdiction of the Northern Supreme Council included all the northern and northeastern States east of the Mississippi River, *viz.*: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Michigan, Ohio, Indiana, Illinois, and Wisconsin. The other States and Territories were reserved for itself by the Supreme Council for the Southern Jurisdiction of the United States.

The Supreme Council of England and Wales was created by the Northern Supreme Council in March, 1846, and that body created the Supreme Councils of Scotland and of the Canadian Dominion. The Supreme Council for Ireland was established by the Supreme Council of the Southern Jurisdiction.

From August 5, 1813, Article V. of the Constitutions of 1786 has been complied with, and there have been consequently in the United States of America but two legitimate Supreme Councils, which have ever endeavored to preserve and enforce their authority: and they have always discountenanced all attempts against that authority which rightfully, according to the Grand Constitutions, belongs to them.

A third Supreme Council could not be established in the United States of America, without a violation of the Constitutions of 1786. Neither the 33d Degree nor a Supreme Council can exist without a compliance with that constitution. The establishment of a second Supreme Council in the United States was not a wise measure, although the constitutions provided for it, as subsequent events demonstrated. It was a remarkable coincidence that in the very year when the two Grand Lodges of Blue Masonry in England were consolidated into one, Scottish Masonry in the United States was amicably divided into two organizations, in consequence of which each Supreme Council altered and amended its own constitutions and statutes, and changed and made material alterations in the rituals, and thereby destroyed the harmony and uniformity of the work.

The injurious and pernicious consequences of this division were soon manifested and both Supreme Councils were called upon to make their defense against the invasion of illegitimate bodies, which not only affected Scottish Rite Masonry, but also all the other

Grand Bodies of Masonry, from the Grand Lodges to the Grand Commanderies of Knights Templars, illegitimate bodies of which were soon established, as well as of the Scottish Rite, by these unauthorized parties.

On October 7, 1856, Foulhouze formed a new Supreme Council and commenced making Masons at sight, and manufacturing Thirty-thirds. Pursuing the same system of misrepresentation as in 1850-51, he succeeded in causing two lodges to withdraw their allegiance from the Grand Lodge of Louisiana. This rebellion was short-lived; in 1858-59 these lodges memorialized the Grand Lodge to be reinstated on its register, and with difficulty obtained their request. On February 4, 1859, the Grand Orient of France expelled Foulhouze, and his so-called Supreme Council soon became dormant. In the early part of 1867 an attempt was made to revive it, and it obtained recognition from the Grand Orient of France; that recognition, however, failed to give it vitality, and in a short time it either became dormant or ceased to exist.

It would be useless to waste valuable time in tracing out all these irregular bodies; yet it would be unwise not to acknowledge that they have had an existence, and that some still continue to the detriment of Freemasonry.

We quote from a letter of the late Ill. Bro. Dr. Henry Beaumont Leeson, the Sovereign Grand Commander of the Supreme Council of England and Wales and their Dependencies, to the Grand Commander of the Southern Supreme Council of the United States, written at London in 1860, in which he says: "Our own Council is now in a flourishing condition, nearly all of the élite of Masonry in England being ranged under our banners; although we are distinct from Grand Lodge, who acknowledge only the first three degrees, and the Royal Arch, and Grand Conclave, governing the Knights Templars. These two last degrees are in this country, perfectly different and distinct from any of the Ancient and Accepted Degrees, and of very modern origin, neither having existed previous to the middle of the last century. The Knight Templar Degree was concocted in France AND I POSSESS THE ACTUAL MINUTES AND OTHER RECORDS OF THE FRENCH CONVENT. The Royal Arch (Dermott's) was concocted by Ramsay, and modernized by a Chaplain (G. Brown) of the late Duke of Sussex." (Grand Master.)

This spurious French Knight Templar Degree differed from the Webb Templar Degree; it was carried to England and established there; it was also brought to the United States by Joseph Cerneau, who made Templars of New Orleans Masons¹ as well as he did those in New York, where he and his coadjutors also established bodies of Templars, and of the Rite of Perfection with twenty-five degrees, in New Orleans and New York, changed the names of his bodies as suited his pleasure, and declared himself and his coadjutors Sovereign Grand Inspectors-General of the 33d Degree. There is no evidence that Cerneau ever had received the 33d Degree. We give below a copy of the only document he ever had to show his status as a Mason.

[*Translation*]

TO THE GLORY OF THE [Gr.: ARCH.: OF THE
UNIV:]

Lux ex Tenebris.

From the Orient of the Very Great and Very Puissant Council of the Sublime Princes [of the Royal Secret], Chiefs of Masonry, under the C: C: of the Zenith [which responds] to the 20° 25' N: Lat:

To our Ill: and Very Valiant Knights and Princes, Masons of all the Degrees, over the surface of the two Hemispheres:

HEALTH!

We, ANTOINE MATHIEU DUPOTET, Grand Master of all the Lodges, Colleges, Chapters, Councils, Chapters and Consistories, of the higher degrees of Masonry, Deputy Grand Master of the Grand Orient of Pennsylvania, in the United States of America; and of the Grand Lodge and Sovereign Provincial Grand Chapter of Heredom of Kilwinning, of Edinburgh, for America, under the distinctive title of the Holy Ghost, Grand Provincial of San Domingo in the Ancient Rite, Grand Commander or Sovereign President of the Th: Puissant Grand Council of the Sublime Princes of the Royal Secret, established at Port au Prince, Island of San Do-

¹ See chapter liiii., pp. 1390, 1391, of this work; also chapter lviii., p. 1624.

mingo, by constitutive patent of 16 January and 19 April, 1801, under the distinctive title of The Triple Unity; transferred to Baracoa, Island of Cuba, on account of the events of war,

Do declare, in the name of the Sublime and Th: Puissant Grand Council, do certify and attest, that the Very Resp: Gr: Elect Knight of the White and Black Eagle, *Joseph Cerneau*, Ancient Dignitary of the Lodge No. 47, Orient of Port au Prince, Grand Warden of the Provincial Lodge, same Orient, Venerable founder of the Lodge of the Ancient Constitution of York, No. 103, under the distinctive title of The Theological Virtues, Orient of the Habana, Island of Cuba, has been regularly initiated in all the Degrees of the Sublime Masonry, from that of Secret Master to and including that of Grand Elect Knight of the White and Black Eagle; and wishing to give the strongest proofs of our sincere friendship for our said Very Dear Bro: *Joseph Cerneau*, in recognition of the services which he has rendered to the Royal Art, and which he is rendering daily, we have initiated him in the highest, in the most eminent and final Degree of Masonry; we create him our Deputy Grand Inspector, for the Northern part of the Island of Cuba, with all the powers that are attached thereto, giving him full and entire power to initiate the Bros: Masons, whom he may judge [worthy?], to promote them to the Sublime Degrees, from the 4th up to and including the 24th; provided, however, that these Masons shall have been officers of a Lodge regularly constituted and recognized, and in places only where there may not be found Sacred and Sublime and regularly constituted Asyla; from which Bros: he will receive the obligation required and the authentic submission to the Decrees of the Sublime Princes; consulting, however, and calling to his aid the BB: whom he shall know to be decorated with the Sublime Degrees; we give him full and entire power to confer in the name of our aforesaid Grand Council the highest Degrees of Masonry on a Kt: Prince Mason, one only each year, whose virtues he shall recognize, and the qualities required to deserve this favor; and to the end that our dear Bro: *Joseph Cerneau*, so decorated, may enjoy, in this quality, the honours, rights, and prerogatives which he has justly deserved, by his arduous labors in the Royal Art, we have delivered to him these presents, in the margin whereof he has placed his signature, that it may avail him everywhere, and be useful to him alone.

We pray our Resp: BB: regularly constituted, spread over the two Hemispheres, with whatever Degree they may be decorated, whether in Lodge, Ch:, Col:, Sovereign Council . . . Sublime, to recognize and receive our dear Bro:, the Very Illustrious Sov: and Subi: Prince, *Joseph Cerneau*, in all the Degrees above mentioned; promising to pay the same attention to those who in our Orients shall present themselves at the doors of our Sacred Asyla furnished with like authentic titles.

Given by us, S: Sublime Princes, G: C: G: I: G'al: of our afore-said Grand and Perfect Council, under our Mysterious Seal, and the Grand Seal of the Princes of Masonry, in a place where are deposited the greatest treasures, the sight whereof fills us with consolation, joy, and gratitude for all that is great and good.

At Baracoa, Island of Cuba, anno 5806, under the sign of the Lion, the 15th day of the 5th month called Ab, 7806, of the Creation 5566, and according to the Common Style the 15th July, 1806.

Signed, MATHIEU DUPOTET,
President, Sov: . . . G'al:

A true copy: Signed, MATHIEU DUPOTET,
President, S: G: I: G'al:

I certify that what is transmitted above and the other portions are conformable to my Register.

TIPHAINE,
S: P: R: S:, D: I: G'al: G: Comm:

The foregoing translation of the ancient copy in French has been correctly and faithfully made by me.

March 20, 1882.

ALBERT PIKE.

The Northern Supreme Council for a few years was divided into two factions and one of them compromised with and affiliated some of these irregular Masons and took them in, which resulted in a very unfavorable condition of the Northern Supreme Council, which for a time was infected with an unhealthy absorption of bad material, by this unwise compromise, which was made, as was supposed, for the good of Freemasonry.

Some of these irregular Masons had caused a division even in the Grand Lodge of New York, and the original chief of them, Joseph Cerneau, had previously represented the irregular Knights Templars of New Orleans and the irregular council of the Rite of Perfection of Louisiana in the Grand Encampment of Knights Templar of New York, as is found in the records, *viz.*: "On the 4th day of May, 1816, a meeting of the Grand Encampment of Knights Templar of New York was called to act upon an application by a collected body of Sir Knights Templar, Royal Arch Masons and members of the Sov. Grand Council of Sublime Princes of the Royal Secret for the State of Louisiana, sitting at New Orleans, praying that a constitutional charter be granted them, etc. They had previous to this application elected and installed their officers. The charter, by resolution, was granted them. and it was also

Resolved, That the Ill. Bro. Joseph Cerneau, having been designated by the Louisiana Encampment to be their representative and proxy near this Grand Encampment, be and is hereby acknowledged and accredited as such."

In this manner the irregular French Templar Degree that was carried from France to England got into the United States at New Orleans, and allied with an irregular rite and body, became amalgamated with the American Webb Templar Degree at New York.

These evils which have beset the Ancient and Accepted Scottish Rite of Freemasonry, have not prevented its great advancement and prosperity; and during the past decade, in the Northern Jurisdiction alone, it has increased over fifty per cent. in numbers.

The Southern Supreme Council did not meet from February, 1862, until November 17, 1865, which was in Charleston, S. C. Six members only were present, and all of them are now dead.

There were no bodies of the Rite working anywhere except in New Orleans.

With indomitable energy and zeal the Illustrious Sovereign Grand Commander, Albert Pike, 33d Degree, who during the last two years and a half of the war had been engaged in re-writing and restoring the rituals of the degrees, and whose scholarship and knowledge of the Ancient Mysteries and their philosophy,

assisted by Albert Gallatin Mackay, 33d Degree, the late Secretary General of the Southern Supreme Council, reconstructed the Rite at Charleston, S. C.

The Supreme Council of the Southern Jurisdiction has now its headquarters in Washington, D. C. Its library of nearly fifty thousand volumes is not surpassed by any other in the country in rare and valuable works.

The constituency is constantly increasing, with five hundred and twenty-five organized bodies of the Rite over its extended territory, and nearly approaching in numbers that of its more prosperous sister council of the Northern Jurisdiction, which was exempt from the calamities of war, as a reference to the tabular statements following this chapter will show.

The legitimate Supreme Councils duly recognized by each other around the globe are the following:

Southern Jurisdiction, U.S.A	Constituted May 31, 1801.
France (Supreme Council)	" Sept. 22, 1804.
Northern Jurisdiction, U.S.A	" Aug. 5, 1813.
Belgium	" Mar. 11, 1817.
Ireland	" June 11, 1825.
Brazil	" April 6, 1826.
Peru	" Nov. 2, 1830.
New Granada	" ——— 1833.

Egypt.....	" ——— 1878.
Spain	" ——— 1879.
Tunis	" May 11, 1880.
Canada	" ——— ———

"The following Supreme Councils have been formed, but have not received formal recognition and the courtesy of an exchange of representation: Naples, of Italy, Dominican Republic, Turkey, Palermo, of Italy, Florence, of Italy, and Luxemburg."

The rituals of the degrees differ very much in their dramatic representations. In the Northern Jurisdiction they apply more directly to the history and scenes of the Crusades; in the Southern Jurisdiction they are very much more intellectual, philosophical, and historic.

Councils of Deliberation are held in each State in the Northern Jurisdiction of all the bodies from the 14th to the 32d degrees inclusive, which are presided over by the deputies for the States. In these are presented all matters of local legislation, action upon which must subsequently be approved, or otherwise, by the Supreme Council.

The Supreme Council of the Rite is the governing body over all, and as such it makes and promulgates laws and statutes for the various divisions of the organized body. This Supreme Council confers the Governing Degree, namely, 33d Degree, Grand Master of the Kadosh or Sovereign Grand Inspector-General. The active members, according to the Statutes of the Southern Supreme Council, are limited to thirty-three active members of the 33d Degree and no more, but in the Northern Supreme Council this number is doubled, so that the active members of the 33d Degree are sixty-six. These active members are for their respective States relatively the Grand Masters of the Rite. The title of Honorary Inspectors-General is given to those who are elevated to the degree with specifically delegated powers and no others, or they are sent as special delegates to establish new bodies or propagate the Rite by communicating the degrees. These special delegates have a voice in council but no vote.

In the Southern Supreme Council, with its number of active members of the 33d Degree limited to thirty-three, there is a "Court of Honor," which may be called the vestibule to the 33d Degree. This Court of Honor comprises two grades or ranks, both of which are carefully reserved and can only be conferred as a free

NOTE.—In the Southern Supreme Council, the council or preceptory of the Knights Kadosh or 30th degree is separate from the consistory of 31st and 32d degrees, but in the Northern Supreme Council it is within the consistory.

gift, and a mark of appreciation for services rendered. Each active member and each *Emeritus* member of the Southern Supreme Council is *ex-officio* a member of both grades. These grades are, first, that of Knight Commander. This is conferred upon Brethren of the 32d Degree for general meritorious service rendered to the Rite, and only upon the recommendation of the Grand Consistories or by the Active Inspectors-General of the respective States. The second grade, which is higher than the grade of Knight Commander, is that of Knight Grand Cross. It is conferred with the jewel upon Brethren of the 32d Degree for extraordinary services to the Rite. Neither of these grades can be given to anyone who solicits for them; it must be repeated that they are special marks of honor, gratuitously conferred. According to the Statutes of the Southern Jurisdiction the possession of at least the first of these grades is a condition precedent of eligibility for the reception of the 33d Degree.

The difference in the working of the degrees in the rituals of the Rite, between the ritual of the Southern and that of the Northern Jurisdiction, may require some explanation, which likewise will explain why the changes were necessarily made in working the degrees. The late Ill. Brother Azariah T. Pearson, 33d Degree, Active Inspector-General for the State of Minnesota in the Southern Jurisdiction, a little while before his death, made the following statement: "That the late Masonic firm of Macoy and Sickles of New York City, both of whom are 33d degree, and belong to the Northern Supreme Council, printed in the rituals for the supreme Council of the Southern Jurisdiction as well, but who unfortunately failed in business, and that the stereotype plates which belonged to either or both regular Supreme Councils, were surreptitiously seized upon and taken by persons connected with the Cerneau fraud, who had claimed that they had bought them with the rest of the property of Macoy and Sickles, which was sold for the benefit of their creditors; and that it was with these stereotype plates of the rituals thus surreptitiously obtained that the fraudulent Cerneau Supreme Council was thus enabled to improve its own meagre skeleton, and give its subordinate bodies a semblance of the true work conferred under the authority of the regular Supreme Councils, which for self-protection against impostors and clandestine Scottish Rite Masons, had to call in all the rituals then out, and to issue new ones in lieu thereof."

It must be again repeated, with a degree of reiteration which may be tiresome but is necessary, that the Scottish Rite confers no degrees but those of its own Rite, and also that while many of its members belong to legitimate bodies of other rites of Masonry, it has no conflict with any such. The Scottish Rite has doubled its members in the last few years, and year by year gains new accessions.

Antoine Bideaud, who had been created a Deputy Grand Inspector-General and a Sovereign Grand Inspector-General, September 10, 1802, by De Grasse Tilley, at Cape Francois, in San Domingo, so soon as he had opened his Supreme Council, after the return of the French to that island, was in New York and on August 4th conferred upon J. J. Gourgas, John B. Tardy, Lewis de Soules, John B. Desdoity, and Pierre Du Peyrot all the degrees of the A: A: S: Rite to the 32d. Two days thereafter a consistory was opened, which although exceeding his patent, was afterward confirmed by proper authority. John B. Tardy was subsequently appointed Deputy Inspector-General by Du Plessis, of Philadelphia, who had received his appointment in 1790 from Augustine Prevost, who derived his authority directly from Francken in 1774, at Jamaica.

Abraham Jacobs, who claimed to be a Grand Inspector-General, made such by Moses Cohen in 1790, came to New York in 1804, and began his work of conferring degrees. He states, in his register, that by the wishes of J. B. Tardy there was opened a council of Princes of Jerusalem November 6, 1808, there being present J. J. Gourgas, John B. Desdoity, Maduro Peixotto, Moses Levy, John B. Tardy, and Abraham Jacobs. At this time Richard Riker received the degrees. It appears from a statement by Gourgas that Jacobs had exceeded his authority by interlining words in his patent, for which he was afterward expelled. Gourgas also says that on November 8, 1808, Daniel D. Tompkins, Richard Riker, and Sampson Simpson received the degrees, including the 32d Degree, in the consistory which was formed August 6, 1806, and that he was made a Deputy Inspector-General on November 12, 1808, Desdoity on the 18th, and Peixotto on the 16th.

In consequence of a rumor of the irregularities which had occurred in the bodies in New York having reached the Supreme Council in Charleston, De la Motta, who was an officer in that

body, was sent to New York with authority from the Supreme Council to investigate the whole matter, in 1813. August 5th he conferred the 33d Degree upon J. J. Gourgas and Sampson Simpson; these three then opened a Supreme Council and conferred the degree on Richard Riker, John B. Tardy, Daniel D. Tompkins, and Maduro Peixotto. On the same day, De la Motta, by authority of the Mother Supreme Council at Charleston, regularly and constitutionally organized what was then called the "Second Grand and Supreme Council" for the United States. Daniel D. Tompkins was installed Grand Commander; the other Officers were appointed and installed. At the next meeting of the "Mother Supreme Council," at Charleston, the following December, these proceedings were duly confirmed.

As heretofore stated, a treaty was entered into by and between the two Supreme Councils, and the jurisdiction over the various States and Territories of the United States was determined for each of these.

Like all human voluntary institutions, the histories of both the Northern and Southern Supreme Councils are records of bitter controversies growing out of rival bodies which were irregularly started in opposition to each of these duly constituted Supreme Councils, and which greatly retarded the advancement of this valuable Rite.

In the Southern Jurisdiction these controversies continued to keep the Scottish Rite entirely in the shade, as it were, until General Albert Pike received the several degrees and was elected the Grand Commander. Since the close of the war in 1865 the progress has been onward and upward, as has been shown in the preceding pages of this chapter.

In the Northern Supreme Council the Rite encountered a more bitter and relentless opposition in the bodies organized by Joseph Cerneau, originally in 1807, and although that body repeatedly declined, until it would appear to be utterly extinguished, yet it would quite unexpectedly arise again, deceive the unwary, and so soon as the sunlight of Truth was poured upon it would again decline, wither, and disappear.

The opposition to which the Northern Supreme Council was subjected was of such a character that it is incumbent on us to take some notice thereof to demonstrate what the Scottish Rite of the

Northern Supreme Council had to contend against in defense of the truth.

Giles Fonda Yates, of Albany, became, at an early date (1822), interested in the study of Masonry. He discovered the Warrant of the Lodge of Perfection granted by Francken at Albany and a copy of the Constitutions of 1762; he then succeeded in resuscitating the old lodge. After this a Grand Council of Princes of Jerusalem was organized at Albany, and several lodges of Perfection were constituted in other places. A consistory was instituted in 1824 at Albany, and several bodies were established in Boston. These were under patents of the Supreme Council at Charleston. Yates received the 33d Degree from McCosh, who was the special Deputy of this council. Afterward, in 1828, Yates became a member of the Northern Supreme Council. Just at this period, from 1826, the Morgan affair having occurred, nearly all the Masonic bodies at the North became extinct, as recited in the chapter devoted to that subject. In 1832 Gourgas suspended all efforts in the affairs of the Scottish Rite. In 1842, however, the great excitement had mostly died out and the fire of persecution, bigotry, and fanaticism having had no fuel for many years, waned, and all efforts against the Institution ceased. Yates having conferred with Gourgas and other Brethren who had not succumbed under their severe ordeal, they determined to resume their labors. June 15, 1844, a meeting was held; Gourgas was then Grand Commander, and Yates Lieutenant Grand Commander. These two, by a law of the Rite, that if only one member of a Supreme Council survives, that council does not cease to exist, opened the Supreme Council.

At this meeting, November 13, 1844, applications were received from Edward A. Raymond, Ruel Baker, and Charles W. Moore (all of Massachusetts), who, having received the 32d Degree, were crowned Sovereign Grand Inspectors-General.

At the meeting held April 3-5, 1845, Gourgas declared that the recent publication by Clavel, relating to the Ancient and Accepted Rite, was utterly incorrect, and stated that Cerneau's name was struck from the Tableau of the Grand Orient of France in 1830, the Grand Orient having written to him that it was *a matter quite inexplicable* to them that it should have remained there so long.

At this meeting Gourgas reorganized the Supreme Council, the officers being appointed by the constitutional provisions. From

this time the Supreme Council became very industrious in establishing bodies in many cities; harmony prevailed over this jurisdiction, and the Rite, although slowly, was steadily extended.

At an important meeting held September 4, 1851, Gourgas's resignation as Grand Commander and his appointment of Yates as his successor were received. Yates presided at this meeting, the Sovereign Grand Consistory was organized, and the degrees in the various bodies were conferred. At the close of the meeting Yates resigned as Grand Commander and appointed Raymond to that position. In his address Yates gave a forcible exposition of the laws, the objects, and the history of the Rite, and it contains so much information, of interest and value to its members, that we give it in full:

ADDRESS OF M. P. BRO. GILES FONDA YATES

Respected and Beloved Associates: You have been listening to the valedictory address of our honored friend, long tried, true, and trusty. His sentiments, I am well assured, are reciprocated. He has been called by our transatlantic Brethren "the patriarch of our 'Illustrious Order,'" and not without appropriateness. John James J. Gourgas—*clarum et venerabile nomen!*

He has been pleased to allude to my own participation in some of the works and administrative duties of our order, but such participation, as you are well aware, has been at a later day and for a shorter period. Under the circumstances in which I now appear before you, it can hardly be deemed egotistic in me if I advert briefly to a few of the humble contributions to the cause of "Sublime Freemasonry" previous to 1840, which it fell to my lot to render. These, with the "sublime works" performed by other Brethren of our order before and since, in Massachusetts, New York, New Hampshire, Connecticut, and Rhode Island, furnish altogether evidence supplemental to that given by my predecessor, in complete confutation of the preposterous charge that "Sublime Freemasonry" has been dormant in our jurisdiction since its establishment among us. A charge of this kind has been the stereotype apology of surreptitious Masons for their occasional attempts to foist their spurious creations upon our "Sublime System" within our Masonic territory. The abundant parole testimony which can be

adduced to show how untrue is this charge, can be corroborated by our archives, and will be found iterated in manifestoes issued by our own and our sister council for the Southern Jurisdiction of the United States.

I turned my attention to the history of the "Sublime Degrees" very soon after my initiation as a Mason. My intercourse in 1822 with several old Masons in the city of Albany, led to the discovery that an "Ineffable Lodge of Perfection" had been established in that ancient city on December 20, 1767. I also discovered that not only the Ineffable, but the Superior Degrees of our Rite, had been conferred at the same time on a chosen few, by the founder of the lodge, Henry A. Francken, one of the Deputies of Stephen Morin¹ of illustrious memory. It was not long, moreover, before I found the original Warrant of this lodge, its book of minutes, the patents of Ill. Brother Samuel Stringer, M.D., Jeremiah Van Rensselaer and Peter W. Yates, Esquires, Dep. Inspectors-General, under the old system; also "the regulations and contributions of the nine commissioners," etc., 1761, and other documents that had been left by Bro. Francken with the Albany Brethren when he founded their lodge. With the concurrence of the surviving members of said lodge residing in Albany, Dr. Jonathan Eights and the Hon. and R. W. Stephen Van Rensselaer, P.G.M. of the Grand Lodge of New York, I aided in effecting its revival. The necessary proceedings were thereupon instituted to place the same under the superintendence of a Grand Council of Princes of Jerusalem, as required by the old constitutions; and such Grand Council was subsequently opened in due form in said city.

Having been made aware of "the new Constitution of the Thirty-third degree," ratified on the first of May, 1786, conferring the Supreme Power over our Rite on "Councils of Nine Brethren," I hastened to place myself in correspondence with Moses Holbrook, M.D., at the time S. G. Commander of the Supreme Council at Charleston, and with my esteemed friends, Joseph M'Cosh, Ill. Gr. Sec. Gen. of the last-named council, and Bro. Gourgas, at that

¹ Stephen Morin was on the 27th day of August, 1761, appointed "Inspector General over all Lodges, &c, &c, &c, in the new world by the Grand Consistory of Princes of the Royal Secret convened in Paris, at which presided the King of Prussia's Deputy, Chaillon De Joinville, Substitute General of the Order." See circular issued by the Supreme Council at Charleston, S. C., December 4, 1802.

time Ill. Gr. Sec. Gen. of the H.E. for this Northern Jurisdiction. Lodges of Perfection in the counties of Montgomery, Onondaga, Saratoga, and Monroe in the State of New York, were successively-organized, and placed agreeably to the constitutions under the superintendence of the Grand Council before named. The establishment of this last-named body was confirmed, and all our proceedings in "Sublime Freemasonry" were legalized and sanctioned by the only lawful authorities in the United States, the aforesaid Supreme Councils.

On the 16th day of November, 1824, I received a patent, appointing me S. of S. of a consistory of S.P.R.S., established in the city of Albany. I would here also state that on the 13th day of February, 1825, a Charter was granted to Ill. Bro. Edward A. Raymond, of Boston, Mass., and eight associates, constituting them a Grand Council of Princes of Jerusalem; a Charter was also granted them for a consistory of S.P.R.S., both bodies to be holden in the city of Boston. All these several bodies named, as well as the Albany Grand Council and Consistory, have since their establishment paid due faith and allegiance to our Northern Supreme Council.

In the organization of the New York State Grand Council, and of the different lodges of Perfection under its superintendence, I received the most effective aid and co-operation of several dear companions whom "it delights me to remember." These lodges numbered on their lists of initiates some of the brightest and worthiest Masons that State produced, and enjoyed for a series of years a good share of prosperity, until the persecuting fires of anti-Masonry swept over the land. Their labors were then intermitted for awhile, in common with those of other departments of the Masonic Institution, from the same cause. But the consequences were not in the main inauspicious. The legitimate effect was to purify and cement more closely the materials subjected to the fiery ordeal.

In 1825 I took my vows as a "Sovereign Grand Inspector General" "between the hands" of our Brother Joseph M'Cosh, he having been specially deputed for that purpose. I was shortly after constituted and accredited the "Representative" of the Southern Supreme Grand Council near this Northern Supreme Grand Council, of which last I was made, and have ever since been a member.

I would fain have you to believe, my dear Brethren, that, as a

member of the Masonic Institution, if I have had my ambition, it has been to study its science, and to discharge my duties as a faithful Mason, rather than to obtain its official honors or personal benefits of any kind. Self-aggrandizement has never formed any part of my Masonic creed, and all who know me can bear witness that it never has of my practise. I accordingly shall never shirk any just responsibility imposed upon me by my obligations as a "Sublime Freemason," but continue to prefer, as I have ever done, since it is most congenial to my own taste, those "works" and labors of the Craft not necessarily connected with its administrative duties.

As Sovereign Grand Inspectors-General, it cannot be bootless to inquire what is the charge committed to our keeping—what the trust reposed in us? Is it true that the degrees and orders of our Rite are, as our enemies allege, only superfetations? Are they naught but excrescences on the great pyramid of Freemasonry? Have they no antiquity? Are they of an irreligious character? Allow me to deliver a few of my own views on this subject—views, as you are well assured, I have not arrived at hastily.

As Brother Gourgas has well observed, our degrees and orders constitute of themselves a perfect system and Rite, which we denominate the "Sublime system," and the "Ancient and Accepted Rite." They have been called "Honorary." Such they are, in the true sense of the term, but not in the sense generally used, which is construed as synonymous with "side," or "detached degrees." We, however, possess, in addition to our regular series of degrees, "detached degrees," of more or less value, subsidiary to our regular degrees. But none of our degrees are, *per se*, subordinate or subsidiary to any other system or Rite, much less to any system or Rite which had no existence when our Rite was reorganized at the beginning of the last century. All attempts to make them so, we, as faithful conservators and guardians of our Rites, are bound to resist. Ours are not, as many have represented them, "loose," "floating," or "side degrees," nor yet are they "waifs of Masonic stragglers."¹ If the star of "Sublime Freemasonry" is never per-

¹We are indebted to our Worthy Brother Philip C. Tucker, of Vermont, for this appropriate designation of Masonic pretenders of a certain description. We refer to those who occasionally spring up in this country and elsewhere, and engage in "peddling" Masonic Degrees ("Marchands de Maconnere"), and who assume prerogatives which they do not possess; and over degrees which most probably they never received in a

mitted to culminate in the zenith it deserves a better fate than to become a *satellite* to any other orbs, albeit these may shine with more distinguished luster. If it ever becomes depressed to the *nadir* of the Masonic horizon, it will not be because of its want of value or merit.

Our "Sublime Brother" Dalcho remarks in one of his orations¹ that our degrees imparted to him knowledge, which he had vainly sought for in the lower degrees—that they elucidated the origin and principles of the Masonic Institution and its connection with science and religion more intimately than the symbolic degrees. I have myself noticed that in the latter general ideas only are communicated and these obscurely, while in the "Sublime Degrees" these ideas become clear as particular truths; though still, like all truths regarding the mind and heart, which are invisible, they can be expressed only by figurative terms and external symbols.

By imagery, and through a veil² of metaphor, the light of truth and the most sublime allusions are disclosed. We may be well versed in the ceremonials of our order and yet not understand their true import; we may correctly read "the letter" of our traditions and legends, and yet remain blind to their "spirit," and ignorant of the principles and inferences they involve. By study alone can we solve the enigma, "*de quo fabula narratur?*" Many of the characteristic allegories, legends, symbols, and ceremonies of "Sublime Freemasonry" are counted as insignificant and valueless, because they are not palpable to the senses, and fully comprehended at the first blush. Some of our most sacred mysteries are lightly esteemed, because they furnish no disclosures that strike dumb with amazement our "hidden treasures," and spiritual "riches of secret places" are unappreciated; and no "Royal Secret" which humbly professes to have a relation only to the *life* of the heart seems to be cared for; nor yet any "precious stone" in our mystic edifice, if the "phi

lawful manner. These men, perchance too, may have surreptitiously obtained some partial information from garbled MSS.; or if they have obtained any degrees lawfully, are guilty of a violation of a fundamental Masonic law in regard to "allegiance" by using and transmitting to others Masonic knowledge under assumed authority, in a manner different from that in which they received it.

¹ See his oration delivered before the Sublime Grand Lodge, at Charleston, S. C., March 21, 1803.

² This idea is beautifully symbolized in one of the "high degrees" by a figure of truth covered with a semi-transparent veil.

losopher's stone" be wanting! For men of this stamp, our degrees, or indeed any Masonic degrees, will ever fail to present attractions.

"Upon the arts of building and architecture the Order of Free and Accepted Masonry rises like a fair stupendous pyramid from a broad, square basis, tending regularly up to a summit of *attainments*, ever concealed by intervening clouds from the promiscuous *multitude* of *common observers* below."¹ The first fourteen degrees of our Rite are in a part an amplification of "Ancient Craft" Masonry; while the "superior degrees" are founded on those Christian and "religious and military Orders" which are declared by the oldest book of York Constitutions to be cognate to the *Craft* degrees of Freemasonry.

The proofs are undeniable that the learning contained in the "Sublime Degrees" was taught long previous to the last century; our M. P. Brother Dalcho thinks shortly after the first crusade. In Prussia, France, and Scotland the principal degrees of our Rite appeared in an organized form in 1713. The unfortunate Lord Der Wentwater and his associate English Brethren were working in lodges of Harodim, in 1725, at Paris, when the Grand Lodge of England transmitted to France the Ancient York Constitutions. Many Scotch Brethren (adherents of Charles Edward Stuart) being in France about this time, also cultivated some of the high degrees of our Rite. Some of the important mysteries celebrated in the superior degrees were instituted by the successors of Jacques de Molay, and others derive their origin from the renowned Robert Bruce. The former gave the military, the latter the Christian, character to the degrees and orders of our Rite; and from what has been alluded to relative to the connection of our Scotch Brethren with our degrees and orders, I think we may readily account for the terms *Ecossais*, or *Scotch* as applied to them.

No person can pretend that any one department or system of Freemasonry or any particular Masonic Rite, however unexceptionable, has from time immemorial existed in the same form in which it appears at the present day. But we contend that the (historical epoch) traditions and grades of knowledge embodied in the degrees and orders of the Rite we profess, have descended to us from remote antiquity. This fact can be proved to the reasonable satisfac-

¹ Quoted from an old edition of the York Constitution.

tion of the most skeptical, by the writings of learned Brethren who have spent years in investigating the subject. To the same effect, too, we have the incidental testimony of writers who never belonged to the Fraternity, as well as the unwilling admission of those opposed to us. Even a brief recapitulation of such proofs is not demanded by present occasion. My referring to this topic at this time is merely to remind my Brethren that our "Ancient and Accepted Rite" is incorrectly designated as a "*modern* Rite."¹ When we use the term "modern" as applicable to any of our orders or degrees, it is to be taken in a comparative sense, and not in its vulgar acceptance. It refers to our "religious and military orders" instituted since the commencement of the Christian era, and after that of "the holy wars!" Of a verity, our Rite is not born of yesterday.

Many of our degrees imply prerequisites in candidates peculiarly stringent, and unknown in other departments of Freemasonry; and not a few partake of the character of official degrees. Even the lowest degrees of our Rite, the eleven "Ineffable," are designed for the "Select few" only. This is especially the case with our principal superior degrees, Prince of Jerusalem, Sov.: Prince of Rose Cross, elected Knight K. H. Grand Inquisitor Commander, and Sublime Prince of the Royal Secret, which are virtually orders of Harodim. Some of our superior degrees confer the titles of "Commander," "Patriarch," "Grand Master," "Prince," and "Sovereign." But it behoves me to observe that the Masonic titles in our "Inner Easts," like the jewels on our *breasts*, are not cherished and worn by us for show or aggrandizement; they are suggestive of holy truths and self-perfecting duties, which every conscientious "Sublime Freemason" will strive to learn and perform.

Some persons who have written and discoursed about our degrees, have obtained what little knowledge they possess of them from spurious and corrupted sources. I do not speak unadvisedly on this subject; for I have critically examined rituals identical with those in use among the clandestine and "*soi-disant*" Supreme

¹ It is doubtless the case that some persons confound our Rite with "the French or Modern Rite," which is confessedly modern and was invented within the last half century. It embraces the three symbolic degrees and forms the basis, and is part, of the *spurious* "Scotch Rite," which aims at supplanting us. It is the same cultivated in some French lodges in this country, and by the Louisiana and other spurious Supreme Councils.

Councils, and usurping propagandists of "Sublime Freemasonry." Now and then an orthodox hieroglyphic symbol or allegory is surreptitiously obtained, but its true solution is not attained to, by the vulgar interpretations of superficialness, or it is purposely perverted by the infidel, or bigot, or sectarian, to suit his narrow purposes or by intriguers, who

"Like scurvy politicians, *seem* to see
The things they do not."

Such rituals, too, often penned by blundering copyists, may not inaptly be likened to human skeletons, stripped of all the arteries, nerves, and muscles of the living man, deprived of soul, life-blood, and spirit.

There are some writers, who, while they may not deny antiquity to the doctrines and traditions on which some of the "high degrees" are founded, yet with a Barruel and Robison purposely confound our "Ineffable" and "philosophical degrees" with those of the political society of the Illuminati and certain infidel systems of philosophy. A learned philosopher¹ has well observed that "philosophy is not possible, unless it be founded on, and guarded by, Christianity. Christianity is the basis, and philosophy the superstructure of the edifice." It is with philosophy such as this that true Freemasonry has to do. It is worthy of note in this connection that speculative science as well as practical wisdom once ranked among the virtues. The knowledge of the Eternal Being, as understood by philosophy, reason, and religious revelation, is the basis and apex, as well of the Masonic as the scientific pyramid.

"No art or learning serveth useful ends,
But as the heart it guides, and life amends."

However great the acquisitions of the most successful cultivator of "the Royal art" and science, all will be vain without a practical application of the knowledge acquired. The understanding should be strengthened that the conduct may be directed and truth discovered, that it may be used "for the better endowment and help of man's life." One of the cardinal ends designed to be answered by Freemasonry, in any of its departments, is to make men better as

¹ Geoberti.

well as wiser. The eulogy pronounced by Bro. T. S. Webb¹ on "the eleven ineffable degrees," is applicable to the whole system of "Sublime Freemasonry," that it is "intended for the glory of the Deity, and the good of mankind."

Those who bring the charge of irreligion against our Rite would do well to bear in mind that learned authors² unfriendly to our Institution have expressed their conviction that the pure doctrines of the Zabians, which are incorrectly stigmatized as astrological and idolatrous,³ and the doctrines of St. John the Baptist, were essentially identical; while Brethren learned in the secrets of "Ineffable Masonry," delivered only "behind the veil," and versed in the doctrines of "Sublime Freemasonry," have become penetrated with the conviction that these secrets and doctrines are in essence the same with those which were taught by the Pythagorean and Essenean rituals.

After the French revolution of 1793, Christianity in France was ridiculed into obsolescence. Among the mass of the people who became atheists were the mass of the Masons. Numerous copies of that holy book, which we esteem as the first great light in Masonry, were committed to the flames. Under this state of things, "Sublime Freemasonry" fell into desuetude; and it was not until after the establishment of the Supreme Council at Charleston, S. C., on the 31st day of May, 1801, that the "Sublime System" was revived in France by the establishment of a Supreme Council at Paris, to wit, in 1804, by Count De Grasse, Grand Inspector-General, under authority from the Charleston Supreme Council. The Paris Supreme Council has been in continuous operation ever

¹ Bro. Webb did not pretend to be a professor of those degrees, or of any other in "Sublime Freemasonry." See his preface to his illustrations of those degrees.

² E.g., Cardinal Wiseman—Syriac version of the Vatican code used by Adler in his "Druses Montis Libani."

³ I here quote the words of Dr. Dewey in corroboration of the idea I have advanced in the text, because he expresses this idea clearly and briefly. It is, however, far from being a singular one, or original with him. It has been the persuasion of every philosopher and divine of celebrity who has bestowed more than a superficial examination upon the subject, both before and since Lord Bacon's day; who proves its truth in detail. "The idea that images set up as gods were worshipped, is erroneous. They were esteemed as symbols of a higher power and as 'symbols' only. A species of images (as for example the four-faced Cherubim) was recognized even in the early worship of the Hebrews when under the immediate government of God himself. I would not be, understood to say: that the pure doctrines alluded to were not perverted, or that there were no persons obnoxious to the charge made by St. Paul in Rom. i. 23.

since. And here truth compels me to advert to the fact that the "Grand Orient" of France, which had a legal existence only as a "Symbolic" Grand Lodge of Master Masons, now commenced her assumption of jurisdiction over all the degrees of the "Ancient and Accepted Rite." Disputes hereupon ensued between the French Supreme Council and Grand Orient, which have never been fully settled up to the present day.

Every lover of Masonic order and constitutional authority cannot but regret this unhappy occurrence; and none the less the conduct of the Parisian Brethren on sundry occasions during the last half century, in extending their jurisdiction in both the Symbolic and Sublime degrees over territory on this continent, already lawfully occupied. Their example in this last respect has been repeatedly followed and is at this present moment producing consequences deleterious to the Craft at large. The present occasion is not the most appropriate one for descending to particularities on this head.

It is unnecessary for me to make more than a passing allusion to the troubles that have been experienced from analogous causes by our sister council at Charleston and our own Supreme Council, from 1806 to the present time. In assaulting our Supreme Councils our enemies tried to shift the issue from principals to individuals, and resorted to wilful perversions of facts; and failing to find legitimate and real subjects to attack, they for the nonce fabricated them. As "the droppings of their lips" were anything but "sweet-smelling myrrh," or the "perfume of hearty counsel," as true gentlemen and Masons we could not meet them on their own ground, or do aught else than simply pronounce their allegations false and unfounded.

A word or two with regard to the charge of interference on the part of the two only lawful Supreme Councils in this country, with the prerogatives of other departments of Freemasonry. No Supreme Councils of Sovereign Grand Inspectors-General were established anywhere in the world till after 1786.¹ Previously, Inspectors-

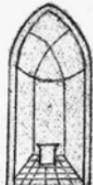

¹"On May 1, 1786, the Grand Constitution of the Thirty-third Degree, called the Supreme Council of Sovereign Grand Inspector-General, was finally ratified by his Majesty, the King of Prussia, who, as Grand Commander of the Order of Prince of the Royal Secret, possessed the Sovereign Masonic power over the Craft. In the New Constitution this high power was conferred on a Supreme Council of nine Brethren in each nation, who possess all the Masonic prerogatives in their own district that his Majesty individually possessed, and are Sovereigns of Masonry." Extracts from the circular letter of the Charleston Supreme Council, issued December 4, 1802.

General under the enlightened Frederick of Prussia were charged with the powers and duties now vested in such Supreme Councils and the Grand Bodies under them. By them the degrees and orders of our Rite were conserved and propagated in the constitutional manner. It was not the Grand Orient of France, as is by many erroneously supposed, nor any other Grand Body on the Continent of Europe, except the Grand Consistory, over which presided Frederick's "Substitute General" before named, that had any authority to act in the premises. For the authors of the numerous new rites and innovations committed on the old system of Freemasonry, which were erst so rife on the European Continent, we must look elsewhere than to the lawful Deputies Inspectors-General under the old system.

The original minutes and documents left by Ill. Brother Francken, who established the Albany Lodge of Perfection in 1767, evince the most scrupulous avoidance of interference with the Master's Lodge in that city or the Symbolic Degree. As there were no R. A. Chapters or Encampments of Knights Templars established in this country till thirty years afterward, to speak of interference with them would be an anachronismic absurdity, akin to those recently spawned by ignorance or design to mislead uninformed Brethren, or for other unworthy purposes.

The first Supreme Council ever established under the new Constitution of 1786 was that at Charleston,¹ whose jurisdiction extended constitutionally over the whole of the United States, until they constituted, by their Special Deputy, E. De La Motta, Ill. Treas. Gen. H. E., this Northern Supreme Council in 1813.² Then

¹ On May 31, 1801, the Supreme Council of the 33d Degree for the United States of America was opened with the high honors of Masonry by Bros. John Mitchell and Frederick Dalcho, Sovereign Grand Inspectors-General; and in the course of the year the whole number of Grand Inspectors-General was completed agreeably to the Grand Constitutions. The other members of this Grand Council admitted in 1801 were Emanuel De La Motta, Dr. J. Auld, Dr. James Moultrie, Abraham Alexander, M. C. Livy, Thomas B. Bowen, and J. De Lieban.

² The Supreme Grand Council for the Northern Jurisdiction of the United States was founded on August 5, 1813, by the M. Ill. Brothers E. De La Motta, "Special Deputy-Representative" from the said Supreme Grand Council at Charleston, Daniel D. Tompkins, S. Simson, John J. J. Gourgas, Richard Riker, J. G. Tardy, and M. L. M. Peixotto. In the words of a manifesto issued by the last-named council, dated August 2, 1845, the establishment of our Northern Supreme Council is shown "by authenticated documents in the possession of this (the Charleston) Council, in accordance with the Secret Constitutions, by Emanuel De La Motta as the Representative and under the

the Northern and Southern Jurisdictions were defined and regulated. A candid review of all the acts of the constitutional regulators and governors of our Rite in these United States cannot fail to establish the falsity of this charge of interference on their part. If I am not much mistaken, they have been "more sinned against than sinning." If we have not claimed the benefit of the legal maxims, *Quod prius est, vertus est, et quod prius est tempore, potius est jure*, it has not been because we were not entitled to this benefit.

On December 4, 1802, our Southern Supreme Council published a report from which I make the following extracts. They speak for themselves:

"Although many of the Sublime degrees are in fact a continuation of the Blue degrees, yet there is no interference¹ between the two bodies. Throughout the continent of Europe and the West Indies, where they are very generally known, they are acknowledged and encouraged. The Sublime Masons never initiate any into the Blue degrees, without a legal warrant obtained for that purpose from a Symbolic Grand Lodge; but they communicate the secrets of the chair to such applicants as have not already received them, previous to their initiation into the Sublime Lodge; yet they are at the same time informed that it does not give them rank as

sanction and authority of the Council at Charleston. The Masonic Jurisdiction of the Northern Council is distributed over the Northern, North-western, and North-eastern parts of the United States. And this, with the Council at Charleston, are the only recognized Councils which exist or can exist, according to the Secret Constitutions, in the United States. Their labors have never been suspended, though withdrawn for a time from the public eye—their authority has never been, and cannot be, abrogated. They hold in their archives certified copies of the Secret Constitutions, derived from the Grand Consistory held at Paris in 1761. Their succession of officers and members has been regularly and duly continued, and the Great Light of 'Sublime Masonry,' which has been confided to their keeping, like the sacred fire of the Vestals, has been preserved unextinguished on their altars."

¹"In deference to the Constitution of the York Rite practiced in this country, it waves its rights and privileges, so far as they relate to the first three degrees of Ancient Craft Masonry, which long before the establishment of any Supreme Council in this hemisphere, were under the control of Symbolic Grand Lodges." See circular letters of both Northern and Southern Supreme Councils, 1845. "The object of the Supreme Council is not to interfere with the rights of any other bodies, but simply to preserve from decay or innovation those Sublime truths and ineffable mysteries which, while they throw a brighter light upon the pure system of Ancient Craft Masonry, can be attained only by those who have sought for light in the deepest recesses of the Masonic Temple. They ask, therefore, as the legal guardians of these invaluable treasures, the sympathy and fraternal kindness of their Brethren, to whom they take this occasion of offering the right hand of brotherly love and affection."—*Charleston Circular*, 1845.

Past Masters in the Grand Lodge."¹ "On January 21, 1802, a warrant of constitution passed the seal of the Grand Council of Princes of Jerusalem for the establishment of a Master Mark Mason's Lodge in the City of Charleston, S. C." "Besides those degrees, which are in regular succession, most of the Inspectors are in possession of a number of detached degrees given in different parts of the world; and which they generally communicate free of expense, to those Brethren who are high enough to understand them. Such as select Masons of 27, etc., making in the aggregate fifty-three degrees." As to the Mark and Past Master's Degrees, all authority over them was surrendered to the R. A. Chapters, at that time springing into existence. Independent lodges of Mark Master Masons having no governing head were afterward established in this country, and continued in operation for a series of years; until the Gen. Grand Chapter assumed jurisdiction over both the Mark and Past Master's Degrees as "honorary grades," and incorporated them into their system.

No! Brethren, the intermeddling complained of, lies at the door of the spurious bodies established by the impostor Joseph Cerneau, *et id omne genus, progeniesque*, whose illegitimate works are ever and anon exhumed and revamped for sinister purposes. It ought, methinks, to be a sufficient refutation of the charge of our intermeddling with other departments of Masonry, that the leading Brethren of both our Northern and Southern Supreme Councils, ever since their establishment, have been active leaders in Symbolic Grand Lodges, Grand Chapters of R. A. Masons, and Grand Encampments of Knights Templar, the only other departments of Freemasonry in our land which we recognize and acknowledge.

"No Masonic power professing our Rite, or any of its dependent associations, can, under any pretence whatever, amalgamate or associate by representation or otherwise, with any other power, or with any association depending on any other Rite, nor consent to become a section or dependence thereof, without renouncing the object of its institution, and losing *de facto* its sovereign attributes." This fundamental law applicable to any department of Freemasonry is a truism, and surely needs no argument to support it.

¹ This practice was never adopted by the regular "Sublime Freemasons" in this Northern Jurisdiction.

I am well persuaded that our Supreme Grand Council will ever continue, as it has heretofore done, to illustrate the truth of one of its own sentiments, that "Sublime Freemasonry is unobtrusive, a divine manna for the clear-sighted to gather—everyone according to his own taste and ability." We claim not to keep the vineyards of others, and we challenge to the proof that we have ever trenched upon them. And while we guard, as we are bound to do, our own possessions, we hope to be permitted to sit peaceful and undisturbed "*under our own vine and fig-tree!*"

The institution of the official dignity of Sovereign Grand Inspector-General, in 1786, and the adoption of the constitutional provisions, by which, on the decease of the great Frederick, his authority and duties over our order in both hemispheres were transferred to a limited number of Brethren in each nation, operated practically as a distribution among many Brethren of the high Masonic powers and prerogatives, originally possessed by one Grand Master. Notwithstanding the numerous efforts made to enlighten Brethren as to the true nature of the 33d Degree "governing itself and all others" of our said Rite, and conferring rights and powers, and imposing duties "agreeably to the Grand Constitutions" of our order, of an executive character,¹ it is still generally

¹ I will fortify my statement with that of our M. Puis. Bro. Dalcho, whose authority in a matter of this kind cannot be gainsaid. I quote from page 116, appendix to his oration delivered before the Sublime Grand Lodge of Charleston, S. C., March 21, 1803. "By the Constitution of the Order, which was ratified on October 25, 1762, the King of Prussia was proclaimed as the chief of the Eminent Degrees, with the rank of Sovereign Grand Inspector-General and Grand Commander. The higher Councils and Chapters could not be opened without his presence or that of his substitute, whom he must appoint. All the transactions of the Consistory of the thirty-second degree required his sanction, or that of his substitute, to establish their legality; and many other prerogatives were attached to his Masonic rank. No provision, however, had been made in the Constitutions for the appointment of his successor; and, as it was an office of the highest importance, the utmost caution was necessary to prevent an improper person from obtaining it. The King, being conscious of this, established the thirty-third degree. Nine Brethren in each nation, from the Supreme Council of Grand Inspectors-General, after his decease possessed all his Masonic prerogatives and power over the Craft. They are the Executive Body of the Masonic Fraternity, and their approval is now necessary to the acts of the Consistory, before they can become laws; and from their decision there can be no appeal."

In 1825 I received from Moses Holbrook, M.D., at that time Sov. Grand Commander of the Charleston Supreme Council, a letter in answer to some inquiries relative to the subject in question, from which letter I make the following extracts: "All the transactions of S.P.R.S. required the sanction of Frederick William II. (who had for many years been the head and patron of the Order), or that of his substitute, to establish their

but most erroneously considered as an "honorary" distinction merely, and as an ordinary degree in Freemasonry; and one to which all Brethren having the usual qualifications required for initiation into most of the lower degrees have a right to aspire.

The tenure of office in a Supreme Grand Council being for life, a seat in such a body can be vacated only by death, resignation, or removal from its jurisdiction. This is a fundamental law, and may not be changed, though its inevitable tendency is to exclude from our little circle some good, true, and worthy Brethren, who would, no doubt, adorn our assemblies, and prove faithful conservators, regulators, and governors of our Rite.

By being tenacious of official station, I may be the means of excluding Brethren whose councils are needed; and I may also stand in the way of the just preferment of my compeers. Moved by reasons like these I have named, and desirous of setting an example, which if discreetly followed may, without violation of our organic laws, serve in a degree to modify what is, albeit without good reason, deemed too exclusive a feature in our "sublime system," I have concluded to resign the official station I now hold in this council. There are other considerations also which induce me to adopt this course.

By a constitutional regulation of our order, the office of chief custodian of our archives devolves upon the Sov. Grand Commander, who should, for this and analogous reasons well understood by us, be a resident of one of the Easts in our jurisdiction. Living as

legality. Many other prerogatives were attached to his Masonic rank; and not least in the consideration of the day, it was thought that in the United States, just emerged from the thralldom of the mother country, after a long and arduous struggle for their liberty, it would be highly improper to have the Masonic head and jurisdiction over the Ineffable and Sublime degrees in another country, and to pay allegiance of any kind to a foreign potentate. These difficulties, added to the importance attached to the highest office in Freemasonry, and the very great caution necessary to prevent an unsuitable person from obtaining an office so respectable, influential, and important, weighed with the King and the high Consistory over which he presided. Upon reading the respectful petitions and statements made to them during the years 1784 and 1785, the subject was referred to a highly learned and able committee, who reported this degree (thirty-third) to constitute *nine* S.P.R.S. in each nation, a *Supreme Council* of Sovereign Grand Inspectors-General; and they being duly organized, accredited, and approved, should at his decease possess all his Masonic prerogatives over the concerns of the Craft within the country or territory over which their jurisdiction extended; and their appointment was *ad vitam*. They became the Executive Body of the Masonic Fraternity within their territory. This arrangement annulled all former powers granted to individuals (Dep. Ins.-Gen.) in different parts of the world."

I do in the interior of my native State, it is not meet for me to become such custodian. Our archives, valuable and voluminous, should have a fixed and permanent depository, under the charge of their constitutional guardian.

My association for a quarter of a century with this Supreme Grand Council, and my active participation in its works and administrative duties, I have spoken of in my antecedent remarks. I avert to the fact again, and in this connection, to remind you, that it places me before you in such a position as to render, in a measure applicable to my own case, the reason for abdication advanced by my venerable predecessor, deducible from his long term of service.

My much esteemed compeer, your "Most Illustrious Inspector Lieutenant Grand Commander," Edward A. Raymond, in the event of my abdication of the presidency of this council, is pointed out by the constitutions as my successor. It gratifies me to reflect that such is the case. If there were no constitutional provision restricting my duty in the emergency named, and the selection of my successor were left to my own free choice, I could not make a selection more congenial to my feelings, or more in accordance with my convictions of duty. I have known him for three times three years twice told as a "Brother of the mystic tie," and a possessor of "the high degrees." His Masonic age and experience, derived from long and repeated services as a ruler in other departments of Masonry,¹ and the satisfaction he has given to his companions in the discharge of his administrative duties, afford an earnest that he will not be found wanting as a chief administrator in our "Ancient and Accepted Rite." I am assured that he has the requirements demanded by our Book of Constitutions, that he "can be entirely depended on, that his discretion is proof against all trials, his capacity acknowledged, and his probity untouched."

In 1859 the ambition of one man caused some trouble in this Supreme Council. Grand Commander Raymond contended that "the powers of Frederick were vested in him as Grand Commander and not in the Council as a body." He had conferred the 33d Degree upon Paul Dean, and the Supreme Council had

¹Bro. Raymond is the present Grand Master of the Grand Lodge of Massachusetts, and has been at the head of the Grand Chapter Encampment of Massachusetts (1851).

tacitly recognized him as a member. In 1860 an extra session was held, and the controversy with the Grand Commander reached the climax.

The Grand Commander refused to put certain motions. A motion was made to close the council, to be opened at four o'clock; this he refused to put, and declared the council closed until ten o'clock on the following morning.

At that hour the council was opened and the minutes read, whereupon the Grand Commander declared the council closed *sine die*.

Some of the members (five) conferred together, and being advised by Gourgas, reopened the council and proceeded with the business.

Upon the report of a committee on rules, etc., previously appointed, the council adopted the Constitutions of 1860.

The record of this session was signed by Van Rensselaer, who was elected Lieutenant Grand Commander, Starkweather, Moore, Christie, Case, and Young. A preamble and resolution were adopted, deposing the Grand Commander in effect. Gourgas, Turner, Bull, and Hubbard formally approved the proceedings; Carson also did so with some qualifications.

The Grand Commander, Raymond, disregarded the action of these members after he had left the council. Both parties published the proceedings of 1860, those for the regular session being alike, Raymond's being a record of his action in conferring the 33d Degree upon Lawson, Starkweather, and Field, who, it is alleged, by him were elected in 1857. It is said, however, that the records of 1857 show only the election of Starkweather.

Both of these factions continued to operate; we shall not, however, dwell upon the minutiae, but state that the Van Rensselaer body grew in numbers and importance. There was a large accession in 1862 of very distinguished and prominent Masons; among these were Josiah H. Drummond, of Maine, and Benjamin Dean, of Massachusetts, both of whom subsequently became Grand Commanders; Hubbard, who had been elected Grand Commander, having positively declined to serve, Van Rensselaer was chosen. Raymond and Robinson having been summoned to attend, and failing to appear, were tried and expelled.

Notwithstanding the controversies between these two bodies, the Van Rensselaer body continued to prosper until 1867. With

Deus Meumque Lux. Ordo ad Hæc.

From the Orient of the Supreme Grand Council of Sovereign Grand Inspectors General of the 33d and last Degree of the Ancient and Accepted Rite, for the United States of America; their Territories and Dependencies, whose Sacred Asylum is beneath the S. C., at the W. P. of the E., near the S. W., corresponding with 40° 42' 40" N. Lat., and 2° 0' 57" E. Lon.

To all to whom these Presents shall come, Greetings

Be it Known, That on the 17th day of the Hebrew month Shebat, Anno Mundi, 5653, answering to the 7th day of February, 1863, (C. W.) by solemn articles, the Supreme Council of Sovereign Grand Inspectors General of the 33d and last Degree of the Ancient and Accepted Rite for the Northern Jurisdiction of the United States of America, sitting at Boston, was duly consolidated with the Supreme Grand Council of Sovereign Grand Inspectors General of the 33d and last Degree of the A. and A. Rite for the United States of America, their Territories and Dependencies, sitting at New York, upon terms honorable and just alike to all parties interested therein.

Be it further Known, That the following Sovereign Grand Inspectors General, in pursuance of such consolidation, comprise the Officers of the Supreme Grand Council for the United States of America, their Territories and Dependencies. They will be recognized and respected accordingly.

the exception of four bodies in the city of New York, which had been organized prior to the schism, all others continued in their allegiance to this body. In 1867 there were twenty-eight active members on the roll.

In 1862 three Supreme Councils claimed jurisdiction over the Northern section of the United States. In April, 1862, by the records of Raymond Council, the Cerneau body, presided over by Hays, had made overtures to the Raymond faction for a union of the two, and committees were appointed to meet for the purpose of organizing for such union. January 23, 1863, it was reported to the Raymond body that there was a reasonable prospect of effecting the union, and the committee was granted full power to act. January 19, 1863, in the Hays body similar action ensued.

Under date of February 7, 1863, Articles of Union were agreed upon by which the two councils were consolidated. The number of members was increased to seventeen, and each member, and body, was required to take the oath of allegiance to the new body when they had the same status as they respectively had under the original bodies.

Raymond, Randall, Paige, Hughes, Robinson, Lawson, Field, and McClenachan of the Raymond body; and Hays, Thompson, Sickles, Roberts, Leveridge, Seymour, Banks, Jarvis, and Innis of the Hays body, constituted the membership of the united body. On the preceding page is shown the copy of the "Article of Consolidation."

April 15, 1863, Hays, having been agreed upon as Grand Commander, installed the Officers. All the members of both the former bodies were required to take the oath of fealty to the newly united body, hence the claim, set up a few years subsequently, that the Raymond body was merged in the Hays Council is entirely without foundation; moreover, when a few of the old Hays Council withdrew from the united body, the large majority, and the most eminent Brethren, remained true in their allegiance to that body.

A change was made in the constitution by which the active membership was increased to twenty-four, besides the nine officers.

The members of this united body became very active; a very large number received the 33d Degree; many new bodies were instituted, particularly in States where the Scottish Rite had not heretofore been worked, all in the Northern Jurisdiction.

Until 1864 the tenure of office had always been *ad vitam*, but at the meeting this year, amendments were passed for the triennial election of the officers and for a reduction to nine.

September 11, 1865, a session was held. Communication had been resumed with the officials of the Southern Supreme Council, but the Hays Council having declared itself as having jurisdiction over the United States, this body was not in a condition to ask the recognition of the Southern Supreme Council, as it had denounced as spurious all the various bodies which had originated in New York.

At this meeting charges were presented against Harry J. Seymour, who was Asst. Grand Master of Ceremonies. A committee of his friends of the old Hays body was appointed to try these charges. At a subsequent date the committee reported. Seymour had been duly notified to appear, but he refused to do so, and he was expelled, as will be seen by the following:

SUPREME COUNCIL, 33°

NORTHERN MASONIC JURISDICTION U. S. A.

Gr.: Orient, Boston, Massachusetts,

OFFICE OF THE SECRETARY GEN.: H.: E.:

New York, 27 A.: M.:, 5631.

At a session of the Supreme Council 33° for the Northern Jurisdiction U. S., held on the 10th day of the Hebrew month Elul, Anno Heb. 5625, answering to the nth day of September, 1865, V. E., the following action was had:

Ill.: Bro.: C. T. McClenachan, Rose +.: 33° preferred a charge with three specifications of the violation of sundry obligations by Henry or Harry J. Seymour Rose +.: 33°, said obligations being those of the 14°—16°—17°—18°—32° and 33° degrees of the A.: A.: Scottish Rite, as set forth in the Ritual of the degrees.

The charge and specifications were read in the presence of the Gr.: Commander, and the Inspectors General present.

Ill.: Bro.: Henry C. Banks, Rose +.: 33°, moved that the charge and specifications be referred to a Commission, which was carried, and the Gr.: Commander announced

Ill.: Bros.: Henry C. Banks, 33°,

John Innes, 33°,

Hopkins Thompson, 33°

said commission for the trial.

At an adjourned session of the Sup.: Council for the Northern Jurisdiction of the U. S., held December 14, 1865, the Commission rendered the following report:

Ill.: Bro.: Banks, chairman of the commission appointed to investigate certain charges and specifications presented to this Supreme Council against Harry J. Seymour, a past officer of this Supreme Council, reported that they had carefully examined the said charges and specifications, and the proofs thereof; that the aforesaid Harry J. Seymour had been duly notified to attend the meetings of the commission; had been served with a copy of the charges and specifications; that in all cases he had refused or neglected to pay any attention to such notices; and that your commission have arrived at the conclusion that the charges and specifications have been fully sustained, and offer the following resolution:

Resolved, "That the said Harry J. Seymour be, and he is hereby, expelled from all the rights and privileges of Masonry in every branch of the A.: A.: Scottish Rite."

Signed,

HENRY C. BANKS, 33:.

JOHN INNES, 33:.

HOPKINS THOMPSON, 33:.

} *Committee.*

On motion the report was received, and the resolution unanimously adopted, the members voting "viva voce" by roll-call, beginning with the Junior Member.

A true copy from the records,

Attest:

DANIEL SICKELS, 33:.

[GREAT SEAL]

Gr.: Sec.: Gen.: H. E.

A committee was appointed to take into consideration the propriety of resuming the old name, *viz.*: the Supreme Council of the Northern Jurisdiction of the United States of America "in lieu of the one at present adopted." Also it was resolved "that the Grand Commander appoint one or more delegates to repair to Charleston, South Carolina, at the meeting of the Southern Supreme Council." The report of the committee was unanimously adopted in favor of resuming the old name of the "Supreme Council of the Northern Jurisdiction of the United States." Thus it appears that this Supreme Council, composed of the most distinguished Masons among the old members of the two councils, fully recognized the Supreme Council of the Southern Jurisdiction.

Brothers Paige and McClenachan had visited the council at Charleston and an oral report was made to the Supreme Council, December 14, 1865, but it does not appear on record. Hays resigned his office of Grand Commander, and Robinson was elected, It is generally inferred that the Southern Supreme Council did not agree that they would enter into recognition with a council whose chief officer was not considered a regular member of the Scottish Rite, and had denied the regularity of the union, and Raymond being dead, Robinson was his successor. As above shown, the election of Robinson followed, so that both by election and succession his title would be perfect. The record says: "A majority of all the officers and active members of the Supreme Council were present." Lucius R Paige was appointed to visit the Southern Supreme Council at their meeting held April 16, 1866.

At the meeting of the council held in New York June 5, 1866, in the address of Robinson, Grand Commander, he stated that the Raymond Council was forced into the union with the Hays Council for self-preservation, and referred to the Brethren the question of securing friendly relations with the Southern Supreme Council.

At the Southern Supreme Council meeting held April 6, 1866, the Grand Commander entered at some length upon the occurrences in the Northern Jurisdiction, which was placed in the hands of a committee, whose report was in consonance with the views of the Grand Commander.

The report of the committee was to the following effect, namely, that Robinson had been duly appointed Lieutenant Grand Commander by Raymond before the deposition of the latter; and hence if Raymond had been legally deposed, Robinson, on his deposition, would naturally succeed him as Grand Commander, and if Raymond had not been legally deposed, still Robinson, now that Raymond was dead, would be his legitimate successor. The report added that the only legitimate members of the council at the time, after the death of Hubbard, were Moore, Case, Young, and Starkweather, that both of the factions had acted in a manner that was illegal and neither of them could be recognized. This decision did not find general acceptance and was challenged on the allegation that the assumption that the Northern Supreme Council could have only nine members was erroneous in point of law. Whether this assumption

by the committee was or was not erroneous is a matter of no moment at this time, as it is generally admitted that the Northern Supreme Council had the right to increase at pleasure the number of its active members.

The Northern Supreme Council, upon a summons from the Grand Commander, Robinson, met in Boston December 11, 1866. Moore, Case, Starkweather, and Young, although included in the summons, did not appear, and Robinson declared their seats vacant; thereupon, being himself as the only member, he then proceeded to fill the vacancies according to the provisions of the Constitution of 1786. There were then present twelve of the active and ten of the honorary members of the united council. The Grand Commander said that he was acting "with the unanimous consent of every member of that council."

The legal effect of these proceedings was a reorganization of the United Council, just as if the officers and members had elected themselves again. In form, no doubt, there was a dissolution of the United Council, and the organization of a new council, but the substance was as stated above. All members had the same status, no new oath was required, everyone was recognized as Grand Inspector-General, all the acts of the United Council were confirmed, and its actions of every kind recognized as still in full force. In every way the proceedings were nothing more or less than a formal reorganization of an existing body in deference to the requirements of the Southern Supreme Council. But although the action of the committee was intended to meet the wishes of the Southern Supreme Council, it did not satisfy the latter body, which desired to effect a perfect union, and had hoped to see the five members whom it had decided to be active members uniting in the action to be taken. The position of the New York Council was therefore still in doubt. In December, 1866, it published a full report of its proceedings; and it had already adopted a resolution, with a view to securing a union with the Boston Council, which was a copy of the one previously adopted with the same view to union, by the Boston body.

The committees appointed were as follows: *Boston Council*, Evans, of New York, Woodbury, of Massachusetts, Drummond, of Maine, Ely, of Ohio, Foss, of Illinois, Harmon G. Reynolds, of Illinois, an Honorary Member, and later Gardner, of Massachusetts. *New York Council*, Lewis Paige, McClenachan, and

Sickles, of New York, Paige, of Massachusetts, Palmer, of Wisconsin, and Barrett, of New Hampshire.

These two committees met in May, 1867, a short time before the annual session of the Boston Council. There was considerable discussion as to the details of the union, although the general terms were soon settled. Local interests as well as personal considerations created such difficulties that at one moment it seemed as if the negotiations would have to be broken off; indeed so hopeless was the outlook that several members left their seats, prepared to quit the room. Then, to quote Drummond's account, "a brother invited all to 'break bread together,' and insisted that all should accept the invitation." Before they returned to the committee-room everything had been satisfactorily arranged. The report was signed by all the members of the two committees, and adopted by the unanimous vote of each body, and the approval of the honorary members. The two councils met as equals, and all their previous actions were held to be valid, "except expulsions on account of former differences," which were rescinded. Each council consisted of twenty-eight active members, the New York Council consenting to the admission of Charles Levi Woodbury, of Massachusetts, "in recognition of his services in bringing about the union."

The two bodies by a concurrent vote met as one council. The two great commanders, Killian H. van Rensselaer, of the New York, and John L. Lewis, of the Boston Council, then conducted the Grand Commander elect of the united body to the altar, and administered to him the oath of fealty in the presence of the members of the Supreme Council. In his turn the Grand Commander administered the oath to all the members present. Other officers were then elected and installed, and a constitution was adopted, and the Northern Supreme Council was fully organized.

Until 1872 harmony prevailed in the Northern Jurisdiction. In that year H. J. Seymour, who had been expelled in 186—, put forward a claim that Hays, when Grand Commander of the "rump Council" of the Cerneanites, had given him a patent empowering him to create 33d Degree Masons and to institute a Supreme Council. He had previously, however, authorized an application to Grand Commander Drummond to be reinstated in all his rights as a member of the Supreme Council, on condition of his surrendering all his papers to the Supreme Council. It was after the rejection of this

application that Seymour began his active work, and the success of his efforts, limited as it was, encouraged others who had been members of the old Hays Council, before the union with the Northern Council, to start an annexation, styled "Cernean Supreme Council revived." These men, Hopkins Thompson, Robert Folger and others, had been members of the United Council reorganized in 1867 and had remained therein till 1881, and now set the claim that in December, 1866, the Union Council was, and that all the members were, released from their allegiance to it. They did not deny that they had taken the oath of fealty to the reorganized United Council, and had been loyal members for fourteen years, but they pleaded that their conduct arose from their ignorance of the proceedings of the council in 1866, and therefore they claimed to be a revival of the old Hays Council. As such they claimed also jurisdiction over the Southern territory, a claim which Thompson and Folger and others had unanimously surrendered in 1867. They deny also the loyalty of the Southern Supreme Council, which is everywhere accepted as the "Mother Council of the World," and the source from which came the 33d and last degree.

No regular Supreme Council has ever been acknowledged as either the Cernean Supreme Council revived or the Seymour association.

Supreme Council A.: A.: S.: R.: of the Southern Jurisdiction of the United States of America.

The following Exhibit shows the number of Active and Honorary 33ds and K. C. C. H. 's; the number of 14th and 32d Degree Members; the number of Lodges, Chapters, Councils, Consistories, and Grand Consistories.

CHAPTER IV

ROYAL ORDER OF SCOTLAND

COTLAND is a country which possesses a romantic history, and is rich in legendary lore, and both romance and legend are found in the story of the ROYAL ORDER OF SCOTLAND, the most popular of the added degrees worked by the Craft. It was difficult to obtain any reliable information as to its true history till D. Murray Lyon, Grand Secretary of Scotland, in his *History of the Lodge of Edinburgh*, gave, in 1873, a sketch of the order. It embraces two degrees, one the "Heredom of Kilwinning," which, according to one fable, was founded in the time of David I. of Scotland; the other, "The Rosy Cross," which, according to another fable, was instituted by King Robert Bruce as a reward for the aid given to him by some Templars who fought on his side at Bannockburn. As the Order of the Templars had been suppressed by Papal Bulls in 1312, some late members may have been present in Bruce's army in 1314, but we must always remember that, to quote Lyon's remark, "the fabulous stories about the early origin and royal patronage of the Royal Order must be taken for what they are worth, which, to those who value accuracy, means *nothing*." The fable that the Hautes Grades had their source in the "Mother Lodge, Kilwinning, is totally erroneous and based on ignorance or fraud, for that ancient lodge, as is shown by its records, never warranted or worked any degrees beyond the well-known "three degrees." It is true that the "Mother Kilwinning" did, in 1779, grant to some Masons in Dublin authority to form a regular lodge or society, and that the lodge so formed assumed the title of "High Knights Templars of Ireland, Kilwinning Lodge;" but all the evidence collected by Lyon and the Masonic historian, W. J. Hughan, proves that the Mother Kilwinning never claimed any authority beyond the three degrees, and is neither more nor less than a regular Masonic lodge, and that the ceremony was

unknown prior to the last century. In fact, when the Dublin Brethren, after conferring, in 1782, Royal Arch, Knight Templar, and Rose Croix degrees, petitioned the Mother Lodge for documents to establish beyond doubt the "authority and regularity of their warrant as High Knights Templars," the request was never granted, because impossible. Moreover, the Grand Lodge of Scotland, instituted in 1736, never officially countenanced any degrees beyond that of Master Mason, and has repeatedly objected to lending any support to ceremonies worked by authority of the Supreme Grand Royal Arch Chapter of Scotland. The Grand Lodge, although toleration has succeeded to opposition, still recognizes only three degrees, the only change being the adoption of the Mark as a portion of the Fellow-Craft degree. As regards the claim that the "Mother Kilwinning" possessed other degrees of Masonry, careful examination shows that it is utterly baseless, and devoid of any corroborative evidence.

There is no authority for the statement of Dr. Arnot that the Royal Order is so called because it is "the highest and most sublime degree in Masonry." He likewise stated that the "Rose Croix was got up by the adherents of Prince Charles Edward Stuart, and only received the name of Rose Croix (a translation of the R. S. Y. C. S. of the Royal Order) in 1746 or 1747. It was intended to be a Roman Catholic version, or rather perversion, of the Royal Order, this last being deemed for the French too bigoted; in other words, it was too purely religious and Protestant, although it is Christianity which it really promulgates." The Royal Order in France is said to have been established by the Pretender Charles Edward Stuart, and to be sanctioned by the Grand Orient under the title of Rose Croix de Heredom de Kilwinning, and Dr. Arnot states that the Lodge of Constance at Arras preserves the original Charter signed by the Prince in 1747. Bro. Hughan, in his valuable history, informs us that he possesses a catalogue of books advertised for sale in Paris in 1860, in which the following extract occurs:

"9. Charles Edward Stuart, roy d'Angleterre, de France, d'Ecosse et d'Irlande . . . voulant temoigner aux maçons artiésiens combien nous sommes reconnaissant envers eux des preuves de bienfaisance qu'ils nous ont prodigués, etc., créons et érigeons par la présente bulle en la dite ville d'Arras un souv. chap. primatial de R. C. X., sous le titre distinctif d' Ecosse Jacobite, qui serra régi par

les chevaliers Lagneau, de Robespierre, avocats. An de l'incarnation 5745."

A note is appended that "Le document authentique, sur VELIN, est revetu du grand sceau, de sept timbres et d'un grand nombre de signatures. C'est l'expedition originale pour le chapitre metropolitain de Paris."

The date, 5745, on this authentic document must be wrong, as that year, the era of the Incarnation, is still some four thousand years away, and if it is an error for Anno Mundi, it may be remarked that Charles Edward Stuart did not succeed to the empty titles enumerated above till the death of his father in 1766. All trace, however, of these documents escaped the research of such a diligent inquirer as Bro. Hughan, who comes to the conclusion that it is an error to connect the Royal Order with the Rose Croix, as the ceremonies differ essentially, the former possessing a very peculiar and quaintly rhythmic ritual.

With regard to the name Heredom of Kilwinning, many derivations of the word have been given. Some give it a Greek origin and interpret it as Holy House, others go to the Hebrew, and, as it is plural in form, translate it by "Rulers," others derive it from "Heroden, a mountain in Scotland," without assigning any reason; Bro. Hughan takes the safe course of concluding that as the rituals of both degrees do not reveal the secret, the subject can not be definitely decided one way or another. The word occurs under the form Harodim as well as Heredom, the latter seeming to be a Saxon term of the same form as Kingdom, which might be represented in modern German by Herrthum or Heerthum.

The earliest records, strangely enough, relate to England, not to Scotland, as may be seen from the following list of regular chapters, according to seniority:

Decree of Seniority.	List, etc.	Date.
1.	Grand Lodge at the Thistle and Crown, Chandos Street..	Time Immemorial
2.	Grand Chapter at the Thistle and Crown, Chandos Street.	"
3.	Coach and Horses, Welbeck Street.....	"
4.	White Boar's Head, Exeter Road	"
5.	Golden Horse Shoe, in Cannon Street, Southwark	December 11, 1743.
6.	The Griffin, in Deptford, in Kent.....	December 20, 1744.
7.	Grand Chapter at The Hague, empowered to act as Grand Lodge	July 22, 1750.

Decree of Seniority.	List, etc.	Date.
8.....		October 12, 1752.

16. (8) At Martinique (?).....		July 4, — —
17. (9) At St. Domingo.....		July 4, — —
18. (10) At Brest.....		July 4, — —

Here we find in London a Grand Lodge and a Grand Chapter, evidently the governing body of the order; two other subordinate bodies also described as "immemorial." and two, Nos. 5 and 6, of an earlier date than the Scottish Grand Lodge of Edinburgh which was originally No. 7 on the above list, the Grand Chapter at The Hague. The record-book gotten up for "The Brethren of H. R. D. M., belonging to the Hague," is stated to belong to the Grand Chapter termed the "Grand Lodge of the Royal Order at Edinburgh constituted July 22, 1750." Other records show that the Royal Order of Scotland (in England) existed much earlier than any of the other degrees in the United Kingdom except the "first three." The Royal Arch is alluded to in print in 1744, but is not again mentioned till 1752, and the minutes do not begin till ten years later. In both, the evidence of the existence and activity of the Royal Order during the early part of the last century gives it a position superior to all additional degrees, and thus it can claim a very respectable antiquity. The notion that it was fabricated by the Chevalier Ramsey has been perfectly refuted by Bro. Gould in his history, and may be dismissed from consideration. Bro. Lyon seems to incline to the opinion that it is not of Scotch origin, alleging the fact that certain privileges were allowed to No. 7 in the list of chapters "on an acknowledgment once a year to the Grand Lodge from whom it derived its title at a quarterly Grand Lodge meeting which is always held at London on the fifth Sunday in the months having so many," and arguing therefrom that a body of Scotch origin would not so far desert its relig-

ious principles as to hold constitutional meetings on the Sunday. There is evidence, however, that in England "Masters'" lodges did meet on Sunday. To sum up the whole matter in the words of Brother Hughan, "we cannot get farther back than the *Grand Lodge* and *Grand Chapter* in London with three subordinates of '*time immemorial*' antiquity (so called), and the first dated constitution of December 11, 1743."

With regard to the first offshoot of the London Grand Lodge (No. 7 in the list of chapters given above), doubts arose respecting the meaning of the contraction "Prov." in the signature of the Charter constituting the new lodge. Scotland had for a long series of years been in very close relation with the United Provinces of the Netherlands. In 1444 a contract was made between the royal burghers of Scotland and the latter power by which Scotch traders were freed from several duties and governed by the law of Scotland. Among the Scots residing in Holland at the beginning of the 18th century was William Mitchell, a teacher of languages. It is stated that he had been admitted to the Royal Order in France in 1749, and in London in 1750. In this latter year Mitchell and a Brother, Jonas Kluck, of the Netherlands, presented a petition to the Pro. G. M. in South Britain, asking the London Grand Lodge for authority to enable them and other residents at The Hague to found a Prov. Grand Lodge there. The petition was duly granted, and Brother William Mitchell was appointed Prov. G. M., and the Prov. Grand Lodge was duly constituted at London, July 22, 1750. The official register is as follows:

"I did this day attend at the house of Brother Louis, S. N. C. R. T. Y., the sign of the Golden horse Shoe, in Cannon Street, in Southwark, and did then and there constitute the following brethren residing at The Hague into a regular Chapter in full form, and did constitute and appoint our Right Worshipful and highly honored Brother William Mitchell, known and distinguished among the Brethren of the Order by the sublime title and characteristic F. D. L. T. Y., and Knight of the R. Y. C S., etc., T. R. S. T. A., by delivering the patent, etc., in due form, as usual, for the constitution of Chapters in foreign parts, and did, by virtue of my authority, exchange his characteristic, etc., for that of R. L. F."

The place mentioned, the Golden Horse Shoe, was the house where the No. 5 chapters and lodges were accustomed to assemble.

The seal on the diploma appointing Brother Mitchell Prov. G. M. has been destroyed, but that on the Charter of the Prov. Grand Lodge and Chapter exists. The design represents a bridge of five arches, and above it is displayed the letter Z, and recalls to mind the bridge with the letters L. O. P., well known to members of the 16th Degree of the "Ancient and Accepted Rite." The difficulty, as we have said, is connected with the signature. The presiding officer signed by his characteristic, and as may be seen in the fac-simile in Lyon's history the words "Prov^l. Gra^d. Mas^r." stand above, and the words "In. So. B." below, the seal. Does the contraction Prov^l. mean "Provincial" or "Provisional?" If the former meaning is assigned to it, it is difficult to see how it could be applied to the President of the original Grand Lodge and Grand Chapter, and therefore it is safer to assume that it means "Provisional" and that the President for the time being was Grand Master *pro tempore*. The Royal Order, it may here be added, has always been and still is Christian in character, and the following prayer resembles, in its opening lines, the Old Charges of the Freemasons of the 16th century, before they were changed and adopted as the Universal Freemasonry.

"The might of the Blessed Father of Heaven, the wisdom of His Glorious Son, and the fellowship of the Holy Ghost, being the glorious and undivided Trinity, three persons in one God, be with us at this our beginning, and so guide and govern our actions in this life, that at the final conflagration, when the world, and all things therein, shall be destroyed, we may be received with joy and gladness into eternal happiness, in that Glorious, Everlasting, Heavenly Kingdom, which shall never have an end."

The regular minutes of the Royal Order at Edinburgh date from October 31, 1766. Down to 1763 the register contains only fifteen names, including Brother Mitchell, but between that date and the commencement of the regular minutes fifty were admitted. and it is recorded in the minutes of July 28, 1769, that "after much trouble and a great deal of expense they had been able to revive and establish the Ancient Order of Scots Masonry in the metropolis of their native country, which would be attested by several members of the Honorable Council." In the same year by permission of the Provost and Baillies of the city, a room was fitted up at the expense of the Grand Lodge, in a "central" situation. From the commencement of those regular minutes the sequence of the high

officials can be traced. Down to July 4, 1776, Brother William Mitchell was the Grand Master or Governor of the "Royal Order." He was succeeded by Brother Jas. "Secresy" Kerr. He resigned in 1776, and was succeeded by Brother William "Honor" Baillie, Advocate (afterward Lord Polkemmet). When he resigned in 1778, Brother William Charles "Eloquence" Little, Advocate, succeeded him. The chair of Deputy Grand Master was filled in 1786 by Brother William "Worship" Mason, who was admitted to the degree at Edinburgh A.D. 1754. When he resigned in 1789 there was elected Dr. Thomas "Activity" Hay, who died in 1816. In 1805 he was Grand Master, but there does not appear to have been any minutes recorded from that date to 1813.

During the period from 1770 to 1780 the office of Deputy Grand Master was filled by General Oughton, Brother Little, the Earl of Leven, and Lord Westhall. Of the four of these high officials, three were Grand Masters of Scotland, showing that at this period the Craft showed great favor to the Royal Order. But as may be seen from the fact that no minutes were made between 1805 and 1813, the order was becoming dormant, and it continued so in Scotland till the revival in 1839.

Abroad, the Royal Order spread and flourished. In Brother Hughan's catalogue of books mentioned in the preceding page, there is the entry: "No. 945, of the year 1808, is entitled

"Tableau général des officiers et membres, composant le R. chapitre du grand et sublime ordre de H-d-m de Kilwinning, sous le titre distinctif du *Choix*, constitute par la grande loge de l'ordre séante à Edinbourg, le 4 Octobre, 1786. Sous les auspices de Mgr. le Prince de Cambacérés, grand maître d'honneur en France."

Nos. 946 and 953 contain "tableaux" of the officers of the foregoing, of November 30, 1808, and A.D. 1810, the latter having another list "du même ordre séant à Rouen," 1810, in the same volume.

Prince Cambacérés, Arch Chancellor of the French Empire, was succeeded in his office of Provincial Grand Master by the head of the Ducal house of Choiseul.

The above-mentioned Charter, for the Chapter de Choix, from the Grand Lodge of Edinburgh in 1786, was addressed to Nicholas Chadouille, Avocat en Parlement, and other Brethren. A few months previously a Charter dated Edinburgh, May 1, 1786, had

established a Provincial Grand Lodge of Heredom of Kilwinning, constituting John Matthews, a merchant of Rouen, Provincial Chief, with powers to disseminate the order. Both these documents are signed by William Charles Little, Deputy Grand Master, William Mason, and William Gibb. To commemorate the event the Chapter du Choix struck a medal which is engraved in the Tresor Numismatique Napoléon. It represents between a draw-bridge open, sinister and a ladder dexter, a tower enbattled supporting a pillar on which is an open book. On the front of the tower are two square stones, one exhibiting the square and compasses, the other the letter R. The medal is inscribed with the following legend:

Obverse, L'ORDRE DE H-D-M. INTRODUIT EN FR. PAR J. MATHEUS, G. M. P., 1786.

Reverse, in eleven lines, (1) T-R-S-T-A. N. CHADOUILLE, 1786. (2) T-R-S-T-A. L. T. DORBAN, 1789. (3) T-R-S-T-A. A. C. DURIN, 1806. (4) T-R-S-T-A. C. A. THORY, 1807. DEPUTE T-R-S-T-A. J. P. ROUYER.

In exergue, in three lines, the last curving, CHAP .: DE H-D-M. DU CHOIX A PARIS, 1809, JALEY FECIT L .: A-P-HT-N."

Jaley being the artist's name. The Medal is of copper.

A short time after the establishment of the order in France, a Provincial Grand Master was appointed for Spain, Mr. James Gordon, a merchant of Xeres de la Frontera, whose commission was signed by Deputy Grand Master Dr. Thomas Hay, and Messrs. Charles Moor and John Brown. The Provincial Grand Lodge in France had jurisdiction over twenty-six Chapters of Heredom, including some in Belgium and Italy, but as fourteen of these chapters were not ratified by the Grand Lodge of Edinburgh from January 10, 1809, to October 4, 1811, they may have been irregular.

Coming down to our own times, we find that the following Provincial Grand Lodges and Chapters have been authorized during the last half century. Those in italics are dormant.

<i>The Netherlands, at Amsterdam</i>	July 4, 1843.
<i>Eastern Provinces, at Calcutta, India</i>	July 4, 1845.
<i>North of France</i>	1847.
<i>Sweden and Norway</i>	Jan. 5, 1852.
<i>Sardinia</i>	?
<i>New Brunswick, at St. John</i>	?
<i>Province of Quebec</i>	?

Glasgow and Neighboring Counties or Isles	Jan. 4, 1859.
London (and "Royal Bruce" Chapter)	1872.
Western India, at Bombay	?
China, at Shanghai	?
United States, at Washington, D. C	Oct. 4, 1877.
Lancashire and Cheshire, at Manchester	?
Aberdeen	?
County of Yorkshire, at York	1886.
South-east Africa, at Durban	?

ROYAL ORDER IN THE UNITED STATES.

As early as 1752 a chapter was formed in Virginia, but seems soon to have ceased all activity. We must come down to the year 1877 for the foundation of the Provincial Grand Lodge in the United States. The Warrant signed at Edinburgh October 4, 1877, is as follows:

CHARTER FOR ROYAL ORDER IN THE UNITED STATES.

IN THE NAME OF THE HOLY AND UNDIVIDED TRINITY.

{

 SEAL
 R. S. Y. C. S.

}
 We, Sir John Whyte, W. D. M., President of the Judges and Council of the Great S. N. D. R. M.: Warder of the T. W. R. of R. F. R. S. M. N. T.: Deputy Grand Master and Governor of the High and Honourable Orders of H. R. M. of K. L. W. N. G and the R. S. Y. C. S.: Sir Alexander, S. T. N. T. H., Senior Grand Warden, Sir William, B. T. Y., Junior Grand Warden, and the Remanent Knights Companions of the Royal Order of R. S. Y. C. S. in Grand Lodge assembled—

TO

Sir Albert V. G. R (Pike), Knight of the Order of the R. S. Y. G S., send greeting in God Everlasting.

By virtue of the authority vested in US from time immemorial WE do hereby grant unto you and the rest of the Right Worthy and Worshipful Brethren of the Royal Order of H. R. M. and of the R. S. Y. C. S. in the United States of America, full power, warrant and authority to hold a Chapter of the order of H. R M. in WASHING-

TON, or elsewhere within the United States of America, so long as you and they shall behave becometh as Worthy Brethren of the said Order, or until the powers hereby conferred shall be withdrawn, which the Grand Lodge of our Order reserves full power and authority to do when they consider proper, with full power to you to remove the same from place to place, but always within the United States of America, as occasion shall offer for the good and glory of the Order, you and they conforming to the laws and regulations of the Grand Lodge transmitted to you now or afterwards, and we do hereby appoint you T. R. S. T. A. of the said Chapter and grant you full power, warrant and authority to appoint proper officers to assist you therein, viz.: a Deputy T. R. S. T. A., a Senior Guardian, a Junior Guardian, a Secretary, a Treasurer, a Marischal, a Deputy Marischal, and a Guarder, who shall act as Examiner and Introducer.

AND FURTHER, know you that for the good and promotion of the Order of H. R. M. in general we do hereby empower you to form a PROVINCIAL GRAND LODGE of the said Order, and to nominate, constitute and appoint you, the said Sir Albert V. G. R., to preside and rule over and govern the same and the Brethren thereunto belonging, so long as you shall act conformably to the Laws and Rules of our Grand Lodge, and so long as this Charter and the powers therein conferred shall continue unrecalled, and we do hereby authorize, empower and charge you to take upon yourself, the title of PROVINCIAL GRAND MASTER of the Order of H. R. M. for the United States of America, being the Province hereby placed under your superintendence; and we do hereby grant you full power, warrant and authority to appoint proper officers to assist you in the high office hereby on you conferred, to consist of the following number and denominations: one Deputy Provincial Grand Master, a Senior Provincial Grand Warden, a Junior Provincial Grand Warden, a Provincial Grand Sword-bearer, a Provincial Grand Secretary, a Provincial Grand Treasurer, two Provincial Grand Marischals, a Senior Provincial Grand Steward, and three other Provincial Grand Stewards, and a Provincial Grand Guarder.

AND FURTHER BE IT KNOWN to all and every one of the Brethren that we hereby invest you with full power, warrant and authority to appoint such persons to be your officers as you shall think are most proper and fit for each respective post either in your Chapter or Provincial Grand Lodge, without consulting or asking the consent

or approbation of any Brother of the Order whatsoever, unless of your own free will you shall think proper to pay such compliment, which we deem expedient and therefore recommend.

AND FURTHER, we hereby invest you with full power, warrant and authority to depose or displace from his or their offices any officer or officers, who have been guilty of improper conduct or dignity to your Worship, or to fine, mulct or amerce them, or any of them, for the same, without being obliged to bring them to a formal trial, or asking the consent or approbation of the Brethren for so doing, unless you shall of your own free will think proper so to do. But be it also known that if it shall appear to your Provincial Grand Lodge to be for the good of the Order in your Province that you should relinquish, or restrict your privilege of appointing or displacing your office-bearers, either in your Chapter or Provincial Grand Lodge, or in both, and if you see proper to consent to the same, it shall be in your power so to do, notwithstanding any existing general law of our Grand Lodge appearing to the contrary, and to cause a resolution or law to that effect specifying how and where the elections are to be in future conducted, to be endorsed upon or annexed to this Charter, and which when signed by you and registered in the Minute Book of your Provincial Grand Lodge, and a copy thereof, certified by your Provincial Grand Secretary, transmitted to and approved by our Grand Lodge, shall thereafter be as good and valid a law, so far as regards your Chapter and Provincial Grand Lodge, as if it had been made by our Grand Lodge of the R. S. Y. C. S.; and being entered in our Record Book shall be irrevocable by you and your successors in office unless by application to and with the approval of our Grand Lodge; it being, however, declared that nothing shall affect your right as Provincial Grand Master or the rights of your successors in office to appoint your or their Deputy.

AND WE FURTHER strictly require of the Brethren in general, your Provincial Grand Officers as well as others, to respect, acknowledge and obey you, the said Sir Albert V. G. R., and pay you due respect as HEAD RULER and GOVERNOR over them and their Chapter or Chapters in your said Province: And we do hereby appoint you to hold quarterly meetings of your Provincial Grand Lodge for regulating the affairs of the Order of H. R. M. in your Province.

AND FURTHER, we hereby empower you and your Chapter to advance to the Royal Order of H. R. M. (on paying a fee not less

than two guineas, of which ten shillings and sixpence shall be transmitted to our Grand Lodge), such Master Masons as are companions of the Royal Arch Chapter and as are well-known to you and your Brethren to be worthy of that High Honor, but with this proviso, that you shall not have it in your power within your Provincial Grand Lodge or elsewhere to promote any Brethren of H. R. M. to the Sublime Order of the R. S. Y. C. S., without special authority obtained from our Grand Lodge for that purpose, nor even then, unless on payment of a fee of at least one guinea (of which ten shillings and sixpence shall be transmitted to our Grand Lodge).

AND FURTHER, be it known to you that we prohibit and discharge you and your Provincial Grand Lodge or Chapter from granting any PATENTS or LETTERS OF CONSTITUTION to Chapters, or Diplomas to the Brethren or Knights, under any pretence whatever, all such things being issued by us alone, and diplomas being so issued free of charge, on payment of the fees above mentioned, payable to us on advancement to the Order of H. R. M. and promotion to the Sublime Order of R. S. Y. C. S.

AND FURTHER, be it known to the Brethren in general that it is not, nor can it be, in their power to depose or displace you or your successors in office from the high office hereby on you conferred, except for high or enormous crimes tending to the scandal and detriment of the Order, and not then without bringing you to a regular trial, and an account of the proceedings therein, with the crime and sentence of the Council, being first sent to and approved by our Grand Lodge at Edinburgh.

AND FURTHER, we empower you to relinquish, give up, or resign your said office with the powers and privileges attached thereto as aforesaid, in case you shall think proper or be desirous so to do, to any worthy qualified Knight of the Order of the R. S. Y. C. S., and to no person whatsoever, under that degree, but your successor or successors, in office, before he or they shall exercise any of the powers connected with said office must be approved by our Grand Lodge.

AND FURTHER, be it known to you, that if you or your successors in office are guilty of acting contrary to our will and pleasure or any of the Laws, Rules and Regulations now appointed by us, or which may hereafter be appointed for your observance by authority of our Grand Lodge, from which you hold this Constitution or

Charter, These Presents and all power thereunder shall forthwith cease and determine without any formal revocation on our part, and you and they shall be rendered incapable of holding any Grand Office or authority in the Royal Order, and also be liable to be extruded for contempt and disobedience.

That all companions of the Royal Order admitted in your Provincial Grand Lodge or Chapter may be duly enrolled in our Record Book, we do particularly direct your attention to the Twenty-sixth Article of our Constitution and Laws as revised and approved on Sixth January, one thousand eight hundred and sixty-two.

And for every Authority, Power and Privilege herein above mentioned, this shall be your sufficient Warrant, Patent and Charter.

In testimony whereof, this, our Charter, written by Alexander Blues Wyllie, clerk to our Grand Secretary, is subscribed by JOHN WHYTE-MELVILLE, of Bennochie and Strathkinnes, our Deputy Grand Master and Governor; ALEXANDER HAY, our Senior Grand Warden; WILLIAM MANN, our Junior Grand Warden; GEORGE MURRAY, our Grand Treasurer, and JOHN BROWN DOUGLAS, our Grand Secretary; all Knights of the R. S. Y. C. S., duly sealed and thereupon approved and issued by our Grand Lodge of the Royal Order, at Edinburgh, this fourth day of October, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Restoration of the Order 564.

J. WHYTE-MELVILLE, W. D. M.

ALEX. HAY, S. T. N. T. H.

W. MANN, B. T. Y.

GEORGE MURRAY, G. T.

J. B. DOUGLAS, G. S.

The "charter members" were thirteen in number, including several well-known and eminent Brethren (whose labors for the Craft and deep interest in its welfare are as familiar to English Masonic students as to those in America), all of whom became members of the Grand Lodge at Edinburgh.

FOUNDERS' NAMES, A.D. 1877.

Brother Albert Pike, Washington, D. C.

" John Robin McDaniel, Lynchburg, Va.

" Henry L. Palmer, Milwaukee, Wis.

- Brother Jas. C. Bachelor, New Orleans, La.
 " Vincent L. Hurlbut, Chicago, Ill.
 " Josiah H. Drummond, Portland, Maine.
 " William M. Ireland, Washington, D. C.
 " Robert McC. Graham, New York, N. Y.
 " Albert G. Mackey, Washington, D. C.
 " Enoch Terry Carson, Cincinnati, Ohio.
 " Charles Roome, New York, N. Y.
 " Charles Eugene Meyer, Philadelphia, Pa.
 " Samuel C. Lawrence, Boston, Mass.

The number of members in the order was divided equally between the Southern and Northern Masonic Jurisdictions of the United States; the total number was fixed at one hundred and fifty, with a margin of twenty-five.¹ Election is by ballot, which must be unanimous. At present, September, 1900, there are two hundred and fifty-seven members. There are no by-laws for the regulation of proceedings in the United States except the rules of the order, and the series of standing resolutions.

The Provincial Grand Lodge meets alternately at Washington, in the District of Columbia, and in New York, holding their annual meetings "on the Monday nearest the day fixed for the meetings of the Supreme Council." The only special regalia worn on these occasions are the "star and garter," the aprons and cordons not being obligatory. The archives of the Provincial Grand Lodge preserve sketches and portraits of each member. Since 1883 the ladies of the Knights Companions have been admitted to their annual gatherings and banquets.

The proceedings on these occasions include an "allocution" delivered by the Provincial Grand Master. The addresses of the first Provincial Grand Master, the late General Albert Pike, have been printed in published proceedings, and from them the following extracts are taken:

Antiquity of the Royal Order. — "I value the Ancient Order, for it is eminently Masonic. It has close kinship with the three degrees of Ancient Craft Masonry. Its quaint old Ritual has throughout the old-fashioned simplicity of the Masonry of the sev-

¹ Several years ago the Constitution was changed and the number is no longer limited.

enteenth century, when it and those degrees were all the Freemasonry that existed in the world. We read it and breathe the air of the old days. After having been long conversant with the elaborate ones of the present day, it is like going from the pomp and show of cities into the forest and prairie, to live among the frank hunters and sturdy husbandmen who have been the builders of the States, to enjoy the long days of October in the woods, and sleep at night under the protecting stars." (October 16, 1882.)

Primary Aim of the Rite.— "We represent, not altogether unworthily, I hope, the intellect and the scholarship of the Freemasonry of the United States: Our Father who is in Heaven has given us the opportunity to serve Masonry worthily, and make it the debtor of the Royal Order, by leading the Masons of the 'Blue' Lodges to the living springs of truth, making known to them the true meaning and profound significance of their most ancient symbols, and teaching them to set a higher value upon their Freemasonry, and to elevate it, in the estimation of the world." (September 24, 1883.)

"To see united into a Provincial Grand Lodge of our old and venerable Order a certain limited number of good men and Masons, residing in all our States and Territories, between whom the new ties of a more perfect Brotherhood might be created, and year by year grow stronger and more enduring." (October 20, 1884.)

Historical Basis of the Order.— "It was established, our Ritual declares, 'to correct the errors and reform the abuses which had crept in among the three degrees of St. John's Masonry.' It is 'for the preservation in its purity of St. John's Masonry.' One who comes to seek admission here declares that he is 'a Mason from a Lodge dedicated to St. John,' and he comes to seek a word which was lost, and which by our assistance he hopes to find.

"The Royal Order has also the early symbolism of the 'Blue' degrees, and not that borrowed from the Alchemical and Hermetic books. The column of the Tower of Refreshment has a square base of pedestal, intended to be a cube or perfect ashlar. The shaft of the column has nine windows looking East, one for each flight of seven (7) steps. On the column is a triangular entablature; on this a book and under the letters upon its face a square, a level, and a plumb rule; over these a pair of compasses extended to a right angle. The stairway has three landing-places and the lowest flight

of stairs is of seven steps, the second of five, and the 'apex' of three."

"It was an innovation to make the possession of the Degree of the Royal Arch a necessary qualification for admission into the Order; for it was at first open to Master Masons." (October 15, 1888.)

The present Provincial Grand Master is Brother Josiah H. Drummond, of Maine; nominated to succeed General Albert Pike. The Deputy Provincial Grand Master is Thomas H. Caswell of California.

The remaining officers duly appointed forming the tableau to date are:

Prov. Senior Grand Warden—George M. Moulton, of Illinois.

Prov. Junior Grand Warden—Charles H. Fisk, of Kentucky.

Prov. Grand Secretary—W. Oscar Roome, of District of Columbia.

Prov. Grand Treasurer—Thomas J. Shyrock, of Maryland.

Prov. Grand Sword Bearer—F. M. Highley, of Pennsylvania.

Prov. Grand Banner Bearer—Nicholas Coulson, of Michigan.

Prov. Grand Chaplain—Rev. M. Carmichael, of Virginia.

Prov. First Grand Marischal—G. E. Corson, of District of Columbia.

Prov. Second Grand Marischal—J. H. Olcott, of District of Columbia.

Prov. Grand Guarder—James Hays Trimble, of District of Columbia.

Prov. Grand Stewards—Allison Nailor, Jr., of District of Columbia; William Bromwell Melish, of Ohio; Harrison Dingman; H. H. Williams, of Hawaii.

The constitutions and laws of the Royal Order, as drawn up in London at the foundation of the order in 1742, remained unchanged till January 5, 1767. By one of these laws, Rule 19, fees are to be paid to the Grand Lodge of Edinburgh by members in England, and the Constitution declares that the King of Scotland is Perpetual Grand Master, and therefor not an elective officer.

By the statutes, the Grand Lodge of R. S. Y. C. S. and Grand Chapter of H. R. M. can only be held in Scotland, and the former reserves to itself the right to promote to the honor of Knighthood

of the R. S. Y. C. S., but usually delegates the power to that effect to the Provincial Grand Masters, by personal patents. '

The Grand Lodge officers are similar to those already noted for the Provincial Grand Lodge, only the Brother who rules that body, until a king of Scotland (called of Great Britain and Ireland) is able to become Grand Master, is termed "Deputy Grand Master and Governor," a Deputy Governor being also appointed, all having corresponding rank in the Grand Chapter of H. D. M. The D. G. M. (and Governor) and Deputy Governor of the Grand Lodge are *ex-officiis* Warder and Deputy Grand Warder of the T. W. R. of R. F. R. S. M. N. T., and the Provincial Grand Master enjoys a similar status in his Province; as also T. R. S. T. A. of his own chapter.

The 4th of July is election-day for the Grand Officers and also for subordinate chapters out of Scotland, or first following lawful day, if the 4th shall be a Saturday or Sunday. The other stated meetings of Grand Lodge and Provincial Grand Lodges are October 4th, January 4th, and April 4th, with the same exceptions.

Members acting as Grand Officers *pro tem.* have power to sign diplomas, charters, patents, etc. A copy of a certificate issued to William James Hughan, the historian, under the seal of the Royal Order at Edinburgh, dated March 6, 1867, is annexed:

COPY OF THE ROYAL ORDER CERTIFICATE, A.O. 553.

IN THE NAME OF THE HOLY AND UNDIVIDED TRINITY.

We, Sir John Whyte, W. D. M., President of the Judges and Council of the Great S. N. D. R. M., and Warder of the T. W. R. of R. F. R. S. M. N. T., Deputy Grand Master and Governor of the High and Honourable Order of H. R. M. of K. L. W. N. G and the R. S. Y. C. S.; Sir Alexander, S. T. N. T. H., Senior Grand Warden, and Sir William, B. T. Y., Junior Grand Warden, and the remanent Knights Companions of the ROYAL ORDER of the R. S. Y. C. S. in Grand Lodge assembled.

We do hereby certify and declare that our Trusty and well Beloved Brother William James Hughan,

GREEN

WILLIAM JAMES HUGHAN.

Master Mason of the Lodge Number 594, holding of the Grand Lodge of England, and Companion Royal Arch Chapter, Number 50 in Scotland, whose signature is on the margin, having been advanced to the Order of H. R. M. of K. L. W. N. G. at Glasgow, in the Chapter of the Provincial Grand Master for the County of Lanark, and others, on the twenty-eighth day of February, one thousand and eight hundred and sixty-seven, by the characteristic of *Geometry*, and promoted on the said twenty-fifth day of February, one thousand eight hundred and sixty-seven, to the Honourable Order of the R. S. Y. G. S. in the Provincial Grand Lodge for the County of Lanark, and others, has been recorded in the Books of our Grand Lodge here, and therefore we recommend him as a lawful member of the ROYAL ORDER, Brother of H. R. M. and Knight of the R. S. Y. C. S., to all Knights and Brethren of the Order wherever found and established.

SCARLET

Given under our hands and seals of the *Royal Order* at *Edinburgh*, this sixth day of March, A.D. one thousand eight hundred and sixty-seven, and of the Restoration of the Order 553.

Gustavus K. Flindt, P. T. W. D. M.

T. D. Porteous, Prov. Grand Sy. David Sutherland, P. T., S. T. N.
F. H.

J. B. Douglas, Grand Sec'y, G. L. Brodie, P. T., B. T. Y.

The minimum fee for the H. D. M. and Knighthood is three guineas; subject in all cases to the approval of the presiding officer as respects promotion to the "R. S. Y. C. S." Conviction of crime by any court of justice involves *permanent extrusion*.

On the 4th of April, 1855, the Supreme Council 33d Degree of Scotland, and on the nth of May following, the Grand Lodge of the Royal Order agreed to a reciprocal treaty, by which only members of the Royal Order can be admitted to the 18th Degree, and all Knights of the Royal Order, provided they are Royal Arch Masons, have special privileges as to fees in joining the A.:A.:S.: Rite.

M. W. Brother John Whyte-Melville was the Deputy Grand Master and Governor for many years, and on his decease was succeeded by the Right Honorable, the Earl of Rosslyn, in 1885, who died September 6, 1890, and was succeeded by———. The Grand Secretary is the Scottish Masonic historian, Brother D. Murray Lyon.

The "Year of the Restoration of the Order" dates from 1314, so that A.D. 1900 or A.L. 4900 would be "*Anno Ordinis*" 576 to St. John the Baptist Day; but after that festival it would be 577. A similar mode had long been followed by the Knights Templars (which, doubtless, refers to De Molay's martyrdom), in relation to the same year, only termed "*Anno Caedis*," thus suggesting an intimate connection between the two bodies.

THE OLDEST MASONIC MINUTE IN EXISTENCE.

FAC-SIMILE OF THE OLDEST MINUTE OF THE LODGE OF EDINBURGH (MARY'S CHAPEL).

ultimo July 1599

The qlk day George Patoun maissoun grenttit & confessit that he had offendit agane the dekin & mrs for placing of ane cowane to wrik at ane chymnay heid for tua dayis and ane half day for the qlk offenss he submittit him self in the dekin & mrs guds willis for qt vnlaw they pless to lay to his charge, and thay having respect to the said Georges humill submissioun & of his estait, they remittit him the said offenss, Providing always that gif ather he [or] ony vther brother comitt the lyke offenss heirefter that the law sall stryke vpoun thame indiscreta wtout exceptioun of personis. FREEMASONRY IN OTHER COUNTRIES

FREEMASONRY IN OTHER COUNTRIES

CHAPTER I

FREEMASONRY IN CANADA

BY WILL H. WHYTE, P. G. M.: K. T. OF CANADA

THE history of Freemasonry in British North America, or that part of the continent now better known as the "Dominion of Canada," is a most interesting one.

Upon the advent of Confederation, July 1, 1867, local control in each Province for the government of the Masonic Fraternity of the Dominion took a strong hold as a predominant idea, and prevailed. Each Province has now a Grand Lodge, and in order of their organization are as follows: Canada, having jurisdiction only in Ontario, 1855; Nova Scotia, 1866; New Brunswick, 1867; Quebec, 1869; British Columbia, 1871; Manitoba, 1875; Prince Edward Island, 1875; Alberta, 1905; Saskatchewan, 1906. The first marks of the Ancient Craftsman have been found in Nova Scotia. A mineralogical survey in 1827 found on the shore of Goat Island in the Annapolis Basin, partly covered with sand, a slab of rock $2\frac{1}{2}$ X 2 feet, bearing on it those well-known Masonic emblems, "the Square and Compasses," and the date 1606. Who were the Craftsmen, and how the stone came there, must be left to conjecture.

Nova Scotia.

The records of the Craft in Boston, Mass., state that Bro. Henry Price was appointed Provincial Grand Master of New England by Viscount Montague, Grand Master of the Premier Grand Lodge of England (Moderns), and that his authority was subsequently extended to all North America.

On the 13th of November, 1737, Erasmus James Phillips, an officer of the Fortieth Regiment, then stationed at Annapolis Royal, visited Boston and was made a Mason in the "First Lodge in Boston." This Bro. Phillips was a nephew of Col. Richard Phillips, the first governor of Nova Scotia and the secretary of the governor's council, and evidently obtained an appointment as Deputy from Bro. Price, the Provincial Grand Master at Boston.

The first lodge established in Nova Scotia was at Annapolis, and under authority from Boston by the St. Johns Grand Lodge of Massachusetts. Under date 1740 the minutes read:

"The R^t. Worsh^d Grand Master granted a Deputation at the Petition of sundry Brethren for holding a lodge at Annapolis in Nova Scotia, and appointed the Right Worshipful Erasmus James Phillips, D.G.M., there, who afterward erected a Lodge at Halifax and appointed His Excellency Edward Cornwallis their first Master."

Bro. Phillips, having organized this lodge at Annapolis as stated, later on—on the petition of the Brethren at Halifax in 1750—granted a Warrant for a lodge and appointed Bro. Edward Cornwallis, the founder of Halifax, 1749, and first governor of Nova Scotia (and an uncle of the Lord Cornwallis who figured in Revolutionary times in the United States), as its first Master. This lodge was instituted at Halifax July 19, 1750. Bro. Phillips held the position of Provincial Grand Master until 1758, and in the minutes of the First Lodge at Boston in 1739 is entered as Grand Master of Nova Scotia.

In 1756 lodge meetings were held in Halifax, by the Lodge of "Social and Military Virtues," No. 227, Irish Registry, then attached to the Forty-sixth Regiment of Light Infantry. This lodge is now "Antiquity Lodge," No. 1, Montreal, on the Registry of the Grand Lodge of Quebec.

The Grand Lodge of Nova Scotia is in possession of a large amount of valuable and interesting Masonic documents, among them a Charter to form a Provincial Grand Lodge, dated December 27, 1757, from the Grand Lodge of the "Ancients," signed Blessington, Grand Master, and Laurence Dermott, Grand Secretary.

On the 2d day of June, 1784, a Warrant (apparently a renewal of the 1757) was granted by authority of Grand Master Antrim, Deputy Grand Master Laurence Dermott, and Robert Leslie,

Grand Secretary. Under this Warrant, a Provincial Grand Lodge was formed on September 24, 1784—Bro. John George Pyke, Provincial Grand Master. By this Warrant, the officers "together with their lawful assistants, that is to say the regular Masters, Wardens and Past Masters only," were authorized to "nominate, choose, and install their successors upon or near every St. John the Evangelist day forever."

From 1786-1791, His Excellency, John Parr, Governor-in-Chief of Nova Scotia, was Provincial Grand Master, followed by the Hon. Richard Bulkeley, 1791-1800; Duncan Clark, 1800-1; Hon. John Wentworth, LL.D., 1801-10; and John Geo. Pyke, 1810-20. At this time, after thirty-six years, there were thirty-one lodges on the Provincial Registry. Trouble then arose over a successor to Bro. Pyke and he continued in office another year, followed by John Albro from 1821 to 1829. At this period the number of lodges had been reduced to sixteen. For another forty years this Provincial Grand Lodge continued its work until, after an existence of eighty-five years, its lodges united with the new Grand Lodge of Nova Scotia in 1869.

The subject of an independent Grand Lodge had been agitated for five years, for the Grand Lodges of England, Ireland, and Scotland had lodges chartered under their authority in this Province.

In 1861 a committee was appointed from the Provincial Grand Lodge of Scotland to act in conjunction with a similar committee from the Provincial Grand Lodge of England regarding the practicability of forming a Grand Lodge of Nova Scotia. Upon reference to the parent Grand Lodges, England refused permission. Scotland never answered. On the 16th January, 1866, a meeting of delegates from all the Scottish lodges was held, twelve out of thirteen being represented. It was decided to call a convention of all the lodges in the Province at Halifax on the 20th February, and at this meeting the Grand Lodge was duly formed and M. W. Bro. W. H. Davies elected Grand Master. From 1866 to 1869 the Grand Lodge increased to twenty-five lodges. In this latter year, the District Grand Lodge under the English Registry decided to affiliate, as did also the remaining lodge under Scotland. On the 23d June, 1869, the amalgamation took place, the twenty-five English and one Scotch Lodge uniting with the twenty-five Nova Scotia lodges under the designation of "The Grand Lodge of Ancient Free and Accepted

Masons of Nova Scotia." The three oldest lodges now working under this jurisdiction are in Halifax and are "St. Andrew's," chartered March 28, 1768, London, Laurence Dermott, Grand Secretary; "St. John's," chartered June 30, 1780, London, and "Virgin" Lodge, February 18, 1782.

1906. Nova Scotia has sixty-six lodges on the roll and a membership of 4,500.

New Brunswick.

The Province of New Brunswick previous to the year 1786 formed a part of Nova Scotia. On March 6, 1784, application was made to John George Pyke, Esq., Provincial Grand Master elect, at Halifax, by Elias Hardy, Master of Lodge 169, for a dispensation to establish a lodge of "Ancient York Masons" at Parr Town. Parr Town, now the City of St. John, was named after His Excellency John Parr, Captain General and Governor-in-Chief, and who had been elected Provincial Grand Master of the "Ancient" Masons of Nova Scotia 1786-91.

On August 22, 1792, a Warrant was granted by the Provincial Grand Lodge at Halifax for Solomons Lodge, No. 22 (now No. 6 on the Registry of New Brunswick), to be located at "St. Anns," now Fredericton, the capital of New Brunswick. On June 7, 1826, J. Albro, Provincial Grand Master at Halifax, appointed Benjamin L. Peters Deputy Grand Master for the city of St. John and the town of St. Andrews in New Brunswick. On March 10, 1829, a Warrant, No. 52, was made out by the Provincial Grand Lodge at Halifax for Albion, No. 841, St. John. This lodge, formerly also under the English Registry as No. 400, is now No. 1 on the Registry of New Brunswick.

The Act confederating the Provinces into the "Dominion of Canada" came into force July 1, 1867. This new state of political existence brought prominently to the front the Masonic status in each Province, and the formation of an Independent Grand Lodge for the Province of New Brunswick was agitated. On the 16th of August, 1867, a meeting of the Masters and Past Masters in the city of St. John was held and it was resolved to address a circular to every lodge in the Province. On the 10th day of October, 1867, the Grand Lodge of Ancient Free and Accepted Masons of New Brunswick was formed by representatives of fourteen lodges. There were nineteen lodges represented, but the delegates from

St. Andrews Lodge, 364 R. S. retired from the convention, while those from Howard, 668 and Zetland, 886 E. R, though favoring the movement, stated they had no authority to vote for a new Grand Lodge. The representatives of two others were not present when the vote was taken. V. W. Bro. Robert T. Clinch, District Grand Master, E. R., was elected Grand Master but declined, as he had not resigned his office under the English Registry. Bro. B. Lester Peters was then unanimously elected Grand Master, the installation taking place on the 22d of January, 1868. During the year 1867-68 ten lodges holding under the English Registry became of allegiance to the Grand Lodge of New Brunswick, and in September, 1872, St. Andrews Lodge, at Fredericton, also affiliated, rendering the jurisdiction of this Grand Lodge complete. 1906. There are thirty-five lodges on the roll, with a membership of 2,200.

Quebec.

Although it has been affirmed by French and other writers that a lodge of Freemasons existed in the city of Quebec in the year 1755, no records or other evidences are known to be in existence, and Masonry in the Province only dates its existence from the time of "Wolfe," when the "Lily" flag of the Bourbon was replaced by the "Union Jack" over the citadel of Quebec.

Quebec capitulated in September, 1759, and among the regiments taking part in the capture the following seven held travelling warrants for lodges, as follows: No. 245, I. R., warranted 1754, in the Fifteenth Regiment; No. 35, I. R, warranted 1734, in the Twenty-eighth Regiment; a lodge in the Twenty-eighth, "Louisburg," Boston warranted 1758; No. 205, I. R., warranted 1749, in the Thirty-fifth Regiment; No. 42, E. R. "Ancient," warranted 1755, in the Fortieth Regiment; No. 192, I. R., warranted 1748, in the Forty-seventh Regiment, and No. 218, I. R., warranted 1750, in the Forty-eighth Regiment. There were likewise lodges in seven or more regiments taking part in the capitulation of Montreal, September 9, 1760, holding under English, Irish, Scotch, and Colonial charters.

The following extracts from a document in possession of the Grand Librarian of England succinctly tell the story of the formation of the first "Lower Canada" Grand Lodge on December 27, 1759, in the city of Quebec.

"In the winter of 1759 the Masters and Wardens of all the Warranted Lodges held in the Regiments garrisoned there, assembled together and unanimously agreed to choose an acting Grand Master to preside over them. Agreeable thereto they made choice of Bro. Guinnett, Lieutenant in the Forty-seventh Regiment, and drew out, signed and sealed, a Warrant empowering him and his successors elected, to congregate them together as a Grand Lodge for the intent before mentioned, they having the Constitution as their chief guide."

"The 24th June, 1760, Brother Simon Fraser, Colonel of the Highland Regiment, was elected to preside over the Lodges, and Brother T. Dunckerley of His Majesty's Ship the 'Vanguard,' who was possessed with a power from the Grand Lodge of England to inspect into the state of the Craft wheresoever he might go, installed Brother Fraser in his high office."

This Provincial Grand Lodge for the "Province of Quebec," annually elected a Grand Master and officers, and was in existence for thirty-two years, 1759-91. Among the Grand Masters following the Hon. Simon Fraser were, Capt. Milborne West, 1761; Lieutenant Turner, 1763; Hon. John Collins, 1765; Sir Guy Carleton (Lord Dorchester), 1786, and Sir John Johnson, Bart., who resided at Montreal, 1788.

According to M. W. Bro. John Hamilton Graham, LL.D., who compiled that valuable work *The History of Freemasonry in Quebec*, there has been traced some forty lodges holding under or emanating from this Grand Lodge. The first lodges it chartered were in the city of Quebec: "Merchants," No. 1, "St. Andrews," No. 2, "St. Patrick's," No. 3, and Select, No. 0, 1759-67. The next warranted was No. 4, St. Peter's, Montreal, instituted 1761, and lapsed about 1792. The next Montreal charter was St. Paul's, No. 10, and of date November 8, 1770, which had an existence up to 1796. Among other lodges warranted was one at Vergennes, Vt., U. S. A., named "Dorchester," and of date May 5, 1791, granted by Sir John Johnson, Bart., Prov. G. M., and still in existence as No. 1, Vermont.

In 1752 the schism occurred in the Grand Lodge of England which caused the formation of a rival Grand Lodge under the cognomen of the "Ancients." The rivalry between these two Grand Lodges was at its height in 1791, when "Prince Edward," grand-

father of His Majesty King Edward VII, arrived in Quebec as Colonel of the Seventh Royal Fusiliers, and with the advent of the "Prince" came a new era in Masonry in the Province.

On March 7, 1792, the Grand Lodge of the "Ancients" in England issued a patent deputing Prince Edward "Provincial Grand Master" of "Lower Canada," and on June 22, 1792, His Royal Highness was installed with great *éclat*, a religious service and procession to the "Recollect Church" (R. C.) Quebec, forming part of the ceremony. In 1799 H. R. H. was created "Duke of Kent," and remained Grand Master until 1813, when he resigned to accept the Grand Mastership of the "Ancients" in England, being succeeded in Quebec by the Hon. Claude Dénéchau, M. P. P., who filled that important post until 1822. This new Provincial Grand Lodge in a period of over thirty years, 1791-1823, warranted some twenty-six lodges, five of them still in existence, under the present Grand Lodge of Quebec, viz.: "Dorchester" at St. Johns; "Select Surveyors" now "Prevost," at Dunham; "Nelson," now at St. Armand Station; "Golden Rule," at Stanstead; and "Sussex" now "St. Andrews," at Quebec. It also warranted among others "Zion," No. 10, now No. 1 at Detroit, of date September 7, 1794, and St. Paul's, No. 12, May 1, 1797, which was apparently formed from among some of the late members of St. Paul's, No. 10, under the former Provincial Grand Lodge, and again lapsed as a provincial Lodge about 1824.

April 2, 1823, marked another era in the history of the Craft in the Province of Quebec. The lodges in Montreal as well as others in the Province forwarded their provincial or Canadian Charters to the "United Grand Lodge of England," and exchanged them for Warrants under that body. They then petitioned said Grand Lodge to establish a Provincial Grand Lodge for Montreal and the Borough of William Henry, now Sorel; and the Grand Lodge across the ocean saw fit to grant the request, and the Hon. William McGillivray was appointed Provincial Grand Master. The lodges in the cities of Quebec and Three Rivers being also formed into another Provincial Grand Lodge under the Hon. Claude Dénéchau.

On the 5th September, 1826, John Molson, Esq., was installed as Provincial Grand Master at Montreal. In 1836 the Hon. John Molson died, and the Provincial Grand Lodge did not meet again for over ten years.

On May 20, 1846, the Provincial Grand Lodge at Montreal was revived to install the Hon. Peter McGill as Grand Master. In 1849 the Hon. Peter McGill resigned his office and was succeeded by the Hon. William Badgley until his decease in 1888.

In "Quebec," the Hon. Claude Dénéchau, deceased, was succeeded by Thomas Harington, Esq., 1852, and he in turn by James Dean, 1857.

The Provincial Grand Lodge at Quebec finally dissolving in 1870, the members joined the then new "Grand Lodge of Quebec." That of "Montreal and William Henry" with three lodges had no active existence after the formation of the Grand Lodge of Canada, and in the later years of the late Judge Badgley, never met.

A third period of thirty years had thus elapsed when in October, 1855, the representatives of forty-one lodges in Canada West (now Ontario) and thirteen in Canada East (now Quebec) met in Hamilton and formed the "Grand Lodge of Canada," holding jurisdiction over the two Provinces.

From 1855 to 1869 the Grand Lodge of Canada was the controlling Masonic power in the Province of Quebec, but with the birth of the Dominion came also the agitation for separate Grand Lodges. Several meetings were held, and finally, on the 20th October, 1869, the Grand Lodge of Quebec was formed by twenty-eight of the Warranted Lodges then in the Province, with M. W. Bro. John Hamilton Graham, LL.D., as Grand Master.

A number of the lodges did not at once join in this movement, but gradually were absorbed. Those remaining under the Grand Lodge of Canada (which Grand Lodge vigorously and strenuously opposed the formation of the new Grand Lodge) continued until September 23, 1874, when "Canada" withdrew, and its lodges affiliated with Quebec.

On the 27th of January, 1881, three lodges holding under warrants from Scotland also affiliated, leaving three claiming allegiance to the Grand Lodge of England.

1906. The Grand Lodge of Quebec has now on the roll fifty-eight lodges and a membership of 5,000.

Canada (in Ontario).

The history of the Craft in the Province of Ontario has been exhaustively compiled by Most Won Bro. John Ross Robertson in,

CHARLES T. McCLENACHAN

his admirable work, *The History of Masonry in Canada*. Lodge No. 156 in the Eighth Regiment of Foot appears to have been the first lodge to hold meetings in this Province, at Fort Niagara, about 1755-80. From 1780 to 1792 some ten lodges appear to have worked in what was called "Upper Canada." Some chartered by England, others by the Provincial Grand Lodge at Quebec, among them St. James in the King's Rangers, No. 14, at Catarauqui (Kingston), 1781; St. John's, No. 15, at Michilimakinac (Michigan), then part of Canada; St. John's, No. 19, at Niagara, and Oswegatchie Lodge, 1786, at Elizabethtown (Brockville).

On March 7, 1792, Bro. William Jarvis was appointed Provincial Grand Master of Upper Canada by the "Ancient" or "Athol" Grand Lodge of England. Bro. Jarvis resided at Newark (Niagara), the then capital of the Province. During his Grand Mastership, 1792 to 1804, twenty warrants for lodges were issued for various parts of the Province.

In 1797 Bro. Jarvis removed from Newark to York (now Toronto), when the capital was transferred to the latter place.

The Brethren at Niagara continued to be active and enthusiastic, and urged Bro. Jarvis to assemble Grand Lodge there, but he refused. This refusal caused much dissatisfaction, and the Brethren of Niagara District met in 1803 and elected Bro. Geo. Forsyth as Provincial Grand Master, and trouble and friction ensued.

In 1817, at Kingston, a Grand Convention was called by the Lodges in the Midland District under R. W. Bro. Ziba M. Phillips. All the lodges attended excepting those in the Niagara District. This convention was held annually during the years 1817, 1818, 1820, 1821, 1822.

After repeated entreaty to England during these years, R. W. Bro. Simon McGillivray came to Canada in September, 1822, with authority from the Duke of Sussex to reorganize the Craft in Upper Canada. The Second Provincial Grand Lodge was thus formed at York in 1822, with R. W. Bro. Simon McGillivray as Provincial Grand Master, and met regularly up to 1830; but the Morgan excitement in the United States also told somewhat on the Fraternity in Canada, and while a number of the lodges remained active, the Provincial Grand Lodge became dormant and remained so until 1845.

In 1845 Masonic enthusiasm once more gained the ascendancy,

an urgent appeal was sent out, and a Third Provincial Grand Lodge organized in Hamilton with Bro. Sir Allan MacNab Provincial Grand Master of "Canada West," appointed by the Earl of Zetland. This body was an energetic one, and continued work until 1858.

In 1853 a number of the lodges holding Irish Warrants organized a Grand Lodge, but it was not very successful. They then endeavored to secure the coöperation of the Provincial Grand Lodge in forming a Grand Lodge for Canada, but the Provincial Grand Body declined. But Home Rule and a self-governing body for Canada was the idea uppermost and would not down, and finally on October 10, 1855, a convention of all the lodges in the two Provinces was called at Hamilton and the Grand Lodge of Canada was formed. Forty-one lodges were represented, twenty-eight in Canada West (Ontario) and thirteen in Canada East (Quebec), and M. W. Bro. William Mercer Wilson was elected Grand Master.

In September, 1857, the Provincial Grand Lodge under England met and resolved itself into an independent Grand Lodge under the name of "Ancient Grand Lodge of Canada," but the next year in July, 1858, they united with the Grand Lodge of Canada. In October, 1869, the majority of the lodges in the Province of Quebec held a convention and decided to form a Grand Lodge for that Province. The Grand Lodge of Canada strenuously opposed this new body, and an edict of suspension covering all the lodges and Brethren taking part was issued. The Grand Lodge of Quebec, however, becoming duly recognized by all the leading Grand Lodges of the world, the Grand Lodge of Canada, in 1874, likewise decided to do the same and withdrew from the Province; all the lodges of her obedience joining the Quebec Grand Body. In 1875 a schism occurred and a number of Brethren organized a "Grand Lodge of Ontario." This breach was finally healed and the Brethren and lodges became of allegiance to the Grand Lodge of Canada in 1896.

In 1886 the words "in the Province of Ontario" were added to the title of the "Grand Lodge of Canada," owing to the representations of other Grand Lodges that the title did not represent the jurisdiction of that Grand Body.

1906. The Grand Lodge of Canada has now 395 lodges and a membership of 37,628.

British Columbia.

The first lodge established in this Province was Victoria, No. 783, by the Grand Lodge of England, March 19, 1859, and the first chartered by the Grand Lodge of Scotland was Vancouver Lodge in 1862.

In 1871 the Grand Lodge of England had three lodges in the Province, and the Grand Lodge of Scotland six lodges. A convention was held on the 21st day of October, 1871, and the Grand Lodge of British Columbia duly organized. Eight out of the nine lodges in the Province were represented. The Provincial Grand Master of Scotland and the District Grand Master of England both took an active interest in the formation of the new Grand Body, and M. W. Bro. Israel Wood Powell, M.D., was unanimously elected Grand Master.

In 1872 the only lodge not represented at the formation of the Grand Lodge, viz., "Union Lodge" of New Westminster, late 899 E. R., affiliated with twenty-three members.

In 1875 two of the lodges in Nanaimo, "Caledonia" and "Nanaimo," amalgamated under the name of "Ashlar."

In 1878 Victoria, No. 1, and British Columbia, No. 5, of Victoria, united as Victoria Columbia Lodge, and Vancouver and Quadra Lodges, also at Victoria, united as Vancouver Quadra Lodge.

1906. Grand Lodge has now thirty-nine lodges and a membership of 2,859.

Manitoba.

In 1864 a dispensation was issued over the signature of M. W. Bro. A. T. Pierson, then Grand Master of Masons in Minnesota, and "Northern Light" Lodge was organized at Fort Garry (Winnipeg), with Bro. Dr. John Schultz, Worshipful Master, A. G. B. Bannatyne, S. W., and Wm. Inkster, J. W.

In 1867 Bro. Bannatyne was elected W. M. and the lodge went out of existence, shortly before the Red River insurrection. At this time, the country was claimed by the "Hon. Hudson Bay Co."; but when the transfer was made to Canada in 1870 and the Red River Settlement, as it was then known, became the Province of Manitoba, the Grand Lodge of Canada assumed jurisdiction and shortly afterward issued Charters to "Prince Rupert's" Lodge, Winnipeg, December, 1870, and Lisgar Lodge, Selkirk.

On May 12, 1875, the three lodges then existing, viz., "Prince

Rupert," "Lisgar" and "Ancient Landmark," held a convention and formed the "Grand Lodge of Manitoba," electing M. W. Bro. the Rev. Dr. W. C. Clarke as Grand Master. Unfortunately he removed from the Province before his year of office expired.

In 1878 the question of Ritual created considerable trouble, and a number of the Brethren endeavored to form another Grand Lodge, but happily peace was restored the following year.

On the 28th July, 1881, a Warrant was ordered issued to "Al Moghreb Al Asku," No. 18, to be opened at Gibraltar, but protests from the Grand Lodges of Scotland and England following, it was shortly afterward transferred to Tangiers in Morocco.

This Grand Lodge held jurisdiction over the Northwest Territories and the Yukon Territory as well as Manitoba until 1905, when the Provinces of Alberta and Saskatchewan were formed, followed by the organization of Grand Lodges for these two new divisions, upon which the Grand Lodge of Manitoba withdrew.

1906. Grand Lodge of Manitoba has now eighty chartered lodges and six U. D., with a membership of 4,410.

Prince Edward Island.

Previous to November, 1798, Prince Edward Island was called St. Johns Island, the name being changed by Imperial Act on that date.

On the 9th October, 1797, St. John's Lodge, now No. 1 on the Registry of that Province, was established by Warrant at Charlottetown by the Grand Lodge of England. The then Lieutenant-Governor, General Edward Fanning, was one of the Charter members. In 1857 Victoria Lodge at Charlottetown was chartered by Scotland. In 1875 there were seven lodges in this Province working under English Warrants, viz., St. John's, King Hiram, St. George, Alexandra, Mount Lebanon, and True Brothers, and one under the Scottish Register, "Victoria."

On the 23d day of June, 1875, these eight lodges met and formed the Grand Lodge of Prince Edward Island. The Hon. John Yeo was elected Grand Master and was installed, together with his officers, the following day by M. Wor. Bro. John V. Ellis, Grand Master of New Brunswick.

1906. There are fourteen lodges, with a membership of 635 on the roll.

Alberta.

Previous to October, 1905, the lodges in the "Northwest Territories" of Canada were under the jurisdiction of the Grand Lodge of Manitoba.

The political changes which culminated in the division of these Territories into the Provinces of "Alberta" and "Saskatchewan" on the 1st of September, 1905, brought forward the question of Provincial Autonomy for the Craft; accordingly "Medicine Hat " Lodge, No. 31, took the initiative and requested the Senior Lodge in the Province, "Bow River Lodge," No. 28, to call a convention at Calgary. This convention was held on the 25th day of May, 1905, and arrangements were made for a formal meeting on the 12th day of October, 1905. Seventeen lodges out of eighteen in the jurisdiction were represented by seventy-nine delegates, and the "Grand Lodge of Alberta" was duly formed, with M. W. Bro. Dr. George MacDonald elected as Grand Master. The Most Wor. the Grand Master of Manitoba, M. W. Bro. W. G. Scott, was present at this convention and installed the officers.

1906 Twenty lodges, with a membership of 1,206.

Saskatchewan.

The Brethren of the Province of Saskatchewan assembled at Regina on the 10th day of August, 1906, and formally resolved themselves into the "Grand Lodge of Saskatchewan." Twenty-five lodges out of twenty-eight located in the Province were represented. M. W. Bro. H. H. Campkin was elected Grand Master and was installed by M. W. Bro. McKenzie, Grand Master of Manitoba.

Newfoundland.

The Ancient Colony of Newfoundland still remains without the Confederation of the Canadian Provinces.

Masonry in this island dates back to 1746, the first Warrant being granted by the Provincial Grand Lodge at Boston. Bro. J. Lane's list gives six lodges warranted in the eighteenth century. The Grand Lodge of the Ancients (England) is credited with four—one in 1774 and three in 1788—and the Grand Lodge of England (Moderns) with two—one each in 1784 and 1785. Nine others were chartered by the present Grand Lodge of England up to 1881, a number still remaining active.

CHAPTER II

MEXICO

WE learn from several writers that about the year 1810 Civil and Military officers of the Monarchy introduced the "Scottish Rite" into Mexico—then the principal colony of Spain. The Grand Lodge of Louisiana after this erected lodges in 1816 and 1817, respectively, at Vera Cruz and Campeachy. The Grand Lodge of Pennsylvania also established a lodge in 1824 at Alvarado; subsequently confusion ensued, Masonry and politics being so closely interwoven that any attempt at separate treatment is quite hopeless.

The *Escoceses* and the *Yorkinos* divided the country into two factions, moderate measures being in favor with the former under a constitutional monarchy, and republican institutions being advocated by the latter with the expulsion of the "old" or native Spaniards.

Among the *Escoceses*, or "Scots Masons," were persons having titles of nobility; all the Catholic clergy; many military officers; and all classes of native Spaniards.

The republicans appreciating the progress of their opponents, resolved "to fight the devil with his own fire," and thereupon a revival faction was organized with the title of *Yorkinos*, whose members were thought to be of the York Rite. Mackey is authority for the statement that the Grand Lodge of New York established three lodges in the city of Mexico in 1825.

These lodges were formed into a Grand Lodge of the York Rite by Mr. Joel R. Poinsett (American Minister), a former G. M. of South Carolina. There is no record that since the year 1815 any foreign lodges have been warranted by the Grand Lodge of New York. But however established, the so-called York Rite, or, in other words, pure English Masonry, flourished, and toward the end of 1826 there were twenty-five lodges, with a membership of about

seven hundred. "The Escoceses, or 'Scots Masons,' finding their lodges deserted, regarded the Yorkinos as renegades and traitors, and with a view to counterbalance the fast increasing power of the latter, they formed the Novenarios, a kind of militia, which derived its name from a regulation requiring each member to enlist nine additional adherents. These ingratiated themselves with the clergy, who, after having been the most embittered enemies of the Craft in past years, now joined the Escoceses almost in a body.

"The Yorkinos, becoming aware of these proceedings, tried to outdo their rivals by recruiting their own lodges upon the plan of receiving all applicants without distinction, provided they belong to the federal, *i.e.*, the patriotic party. Thus, the system of Masonry very soon degenerated into a mere party question, and at last all the adherents of one side styled themselves Escoceses, and of the other side, Yorkinos. In 1828 the two parties resorted to open warfare, with a view to deciding the question at issue by the sword, and the civil war then commenced lasted for more than a generation.

"Somewhere about this time, while Dr. Vicente Guerrero—G. M. under the York Rite—was President of the Republic, a law was enacted by which all Masonic lodges were closed. The Yorkinos obeyed their Grand Master, and discontinued their meetings. The Escoceses went on working, but some of their most influential lodges were suppressed, and the members vanished. Subsequently, all native Spaniards were expelled from Mexican territory.

"This internecine strife seriously affected the Fraternity in general, and gave birth, during the darkest hours of the struggle for supremacy, to an organization called the National Mexican Rite, formed by Masons, and composed of distinguished men, but containing innovations and principles so antagonistic to Masonic usage and doctrine, that it was never accorded recognition, even in Mexico, by any Masonic body of acknowledged legality.

"This new school of Masonry was established by nine Brethren of both rites, and who had belonged to the highest grade of either system, in 1830. To guard against the intrusion of unworthy members and the revival of political antagonism, they resolved to create a rite which should be national, in the sense of not depending upon any foreign Grand Lodge for its Constitution, and to obviate by safeguards and precautions of an elaborate character, the dangers to be apprehended from the reception of either Escoceses or Yorkinos.

"The National Mexican Rite consisted of nine degrees, which, omitting the first three, were 4°, Approved Master (equal to the 15°, 'Scots'); 5°, Knight of the Secret (equal to the 18°, 'Scots'); 6°, Knight of the Mexican Eagle; 7° Perfect Architect or Templar; 8°, Grand Judge, and 9°, Grand Inspector General. All of these degrees had their equivalents in the grades of the A. and A. S. R. 33. With the 'St. John's' (or purely Craft) degrees certain special signs were associated, which, however, were not required from foreigners unless they had acted as auxiliaries in any of the party contests.

"A Grand Orient, composed of members of the 9°, was supreme in matters of dogma or ritual. There was also an administrative body or National Grand Lodge, whose members were elective and met in the metropolis. The Provincial Grand Lodges had their seats in the State capitals, and were formed by the 'three lights' of at least five St. John's lodges.

"But although still preserving a nominal existence, the several Grand Bodies, owing to political convulsions, were virtually dormant for many years after 1833. A lodge—St. Jean d'Ulloa—was constituted at Vera Cruz, by the Supreme Council of France, in 1843; and another—Les Ecosais des Deux Mondes—at the City of Mexico, by the Grand Orient of the same country, in 1845.

"The National Mexican Rite appears to have somewhat recovered from its torpor in 1863. At that date we find in the Metropolis a National Grand Lodge with six working lodges, though of these one—belonging to the A. and A. S. R.—was constituted by the Grand Lodge of New Granada, and consisted chiefly of foreigners; in Toluca a Prov. Grand Lodge with five lodges; in Vera Cruz and Guadalajara two lodges each; and in five other cities single lodges.¹

"In the year 1858 or 1859," according to the official report, "Bro. Lafon de Ladebat went to Mexico, with authority from Bro. Albert Pike (of Washington, D. C.) to organize and establish Masonry on a sound basis in that country.² However, Bro. Ladebat did not organize a Grand Lodge of Symbolic Masonry first, as instructed, but constituted the Supreme Council with jurisdiction over the three degrees of E. A., F. C., and M. M."³

The Grand Lodge of Yorkinos ceased to exist, and the "Scots

¹ Gould, vol. vi.

² Proceedings of the Grand Lodge of Louisiana, 1884.

³ This was entirely in opposition to Brother Pike's wishes.

Rite," divested of all political coloring, erected—December 27, 1865—a Supreme Council 33°, this being done after the overthrow of the Maximilian Empire. This Supreme Council and the Supreme Council of 1858-59 were joined in 1868 and both were fused with the National Grand Lodge, the President of the Republic, Benito Juarez, being one of the highest officials. However, this union was more of a friendly pact than of a thorough nature, as each rite was independent of the other with regard to its own ritual and internal government. The National Rite numbered thirty-two, and the A. and A. S. R. twenty-four, lodges in 1870.

"It would seem as if the authority of Juarez alone held these rites together, since at his death in 1872—although he was succeeded as President by his chief follower, Sebastian Lerdo de Tejada, also a prominent Freemason—dissensions arose, and they fell asunder, Alfredo Chavero becoming G. M. of the Grand Orient, and Jose Maria Mateos of the National Grand Lodge. In 1876 a Lodge of Germans left the G. O. and joined the National Grand Lodge, but in the following year, with the consent of the latter, affiliated with the Grand Lodge of Hamburg—under which body there is also (1886) another lodge at work in Vera Cruz."¹

About 1882 the two rites probably seem to have been again united, though information is so meager that this is not definite. However, it is quite possible that the National Mexican Rite continued to exist though its proceedings are not recorded. As far as there is any evidence, it appears that Grand Lodges were organized by the lodges which were under the jurisdiction of the Supreme Council.² At the capital a Central Grand Lodge was formed, having jurisdiction over the subordinate lodges, and there was very little interference upon the subject of Symbolism except by the Central Grand Lodge, though the Supreme Council did not formally waive its authority thereover.

"In 1883 there were the following State Grand Lodges: Vera Cruz and Jalisco, each with seven lodges; Puebla, Yucatan, and Guanajuato, with six; and Morelos and Tlaxcala, with five; thus making a total of seven Grand and forty-two subordinate lodges, exclusive of the Central Grand Lodge and the metropolitan lodges.

"It will be seen that at this period there existed at Vera Cruz a

¹ Gould, vol. vi.

² Recommended by General Pike.

State Grand Lodge, but from the fact that it was subordinate to the Central Grand Lodge, it was not deemed by the Grand Lodge of Colon to exercise legitimate authority over Symbolism in that State. Indeed, the whole of Mexico was regarded by the last-named body as 'unoccupied territory,' and it therefore proceeded to charter three lodges, which in January, 1883, formed themselves, at the City of Vera Cruz, into the 'Mexican Independent Symbolic Grand Lodge.' "

"Two of the lodges taking part in this movement had originally held Mexican warrants, but having quarreled with their superiors, solicited and obtained charters from the G. L. of Colon (now Colon and Cuba), shortly after which the third lodge was formed, and then, finally, the Grand Lodge, although the Supreme Council of Mexico had formerly protested against the invasion of its territory. Indeed the step thus taken by their former superiors appears rather to have accelerated the action of the three lodges, as in the record of their proceedings it is stated, 'that they hasten to constitute themselves into an Independent Grand Lodge, pending the protest of the Supreme Council of Mexico, to relieve their friend and mother, the Grand Lodge of Colon, from any further unpleasant complications.'

"The Supreme Council of Mexico, in a Balustre numbered XXX., and dated April 25, 1883, renounced its jurisdiction over the symbolical degrees, and promulgated a variety of relations with regard to Grand and subordinate lodges. This threw the Craft into the utmost confusion, and might have ended in the destruction of the greater number of Mexican lodges, or at least in the establishment of some half dozen Grand Bodies, all claiming supremacy, had it not been for the skill and address of Carlos Pacheco, who succeeded Alfredo Chavero as Sov. G. Com. 33°.

"The former Balustre was revoked, and by a new one (XXXII.), dated May 27, 1883, the Supreme Council renounced, in favor of the State Grand Lodges then existing or which might afterward be formed, the jurisdiction over Symbolism conferred upon it by the Constitutions of the A. and A. S. R. 33°. The transmission of powers was to take effect from June 24th then ensuing. The lodges having no Grand Lodge were to remain under the jurisdiction of the Grand Lodge nearest to them, or the oldest if two were equidistant, until they organized their own in accordance with Masonic

usage and precedent. The lodges of the Federal District, however, were directed to form and inaugurate their Grand Lodge on June 15th then following. Balustre XXXII. was signed (*inter alias*) by Carlos Pacheco, Mariano Escobedo, Alfredo Chavero, and Porfirio Diaz.

"On June 25, 1883, twelve lodges at the capital met and established the Grand Lodge of the Federal District (or city) of Mexico, with Porfirio Diaz as the first G. M. The event was announced to the Masonic world in two circulars, the first of which is in Spanish—an immense document of one hundred and eighty pages! The second is in English, and its only noticeable feature is a declaration that the American system of State Grand Lodges, each with exclusive jurisdiction, has been adopted. Grand Lodges have since been established on the same plan—*i.e.*, in conformity with the edict of the Supreme Council, as promulgated in Balustre XXXII.—in the States of Vera Cruz, Tlaxcala, Morelos, Puebla, Campeachy, and Lower California. The complications, however, already existing in the Republic, were still further increased in 1883, by the action of the Grand Lodge of Missouri, in granting a Charter to the Toltec Lodge, in the City of Mexico, which had been provisionally established at the close of the previous year under a dispensation from the Grand Master."¹

"The recognition of the Grand Lodge of which Porfirio Diaz became the head, by the Grand Lodges of Louisiana and Florida, was duly protested against by Carlos Pacheco, Sov. G. Com. 33°, and Carlos K. Ruiz, the latter of whom claimed to be himself the legitimate G. M. It would appear from 'La Gran Logia,' a bulletin published by some members of the Ruiz Grand Lodge, and denominated their official organ, that on the same day, at the same hour, and in the same hall, when and where the Diaz Grand Lodge was organized and installed, the other body was organized also. There was this difference, however, that whereas the Diaz party transacted their affairs within the body of the lodge, the supporters of Ruiz were reduced to the necessity of attending to theirs in the anteroom—the latter Brethren having withdrawn from the original convention while it was being organized, but not leaving the building, in the vestibule of which they afterward conducted their own proceedings."²

Extract from Proceedings of Grand Lodge of Iowa.

Report on Foreign Correspondence, Theo. S. Parvin, Chairman,
1896.

"The year 1890 opens before us the new, and present era of Mexican Masonry. The functions of the Supreme Council being limited and confined to the legitimate Scottish Rite degrees 4th and 33d, inclusive, with no organized jurisdictions of Masonry of the symbolic degrees except the Grand Lodges of the State of Vera Cruz and the Federal District (city of Mexico), both of which had been recognized by the Grand Lodge of Iowa as well as many other Grand Lodges, the Lodges, to the number of one hundred and twenty-two of the one hundred and twenty-five, met in convention, and after a session of ten days, on the 20th of July, 1890, unanimously created and organized a new and governing body of Masonry, styled 'The Gran Dieta Symbolica,' or the Grand Diet of Symbolic Masonry for the Republic of Mexico. It elected for its Grand Master, and who has since by annual re-election been continued in office, Bro. Porfirio Diaz, the distinguished and illustrious President of the Republic; and for its Grand Secretary another distinguished citizen and Mason, Ermilo G. Cantón, the Clerk of the Supreme Court of the United States of Mexico, who also, by annual re-election, still continues in office.

"The Gran Dieta promulgated a Constitution of forty-seven pages, consisting of eleven titles and one hundred and forty-five articles. The three sections of this Constitution relating to Masonic power and authority, read as follows (we give the translation):

"'ARTICLE 30. The powers of Symbolic Masonry in this Republic are constituted in the governing Grand Lodge, which goes by the name of the "Grand Symbolic Diet of the United States of Mexico," whose duty it shall be to watch over the welfare, absolute liberty and independence of the three blue degrees, or Symbolic Lodges, under the Grand Lodges of the different States.'

"'ART. 31. The Sovereign Masonic Power resides essentially and originally in the great body of Masons, who deposit their obedience for its exercise in the Grand Diet.'

"'ART. 32. The Supreme Authority of Symbolic Masonry

shall have the title, 'Grand Symbolic Diet of the United States of Mexico.' "

"All of the Grand Lodges save three—that of the State of Vera Cruz, the Federal District, and one other—together with the subordinate Lodges that had not participated in its organization, transferred their allegiance to the Gran Dieta. These constituent Lodges now number about two hundred, and the membership exceeds ten thousand; the reporter for the Grand Lodge of Texas makes the former two hundred and fifty, and the latter twenty thousand—too high, I think—among whom I found, during my visit, were enrolled among its members not only the President of the Republic, but the Governors of all the principal States (some sixteen of which I visited), the Mayors of the cities, and the Judges of the Supreme Court. The Gran Dieta is, therefore, a sovereign and independent body, organized after the manner of the Grand Masonic Bodies of the United States. It, and *it alone*, exercises supreme authority and control over 'the three symbolic degrees of masonry' in Mexico.

"The constituent elements in the Gran Dieta of Grand and Subordinate Lodges and in the membership consists of Masons both of the York and Scottish Rite. We have learned from the general history presented, that there was at one time some twenty Lodges, with a membership of near eight hundred, that had obtained their charters from Grand Lodges in the United States, and that the old York element has existed in Mexico ever since, and, like the leaven of old, will yet under fostering care more and more each year permeate the system of Masonry now established upon a new basis. The ritual, however, used in a majority of these Lodges and Grand Lodges is that of the three degrees of the Scottish Rite as practiced in Lodges created by the Supreme Council, the exceptions being the Lodges composed exclusively or principally of American citizens resident in the various cities of the Republic, in which the American ritual is used. There are now some half dozen so-called American Lodges—that is, Lodges composed of American citizens resident in Mexico and other cities of the Republic. These Lodges all hold their charters from the Gran Dieta, which is and must continue to be the only governing body of Symbolic Masonry in Mexico. The last effort of the Grand Lodges in the United States to establish a Lodge in Mexico, was that of the Grand Lodge of Missouri which chartered Toltec Lodge some ten or more years

ago, but which, upon the organization of Gran Dieta, surrendered its charter and took out one from the Gran Dieta, under which it now works.

"There are thousands of American citizens, hundreds of them being Masons, residing in the various cities in Mexico, many of whom are affiliated with the so-called American Lodges, while others yet hold membership in the Mexican Lodges, and this number is increasing each year.

"Upon the organization of the Gran Dieta it made no special effort to secure recognition of American Grand Lodges, and it was some two or three years later that the Grand Lodges of Texas and New York recognized it, as they do still, and then the subject of its recognition was presented to other Grand Lodges, which deferred action for further information, as it had been currently reported, especially through a publication issued by an American resident of the city of Mexico, that the Gran Dieta by its constitution authorized the making of women Masons, and prohibited the use of the Great Light in their lodges. These statements I had heard and read while I was yet writing the Reports on Correspondence for this Grand Lodge, and so declined to present the subject of recognition of the Gran Dieta to the Grand Lodge of Iowa until I could satisfy myself more fully in relation to these rumors developing into published statements. I examined the Constitution of the Gran Dieta, to which I have referred, and could find nowhere within it any provision prohibiting the use of the Great Light in their Lodges, or authorizing the making of women Masons; the Constitution is entirely silent upon both subjects. During my visit to the Republic of Mexico in February and March of 1895, I had an opportunity to satisfy myself upon these subjects. I found that the Gran Dieta did not, by any law, much less constitutional provision, prohibit or exclude the Great Light from its altars—it did and does permit its use; it does, however, require by law the use of the Book of Constitutions upon its altars. I found during my visit to Lodges and Grand Lodges in some, and especially all of the American Lodges, the Great Light open upon the altar; in other Lodges the Book of Constitutions only; and notwithstanding the requirement that the Book of Constitutions should be used, I found in some Lodges that it was laid aside in open view, and the Great Light substituted, and the action was not called in question by any authority. It is not

true, therefore, as has been stated, that the Bible is excluded; its use, while permitted, is not required.

"In reference to this subject, I fail to find any warrant or requirement in the 'Book of Constitutions,' the Constitution or Code of Iowa, or any other Grand Lodge I have examined, requiring the use of the Great Light in our American Lodges. The Constitution of the United States has no reference to God or a Supreme Being, and many of our Presidents, in their annual messages, have omitted all reference to a Supreme Being, so that a class of Christians are year after year clamoring for an amendment to that National Charter, as if we would become more a Christian nation by its insertion. The 'Book of Constitutions' not only does not, any more than the Constitution of the Gran Dieta, require the use of the *Bible* in Lodges, but, on the contrary, we learn from it that *it* 'charges the Masons of every country to be of the religion of that country or nation,' and so, of course, authorizes the use of the book of the religion of the people of such country and nation. It has been well said by high authority that 'he that is without sin among you, let him first cast a stone.' Until the Grand Lodge of Iowa and other Grand Lodges, by constitutional or legal enactment, shall first require the use of the Great Light in their Lodges, let them be sparing of their criticisms and censure of another supreme and independent Grand Lodge possessing all the rights and privileges they claim. Without the exercise and practice of this Christian and Masonic charity, Masonry can never become, as the Constitutions affirm it is, 'the center of union and the means of conciliating true friendship among persons that must otherwise have remained at a perpetual distance.' Our people and Masons are fast becoming important factors in the business and social relations (even marrying and being given in marriage) of the cities of the Mexican Republic; they are already in large numbers enrolled as members of their Lodges; and if *given a chance*, will yet bring the Masonry of that country more in harmony with ours.

"Another of the objections urged heretofore against the recognition of the Gran Dieta is, that it made Masons of women. From a thorough examination of the Constitution, I learn that this was not authorized or warranted by any constitutional provision; it was not, indeed, until a year later, in 1891, that the Gran Dieta, by a law provided for the initiation of women, and also for the issuing to

them of charters for Lodges. From what I saw and the best information I could obtain, there were some two or three only of the Grand Lodges that had sanctioned this practice, and about the same number of Lodges that had acted under the permission thus given. I found both in the city of Mexico and the city of San Luis Potosi, which is the capital of the State of the same name, and a city of about the size of our State capital, Des Moines—a woman's Lodge; that is, I saw the charters hanging upon the wall of the ante-room side by side with the charters of some four or five men's Lodges occupying the same hall; the charters were filled out upon the same blanks, in the same manner, signed by the same Grand Officers, and with the great seal of the Gran Dieta—the only difference being the insertion in one, of the names of women rather than of men. Moreover, I find from an examination of the *Masonic Bulletin*, the official organ of the Gran Dieta for 1891-94, edited by the Gran Dieta, and especially in the number for February, 1893, which contains the official list of a hundred and more Lodges all owing obedience to the Gran Dieta, among them one or two Lodges of women, chartered by the Gran Dieta and organized by the Grand Secretary himself, as I was informed by the brethren. In the official *Bulletin* for February, 1892, pages 175-201, there is a list of the officers and members, of some twenty Lodges, all of them constituent members, of the Gran Dieta, and among them I find that of Martha Washington Lodge, No. 156, with a list of the names of its officers and members, and the name of the Master is Maria C. Beall, the Secretary Josefina S. Rivera. These ladies I know very well—have known the former from her childhood—Mrs. Beall is a native of Iowa City, was educated in our State University (where for years, I was a professor), was graduated in 1876, and went to Mexico as a missionary, where she met and married her husband, who was a member at that time and later Master of a Mexican Lodge in the same city, as his name appears in the published record to which we have referred. The father of this lady is and has been for many years a leading physician of Iowa city, and a prominent Mason for half a century. The Secretary is the niece of the Governor of the State, the Grand Master of the Grand Lodge, and the daughter of Gen. Rivera, one of the leading citizens of the Republic, and the second officer in a Lodge that has in its membership several prominent Americans, among them the Rev. Mr. Winton,

who has long been a resident of the city, and thoroughly informed as to Mexican Masonry. From them I learned, as also from the Masters and other officers of Mexican Lodges I visited in the city of Mexico, that the women were accustomed to visit the men's Lodges at pleasure.

"Wherever I went and visited, either Grand or subordinate Lodges, being received with the greatest courtesy and welcomed by eloquent addresses delivered by the Grand Orator, an officer attached to every Lodge for the purpose of welcoming visitors, I took occasion in my responsive addresses, which I delivered upon every occasion and at considerable length, to cite attention to this practice, which I found had obtained in a few cases, and which was very objectionable to American Masons; and I assured them that while it continued, many of our Grand Lodges would not recognize the Gran Dieta, under whose jurisdiction they worked. I was everywhere informed, in public and in private, that an overwhelming majority of the Lodges and members were opposed to the practice, and were very anxious to be brought into closer and more intimate relations with American Masons and Masonry. This sentiment was communicated to me by President Diaz, who honored me with two very interesting interviews, as also by his Deputy, both in the Supreme Council and Gran Dieta, and other prominent Masons.

"A few months after my return home I learned that the Gran Dieta had repealed the law under which women were authorized to be made Masons, and upon receiving this information, I replied that that would not satisfy American Masons; they must go further, and provide by law for the revocation of charters issued to women, and still more, deny to them the right of visitation to men's Lodges, both of which the Gran Dieta has since done, as I am informed. Further than this I do not see what they could do. They cannot unmake the women who are made Masons any more than we can by expulsion declare that a man is no longer a Mason. We only do as they have done, deny them all the rights and privileges of Masonry.

"The making of women Masons is not a new departure in Masonry; its has only been more recent, upon a larger scale, and brought nearer home. Every well-read Mason knows full well that in the last century a Lodge in Ireland, Num. 44, at Doneraile, initiated a woman, Miss Elizabeth St. Leger, daughter of the Right Honorable St. Leger, Viscount Deneraile, whose son and successor was Master

of the Lodge at the time. She afterwards married Hon. Richard Aldworth, of the County of Cork, and has left a most honorable record as a woman and a woman Mason. Moreover, the Masonic student may learn that during the reign of Napoleon, the First Emperor, a woman was made a Mason, he being Grand Master at the time. She was a colonel, and a very brave and distinguished officer in his army; served with distinction for many years, and her sex was not discovered until she was severely wounded, when, upon her recovery, the Masons, prompted by a spirit of gallantry, conferred upon her the three symbolic degrees. Within the past decade the Grand Master of the Grand Lodge of Hungary, a Symbolic Grand Lodge, which takes a prominent part the present year with the officials and people of Hungary in the celebration of their Millennium Festival, a thousand years of honorable history, conferred, himself, the degrees of Masonry upon his own wife. While the Masonic press commented upon this last case as Masonic historians have upon the former, I have yet to learn that any Masonic Grand Body ever withdrew, or even withheld, their recognition from those Grand Lodges of Ireland, France, and Hungary. They were all recognized by the Grand Lodge of Iowa as independent Grand Masonic Bodies; and it was only when the Grand Lodge of France eliminated from its ritual the requirement of 'a belief in a Supreme Being,' that the Grand Lodge of Iowa, following the example of the Grand Lodge of England, and later followed by American Grand Lodges other than our own, withdrew its recognition, or rather, refused to hold further Masonic intercourse with that Grand Body.

"Another, and the third, objection has been very recently urged against the recognition of the Gran Dieta as a lawfully constituted Masonic body, and the very sweeping charge has been made, not only against the Gran Dieta, but against very many of the Grand Lodges of the world, especially those of Europe, Asia, Africa and South America, nearly all of which owe their origin to Supreme Councils of Scottish Rite Freemasonry. It has been published that 'there is no lawful Masonry anywhere that is not descended from the Free and Accepted Masonry of the British Isles, the Masonry of the Charges of a Freemason;' and it is declared by the same writer that this is 'an indisputable fact' He further says that the Lodges in Mexico are 'clandestine;' that 'their members are impostors and dissenters from the original plan of Masonry,' and that 'whoever

visits them violates his Masonic vows.' If these statements be true, then all the Grand Lodges to which we have referred are clandestine, and their members are impostors and dissenters, and all who visit them, as I and thousands of other American Masons have done, are guilty, as charged, of violating our vows. The writer affirms that the statements made by him are 'indisputable facts.' They are not only disputed now, but have been through the whole history of Freemasonry in the United States. In the Reports on Correspondence of the past year, Past Grand Masters Drummond, of Maine, and Anthony, of New York, two among the ablest Masonic writers of the day, and certainly the peers in Masonic knowledge of any other two in the country, not only deny the statement, but affirm, to which an overwhelming majority of Grand Lodges and Masonic writers give their adherence quite as 'indisputably,' that 'a Lodge created by a Supreme Council in a country where, by the Masonic law then prevailing, it may be done, is just as lawful a Lodge, and its Masons as regular Masons, as any to be found outside of those which can trace their origin back to the British Grand Lodges. The bodies of the York Rite do not,' they say, 'embrace the whole of pure and accepted Masonry.' To this I give my unwavering adherence.

"One of the so-called landmarks of Masonry, and quite as essential and important in its character, and which has received the assent of quite a large number of Masonic writers, affirms and declares that 'Masonry is cosmopolitan,' and is universal, in which statement they are borne out by the Book of Constitutions itself.

"Let us refer briefly to the history of the English Grand Lodge. The first Grand Lodge of which Masonic history gives any record, is that of England, organized by the 'four old Lodges of London' in 1717. The Constitution (Charges and Regulations) for its government was presented by Dr. Anderson (and since known by his name), and adopted in 1823. This Grand Lodge, we all know, was constituted by only four Lodges, leaving a larger number out in the cold, while the Gran Dieta was constituted by one hundred and twenty-two of the one hundred and twenty-five Lodges in the Republic. While there had never been an earlier Grand Lodge, there had been and were at that time other Lodges constituted in the same way as those four—by voluntary action and without any warrant or authority save the brothers' common consent. Now, the Constitu-

tion of the Grand Lodge of England, then and there adopted for *its* government and it alone—for it was not and is not binding upon any Lodge or Grand Lodge till accepted as such—is either a truth or a lie. It reads, Head. VI, Division 2, that 'We are also Masons of all nations, tongues, kindreds, and languages,' which is corroborated by all history; that there was at that time other and 'lawful Masonry' elsewhere than in England. England, while her political flag floats on every sea, has no 'monopoly' of Masonry, outside of her own dominions. There was and is 'lawful Masonry' in other parts of the globe, and so recognized by the Grand Lodge of England itself, by Scotland, Ireland, Canada, and all English colonies, as by a majority of the Grand Lodges of the United States, including Iowa. It cannot be said, as some have asserted, that the Lodges in other nations sprung from the loins of the English Grand Lodge, because at that date, 1723, the Grand Lodge of England had not warranted a single Lodge beyond England and it was several years before she constituted one beyond the 'British Isles.'

"Not only has the Grand Lodge of Iowa, but a majority of the Grand Lodges of this country as well as those of England and Europe have recognized the Grand Lodges of Cuba, Veracruz, and the Federal District in Mexico, together with those of Chili, Peru, Brazil, Argentine Republic, and others in the Western Hemisphere, and in the Eastern, those of Spain, Portugal, Italy, Roumania, Hungary, and others, all of which, as we have stated, were created by supreme Councils. We have not had time to look into many of the proceedings of Grand Lodges, but those which we have at hand, and into which we have looked, are those of California, Canada, Louisiana, New York, as well as Iowa, all of which have recognized the aforesaid Grand Lodges as lawfully constituted Grand Lodges of Masons. It will never do for us or others to assert that all knowledge, all wisdom, and all Masonic intelligence reside either in Illinois or Iowa, or any other American Grand Lodge, or even in the Grand Lodge of England, which has always acknowledged and recognized a majority, if not all, of the several Grand Lodges we have named. Moreover, the Grand Master of the Grand Lodge of England, the Prince of Wales, who has served his Grand Lodge and Freemasonry now for twenty-one years, was made a Mason in a Lodge under the jurisdiction of the Grand Lodge of Sweden; and the Grand Lodge of Norway, which is now seeking recognition

at our hands, has been recognized recently by some of the American Grand Lodges, as well as in former years by others.

"These statements and averments prove that Masonry is universal, wide spread and cosmopolitan in its character; it embraces, as the Constitutions say, 'Masons of all nations, tongues, kindreds, and languages,' Mohammedan, Hindoos, and even Pagans have Lodges and Grand Lodges, using the Koran, the Vedas, and other sacred books of their religion, instead of the Bible. I have myself sat in Lodges and Grand Lodges with native aboriginal Americans, full-blooded Indians. One of the Presidents of the United States, a former Grand Master of a Grand Lodge, ordered the degrees of Masonry conferred upon Indian chiefs visiting the Secretary of War at the National capital on business pertaining to their nation, and those men had very little knowledge of the Great Light in Masonry, or of any other sacred book, except the great volume of nature, and as little, also, of the Book of the Constitutions, or the laws of the Grand Lodge under whose jurisdiction they were made.

"Let us inquire what is a 'clandestine Lodge' and see whether Lodges I visited in Mexico were 'clandestine.' What is a 'clandestine Lodge,' and an impostor and dissenter or 'clandestine Mason?' The (Anderson) Constitutions declare, Section 8, that where a number of Masons shall take upon themselves to form a Lodge without the Grand Master's warrant, the regular Lodges are not to countenance them nor own them as fair brethren, and duly formed.' In other words, a Lodge formed without a warrant from the Grand Master (we now say Grand Lodge) is 'clandestine,' and so a 'clandestine Mason' is one made in a Lodge without a warrant. The Gran Dieta Symbolica of Mexico, and the Lodges under its obedience, are as regular and legal bodies of Masons as is the Grand Lodge of Illinois, Iowa, England, or any other Grand Lodge in the world. The Gran Dieta is composed of Grand and subordinate Lodges that obtained their charters from both Supreme Councils of the Scottish Rite and Grand Lodges of the York Rite, but that does not militate, there more than here, against its lawful character.

"So, too, a lawfully-constituted (warranted) Lodge cannot make 'clandestine Masons.' There is a great difference between an 'irregularly-made' and a 'clandestinely-made' Mason. The making of a person who is *not* a 'good and true man,' one who is *not* 'free-born; one who is *not* of 'mature and discreet (legal) age;' or a

'bondman,' a 'woman,' or an 'immoral or scandalous man,' and *not* of 'good repute,' is declared by Anderson's Constitutions to be irregular and not permissible—but that irregularity does not make them 'clandestine.' There are few, not any among all my brethren of many years' standing in Masonry, who have not visited Lodges which had violated one or more of these six commandments, called by some 'landmarks.' The violation of a 'landmark' by a Lodge or Grand Lodge does not make it or its members clandestine. Were this so, the Grand Lodge of England itself, the oldest of Grand Lodges, would be declared clandestine by all English-speaking Grand Lodges in the world, for there is no fact more notorious than that the Grand Lodge of England, very many years ago, upon the manumission of slaves in its colonies, changed one of the fundamental landmarks, so recognized, from 'free born' into 'free man,' and thereby authorized the making of, and did make, Masons of those who were born in slavery. Moreover, the Grand Lodges of England, of Pennsylvania, and several other Grand Lodges in the United States—even our neighboring Grand Lodge of Missouri—knowingly, and I may say willfully, made Masons of those of non-age. We have residing in the State of Iowa to-day a Mason made a Mason in his eighteenth year in a Lodge in Missouri, and the Lodge so making him was fully cognizant of the fact. These are irregularities, and no irregularity, however great, can vitiate the charter or the legal existence of the body performing the act, however offensive it may be in the eyes of the brethren.

"Any and all Masons may visit any and all Lodges in Mexico without violating, as charged by the ignorant or malicious, any O. B. of which I have any knowledge, or known to the rituals here or elsewhere from the first to the thirty-third and last degree in Masonry.

"The Grand Lodge of England was the first Grand Lodge and it was not created till 1717, nor its Constitution adopted till 1723;¹ yet within twenty years there was a schism and a secession of a number of brethren, who constituted another Grand Lodge, calling themselves the 'Ancients,' and by some strange *hocus pocus* their mother Grand Lodge the 'Moderns'—all this about the middle of the last century. This new schismatic, *clandestine* Grand Lodge, engineered by a more intelligent, active and energetic Grand Secre-

¹ Constitution was adopted 1721, and first edition printed 1723.—EDITOR.

tary, Laurence Dermott, grew rapidly, and soon assumed large and permanent proportions. It, too, published a Book of Constitutions, called by its author, the Grand Secretary, the 'Ahiman Rezon,' and planted its Lodges 'at home' and *abroad*, especially in America, for Bro. Hughan, the great Masonic antiquarian and historian, says that it secured the 'almost unanimous support of the Grand Lodges of America.' That 'a stream cannot rise above its fountain,' 'nor can a pure stream flow from an impure fountain,' are unquestionably axioms in nature and in Masonry. Now, there are a few Grand Lodges in the United States in whose veins the blood of the 'Ancients,' the 'rebel Dermott,' and his *clandestine* Grand Lodge, so declared from 1750 to 1813, when the mother Grand Lodge condoned all offenses and gave her the 'kiss of peace,' better by far than that of the 'betrayal' If there is no Dermott blood in Iowa and Illinois, the veins of the Grand Lodge of Pennsylvania are full of it, and they still glory in their 'Ahiman Rezon,' and reject and 'cast over among the rubbish' the Anderson's Constitutions. Nor is the Grand Lodge of Pennsylvania alone in this, but she has illustrious associates; and yet who ever heard of an Illinois or Iowa Mason, or one from any other jurisdiction, calling those Grand Lodges clandestine, or refuse, Masonically, to visit their Lodges or hold Masonic intercourse with their members, charging them with being 'impostors and dissenters from the original plan of Masonry?'

"The difference between the Masonry of Mexico and the United States is just here: Their *origin* and pedigree is more pure and lawful than ours, while their *practices* were not only objectionable to us but to others, and to even a majority of their own membership, as they have repealed and abrogated the law under which such objectionable practices had obtained by only two of the twenty or more Grand Lodges, and the same number out of more than two hundred subordinate Lodges.

"It has been publicly proclaimed that the Gran Dieta has not only repealed the law under and by which women were made Masons, but revoked and recalled the charters (only three, and that is three too many) granted to women Lodges, but gone further—further they could not go—and forbidden Lodges to admit women Masons as visitors or to recognize them (though they be as lawful Masons as the men).

"The Gran Dieta being a lawfully constituted Masonic Body,

with some two hundred Lodges and (it is stated) twenty thousand members, with several American Lodges and many of our citizens affiliated therein, and having not only proved that it did not forbid or exclude, but permits, as she has always, the use of the Great Light and moreover settled the question of the past woman, she knocks at the door of the American Grand Lodges for recognition. Let it be borne in mind that recognition is not essential, or even necessary to legality. It only bears in its train a more enlarged and fraternal intercourse among and between their members

CHAPTER III

CUBA AND PORTO RICO

Cuba.

ON December 17, 1804, the Grand Lodge of Pennsylvania chartered at Havana Le Temple des Vertus Theologales, No. 103, Joseph Cerneau being the first Master. Under the same sanction other lodges were erected—in 1818, Nos. 157, 161; in 1819, Nos. 166, 167; in 1820, No. 175 (at Santiago de Cuba), and in 1822, No. 181. They existed up to 1826, at which time the charters of Nos. 175 and 181 had been revoked for failure of meeting for more than a year, and the others had died out. The Grand Lodges of Louisiana and South Carolina next assumed the warranting of lodges on the island. Under the former Grand Lodge, bodies sprang up, in 1815, No. 7, in 1818, Nos. 11 and 14, and under the latter in 1818, No. 50, and in 1819, No. 52. The Grand Orient of France in 1819 established a lodge and consistory (32), and two further lodges in 1821. The Grand Lodge of South Carolina received from the G. L. of Ancient Freemasons in Havana in 1821, a communication stating that a Grand Lodge had been organized there, to which the Lodge La Aménidad, No. 52, desired permission to transfer its allegiance. A favorable answer was returned, but La Constancia, No. 50, was retained on the roll of the G. L. of South Carolina for some years, after which the Warrant was surrendered by the members "in consequence of the religious and political persecutions to which they were subjected."

For many years Masonry languished in the "Pearl of the Antilles," its votaries practicing their rites in secret, but not daring to indulge in any overt acts, which might entail not only expulsion from the country, but also confiscation of their property. At length, however, a faint revival set in, and a Warrant was granted, November 17, 1859, by the Grand Lodge of South Carolina to St.

Andrew's Lodge, No. 93, "for the purpose of establishing, with the co-operation of two other Lodges¹ already existing on the island, a Grand Lodge," which was accomplished on December 5th of the same year.

An independent "Grand Lodge of Colon" was thus established at Santiago de Cuba, and—December 27, 1859—a Supreme Council of the A. and A. S. R. 33° was founded in the same city by Andres Cassard.²

At this time, it must be recollected, the practice of assembling as Freemasons was forbidden by the Spanish laws, which laws, moreover, though destined to become—after the dethronement of Queen Isabella (1868)—innocuous in the Peninsula, remained for a long time in full force in Cuba.

Several, indeed, of the Captains General and other officers who ruled the islands were Masons, and therefore from time to time the Craft was tolerated, but its members being always compelled to work to a great extent in the dark, found it necessary to observe the most inviolable secrecy, and even to shield themselves under "Masonic names," lest by the discovery of their own, they might incur the most grievous penalties.

For the same reason the Supreme Council and the Grand Lodge, which soon after united in forming a Grand Orient, found a convenient title for the amalgamated body in the name of Colon—the Spanish for Columbus—it being desired above all things to conceal from the public ken the seat of the "Grand East" of the Society.

At the formation of the Grand Orient of Colon, a constitution published at Naples in 1820 was adopted as that of the new organization. By this the Supreme Council necessarily became a section of the Grand Orient. In 1865 a new constitution was promulgated. The Sov. G. Com. of the Supreme Council became—*ex officio*—G. M. of the Grand Orient, but the G. M. of the Grand Lodge was still required to submit himself for election. All charters for lodges were issued by the Grand Lodge, but had to be confirmed and *vised* by the Supreme Council.

In 1867 the Grand Lodge promulgated a constitution of its own, in which, while recognizing its continued membership of the Grand

¹ Brothers Albert Pike and Josiah H. Drummond agree that these were Spanish lodges, having warrants from Spain.

² Sanctioned by S. C. 33° Southern Jurisdiction.

Orient, it claimed the *exclusive* power to enact its own by-laws, issue charters, constitute and regulate lodges. Their right to do this was denied by the Supreme Council. In 1868, September 30th, the Grand Lodge *suspended* its constitution until a meeting took place of the Grand Orient, convoked for November 30th. But before that time the revolution broke out, and Freemasons, being regarded by the Spanish Government as revolutionists, the G. O. could not meet. The Grand Lodge, so far as it was possible, resumed labor. But the times were unpropitious. In the winter of 1869, at Santiago de Cuba, by order of Gonzales Bret, an officer of the Government, eighteen persons were seized without warrant, and immediately shot, without trial, for being Freemasons—one of them the M. W. G. M. of Colon—and many others were arrested and committed to prison for the same offence.

The number of Cuban lodges, which in 1868 amounted to about thirty, had fallen in 1870 to about seven, and in the latter year the S. C. organized a Provincial Mother Lodge at Havana, against which the Grand Lodge very naturally protested. The Warrant to this "Mother Lodge" was soon after recalled, but the dispute between the S. C. and the Grand Lodge continued. In 1873—April 11th—the Grand Lodge resumed work openly, and in the following year entered into a compact with the Supreme Council, whereby it was agreed that the former should have exclusive jurisdiction over Symbolic Masonry, with the sole right of chartering lodges, and that it should establish a Provincial Mother Lodge in the western section of the island to govern the lodges there, but in submission to the laws of the Grand Lodge. After this compact it was intended that the Grand Lodge, though still nominally a section in the Grand Orient, should have full jurisdiction over the Symbolic Masonry. Nevertheless, it is quite clear that there was a divided authority, and apparently great Masonic confusion on the island.

The Grand Lodge of Colon held five meetings in August, 1876, at the last of which—August 26th—it declared itself free from all other authority, a sovereign body, with full and unlimited powers over its subordinates.

This action, however, was accelerated by an event which had taken place on August 1st, when the representatives of nine chartered lodges, and of four under dispensation, met at Havana, and

formed the Grand Lodge of Cuba. This body from the very first kept itself free from the blighting influence of the (so-called) high degrees, which it willingly consented—December 31, 1876—should be ruled in Cuba by the Grand Orient of Spain. In a circular of September 4, 1876, the Grand Lodge of Colon claimed to have on its register thirty-six lodges and 8,000 members; while its newly formed rival, the Grand Lodge of Cuba, in 1877, possessed an apparent following of seventeen lodges. In the latter year—June 3d—a second Grand Lodge of Colon (or Columbus) at Havana was added to the two existing Craft Grand Bodies.

Thus we find three organizations, each claiming to be the regular Grand Lodge. From a circular of the Grand Lodge of Cuba, we learn that in 1879 the three lodges which formed the Grand Lodge of Colon, at Santiago de Cuba in 1859, and four others, adhered to that body; but that the remaining lodges, excepting those under the Grand Lodge of Cuba, were subject to the control of the Grand Lodge of Colon at Havana. To local jealousies must be attributed this multiplication of Grand Lodges. The representatives of some of the Havana lodges who seceded from the old (or *original*) Grand Lodge of Colon at Santiago de Cuba, met *as the Grand Lodge*, and decreed its removal to Havana.

Eventually, however, the Grand Lodges of Colon (at Havana) and Cuba formally united, and March 28, 1880, the G. M. of one body became Grand Master, and the G. M. of the other body Deputy Grand Master. The title assumed by the new organization was the United Grand Lodge of Colon and the Island of Cuba, and it entered upon its career with a roll of fifty-seven lodges, and between 5,000 and 6,000 Masons. The lodges under the original Grand Lodge of Colon at Santiago de Cuba remained true to their allegiance.

In 1885 the number of lodges under the "United Grand Lodge" had apparently increased to eighty-two, with Provincial Grand Lodges at Santiago de Cuba and Porto Rico; but on the official list there were only fifty-eight lodges in all upon the roll. Of these, thirty are in the capital, or in its vicinity, and twenty-eight in other parts. It is possible that further schisms may have disturbed the peace of Cuban Masonry; and it is somewhat remarkable that the Provincial Grand Lodge of Porto Rico—with the fourteen subordinate lodges on that island, shown in sundry calen-

dars for 1886—have wholly disappeared in the official list of current date.

It only remains to be stated, that, from the statistics before me, there would appear to have been in existence on the island thirteen lodges under the National Grand Orient, and twenty-seven under the Grand Lodge of Spain. The latter were subject to a Prov. G. M., whose jurisdiction also extends to Porto Rico.

Since the suppression of Masonry in Cuba by Spanish authority, and the murder of Masons at Santiago de Cuba, no authentic information of the status of the Institution in the island has been attainable. No official documents have been issued, but after the war of the United States with Spain ended, a notice announcing that several bodies of the Fraternity in the island had resumed their labors was issued, and under the new régime there is no doubt that Masonry will flourish there, and its prosperity spread into other parts of the Antilles.

Porto Rico.

The early Masonic history of this island is very vague and conjectural, as are all questions relating to the problem of Spanish Masonry. In 1860, at Mayaguez, there was in existence a Lodge Restauracion under the G. O. of Colon, but the changes which took place in Cuba during the struggle for existence of the Grand Lodges there, had their influence throughout all of the Spanish islands.

The lists show that the Provincial Superintendent of Cuba and Porto Rico under the Grand Lodge of Spain (of which Becera was the G. M.) was Don Manuel Romeno. The lodges are not enumerated in the list, but five are on the roll of the Grand Orient of Spain, however, without a Provincial Superintendent named. Le Phenix, No. 230, constituted in 1874, was the only lodge representing the S. C. of France. At one time the United Grand Lodge of Colon in Cuba had under its jurisdiction fourteen lodges in the island. However, these were formed into an Independent Grand Lodge, September 20, 1885. The greatest centres of Masonic activity have been San Juan, Ponce, and Mayaguez, the last-named town not only having two lodges, but also a consistory of 32°, a council of 30°, and a chapter of 18°.

While the lodges of Porto Rico severed their connection with the "*United Grand Lodge*" of Colon in the island of Cuba, the

chapters and other associations of Masons in this Spanish dependency retained their allegiance to the *Supreme Council* of the same title.

Upon this a little light is thrown by the action of Don Antonio Romero Ortiz (at the same time presiding over the Grand Lodge of Spain), who, in a decree, dated March 13, 1883, "denounced the Grand Lodge of Colon and Cuba, and the Masons of its obedience as traitors to the Government and to the Mother Country," simply because they declined to recognize his authority to govern or interfere in the affairs of "Symbolical Masonry" in Cuba. In the same year the United Grand Lodge of Colon and Cuba announced by circular that there being in all three Supreme Councils and three Grand Lodges in Spain, it had recognized the Grand Lodge of Seville as being "the only really independent organization of Craft Masonry" then existing in that country. This, of course, was dealing very summarily with the pretensions of the Grand Lodge (or Orient) under Ortiz, which Mr. Albert Pike pronounced to be the only Grand Body in Spain legitimately entitled to recognition as a regular Masonic body. The name last quoted being, as many will be aware, that of the Sov. G. Com. of the S. C. 33° for the U. S. A., Southern Jurisdiction—the body of which he is the head being to other Supreme Councils what the Grand Lodge of England is to other Grand Lodges, and his own personal authority perhaps ranking higher than that of any other Mason either in the Old World or the New.

The Grand Lodge and Supreme Council of Colon and Cuba have therefore followed different roads, the latter treading in the beaten track traversed by Supreme Councils in amity with that presided over by the patriarch and law-giver of the rite, and the former boldly striking out a path of its own.

Owing to the state of political affairs in the island, and from the influential position held by Ortiz in Spain, the charges he made were calculated to subject the Cuban Masons both to surveillance and persecution on the part of the authorities. At Porto Rico the circumstances were somewhat different. Out of Cuba itself the S. C. of Colon was long regarded—and not alone by votaries of the A. and A. S. R. 33°—as a more stable institution than any other of the numerous Grand Bodies which sprang up like mushrooms in the island. When, therefore, the two governing bodies at Havana,

each in its own way, attempted to solve the problem of Craft sovereignty in Spain, it is not to be wondered at that the confusion existing in the peninsula was reproduced with more or less fidelity in the Spanish Antilles. In Porto Rico there were no less than five chapters of 18°, besides a council of 30°, and a consistory of 32°. These, as already related, adhered to their allegiance; but the lodges on the island set up a Grand Lodge of Porto Rico at the city of Mayaguez in 1885, and it is satisfactory to state that the Grand Lodge of Colon and Cuba subsequently established fraternal relations with the new body.

CHAPTER IV

FREEMASONRY IN ASIA

E are greatly indebted to Gould's "History of Freemasonry" for the following sketches of Masonry in Asia and other countries in the Eastern Hemisphere. He says: "It has been the practice of Masonic writers to pass lightly over the history of Free Masonry in non-European countries and to exclude almost from mention the condition or progress of the Craft, in even the largest Colonies or Dependencies within the sovereignty of an Old World Power."

Information on this point must be sought amid the records of the countries discussed. Too little emphasis has been laid by writers upon other than European countries, and slight attention given to their dependencies. Of these latter Findel says: "The lodges existing in these quarters of the globe were one and all under the Grand Lodges of England, Scotland, Holland or France, and therefore their history forms an inseparable part of that of the countries in question." This statement, to say the least, is inexact. Owing to the varied admixture of peoples found in the Asiatic countries into which Europeans have entered, the practice of the craft emanates from many different sources.

While in the Greater Antilles arose Masonic Innovations claiming equality with or superiority over the Grand Authority of the Craft, in the Lesser Antilles, lodges connected with different European Grand Bodies existed in the same localities. This state of affairs necessarily induced a conflict of jurisdiction. Rebold says:

"After Holland had become incorporated with the French Empire (July, 1810), the Grand Orient of France assumed the control of all the Dutch Lodges which then existed, with the exception of those of the Indies, which remained under the obedience which had

KNIGHTS TEMPLARS

created them, and which carried on the title of Grand Lodge of the United Provinces of the Low Countries."

Likewise the Provincial Grand Lodge of Bengal, in British India, was more than once independent in fact, if not in name, and its archives must be examined for Hindostanee Freemasonry or else nothing would be known of lodges the names of which do not appear upon the rolls of those European Grand Bodies under which Findel avers they came.

India.

George Pomfret was authorized in 1728 by the Grand Lodge of England "to open a new Lodge in Bengal." This lodge was established in 1730 by Captain Ralph Farwinter, the successor of Pomfret, as "Provincial Grand Master of India." This lodge is described as No. 72, Bengal, and is distinguished by the arms of the Company in the Engraved Lists.

James Dawson, Zech Gee, and Roger Drake, in order, succeeded Captain Farwinter. Drake was Governor of Calcutta, but escaped the horrors of the Black Hole in 1756 by flying to the ships. He returned with Clive, but does not appear to have resumed his Masonic office.

At the period in question it was the custom in Bengal "to elect the Prov. G. M. annually by the majority of the voices of the members then present, from among those who had passed through the different offices of the (Prov.) Grand Lodge, who had served as Dep. Prov. G. M."

Under this practice Samuel Middleton was elected in 1767 and confirmed October 31, 1768. But a few years previously Earl Ferrers had granted a roving commission to "John Bluvitt, commander of the Admiral Watson Indiaman for East India, where no other Provincial is to be found." The annual election referred to was confirmed by the Grand Master of the Grand Lodge of England without its being thought an infringement upon his prerogative. But the dispensation confirming Middleton's election was regarded as abrogating annual elections. He held office until his death in 1775.

The records of the Bengal Grand Lodge only extend back to 1774. But prior to this date other lodges were formed. A second one, of whom nothing, save its existence, is known, arose and seven

members of this organized a lodge April 16, 1740, and on petition the Grand Lodge of England ordered "the said Lodge to be enrolled (as requested) in the lists of regular lodges, agreeable to the date of their Constitution."

Other lodges were formed at Chandernagore, Calcutta, Patna, and Burdwan, the names of only some of which are preserved, but the numbers given them show that others must have existed.

In 1774 there were only three lodges in Calcutta. Besides these and the lodges at the other places mentioned, there were lodges at Dacca, Moorshedabad, and "at some military stations or with army brigades."

"The Grand Lodge of Solomon at Chinsura," which was under Holland, worked in harmony with the Provincial Grand Lodge under England, visits being interchanged and officials of both engaging in the same ceremonies.

"In 1775, February 15, the Prov. Grand Lodge, 'taking into consideration the propriety of preserving concord and unanimity, recommend it to the Brethren who call themselves "Scott and Elect" that they do lay aside the wearing of red ribbons, or any other marks of distinction, but such as are proper to the Three Degrees, or to the Grand Lodge as such,' a request, we are told, which was cheerfully complied with."

Upon the death of Middleton in 1776, Charles Stafford Pleydell was elected in his stead. Under Philip Milner Dacres, the successor of Stafford, the Prov. Grand Lodge of Bengal assembled for the last time January 25, 1781.

The war in the Carnatic, which nearly swept Masonry out of India, had much to do with this dissolution.

"Industry and Perseverance" of the lodges in Calcutta, "where alone in Bengal Masonry may be said to have existed," may be said to be the only one which survived with a feeble light.

However, the Provincial Grand Lodge was re-opened July 18, 1785, under George Williamson, a former Deputy P. G. M., under a patent from England appointing him Acting P. G. M., and authorizing a meeting for election of Grand Master.

Upon an election November 14th, Edward Fenwick, former Grand Warden, was elected, receiving six votes, while Williamson received four. The former was installed March 17, 1786, though under his patent Williamson was clearly entitled to hold his *acting*

appointment until the confirmation from London of the election of Fenwick.

This led to trouble. Williamson was sustained by the Grand Lodge of England, but the Prov. Grand Lodge maintained its position and, despite protests, Fenwick continued in the duties of his office and his election was confirmed May 5, 1788.

A letter of February 6, 1788, from the Prov. Grand Lodge to Grand Secretary White contains the following:

"An interesting account of the state of Masonry in Bengal appears in a letter of February 6, 1788, from the Prov. Grand Lodge to Grand Secretary White, from which I extract the following:

"'We earnestly wish to see the whole number of Lodges which existed in 1773 or 1774 re-established. But the Subordinates at Patna, Burdwan, Dacca, and Moorshedabad now consist of such small societies, and these so liable to change, that we must confess it rather to be our wish than our hope to see Lodges established at any of these places.'

"At this assembly, the Wardens of Lodge 'Star in the East' said their meetings had been interrupted, because, in the absence of the Prov. Grand Lodge, no new Master could be installed. Williamson, however, ordered them to proceed with the election of a new Master, and engaged to convene a Prov. Grand Lodge for his installation.

"A letter from G. Sec. White, dated March 24, 1787—continuing to Williamson the powers specified in his patent of 1784—was read in the Prov. Grand Lodge on August 27 of that year. In the discussion which ensued, the Master of Lodge Star in the East observed: . . . 'Mr. Williamson, whose affairs have long been in a most anxious situation—who has been obliged, for a long time past, to live under a foreign jurisdiction—who now cannot come to Calcutta, but on a Sunday, or, if he comes on any other day, is obliged to conceal himself during the day time, and to be extremely cautious how he goes even when it is dark!'

"The patent, however, did not arrive in India until March 4, 1789.

"'With respect to the Brigades, they have been divided into six of Infantry and three of Artillery. This regulation has lessened the number of officers in each, and they will be more liable to re-

movals than formerly. The first circumstance must be a great discouragement to, the formation of Lodges in the Brigades, and the second would sometimes expose such Lodges to the risk of being annihilated. However, we shall give all encouragement to the making of applications, and all the support we possibly can to such Lodges as may be constituted.'

"A grand ball and supper was given by the Prov. Grand Lodge, January 14, 1789, to which invitations were sent, not only to residents in Calcutta, but also to 'Bro. Titsingh, Governor of Chinsurah, and other Masons of that Colony; to Bro. Bretel, and the other Masons of Chandernagore; and also to the Masons of Serampore, and to the Sisters of these Colonies, according to what has been customary on such occasions formerly.'

"In 1790—December 27—Fenwick resigned; and on the same day the Hon. Charles Stuart was elected and installed as his successor. The latter, however—owing to the government of the country devolving upon him in consequence of the absence of Lord Cornwallis from Calcutta—appointed Richard Comyns Birch 'Acting Prov. G. M. of Bengal.'

"The Lodges in the Presidency are thus described in the Freemasons' Calendar for 1794:

Star in the East, Calcutta, 1st Lodge of Bengal.....	1740
Lodge of Industry and Perseverance, Calcutta, 2d Lodge of Bengal	1761
Lodge of Unanimity, Calcutta, 3d Lodge of Bengal	1772
Anchor and Hope, Calcutta, 6th Lodge of Bengal	1773
Lodge of Humility with Fortitude, Calcutta, 5th Lodge of Bengal	1773
Lodge of True Friendship, with the 3d Brigade, 4th Lodge of Bengal.....	1775
At Futty Ghur, Bengal.....	1786
Lodge of the North Star, Fredericksnagore, 7th Lodge of Bengal.....	1789
At Chunar, in the East Indies, 8th Lodge of Bengal.....	1793
Lodge of Mars, Cawnpore, 9th Lodge of Bengal.....	1793"

There was also another lodge, the Marine Lodge, Calcutta, and a Stewards' Lodge under the Grand Lodge of England.

From the first two lodges of the above list the officers of the Prov. Grand Lodge had always been selected, which induced resentment upon the part of the other lodges. This feeling brought about a general defection from the Prov. Grand Lodge of Bengal and by consequence from the Grand Lodge of England. An

ephemerai lodge—No. 146—under the Athoil (or *Ancient*) Grand Lodge was established at Calcutta in 1767, but no others were founded until later.

"The Lodges 'True Friendship' and 'Humility with Fortitude' were the first who transferred their allegiance, the former becoming No. 315, or No. 1 of Bengal, Dec. 27, 1797; and the latter, No. 317, or No. 2 of Bengal, April 11, 1798. The 'Marine Lodge' followed their example, and obtained a similar warrant—No. 323—March 4, 1801. Meanwhile, Lodge 'Star in the East' fell into abeyance, and 'Industry and Perseverance' was on the point of closing also. One meeting only was held in each of the years 1802, 1803, and 1804, after which, for a long period, there were no more. Lodge 'Anchor and Hope' obtained an Atholl warrant as No. 325—Oct. 1, 1801. Little is known of Lodge 'Unanimity,' which, though carried forward at the union (1813), must have died out at least several years before.

"During the ten or eleven years that intervened between the obliteration of the Prov. Grand Lodge and its re-establishment in 1813, Masonry in Calcutta was represented almost exclusively by the Lodges which had seceded from the (older) Grand Lodge of England.

"On St. John's Day (in Christmas), 1809, the Lodges, True Friendship, Humility with Fortitude, Marine, No. 338 (Ancients) in the 14th Foot, and the 'Dispensation Lodge,' working under a warrant granted by No. 338, walked in procession to St. John's Church, where a Masonic sermon was delivered by the Rev. Dr. James Ward.

"Happily, Lodges Star in the East, and Industry and Perseverance, were revived in 1812, and on December 22 of that year, accompanied by the 'Officers' Lodge,' No. 347 in the 14th Foot, and Humility with Fortitude, also walked in procession to the same church, and benefited by a like sermon from Dr. Ward.

"On October 4, 1813, the Earl of Moira—who had been appointed Acting Grand Master of India—arrived in Calcutta. The first Masonic act of the Governor-General was to constitute a new Lodge in that city—the Moira, Freedom and Fidelity—November 8, and his second, to re-establish the Prov. Grand Lodge of Bengal under the Hon. Archibald Seton."

Upon the union of the two Grand Lodges, the "Atholl" lodges, three in number, at Calcutta came under the jurisdiction of the Prov. Grand Lodge.

Two others of the secession are not mentioned in the records of the Province, 1814-40.

"At the period of this fusion, there were the following Lodges under the old sanction: The Stewards, Star in the East, Industry and Perseverance, and Sincere Friendship (Chunar). Of these Lodges, the first never held a London warrant, and the last was struck off the roll inadvertently at the Union. There were also then in existence the Moira Lodge, and three others, constituted since the revival of the Prov. Grand Lodge, the names of which head the following table of Lodges erected during the period 1813-26:

Moira, Calcutta, November 13, 1813.

Oriental Star, Noacollee, April 21, 1814.

Aurora, Calcutta, June 23, 1814.

Courage with Humanity, Dum Dum, July 12, 1814.

Northern Star, Barrackpore, July 18, 1816.

Sincerity, Cawnpore, January 8, 1819.

Hasting Lodge of Amity and Independence, Allahabad, April 9, 1821.

United Lodge of Friendship, Cawnpore, June 13, 1821.

Humanity with Courage, Prince of Wales' Island, July, 1822.

Amity, St. John's, Poona (Deccan), January 30, 1824.

Kilwinning in the West, Nusseerabad, October 20, 1824.

Larkins' Lodge of Union and Brotherly Love, Dinapore, October 20, 1824,

Independence with Philanthropy, Allahabad, October 26, 1825.

South-Eastern Star of Light and Victory, Arracan, October 26, 1825.

Tuscan, Malacca, October 26, 1825.

Royal George, Bombay, December 9, 1825.

Union and Perseverance, Agra, October 23, 1826.

Kilwinning in the East, Calcutta, December 23, 1826.

"Out of these eighteen Lodges, however, only seven—Nos. 2, 3, 4, 6, 7, 13, and 18 above—secured a footing on the roll of the Grand Lodge of England, and it is not a little curious that of the two now alone surviving, Courage with Humanity (1814), and Independence with Philanthropy (1825), which were placed on the general list in the same year (1828) in juxtaposition, the latter bears the earlier number, and has the higher precedence!"

The Duke of Sussex empowered Earl Moira, whose sway extended over India, to appoint Provincial Grand Masters, as if appointed by himself.

Acting Prov. G. M. Seton, leaving India in 1817, the Governor-General, Marquis of Hastings, selected Hon. C. Stuart to succeed him, but he does not appear to have qualified. So Hon. C. R. Lindsay was appointed by Marquis of Hastings, Prov. G. M. January 17, 1818, and by the Deputy G. M. of India January 13, 1819.

November 30, 1818, request was made to the Grand Master of India by eight persons for permission to meet as a lodge at St. Andrew, to make the Hon. Mountstuart Elphinstone a Mason and also to install him, when made, as deacon. No record of any reply has been kept.

John Pascal Larkins succeeded Lindsay as D. G. M. of India and Prov. G. M. of Bengal December 24, 1819. He returned to Europe in 1826, and until 1840 the Craft in Bengal was ruled by a Deputy in Calcutta. From this resulted the overthrow of all order and constitutional authority.

"The Lodges in Bengal made their returns regularly, and forwarded their dues punctually, to the Prov. Grand Lodge; but as no steps were taken for the transmission of these returns and dues to their destination, the Grand Lodge of England ceased to notice or regard the tributary Lodges of Bengal. On the submission of a motion for inquiry—March 22, 1828—the Deputy Prov. G. M. 'felt himself constrained to resign his chair on the spot, and the Grand Wardens also tendered their resignations.'

"This led, at the instance of Lodge Aurora, to the formation of a representative body, styled the Lodge of Delegates, who were charged with the duty of preparing a memorial to the Grand Lodge of England, which, bearing date August 22, 1828, was sent to the Duke of Sussex, signed by the Masters and Wardens of the following Lodges: True Friendship, Humility with Fortitude, Marine, Aurora, Courage with Humanity, and Kilwinning in the East.

"To this no reply was vouchsafed. The letters of the Lodges in Bengal remained unanswered, and their requests unheeded. The usual certificates for brethren made in the country were withheld, notwithstanding that the established dues were regularly remitted; and applications for warrants were also unnoticed, though they were

accompanied by the proper fees. This state of affairs continued until 1834, when the question of separation from the Grand Lodge of England was gravely and formally mooted in the Lodges. Overtures for a reconciliation at length came in the shape of certificates for brethren who had by this time grown gray in Masonry. Answers to letters written long ago were also received; but the most important concession made by the Grand Lodge of England was the constitution of the first District Grand Lodge of Bengal—under Dr. John Grant—which held its first meeting, February 28, 1840."

"In 1834 some Masons at Delhi applied to their brethren at Meerut for an acting constitution of this kind, which might serve their purpose until the receipt of a warrant from the Grand Lodge of England. At the latter station there were two Lodges, one of which, however, was itself working under dispensation, and could not therefore dispense grace to another. The other belonged to the 26th Foot, No. 26, under the Grand Lodge of Ireland. This Lodge declined giving a dispensation, for the somewhat Irish reason that the Cameronian Lodge had already granted one to another Lodge, of the propriety of which act they had great doubt; and that until an answer had been received from Ireland they could not commit a second act of doubtful legality! The custom, however, was a very old one. In 1759, Lodge No. 74, I. R., in the 1st Foot (2d Batt), granted an exact copy of its warrant—dated October 26, 1737—to some brethren at Albany, to work under until they received a separate charter from Ireland. This was changed—February 21, 1765—for a warrant from George Harrison, English Prov. G. M. of New York; and the Lodge—Mount Vernon—is now No. 3 on the roll of the Grand Lodge of that State."¹

In the British Army the Grand Lodge of Ireland has been the favorite of Grand Bodies, and yet only one stationary lodge has been erected in India under its jurisdiction. This was in 1837 at Kurnaul, but it seems to have lived only one year. At Bombay, in 1862, an attempt was made to organize another lodge. But the attempt failed, as the Grand Lodge of Ireland refused a warrant on the ground that there were already two jurisdictions in India, the English and Scotch.

¹ Cf., Barker, "Early Hist. of the Grand Lodge of New York," preface, p. xviii.

"In the decennial periods 1840-50 and 1850-60 there were in each instance 12 additions to the roll. In 1860-70 the new Lodges amounted to 19, and in 1870-85 to 38. These figures are confined to the English Lodges, but extend over the area now occupied in part by the District Grand Lodges of Burmah and the Punjaub, both of which were carved out of the territory previously comprised within the Province of Bengal in 1868. The following statistics show the number of Lodges existing—January 1, 1886—in the various states and districts which until 1868 were subject to the Masonic government of Bengal: under the Grand Lodge of England—Bengal (D. G. L.), 39; British Burmah (D. G. L.), 7; and Punjaub (D. G. L.), 24. Under the Grand Lodge of Scotland, 11—the earliest of which, St. David (originally Kilwinning) in the East, No. 371, Calcutta, was constituted February 5, 1849.

"The Dutch Lodges in Hindustan have passed out of existence, but with regard to these, and also to certain other Lodges established by the Grand Lodge of Holland in various places beyond the seas, the materials for an exhaustive list are not available to the historian."

Madras.

At this place in 1752 was established the earliest lodge in Southern India. In 1765 three others were formed at the same station. Captain Edmund Pascal was appointed Provincial Grand Master for Madras and its Dependencies, about 1756. In the following year a fifth lodge was erected at Fort St. George. The other English settlements in India were dominated by this presidency for a short period, and the Carnatic figures largely in Indian Masonic history during the latter half of the 18th century owing to the continuous wars with the French, and afterward with Hyder Ali and his son.

"In 1768 a lodge—No. 152—was established by the Atholl (or Ancient) Grand Lodge of England at Fort St. George; and in 1773 one by the Grand Lodge of Holland at Negapatam. The next event of importance was the initiation, in 1776, of Umdat-ul-Umara, eldest son of the Nabob of Arcot, at Trichinopoly, who in his reply to the congratulations of the Grand Lodge of England, stated 'he considered the title of an English Mason as one of the most honorable he possessed.' "

A Provincial Grand Lodge under the Atholl sanction was established at Fort St. George in 1781, "but the dissensions in the settlements had so rent asunder every link of social life, that even the fraternal bond of Masonry has been annihilated in the general wreck."

Under Brigadier-General Horn, "Prov. G. M. for the Coast of Coromandel, the Presidency of Madras and parts adjacent," the union of the Brethren in Southern India was effected.

All the older lodges at this time seem to have been extinct; but there was established at Arcot in 1786 the C. M. L. The following year Lodge No. 152 tendered its allegiance to General Horn and joined one of the lodges under that officer.

Of these, four were added to the roll in 1787. Nos. 510-513—Perfect Harmony, St. Thomas Mount; Social Friendship, Madras; Trichinopoly; and Social Friendship, St. Thomas Mount—and styled Nos. 3, 4, 5, and 6, Coast of Coromandel. Two other lodges were also established in the same year, the Stewards and Perfect Unanimity, which, according to the loose practice of those days, were given the places on the list of the two earliest Madras lodges, and became (in 1790) Nos. 102 and 233 respectively.

A lodge of happy nomenclature—La Fraternité Cosmopolite—was constituted at Pondicherry in 1786 by the Grand Orient of France, and a second—Les Navigateurs Reunis—1790.

In the latter year—July 5th—John Charnier received a similar patent, as Prov. G. M., to that previously held by General Horn, and was succeeded by Terence Gahagan, 1806, and Herbert Compton, 1812. During this period four lodges were added to the roll—Solid Friendship, Trichinopoly, 1790; Unity, Peace and Concord, 1798; St. Andrew's Union, 19th Foot, 1802; and Philanthropists, in the Scotch Brigade (94th Foot), 1802, at Madras. These lodges were numbered 572, 574, 590, and 591 on the general, and 7, 9, 10, and 11 (Coast of Coromandel) on the local, lists respectively.

After the union the Province was ruled by Dr. Richard Jebb, 1814; George Lys, 1820; and in 1825 by Compton once more. The name of this worthy only disappears from the *Freemasons Calendar* in 1842, and with it the provincial title, "Coast of Coromandel"—exchanged for "Madras," over which Lord Elphinstone had been appointed Prov. G. M. in 1840.

Within this period—1814-42—numerous Lodges were war-

ranted locally, as in Bengal; but thirteen only—of which seven were in Madras itself—secured places on the London Register.

Eighteen English lodges have since been established in the Presidency, and there are at present in existence twenty lodges on the register of England and two on that of Scotland—both erected in 1875—but the introduction of Scottish lodges into India will be referred to in the ensuing section.

The French lodge of Pondicherry—La Fraternité Cosmopolite—was revived (or a new one established under the old title) in 1821. Another—L'Union Indienne—was erected at the same station in 1851. At the present date, however, there exist throughout India and its dependencies no other lodges than those under the Grand Lodges of England and Scotland respectively.

Bombay.

During the 18th century there were established in this Presidency a lodge at Bombay in 1758, and one at Surat in 1798, which were carried on in the lists until 1813, but disappear at the union. Jas. Todd was appointed in 1763 Provincial Grand Master, and his name only drops out of the *Freemasons Calendar* in 1799. The 78th foot, a regiment under Sir Arthur Wellesley in Mahratta war, and which took part in the decisive victory of Assaye, received an Atholl Warrant in 1801. A lodge at Poona was established in 1818. No more were established in the Presidency until 1822, when the Benevolent Lodge, Bombay, was placed on the lists. In the Bombay Artillery in 1823 there was "installed" at Poona a military lodge as No. 15—Orion in the West—Coast of Coromandel, November 15th. The Proceedings of this lodge show that members "were examined in the Third Degree T. D. and passed into the chair of the Fourth Degree"—paying a fee of three gold mohurs.

"Among the Masons about this time in Bombay were thirteen non-commissioned officers who were too poor to establish a lodge of their own, and too modest to seek admittance in what was considered an aristocratic lodge. They met, however, monthly in the guard-room over the Apollo Gate, for mutual instruction in Masonry. This coming to the knowledge of the Benevolent Lodge, the thirteen were elected honorary members of No. 746, for which

they returned heartfelt thanks. At their first attendance, when the lodge work was over, and the Brethren adjourned to the banquet, the thirteen were informed that refreshments awaited them downstairs. Revolting at the distinction thus made among Masons, they one and all left the place. The next morning they were sent for by their commanding officer, who was also one of the officers of the lodge, and asked to explain their conduct. One of the party—Mr. W. Willis (by whom this anecdote was first related to me)—told him that as Masons they were bound to meet on the level and part on the square, but as this fundamental principle was not practiced in No. 746, of which they had been elected honorary members, they could not partake of their hospitality. The astonished Colonel uttered not a word, but waived his hand for them to retire. Ever after this, the Benevolent Lodge—including the thirteen—met on the level, both in lodge and at the banquet-table."¹

Burnes, in 1836, may be best described, in ecclesiastical phrase, as a Prov. G. M. "*in partibus infidelium*" for whatever lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry. But the times were propitious. There was no English Provincial Grand Lodge of Bombay; and under the Chevalier Burnes, who had been bountifully endowed by nature with the qualities requisite for Masonic administration. "Scottish Masonry presented such attractions, that the strange sight was witnessed of English Masons deserting their Mother Lodges to such an extent that these fell into abeyance, in order that they might give their support to lodges newly constituted by the Grand Lodge of Scotland. In one case, indeed, a lodge—Perseverance—under England went over bodily to the enemy, with its name, jewels, furniture, and belongings, and the charge was accepted by Scotland."

"From this period, therefore, Scottish Masonry flourished, and English Masonry declined, the latter finally becoming quite dormant until the year 1848, when a lodge, St. George, No. 807 on the roll of the Grand Lodge of England, was again formed at Bombay, and for some years was the solitary representative of English Masonry in the Province."²

Rising Star, No. 413, was established by Burnes at Bombay, for the admission of natives—a beautiful medal, cut by Wyon, was

¹ Gould's "Hist.," vol. vi., p. 354, note 2.

² Ibid., vol. vi., p. 335.

struck in consequence—No. 414, St. Andrew in the East, at Poona was formed by him. Nos. 421, Hope, Kurrachee, and 422, Perseverance, Bombay, 1847, followed.

In 1824 there was established at Poona a second lodge which, however, has passed out of existence and left no trace thereof. The civilian element of the military lodge at Poona, No. 15, seceded in 1825 and, also at Poona, formed a lodge, 802, the Lodge of Hope. At this point Lodge 15, unrecognized at home, aided in the secession of some of its members who obtained a Warrant, on the recommendation of the parent lodge, from the Grand Lodge of England.

In 1828, Perseverance, No. 818, was erected at Bombay. No notification of the existence of Orion in the west had been received by the Grand Lodge of England, nor had any fees been paid, though regularly paid to the Provincial Grand Lodge of the Coast of Coromandel, though this was not ascertained until 1830. Also it was ascertained that the Prov. G. M. of the Coast of Coromandel had gone beyond his powers in permitting the erection of a lodge at Bombay, though ultimately there was granted from England July 19, 1833, a new Warrant, No. 598.

As yet there had been no invasion of the jurisdiction of the Grand Lodge of England; but the Grand Lodge of Scotland, in 1836, appointed Dr. Jas. Burnes Prov. G. M. of Western India and its Dependencies. But not until January 1, 1838, was a Prov. Grand Lodge formed. Subsequently there was erected in Eastern India a second Scottish Province. This was absorbed within the jurisdiction of Dr. Burnes on the retirement of the Marquis of Tweeddale, who became Prov. G. M. for all India, in 1846, with the proviso, however, that any future subdivision of the Presidencies was not to be restrained by this appointment.

After this, in Bengal, Scottish lodges were established—Kilwinning in the East, Calcutta, 1849; and in Arabia Felix, Aden, 1850. At the beginning of 1886, from the Grand Lodge of Scotland, there had been received charters by nineteen lodges under Bombay, eleven under Bengal, two under Madras, and one in Afghanistan—thirty-three lodges in all

In 1849, Burnes, leaving India, was succeeded in Western India only by a Prov. G. M. However, Captain Henry Morland became Prov. G. M. of Hindustan in 1874, and subsequently became Grand Master of All Scottish Freemasonry in India.

Of the lodges under the Grand Lodge of England, St. George, erected in 1848, was the only representative of its class for ten years. However, "Concord" and "Union" were established at Bombay and Currachee respectively, in 1858. From its dormancy, "Orion in the West" aroused a year later. A Provincial Grand Lodge was established in 1861, and other subordinate lodges were subsequently chartered.

At first Freemasonry did not take any real root among the native population of India.

"Umdat-ul-Umara, son of the Nabob of Arcot, was admitted a member of the Society, in 1776. The princess Keyralla Khan (of the Mysore family) and Shadad Khan (ex-Ameer of Scinde) joined, or were made Masons in, the lodge of "True Friendship" in 1842 and 1850 respectively; and in 1861 the Maharajahs Duleep and Kunder Sing were initiated in lodges "Star of the East" and "Hope and Perseverance"—the last-named personage at Lahore, and the other three in Calcutta.

A By-law of the Prov. Grand Lodge of Bengal, forbidding the entry of Asiatics without the permission of the P. G. M., was in force until May 12, 1871; and there was at least a popular belief in existence so late as 1860, that Hindus were ineligible for initiation.

The Parsees of Western India were the first of the native races who evinced any real interest in the institution, and are to be congratulated on the recent election (1886) of one of their number—Mr. Cama—to the high position of Treasurer of the Grand Lodge of England.

In 1876 a Scottish lodge, No. 587, "Islam"—presumably for the association of Mohammedans—was erected at Bombay. The extent to which Freemasonry is now practiced by the Hindus—who form $73\frac{1}{2}$ per cent. of the total population of India—I am unable to determine. The first of this class of religionists to fill the chair of a lodge was Mr. Dutt, whose election in 1874 may not have been without influence in the diffusion of Masonic light.

The Indian Freemasons' friend, a publication of rare merit, was set on foot at Calcutta in 1855, but was short-lived. A new or second series was commenced in May, 1861, and lasted to the end of 1867. In Bombay, the Masonic Record of Western India enjoys an extensive circulation, and is very ably conducted.

East India Islands.

Ceylon.—This, for convenience, is grouped under the heading "East India" and in these islands the Grand Lodge of Orient established Masonry. In 1771 Fidelity was erected at Colombo; in 1773 Sincerity at Point de Galle; in 1794 Union, another at Colombo. When the British possessed themselves of the Dutch settlements on the Island, it was annexed to the Presidency of Madras, but in 1801 was formed into a separate crown colony. The Grand Lodge of Scotland granted a Charter February 9, 1801, to the 51st Regiment, stationed at Colombo, for the Orient Lodge. There were also formed on the islands two other lodges under Atholl (or Ancient). In 1810 Sir Alexander Johnston was appointed Prov. G. M. by the Grand Lodge of England, though his name disappears from the lists before 1838. However, greater activity was displayed under other jurisdictions. At Colombo, in 1821, an Irish lodge was erected, and in 1822, a French one under the G. O. In 1832 there was revived the latter, or there was formed a new lodge of the same name.

Sumatra.

There was established at Bencoolen, in 1765, an English lodge, and in 1772 and 1796, at Fort Marlborough, two others. Until 1813 these appeared in the lists, but the "Marlboro," which ultimately became No. 242, was carried forward at the union but was erased March 5, 1862, having omitted to make any returns for several years. Under John Macdonald, in 1793, Sumatra was erected into an English Province, and he was succeeded by H. R. Lewis, as Prov. G. M., December 10, 1821, but continued to hold office until his death in 1877, there having been in existence at the date of his original appointment one lodge, and none at all for fifteen years preceding his decease.

Java.

The Grand Lodge of Holland constituted a lodge—Star in the East—into this island in 1769. There are no precise records, but it is known that others sprung up in the Capitol and larger towns. In 1771 there was erected at Batavia a second lodge, and at Samarang in 1801, and at Sourabaya, 1809, charters were granted. In 1886 there were eight lodges in Java.

Celebes.

There was erected at Macassar, in 1883, under the Grand Lodge of Holland, one lodge—Arbeid Adelt.

Borneo.

An English lodge—Elopura—was established in North Borneo, in 1885, at the station of the same name.

The Philippines.

In 1886 there were four lodges in existence in these islands, one under the National Grand Orient, and three under the Grand Lodge of Spain. The latter form a Province, and are subject to a Provincial Superintendent.

Persia.

"Thory informs us that Asked-Khan, ambassador of the Shah at Paris, and who was himself admitted into Masonry in that city—November 24, 1808—took counsel with his French Brethren respecting the foundation of a lodge at Ispahan. Whether this project was ever carried into effect it is impossible to say, but two years later we find another Persian—also an ambassador—figuring in Masonic history. On June 15, 1810, "His Excellency Mirza Abul Hassan Khan" was granted the rank of Past Grand Master of the Grand Lodge of England. This personage—the Minister accredited from the Court of Persia to that of Great Britain—in addition to having been a great traveler both in Hindustan and Arabia, had also performed his devotions at Mecca. In the course of his journey from Teheran he passed through Georgia, Armenia, and Antolia. At Constantinople he embarked in a British man-of-war, and reached England in December, 1809.

"Sir Gore Ouseley, Bart., who was selected to attend upon the Mirza 'as Mehmander—an officer of distinction, whose duty it is to receive and entertain foreign princes and other illustrious personages'—in the following year (1810) received the appointment of ambassador to the Shah of Persia, and was also granted an English patent as Provincial G. M. for that country. No lodges, however, were established in Persia at any time by the Grand Lodge of Eng-

land, nor—so far as the evidence extends—by any other external authority. The Mirza Abul Hassan Khan was made a Mason by Lord Moira in 1810. The extent of his services to the Craft we must leave undecided; but it was stated somewhat recently in the Masonic journals, on the authority of a Persian military officer then pursuing his studies in Berlin, that nearly all the members of the Court of Teheran are Brethren of our Society."

The Straits Settlements.

The Duke of Atholl established Neptune Lodge, No. 344, at Penang (or Prince of Wales Island) by Warrant September 6, 1809, which became extinct in 1819. Three years subsequently a military lodge—Humanity with Courage—was warranted from Bengal. This body, however, having become irregular by the initiation of civilians, the Duke of Sussex renewed the Charter of the Atholl Lodge, which, having flourished for a time, eventually fell into decay, and was erased, together with another lodge "Neptune " also at Penang—erected in 1850—No. 846 on the English roll, March 5, 1862. The only lodge now existing in this settlement is No. 1555, warranted by the Grand Lodge of England in 1875.

In Malacca, a lodge was formed under the Prov. Grand Lodge of Bengal in 1825, which never secured a place on the general list. In Singapore, English lodges were established in 1845, 1858, and 1867, named Zetland in the East, Fidelity, and St. George, Nos. 748, 1042, and 1152 respectively. Of these the first and last survive, and, together with the lodge at Penang, compose the province of the Eastern Archipelago, of which Mr. W. H. Read was appointed the first Prov. G. M. in 1858.

Cochin- China.

In this French dependency, a lodge—Le Reveil de l'Orient—was established by Warrant of the Grand Orient of France, October 22, 1808.

China.

During the last century two lodges of foreign origin were constituted in the Celestial Empire—the lodge of "Amity," No. 407, under an English, and "Elizabeth" under a Swedish, Warrant. The

former was erected in 1767, the latter in 1788; and in each case the place of assembly was Canton. The English lodge was not carried forward at the union (1813), and "Elizabeth," as we are informed by the Grand Secretary of Sweden, came to an end in 1812.

The next lodge erected on Chinese soil was the Royal Sussex, No. 735, at Canton, for which a Warrant was granted by the United G. L. of England in 1844. A second Zetland, No. 768—was established at Hong-Kong under the same sanction, in 1846; and a third—Northern Lodge of China—at Shanghai, in 1849. No further increase of Lodges took place until 1864, in which year two were added to the English roll, at Hong-Kong and Shanghai respectively; and one each at the latter port under the Grand Lodges of Scotland and Massachusetts. The progress of the craft in the "Middle Kingdom" has since been marked, but uneventful, though as yet Freemasonry has failed to diffuse its light beyond the British Colony of Hong-Kong, and the various ports of the mainland opened up by treaty to the merchants of foreign powers. Mr. Samuel Rawson was appointed by Lord Zetland Prov. G. M. for China in 1847; and a second Province was carved out of the old one in 1877, by the appointment of Mr. Cornelius Thorne as District G. M. for Northern China.

In 1886 there were in existence at Victoria (Hong-Kong) and the Chinese treaty-ports thirteen English, one American, and four Scottish Lodges; and with a solitary exception—No. 1217, at Ningpo, formed in 1868, under the Grand Lodge of England, but now extinct—all the lodges erected in China or Hong-Kong since the revival of Masonry in the Far East (1844) were still active, and can therefore be traced in the calendars of current date by those desirous of further information respecting them.

Japan.

"English Lodges bearing the following numbers were erected at Yokohama—1092 and 1263—in 1866 and 1869; at Yedo (now extinct)—1344—in 1870; at Kobe—1401—in 1872; and at Tokio—2015—in 1883. These are subject to a Prov. G. M., who was appointed in 1873.

"There are also three lodges under the Grand Lodge of Scotland—Nos. 498, 640, and 710—at Kobe, Yokohama, and Nagasaki."

Cape Colony.

Prior to the acquisition of this colony by Great Britain, two Dutch lodges had been erected at Cape Town, in 1772 and 1802, respectively. While these survived, several other lodges under the same jurisdiction passed away without leaving any trace of their existence.

Afterward the Grand Lodge of England, established at the capital lodges in 1811 and 1812—the "British," No. 629 under the old sanction, in the former year; and the "Cape of Good Hope" Lodge under an Atholl Warrant in the Tenth Battalion of the Royal Artillery.

The first band of English settlers arrived in 1820, and in the following year a second stationary lodge, under the United Grand Lodge of England—Hope, No. 727—was erected at Cape Town, where, also, a lodge bearing the same name, under the G. O. of France, sprang up, November 10, 1824. A third English lodge, Albany, No. 817, was established at Grahamstown in 1828. "The Dutch lodges received the English Brethren with open arms, and with great satisfaction. When English Masonry had increased, and it was considered right to form a Provincial Grand Lodge, the Brother selected for the office of Prov. G. M. was the Deputy G. M. of the Netherlands, who continued till his death to hold the two appointments." This must have been Sir John Truter, who received an English patent in 1829; for although an earlier Prov. G. M. under England, Richard Blake, had been appointed in 1801, the words quoted above will not apply to the latter. Between 1828 and 1850 there was no augmentation of the lodges; but in the latter year a revival set in, and during the decade immediately ensuing, 1851-60, six were warranted by the Grand Lodge of England.

In 1860, to the jurisdictions already existing (those of Holland and England), was added that of Scotland, under the Grand Lodge of which country a lodge, Southern Cross, No. 398, was erected at Cape Town. Shortly afterward, in a single year (1863), two Dutch lodges were established in Cape Colony, and one at Bloemfontein, in the Orange Free State. This period coincides with the appointment, after an interregnum, of the Hon. Richard Southy as Prov. G. M. under the G. L. of England; and it will be convenient if I here proceed to describe *seriatim* the progress of Masonry under

the three competing jurisdictions. Commencing with that of England between the date to which the statistics were last given (1860) down to the close of 1885, sixty-two lodges were added to the roll. The number at present existing in South Africa, as shown by the official calendar of current date, is fifty-four, *viz.*: Eastern Division, twenty-four; Western Division, eight; Natal, eleven; and eleven not subject to any provincial authority, some of which were formerly under the District Grand Lodge of Griqualand (now abolished), and two, No. 1022, at Bloemfontein (Orange Free State), and 1747, at Pretoria (Transvaal), are situate in foreign territory. Within the same period (1860-85) twelve lodges have been established under the Grand Lodge of Scotland, and now compose a Masonic District (or Province). The Dutch Masonic Calendar for 1886 shows twenty-four lodges as existing in South Africa. Of these, as already related, two were erected before 1803, and three in 1863. The latest on the present list dates from 1884. These lodges are distributed throughout the British possessions, and the different Boer Republics, as follows, *viz.*: In British South Africa, sixteen; in the Orange Free State, four; and in the Transvaal, four; and at the head of all is a Deputy National G. M., Mr. J. H. Hofmeisr, at Cape Town.

Between the English and Dutch Masons at the Cape, there have always been the most friendly relations. In 1863 the D. G. L. under England was re-erected, and there assisted at its re-inauguration the Deputy G M. under the Grand Lodge of the Netherlands. And the Dutch Fraternity placed their Masonic Hall at the disposal of the English Brethren. For a long time it was the custom on St. John's Day for the English and Dutch Masons to assemble at different hours of the day so that the Brethren might be present at both meetings. On June 5, 1867, there was stated at a communication of the Grand Lodge of England that "recently an objection has been raised by some of the younger English Masons against the establishment of some new Lodges lately formed by the Dutch, on the ground that the Convention of 1770 prohibits their doing so, the Cape now being an English possession, and having been so since the early part of the present century. In this view, the District Grand Lodge does not seem to participate. That body is anxious that the amicable relations that have so long subsisted between the English and Dutch Masons should continue. ∴ ∴ ∴

After setting the foregoing facts before the Grand Lodge, the Grand Registrar expressed an opinion that whatever might have been the intention of the Convention of 1770, it had not been acted on in the Cape Colony, but that the G. M. of England, by appointing the Deputy G. M. of the Netherlands to be his Prov. G. M. over English Lodges, virtually recognized the Dutch Lodges. It must be taken for granted that both the contracting parties have tacitly consented that it should not apply to the Cape. He was of opinion that as both parties seem to have considered that the Cape was neutral ground, and the existence of two Grand Lodges having been allowed to continue side by side, it would be for the benefit of the Brethren in that Colony, that as they have gone on working as friends and brothers, they should continue to do so." A resolution embodying the foregoing was then put and unanimously adopted.

CHAPTER V

AUSTRALASIA

New South Wales.

THE Lodge of Social and Military Virtues—No. 227 on the roll of the Grand Lodge of Ireland—attached to the 46th Foot in 1752, after undergoing many vicissitudes, was at work in the same regiment at Sydney in 1816. This paved the way for the establishment of stationary lodges, and Irish warrants were issued to Nos. 260, Australian Social, in 1820, and 266, Leinster, in 1824. The third (strictly colonial) lodge, No. 820, Australia, was erected by the Grand Lodge of England in 1828. The last named, as well as the Irish lodges, met at Sydney, the capital. The first established in any other part of the Colony was No. 668, St. John, constituted at Paramatta in 1838, and the second, No. 697, the Lodge of Australia Felix, at Melbourne—then included in the government of New South Wales—1841. An Irish lodge—No. 275—was erected at Windsor in 1843, and in the same year, No. 408, Australasian Kilwinning, at Melbourne, received a Charter from the Grand Lodge of Scotland.

During the two decennial periods ensuing, there were issued in the Colony twenty-one English, eight Scottish, and two Irish lodges. Between 1864-85 there were added forty-seven English, forty-one Scottish, and four Irish lodges. Up to 1886 there were seventy-four English, one Irish, and fifty Scottish active lodges. In 1839 an English Provincial Grand Master was appointed, and one for the Grand Lodge of Scotland in 1855, and that of Ireland in 1858.

"While the question of separation from the Mother Grand Lodges was first formerly mooted in Victoria, still for some years, at least, there had existed in Sydney a body styling itself 'the Grand Lodge of New South Wales,' formed from the great

majority of a regular lodge—St. Andrew's. It affected to make, pass, and raise Masons, grant charters, and issue certificates.'

"On December 3d, 1877, the representatives of twelve or (at most) thirteen Scottish and Irish lodges met at Sydney, and established another Grand Lodge of New South Wales, to which, however, the pre-existing body of the same name eventually made submission, and accepted an ordinary Lodge Warrant at its hands. At this time (1877) there were eighty-six regular Lodges in the Colony; English, forty-seven; Scottish, thirty; and Irish, nine. The thirteen lodges which thus assumed to control the dissenting majority of seventy-three, sheltered themselves under a perverted principle of Masonic law—applied to a wholly illusory state of facts. This was, that any three lodges in a territory 'Masonically unoccupied'—the three jurisdictions already existing being thus coolly and quietly ignored—could form themselves into a Grand Lodge, and that when so formed, the remaining lodges—averse to the movement—were they one hundred or one thousand in number, would be irregular!"

Mr. Jas. F. Farnell, appointed Prov. G. M. under the Grand Lodge of Ireland, 1869, was a leader in this movement. The flag of independence was first raised by the Irish lodges. While there were great disadvantages in having the Australian lodges working under warrants from distant Grand Lodges, still there were reasons not entirely sentimental, which raised an opposition to separation from the earlier existing Grand Lodges. Whenever matters are in proper condition for the erection of an Independent Grand Lodge, the matter will happily culminate, and a large majority of the lodges and brethren interested will unite therewith. Should, however, the movement be premature, the outcome of the agitation will largely depend upon the character and influence of the leaders, or what is the same thing, upon the extent of the following.

Mr. Farnell for twenty years was a member of the parliament of New South Wales, and was also Prime Minister, but does not seem to have had great influence as a Mason. The Irish Province of New South Wales had its affairs in great confusion when he was elected Grand Master. And not the smallest of the motives which weighed with his supporters—Scotch as well as Irish—seems to have been the disinclination to be taxed by (or remit fees to) the mother countries.

The new organization, at the close of 1885, had been recognized as the only regular governing Masonic body in the Colony of thirty-eight Grand Lodges, chiefly, however, American. There seems, indeed, in the United States a decided inclination to regard each uprising of the lodges in a British colony as a tribute to the efficacy of a certain doctrine which has been laid down by Dr. Mackey with regard to the formation of Grand Lodges. But those American jurisdictions which have lent a willing ear to the specious representations of the Grand Lodge of New South Wales are now running the gauntlet of intelligent criticism, and the several committees by whom they have been hoodwinked or misled, may read with profit some of the reports on correspondence in the larger States, notably, Illinois, Pennsylvania, and New York, where the unaccountable delusion into which so many Grand Lodges have fallen is discussed with equal candor and ability. It is almost needless to say that a Grand Lodge thus constituted by a small minority of the lodges in New South Wales, has been refused recognition by the Grand Lodges of the British Islands.

Victoria.

The lodges of Australia Felix and of Australasia (now Nos. 474 and 530) were established at Melbourne by the Grand Lodge of England in 1841 and 1846 respectively. Scottish Masonry obtained a footing in the same city—with "Australasian Kilwinning"—in 1843; and an Irish lodge—Hiram, No. 349—was also chartered there in 1847. In the same year a third English, apparently the fifth Victorian, lodge—Unity and Prudence, No. 801—was constituted at Geelong. After this the Craft advanced in prosperity by leaps and bounds. Thirty-six English lodges were added to the list between 1847 and the close of 1862; twenty-eight during the ensuing thirteen years, and twenty within the decennial period commencing January 1, 1876. During corresponding intervals of time, the Irish warrants granted in the colony were respectively twelve, seven, and three; and the Scottish, three each in the first two periods, and two in the last.

The first Provincial G. M. of Victoria (or Australia Felix) was the Hon. J. E. Murray. The date of his appointment by the Grand Lodge of Scotland has not been recorded, but he was succeeded by

Mr. J. H. Ross, August 3, 1846. The present District G. M. is Sir W. J. Clarke, who received his Scottish patent in 1883. English and Irish Provinces were established in 1855 and 1856 respectively, and the following has been the succession of English Provincial (now District) Grand Masters: Captain (now Major-General Sir Andrew) Clarke, 1855; Captain F. C. Standish, 1861; and Sir W. J. Clarke, 1883. The rulers of the Irish Province have been Mr. J. T. Smith, 1856-79; and from 1880, Sir W. J. Clarke.

The lodges now at work under the three jurisdictions, all of which, however, are in a manner united under a single Provincial G. M., are: English, ninety-one; Irish, seventeen; and Scottish, twelve (including one in Levuka, Fiji).

The idea of forming an independent Grand Lodge of Victoria seems to have been first launched in 1863, and after encountering the opposition of the Earl of Zetland, was debated—March 2, 1864—in the Grand Lodge of England, by which body a resolution was passed declaring its "strong disapprobation" of the contemplated secession. It was observed in *precient* terms by the late John Havers, that "every new Grand Lodge was the forerunner of new and conflicting degrees. It was a stone pulled away from the foundations of Masonry, and opened another door for inroads and innovations;" and he exhorted the Brethren in Victoria to "remember that union was strength, and universality one of the watchwords of Masonry."

In 1876 the agitation for a local Grand Lodge was renewed, but again slumbered until 1883, when the scheme was fairly carried into effect by an insignificant minority of the lodges.

In the latter year a meeting was held, and a Masonic Union of Victoria formed, April 27. At this time there were seventy English, fifteen Irish, and ten Scottish lodges in the colony—total, ninety-five. On June 19th certain delegates met, and the adhesion of eighteen lodges—twelve Irish, five Scottish, and one English, to the cause was announced. But the number has since been reduced by the subtraction of the English lodge and one other, which were erroneously named in the proceedings. By this invention it was resolved "that the date of founding the Grand Lodge of Victoria should be July 2, 1883." Thus we find sixteen lodges, with an estimated membership of about eight hundred and forty, calmly trans-

forming themselves into the governing body of a territory containing ninety-five lodges, and a membership of five thousand!

This organization has a following of about twenty subordinate lodges; and as the proceedings of some Grand Lodges baffle all reasonable conjecture, it will occasion no surprise to learn that by seventeen of these bodies the titular "Grand Lodge of Victoria" had been duly recognized at the close of 1885, as the supreme Masonic authority in this Australian colony. At the same date Mr. Coppin entered upon the second year of his Grand Mastership, having been installed—November 4th—in the presence of the Grand Masters of New South Wales and South Australia.

Meanwhile, however, the English, Irish, and Scottish lodges, which have remained true to their former allegiance, are united in a solid phalanx under a single Provincial (or District) G. M.—Sir W. J. Clarke; and should the day arrive when independence is constitutionally asserted by the century and more of lodges which obey this common chief, those bodies by whom the *soi-disant* Grand Lodge has been accorded recognition, will find themselves confronted by an interesting problem, not unlike that propounded with so much dramatic effect by the late Mr. Sothorn in the rôle of Lord Dundreary, *viz.*, "Whether it is the dog that wags its tail, or the tail that wags the dog?"

South Australia.

The South Australian Lodge of Friendship, Adelaide, No. 613 (and later, No. 423), on the roll of the Grand Lodge of England, was constituted at the British metropolis in 1834. The founders were all in London at the time, and two persons—afterward Sir John Morphett, President of the Legislative Council, and Sir D. R. Hansen, Chief Justice of the colony, were initiated. A second English lodge was established at Adelaide in 1844, and in the same year, also at the capital, a Scottish one.

In 1855 the first Irish Charter was received in the colony, and in 1883 the total number of lodges formed in South Australia was as follows: English, twenty active, one extinct; Irish, seven active, three extinct; and Scottish, six, all active.

The initiative in forming a Province was taken by Scotland in 1846, a step followed by England in 1848, and Ireland in 1860.

In 1883 there were premonitory symptoms that the lamentable

examples set by a minority of the lodges in the adjacent colonies of New South Wales and Victoria, in usurping the authority and honor which should belong to the majority, would be followed in South Australia. The imminence of this danger induced Mr. H. M. Addison to form a Masonic Union, whose labors resulted—April 16, 1884—in a convention of eighty-five delegates, representing twenty-eight lodges, by whom the Grand Lodge of South Australia was established. The proceedings of the executive committee of the Masonic Union, which were characterized throughout by the most scrupulous regularity, were crowned by an unprecedented unanimity of feeling on the part of the lodges. A resolution in favor of independence was carried *nem. con.* in eighteen English, four Irish, and six Scottish lodges, and with a single dissident in one English, and with two dissentients in one Irish, lodge; while in the sole remaining lodge under England, and in the "Mostyn" under Ireland, a majority of the members joined the Union. Thus, in effect, out of a grand total of thirty-three lodges under the three British jurisdictions, only a single lodge—No. 363—Duke of Leinster (1.), has adhered to its former allegiance. The new Grand Lodge (besides the usual indiscriminate recognition of American Grand Bodies) has been admitted to fraternal relations with the Grand Lodges of England, Ireland, and Scotland. The privilege, however, accorded by the last named in August, 1885, was cancelled in the November following; a proceeding, there is every reason to believe, arising out of the inconsistent action of the colonial Grand Lodge in recognizing the authority of the Grand Lodge of New South Wales—the irregular establishment of which, it was declared by Mr. Addison, at the formation of the Masonic Union in Adelaide, July 30, 1883, would, if initiated, "bring Masonry in South Australia into disrepute throughout the world."

The Hon. S. J. Way, Chief Justice of the Colony, and Mr. J. H. Cunningham, formerly District Grand Secretary (E.), have been Grand Master and Grand Secretary respectively, since the foundation of the Grand Lodge. The subordinate lodges are thirty-six in number, with a total membership of two thousand two hundred and seventy-seven.

Queensland.

The North Australian Lodge was established at Brisbane by the Grand Lodge of England in 1859, and two others under Irish and Scottish warrants respectively, were constituted at the same town in 1864.

Each jurisdiction is represented by a Provincial (or District) G. M., and the number of lodges is as follows: English, twenty-six active, two extinct; Irish, eleven active, three extinct; and Scottish, twelve, all active.

West Australia.

Eight lodges in all have been formed in this colony, the first of which—St. John, No. 712—was erected at Perth in 1842. Seven of these survive, and being included in no Province, report direct to the Grand Lodge of England, which in this solitary instance has not suffered from the exercise of concurrent jurisdiction by other Grand Bodies.

Tasmania.

Lodges under the Grand Lodge of Ireland were established at Hobart Town in 1823, 1829, 1833, and 1834, but the three earliest of the series are now extinct. A fourth lodge under the same sanction was constituted at Launceston in 1843, and it was not until 1846 that English Masonry obtained a footing on the island. In that year Tasmanian Union, No. 781, was formed at Hobart Town, and a second English lodge—Hope—sprang up (in the first instance under a dispensation from Sydney) in 1852. In the following year the Rev. R. K. Ewing became the Master of the latter, and in 1856 the lodges of Faith and Charity were carved out of it—Mr. Ewing then becoming, on their joint petition, Prov. G. M. The other English lodge—Tasmanian Union—objecting to these proceedings, as having been carried on clandestinely, was suspended by the Prov. G. M., and remained closed for nine months. The strife thus engendered nearly put an end to English Masonry in Launceston. Lodge Faith became dormant, Charity was voluntarily wound up, and even in Hope the light almost went out. Soon, however, there was a revival, and in 1876 the Grand Lodge of Scotland also began to charter lodges on the island, where there are

now four in existence under its jurisdiction. These are included in the Province of New South Wales. The Grand Lodges of England and Ireland have each a roll of seven lodges on the island, one under the former body, and four under the latter, having surrendered their charters. The English Prov. Grand Lodge died a natural death on the removal of Mr. Ewing to Victoria, but a new one was established under Mr. W. S. Hammond in 1875. The Irish lodges were constituted into a Province in 1884.

New Zealand.

The first lodge in the Colony—*Française Primitive Antipodienne*—was founded at Akaroa by the Supreme Council of France, August 29, 1843; the second—*Ara*—at Auckland, by the Grand Lodge of Ireland in 1844; and the third—*New Zealand Pacific*—by the Grand Lodge of England in 1845. No further charters were issued until 1852, when English lodges were established in Lyttelton, and Christchurch, whilst others sprang up at New Plymouth and Auckland in 1856, at Wanganui in 1857, and at Nelson and Kaiapoi in 1858. In the latter year an Irish lodge (the second in the Colony) was formed at Napier, and in 1860 an English one at Dunedin—where also the first Scottish lodge was erected in 1861. After this the diffusion of Masonry throughout New Zealand became so general, that I must content myself with giving the barest statistics, which, for convenience sake, will be classified so as to harmonize as far as possible with the Provincial systems of the three competing jurisdictions. Between 1860 and 1875 there were warranted in the Colony twenty-five English, eight Irish, and twenty-one Scottish lodges; while in the ten years ending January 1, 1886, the numbers were respectively forty-seven, seven, and thirty-two.

The lodges in New Zealand are usually classified according to the Masonic Provinces of which they form a part. Of the latter there are five English and three Scottish, of late years dominated Districts, in order to distinguish them from bodies of a like character in Great Britain; and one Irish, to which the more familiar title of Provincial Grand Lodge is still applied. These preliminaries it will be necessary to bear in mind, because the arrangement which seems to me the simplest and best, is to group the lodges according to their positions on the map, which in the present case will correspond very

closely with the territorial classification, or division into Districts, by the Grand Lodge of England.

North Island.

Auckland District.—The District (or Provincial) Grand Masters are Mr. G. S. Graham (E.), Sir F. Whitaker (S.), and Mr. G. P. Pierce (I.); whilst the number of lodges under the several jurisdictions is eighteen under the G. L. of England, and six each under those of Scotland and Ireland, that is, if taken according to locality, for all the Scottish lodges on the North Island are comprised within the Auckland District, and the whole of the Irish lodges in both islands within the Auckland Province.

Wellington District.—The only D. G. M. is Mr. C. J. Toxward (E.); and the number of lodges is respectively eighteen (E.), eight (S.), and four (I).

Middle, or South, Island.

Canterbury District.—The D. G. M.'s are Mr. Henry Thomson (E.) and the Rev. James Hill (S.), who rule over nineteen and nine lodges respectively. The seat of government is at Christchurch, where there is also an Irish lodge, the only one in the District.

Otago and Southland District.—Mr. T. S. Graham presides over one D. G. L. (E), and Mr. G. W. Harvey over the other (S.). There are fourteen lodges in each District, *i.e.*, according to the local arrangement, for the Scottish D. G. L. (of which there are only two in the South Island) exercises authority beyond the territorial limits of Otago and Southland. The total number of lodges on its roll is twenty-one, and doubtless Otago has derived much of its importance as a Scottish Masonic center, from the fact of having been originally founded by an association connected with the Free Church of Scotland. At Dunedin and Invercargill there is in each case an Irish lodge.

Westland District.—The only D. G. M. is Mr. John Bevan (E.), who rules over six lodges; and there are three others (S.) which are comprised within the D. G. L. of Otago and Southland at Dunedin.

Marlborough and Nelson District.—These provinces of the Colony are exempt from any local Masonic jurisdiction, under the Grand Lodge of England, which is represented by five lodges. There is also a Scottish lodge (at Blenheim), which is subject to the D. G. L. of Otago and Southland.

Oceania.

Although the various islands and archipelagoes have been treated as far as possible in connection with the continents with which they are ordinarily associated, there are some few of these, lying as it were in mid-ocean, that must be separately dealt with, and their consideration will bring this chapter to a close.

New Caledonia.—This island was taken possession of by France in 1854, and has been used for some years as a penal settlement. At Noumea, the chief town and the seat of government, there are two lodges, L'Union Caledonienne, and No. 1864, Western Polynesia. The former was established by the Grand Orient of France in 1868, and the latter (which is included in the Masonic Province of New South Wales) by the Grand Lodge of England in 1880.

Fiji Islands.—The formation of a lodge—Polynesia—at Levuka, with the assent of the native king, was announced to the Masonic world in a circular dated March 12, 1872. The Islands were annexed to Britain in 1874, and on February 1, 1875, a Scottish Charter—No. 562—was granted to a lodge bearing the same name and meeting at the same place as the self-constituted body of 1872. This is comprised in the Masonic Province of Victoria. A second British lodge—No. 1931, Suva na Viti Levu—was established in the archipelago by the Grand Lodge of England in 1881.

Society Islands.—Masonry was introduced into Papeete, the chief town of Tahiti (or Otaheiti), the largest of the Society group, by the Grand Orient of France in 1834. A Chapter—L'Océanie Française—was established in that year, and a lodge of the same name in 1842.

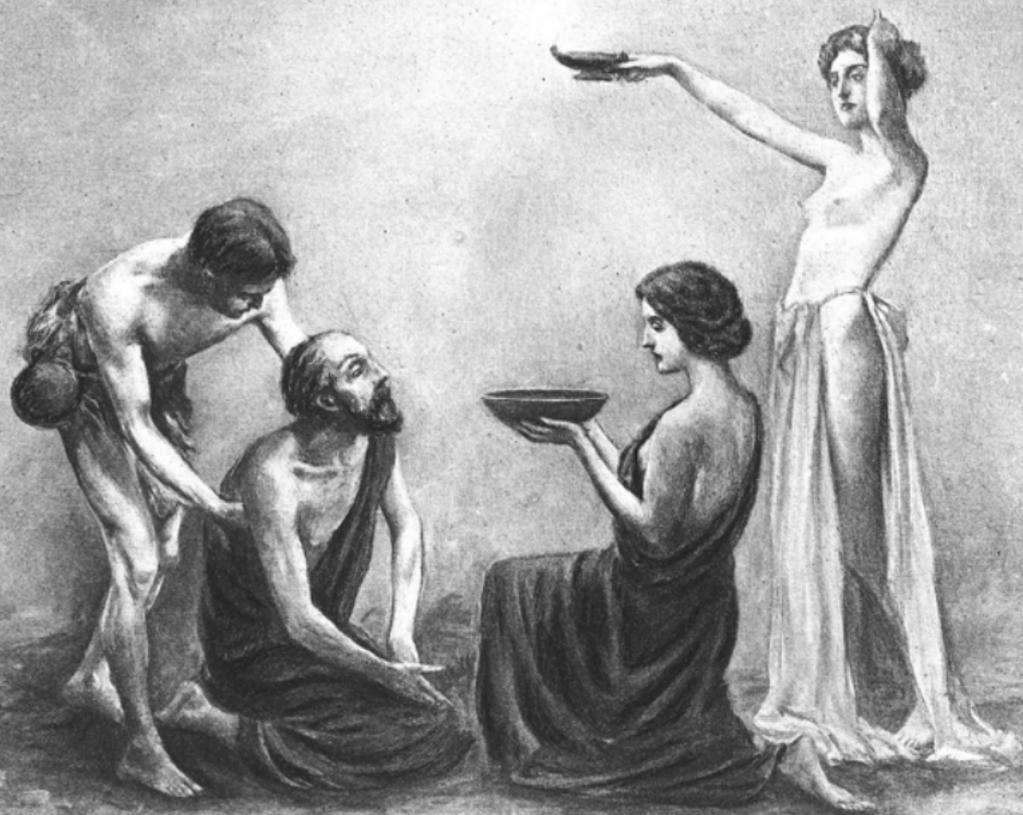

The labors of these bodies were intermittent, the latter having been galvanized into fresh life in 1850, and the former in 1857. Both lodge and chapter are now extinct.

Marquesas Islands.—A lodge, which has long since ceased to

exist—L' Amitié—was established at Nukahiva by the Grand Orient of France in 1850.

Sandwich or Hawaiian Islands.—In 1875 there were three lodges in this group, and more recent statistics show no increase in the number: Le Progrès de l'Océanie, erected by Warrant of the Supreme Council of France in 1850; and the Hawaiian and Wailukee lodges, under the jurisdiction of the Grand Lodge of California. The last named is Maui; the others meet at Honolulu, the capital, where they occupy a hall in common. The earliest of the two American lodges (Hawaiian) was formed in 1852. These three lodges are composed of natives, Americans, Englishmen, and Germans, between whom the most friendly relations subsist. King Kalakaua was an active member of Le Progres de l'Océanie, and also his brother, William Pitt Leleihoku, of the Hawaiian Lodge. The former, who has visited many foreign countries, also evinced the same interest in Masonry while on his travels. On January 7, 1874, he was entertained by lodge Columbian of Boston (U. S. A), and on May 22, 1881, by the National Grand Lodge of Egypt. By the latter body the king was elected an Honorary Grand Master, and afterward delivered a lengthy oration, in which he expressed his belief in Egypt being the cradle both of Operative and Speculative masonry, and thus may be said to have fully reciprocated the compliment which had been paid him by the meeting.

BROTHERLY LOVE, RELIEF AND TRUTH

SEE WOODWARD ZEGLER

SUPPLEMENT TO DR. MACKEY'S TEXT

BY W. BRO. WILLIAM JAMES HUGHAN

P.S.G.D. of England; P.S.G.W. of Egypt, Iowa, etc.

DR. MACKEY and I had long been regular correspondents and fellow Masonic students, when his lamented decease ended our happy collaboration, which had been mutually helpful and stimulating.

My residence in England obtained for me numerous facilities for the examination of old and original MSS. concerning the Craft. Hence my esteemed friend was often glad to avail himself of my services accordingly, which he always warmly appreciated.

Since Dr. Mackey's regretted death in 1881, several important works have been published and valuable discoveries have been made of ancient records, which, as they concern and in part affect the preceding pages, require to be carefully considered and duly explained. Of these, mention may be made of Bro. R. F. Gould's *History of Freemasonry*; the Transactions and Reprints of the Quatuor Coronati Lodge (London); Bro. E. Conder's *History of the Masons' Company* (London); my *Old Charges of the British Freemasons*, 2d Series, and others.

In loving memory of my dear friend, and in fulfilment of an offer of literary aid made some time ago, I have gone through his comprehensive history, and noted the corrections and additions needful to make it as complete and accurate to date as he would have liked it to be.

His support of what he terms the "Iconoclastic School" can not fail to help us throughout the United States; as we seek to be as constructive as possible, our own desire is that the legends should be kept distinct from authenticated facts, so that the Fraternity may possess a complete history, perfect in all its parts and worthy of

the Free and Accepted Masons throughout the world. His words on the subject at p. 8 are worth reproduction:

"To this school I have for years been strongly attached, and in the composition of this work I shall adopt its principles. I do not fear that the claims of Freemasonry to a time-honoured existence will be injured by any historical criticism, although the era in which it had its birth may not be admitted to be as remote as that assigned to it by Anderson or Oliver."

Book I.—The Old MSS., Etc.

Since the publication of my *Old Charges of British Freemasons*, in 1872, many copies of these manuscript constitutions have been traced, some of considerable value having been discovered during the last decade. There are now some threescore and ten rolls or books of these "Charges" in existence, the text of certain scrolls being of great importance. The dates of some of the older MSS. have also had to be revised, such as a few noted at p. 15. The date of the "Halliwell" or "Regius MS." has been placed a little later, by a few critics, and that of the "Cooke MS." has been put back to 1450 or earlier.

An unfortunate error was made by the Editor of the "Cooke MS." by reading the final word in the line "And in policronico a cronycle p'uyd," as printed, instead of preuyd or proved, as pointed out by Bro. G. W. Speth in his commentary on that noted little gem of a Book.

The "Harleian No. 2054" (British Museum) is not likely to have been written before 1660 (not 1625, p. 15), and a still older copy of its text was found in 1899, *viz.*, the "John T. Thorp MS." of A.D. 1629, which is probably the original of both it and the "Sloane" of 1646.

The "Grand Lodge MS. No. 1," erroneously placed by me at 1632 (pp. 15, 69, etc.), is really of 1583, and the numbers of the two York MSS. 2 and 4 should be reversed, the first mentioned being the junior. These points are all detailed in my second volume on the "Old Charges" (of 1895), and in subsequent additions to 1899.

Since Dr. Mackey wrote his history, additional information has been obtained relative to the "Four Crowned Martyrs" referred to in the "Halliwell MS." and elsewhere, which has considerably

modified the statements thereon at pp. 16, 27, 34, etc. The legend, so far from being of German origin, is mentioned in England many centuries before there is historic proof of its having acquired currency in Germany. On this subject Bro. Gould's history should be consulted, both in relation to the Steinmetzen and the Masonic MSS. of Great Britain. The fact of the legend having been known in England for so many centuries led the late Bro. the Rev. A. F. A. Woodford to suggest that our Students' Lodge No. 2076, London, should be called the "Quatuor Coronati," and, though rather a singular title for such an organization, we agreed thereto.

The curious name of "Noæchidæ" for Masons, referred to at p. 60, may be traced back to Dr. Anderson's *Book of Constitutions*, 1738. It was, however, dropped in later editions, but continued by Laurence Dermott in his *Ahiman Rezon*, which was a pity, the term being so absurd.

The St. Amphibalus legend is not peculiar to the "Cooke" text as the "William Watson" Roll of 1687, first noted in 1890, contains a reference to that ancient celebrity, and I believe that the "Henary Heade" MS. of 1675, in the Library of the Temple, London, also does; but its recent discovery has not allowed time enough for its complete transcription.

There are several MSS. that call Edwin the King's brother, instead of son, as in most MSS. (p. 103), but they are not of much value or antiquity, and belong to the "Spencer" family as respects the text. Dr. Anderson probably had a copy of the "Spencer" or "Cole MS." before him in 1738, as it was printed in 1729.

As to Prince Edwin having been made a Mason at Windsor (p. 98), one or two lately discovered Scrolls contain the same statement as the "Lansdowne" and "Antiquity MSS.," but evidently it was but a local tradition.

Dr. Mackey observes (p. 163) that the reason "why the Temple of Solomon was exclusively selected by the Modern Masons as the incunabulum of their Order can be only conjecturally accounted for." That is so, but on the other hand the extraordinary popularity of works on the Temple of Solomon, and the numerous models made and exhibited, in the latter part of the 17th century, and early in the 18th century, may have led to its incorporation in the Masonic Ritual during the Revival period, 1717-23. It cannot be said that the "Old Charges" make a prominent feature of that great

historic building, and neither are the Biblical worthies familiar to the modern Freemasons conspicuous figures in the ancient MSS. of the Fraternity. The Transactions of the "Quatuor Coronati" Lodge for 1899 are worth a careful study on this point.

Early Records.

Of the most valuable entries concerning Freemasonry in the 17th century may be mentioned those by Elias Ashmole in his famous diary. It is to be regretted, however, that the two editions of the typographical reproduction of that MS. book (1717 and 1774) contain serious errors in the portion relating to his admission into the Craft, and his visitation of a lodge, in 1646 and 1682 respectively. Unfortunately, Dr. Mackey had not facsimiles of these entries, and hence his adoption of the faulty transcripts (pp. 322, 620-21, etc.).

The following may be relied on as being an exact copy of the two entries of A.D. 1682.

"March 1682.

10: About 5. p.m. I recd a sumons to appr. at a Lodge to be held the next day, at Masons Hall London.

11. Accordingly I went, & about noone were admitted into the Fellowship of Free Masons,

Sr. William Wilson Knight, Capt. Rich: Boothwick, Mr. Will: Woodman, Mr. Wm. Grey, Mr. Samuell Taylour & Mr. William Wise.

I was the Senior Fellow among them (it being 35 yeares since I was admitted) There were presnt beside myselfe the Fellowes after named.

Mr. Tho: Wise Mr. of the Masons Company this presnt yeare. Mr. Thomas Shorthose, Mr. Thomas Shadbolt, . . . Wainsford Esqr. Mr. Rich: Young Mr. John Shorthose, Mr. William Hamon, Mr. John Thompson, & Mr. Will: Stanton.

Wee all dyned at the halfe Moone Taverne in Cheapeside, at a Noble Dinner prepared at the charge of the New-accepted Masons."

On comparing the foregoing excerpt with the one printed at pp. 621-22 of the history, it will at once be seen that Ashmole was not reinitiated, or readmitted into the fellowship, A.D. 1682, by Sir William Wilson and others; but that Wilson and the others named were themselves "accepted," and subsequently paid for the dinner, which was served at the Half Moon Tavern, in Cheapside, according to custom.

That being so, the elaborate and most ingenious arguments in

explanation of the interpolated word "by" are wholly unnecessary, because due to a very faulty transcript. Neither can it be said that the lodge in which Ashmole was initiated in 1646 was of an operative character, because Bro. W. H. Rylands has demonstrated most fully that it was a speculative assembly. See his *Freemasonry in the 17th Century* ("Mas. Mag.," London, Dec, 1881). So far from the celebrated antiquary having been made an "Honorary Member," it is quite clear that he was admitted to the full privileges enjoyed by the Brethren who elected him.

A very valuable work which was originally published in 1730 (but no copy has been preserved), and a 2d edition was printed as an appendix to the *Book of Constitutions*, 1738, was not by James Anderson (p. 364) (as generally accepted until recent years), but by Bro. Martin Clare, F.R.S., who became D. G. M. in 1741. It was entitled *A Defence of Masonry, published A.D. 1730, Occasioned by a Pamphlet call'd Masonry Dissected*. In a paper on "The Old Lodge at Lincoln," by Bro. Wm. Dixon (Quatuor Coronatorum, 1891), information is afforded as to this Brother, and copies of minutes given in relation to his authorship of the *Defence*. So also in another paper of the same year read to the members of the "Quatuor C. Lodge," London, by Bro. R. F. Gould, the Masonic historian, on "Martin Clare, A.M. & F.R.S.," with facsimiles. One minute reads thus: Oct. 2, 1733. "When Brother Clare's Discourse concerning Pritchard, as also some of our Regulations and By Laws were read."

Book II—Masonic History.

It was impossible, as Dr. Mackey states at p. 598, "to obtain any continuous narrative of the transactions of the Masons' Company," but happily that condition is now altered by the publication of the *Records of the Hole Crafted and Fellowship of Masons, with a Chronicle of the History of the Worshipful Company of Masons in the City of London*, by Bro. Edward Conder, Jr., Master of the Company, 1894.

In this important volume the records of the Company are interestingly described, and many are of a very remarkable character. It appears that there were two separate Masonic organizations meeting in the Masons' Hall. The one known as the Masons' Company

proper, and the other a Lodge, termed the "Acception." In the first named, the members were "admitted," but in the latter they were "accepted." The Company of Free Masons was so termed, about the middle of the 16th century, the fellowship before being of the Masons only. The prefix was dropped officially after 1653.

There were thus the Free Masons of the Company, and the Accepted Masons of the Lodge, until the former ceased to use the term "Free." Eventually the two prefixes were united as "Free and Accepted Masons," but precisely when we can not say; probably toward the end of the 17th century.

The speculative Lodge of the Acception is noted in the records of the company from about the year 1620, and it was this body that was visited by Elias Ashmole in 1682. The grant of arms was made to the Company of Masons in 1472, and is now preserved in the British Museum, but the copy of the "Old Charges," so often noted in the inventories, has been missing for fifty or more years. This is a great pity, as we are unable to decide for certain what the text was, or how near it agreed with those still preserved.

The "Phillipp's MSS." Nos. 1 and 2 may be copies of the missing Masons' Company MS., of 1650 circa, and so may the "G. W. Bain MS." of the same period, but beyond indicating the probability of such relationship, nothing can be said.

Of the "Harleian No. 1942" text (p. 616, etc.) we have now several copies, so it no longer enjoys the solitary position it once had. Though it and the other similar documents seem to have been written for and used by a company, neither of them can be the missing "Masons' Company MS.," nor can they be copies if the MSS. previously mentioned represent the original Scroll or book which belonged in the Accepted Masons' Hall. They are, however, suggestive of the use of the term accepted, and are thus especially valuable in illustration of the minutes of the "Acception."

I do not consider that the "Sloane MS. No. 3329," British Museum, dates from "between 1640 and 1700," now that the matter has been thoroughly sifted; but more likely to have been written soon after the "Revival of 1717." There is no evidence that it was ever known to Dr. Plot (not "Plott"), the historian of Staffordshire, 1686, and I agree that it is unlikely that separate ceremonies or degrees were worked prior to the 18th century, as Dr. Mackey emphatically states.

My friend declares that the word Free Mason is not to be found in the "Masonic Constitutions," *i.e.*, the "Old Charges," of the operative body, but this is not correct. It does not appear in the very early copies, but the term is met with in several of the rolls of the 17th century.

The mark degree is modern, comparatively speaking, but the selection of marks by the operative and speculative Masons is a very old custom. Even apprentices chose their marks, as evidenced in the "Mark Book" of the Lodge of Aberdeen, of A.D. 1670 onward. As a degree, I had traced it back to 1778 in Dr. Mackey's time, but later on it has been found noted in Lodge Minutes of 1777, London;¹ 1773, Durham; and 1769, Portsmouth. The last mentioned is in cypher, and has only recently been read. The first entry is as follows:

"At a Royal Arch Chapter held at the George Tavern in Portsmouth on First Sepr., Seventeen hundred and sixty nine, Present:

"Thomas Dunckerley, Esq., William Cook Z, Samuel Palmer H, Thomas Scanville J., Henry Dean, Philip Joyes, and Thomas Webb.

"Pro. G. M. Thomas Dunckerley bro't the Warrant of the Chapter, and having lately rec'd the mark he made the bre'n Mark Masons and Mark Masters, and each chuse their mark, *viz.*, W. Cook Z, S. Palmer H, T. Scanville J., Philip Joyes, T. Webb. He also told us of this mann'r of working which is to be used in the degree w'ch we may give to others so they be F. C. for Mark Masons and Master M. for Mark Masters."

Full particulars of this chapter are given in the history of the Phœnix Lodge, No. 257, Portsmouth, by Bro. Alexander Howell, 1894. The Royal Arch was started in that town under the regular or "Modern Masons" in 1769.

Bro. Dunckerley received the Royal Arch Degree in Portsmouth in 1754, but at that time, though worked by the "Moderns," there was no governing body. The ceremony was known in England, Ireland, and Scotland in the 5th decade of the 17th century, and was thus patronized before the advent of the "Ancients" or "Atholl Masons" in 1751. It is well to remember this fact, as Bro. L. Dermott has erroneously been credited, or his Grand Lodge, with having arranged and started the degree. Royal Arch Masonry is referred to in print (A.D. 1743-44) two years before Dermott obtained

¹The degree is noted in the records of St. Thomas's Lodge, London (not "Lancashire," *vide* p. 822), and is duly referred to on p. 821.

the degree (1746), and undoubtedly the ceremony was worked in America as soon as it was worked by the "Ancients" in England. Bro. Dermott was initiated in Ireland, 1740-41, and in 1752 was a member of Nos. 9 and 10, London (England), when he was elected Grand Secretary. At that time No. 1 was kept vacant.

It was the usage, certainly, for lodges generally to be known by the taverns or hotels in which they assembled, until it happily became the custom to have halls built for Masonic meetings. Lodges, however, had special names long before the year 1767, as recorded at p. 885. In *Masonic Records, 1717-1894*, by my lamented friend and Bro. John Lane, will be found several instances of lodges having adopted distinctive titles, the first to do so according to this excellent authority being the "University Lodge," No. 74, in A.D. 1730, and there was a "French Lodge," also held in London, and so named in 1737, or earlier. It is not a matter of much importance, but it is as well to remember that lodge nomenclature began some one hundred and seventy years ago as respects England, and probably much earlier in Scotland. Neither is it sure that there were only four operative lodges in the city of London in 1716 (p. 879). The immortal quartette of 1717 may have been mainly operative, but even that is not certain, as we are not informed as to their members until the next decade, when assuredly they were severally of a speculative character. We are wholly in ignorance when Dr. Desaguliers and Dr. Anderson were initiated, or in what lodges, all particulars as to such being mere guesswork.

Concerning warrants (p. 924), it should be stated that these charters, so well known to the Fraternity since 1750 in England (but much earlier in Ireland), were not issued originally by the premier Grand Lodge of England, but Brethren who wished to be constituted into a lodge petitioned the Grand Master, and on his approval of their prayer a day would be fixed for its constitution, and certified accordingly. In the provinces, a Brother would be deputed to constitute such a lodge by a document signed by the requisite authority; which was a kind of Warrant, but did not nominate the W. M. and Wardens, as since the period mentioned. The fact of constitution made the lodge regular, but there were numerous lodges who did not avail themselves of that favor, and so were irregular, from the Grand Lodge point of view, though as much entitled then to continue their meetings as they were be-

fore the Grand Lodge was formed. It is impossible now to decide what lodges joined the new organization between 1717 and 1721; hence my remark, which is referred to in the note at p. 924.

A mass of information had been obtained in 1894 and printed in the volume by Bro. John Lane aforesaid, respecting the old lodges noted by Dr. Mackey at pp. 886-88. The "Lodge of Antiquity" assembled in other places besides those stated, and so as to several of the other lodges; but they need not be recapitulated now. The original No. 2 was erased in 1736. Dr. Mackey (p. 888) assumes that the original No. 3 continued to work from 1723, but as a matter of fact the members gave up their distinctive position, and were constituted into a new lodge, February 27, 1723, taking the No. 11 in 1729. From successive changes it is now 12, and from 1768 was named the "Fortitude," and from 1818 "The Lodge of Fortitude and Old Cumberland." Dr. Anderson puts the matter quite clearly in his *Book of Constitutions*, 1738, p. 185, when it was No. 10 on the list of London lodges only.

"This was one of the four Lodges mentioned, Page 109, viz., the Apple-Tree Tavern in Charles Street. Covent Garden, whose Constitution is immemorial: But after they removed to the Queen's Head upon some Difference, the members that met there came under a new Constitution, tho' they wanted it not, and it is therefore placed at this number." It is, however, of Time Immemorial continuity.

As to the age of the Master Masons' Degree, no later discovery, subsequent to Dr. Mackey's period, at all serves to make the matter any clearer, save to indicate that the ceremony was not generally worked until fairly on in the 18th century. I published a long account of the minutes of a London lodge from 1725, which mentions the Third Degree in 1727. This is the oldest of the kind known, appertaining to a regular lodge in London, and is of great value. The musical and architectural lodge, quoted pp. 1000-1001, was never on the register of the Grand Lodge of England, but its records afford evidence of the ceremony being worked as early as 1725. Minutes published in facsimile by the Q. C. Lo. in 1900.

The lodge opened in Paris as No. 90 (p. 1029) was not constituted until April 3, 1732. The list Dr. Mackey quotes from, though begun in 1730, was continued for two years later. There is no engraved list preserved of 1733; and there was no regular lodge in France until the year I name, *i.e.*, 1732.

The rival Grand Lodge of the "Ancients" was inaugurated in 1751 (not 1753), but Laurence Dermott was not a founder (p. 1105), he having joined in the year 1752, when he became Grand Secretary. Bro. Henry Sadler, in his *Masonic Facts and Fictions* (1887), objects to these "Ancients" being termed Schismatics, and ably defends them in that well-known work. He considers they were mostly Irish Masons, from whom Grand Secretary Dermott also came, and certainly many of the facts he presents indicate their fondness for that organization. There is no doubt that the date given at p. 1109, viz., July 17, 1751, was the day on which this body was established, but no Grand Master was elected until 1753.

The Royal Arch Degree was not started by these "Ancients" (p. 1108), but only adopted by them as an authorized ceremony. In self-defence the "Moderns," who had worked it before the origin of the "Atholl Masons," but not officially, gradually gave it more prominence. In 1767 they formed a Grand Chapter of Royal Arch Masons and issued warrants for chapters, pushing the degree more even than the "Ancients," though not recognized by their Grand Lodge; so at the union of the two Grand Lodges in December, 1813, the way was prepared for the inauguration of the "United Grand Chapter" in 1817, the ceremony being adopted as the completion of the Master Mason's ceremony, not as a separate and independent degree.

The York Masons who revived their Grand Lodge in 1761 had never any dealings with the "Ancients," and consequently the latter had no right to style themselves "Ancient York Masons." The York Grand Lodge never warranted any lodges out of England, and so the lodges chartered in the United States by the "Atholl Masons" were not "A. Y. M." (Ancient York Masons), but "Ancient" or "Atholl Masons."

I should find it simply impossible to treat of the *Introduction of Freemasonry into the North American Colonies* in brief, and so shall not attempt it, and must leave Dr. Mackey's interesting Chapter XLVI. untouched. I may, however, just state that, bearing in mind the distinction already noted between regular and irregular lodges; the one duly constituted by authority of a Grand Lodge, and the other not constituted. Let me say that the "St. John's," Boston, A.D. 1733, was the first regular Masonic lodge in North America. There were before then several lodges assembling in

Philadelphia, and evidently elsewhere by "time immemorial" usage, and these had as good a right to meet Masonically as any other organization. Everywhere, however, outside the pale of regular Grand Lodge Masonry, and unless such Brethren joined under the new *régime*, they were accounted irregular. Strange to say, the "Modern" Grand Lodge of England—the premier of the world—never had a Pennsylvania lodge on its register. I once thought that a lodge assembling in Philadelphia, Penn. (1730, etc.), had been granted by its constitutional authority, but there is not sufficient evidence to warrant the conclusion. There were regular "Ancient" warrants issued for Philadelphia during the 6th decade of the 18th century and a Provincial Grand Lodge formed. As a matter of fact, singular as it reads, the lodge of 1730, and subsequent lodges of the kind, were never recognized as of English origin, though a Provincial Grand Master was appointed by the "Moderns" for the "Keystone State" in 1730, etc. This was done, though there was not a lodge on its English register from Pennsylvania. An unusual experience assuredly, but not unique as respects some Provincial Grand Masters appointed in England.

I am not aware of any authority for the statement at p. 1252, that the esteemed Bro. E. T. Carson (deceased) had a copy of Dr. Dassigny's celebrated *Enquiry* of 1744 in his collection, which has lately been acquired by General S. C. Lawrence (P. G. M., Mass.), who is believed to have the largest Masonic library in America, if not in the world. The only copy in the United States is the one I let Bro. R. F. Bower have, who was a distinguished collector and ardent Masonic student. On his regretted decease, his library was purchased by the Grand Lodge of Iowa, which has a great collection of Masonic books, MSS., and curios of immense value. Since my discovery of that volume of 1744, another, and almost perfect, copy has been traced and is now in the important Masonic library of the province of West Yorkshire; and a third has been recognized in the collection of Masonic works in Newcastle on Tyne; so that at the present time, three copies are known, all, however, lacking the frontispiece, and only one of the trio is complete else.

The references in the history of Freemasonry at York, and especially in relation to the additional degrees, *i.e.*, those after the Third, require, occasionally, qualification, in the light of discoveries of late years. It is necessary also to carefully study both portions

of my *Masonic Sketches and Reprints*, as the second part was written after the first was printed, and contains particulars of MS. books discovered whilst the work was in the press. There is an excellent American edition to be had of the same year as the original issue in England.

Chapter XLVIII. is an important one, and deserves particular consideration, for many of the statements are of a very suggestive, not to say startling, character, and advanced by a Brother of great eminence and research. I am not aware of the existence of any evidence in favor of the assertion that Ramsay (not Ramsey) ever sought to introduce any of the additional degrees to the Grand Lodge of England early last century. For that matter, beyond statements of fanciful historians, it has not been proved that he arranged the ceremonies so long connected with his name; and all the declarations concerning the Stuarts and the Craft must be received with caution. Beyond reiterated assertions, the initiation of any of the unfortunate royal family has not at all been clearly established.

Chapter XXX. is of very great interest, but how far it is supported by cold and hard facts it is not for me to say, unless time and space were ample. At all events, it should be read side by side with Chapter XXX. of Bro. Gould's history; so that the reliability or otherwise of some of the sources depended upon should be tested. At p. 280 Dr. Mackey cites the Charter of Arras (Rose Croix), said to have been granted by Charles Edward Stuart. Now, is it likely, is it even possible, that in his father's lifetime he would describe himself as "We, Charles Edward, King of England, France, Scotland, and Ireland?" Surely, in the face of such a declaration, there is no authority to say as to the authenticity of this Warrant "There appears to be no doubt." It could not be authentic if the document contained any such title.

Another subject has also been more thoroughly elucidated of late years, and in consequence thereof some of the authorities quoted in Chapter XVIII. have been found to be unreliable at times, and rather inclined to treat the question as fiction, instead of as history. The Steinmetzen of Germany are not always safe in the hands of such authors as Fallou (not "Fallon") and Winzer. Gould is much safer than either to follow, and the reader may be confident that existing documents will verify all his statements thereon. Consid-

ering the paucity of really critical works on the subject, Dr. Mackey has done wonders. Kloss is nearly always to be trusted, either as respects Germany or France, but in respect to the latter country all mere statements as to the introduction of Freemasonry must be treated with suspicion; for prior to 1732 we have actually as yet no evidence.

Some parts of Dr. Mackey's massive work are indications as much of his valued opinions as of matters of fact, and these, of course, are left alone, and can not well be questioned, now their author is no more. They are, however, of considerable worth, and, whilst the opinions of some other students may not always coincide, so long as they are accepted as inferences, rather than evidences, they are of special interest and importance, and can not fail to throw light on points needing elucidation, because of their suggestiveness.

The foregoing does not aim at being a microscopic examination of Dr. Mackey's history, but simply a fraternal attempt to read it in the light and by the assistance of valuable discoveries made since the year of his lamented decease.

PRONOUNCING DICTIONARY

FOR USE BY THE

MASONIC FRATERNITY,

Containing over Fourteen Hundred Words liable to Mispronunciation.
The Form of Instruction for Pronunciation is the same Defined
in the American Dictionary, by Noah Webster, LL.D.

BY CHARLES T. McCLENACHAN.

KEY TO THE PRONUNCIATION.

VOWELS, REGULAR LONG AND SHORT SOUNDS.

Ā, ā (long), as in *Āle, Fāte.*

Ă, ă (short), as in *Ădd, Făt.*

Ä, ä (Italian), as in *Ärm, Fäther, Fär.*

Ē, ē (long), as in *Ēve, Mēte.*

Ĕ, ĕ (short), as in *Ĕnd, Mĕt.*

Ī, ī (long), as in *Īce, Fīne.*

Ĭ, ĭ (short), as in *Ĭll, Fĭn.*

Ō, ō (long), as in *Ōld, Nŏte.*

Ŏ, ǒ (short), as in *Ŏdd, Nŏt.*

Ū, ū (long), as in *Ūse, Hŭme.*

Ŭ, ŭ (short), as in *Ŭs, Hŭm.*

Ȳ, ȳ (long), as in *Mȳ, Fȳly.*

Ȳ, ȳ (short), as in *Cȳst, Nȳmph.*

The above simple process is adopted, omitting instruction relating to diphthongs or triphthongs, occasional sounds, or references to consonants.

ACCENT.—The principal accent is denoted by a heavy mark; the secondary, by a lighter mark, as in *Ab'ra-ca-dab'ra.* In the division of words into syllables, these marks also supply the place of the hyphen.
